Source: USIA-commissioned question.

Mr. MOAKLEY. Mr. Chairman, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Chairman, I rise in support of the Moakley-Murtha amendment. When the Jesuits and two others were murdered last November, we saw the most brutal sign of the Salvadoran military's indifference to human rights and the rule of law. The murders revealed a problem which has been an obstacle to peace for over a decade: The military still cannot distinguish between legitimate intellectual dissent and armed insurrection. Clearly, our just sending more military aid will not solve that problem or allow a democracy to develop. Understanding that there is brutality in both sides of this conflict, I believe we need to send a message that the United States Government will not support this kind of brutality.

I have supported aid, military and economic aid, to El Salvador for years. But based on my last trip to El Salvador it convinced me that this war will go on forever with thousands of additional casualties unless the United States pushes the parties to peace. This proposal will help us get there.

What incentive would the Salvadoran Government have to negotiate a peace agreement if United States aid continues to flow without regard to how it is used? The Salvadoran Government has taken the first positive steps toward peace talks with the FMLN in recent weeks only because of threats to reduce United States aid. If the threats prove empty, so will the government's efforts to negotiate with the FMLN to achieve peace. Let us not pass up a chance to vote for peace, support Moakley-Murtha.

□ 2000

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Chairman, I rise in opposition to the Moakley amendment.

The Moakley amendment is essentially the Studds language from H.R. 4636 with a couple of additions from the Broomfield-Byron amendment.

The few changes it makes to the Studds language are not enough to make it any more acceptable.

It still rewards the FMLN guerrillas for its military offensive last November. It still punishes a democratically elected government. And, it still represents a rejection of the administration's effort to achieve a bipartisan consensus on El Salvador.

The Moakley amendment, as the Studds language it replaces, characterizes the two sides in El Salvador as

though they are competing democratic forces. The FMLN guerrillas are not social democrats. They are terrorists, assassins, and saboteurs.

The FMLN says it will not target civilians and then turns around and conducts military activities that cause civilian deaths.

The FMLN says it wants negotiations, but they walked out of negotiations last fall and started a major military offensive that cost the lives of more than 2,000 Salvadorans.

The Moakley amendment cuts military aid to the democratic government by 50 percent but says that the FMLN guerrillas can continue to receive lethal military aid from outside sources like Cuba and the Sandinistas in Nicaragua.

To encourage negotiations, to encourage a peace agreement and to encourage better performance in the observance of human rights, you do not accomplish those objectives by cutting in half military aid to a long-time, valued ally with a democratically elected government, so recognized by all the Central American Presidents.

I urge my colleagues to vote against the Moakley amendment.

Mr. MOAKLEY. Mr. Chairman, for purposes of debate only, I yield 1½ minutes to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. Mr. Chairman, I rise in support of the Moakley-Murtha amendment.

Yesterday, the arms control and foreign policy caucus issued a report documenting that serious human rights abuses have been carried out by troops under the command of 14 of the 15 most senior officers in charge of El Salvador's top commands.

When we got involved in El Salvador, we gambled that we could reform the El Salvador military. This report makes it tragically clear that this gamble failed.

Eleven of the fourteen commanders cited in the report received U.S. training. This raises doubts about the Salvadoran military's ability to absorb human rights principles and therefore about the relevance of the United States training itself.

After 10 years, we must recognize that we have been unable to instill respect for basic democratic values or the rule of law in the Salvadoran military.

One underlying justification for United States security assistance is to professionalize the military in a country like El Salvador and to foster in it a respect for civilian control.

In El Salvador, loyalty between officers prevails over justice. In none of the 50 cases covered by this report have even junior officers been brought to trial. They are protected by their colleagues.

There is widespread corruption in the Salvadoran military. Many officers have knowledge of each other's questionable business practices. United States officials interviewed for the report estimate that 15 percent of the Salvadoran Army is made up of ghost soldiers. These salaries end up lining the pockets of their commanders.

These are extremely disturbing findings.

Whatever one's political perspective on this issue these facts should not be ignored.

This is not a record of which we can be proud. This is not a policy we can continue to sustain.

I urge an aye vote on the amendment.

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Chairman, I will have a smaller post card delivered to my colleagues' offices tomorrow.

This is a repeat, but good things are worth repeating, Mr. Chairman.

Mr. Chairman, I believe everyone in this House wants to see freedom in every country in Central America. Although Abraham Lincoln said in February of 1860, beginning the Presidential election, that different people have different definitions for the word "liberty," and the world has sought for centuries to come up with one unified definition, what some of my colleagues thought was eventually going to be liberty under Danial Ortega did not work out, and a handful of us here cozied up to him so closely that it was bordering on the obnoxious, if not the treasonous, but I think everybody realizes it was good that the first lady in the history of this hemisphere was elected to the Presidency of a country, and maybe, if we get money down there to Nicaragua to help liberty breathe, then maybe we will see the end of killing and terrorism in El Salvador.

Now I was just in the cloakroom and found a full page ad by the airline that I think is the best run in the United States of America, American Airlines, and they say that starting this summer they are going to add to the routes to Guatemala City, San Jose, Costa Rica, and Caracas flights to Belize, two cities in Honduras and to San Salvador, That is the best news I have seen for San Salvador for a long time.

Mr. Chairman, if the FMLN is emboldened by wrong signals inadvertently sent from this House and continues the killing of mayors, the assassinations of elderly priests, as the gentleman I mentioned earlier, an American with dual citizenship in San Salvador, Francisco Peccarini, if they have an idea that somehow or another they can rescue their failed 12-year slaughter in El Salvador by playing games at negotiations, the way we have seen in Vietnam with Le Duc Tho getting the Nobel Peace Prize as he was laying the very plans for a Communist conquest, 2 years of insane deliberation at Panmunjom, months wasted over what the size of the table would be.

Over this last week I have started reading Robert Conquest's book, "The Great Terror." The story of Stalin is so much more horrible than anybody ever discussed on the floor of this Congress over the last 70 years that it defied comprehension. Communism is so rotten and evil, so utterly bankrupt, right before our eyes in just the last few months, and why would anybody of good conscience in this Congress do anything to embolden these pathetic Farabundo Marti terrorists in El Salvador?

Mr. Chairman, I will tell my colleagues what I think on the next go-around because we keep revisiting this.

Mr. MOAKLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from Colorado (Mr. SKAGGS].

Mr. SKAGGS. Mr. Chairman, I strongly support the provision in this bill that would withhold 50 percent of this year's military aid to El Salvador. This kind of action is long overdue; and while I would rather see Congress take even stronger action, I believe this is a worthwhile and needed first step. I urge my colleagues to support this provision and oppose any weakening amendments.

Last week, the Washington Post opined that a vote to withhold military aid to El Salvador would in fact fuel the war and burden any negotiations. Incredibly, the Post argued that the best way to prevent further slaughter in El Salvador would be for the United States to continue to send $1.4 million per day in arms and ammunition, and trust the bloody Salvadoran Armed Forces to do the right thing.

This is the very same argument that the Reagan and Bush administrations have made for the past 10 years. Ten years during which time the Armed Forces have not been effectively reformed. Ten years during which soldiers led by United States-trained officers, armed with United States-supplied equipment, have brutally terrorized and tortured and often murdered Salvadorans by the tens of thousands. Ten years during which labor leaders, priests, human rights leaders, and farm organizers have been targeted for arrest and murder by the Armed Forces and their allied death squads.

That military aid strategy has been proved bankrupt. Enough is enough. It's time for a complete overhaul of our policy toward El Salvador. I hope this bill will start us on the way.

Make no mistake: I am no fan of the rebel FMLN forces. The FMLN has its own history of killings and human rights abuses. For example, human rights observers have amply documented the FMLN's inhuman tactic of mining areas used by civilians, and their cynical terror in killing mayors in rural areas. Similarly, their decisions in November to break off talks, go on the offensive, and use civilians as a shield were reprehensible. A U.S. policy that led to an FMLN victory would be awful.

But it is intolerable to continue to fund the current and macabre status quo. For a full decade, the Salvadoran military has succeeded in stifling any hope for a negotiated political settlement to the current civil war. The military has never had any reason to negotiate, because even after the most brutal and public abuses, the Reagan and Bush administrations have never seriously threatened an arms cutoff.

So it is up to us in Congress to create a mechanism where the Salvadoran military will have something to lose if negotiations don't proceed. Under the provisions of this bill, the Salvadoran Government must participate in good-faith negotiations to bring about a solution, or risk their entire military aid package.

To keep the military in line, another provision would cut off all military aid in the event of a coup by the military. And to ensure that the FMLN does not take advantage of these provisions, full aid could be restored if the FMLN balks at good-faith negotiations. So, we endeavor to make both sides behave.

This is not a perfect arrangement, but it's a good start and one that merits support. The leaders of this effort, including Mr. MOAKLEY, Mr. MURTHA, and Mr. BONIOR, deserve our thanks on this. Once again, I urge my colleagues to vote for this provision and to oppose any efforts to weaken it.

Mr. MOAKLEY. Mr. Chairman, I yield such time as he may consume to the gentleman from New York [Mr. MCHUGH].

Mr. MCHUGH. Mr. Chairman, I rise in support of the Moakley-Murtha substitute conditioning military aid to El Salvador. There has never been a greater opportunity in the last 10 years to bring the bloody conflict in El Salvador to an end. Rapidly changing events around the world in the past year have opened a large window of opportunity which we should not let pass. Passage of this substitute could not be better timed to take advantage of the moment.

As our relations with the Soviet Union continue to improve, civil conflicts around the world are no longer framed in the context of an East-West struggle, and Soviet support for insurgent movements such as the FMLN is ending. The free and fair elections in Nicaragua have also demonstrated that there are peaceful and workable alternatives in the region far more preferable to continued conflict. These events have increased the chances for a negotiated settlement to end the war in El Salvador.

A decade of continued and bloody fighting in El Salvador has led only to a stalemate with no possibility of a military victory by either side. Tragically, this has resulted in over 72,000 Salvadoran deaths, mostly civilian, and cost American taxpayers over $4 billion. It has also caused divisiveness and rancor among the American people and, indeed, among Members of Congress, perhaps unparalleled since the Vietnam war. People on both sides and of all shades of opinion are weary of this seemingly unending conflict.

Mr. Chairman, it is highly appropriate that the initiative for peace be promoted by the United States. Because of our vast investment in time and resources in El Salvador, we have a special ability and responsibility to quickly change the course of the conflict and bring about peace. If the administration is reluctant to exercise the necessary leadership, the Congress must. By failing to act now, the United States will be implicitly condoning extremists on both sides and merely prolonging the inevitable outcome—a negotiated settlement—but at the cost of additional lives and money.

Let us examine this proposal carefully. It is a moderate, middle-of-the-road proposal to use American military aid as a lever to move the entire peace process forward. It would function as two-edged sword, for it would cut either way, providing incentives for both the Salvadoran Government and the FMLN to negotiate a permanent settlement of the war.

The starting point would be to cut 50 percent of the as yet unobligated fiscal year 1990 military aid program and 50 percent of the fiscal year 1991 level. If the Government fails to negotiate in good faith, or to conduct a serious investigation into the murder of the six Jesuit priests, or if the Salvadoran military attempts to overthrow the civilian government, all military aid would be terminated.

On the other hand, the onus is also on the FMLN, for it too must negotiate in good faith, not receive significant lethal military aid from abroad, and refrain from military actions that threaten the existence of the civilian Salvadoran government. Otherwise, all military aid will be restored.

Some have argued that it is unfair to withhold 50 percent of the military aid to El Salvador. After receiving more than $4 billion of assistance from this country, the Salvadoran Government can hardly complain that we have not been supportive. More to the point, why does that Government need military aid at current levels? If it is truly interested in negotiating a peaceful settlement, it should not be conducting military operations as before. If the FMLN disregards the peace initiative and either receives significant military aid from abroad or engages in significant military activity, the President can promptly restore military aid to the Government in toto. If the Government pursues peace in good faith, where is the risk?

Mr. Chairman, I think that this is an eminently fair and balanced proposal. The provision would support ongoing United Nations efforts to mediate the conflict and would protect the constitutional government of President Cristiani from actions to oust it by either the FMLN or the Salvadoran military.

This proposal also provides a vehicle for the administration and Congress to work together toward a mutual object—peace in El Salvador. It does not obstruct the President in his efforts, only requiring that he submit two reports to Congress which simply describe the status of peace negotiations, the criteria he will use to judge its progress, and actions adversely affecting human rights. This is information we will request in any event. If the Congress is unhappy with the situation at the time of the second report, the burden is on us to act within 30 days to disapprove or modify the President's request for the balance of the aid. The 50 percent cut in aid is not automatic.

Mr. Chairman, the time has never been better for a proposal such as this. It offers real hope that a decade of fighting can be brought to an end, thus freeing the Salvadoran people from the terror of war and lifting the burden of financing this costly conflict from the American taxpayer. I therefore urge my colleagues to support this measure.

Mr. MOAKLEY. Mr. Chairman, I yield such time as she may consume to the gentlewoman from New York [Mrs. LOWEY].

Mrs. LOWEY of New York. Mr. Chairman, I rise in strong support of the Moakley-Murtha amendment, which will add further conditions on aid to El Salvador over and above those which are already contained in this bill.

It is absolutely essential that we act now to condition aid to El Salvador. In fact, I favor a much more significant change in policy than the one that is contained in this bill. I am a cosponsor of H.R. 3733, legislation proposed by Representative DELLUMS to cut off all aid to El Salvador until that nation dramatically improves its human rights record.

United States policy toward El Salvador is not working. We have sent billion of dollars of United States aid to El Salvador in recent years.

However, this aid has not contributed to an end to the bitter conflict in that nation.

It has not brought an end to the brutal murders of civilians by the military in that nation.

It has not brought an end to the outrageous human rights abuses in that nation.

Rather, the violence, the killings, and the human rights abuses continue unabated.

When six Jesuit priests and other civilians were brutally murdered in El Salvador last fall, I called on President Bush to suspend all military aid to El Salvador until death squad activities have ceased, the responsible parties have been brought to justice, and human rights reforms have been enacted. Although President Cristiani has now acknowledged that the Salvadoran army was responsible for the killings, the responsible parties have not yet been brought to justice, and there appears to be a significant question as to whether this will ever occur. I do not believe that we should continue U.S. aid unless the guilty parties are convicted and sentenced, and we are certain that these heinous crimes will not be repeated in the future.

In addition, we must do whatever is possible to encourage a diplomatic resolution of the conflict in that nation. The Moakley-Murtha substitute begins this essential process.

To help encourage a negotiated settlement of the war in El Salvador, the bill as drafted withholds 50 percent of United States military assistance to that nation. The aid could be restored or completely eliminated if the President certifies that specified actions by the Salvadoran Government or the rebels have occurred.

Importantly, all military aid to the Salvadoran Armed Forces would be terminated if the President determines at any time that: The Salvadoran Government has not conducted a thorough and professional investigation into the murders of the six Jesuit priests, their housekeeper, and her daughter; the Salvadoran President has been overthrown in a military coup; or the Salvadoran Government has not participated in good faith in peace talks or is not supporting an active United Nation role in the talks. This aid cutoff would apply to all

fiscal year 1990 and fiscal year 1991 military assistance.

At the same time, military assistance could be restored if the FMLN has not negotiated in good faith or has failed to support an active role for the United Nations in the peace talks; the United States Government has proof that the rebels are continuing to acquire significant shipments of military equipment from abroad; or the rebels have launched a military offensive which jeopardizes the survival of the Salvadoran Government.

The Moakley-Murtha substitute goes even further than the pending bill in placing additional conditions on aid to El Salvador. It also contains important provisions designed to strengthen civilian control over the military and to authorize funding for monitoring local elections in El Salvador. And it requests essential information from the President on progress made by El Salvador relating to judicial reform, freedom of the press and assembly, and military reform.

It is time to rethink our Nation's approach to the conflict in El Salvador. We cannot continue to blindly send United States dollars to El Salvador when atrocities of this nature continue to occur. While the Moakley-Murtha amendment does not go as far as I think it should, it represents a strong first step in the fight to end the horrible human rights abuses in El Salvador and to bring about a peaceful resolution of the conflict in that nation.

We simply cannot tolerate a continuation of the status quo, which perpetuates the cycle of violence in that nation. To do so makes the taxpayers of the United States accomplices to these atrocities. We must change United States policy toward El Salvador so that we will make a real contribution toward peace and democracy.

Once again, I urge the support of my colleague for the Moakley-Murtha amendment, which will begin this important process.

Mr. MOAKLEY. Mr. Chairman, for purposes of debate only, I yield 1½ minutes to the gentleman from Wisconsin [Mr. MOODY].

Mr. MOODY. Mr. Chairman, I have been to El Salvador four times, and every time I go people are wringing their hands about the latest atrocity committed by the El Salvador military. There are atrocities on all sides; we know that. But we are not funding the atrocities by the FMLN. We are funding the El Salvador military.

On my last visit I went to a village called Corral el Piedra which the El Salvador Air Force, with our funds and with our weapons, bombed, rocketed, and strafed. The bombing killed 5 people, 4 of them children, and wounded about 30 others. The Government tried to blame the guerrillas for the deaths, but then it turned out the Government with our money had killed these civilians. The eventual rationale was that guerrillas had been seen in the area. But in this attack, no guerrillas were hurt, only civilians.

Mr. Chairman, those were our funds that financed that attack on unarmed civilians, and many others. If we are not prepared after 8 years and $4 billion to begin putting conditions on these moneys, given the fact that these atrocities against civilians, one after another, have been committed with our funds, I really wonder where the moral leadership of this Congress would be.

The key to this Murtha-Moakley amendment is that for the first time we would provide incentives for negotiations to be concluded, not just engaged in. Right now the El Salvador military has very little incentive to successfully conclude the negotiations, only to engage in the negotiations, for the El Salvador military is on a very lucrative gravy train of United States aid. The negotiations will only succeed when each side recognizes that the war will be defunded, and each side will eventually have to live with each other.

We have to make it clear that we know what our own intelligence people have said, that war is militarily unwinnable by either side. Thus negotiations have to happen, and they have to be concluded successfully. That is the only way the killing can stop. This amendment provides for the first time the incentives to accomplish that. We owe it to our own beliefs, and to the thousands who will yet be slain if the war is not ended, to pass this amendment.

□ 2010

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from California [Mr. ROHRABACHER].

Mr. ROHRABACHER. Mr. Chairman, I rise in opposition to the Moakley amendment.

I sent this bullet to my colleagues in a Dear Colleague letter earlier this week. This bullet was manufactured in Cuba last year. It was captured in El Salvador in March of this year.

If we establish ground rules on our aid to El Salvador, to the democratically elected Government of El Salvador, the only ammunition that will be flowing into El Salvador will be coming from Cuba. That will not lead to more democracy. That will lead to a Cuban-style dictatorship. Castro is not going to quit sending his bullets because of high-sounding rhetoric coming out of the Congress of the United States.

President Cristiani has courageously stepped forward to admit that renegades in his own armed forces committed murders against church men and women in El Salvador, but to threaten President Cristiani's aid is absurd and counterproductive and it will mean even more killings on both sides.

Holding a democratically elected government liable for a lack of progress toward a negotiated settlement which is totally dependent on the good intentions of Communist guerrillas will be even more absurd and more counterproductive.

There is no symmetry in this amendment. It is weighted on the side of the Communist guerrillas because it will cut off aid to Cristiani. It will mean a continuing flow from Cuba of this type of ammunition to the Communist guerrillas.

Let us defeat this amendment. Let us give democracy, President Cristiani and our friends, a fighting chance in Central America.

Mr. MOAKLEY. Mr. Chairman, I yield 3 minutes to the gentleman from New York [Mr. SOLARZ.]

Mr. SOLARZ. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, our friends on the other side of the aisle have denounced the amendment before us on the grounds that it would reward terrorism and penalize democracy.

I say it would do nothing of the sort. I think it is a constructive amendment. I think it is a creative amendment. I think it is a commendable amendment.

Our friends on the other side of the aisle say that if this amendment is adopted it could result in a 50-percent reduction in the level of our military assistance to the armed forces of El Salvador; but in order for that 50-percent reduction to take place, the President of the United States, no friend of urban terrorists, would have to find that the FMLN in El Salvador is willing to negotiate a settlement of the conflict in good faith, that it is no longer receiving significant amounts of military assistance from outside of the country, that it is no longer engaged in the assassination of civilians or is attacking civilian targets and that it is not posing a serious threat due to offensive operations to the survival of the Government of El Salvador.

Now, I want to ask my friends on the other side of the aisle, if in fact the FMLN is willing to negotiate a settlement and a cease-fire in good faith, if it is in fact no longer receiving significant amounts of arms from outside of the country, if in fact it is no longer assassinating civilians or attacking civilian targets, and if in fact it is not posing a serious threat to the survival of the government, then why not reduce the level of military assistance by at least 50 percent? Under those circumstances, if we are on the verge of a cease-fire, if the guerrillas are not attacking civilians or civilian targets, if they are not getting arms from outside the country, if they do not pose a threat to the survival of the government, then the government does not need 100 percent of the aid.

I would say to my friends on the other side of the aisle that $42.5 million, the cut that would be made in our military assistance to El Salvador, is a small price to pay to get a cease-fire, to get the guerrillas to stop receiving arms from outside the country,

to induce them to refrain from assassinating civilians and attacking civilian targets, we could increase by a factor of 10 or 100 the amount of military assistance to the Government of El Salvador, and it will not solve the problem; but by offering this modest incentive to the FMLN we may, in fact, be able to take a significant step toward a solution of the problem.

So Mr. Chairman, I urge the adoption of the Moakley-Murtha amendment.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding me this time.

Mr. Chairman, let us clarify who is who and what is what. At the outset of this debate, we were told we should support the Murtha-Moakley amendment because it would help President Cristiani.

Does President Cristiani support this amendment? I am told that he does not. So much for that reason for supporting the amendment, unless we are arrogant enough to believe that we know what is good for President Cristiani better than President Cristiani does.

We have been told that this is a balanced amendment. If that is so, would the FMLN be supporting an amendment which was truly balanced? I do not think so. I doubt the FMLN would come out for an amendment that was balanced in any way, shape, or form, and yet they support this amendment. At least I am told that their front group in the United States, called CISPES, supports it. That would seem to indicate that the amendment lacks balance, but instead leans toward the goals of the Communist guerrillas.

If you look at who is who and what is what, it seems to me you have no choice but to vote against the amendment.

Mr. MOAKLEY. Mr. Chairman, I yield 2 minutes to the gentleman from Florida [Mr. FASCELL], the distinguished chairman of the Committee on Foreign Affairs.

Mr. FASCELL. Mr. Chairman, I thank the gentleman for yielding me this time.

I rise in support of the substitute amendment that the gentleman from Massachusetts has proposed. It is a good substitute, because it places additional conditions relating to the conduct of both the FMLN and the military forces of El Salvador and makes other conditions, such as providing for civilian control over the military, by making aid go through the President and other matters. It does not touch the funding.

Let me say, Mr. Chairman, that the rationale is hard for me to understand. The more I hear about this debate, the less I understand why we are debating it. If the rationale is that the FMLN is acting up because of this resolution, the President would have the right immediately to say he is going forward with the assistance, and I doubt that anybody could stop it.

Furthermore, if we assume that the FMLN is good, acting properly, what happens is this. The $130 million in military assistance still goes forward, half in fiscal year 1990, which is $70 million, and half in fiscal year 1991, which is roughly $42½ million, or roughly $130 million.

The substitute amendment does not take that money away from the people of El Salvador. It puts it on the economic side, where presumably if both parties are acting in good faith and they are acting for the benefit of the people of El Salvador, you need less military aid and more economic aid.

Finally, all the decisions on this are subjective. They will be made by the President of the United States.

If you do not vote for this substitute and you do not vote for the bill, remember this. You will be voting against assistance to Panama, assistance to Nicaragua, assistance to Haiti, assistance to the Caribbean, additional assistance for refugees in Africa, housing investment guarantees for Israel, and other important programs.

Mr. Chairman, I urge a vote for the substitute amendment and for the bill.

□ 2020

Mr. BROOMFIELD. Mr. Chairman, I yield 3 minutes to the distinguished gentleman from Arizona [Mr. KYL].

Mr. KYL. Mr. Chairman, I am truly perplexed at what we are doing here today.

For a long time the United States has tried to influence events in El Salvador, and through the efforts of the leadership on both sides of this body and the administration, we have made a lot of progress.

When Alfredo Cristiani was elected President of El Salvador, I think most of us felt that we had a real chance not only to assist economically but also to improve the conditions for human rights in El Salvador, and I do not think anyone here would suggest that President Cristiani has not tried very hard to achieve that result. As a matter of fact, I appreciated the comments of the gentleman from Pennsylvania who has coauthored this amendment in that regard, and I know that he has tried very hard to reach a common ground here in achieving both the goals of assisting economically and helping with regard to human rights.

But this amendment does not further that end. We know the President will veto the bill if either the Moakley amendment or the original bill are adopted. So what is the purpose of pursuing this amendment but to provide embarrassment and further contention on the issue?

We have provided aid in this amendment; 50 percent of the aid for the military would be cut, and 50 percent of the aid in the pipeline for 1990, and 50 percent of the 1991 aid would be cut. Why are we cutting the 1990 aid as we are already into this calendar year? There is not a real explanation as to how this is going to positively influence events in El Salvador.

It is just beyond me, Mr. Chairman, why, if we are really concerned about providing positive incentives to the Government of El Salvador, we are going to do this to them when it is very clear this is exactly counterproductive to their efforts to achieve human-rights reform.

We need to assist President Cristiani, not punish him Mr. Chairman, it just does not seem to me this proposal would provide any kind of positive incentive for President Cristiani.

What are we really trying to achieve here?

Then on the other side of the coin with regard to the FMLN, we do not hold them accountable if they engage in economic sabotage, if they continue to import arms in violation of the Arias peace accord which has, of course, been occurring, if they continue to launch a bloody offensive, it does not do anything about that, or the killing of civilians and in terrorist attacks.

It just does not seem to me, Mr. Chairman, that this amendment or the original bill is going to be productive. Therefore, I wonder what we are doing here.

Since the President will veto the bill, let us go back to a proposal that will actually have an influence in El Salvador that will positively influence events there both economically and in the sense of advancing the cause of human rights.

If we are able to do that, I think we can say we have done something good for the establishment of democracy and human rights in Central America.

So I reluctantly urge a no vote on the Moakley amendment.

Mr. BROOMFIELD. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. GEKAS].

Mr. GEKAS. Mr. Chairman, I am indicating that I will vote no on this amendment.

Mr. BROOMFIELD. Mr. Chairman, I yield the balance of our time to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Chairman, let me say that I rise to speak against this amendment with great sadness. I have the greatest respect for the distinguished chairman of the Committee on Rules. I have great respect for the gentleman from Pennsylvania who has

so often been helpful in so many ways on defense and foreign policy, and yet as I look at the various analyses of the bill and of the amendment, as I talk with the State Department and the White House, I have to come to the conclusion that the Moakley-Murtha amendment is, in fact, simply Studds with a Pennsylvania accent, that it is in fact simply the same basic problem.

I want to start by reading from the Washington Post, because I think their editorial of Tuesday, May 15, said it all. They went right at, I think, what is the core problem with this amendment, and, frankly, the reason that I would urge the President to veto this bill in its current form or with this amendment.

The Washington Post, in an editorial entitled "To Help Salvadorans Negotiate," said the following:

The House Democrats have chosen an odd moment to press their attack on military aid to El Salvador. Formal negotiations between the Salvadoran government and guerrillas are due to start tomorrow in Caracas under the United Nations. These talks face great uncertainties, but the uncertainties could only be aggravated if the United States were to send "its" side to the table with a thunderous no-confidence gesture. Why would liberal Democrats think such a signal would make either government or insurgents more receptive to the concessions that both must make if something resembling peace is finally to come?

Part of the answer is that supporters of an aid cut are disgusted by the failure of El Salvador to bring the murderers of the Jesuits to swifter, surer justice. Nor is that terrible crime the only one that matters. The protesting congressmen are completely right to be disgusted. But they are not right to think that an aid cut is the best remedy. An aid cut is less likely to punish the armed forces, and least of all to ensure justice for the Jesuits, than to tip the armed forces even more toward vengence. The last time the army agreed to go along with negotiations, the guerrillas used the time to prepare and launch the most ferocious offensive of the war—in the cities last November. To imagine that the army would quietly absorb an aid cut and support the elected governemnt in new negotiations is to live in a dream world. A vote for an aid cut is, perversely, a vote to fuel the war and burden negotiations.

The United States could, of course, walk away from El Salvador. This would tend to be the practical effect of an aid cut, which would not only stiffen the military but tempt the guerrillas to play out talks to tire Congress. But this is a strange time to make a decision likely to add to El Salvador's agony. The turn from war to elections in Nicaragua sets a relevant example. For the first time in El Salvador, there's a serious mediator—the U.N. Moscow if not Havana has shown itself ready to turn down the Central American heat. The Bush administration asks for the opportunity to apply the bipartisanship it demonstrated it could put to good use in Nicaragua. It has a policy focused in the first instance on a cease-fire. This is the way to prevent further Jesuit slaughters and further FMLN assaults and to turn El Salvador onto a road to peace.

That is all the Washington Post. That is not a rightwing publication. That is not George Bush.

What is it saying? It is saying that we are at a tender moment in Central America when we have an opportunity to encourage the government and the guerrillas to negotiate to an agreement that would end the killing.

What does it say of the proposal from the Democratic left? It says, "It is to live in a dream world. A vote for an aid cut is, perversely, a vote to fuel the war and burden negotiations."

I know my friends mean well. I know how deeply their heart is burdened. But if the effect of what they are doing is to say to the hard-line elements of the army, "You had better slaughter everyone now before the American aid ends," if the effect of what they are doing is to say to the guerrillas, "You had better drag out the war until the U.S. Congress cuts off all the money," what a terrible tragedy, if those who in this House have most frequently spoken for peace were tonight to offer an amendment which even the Washington Post says may perversely increase the risk of bloodshed.

Then, of course, having realized that the original Studds proposal was a disaster, there is an effort to develop a figleaf to provide a few difference, and yet any reasonable analysis suggests that with only exceptions, all other provisions are identical, including the lack of positive incentives for the Government of El Salvador, the withholding of 50 percent of fiscal year 1990 and fiscal year 1991 military assistance, the tranching of 25 percent of fiscal year 1991 aid, and seriously flawed expedited procedures.

To vote yes on this amendment, I think, is to run a real risk of increasing the danger of war in El Salvador.

□ 2030

Mr. MOAKLEY. Mr. Chairman, I yield such time as he might consume to the gentleman from Minnesota [Mr. SABO].

Mr. SABO. Mr. Chairman, our policy in El Salvador has failed. The civil war in that country has gone on for 10 years now, and 70,000 people have died. The Salvadoran justice system is a farce, and based on the report of the Speaker's task force, it appears that the investigation of the November Jesuit murders has stalled. Even though we have seen several democratic elections, it is obvious that the military continues to be the strongest element in the country. It is also clear that neither the Government nor the guerrillas can win a military victory.

As we debate the issue of aid to El Salvador, it seems to me that we all have common hopes for the people of that country—to end the fighting and bloodshed, to foster respect for human rights, to encourage serious negotiations. In short, our goal is to help both sides in the Salvador conflict find solutions to their many conflicts and disagreements.

It is important that we send a message to both the government and the guerrillas that they must be willing to compromise. Negotiations without compromise are meaningless and I, for one, am not prepared to support a continuation of aid to El Salvador without progress in the peace talks.

The Broomfield substitute, which would not withhold any aid, is clearly not the way to go. It is little more than a smokescreen that calls for a continuation of business as usual. It would continue a seriously flawed policy at a time when substantial change is desperately needed.

I urge my colleagues to reject the Broomfield substitute and support the Moakley-Murtha plan. It strengthens the prospect of accomplishing the goals we share for resolving the conflicts that are tearing apart this war-torn country. It is certainly the only proposal I have seen that creates strong incentives for all parties in the conflict to engage in serious negotiations.

Under the terms of the Moakley-Murtha substitute, the United States would withhold half of all military aid provided in both fiscal years 1990 and 1991, unless the FMLN guerrillas launch a military offensive, refuse to participate in negotiations with the Cristiani government, receive large-scale arms shipments from foreign powers, assassinate or abduct civilians, engage in violent acts against civilians, or fail to stop such attacks by elements under FMLN control.

All military aid would be terminated if the Cristiani government is overthrown, if the government fails to conduct a thorough investigation into the 1989 Jesuit murders, if it refuses to negotiate with the guerrillas, or if the military is assassinating or abducting civilians, engaging in violent acts against civilians, or failing to stop such attacks by elements under its control.

There are many other provisions, including one which requires the prior approval of the President of El Salvador before any military assistance can be delivered to the armed forces. That should help take the much-needed step of strengthening civilian control over the military.

But in my view, the single most important aspect of this bill is that it provides incentives for peace, not for war. It encourages the FMLN to put down its arms and rejoin the democratic process. It encourages the government to control the thugs and assassins in the military. It tells the military that human rights violations will not be tolerated. And it makes it clear to both sides that the United States expects them to engage in the process of give-and-take that characterize all serious negotiations.

Mr. Chairman, I urge my colleagues to support the Moakley-Murtha substitute and the supplemental foreign aid bill.

Mr. MOAKLEY. Mr. Chairman, I yield myself such time as I have left.

The CHAIRMAN. The gentleman from Massachusetts is recognized for 8 minutes.

Mr. MOAKLEY. Mr. Chairman, for 10 long years, the people of El Salvador have confronted the harsh realities of war, and all its painful conse-

quences. They have been forced to suffer far more, than any of us in this chamber can possibly realize. And, now, they beg their leaders, and they plead with us, for peace.

Those of us in this chamber have had, over the years, heated debates on the issue of United States policies in Central America—and today is no exception. But I believe it is important to recognize that there are new attitudes and actions by the Bush administration and Members of both parties, to achieve common ground, and a bipartisan policy, towards dealing with El Salvador.

I commend Secretary of State Baker, and Assistant Secretary Aronson, for their willingness to attempt to reach an agreement on this issue. And, I hope, whatever the outcome of today's vote our negotiations with the administration will continue.

I also want to commend my colleagues on the other side of the aisle—many who have approached this delicate issue with great sensitivity. Despite the differences we may have over today's vote. I have no doubt that every Member of this body shares the goal of peace with democracy in El Salvador. I have no question about this.

And, I also have no question that the President of El Salvador, Alfredo Cristiani, is a man of good will, who has a deep commitment to the well being of his countrymen. I seek support for the Moakley-Murtha substitute in order to strengthen President Cristiani, to allow him the ability to lead his people to the future of peace and justice.

Mr. Chairman, over 6 months ago, in the middle of the night, six of the most respected Jesuit priests in El Salvador, along with their housekeeper and daughter, were brutally murdered by members of the Salvadoran military. Those who pulled the trigger and committed this heinous crime, included men trained with American money, by American servicemen, on American soil. We all bear some responsibility for this crime—in much the same way we must all bear some responsibility for the war, which has claimed over 70,000 lives.

The faces of the six holy men, and the mutilation of their bodies, are now known to all of us, and to all Americans. But sometimes, I think we have not seen, or have more easily forgotten, the faces of those 70,000 Salvadorans over the past 10 years who have lost their lives because of the war.

Mr. Chairman, every human being is holy and every human soul is deserving of justice.

On December 5, Speaker TOM FOLEY appointed me chairman of a special task force to monitor the Salvadoran Government's investigation into the murders of the Jesuits, and to report directly to him and to the Congress. The task force completed and submitted an interim report on April 30—which you have all seen.

It's a fair report—and it's an accurate report. It calls the Jesuit investigation flawed—and warns that the investigation is in danger of falling apart. It is important to emphasize that the investigation is in disarray, despite the fact that there has been an enormous amount of international pressure demanding that justice be done in this case.

And I truly believe that the existence of the task force and its report—and the concern of so many in this Congress—has helped achieve the very limited progress we have seen on the Jesuit case.

But, it is unrealistic to believe that every time there is a human rights abuse in El Salvador, the Speaker will appoint a task force to apply pressure to the appropriate authorities. And after 10 years of United States aid and influence, it is a sad commentary that congressional delegations—both Democratic and Republican—have felt compelled to travel to El Salvador to plead with the military. The investigators, the Attorney General, and the judge to move on the case. That is very troubling.

Also troubling is the fact that the murder of the Jesuits was not an isolated incident. The murders reflect problems within the Salvadoran armed forces that go far beyond the actions of a particular unit on a particular night. These murders are not simply the actions of a few renegade military and political figures operating at the margins of Salvadoran society but they stem from attitudes and actions that go to the very heart of the armed forces and other major institutions in that country.

Time and time again we have heard top Salvadoran military and political officials label the Jesuits and other religions as Marxists and enemies of the State.

Mr. Chairman, such accusations are an outrage. In the United States, such accusations would be an insult; in El Salvador, they could be a death sentence.

I knew two of the slain priests—Father Segundo Montes and Father Ignacio Ellacuria. They were friends. They were men of peace who condemned the violence on both sides. In fact, President Cristiani publicly praised the work of father Ellacuria.

But sadly, to this day, there is an attitude of suspicion and anger towards activist segments of the church that remains all too widespread within the Salvadoran armed forces and certain other sectors of Salvadoran society. It is an attitude that allowed for the murders of the six Jesuits.

Mr. Chairman, with deep regret I have concluded that the American people and the American Congress have been played for fools by the Salvadoran military and forces from both the left and the right, who need war to continue, in order to sustain and expand their power and dominance in that troubled land. Corruption is a way of life and American taxpayer money for 10 years now has not been used to build peace with democracy—but to destroy hope and build the private bank accounts of those who get rich at the expense of the Salvadoran people and the American people. This must end and it must end now.

Elements of the FMLN, like elements of the Salvadoran military, are committed not to peace but to war. Let me be clear that I condemn all parties, and all individuals, who ignore the needs of the Salvadoran people and seek only to sustain the war in order to sustain their power. The Moakley-Murtha proposal, I believe, will end this travesty, and restore to the civilian government of El Salvador, the rightful authority to meet the needs of its people and end the tyranny of the corrupt and violent.

Mr. Chairman, I am a bread and butter politician from South Boston—not a foreign policy expert. This is my first foray into the world of international politics. But when it comes to the issues of life and death, justice and injustice, dignity and inhumanity—you do not need a Ph.D. in foreign policy to take a stand.

I am taking a stand today. Enough is enough. The time to act has come. They killed six priests in cold blood. I stood on the ground where my friends were blown away by men to whom the sanctity of human life bears no meaning—and men who will probably never be brought to justice.

Mr. Chairman, it is time to act

The Moakley-Murtha substitute puts pressure on both sides to end the violence and negotiate peace.

Peace, if it comes, could mean a restructuring of the Salvadoran armed forces—and a major reduction in its numbers.

It could provide an opportunity to seriously reform the judiciary.

It could end the economic sabotage and political killings.

It could allow for greater respect for the views of political dissenters.

And it could allow the Salvadoran people a chance at true democracy—something they desperately want.

Mr. Chairman, I plead with my colleagues today to help make peace a reality in El Salvador.

Vote yes on the Moakley-Murtha alternative. And vote yes on final passage.

Mrs. LLOYD. Mr. Chairman, I rise today in opposition to the provisions contained in title V of H.R. 4636, as well as the substitutes to those provisions offered by my colleagues from Massachusetts, Pennsylvania, and Michigan. I think everyone in this Chamber desires

a peaceful settlement to El Salvador's tragic civil war, but I do not believe the options before us today advance that cause.

There is general agreement that the prospects for peace in El Salvador are brighter today than at any point in past. Cold war tensions are subsiding and support in the Soviet Union for proxy wars like the one it has helped carry on in El Salvador is evaporating. United Nations mediated peace talks between the Salvadoran Government and the FMLN have begun. The presence of the United Nations at the negotiating table lends these talks a credibility previous negotiations between the government and the FMLN lacked.

The question before us today is, "how can the United States best contribute to the prospect for peace in El Salvador and advance the negotiatons?" Asking this question is a lot easier than developing an aid policy which answers it.

The bottom line is that any aid program this body adopts today must be balanced. The incentives to negotiate in good faith and produce a lasting peace and the punishments for failing to do so must weigh as heavily upon the Government of El Salvador as they do the FMLN. An imbalanced approach will ultimately undermine the negotiating process. It is my opinion that none of the options before us today strike that balance. Adoption of any one of them, the recommendation of the Foreign Affairs Commitee, the Moakley/Murtha amendment, or the Broomfield amendment, will not further United States policy in El Salvador and contribute to a peaceful resolution of that country's civil war.

The Foreign Affairs Committee language and the Moakley/Murtha language rightfully condemn the human rights abuses by the Salvadoran military and calls upon the Cristiani government to prosecute those responsible for the heinous attack on six Jesuits and two women at Central American University last November. However, I believe it is inappropriate to cut fiscal year 1990 military aid. The broomfield amendment does not make any significant changes in United States policy towards El Salvador. Yet, the problems highlighted by the Speaker's Task Force on El Salvador with the Jesuit investigation and the Salvadoran judicial system, as well as the just initiated negotiations between the Cristiani government and the FMLN clearly suggest some changes in United States policy toward El Salvador are necessary.

There is a opportunity to reach a bipartisan accord on United States policy towards El Salvador which will contribute to a peaceful solution to that country's civil war. Today's debate preempts that possibility. Rather than address the issue of the United States' policy toward El Salvador during consideration of the fiscal year 1991 foreign aid bill, as I believe appropriate, the issue is being forced upon us prematurely without thoughtful consideration to the latest developments in El Salvador. I am speaking of reports in this morning's Washington Post that the Cristiani government and the FMLN have reached agreement setting September 1990 as the target date for implementation of a cease-fire.

Mr. Chairman, I urge my colleagues to vote "no" on all the amendments relating to title V, as well as "no" on final passage.

Mr. ATKINS. Mr. Chairman, I rise today to offer my support for the Moakley-Murtha substitute pertaining to aid to El Salvador in the supplemental foreign assistance to emerging democracies bill. For the first time, the United States would be withholding a large portion of military aid to El Salvador and, simultaneously, linking aid to the transgressions of the rebel FMLN forces as well as the Government of El Salvador itself.

The legislation before us today withholds 50 percent of the fiscal year 1990 funds that have not yet been spent, and 50 percent of the authorized fiscal year 1991 funds. Should the FMLN or the government cease to negotiate in good faith; if bloody reprisals begin anew; or if massive flows of arms are funneled to guerrilla forces, then assistance levels would reflect new circumstances. Moreover, this legislation insists that the Salvadoran Government finally conduct a thorough investigation of the Jesuit priests and bring to justice those who would commit such heinous crimes.

Among those who have taken up arms in El Salvador there are no innocents. The government and the rebels alike have wantonly and knowingly taunted and brutalized and terrorized the Salvadoran people. If the United States does not act, there will be no advocates left who have the strength, the will, or the power to sue for peace.

It is the Moakley-Murtha substitute which wisely looks after the innocent civilians of El Salvador. This provision has our aid serve as an inducement for long overdue relief for civilians living a life of fear and anguish. If the police or the military in El Salvador again begin the assassination or abduction of civilians; or if they commit acts of violence against civilian targets; or if they fail to control elements within El Salvador who brutalize civilians, all aid will be cutoff immediately. Likewise, if such acts are committed by the FMLN, the government forces would be put at an advantage.

Mr. Chairman, we can no longer be a party to the cycle of violence that has haunted Central America for so many years. We must admit to ourselves that our aid has not contributed to a more just and Democratic society in El Salvador. Indeed, we must face the fact that for the preponderance of Salvadorans, theirs is a frightening, repressive, and bleak world and, sadly, the United States has not thus far been able to help them. Let us now try something new; let us apply our massive amount of aid for the good of the innocent civilians or let us cease aid altogether. But, let us no longer give comfort to the combatants who wantonly murder priests, mothers, children, farmers, and all the Salvadoran innocents.

Mr. OWENS of New York. Mr. Chairman, I rise in strong support of the Moakley-Murtha substitute amendment for aid to El Salvador. I believe the committee reported provisions are good, but the Moakley-Murtha substitute is better.

During the past 10 years the United States has sent nearly $1 billion in military aid to El Salvador. During that time the Salvadoran military has expanded its power base, terrorized and murdered civilians, ignored even the most basic human rights, and acquiesced to death squad activities.

The ongoing abuses suffered by the Salvadoran people at the hands and weapons of the Salvadoran military grow to numerous to count and too ghastly to comprehend. The tragic murders of the Jesuit priests, their housekeeper, and her daughter has only been one of the more recent and one of the more widely publicized atrocities committed at the hands of the Salvadoran military. The time is growing increasingly urgent to send a strong and indisputable message that the United States will not support a military that considers itself above its own law. The Salvadoran military has never been held to account for all of the crimes of its members and even its leaders. This must end.

Ideally, Mr. Chairman, I would like to see all military aid to El Salvador stopped. As far as my constituents are concerned, the closer we get to the goal of no military aid to El Salvador, the better. We want to see peace in that country. But as long as the Salvadoran Government believes that we are willing to support their military activities indefinitely there will be no peace. We must show both the government and the FMLN that we are serious when we say we want peace. We must show them that we mean for this never-ending cycle of cease-fires and broken negotiations to stop now.

It is clear that the Moakley-Murtha substitute will only strengthen the peace promoting provisions contained in the bill. The provisions outlined for receipt of aid clearly support the peace process and do not in any way hinder the Salvadoran Government. If the FMLN does not negotiate in good faith or resumes hostilities toward the government or toward the Salvadoran people, the aid will continue. This substitute does not encourage the FMLN to break the cease-fire.

As with the rest of the world, Central America is undergoing significant democratic changes. Many of the corners of Central America are being swept with a new, refreshing, democratic breeze. As with our military policy in Eastern Europe and throughout the world, it is time to rethink and restructure our political policy in Central America.

Mr. Chairman, this is the most opportune time to demonstrate to the Salvadoran military that we intend for them to change their ways and to do so with all due speed. With the changes occurring throughout the world and even in Central America we cannot—indeed we must not—continue to write the Salvadoran military a blank check to continue its horrendous crimes against its own people.

If we have any conscience at all, we must support the Moakley-Murtha amendment to send as strong a message as possible to the Salvadoran military that we don't just want a cease-fire, we intend the abuses and the war to cease permanently.

Mr. FAZIO. Mr. Chairman, I strongly support the Moakley-Murtha amendment to H.R. 4636, which will strengthen the provisions in the legislation relating to El Salvador and promote a negotiated settlement to that nation's ongoing civil war.

The need for a peaceful settlement in El Salvador continues. Ten years of civil war has

claimed more than 70,000 lives and graphic accounts of brutal and senseless murders continue. The unsolved and unpunished murders last year of six Jesuit priests, their housekeeper, and her daughter, highlight the need for a policy which will address these atrocities and bring peace to the Salvadoran people.

The Moakley-Murtha substitute offers a reasonable approach for a peaceful settlement to the Salvadoran civil war. It provides strong incentives to both the Salvadoran military and the FMLN to stop the killings and prod the negotiations forward. It will strengthen the hand of those who want successful negotiations and weaken those who are not willing to seriously negotiate a settlement. Violence will be curtailed by both sides by either restoring or completely eliminating all aid on the basis of specific actions by the FMLN and the Salvadoran military.

We need to act now to encourage negotiations for a cease-fire and lay the foundation for democratic and judicial reforms that will bring all Salvadorans into the political process. Clearly the unconditional aid given in previous administrations to El Salvador has not reduced the violence and has not led to peace. The Moakley-Murtha amendment represents a viable solution to bringing about peace. I urge my colleagues to support this amendment.

Mr. CONTE. Mr. Chairman I rise in support of the Moakley-Murtha amendment. In the last 10 years, El Salvador has held six elections.

Three Salvadorans have held the presidency—the last two elected freely and fairly. We have seen some progress on rural land reform. The FMLN has cut back its demands in the peace talks to a point where almost everyone agrees that a negotiated peace is possible.

So I cannot agree when people say our policy has completely failed.

But it has failed to bring reform to the Salvadoran military.

The officer corps remains accountable neither to the President nor to the law, and if there is ever to be peace and true democracy in El Salvador, that must change.

Colonel Benavides, accused of ordering the murder of six Jesuit priests and two women at the University of Central America, spends most of his time in a cushy apartment and even made a vacation trip to the beach.

The military command "punished" a colonel accused of organizing a kidnapping ring by transferring him to the Salvadoran Embassy in Honduras.

A judge this month dropped charges against soldiers—accused of the unprovoked murder of 10 peasants at San Sebastian in 1988 despite the work our Ambassador has done to get a conviciton.

Mr. Speaker, this has got to stop.

And over the last 6 months, the deadlocked investigation of the killings at the University of Central America—the failure to punish the criminals who massacred teachers, who killed six peaceful men of God and an innocent mother and child—has convinced me that our current policy can't stop it.

The Moakley-Murtha amendment is not a radical amendment, nor is it an attempt to wash our hands of El Salvador's problems.

It is a positive incentive for military reform, for an end to disappearances and murder by the radical left or the death-squad right, and for negotiations in good faith.

It is an attempt to stop human rights abuses—rebel offensives and attempts to overthrow the government by violence.

It is a statement of support for Salvadorans of all political persuasions who want to end the war and sort out their differences in peace.

It has the support of President Duarte's Christian Democratic Party and the Archbishop of San Salvador.

I hope it will have the support of this House as well. Listen to the voice of America's Jesuit community before you vote.

Listen to my dear friend Father Donald Monan, the president of Boston College, when he asks us to heed the message of the killing at the university. I urge a vote for the Moakley-Murtha amendment.

Mr. GREEN. Mr. Chairman, with a population of less than 6 million people, El Salvador is the fifth largest recipient of United States aid. Despite $4.5 billion in American aid to El Salvador over the past decade, a bitter civil war continues to torment the people of that nation. Extremists on both the far left and far right have been guilty of committing terrible and indiscriminate violence against innocent civilians, and over 70,000 lives have been lost—among them teachers, priests, nuns, union members, students, and peasants.

Our money has not brought peace to El Salvador. The civil war is stalemated, and it appears that neither side is capable of a military victory. In February, Gen. Maxwell Thurmond, head of the U.S. Southern Command, testified before the Senate Armed Services Committee that the Salvadoran Army would not be able to achieve a military victory over the FMLN. The administration accepts that conclusion. On the other side, last November's FMLN offensive showed the rebels unable to launch a successful insurrection. The civilian population remains trapped in the middle.

I strongly supported President Duarte, and I hope that President Cristiani will follow in his path. However, our current policy of providing abundant military aid to El Salvador has not been successful in building democracy. Just as the eighties began in El Salvador with the murder of Archbishop Romero, so the decade ended with the savage murders of six Jesuit priests, their housekeeper, and her child last November. During the past decade, the Salvadoran judiciary has failed to prosecute anyone for the murder of Archbishop Romero. While eight members of the Salvadoran military have been arrested for their involvement in the Jesuit murders, there has been little significant progress made toward bringing to trial the authors of that senseless attack. Certainly one has to question the effectiveness of our 10-year assistance program to a military capable of killing religious workers.

With United States support, the Salvadoran military forces have grown in number from 14,000 to 52,000 over the last decade. In El Salvador, the military operate beyond the rule of law and are the perpetrators of serious human rights violations. Not one Salvadoran military officer has ever been convicted of a major human rights crime, despite extensive documentation. And yet, as noted previously, despite the size and power of the Salvadoran military, the civil war remains deadlocked. That situation is too costly for the American taxpayer to support, and too ruthless for the citizens of El Salvador to endure.

Both sides in the Salvadoran conflict have dealt brutally with civilians. I abhor the violence perpetrated by the FMLN, and condemn strongly their past tactics which have included assassination of democratically elected officials and violence against civilian noncombatants. Congress must push both parties in the Salvadoran conflict to develop a negotiated settlement as quickly as possible, and to respect a ceasefire.

Fortunately, earlier this month peace negotiations began between the FMLN and the Government of El Salvador under the auspices of the United Nations Secretary General's office. Today Congress has an opportunity to support that important effort by enacting the Moakley-Murtha plan, which provides incentives to keep both the Salvadoran military and the FMLN at the negotiating table.

The Moakley-Murtha proposal withholds 50 percent of our military assistance for fiscal years 1990 and 1991, with a transfer of the withheld aid to humanitarian assistance for El Salvador at the end of each fiscal year. The plan further provides both sides with a series of incentives to negotiate, and create disincentives for any attempts by either side to break off or delay the peace talks.

Specifically, the Moakley-Murtha proposal triggers the additional military assistance if the FMLN is engaged in assassinating or abducting civilian noncombatants, or is engaging in other acts of violence directed at civilian targets. On the other hand, the plan eliminates military assistance if the military or security forces of El Salvador are assassinating or abducting civilian noncombatants, or are engaging in other acts of violence directed at civilian targets. The plan strengthens civilian control over military by requiring the prior approval of the President of El Salvador before military assistance may be delivered to the Armed Forces.

Finally, the Moakley-Murtha plan earmarks not less than $2 million for the Support Democracy Program authorized in the bill for registration, campaign, and election monitoring. In a few months, electoral campaigning will begin in El Salvador. The campaign season will culminate in March 1991 with mayoral and legislative assembly elections. Congress was instrumental in ultimately saying "No" to war in Nicaragua, paving the way for elections. Today we have a chance to encourage that same process to begin in El Salvador.

For 10 years the United States has supported a military solution to El Salvador's civil conflict. That approach has failed. The United Nations Secretary General's efforts to find a negotiated solution in El Salvador may not succeed unless real pressures are exerted on the Salvadoran military and the FMLN to accept concessions that are not in their institutional interests. I urge my colleagues to support the peace process in El Salvador and vote yes on Moakley-Murtha.

Mr. BRENNAN. Mr. Chairman, I rise today in strong support of H.R. 4636 and in strong support of the Moakley-Murtha amendment.

Since 1980, we have sent more than $4 billion to El Salvador, in our attempt to support the Duarte and Cristiani governments.

The decade began with the assassination of Archbishop Romero. It continued with years of civil war, and thousands of civilian casualties.

And the decade ended, tragically, with the barbaric killing of six Jesuit priests, their housekeeper, and her daughter.

Last November, I wrote to President Bush, asking him to use the entire diplomatic weight of the United States to press for an immediate cease fire, and for an immediate investigation of the murders. One hundred and twenty-four of you joined me in that letter, and we have written many such letters in the last decade.

But what have we gained, after 10 years, $4 billion, and uncounted letters, speeches, and petitions?

True, we have preserved a legitimately elected government, a nominal democracy. But the cost has been great. Thousands of innocents have paid with their lives; the investigation of Jesuit killings has slowed to a standstill; and a corrupt army, an army in which 14 of 15 leading officers have commanded troops accused of serious human rights abuses, threatens the stability of the state, and the lives of the citizens it should be protecting.

The bill before us is a fair one. It cuts remaining military aid for fiscal 1990 by 50 percent, and cuts fiscal 1991 military aid by the same amount.

However, the bill, especially with passage of the Moakley-Murtha amendment, provides safeguards for both the Salvadoran Government, and Salvadoran citizens.

If the FMLN threatens the existence of the government, or fails to negotiate in good faith, aid will be restored.

On the other hand, if the army stages a coup, or the investigation of murder of the Jesuits stalls, all military funds may be cut off, and turned into humanitarian aid.

Mr. Chairman, this bill, and the Murtha-Moakley amendment, offer real incentives for both the FMLN and the Cristiani government to negotiate in good faith.

We in the Congress must learn the lesson taught by 10 years of killings and atrocities by both sides: that continued funding of the Salvadoran Army, without constraints, leads to death: death of priests, death of untold numbers of civilians, and the death of justice in El Salvador.

I urge my colleagues to support this bill to promote peace in El Salvador.

Mr. MATSUI. Mr. Chairman, I join my colleagues in vehemently supporting the Moakley-Murtha substitute.

There is an argument that has been furthered today on the floor that I find difficult to understand. It is the notion that a cessation or reduction of military aid to El Salvador will somehow fuel the war in El Salvador. It is the idea that we as a nation should choose sides in the war in El Salvador based on which side has killed more people or even which side is justified in its killing.

I believe the argument before us is more basic than that. It comes down to this: Should the Government of the United States be a benefactor to military atrocities? Should we aggravate a battle that has already killed tens of thousands of innocent people? Should we aid the war or should we support peace?

The question is not whether or not we should tolerate atrocities by the FMLN. Atrocities are unsupportable regardless of the perpetrator. But it is important that we make a distinction here. We do not fund FMLN atrocities; we do monetarily support the butchery of the Salvadoran military. The disappearances and murders have not ended since the six Jesuits were killed. They continue.

It is time for this Congress and this Nation to take a stand against the abominations of the Salvadoran military. The message must be sent that if the military insists on continuing death squad activity, it will do so without the funding and implicit approval of the U.S. Government.

It is time to accept the fact that there will be no consolidation of political progress in El Salvador by military means. Ask the people of El Salvador what they want from the United States. Military suppression of the FMLN rebels? A toppling of the elected government? No. They want economic growth. They want jobs. They want hope for their future and the future of their children. The military solution to this conflict does not represent the politics of hope, it is the politics of despair.

The aid we have provided El Salvador in the 1980's almost triples that of any other Central American country, yet the country's economic progress lags behind nearly every country in the region. Why? Because our money has not gone to bring the country into the world economic community, but rather to persecute its own people. Despite over $2 billion in military aid since 1980, the Salvadoran military is nowhere near achieving a military or political victory.

Let me make clear that the time for demanding decency in terms of human rights or political liberty is long past. This cut in aid as a means for providing leverage for reform is a day late and a dollar short. But in terms of preserving our own honor in the international community, a conditional cut at the very least is absolutely essential. Moreover, at a time when we are witnessing tangible progress toward a peace process between the combatants in El Salvador, we should not jump-start the war process.

Mr. Chairman, the winds of political change which have swept through Eastern Europe have not reached El Salvador. American dollars are at least partly to blame for that. The Moakley-Murtha substitute offers us hope for political change. By divesting ourselves of the war in El Salvador we will be investing in the hope for a better future in that country. I urge my colleagues to support the substitute.

Mr. OWENS of Utah. Mr. Chairman, over the last decade, the United States has given more than $4 billion in foreign assistance to El Salvador. This aid, intended to protect an elected government and vulnerable democratic institutions from a Communist insurrection, has instead become part of the problem. We have become part of the problem.

Instead of fostering a process of political reconciliation, we have created an environment in which the Salvadoran Armed Forces can abuse human rights with impunity, while claiming to seek an elusive, impossible, military victory over the FMLN. Instead of strengthening democratic institutions, promoting judicial and agrarian reform, we have empowered the military at the expense of the civilian government. We have given the "tandona", 12 military commanders, the tools to subvert the very democracy which we seek to support.

The November murders of six Jesuit priests, their cook, and her daughter at the University of Central America reflect grievous and deeply rooted problems with the Salvadoran military and judicial system. As the Moakley task force on El Salvador reported, this investigation represents the Salvadoran justice system at its very best. Yet, the investigation has ground to a standstill, crucial evidence has been lost, and all those now charged with a crime might not have been arrested had an American military officer not provided incriminating testimony.

The horror of the Jesuit murders, of Archbishop Romero's brutal assassination, and countless other human rights abuses is compounded by the criminal negligence, the utter impotence, of the Salvadoran justice system. To continue ignoring this misconduct is to condone it, as we have done in the past with unconditional military assistance.

The provisions contained in the Moakley-Murtha substitute offer strong incentives for both sides of the conflict to negotiate in good faith, and to discontinue patterns of violence which victimize the innocent. This is timely and appropriate action, and I strongly urge your support.

Mr. LIGHTFOOT. Mr. Chairman, I previously supported many of the provisions contained in this legislation when the appropriation measure was passed by the House as H.R. 4404. However, several additions to the legislation prevent me from supporting the version before us today. I would like to take this opportunity to explain my concerns with the package we are debating today.

I voted for H.R. 4404 because I believe it is important to provide assistance to Panama and Nicaragua. We have an obligation to aid in repairing the economies of those countries. I also was supportive of providing additional funding for veterans' medical programs. Providing for the needs of our Nation's veterans cannot be neglected.

However, I have particular concerns about the amendment before us today known as the Studds-Solarz amendment. Like my colleagues, I have grave concerns about the state of affairs in El Salvador. I agree changes must be made in that country's human rights record. The abuses of the military must be brought to a halt and the murderers of the Jesuits must be brought to justice. I also agree the basic needs of the Salvadoran people must be met. We have provided millions of dollars in aid to that country which do not appear to have been well spent.

I have talked with many different people and gathered information on all sides of this issue to obtain the best understanding possible of the conflict in El Salvador.

We are at a critical juncture in Central America. Events in Nicaragua have taken a positive turn, and the Salvadoran Government and FMLN are engaging in United Nations brokered negotiations for a peaceful settle-

ment to the civil war. Incentives must be present for both sides to negotiate in good faith. There have been allegations on both sides of human rights abuses, violence, and lack of good faith in negotiations. At the moment we have a precarious balance which we do not wish to be upset.

As some people may be aware, I supported House Concurrent Resolution 236 passed by the House of Representatives last fall calling upon the Government of El Salvador to resume peace talks and prosecute those responsible for the murder of the six Jesuit priests. I also signed a letter to President Cristiani to insist on a timely investigation into the murders of the Jesuits.

Last year Congress voted in H.R. 2939 to limit military aid to El Salvador to $85 million, down from the $97 million requested by the administration. This is only about 20 percent of the $315 million provided to the country of El Salvador in the form of economic and development assistance. In light of the tremendous damage caused by the FMLN to El Salvador's economy—over 2 billion dollars' worth in the past decade—657 attacks to power lines and stations in 1989 alone caused repairs costing $8 million and $5 million in lost revenues—the economic assistance we provide has been desperately needed. I find it very frustrating that foreign aid must be used to assist in repairing existing facilities when El Salvador's people have so many other basic needs. I understand the FMLN blew up roughly 15 power structures a day during its November offensive.

Last year's legislation also contained a number of restrictions on military aid. It required the President to report semiannually on the progress on achieving a political settlement to the conflict, and it withheld $5 million in military aid until the President reports that the Salvadoran Government has pursued all avenues to prosecute those responsible for the murder of land reform specialists in 1981 as well as the massacre of 10 peasants in 1988, among other restrictions.

This was only the most recent effort by Congress to attach conditions on continued aid to El Salvador. Conditions on aid were also passed by Congress in 1981, 1983, and 1984 and subsequent years. These restrictions appear to have had little effect on conditions in El Salvador.

The question we are facing is what action can be taken to reduce human rights abuses and financial misuse of United States aid of the Salvadoran military while improving the economic conditions for the residents of El Salvador. The aid restrictions we are considering today are one option we have for addressing these problems.

We have seen a change in United States Government policy toward El Salvador. Unlike the previous administration, the Bush administration has taken a stand in support of a negotiated settlement, as it does not appear either side can gain a clear military advantage in this 10-year-old civil war. At the same time, the administration has asked for time to work out a compromise on policy toward El Salvador. I am disappointed members of the House Foreign Affairs Committee are pushing forward with aid restrictions before a compromise has been reached with the administration. The administration asked for time to reach a bipartisan agreement and this request has not been honored.

Furthermore, there are no guarantees a cutoff of military aid will lessen hostilities, let alone stop the war. In fact, I have concerns it may send the wrong signal to the FMLN to step up its insurgency if it appears the United States Government is less likely to come to the aid of the Salvadoran Government. In fact, with U.N. negotiations about to begin, the FMLN on May 2 attacked the presidential palace and home of the minister of public works, casting doubts once again about the sincerity of the FMLN in reaching a negotiated settlement. In addition, with Violetta Chamorro's announcement that she will permit the FMLN's support offices in Managua to remain open, there is further cause for concern.

As I stated earlier, I agree changes in our policy must be made. Better accountability of military expenditures should be required. But I am disturbed by the way this package is being forced upon us today without greater effort to arrive at a bipartisan policy approach. This package is, in my view, ill-timed. I will not rule out the possibility of supporting altered policy or further restrictions on military aid to El Salvador in the future. I simply cannot support this particular proposal at this particular moment. I believe the conditions at the moment are too fragile to jeopardize and I believe this administration is well-intentioned and should be given the benefit of the doubt in its willingness to work with Congress to find the best approach to our policy toward El Salvador.

Mr. DORNAN of California. Mr. Chairman, do not break that gavel. It is hurting my right ear.

Mr. Chairman, I come back to the well of this distinguished Congress again because, to quote the great modern philosopher, Yogi Berra, "It's deja vu all over again."

We have gone through this debate now so many times on this poor area of Central America. What are we learning in the majority about the intrinsic evil of communism? Apparently nothing.

The Berlin Wall came down on November 9. That sent a message to Africa, Central America, and most of the world, that the East Germans would not be running the Secret Security Police teaching Communists around the world how to set up police states and torture people.

Then we see Gorbachev with one problem after another, so people in Nicaragua and in the Farabundo Marti Communist guerrilla movement figured out that the arms pipeline was going to be choked off from Moscow. This left reliance on Castro alone, hence these surface-to-air missiles that, God forbid, may have been used to shoot down some airliner in Central America. God forbid that it be an Air Force airplane with a congressional delegation on it, because then we will start to hear the proper tough talk from the majority side of the aisle on the Communist terrorists in El Salvador.

Some 28 mayors have been killed by the FMLN Communists in El Salvador and there has been little outcry in the United States media.

Now, a Catholic priest was killed, a former Jesuit, laicized properly, an elderly gentleman 74 years of age named Francisco Pecarrini. He was murdered at noon, exactly the stroke of noon. People were listening to the angelus in San Salvador.

He also was an American citizen, not just a Salvadoran citizen. He was murdered on the ides of March, March 15, 4 days before the election, and it got zero to little press coverage in the United States of America.

With all the mayors that were killed down there, in addition to Professor Pecarrini who taught at Long Beach State College, why have we been so selective in our morality? I repeat, the slaughter, the massacre of the Jesuits at Central American University was an abhorrent, to say the word, human rights violation does not quite cover it. It was like the murder of the nuns back in December of 1980. It cries out for justice, but the justice system has been fractured in El Salvador by Communists assassination and terror from the Farabundo Marti gangsters.

We are saying in the Byron amendment that if the Government down there does certain things, and they have incentives to do this under the threat that we will hold back a quarter of the aid, contingent upon this good behavior, we will not send signals to the Communists that they are going to run the show at the negotiations.

Does anybody here remember Panmunjom, 2 years in Korea arguing over the shape of a table?

Why are we making ourselves beholden to the FMLN who have blood all over their hands from assassinating people up and down that country, this tiny little country, the smallest country with the highest population, equal in density to Massachusetts in all of Central America. The siege in El Salvador is now in its 11th year. Are we going to put ourselves in the position where the good behavior of the FMLN will determine when the Government gets the other 50 percent of the aid?

Do you know why the FMLN offensive ended and when it did? It ended on December 20. Do you know why it ended that day? Because the 82d Airborne was bailing out over Panama and the FMLN got the message. The rumors were flying around that the 82d may put a stop in on El Salvador on the way back. The Communists countered that with a rumor that Daniel Ortega had a troopship with 5,000 of the Sandinistas' finest troops ready to head up to El Salvador and battle the 82d Airborne.

The Farabundo Marti are morally bankrupt. They are assassins. They are terrorists. They are urban terrorists. I do not want to hook what we do in this House into what they do.

Mr. DORNAN of California. Mr. Chairman, I apologize in advance for the archaic rules of the House. One of these days we will get modern and you will have a monitor under your desk where you can see what we are showing on the floor, and these cameras will be allowed, as with any studio in the world, including Romania, to come in close. Then you will be able to see what we are talking about here and can track the debate, and all those who follow the debate through you, Mr. Chairman, will understand what we are looking at.

□ 1710

Here is the plane that crashed last November in El Salvador carrying in surface-to-air missiles supplied by Gorbachev, on one of his worst days, through Castro. Here is the flight log of the airplane with the base that it took off from inside Nicaragua. We have this thanks to the fabulous inauguration of Violeta Chamorro, the first lady President of the Western Hemisphere—and that includes the Aztec and Inca Empires. Before she starves to death down there in Nicaragua, maybe we will get some aid to her without using the blackmail process the help the Communists in El Salvador.

There they are, all lined up, Soviet-made surface-to-air missiles. They are shoulder-held weapons meant to terrorize and tear apart the country of El Salvador and possibly shoot down civilian airliners.

Mr. Chairman, the Broomfield-Byron amendment does retain some sanity in this process. This is a bill that is 2 months late. I do not know why we have let the people twist in the wind down in Panama and in Nicaragua, using El Salvador as a blackjack. But finally we are going to get this bill through, and the Dreier-Gilman amendment which the President dearly needs can get money down there for education, housing, and sanitation in Panama, and the Broomfield-Byron amendment will put some pressure on the government in El Salvador, without giving the wrong messages to the remaining Communist insurgency that is terrorizing, executing, and assassinating people in that little beleaguered country of El Salvador.

I went down there with Chairman MOAKLEY, a gentleman whom I greatly respect, and he knows I mean that sincerely.

The CHAIRMAN. The time of the gentleman from California [Mr. DORNAN] has expired.

Mr. BROOMFIELD. Mr. Chairman, I yield 2 additional minutes to the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Chairman, I went down there with Mr. MOAKLEY. It was a group of 15. It was initially going to be all democrats, and through the pleadings of the leadership on our side, Mr. MOAKLEY, being a gracious and fair gentleman, added five Republicans.

Now, there were some things down there that we could not interest the majority Members in doing, like visiting the home of Jennifer Casolo, the so-called church worker who had all these arms buried in her backyard. We have pictures of that, and I hope the Members will have a chance to look at those later here. But we could not interest anybody other than the five Republicans to go over to Jennifer Casolo's house.

But this is what really surprised me. When Mr. DREIER gets up to speak, he will show us a load of armaments captured. We met with the man who blew the whistle on this shipment, a Communist guerrilla from the insurgency named Mario. We met with him in one of the prisons. He is now talking a blue streak because he feels, without a secure situation down there, he will be the subject of an assassination. Yet we could not interest anybody on the majority side to hear the other side of the story in El Salvador.

The Broomfield language does what I want to see done in the name of the Jesuits. I was Jesuit-educated in all my high school years. I went to my 40th reunion Saturday night. I talked to some of the Jesuit priests at Loyola High School in Los Angeles.

It was terrible to stand in El Salvador at Central American University on the spot where these priests of God of the Society of Jesus were brutally slaughtered with automatic weapons by enlisted men while officers stood off in the shadows and watched. One of them, Father Joaquin Pedro Lopez y Lopez, is a cousin of the Ambassador of El Salvador to the United States. He was a dedicated priest who did not have anything to do with politics, ever. He was just interested in helping the poor. It is not that the others deserved to die in this horrible slaughter, but they were involved in varying degrees in politics.

I want to see justice done. But I ask the Members to consider this. Israel gets $3 billion a year, and I voted for every nickel of that.

The CHAIRMAN. The time of the gentleman from California [Mr. DORNAN] has again expired.

Mr. SOLOMON. Mr. Chairman, I yield 1 additional minute to the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Chairman, Israel gets $3 billion a year and El Salvador gets $300 million, only one-tenth of what Israel gets.

There was a terrible slaughter, a human rights violation in Gaza two days ago perpetrated by a man who is undergoing tests for his sanity. He killed 8 people. The Israeli government has apologized profusely, and Israelis are going in to give blood up and down the entire length of that small beleaguered country. This never happens when Arabs slaughter Israelis. Yassar Arafat, wherever he is hiding out, brags about any killings like that.

No one in Israel who has his sanity is suggesting that the act of this madman is a government plot, that this dishonorably discharged soldier was doing something at the government's bidding. But why is my opinion not correct on this Colonel Benevides, the officer accused in the Jesuit slaughter in El Salvador? His son had just come down with a paralyzing, debilitating disease, and he misunderstood his orders. Why am I not entitled to my opinion? I am as good an investigator as any one of the other 14 Congressmen down there. So maybe it goes no higher, and maybe there is no authorship higher than Colonel Benevides in the government. The message we are all giving to the Government down there is to pursue this case and we will not cut off aid, but we will get their attention with the Broomfield amendment.

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from Massachusetts [Mr. MOAKLEY].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BROOMFIELD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 250, noes 163, not voting 19, as follows:

Text of amendment offered by Mr. MOAKLEY of Massachusetts and the recorded vote on this amendment to H.R. 4636 to authorize supplemental economic assistance for fiscal year 1990 to support democracy in Panama and Nicaragua, and for other purposes.

AMENDMENT OFFERED BY MR. MOAKLEY

Mr. MOAKLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. MOAKLEY:

Page 65, strike out line 10 and all that follows through line 11 on page 78 (title V of the bill) and insert in lieu thereof the following:

TITLE V—EL SALVADOR

SEC. 501. ASSISTANCE FOR EL SALVADOR.

(a) STATEMENT OF POLICY.—It shall be the policy of the United States—

(1) to support the Central American Presidents' Agreement of December 12, 1989, calling upon the Farabundo Marti National Liberation Front (hereafter in this section referred to as the "FMLN") to cease its hos-

tilities and renounce all types of violent actions that may directly or indirectly affect the civilian population of El Salvador;

(2) to support an active role for the Secretary General of the United Nations and the Secretary General of the Organization of American States in negotiations between the Government of El Salvador and the FMLN for the purpose of achieving a ceasefire and a permanent settlement to the conflict in El Salvador; and

(3) to review the level of military assistance for El Salvador on a periodic basis, taking into account both—

(A) the demonstrated willingness of the Government of El Salvador and the FMLN to negotiate seriously and in good faith for the purpose of achieving a ceasefire and a permanent settlement to the conflict in El Salvador; and

(B) the actions of each side that affect the basic human rights of the Salvadoran people.

(b) INCENTIVES FOR PEACE: AMOUNTS OF MILITARY ASSISTANCE AVAILABLE FOR EL SALVADOR.—

(1) FISCAL YEAR 1990; CONDITIONAL WITHHOLDING OF HALF OF REMAINING MILITARY ASSISTANCE.—Half of the funds allocated for military assistance for El Salvador for fiscal year 1990 that are unexpended on the date of enactment of this Act shall be withheld from expenditure for military assistance unless and until the President submits to the Congress a report containing the determination regarding the FMLN described in subsection (c).

(2) FISCAL YEAR 1991.—

(A) MAXIMUM LEVEL OF MILITARY ASSISTANCE.—The amount allocated for military assistance for El Salvador for fiscal year 1991 may not exceed $85,000,000.

(B) CONDITIONAL WITHHOLDING OF HALF OF MILITARY ASSISTANCE.—Half of the funds allocated for military assistance for El Salvador for fiscal year 1991 shall be withheld from obligation for military assistance unless and until the President submits to the Congress a report containing the determination regarding the FMLN described in subsection (c).

(C) TRANCHING OF ASSISTANCE.—Not more than half of the amount allocated for military assistance for El Salvador for fiscal year 1991 that is not being withheld from obligation pursuant to subparagraph (B) may be obligated before March 1, 1991. In order to provide time for congressional review of the report required to be submitted on that date by subsection (g), funds that become available for obligation under this subparagraph as of that date may not be expended during the 30-day period beginning on that date.

(3) USE OF FUNDS IF DETERMINATION REGARDING FMLN NOT MADE.—

(A) DEVELOPMENT ASSISTANCE.—At the end of fiscal year 1990 and at the end of fiscal year 1991, the President shall transfer any military assistance funds then being withheld pursuant to paragraph (1) or paragraph (2)(B) to appropriations accounts for development assistance under chapter 1 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2151 and following) for use in providing assistance for child nutrition, health, housing, education, or other programs serving the basic human needs of the people of El Salvador. Funds so transferred shall remain available until expended notwithstanding any other provision of law. Section 634A of the Foreign Assistance Act of 1961 (22 U.S.C. 2394-1; relating to reprogramming procedures) applies with respect to the obligation of any funds so transferred.

(B) EXCEPTION.—Notwithstanding subparagraph (A) and paragraph (1), fiscal year 1990 funds withheld from expenditure pursuant to paragraph (1) may be used for cancellation expenses for military assistance programs for El Salvador, so long as such use does not result in the delivery of any military assistance to El Salvador.

(4) TERMINATION OF MILITARY ASSISTANCE.—If the President submits to the Congress a report containing the determination regarding the Government of El Salvador described in subsection (d), all military assistance for El Salvador for fiscal year 1990 and fiscal year 1991 shall be terminated, including deliveries of previously obligated military assistance. All military assistance shall be terminated pursuant to this paragraph without regard to whether a report is submitted containing the determination regarding the FMLN described in subsection (c).

(5) RESUMPTION OF MILITARY ASSISTANCE.—If, after submitting to the Congress a report containing the determination regarding the Government of El Salvador described in subsection (d), the President finds that the facts giving rise to that determination no longer prevail, the President may submit to the Congress a report describing the reasons for such finding. If the President submits such a report under this paragraph, military assistance for El Salvador may be resumed, subject to the requirements of this section.

(c) CONDUCT OF THE FMLN RESULTING IN A RELEASE OF WITHHELD ASSISTANCE.—The determination described in this subsection is a determination by the President that—

(1) the representatives of the FMLN—

(A) are declining to participate in good faith in negotiations for a ceasefire and a permanent settlement to the armed conflict in El Salvador, or

(B) are rejecting or otherwise failing to support an active role for the Secretary General of the United Nations in those negotiations;

(2) the United States Government has proof that the FMLN is continuing to acquire or receive significant shipments of lethal military equipment from outside El Salvador, and this proof has been shared with the Congress;

(3) the survival of the constitutional Government of El Salvador is being jeopardized by substantial and sustained offensive military actions or operations by the FMLN; or

(4) the FMLN is assassinating or abducting civilian noncombatants, is engaging in other acts of violence directed at civilian targets, or is failing to control such activities by elements subject to FMLN control.

(d) CONDUCT OF THE GOVERNMENT OF EL SALVADOR RESULTING IN A TERMINATION OF ASSISTANCE.—The determination described in this subsection is a determination by the President that—

(1) the duly-elected Head of Government of El Salvador has been deposed by military coup or decree;

(2) the Government of El Salvador is declining to participate in good faith in negotiations for a ceasefire and a permanent settlement to the armed conflict, or is rejecting or otherwise failing to support an active role for the Secretary General of the United Nations in those negotiations;

(3) the Government of El Salvador is failing to conduct a thorough and professional investigation into, and prosecution of those responsible for, the 8 murders at the University of Central America on November 16, 1989; or

(4) the military or security forces of El Salvador are assassinating or abducting civilian noncombatants, are engaging in other acts of violence directed at civilian targets, or are failing to control such activities by elements subject to the control of those forces.

(e) SUBMISSION OF REPORTS CONTAINING DETERMINATIONS.—The President may submit to the Congress at any time a report containing the determination regarding the FMLN described in subsection (c) or containing the determination regarding the Government of El Salvador described in subsection (d). If the President determines that any of the conditions described in subsection (c) or subsection (d) exist, the President shall immediately report that determination to the Congress.

(f) STRENGTHENING CIVILIAN CONTROL OVER THE MILITARY.—In order to strengthen the control of the democratically elected civilian government of El Salvador over the armed forces of that country, military assistance for fiscal year 1991 may be delivered to the armed forces of El Salvador only with the prior approval of the President of El Salvador.

(g) REPORTS ON SITUATION IN EL SALVADOR.—Thirty days after the date of enactment of this act and on March 1, 1991, the President shall submit to the Congress a report describing—

(1) the willingness or unwillingness of the Government of El Salvador and the FMLN to negotiate seriously and in good faith for the purpose of achieving a ceasefire and a permanent settlement to the conflict in El Salvador;

(2) the status of the negotiations;

(3) the criteria that the President will use in deciding whether to make the determinations described in subsections (c) and (d) with respect to negotiations and other issues; and

(4)(A) any actions of the Government of El Salvador (including the armed forces) and the FMLN that are having an adverse impact on the basic human rights of the Salvadoran people;

(B) progress made by the Government of El Salvador toward—

(i) the establishment of an effective judicial system, including the establishment of an independent, civilian investigative service;

(ii) ensuring freedom of the press and assembly; and

(iii) military reform, including the establishment of an officer promotion system based on merit and professional competence, respect for human rights, and respect for civilian control over the armed forces;

(C) the effects on the civilian population of El Salvador of economic sabotage and other acts of violence committed against civilian targets by the FMLN; and

(D) the status of investigations into the politically motivated murders of prominent political, religious, labor and other officials in recent years, and the extent to which the armed forces of El Salvador and the FMLN are each cooperating in those investigations.

(h) SUPPORT FOR DEMOCRACY PROGRAM.—

(1) ESTABLISHMENT OF PROGRAM.—The Secretary of State, through agreement with the National Endowment for Democracy or other qualified organizations, shall establish and carry out a program of education, training, and dialogue for the purpose of strengthening democratic political and legal institutions in El Salvador. The program shall be designed to—

(A) assist and involve all prodemocratic sectors in El Salvador in efforts to strengthen civilian control over the armed forces;

(B) establish an effective judicial system;

(C) facilitate the free and open exchange of political views;

(D) provide for monitoring and other activities in support of free and fair elections; and

(E) increase respect for basic civil and human rights.

(2) ELECTION MONITORING.—Of the amount made available to carry out this subsection, not less than $2,000,000 may be used only for support for monitoring the 1991 municipal and National Assembly elections in El Salvador, and for monitoring the registration and campaign processes leading up to those elections, by appropriate organizations such as Secretary General of the United Nations, the Organization of American States, the Carter Center, the National Democratic Institute for International Affairs, the National Republican Institute for International Affairs, and the Center for Electoral Assistance and Promotion (CAPEL) of San Jose, Costa Rica.

(3) AUTHORIZATION OF APPROPRIATIONS.—To carry out this subsection, there are authorized to be appropriated $10,000,000 for fiscal year 1991 under chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2346 and following; relating to the economic support fund).

(i) EXPEDITED CONGRESSIONAL REVIEW PROCEDURES.—

(1) DEFINITIION OF PRIVILEGED JOINT RESOLUTION.—For purposes of this subsection, the term "privileged joint resolution" means a joint resolution—

(A) which—

(i) in the case of the House of Representatives, is reported by the Committee on Foreign Affairs, and

(ii) in the case of the Senate, is reported by the Committee on Foreign Relations,

during the 30-day period beginning on March 1, 1991;

(B) which would place conditions or limitations, or both, on expenditures of military assistance funds for El Salvador for fiscal year 1991;

(C) which does not contain any provision which is not germane to the conditions and limitations provided for in the joint resolution; and

(D) the title of which is as follows: "Joint resolution relating to military assistance for El Salvador for fiscal year 1991.".

(2) MOTION FOR FLOOR CONSIDERATION.—On or after the third calendar day (excluding Saturdays, Sundays, and legal holidays) after the day on which a privileged joint resolution is reported by the Committee on Foreign Affairs or the Committee on Foreign Relations (as the case may be), it shall be in order (even though a previous motion to the same effect has been disagreed to) for the chairman of that committee (or his designee) to move to proceed to the consideration of that joint resolution. In the House of Representatives the motion shall be that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the joint resolution. The motion may be made in the Senate notwithstanding any rule or precedent of the Senate, including Rule 22. All points of order against the joint resolution (and against consideration of the joint resolution) are waived. The motion to proceed to the consideration of the joint resolution is highly privileged in the House of Representatives and is privileged in the Senate and is not debatable. The motion is not subject to amendment, to a motion to postpone, or to a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the joint resolution is agreed to by a House of Congress, that House shall immediately proceed to the consideration of the joint resolution without intervening motion, order, or other business, and that joint resolution shall remain the unfinished business of the respective House until disposed of.

(3) DEBATE TIME.—Debate on a privileged joint resolution, and on all debatable motions and appeals in connection therewith (other than amendments made in order in the House of Representatives under paragraph (4) and a motion to recommit in the House under paragraph (7)), shall be limited to not more than 4 hours, which shall be divided equally between a Member favoring and a Member opposing the joint resolution. A motion further to limit debate is in order and not debatable.

(4) AMENDMENTS IN THE HOUSE OF REPRESENTATIVES.—Amendments to a privileged joint resolution shall be in order, and shall be debatable, in the House of Representatives to the extent ordered by the House.

(5) AMENDMENTS IN THE SENATE.—Amendments to a privileged joint resolution are not in order in the Senate.

(6) CERTAIN MOTIONS NOT IN ORDER.—A motion to postpone or to proceed to the consideration of other business is not in order. A motion to reconsider the vote by which a privileged joint resolution is agreed to or disagreed to is not in order.

(7) FINAL PASSAGE IN THE HOUSE OF REPRESENTATIVES.—In the House of Representatives, at the conclusion of debate on a privileged joint resolution and consideration of any amendments made in order to the joint resolution, the Committee of the Whole shall rise and report the resolution back to the House, and the previous question shall be considered as ordered on the joint resolution, with any amendments adopted in the Committee of the Whole, to final passage without intervening motion except one motion to recommit.

(8) FINAL PASSAGE IN THE SENATE.—In the Senate, immediately following the conclusion of the debate on a privileged joint resolution, and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the Senate, the vote on final passage of the joint resolution shall occur.

(9) APPEALS FROM DECISION OF THE CHAIR NOT DEBATABLE IN THE SENATE.—Appeals in the Senate from the decisions of the Chair relating to the application of the rules of the Senate to the procedure relating to a privileged joint resolution shall be decided without debate.

(10) CONGRESSIONAL RULEMAKING POWERS.—This subsection is enacted by the Congress—

(A) as an exercise of the rulemaking power of the Senate and House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of a privileged joint resolution, and it supersedes other rules only to the extent that it is inconsistent with such rules; and

(B) with full recognition of the constitutional right of either House to change its rules at any time, in the same manner, and to the same extent as in the case of any other rule of that House.

(j) DEFINITION OF MILITARY ASSISTANCE.—For purposes of this section, the term "military assistance" means assistance under section 23 of the Arms Export Control Act (22 U.S.C. 2763; relating to the foreign military financing program) or under chapter 2 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2311 and following; relating to the grant military assistance program).

The CHAIRMAN. All time has expired. The question is on the amendment offered by the gentleman from Massachusetts [Mr. MOAKLEY].

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. BROOMFIELD. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 250, noes 163, not voting 19, as follows:

On this vote:

Mr. Nelson of Florida for, with Mr. Marlenee against.

Mr. Barnard for, with Mr. Kolbe against.

Mr. Stokes for, with Mr. Craig against.

Mr. Hawkins for, with Mr. Thomas of California against.

Mr. SARPALIUS and Mr. BUECHNER changed their vote from "aye" to "no."

Messrs. WASHINGTON, CHANDLER, and McMILLEN of Maryland changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 2058

The Clerk announced the following pairs:

On this vote:

Mr. Nelson of Florida for, with Mr. Marlenee against.

Mr. Barnard for, with Mr. Kolbe against.

Mr. Stokes for, with Mr. Craig against.

Mr. Hawkins for, with Mr. Thomas of California against.

Mr. SARPALIUS and Mr. BUECHNER changed their vote from "aye" to "no."

Messrs. WASHINGTON, CHANDLER, and McMILLEN of Maryland changed their vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. AuCoin, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4636) to authorize supplemental economic assistance for fiscal year 1990, to support democracy in Panama and Nicaragua, and for other purposes, pursuant to House Resolution 395, reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

□ 2100

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BROOMFIELD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 171, nays 244, not voting 17, as follows:

[Roll No. 128]

□ 2120

The Clerk announced the following pairs:

On this vote:

Mr. Nelson for, with Mr. Kolbe against.

Mr. Stokes for, with Mr. Robinson against.

Mr. Hawkins for, with Mr. Denny Smith against.

Messrs. McDERMOTT, CARR, and WALGREN changed their vote from "yea" to "nay."

Mr. OWENS of Utah changed his vote from "nay" to "yea."

So the bill was not passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

## REQUEST TO BE EXCUSED FOR MEDICAL REASONS—PERSONAL EXPLANATION

Mr. DENNY SMITH. Mr. Speaker, I ask to be excused from attendance in the House for the remainder of this evening so that I might undergo a series of medical tests that I am unable to reschedule. I regret this absence, but ask that the RECORD reflect that had I been present, I would have voted against the Moakley/Murtha amendment to H.R. 4636, and would have also voted against final passage.

## WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 4641

Mr. HYDE. Mr. Speaker, I ask unanimous consent that I may withdraw my name as a cosponsor of the bill, H.R. 4641.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

## STATE-SUPPORTED HOMES FOR VETERANS WEEK

Mr. SAWYER. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 231) to designate the week of June 10, 1990 through June 16, 1990, as "State-Supported Homes for Veterans Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

Mr. RIDGE. Reserving the right to object, Mr. Speaker, I certainly do not object to this legislation, but reserve the time in order to yield to the gentleman from Iowa [Mr. NAGLE], the chief sponsor of the joint resolution.

Mr. NAGLE. Mr. Speaker, I thank the gentleman for yielding to me. I will be mercifully brief because of the lateness of the hour.

I would point out that there are 59 State-supported veterans homes in 37 States that are providing professional, generic, long-term health care for the men and women of our armed services. The homes were started after the Revolutionary War, which makes these facilities America's oldest serving commitment to our Nation's veterans. Over 13,000 veterans are provided long-term care on a daily basis. Last year these homes provided 4.7 million patient days of daily care in the form of physical therapy, respiratory therapy, drug abuse counseling and family counseling.

The goals of the State veterans' homes are to provide appropriate quality care services to disabled and elderly veterans, to provide a clearinghouse for techniques and expertise in the care of veterans.

This resolution not only stands as historical testimony to the commitment we have toward our veterans, but it also honors the caregivers for the valuable service they provide to our Nation's veterans.

Mr. RIDGE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 231

Whereas since 1864, 36 States have established a total of 58 State-supported homes for the veterans of this Nation;

Whereas such States and the Department of Veterans Affairs support such State-supported homes for veterans and such State-supported homes for veterans currently serve critical needs of the veterans of this Nation;

Whereas such State-supported homes for veterans shall continue to serve the veterans of this Nation and meet the future needs of such veterans when the number of aging veterans increases at an accelerated rate in this Nation;

Whereas such State-supported homes for veterans provide an important resource for the veterans of this Nation, and for the families of such veterans;

Whereas the staff of such State-supported homes for veterans contribute to an enhanced quality of life for the veterans of this Nation, and for the families of such veterans; and

Whereas there is a need for greater public awareness of the vital and significant contributions of State-supported homes for veterans to this Nation: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That the week of June 10, 1990 through June 16, 1990, is designated as "State-Supported Homes for Veterans Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such day with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

## GENERAL LEAVE

Mr. SAWYER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include therein extraneous material on Senate Joint Resolution 231, the Senate joint resolution just passed.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

## UNITED STATES NOT PARTY TO HUMAN RIGHTS TREATIES

(Mr. FALEOMAVAEGA asked and was given permission to address the House for 1 minute and to include extraneous matter.)

Mr. FALEOMAVAEGA. Mr. Speaker, I wonder if my colleagues in the House realize that while the United States and its leaders in the highest levels of Government, continues to advocate the importance of human rights and individual freedoms throughout the world—over our own Government has refused to ratify several important international treaty conventions, which include the International Covenant on Economics, Social and Cultural Rights, and the International Convenant on Civil and Political Rights—commonly referred to as the International Covenants on Human Rights.

Mr. Speaker, I want to share with my House colleagues, an article which appeared recently in the Christian Science Monitor on the subject matter, and I believe the coauthors of the article, Senator DENNIS DECONCINI and Congressman STENY HOYER, did an excellent job to explain the problem and the solution in resolving this longstanding situation.

Mr. Speaker, let's be serious with this issue of human rights. If it is our expectation that other countries of the world should grant human rights principles to their citizens, then certainly we ought to do the same for our own people before preaching it to others.

[From the Christian Science Monitor, Apr. 18, 1990]

TIME TO RATIFY U.N. HUMAN RIGHTS COVENANT

(By Dennis DeConcini and Steny H. Hoyer)

The National Council of Churches recently initiated a campaign seeking US ratification of basic human rights treaties, including the International Covenant on Civil and Political Rights and the International Convenant on Economic, Social and Cultural Rights (collectively known as the International Convenants on Human Rights). Although the US voted for United Nations adoption of these treaties in 1966 and signed them in 1976, they have languished before the Senate for 10 years. The question the National Council poses is: Why has the US, a country with a strong human rights record, failed to ratify these convenants? The answer to this question lies in part in how the US approaches its own human rights problems.

Every country can improve its human rights record. The US is no exception. To this end, the US has developed extensive machinery for the promotion and protection of the rights espoused by these convenants. As a result, the most vocal and disparaging domestic critics of US civil and political rights practices generally concern themselves with improving this existing domestic machinery, rather than persuading their government to participate elsewhere. In short, because of the availability of redress on the national level, US citizens have not found it necessary to lobby the Senate for ratification of the covenants which provide international reinforcement for domestic efforts.

In fact, the persons who would most benefit from more US participation in the UN's human rights protection system are victims of human rights violations in other countries. By not ratifying the covenants, the US denies itself a forum in which to raise the plight of those who suffer under repressive regimes. Within those forums in which the US does participate—such as the Helsinki process—every time the US government is called upon to explain why the Senate has not acted on the covenants, it is forced to take time and attention from other human rights issues.

Some have explained US failure to ratify the covenants by pointing to the UN commitments of the USSR and other countries. For example, at the very time the International Covenants were submitted to the Senate for advice and consent in 1978, the Soviet Union was engaged in the Senate for advice and consent in 1978, the Soviet Union was engaged in a crackdown on human rights activists. A year later it invaded Afghanistan. Poland declared martial law in 1981 in stark contradiction to the very object and purpose of these pacts. Romania's house arrest of its own human rights rapporteur speaks for itself.

Obviously much has changed in the Soviet Union and Eastern Europe since 1978. The Soviet Union has now taken steps to clean up its human rights record and has attempted to fill the void left in the UN by the limited participation of the US. Gorbachev has supported UN peace initiatives in several regions of the world and took the lead in calling for submitting human rights disputes to the International Court of Justice. Hungary, the first Warsaw Pact country to openly criticize the human rights policies of a fraternal ally, has moved to use a UN forum to investigate Romania's treatment of ethnic Hungarians. Against this backdrop of increasingly credible East bloc participation in the UN's human rights process, the US is all the more conspicuous by its absence.

International human rights law is a new and promising way to promote foreign policy goals. A vacuum left by the US will surely be filled by others. The USSR and Eastern Europe are not the only countries able and willing to shape international human rights norms. All the permanent members of the UN Security Council have ratified these treaties—except the US. Among the 35 Helsinki-process countries eligible to become a party to these treaties—including the 16 members of NATO—only Ireland, Turkey, and the U.S. have not.

Will it take over 40 years to get the convenants ratified, as did the Genocide Convention? Not if action is taken in three quarters.

First, the American human rights community must make a concerted call for ratification. The same groups that lobby Congress on human rights in other parts of the world must understand that our overall efforts to achieve their goals are hampered by our failure to ratify these convenants. While most non-governmental organizations concerned with global and regional human rights abuses support ratification, they have failed to take the lead in calling for the Senate to act.

Second, the Senate must act. Beginning with new hearings, the Senate should quickly give its advice and consent to the president.

Finally, the administration must stop fence sitting and state its support of the covenants. For eight years the Reagan administration claimed to have the covenants "under review," and thus avoided taking any position at all. Sadly, the current administration announced last May that it, too, has no opinion and is continuing this lengthy "review" process.

Morris Abram, the US ambassador to the most recent Helsinki-process human rights meeting, answered our critics by noting that other countries "have signed these documents but are unwilling to live up to them; the United States, on the other hand, has failed to ratify them, but observes their terms. Which is more important?" If forced to choose, the clear answer to the ambassdor's question is that observance of these standards is more important than ratification.

But it is equally clear that we do not have to choose; we can do both. There is no reason why the Eastern countries should not be called upon to observe the standards they have openly and formally accepted; and there is no reason why the United States should not openly and formally accept the standards we claim to observe. By doing the latter, the US can enhance its position to do the former.

In the most recent agreement of the 35 countries participating in the Helsinki-process, the US committed itself to "consider acceding to the [International Covenants on Human Rights]." Our failure to abide by this promise will make our calls to other countries to live by theirs, ring hollow.

## GENERAL LEAVE

Mr. HEFLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and include therein extraneous material, on the subject of the special order today by the gentleman from Wisconsin [Mr. PETRI].

The SPEAKER pro tempore (Mr. NAGLE). Is there objection to the request of the gentleman from Colorado?

There was no objection.

## STUDENT SUCCESS STORY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 5 minutes.

Mr. GAYDOS. Mr. Speaker, during the past year or so, we have heard a lot about how terrible America's private career training schools are, how they have been ripping off men and women who are seeking to break the bonds of poverty, and how they have failed to teach those who want to learn a trade.

Mr. Speaker, I stand here today to tell you and my colleagues that contrary to these misconceived stereotypes, private career training schools—a vital and necessary segment of America's higher education community—are doing a great job of teaching career skills to hundreds of thousands of our citizens who, today, lead meaningful lives as productive, tax-paying Americans.

Too many of our colleagues seem to be more concerned with whether or not a particular career training school has a high or low default rate or whether the students have high school diplomas than with whether or not

that school is actually teaching students what they need to know for a successful career and placing them in career opportunities.

Career training students are more likely to complete their coursework and find jobs than students who enroll in any other sector of postsecondary study because career training schools have higher completion and placement records than any other sector of higher education—61 percent of career training school students successfully complete their coursework compared to 33 percent in the Job Corps, 43 percent at public community colleges, and 58 percent at 4-year colleges.

The placement rate for career training schools is 81 percent. This rate is not only higher than any other sector of higher education, it is also much more reliable because the figures must be documented for the Department of Education.

While it is distressing that such basic facts regarding career training schools can be completely overlooked, what is even more disturbing is how rarely and how little we hear about the students.

I would like to take a few minutes to tell you about just two of the millions of successful career school graduates—Quang Tang Ho and Robert Crolley.

Mr. Ho was 4 years old when his father was taken prisoner by the North Vietnamese. He and his family escaped and eventually settled in the United States.

The same year his mother died, Mr. Ho won a Scholastic Art Award Scholarship to attend the Colorado Institute of Art.

While he and his sister raised their five younger brothers and sisters who were also orphaned, Mr. Ho attended the school's visual communications program. He is so talented he was able to secure freelance jobs to help finance his education, but he also qualified for and received federally guaranteed student loans.

After graduating, Mr. Ho worked briefly for a small graphic arts studio before establishing his own firm—Quang Ho Illustration and Design in Denver, CO. His list of clients include Coors, Blue Cross/Blue Shield, Upjohn, and the Chicago Symphony. He is also a recipient of the Society of Illustrators Award.

As you know, students are not required to start payments on those guaranteed loans until 6 months after they finish or withdraw from their program of study. Mr. Ho, however, was so motivated he paid off his Stafford loans even before he graduated.

The next student I'm going to tell you about is not only very motivated, he is also very courageous. Robert Crolley decided to go-for-broke and change his career in an effort to keep his family off welfare.

Mr. Crolley supported himself and his family by working as a supervisor in a plastics factory until the factory closed down.

He was left with plenty of bills but no money to pay them. He struggled for 6 months before he found he could no longer make both ends meet.

He made a very important decision concerning his future and the future of his family when he reached this point. Instead of becoming a welfare statistic, Mr. Crolley decided to enroll in the Tri-State truck driver training program in Dayton, OH.

As you know, welfare can become a way of life for too many families when dependence on the programs is passed from father to son and mother to daughter, but, Mr. Crolley didn't let this happen. He took the initiative, worked hard, and today, he supports himself and his family by driving for Poole Truck Lines.

To let you in on another overlooked fact regarding career schools, when these two Americans chose career training to further their lives, they also eased the pocketbooks of our taxpayers at the same time.

A 1989 report by Shearson-Lehman-Hutton argues that taxpayers save $17,938 per student per year for every American who finishes a training program and gets a job earning $15,000. they say the money is saved through programs such as welfare, food stamps, women and infant care, housing, health care, and taxes on that $15,000 a year job.

Also, using figures calculated from a National Association of State Scholarships and Grant Programs report, it is estimated that for every one year of education in a private career school, taxpayers save $2,975 compared to the cost of educating a student in a 4-year college for the same period and $1,119 compared to the cost of educating a student in a community college for a similar time period.

Career training not only helps ease the pocketbooks of our Nation's taxpayers, it enables students to reach their goals and change their lives for the better.

The two students I talked about today have joined the ranks of the millions of successful career training school graduates. I take my hat off to all of these hard-working Americans and the schools who successfully educated them.

Keep up the good work.

□ 2130

## TRIBUTE TO VFW SUGARLOAF MEMORIAL POST NO. 6368, DUPO, IL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. POSHARD] is recognized for 5 minutes.

Mr. POSHARD. Mr. Speaker, there is a group in a town in my district, Dupo, IL, which I want to salute.

This is a group on which we have always been able to depend to keep us true to our traditional values and remind us of the freedoms so many have fought and died to defend. And I want to let you know about their contributions to our society.

Since 1946, the Veterans of Foreign Wars, Sugarloaf Memorial Post No. 6368, has provided outstanding service to veterans and the community where its members live.

And in all of those years, Post No. 6368 has enjoyed the support and dedication of the ladies auxiliary.

Ask any VFW commander and he will tell you a post is only as good as the auxiliary that works with it side by side. And that certainly is the case for this post.

To be a member of the auxiliary a woman has to be a close relative of a member of the post. During the years this post has survived and thrived, hundreds of women have assisted in making Dupo and the surrounding area a better place to live.

At the risk of leaving some of their good deeds unnoticed, I want you to know about the projects they have worked on. They include blood drives, poppy sales, youth education programs, volunteer work at the Jefferson Barracks Veterans' Administration Hospital, and a host of other deeds big and small that add up to a tremendous contribution.

Here is perhaps one of the most telling facts of all. The Sugarloaf Memorial Post No. 6368 has about 192 members. That is pretty solid membership.

But there are almost 300 in the ladies auxiliary. That is dedication. That is pride. That is being willing to spend a lot of time on behalf of your friends, family, and your community as a whole.

Where would we be in this country without the volunteer efforts of groups like the ladies auxiliary? How many young people have been influenced to live their lives in a patriotic, upstanding fashion because of their example? Probably too many to count. But that is the kind of thing that makes our lives just that much better.

Dupo is a great town. It is located in St. Clair County, just across the Mississippi River from St. Louis, and it has a rich heritage of community pride and progress. In the 44 years since the ladies auxiliary has served in a partnership with the Sugarloaf Memorial Post, the VFW has been there as a driving force for making life better in Dupo.

That is the spirit of America. We help people who need it. The VFW members have sacrificed as much as any living group of veterans, and I am

proud to represent these fine people in Congress.

Memorial day will be here soon and, I am pleased to congratulate them on their long history of achievement and service. They are great Americans, who demonstrate their love for their country by serving in this auxiliary, and by the way they live their daily lives.

May they continue their good work for generations to come.

## THE BENEFITS OF THE RESERVES ARE BOTH TANGIBLE AND INTANGIBLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi [Mr. MONTGOMERY] is recognized for 5 minutes.

Mr. MONTGOMERY. Mr. Speaker, I want to continue to share with my colleagues a series of articles which appeared in the Roll Call newspaper in the April 30, 1990, edition in a special policy brief, titled "National Guard and Reserves in a Changing World." This brief was developed to describe the roles and missions of the Reserve components and to educate the readers. I wrote the lead article in hopes of generating interest by the readers to learn more about the Guard and Reserve. I commend my colleagues to read these articles to gain a better appreciation of the Guard and Reserve. Today I'm sharing another in the series of articles that appeared in that April 30 Roll Call edition.

THE BENEFITS OF THE RESERVES ARE BOTH TANGIBLE AND INTANGIBLE

(By Maj. Gen. Evan Hultman)

The past decade has seen a dramatic increase in the size and capability of our nation's Reserve Forces. Our total military manpower expanded by 17 percent, due principally to a 36 percent increase in Reserve Force personnel.

The most dramatic increase was the Reserve contribution to the personnel strength of the total Army, which rose from 50 to 59 percent by the end of the 1980s. The Reserve components of the Air Force showed a corresponding growth from 25 to 30 percent of their Total Force. The Naval Reserve has grown by more than 50 percent in the 1980s to account for over 20 percent of the total Navy personnel.

During the 1980s, Reserve components were an integral part of US involvement in low-intensity conflicts around the globe—operations off the coast of Lebanon, refueling missions during the Libya strike, the Grenada rescue, and, most recently, as a part of Operation Just Cause in Panama.

The Reserve Components have met the challenges both at home and abroad during the 1980s and have demonstrated their leadership ability and training readiness to get the job done.

The 1990s should see increased emphasis on the role of the Reserve components and their contribution within the Total Force as defense planners revise the national defense policies in this era of a diminished threat, longer warning times, and defense budget constraints.

A further indication of the enhanced role and responsibility that have been given to Reserve Forces is the recent revision of the 1976 law giving the president authority to call up to 200,000 Reservists to Active Duty for up to 90 days for any operational or contingency requirement.

It is apparent that recent political changes in the Soviet Union and Eastern Europe have altered dramatically the nature of the military threat to our national security. There is less agreement on the nature of the changing threat, with its resulting greater instability and impact on our national security.

In recognition of these changes, the Reserve Officers Association (ROA) called for a comprehensive analysis of the evolving threat, the military force structure to counter the threat, and the most cost-effective mix of Active and Reserve units in the resulting military force.

Congress responded by requiring the Secretary of Defense to conduct such a study and submit the findings by the end of this year.

ROA's charter from Congress provides us with a real challenge: "The object and purpose of the Reserve Officers Association shall be to support a military policy for the United States that will provide adequate national security and to promote the development and execution thereof."

ROA is not advocating that absolutely no cuts be made in the Reserve Forces, nor are we recommending that as Active Forces are decreased there should be an automatic and equal increase in the Reserve Forces.

It is our position that because of the changing world situation and longer warning time prior to any attack on our allies, a defense strategy that takes maximum advantage of the inherent advantages of the Reserve Forces makes even more sense in the future than it has in the past.

Reserve Forces should be taking on some of the roles traditionally found in the Active components. We support the concept that when, in the Army for example, Active divisions are removed from the structure, the corresponding Reserve component support tail should also be removed from the total Army structure while ensuring that any personnel with critical "war stopper" skills are retained.

It is conventional wisdom that Reserve Forces are less expensive to operate than similar Active Force units. This is most apparent in manpower intensive units, such as infantry battalions where the cost reduction for maintaining a capability in the Reserve Forces instead of in the Active Force can be as much as 80 percent.

Operating aircraft squadrons in the Reserve Forces, by comparison, saves only about 30 to 50 percent when compared to similar Active Force units, depending on the operating tempo. This "saving" does not come without some "cost" in either peacetime operations capability being lost or greatly diminished or the increased time required to have some units available for mobilization or contingency requirements.

However, there are also less apparent tangible savings and significant intangible benefits of Reserve Forces. For example, most Reservists have the benefit of Active Duty service and training that they bring to the Reserve Forces. This alone saves countless millions of dollars each year by avoiding significant training costs the Reserve Forces would otherwise encounter.

On the intangible side, the nature of a citizen/Reservist ensures that our nation's military is not isolated from the people it is dedicated to serve and protect.

These are some of the issues that make the task of the ongoing Total Force Study Group difficult. Some of these same issues, particularly the scope of training that resides in the Reserve Forces today, make it imperative that the Reserve structure not be cut until the Total Force Study is completed and reviewed by Congress and the Reserve community.

ROA is advocating that our nation have a military force adequate to meet the emerging threat with the most cost-effective balance of Active and Reserve Forces. We must have no less, since freedom is our fundamental right.

## CHAIRMAN ANNUNZIO REPORTS PROGRESS TO ESTABLISH POLISH CREDIT UNIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois [Mr. ANNUNZIO] is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, when the Polish people turned their back on communism and looked toward democracy, one of their first requests was for a restructuring of their financial institutions because they did not trust their $8 billion in zlotys, their national currency, around their homes, under mattresses and floorboards. The practice of hiding zlotys at home reduces the amount of deposits available to fund loans for the business ventures needed to get Poland's capitalism economy off the ground. The immediate reaction to the newly found freedom by the Polish people was the call for the creation of credit unions, the nonprofit institutions prevalent at many American workplaces.

On December 4, I wrote to Secretary of State James A. Baker III and Treasury Secretary Nicholas F. Brady to urge they do what they could to provide assistance to Eastern European nations, especially Poland, as they restructure their financial institutions. I specifically asked Mr. Baker to direct the Agency for International Development [AID] to promptly provide funds to the World Council of Credit Unions to help the Polish people with technical training to improve their economies.

Earlier this year, I met with a contingent from Solidarity who were in the United States to learn more about credit union history, philosophy, and operations.

Mr. Speaker, I would like to report that progress is being made. The Credit Union National Association has written to me to say that the World Council of Credit Unions has received an 18 month, $230,000 grant to assist the Polish people. The mission of the World Council is to organize, expand, and strengthen credit unions throughout the world as a means of promoting economic and social development. The AID funds will be used for a detailed technical team analysis of the market, legislative and financial climate in Poland, the subsequent design of a credit union development program and the initial implementation of that development program. A World Council technical team will be in Poland next month, and design of the long-term development program will be completed shortly thereafter.

Mr. Speaker, the Credit Union National Association also informs me that the World Council has received a request from Hungary to assist two cooperative groups there to carry out an orientation trip to the United States,

similar to the one by the Polish delegation in February and March. Several other free market countries also want to learn about the operations of credit unions. The council said it also has been asked to provide assistance to organizations interested in credit unions in Bulgaria and Czechoslovakia.

It appears that when peoples around the world throw off the mantle of communism, they turn to credit unions, the organizations owned and operated by its members according to democratic principles.

## TRIBUTE TO EUNICE KENNEDY SHRIVER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin [Mr. PETRI] is recognized for 60 minutes.

Mr. PETRI. Mr. Speaker, to imagine Eunice Kennedy Shriver stepping down from the helm of Special Olympics is almost like thinking the unthinkable. Eunice Shriver is Special Olympics, just as she is the spirit and substance of almost every program for people with mental retardation that has been developed over the past 30 years. In 1968, Eunice Shriver founded Special Olympics. She had faith that people with mental retardation could do many more things than even many experts thought they could. And she was right. Since that first track meet in 1968, millions of persons with mental retardation have taken part in sports activities through Special Olympics. And as they have become skilled in sports they have also learned the living skills that have made them valuable citizens at school, at home, in the community, and in the workplace. No single program has had as dramatic and lasting effects as Special Olympics. More than just another sports league, Special Olympics has become a worldwide movement for justice and equality for persons with mental retardation. And behind this movement, for 22 years, has been the energy and dedication of Eunice Kennedy Shriver. While we know that Special Olympics will grow and touch many more lives, it just will not be the same without Eunice Shriver. Whatever else she goes on to do now, she has left a legacy of human service that is unequalled in our generation.

Mr. MAZZOLI. Mr. Speaker, it's my pleasure to participate in today's special order in honor of Eunice Kennedy Shriver, who—after 22 years—is turning over the day-to-day responsibilities of the Special Olympics programs.

While her official role may change, her influence and guidance will, I am sure, continue to be an integral part of the Special Olympics.

Mr. Speaker, the timing of this special order is very appropriate. For earlier today, I joined with an overwhelming majority of my House colleagues in adopting the Americans With Disabilities Act, which seeks to prohibit discrimination against disabled individuals. However, long before the ADA bill was on the drawing board, Eunice Shriver was already showing the Nation—and the world—that individuals with mental retardation have the desire, the ability, and the right to participate in sports training and athletic competitions.

One of the unique and admirable aspects of the Special Olympics programs during Mrs. Shriver's tenure has been the fact that she has almost never solicited Federal funding for this program. She did not want it to be part of a huge bureaucracy but to rise and fall on its own merits and its own ability to attract private funds. And rise it has. Today, Special Olympics International raises more than $70 million from the private sector in every State and many Foreign countries, including China, Chile, the Soviet Union, Cuba, and the Netherlands, to support its year-round training and competitions. Almost 1 million athletes train and compete in 22 Olympic-type sports and 500,000 volunteers assume most of the coaching, training and fundraising responsibilities.

For my own part, I have, over the years, participated in the Nike Capital Challenge which raises money for the Special Olympics program, and I am proud that my Alma Mater, the University of Notre Dame, has been the site of the International Special Olympics.

Again, I commend and thank Eunice Shriver for her leadership during these 22 years, and no doubt, the support and participation in Special Olympics will continue to grow in the years ahead.

Mr. HORTON. Mr. Speaker, it is my distinct pleasure to recognize a special group of people today. It seems ironic that we should recognize these individuals on the day we consider one of the most important pieces of legislation to come before this House, the Americans With Disabilities Act. Through the vision and energy of Mrs. Eunice Kennedy Shriver we stand up here today to salute the participants of the Special Olympics.

The Special Olympics began in 1968, when Mrs. Eunice Kennedy Shriver started a day-camp for people with mental retardation. In that year, the First International Summer Special Olympic Games were held at Chicago's Soldier Field for 1,000 athletes from the United States, Canada, and France. Since then, the Special Olympics has had worldwide impact with some 750,000 athletes and 550,000 volunteers participating in year-round activities.

As dean of the New York congressional delegation, I am especially proud to honor these dedicated athletes. In my State of New York, the Special Olympics has grown from 100 Special Olympians in 1969, to the largest program of sports and athletics competition for children and adults with mental retardation in the United States. The New York Special Olympics serves nearly 28,000 Special Olympians in 38 regions of New York State through a network of more than 15,000 volunteers. I am deeply touched by the courage, determination, sportsmanship, and voluntarism that are displayed during these year-round events.

Mr. Speaker, the accomplishments of these individuals makes me very proud to be associated with them and the State of New York. I am confident that their dedication will enable them to continue to achieve and to be successful in the years ahead.

Mr. BROWN of Colorado. Mr. Speaker, there are few programs in the Nation as rewarding to its participants as Special Olympics. Special Olympic programs have given hundreds of thousands of persons with mental retardation more than just experience in sports. It has given them hope and self-esteem.

I would like to join the many people giving thanks to Eunice Kennedy Shriver for her selfless efforts that created this program and built it into the worldwide humanitarian project that it is today.

Eunice Kennedy Shriver will be missed as chair of Special Olympics International but each Special Olympic event is already a tribute to her.

Mr. KASTENMEIER. Mr. Speaker, Special Olympics is one of the great success stories of our time. It demonstrates all the good qualities of America: Initiative, creativity, compassion, volunteerism, private enterprise. And at the same time, it has brought out these same qualities in more than 80 countries with diverse cultures and economic systems. If it had not been for Eunice Kennedy Shriver, millions of children and adults all over the world would never have known the joy of competitive athletics, and the health that comes from regular, vigorous sports activity. Before Special Olympics, only 25 percent of this Nation's citizens with mental retardation received as much as 1 hour of physical activity per week. Most got none at all. They had never run a race, thrown a baseball, skated on a rink, skied a slope, swum or dived in a pool. Special Olympics changed all that because one courageous woman was convinced that people with mental retardation could do much more than many experts said they could. Because of Special Olympics, the public has a better understanding of the gifts and qualities of persons with mental retardation; parents of special children have a new sense of pride; and the athletes have developed a heightened self-esteem and confidence in their own ability. Instead of being segregated, Special Olympians are part of the mainstream of their communities. As Eunice Kennedy Shriver steps down as Special Olympics' first and only chairman, she can take great pride in a job well done. I and all the people of my district salute her.

Mr. FASCELL. Mr. Speaker, I am pleased to join our colleagues today as we pay tribute to Eunice Kennedy Shriver, founder and chairman of Special Olympics International. Mrs. Shriver's vision, her compassion, and her determination have left us with a program for mentally retarded persons that is unique in its aspirations and in its success.

The International Special Olympics today provides a forum for the athletic achievement of close to 1 million youngsters internationally. It is a source of pride and inspiration not only for the athletes involved but also for our country and the world. Small wonder that cities vie for the opportunity to host the culminating events, which attract worldwide attention.

This remarkable program arose out of Mrs. Shriver's lifelong commitment to improving the lot of the mentally retarded, and her ability to find the means to do so. Beginning in 1963, she sought to encourage revolutionary research into the development of resources for the retarded with funds from the Joseph P. Kennedy, Jr., Foundation. She also provided the impetus for various national projects such as the President's Panel on Mental Retardation and the Mental Retardation Facilities Construction Act of 1963, which supplied Federal funds to help the Nation's retarded persons

for the first time. Finally, she founded and developed the Special Olympics, a celebration of the talents and abilities of mentally retarded athletes and, again, an astonishing success.

Today, Eunice Shriver's dream of international athletic events involving mentally retarded athletes seems as natural as the original Olympics. Her vision has become an independent and enduring reality. We are all fortunate for this turn of events. As Mrs. Shriver relinquishes the day-to-day leadership of the Special Olympics International, we cannot thank her enough for her wisdom and her contributions to our world.

Mr. RICHARDSON. Mr. Speaker, 22 years ago, it was the fate of most children and adults with mental retardation to be hidden away at home or in institutions and to be denied participation in most of the activities the rest of us take for granted. But that was before Special Olympics. In 1968, one woman, Eunice Kennedy Shriver, had the courage and the vision to break down old myths and prejudices about mental retardation, and to insist that people with mental retardation could play team sports, could run a mile, could swim the length of a pool, and could take part in competitive sports. Since the first Special Olympics Games at Chicago's Soldier Field in 1968, Special Olympics has become a worldwide movement. Millions of special people and their families have taken part in the year-round programs since then. And millions more of the general public have learned that their special friends and neighbors are people with courage, character, and skill, who are worthy of their respect and their acceptance.

On behalf of the people of my district, I congratulate Eunice Kennedy Shriver on the remarkable achievements of Special Olympics and I wish her well as she focuses her energy and compassion on other programs on behalf of people with mental retardation.

## ECONOMIC DEVELOPMENT IN EASTERN EUROPE AND THE BALTIC

The SPEAKER pro tempore (Mr. NAGLE). Under a previous order of the House, the gentleman from Iowa [Mr. LEACH] is recognized for 60 minutes.

Mr. LEACH of Iowa. Mr. Speaker, I rise to speak again to the issue of Eastern Europe and the Baltics and suggest a multipronged approach to economic development in the region.

Before turning to the economic issues of the moment, I would like to comment briefly on the basics of the historical and philosophical circumstances with which the region is confronted.

We appear to be on the cusp of one of the great turning points in history.

In a geostrategic sense, the Russian empire appears to be splintering from without and perhaps within.

In a philosophical sense, communism is in retreat, pell-mell.

At the root of the basics are theories of revolution, theories of the individual, theories of economics.

As we all have come to understand, communism is based on historical, particularly economic, determinism, with a presumptive vanguard elite leading a class struggle.

American revolutionary philosophy is premised on the empowerment of individuals endowed by a creator with inalienable rights.

Because Americans have a general aversion to radical thought and radical change—what Tocqueville described as a cultural penchant for moderation—we have a tendency to overlook one of the profoundest of political facts: that our political philosophy and heritage is profoundly more revolutionary than that provided by the Marxist model.

In contrast with communism, Jeffersonian democracy postulates change from the bottom up, not top down, and institutionalizes change in economic as well as political institutions.

The classic contrast between our systems is illustrated this week in the Baltics. Gorbachev asserts that the independence movement must be constrained by Soviet law and the Soviet Constitution. The Baltic peoples hold freedom springs not from law, but from the individual. Gorbachev calls the newly elected leaders of the Baltic states counterrevolutionaries. They consider themselves patriots.

It is imperative therefore that we recognize the profoundness of the juxtaposition of these two revolutionary paradigms, and understand that in a Jeffersonian context it is revolutionary to assume that governments derive their power and thus legitimacy from—and only from—the consent of the governed. It is counterrevolutionary to hold that freedom is a right granted and thus removable by law, one's own or anyone else's.

Our Founding Fathers were moral as well as political philosophers. They understood Locke's admonition that man was prone to excess and that, in fact, nothing was more dangerous than a good prince. Accordingly, they embraced Montesquieu's separation of powers doctrine and established a limited, constitutional republic.

Likewise, in contrast with the Socialist foundation of Marxism, Jeffersonian democracy embraced Lockean property concepts. Emphasis was placed on individual rights and private property, rather than social obligations defined by others and government ownership of the means of production.

The history of postwar Europe is the history of social experimentation. Western Europe has shown that individual peoples when given a choice prefer democratic institutions and that, with a partial exception in Scandinavia, the economic system that best fits democracy is free enterprise.

Eastern Europe has shown that experiments with state-sponsored coercion are doomed to failure and that the power of individual aspirations for freedom is greater than either the gun held by a foreign soldier or the nuclear trigger controlled by a foreign potentate.

All of us are learning anew the power of nationalism, the desire of people to carve their own destiny, to make their own mistakes. What appears clear at this juncture is that the Soviet soldier will no longer be countenanced in the region; what is unclear is whether current nation-state boundaries will hold, whether ethnic chaos will be unleashed, whether Democratic aspirations will produce lasting Democratic institutions, whether economic change will be fast or fair enough to satisfy the appetites of the people.

The irony is that as we move to down-size our armed forces and reduce military spending, Uncle Sam's pocket is not very deep. Washington is more concerned about the summit with Congress than the summit with the Kremlin, the shape of new taxes than the shape of a new Europe, the mandate to shrink the deficit instead of the cry to enlarge our economic commitments. The need for a Marshall plan for Eastern Europe may be self-evident; the likelihood is not.

The irony also is that if the current debt obligations of the Eastern European states are honored, any funds Washington may find to spare will be recycled to the region's principal creditors: the Germans, the Swiss, the French, and the Soviets.

Hence, recognizing the constraints of the political circumstance, I would urge five basic economic initiatives, some of which may be out of sync with out allies.

The first is debt forgiveness, a new Bush plan for Eastern Europe to complement the Brady plan for Latin America.

As everyone understands, President Bush is confronted by a vexing political catch-22 as he navigates our country through the unpredictable tides and currents shaping contemporary world affairs. In Eastern Europe the societal strains and economic dislocation created by the unprecedented transition from command to market economies seem increasingly formidable, even as bilateral U.S. aid dollars to propel growth appear to be—relative to the total scope of the problem—increasingly limited.

Neither American political party is contemplating either foreign aid increases or granting to the executive branch anything like the flexibility it needs to manage prudently our existing foreign aid program. While geostrategists within the leadership of the majority party have propounded the stunning thesis that the United States should proffer direct aid to an economically unreconstructed Soviet Union, my sense is that the driving priority ought to be for the United

States to emphasize above all the need to preserve the gains for freedom in Eastern Europe. In this context, we have little choice but to place an emphasis on reducing old debt rather than raising false expectations that substantial new money commitments from the U.S. Government are in the offing.

Accordingly, I have introduced legislation—The Democracy Defense Initiative—which authorizes the President in a multilateral context to write-down on a case-by-case public sector debt in Eastern Europe.

Like the Brady approach to commercial debt relief, official debt reduction in Eastern Europe quintessentially reflects President Bush's "will without wallet" lament. It is not only the maximum that can be expected under the circumstances, but a statesmanlike philosophical accommodation that should help bring American power and commitments more into balance.

Attendant to such an approach are three perplexing issues: the obligations of the commercial banks; the attitude of Western European official creditors; and the problem of precedent.

Treasury is particularly concerned that the cart not come before the horse, that commercial banks not have their credit liabilities strengthened at official expense. Unlike the Brady initiative, it is unlikely, in part because official debt is so much larger than commercial in Eastern Europe, that the private sector will reduce its debt first. The strategy should thus be to induce commercial debt reduction in tandem with official. The U.S. Government may have to be the lead horse, the "neigh leader" pulling the commercial stagecoach, but all must budge together.

Western Europeans, who hold the brunt of current debt have natural misgivings, but despite these it is the obligation of an American Presidency to lead. Precedent exists with the Brady initiative, with the mutual decisions of the past several years to write-down sub-Saharan Africa debt, and with the London Accord of 1953, in which the allies agreed to reduce $2 billion of German debt in order to strengthen Democratic governance in Bonn.

Given the Marshall plan and post-war German debt restructuring, we have every right to speak to our allies with moral force. If the Europeans are discomforted, so be it. The fact is that just as the Brady plan changed the landscape of international finance with its very introduction, a personally stamped Bush initiative of this nature would so change the expectational framework in Eastern Europe that in one form or another Western European governments would be hard pressed not to accede. We can't prudently go it alone; we can insist on allied unity, not for our sake, but for the sake of stability on their continent.

From an American perspective, the theoretical problem of precedent is more troubling. We have approximately $613 billion in official debt outstanding, of which Eastern European governments hold less than $4 billion. The pressure to restructure this debt will presumably grow. My sense is that this is a valid concern, but the risk and cost is worth it.

Poland, for instance, is the bellwether of freedom, and in that courageous country where the decision has been made to rupture the economy from its Socialist moorings real industrial production and real income is down dramatically. The country's current account balance is weakening at the same time its debt, despite Paris Club rescheduling, is accelerating. While it might be argued that simply throwing dollars at certain Eastern European problems could defer change and allow unsustainable enterprise to limp along for a year or two more, the case for lifting the debt burden is overwhelming in Poland and would serve as an action model which bolsters enterprise, not welfare.

A footnote, but not insignificant, issue is the losses that will be entertained by the export financing arms of various governments. The fact taxpayers may have to pick up the costs of past government financed export sales to Eastern Europe might help lead to a little more restraint in the use of such financing, which would be in the interest of the United States, which employs such financing approaches less than our competitors, and in the interest of long-, although not short-, term fiscal sanity for all governments.

The second initiative, which the U.S. Congress has already made a down-payment toward, is to provide modest direct aid, preferably to advance private sector development rather than bolster social or debt service. A strength of the American economy is its investment banking infrastructure, but caution should be signaled in the sparseness of precedent in the government's qualification as a prescient picker of winners in credit allocation games. In addition, there is likely to be certain disgruntlement that may develop among the parties not chosen for government directed capital allocation. Nonetheless, in particular as long as current debt arrangements are in place, the case for searching out new entrepreneurs and breaking from the existing economic infrastructure is overwhelming.

As for the savings potential and hence prospects of prudent internal credit allocations within Eastern European societies, particularly Poland, the case for helping establish a healthy private sector banking community as well as cooperative agricultural and credit union infrastructures untied to and undirected by a central government is powerful. Modest Western support and, more importantly, technical assistance is crucial in these endeavors. Legislation I have authored in this area is part of existing statute, but unfortunately to date has not received as much administration attention as I believe is warranted. The fact is that it is more important to develop institutions Eastern European people have confidence in so that the estimated $4 billion currently in mattresses or their equivalent in Poland alone can be tapped for indigenous, self-directed economic development.

Third, the President should put the prestige of his office and Congress should exhort American business to invest in Eastern Europe. The President has properly urged and agreed to help orchestrate private sector volunteer efforts, but there is no substitute for real American entrepreneurial commitments. Investments in jobs as well as ideas are in order. On the volunteer side, the Peace Corps should be authorized and provided emergency resources to give priority to business school rather than English teachers in Eastern Europe. America's business schools should be asked to adopt an Eastern European institution for exchange purposes just as American legislators ought to develop one-on-one ties with East European parliamentarians.

Fourth, and perhaps most importantly, the United States ought to negotiate a free trade agreement with the countries of Eastern Europe and the Baltics, beginning with Poland. Politicians too frequently assume that a bettering of world relations is likely to stem primarily from government-to-government ties. Actually business men and women, unelected people of commerce, are bringing the world closer together than public officials and stand a better chance to defend the sanity of peace from the insanity of war than any president or commissioner.

The idea of Free Trade Agreements, which the United States has precedentially established in the Caribbean, with Canada, and Israel, makes particularly good sense in Eastern Europe and the Baltics.

For Eastern Europeans it provides assured market access to the United States and thus stands as a beckoning incentive for American as well as European and Japanese investment.

For America the establishment of a Free Trade Agreement would not only provide the region a greater chance for economic progress and thus political stability, which is profoundly in our strategic interest, but it could serve to undercut from the backside any exterior trade walls the Western Europeans might consider erecting with the movement toward greater

economic unification symbolized by 1992.

For the Baltic states a Free Trade Agreement would underpin political as well as economic independence and give incentive for Westerners to make Latvia, and Estonia not only models of a free future, but ports of entry and exit ala Hong Kong for commerce with the Soviet Union.

Accordingly, I will this week be introducing legislation calling on the administration to commence early negotiations with the individual countries of Eastern Europe and the Baltic region, as on a case-by-case basis they establish constitutional democracies, adopt free enterprise, and move forthcomingly to guarantee rights of minorities, whether they be political, social, or ethnic. Clearly, certain complex CoCom limitations will have to be maintained as will rules to assure products exported under free trade arrangements are primarily of Eastern European and Baltic origin, but the fundamental premise of free and fair trade with this region is simple. The more tied with the West these countries become, the greater our strength and economic well-being.

Fifth, despite budget problems at home and the contingent liabilities implicit in lending from international financial institutions, the United States should become a constructive partner in the proposed European Bank for Reconstruction and Development [EBRD]. At a time when substantial troop reductions are under serious consideration in the European theater, the United States should replace military leadership with economic. Now may be a time to reduce troops; it isn't time to reduce economic ties. America cannot turn its back on Europe, especially at this time of such wrenching—and hopeful—economic and political transition.

From a self-interested perspective, United States participation in the EBRD allows our voice to be heard on strategic issues, such as potential Soviet borrowing, and represents a decrease in funding liabilities—we will have a 10 percent stake—as contrasted with direct assistance or the price tag of our participation in most other international institutions.

Of interest as well, leadership of the EBRD springs from France and disproportionally, Western and southern Europe. The United States may be reluctant to see the establishment of a new international financial institution, but if we want cooperation in other areas of trade and finance—from GATT to commercial bank standards to the Brady plan to potential debt reduction in Eastern Europe—we have an obligation to work constructively with ideas that emerge from Paris as well as Washington.

Finally, a note about the Baltics. President Bush has little choice but to take a low key tract, but there should be no misunderstanding in Moscow about the coincidence of American values and Baltic aspirations. Increased Muscovite coercion in the Baltics will jeopardize progressive Soviet trade ties with the West. Export-Import Bank guarantees, Overseas Prive Investment Corporation insurance, Soviet loans from or membership in the International Monetary Fund and World Bank, United States commercial bank loans to the Soviet Union, relaxation of CoCom export controls, the granting of most-favored-nation trade status, the extension of tariff benefits under the Generalized System of Preferences—all become jeopardized.

The Baltic problem may be Moscow's most vexing and, given the critical nature of this juncture in arms control discussions, inconvenient for the United States. Nevertheless, it cannot be ignored; nor can Baltic freedom be sacrificed for the advancement of other Western interests. The West may be in the process of winning World War III without firing a shot in Eastern Europe, but a new kind of economic war—with isolation rather than engagement being its most formidable tactic—may erupt with the Soviet Union if freedom in the Baltics is squelched.

Given the tenuousness of the change taking place in Eastern Europe and the chanciness of independence in the Baltics, the West can neither afford division nor lack of commitment and resolve. With the exception of the two cataclysmic wars of this century, what is taking place in Europe today is of unrivaled significance since, and perhaps including, the French Revolution. History demands that Washington not lose sight of what really matters at this time. The consequences would be too grave.

## CONFERENCE REPORT ON H.R. 4404, DIRE EMERGENCY SUPPLEMENTAL APPROPRIATIONS

Mr. WHITTEN submitted the following conference report and statement on the bill (H.R. 4404) making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes:

CONFERENCE REPORT (H. REPT. 101-493)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4404) "making dire emergency supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes, "having met, after full and free conference, have agreed to recommend and to recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 19, 34, 52, 66, 68, 72, 76, 77, 98, 102, 103, 108, 109, 112, 121, 122, 132, 133, 134, 135, 148, 166, 177, 179, and 180.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 10, 13, 21, 31, 50, 61, 86, 90, 91, 92, 94, 95, 105, 106, 110, 119, 120, 125, 128, 129, 139, 146, 149, 150, and 156, and agree to the same.

Amendment numbered 5:

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert *Departments of Commerce and Justice, the Judiciary, and Related Agencies*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$80,800,000*; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$39,500,000*; and the Senate agree to the same.

Amendment numbered 28:

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$3,000,000*; and the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$62,000,000*; and the Senate agree to the same.

Amendment numbered 32:

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

*Missile procurement, Army, 1990/1992, $50,700,000;*

*Procurement of weapons and tracked combat vehicles, Army, 1990/1992, $5,500,000;*

And the Senate agree to the same.

Amendment numbered 33:

That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$45,200,000*; And the Senate agree to the same.

Amendment numbered 35:

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$51,000,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Aircraft procurement, Navy, 1988/1990, $30,000,000;

Weapons procurement, Navy, 1989/1991, $40,600,000;

Weapons procurement, Navy, 1990/1992, $17,201,000;

And the Senate agree to the same.

Amendment numbered 37:

That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Other procurement, Navy, 1990/1992, $2,000,000;

Procurement, Marine Corps, 1990/1992, $15,200,000;

And the Senate agree to the same.

Amendment numbered 42:

That the House recede from its disagreement to the amendment of the Senate numbered 42, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$27,000,000*; and the Senate agree to the same.

Amendment numbered 44:

That the House recede from its disagreement to the amendment of the Senate numbered 44, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$102,358,000*; and the Senate agree to the same.

Amendment numbered 75:

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$20,000,000*; and the Senate agree to the same.

Amendment numbered 78:

That the House recede from its disagreement to the amendment of the Senate numbered 78, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

*, and $10,000,000 shall be used to provide assistance, through the National Endowment for Democracy and other groups, to support programs and activities of organizations to encourage negotiations leading to a peaceful transition to a genuine democracy based on universal suffrage within a united South Africa, as follows:*

*(a) SUSPENSION OF VIOLENCE.—An organization which has engaged in armed struggle or other acts of violence shall be eligible for assistance under this section only if that organization is committed to a suspension of violence in the context of negotiations to establish a democratic system of government in South Africa.*

*(b) PROHIBITION ON USING FUNDS TO SUPPORT VIOLENCE.—In order to receive assistance under this section, an organization must agree that it will not use any of the funds made available to it under this section for the purpose of supporting physical violence by any individual, group, or government.*

And the Senate agree to the same.

Amendment numbered 80:

That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows:

In lieu of the sum named in said amendment, insert *$10,000,000*; and the Senate agree to the same.

Amendment numbered 116:

That the House recede from its disagreement to the amendment of the Senate numbered 116, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert *$3,100,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 6, 8, 9, 11, 12, 14, 15, 16, 17, 18, 20, 22, 23, 24, 25, 29, 38, 39, 40, 41, 43, 45, 46, 47, 48, 49, 51, 53, 54, 55, 56, 57, 58, 59, 60, 62, 63, 64, 65, 67, 69, 70, 71, 73, 74, 79, 81, 82, 83, 84, 85, 87, 88, 89, 93, 96, 97, 99, 100, 101, 104, 107, 111, 113, 114, 115, 117, 118, 123, 124, 126, 127, 130, 131, 136, 137, 138, 140, 141, 142, 143, 144, 145, 147, 151, 152, 153, 154, 155, 157, 158, 159, 160, 161, 162, 163, 164, 165, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, and 178.

*Managers on the Part of the Senate.*

## JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4404) making supplemental appropriations for disaster assistance, food stamps, unemployment compensation administration, and other urgent needs, and transfers, and reducing funds budgeted for military spending for the fiscal year ending September 30, 1990, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

### INTRODUCTION

This conference report brings together H.R. 4404 as it passed the House as a supplemental which, under Senate rules, was increased by adding a number of items. H.R. 4828 was introduced in the House which included numerous items added by the Senate to H.R. 4404, many of which the House conferees support but which were left out of H.R. 4404, the original House bill.

H.R. 4828 included funds to meet needs identified after completion of House action on H.R. 4404 on April 3. These include the floods in Arkansas, Louisiana, Oklahoma, and Texas; poor responses to the Census; a greater need for food stamps; older American employment services; disease prevention mostly for measles; Head Start; school dropout prevention; additional veterans loan guarantees, additional veterans medical care; and emergency fire repairs for the Corps of Engineers headquarters building.

The conferees on H.R. 4404 agreed to consider these matters as well as the matters in conference on H.R. 4404.

The result is a bill on which the conferees, House and Senate, have agreed.

The agreement includes the following major activities:

| | |
|---|---|
| Disaster Assistance | $216,000,000 |
| Census | 110,000,000 |
| Economic Support Panama | 420,000,000 |
| Economic Support Nicaragua | 300,000,000 |
| Forest Firefighting Funds | 434,000,000 |
| Older American Community Service Employment | 10,000,000 |
| State Unemployment Service Operations | 100,000,000 |
| Disease Prevention (measles vaccine) | 30,000,000 |
| Low Income Home Energy Assistance | 50,000,000 |
| Head Start | 166,000,000 |
| School Drop-Out Prevention | 20,000,000 |
| Food Stamp Program | 1,200,000,000 |
| Veterans Pensions | 190,000,000 |
| Veterans Loan Guaranties | 245,000,000 |
| Veterans Medical Care | 94,000,000 |
| Low-Income Housing | 72,000,000 |

## TITLE I—DISASTER ASSISTANCE

## DEPARTMENT OF DEFENSE—CIVIL

## DEPARTMENT OF THE ARMY

### CORPS OF ENGINEERS—CIVIL

#### GENERAL EXPENSES

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and

concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*GENERAL EXPENSES*

*For additional expenses to meet the present emergency needs for "General expenses", $15,000,000, to remain available until expended.*

*OPERATION AND MAINTENANCE, GENERAL*

*For additional expenses to meet the present emergency needs for "Operation and maintenance, general", $40,000,000, to remain available until expended.*

And in Title I of the House engrossed bill, strike the matter included under the heading Federal Emergency Management Agency, Disaster Relief (page 2, lines 24 and 25, and page 3, lines 1 and 2), and insert the following:

*For additional expenses in carrying out the functions of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), $50,000,000, to remain available until expended, which, together with $350,000,000 uncommitted and unobligated identified by the Federal Emergency Management Agency to be presently available, will provide over $400,000,000 for relief and assistance.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides $15,000,000 for "General expenses" of the Corps of Engineers to cover the costs incurred as the result of the fire that damaged their Corps' Washington headquarters. Funds are also provided, $40,000,000, for "Operations and maintenance, general" urgently needed to repair the damage to Government facilities caused by the recent severe flooding in the South and Southwest United States. These funding amounts were included in H.R. 4828 which was introduced in the House of Representatives.

The conferees are aware of the severe flooding currently being experienced in the Texas, Louisiana, and Oklahoma areas. For many of these areas this is the flood of record, exceeding flooding events experienced more than fifty years ago.

The conferees also understand that numerous Federal flood control facilities and projects have been damaged and are in need of repair or rehabilitation, which is expected to require several million dollars. The full extent of the damage and associated repair costs will not be fully known until flood waters recede.

The conference agreement contains a total of $60,000,000 in funding for Flood and Coastal Emergencies of the Corps of Engineers for flood emergency preparation, flood fighting and rescue operations, and for the repair of flood facilities; and for other emergency operation and maintenance needs of the Corps.

The conferees strongly urge the Corps to use existing emergency and other project authorities to repair or rehabilitation damaged flood control facilities, and where necessary, to use available resources to fund the work. The conferees expect that funds taken from other activities be returned at the earliest possible time.

Within any funds available to the Corps of Engineers, the Secretary of the Army, acting through the Chief of Engineers, is directed to construct, operate, and maintain the Fulton Historical Center in the vicinity of the Lock C site at Fulton, Mississippi, in accordance with the plans that have been developed by the Corps of Engineers' Mobile District, under the terms and conditions for completion of recreation facilities on the Tennessee-Tombigbee Waterway provided for in Public Law 99-88.

The conference agreement includes language under the Federal Emergency Management Agency appropriating $50,000,000 for the disaster relief account, which, together with $350,000,000 in unobligated funds identified as presently available, will provide $400,000,000 for relief and assistance. This language was included in the House introduced bill (H.R. 4828). The House and Senate passed versions of H.R. 4404 only provided for the appropriation of new funds.

Recently, severe storms, tornadoes and flooding have devastated parts of Alabama, Arkansas, Georgia, Louisiana, Mississippi, Oklahoma, Tennesse, and Texas. At least 13 deaths have been related to the disasters. At least 100 counties have been declared disaster areas or are being surveyed in the affected states. Accordingly, the conferees direct that of the funds appropriated in this Act, and from funds previously appropriated to the Federal Emergency Management Agency for disaster relief programs, such funds as necessary shall be made available to disaster declared areas in accordance with the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

DEPARTMENT OF AGRICULTURE

SOIL CONSERVATION SERVICE

WATERSHED AND FLOOD PREVENTION OPERATIONS

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$70,000,000, of which $10,000,000 shall be available for the Emergency Conservation Program of the Agricultural Stabilization and Conservation Service: Provided, That the Soil Conservation Service and the Agricutural Stabilization and Conservation Service are expected to address the needs arising from more recent disasters and, to the greatest extent possible, to continue to address the remaining needs form Hurricane Hugo: Provided further, That such funds are*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $60,000,000 for the Emergency Watershed Protection Program of the Soil Conservation Service and $10,000,000 for the Emergency Conservation Program of the Agricultural Stabilization and Conservation Service. An additional $10,000,000 is made available elsewhere in the bill for the Emergency Conservation Program of the Agricultural Stabilization and Conservation Service, for a total of $20,000,000. H.R. 4828, introduced in the House of Representatives, contained a total of $60,000,000 for the Soil Conservation Service and $20,000,000 for the Emergency Conservation Program of the Agricultural Stabilization and Conservation Service. The amount included in the agreement reflects the latest available estimates to meet the needs arising from natural disasters.

The conference agreement further provides that the Soil Conservation Service and the Agricultural Stabilization and Conservation Service are expected to address the needs arising from more recent disasters and, to the greatest extent possible, to continue to address the remaining needs from Hurricane Hugo.

The Appropriations Act for fiscal year 1990 included funding to operate and fully staff the Newport, Arkansas regional office of the Arkansas ground water conservation study. The conferees expect this office and other Arkansas SCS programs to be fully maintained.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

SALARIES AND EXPENSES

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides $11,000,000 for disaster payments to carry out section 201(k)(2) of the Agricultural Act of 1949 for 1990 crops damaged by a natural disaster in 1989. This provision was also included in the House introduced bill (H.R. 4828).

Amendment No. 4: Deletes language proposed by the Senate regarding 31 U.S.C. 1513.

The conferees understand that as a direct result of the unanticipated inclusion of sequestration in the fiscal year 1990 reconciliation legislation, many agencies are being required to make staff reductions and to close offices that were not contemplated during the orderly appropriations process. The conferees are including a government-wide provision that permits funds apportioned for the fourth quarter to be used in the third quarter, where necessary. This will give agencies a longer time to develop alternative saving proposals or to develop supplemental appropriations requests. It is important that essential services such as food inspection, air traffic safety, law enforcement efforts, and the like not be unnecessarily curtailed.

It is expected that this will be used only in those instances where, after all other responsible alternatives have been exhausted, an agency would be forced to furlough employees or to close offices temporarily. The conferees expect those utilizing this provision to be accountable.

TITLE II—SUPPLEMENTAL APPROPRIATIONS

CHAPTER I

DEPARTMENTS OF COMMERCE AND JUSTICE, THE JUDICIARY, AND RELATED AGENCIES

Amendment No. 5: Inserts the heading, "Departments of Commerce and Justice, the Judiciary, and Related Agencies" as specified in the House introduced bill (H.R. 4828) instead of "Department of Justice and the Judiciary" as proposed by the House in the original Dire Emergency Supplemental and "Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies" as proposed by the Senate as an amendment to that bill.

DEPARTMENT OF COMMERCE

Amendment No. 6: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*DEPARTMENT OF COMMERCE*

*ECONOMIC DEVELOPMENT ADMINISTRATION*

*ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS*

*For an additional amount for "Economic Development Assistance Programs",*

*$424,000 for planning assistance for Economic Development Districts authorized by section 301(b) of the Public Works and Economic Development Act of 1965, as amended, which shall be obligated only for grants to maintain the level of assistance in effect on September 30, 1989, for each development district.*

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

*The limitation on the use of prior year funds for the Trade Adjustment Assistance Program, enacted under this head in Public Law 101-162, is repealed and funds appropriated for this program for fiscal year 1990 and prior years are available for obligation.*

*For an additional amount for "Operations and Administration", $1,445,000 which shall be obligated only for the Trade Adjustment Assistance Program for grants to recipient organizations.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes the heading "Department of Commerce" that was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental. The conference agreement also includes a supplemental appropriation of $424,000 for the Economic Development Administration to maintain the level of planning grant assistance that was in effect for each economic development district as of September 30, 1989. This amount was included in the House introduced bill (H.R. 4838). The conference agreement also includes a language provision for the International Trade Administration repealing a limitation contained in the Fiscal Year 1990 Appropriations Act (P.L. 101-162) on the use of funds for the Trade Adjustment Assistance Program, and a supplemental appropriation of $1,445,000 for the Trade Adjustment Assistance Program. These provisions were also included in the House introduced bill (H.R. 4828). These provisions in the conference agreement, together with funds already available for fiscal year 1990, will provide a total of $14,517,000 and will ensure that all Trade Adjustment Assistance Centers will be able to remain open and maintain all planned commitments and services to clients for the current fiscal year.

BUREAU OF THE CENSUS

Amendment No. 7: Inserts a heading as proposed by the Senate. This heading was also included in the House introduced bill (H.R. 4828).

PERIODIC CENSUSES AND PROGRAMS

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

The conference agreement appropriates $110,000,000 to the Bureau for additional costs for the decennial census due to lower-than-expected response and employee productivity rates. This amount was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental. The conferees expect the Bureau of the Census to first use funds already appropriated before obligating any of the funds made available by this supplemental appropriations bill.

ADMINISTRATIVE PROVISION

Amendment No. 9: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

ADMINISTRATIVE PROVISION

*Services performed after April 20, 1990 by individuals appointed to temporary positions within the Bureau of the Census for purposes relating to the 1990 decennial census of population shall not constitute "Federal service" for purposes of section 8501 of title 5, United States Code.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides that services performed after April 20, 1990 by temporary employees of the Bureau of the Census for purposes relating to the 1990 decennial census shall not constitute "Federal service" for purposes of section 8501 of title 5, United States Code. This provision was included in the House introduced bill (H.R. 4828). The Senate amendment to the original Dire Emergency Supplemental contained language providing that services performed by temporary employees of the Bureau of the Census for purposes relating to the 1990 decennial census (as determined under regulations prescribed by the Secretary of Commerce) shall not constitute "Federal service" for purposes of section 8501 of title 5, United States Code.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Amendment No. 10: Inserts a heading as proposed by the Senate. This heading was also included in the House introduced bill (H.R. 4828).

OPERATIONS, RESEARCH, AND FACILITIES

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

OPERATIONS, RESEARCH, AND FACILITIES

*For an additional amount for "Operations, research, and facilities", $8,762,000, to remain available until expended.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment would have provided a supplemental appropriation of $15,482,000 for the Operations, Research, and Facilities account. The House bill contained no similar provision.

The conference agreement provides $8,762,000 in supplemental funds for the Operations, Research, and Facilities account. Of the total supplemental appropriation, $6,500,000 is provided for damage assessment analyses of the *Exxon Valdez* oil spill. This amount, together with $1,500,000 already appropriated, will provide a total of $8,000,000 for fiscal year 1990 for this activity. The remaining $2,262,000 in this supplemental appropriation, together with $4,600,000 in NEXRAD contract savings and $620,000 already appropriated and obligated for a ground satellite station and computer, will provide the resources to the National Weather Service to begin monitoring volcanic eruptions from Mount Redoubt in Alaska.

ADMINISTRATIVE PROVISION

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

ADMINISTRATIVE PROVISION

*Notwithstanding any other provision of law, a procurement for the Stuttgart, Arkansas, Fish Farming Experimental Laboratory shall be issued by the Administrator of the National Oceanic and Atmospheric Administrator or the Director of the United States Fish and Wildlife Service which includes the full scope of the work described in Department of the Interior Task Order No. 89-025, Contract No. 14-16-0009-86-007: Provided, That the solicitation and contract shall contain the clause "availability of funds" found at 48 CFR 52.232-18; and also $6,000,000 is hereby appropriated to the United States Fish and Wildlife Service to procure a wildlife refuge site at no more than appraised market value and without the use of condemnation procedures at a location in Jasper and Marion Counties, Iowa, identified in a location map on file with the United States Fish and Wildlife Service and entitled "Walnut Creek National Wildlife Refuge".*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes an administrative provision that was included in the House introduced bill (H.R. 4828), and as a Senate amendment to the original Dire Emergency Supplemental, which permits certain construction at the Stuttgart, Arkansas, Fish Farming Laboratory to begin in fiscal year 1990, notwithstanding the availability of funds. The conference agreement also includes a new provision not in either the House or Senate bills appropriating $6,000,000 to the Fish and Wildlife Service for procurement of a site for a wildlife refuge in central Iowa.

An unusual and unexpected opportunity has arisen to acquire a site for a wildlife refuge and outdoor laboratory on a tributary of the Des Moines River in central Iowa. Iowa is one of only two states which has no national park. In addition, virtually all of the land in Iowa has been homesteaded, cleared, and cultivated since the middle of the nineteenth century. A block of land is now available which is located completely within one watershed and if returned to its indigenous state would offer an unusual opportunity for interpretive programs, wetlands, a habitat for some 300 species of indigenous and migratory birds, the regrowth of many acres of now scarce species of trees, buffalo and elk which were indigenous to the area, and the largest native prairie grass fields in Iowa. It is estimated by the U.S. Fish and Wildlife Service that the area, properly managed, could also produce 3,000 ducks annually and support peak fall migrations of 30,000 ducks and 5,000 geese. It is adjacent to an area which is a stopover by thousands of woodstorks and white pelicans.

The proposal for such a refuge has been recommended by the Des Moines River Greenbelt Advisory Committee consisting of representatives of nine counties and several cities in the Des Moines River Greenbelt area and representatives of state government. It has also been approved by the Iowa Department of Natural Resources and numerous local officials.

A power company acquired most of the site for construction of a generating station and cooling facilities. It was obtained by voluntary purchase from numerous landowners, but the power company has recently abandoned these construction plans. But for this unexpected and unusual opportunity, such a uniquely suitable site would not be

available. Over one million people, including tens of thousands of school children, would be within easy driving distance and could use the area as an outdoor study area. The site should be acquired while it is still available.

DEPARTMENT OF JUSTICE

LEGAL ACTIVITIES

Amendment No. 13: Inserts a heading as proposed by the Senate. This heading was also included in the House introduced bill (H.R. 4828).

SALARIES AND EXPENSES, ANTITRUST DIVISION

Amendment No. 14: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SALARIES AND EXPENSES, ANTITRUST DIVISION*

*(TRANSFER OF FUNDS)*

*For an additional amount for "Salaries and expenses, Antitrust Division", $2,500,000 to be derived by transfer from "Salaries and expenses, Federal Prison System".*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides $2,500,000 to be derived by transfer from surplus amounts in the Salaries and Expenses appropriation of the Federal Prison System. This provision was included in the House introduced bill (H.R. 4828). The Senate amendment to the original Dire Emergency Supplemental provided new budget authority of $2,500,000.

The conferees agree that these additional funds, needed to cover anticipated shortfalls in the collection of fees under the Hart-Scott-Rodino Act, are sufficient to allow the Antitrust Division to maintain its current level of operations for the remainder of fiscal year 1990.

SALARIES AND EXPENSES, UNITED STATES MARSHALS SERVICE

(TRANSFER OF FUNDS)

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which proposed an additional $7,400,000 for U.S. Marshals Service activities to be derived by transfer from surplus amounts in the Federal Prison System, Salaries and Expenses appropriation. This provision was also included in the House introduced bill (H.R. 4828). The conference agreement provides funds needed to handle unanticipated Marshals Service costs resulting from heightened security associated with the bombings in the Eleventh Judicial Circuit, an increased number of drug cases, and the trial of Manuel Noriega.

FEES AND EXPENSES OF WITNESSES

Amendment No. 16: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment, which proposed an increase of $2,600,000 to the Fees and Expenses of Witnesses account. This provision was also included in the House introduced bill (H.R. 4828). The conference agreement will allow for the continuation of the services of the Witness Security Program, which is currently underfunded due to the sudden increase in drug cartel investigations.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*FEDERAL BUREAU OF INVESTIGATION*

*SALARIES AND EXPENSES*

*For an additional amount for "Salaries and expenses", $185,000,000, to remain available until expended, to defray expenses for the automation of fingerprint identification services including planning, site acquisition, construction, and other associated costs: Provided, That none of the funds included herein shall be available for automated system procurement prior to submission of an implementation plan thereon, pursuant to the notification procedures prescribed under Section 606 of Public Law 101-162, and a site shall not be selected or procured prior to notification of the appropriate Committees of the House of Representatives and the Senate.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment proposed an appropriation of $185,000,000 to allow the FBI to relocate and fully automate its Identification Division. The House bill contained no similar provision.

The conferees agree that modernization of the FBI's Identification Division (ID) is vitally needed. The ID provides fingerprint identification services on a nationwide basis to the criminal justice community. Currently several problems exist which threaten State and local law enforcement's heavy dependence on the ID. First, the ID has an extensive backlog of over 700,000 fingerprint cards and 2,000,000 criminal dispositions that are unfiled and unavailable. This backlog can be directly attributed to the instability of a workforce which experiences turnover rates that range from 15-30 percent annually. This high turnover results from the ID's inability to retain a predominantly low-graded, clerical workforce in a high cost of living area. Secondly, advances in technology have made the current ID system obsolete and unable to meet the demands of Federal, State and local law enforcement. Many States have far outdistanced the FBI in developing new automated fingerprint identification systems; however, these States are not automating in a consistent manner.

The conferees believe that the combination of the processing backlogs created by personnel shortages and the obsolescence of the current ID system will ultimately result in the collapse of this critical component of the criminal justice system. The conferees believe that the FBI should begin the planning and development of this modernized ID in fiscal year 1990 and the conference agreement provides $185,000,000 for this purpose. However, the conferees agree that the final decision on implementation of any FBI automation proposal depends upon the selection of an adequate automated system and must be made in consultation with the Congress. The conference agreement includes bill language which precludes the use of these funds for procurement of an automated system until after the notification procedures of the Committees on Appropriations of the House and Senate have been complied with. A final site has not been selected, and the conferees expect that, prior to any procurement of a site, justifications will be presented to the Congress, including a list of sites considered and the reasons used in determining the preferred site. The conferees also agree, regardless of the location of the proposed site, that current ID employees should be guaranteed employment either at the new site or with other FBI organizations in the greater metropolitan Washington D.C. area.

FEDERAL PRISON SYSTEM

BUILDINGS AND FACILITIES

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*FEDERAL PRISON SYSTEM*

*BUILDINGS AND FACILITIES*

*The language under this heading in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990 (Public Law 101-162; 103 Stat. 1000-1001), is amended by adding the following after the period, "Deposits transferred from the Assets Forfeiture Fund to the Buildings and Facilities account of the Federal Prison System in 1989 may be used for the construction of correctional institutions, and the construction and renovation of Immigration and Naturalization Service and United States Marshals Service detention facilities, and for the authorized purposes of the Support of United States Prisoners' Cooperative Agreement Program.".*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides authority for the Department of Justice to utilize funds transferred from the Assets Forefiture Fund to the Federal Prison System for construction of additional prison space to also be available for construction of U.S. Marshals Service detention facilities for unsentenced prisoners, for INS criminal alien detention facilities, and for Marshals Service facilities constructed under the Cooperative Agreement Program (CAP). This provision was also included in the House introduced bill (H.R. 4828). The Senate amendment to the original Dire Emergency Supplemental included the authority to construct, renovate and repair INS and Marshalls Service facilities.

The conference agreement will allow the Federal Prison System to reduce its current overcrowding by transferring unsentenced or illegal alien prisoners to new or expanded detention facilities, which can be opened faster than new prisons. The conference language provides the Marshals Service the ability to begin the renovation of its existing holding cells which are, for the most part, outdated and fail to meet Federal standards. Further, the agreement will allow the INS to use approximately $10,000,000 of the Assets Forefeiture Fund transfer to expand the capacity of five existing detention facilities by a total of 575 beds. Lastly, the conference agreement will allow the Marshals Service to use approximately $20,000,000 from the Fund to acquire over 1,000 additional bedspaces under the CAP program. In every instance, these projects are ready to be acted on, but lack the necessary funding. The conference language will make such funding available now.

The conferees expect that, for projects constructed under this new authority, the Department will work closely with State and local officials to assure community discussion, consideration and input on these projects. In addition, it is expected that all appropriate action will be taken to give interested parties adequate opportunity to voice concerns with any project, so that these concerns may be reflected in final planning.

DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

SECRETARY'S SPECIAL LITHUANIA INDEPENDENCE AND RECOGNITION FUND

Amendment No. 19: Deletes the Senate amendment which would have appropriated $10,000,000 for certain expenses of establishing a United States Embassy in Lithuania as soon as possible in the event that the United States formally recognizes the independent government of the Republic of Lithuania. The House bill contained no provisions on this matter.

THE JUDICIARY

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$25,503,000, and in addition, $4,500,000 to be derived by transfer from "Defender Services"*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides new budget authority of $25,503,000 and authority to transfer $4,500,000 from surplus amounts in the Defender Services appropriation for a total of $30,003,000. This provision was included in the House introduced bill (H.R. 4828). The Senate amendment to the original Dire Emergency Supplemental provided new budget authority of $23,003,000.

The conference agreement provides: $5,253,000 for the mandatory costs associated with the 1990 pay raise for Federal judges, $22,750,000 to offset shortfalls in fee collections, and $2,000,000 to cover a shortfall in the Drug Dependent Offenders Program.

RELATED AGENCIES

Amendment No. 21: Inserts a heading as proposed by the Senate. This heading was also included in the House introduced bill (H.R. 4828).

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

FEDERAL SHIP FINANCING FUND

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*DEPARTMENT OF TRANSPORTATION*

*MARITIME ADMINISTRATION*

*FEDERAL SHIP FINANCING FUND*

*For the "Federal Ship Financing Fund", $750,000, to remain available until expended: Provided, That, notwithstanding any other provision of law, these funds shall be available to the Federal Maritime Administrator of the Department of Transportation only to acquire an appropriate vessel for transfer to the Government of the Territory of American Samoa to be used by that Government for inter-island transportation of cargo and passengers, and for repairs and maintenance necessary to provide for the United States Coast Guard's certification of such vessel: Provided further, That the Department of Defense shall transport such vessel to American Samoa without reimbursement and any appropriations available to the Department of Defense shall be available for this purpose.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides an appropriation of $750,000 to the Federal Ship Financing Fund to acquire an appropriate vessel for transfer to the Government of American Samoa to be used for inter-island transportation and for repairs and maintenance necessary to provide for U.S. Coast Guard certification of the vessel. The conference agreement also includes language requiring the Department of Defense to transport such vessel to American Samoa without reimbursement and makes appropriations to the Department of Defense available for this purpose. The Senate amendment to the original Dire Emergency Supplemental contained an administrative provision for the Maritime Administration which would have required the transfer of a certain vessel to the Government of American Samoa without reimbursement and would have required the Department of Defense to pay the cost of transporting the vessel to American Samoa without reimbursement. The House introduced bill (H.R. 4828) contained a $750,000 appropriation to the Federal Ship Financing Fund, subject to the enactment of an authorization, for the transfer of a certain ship to the Government of American Samoa and for the cost of refurbishing such vessel.

FEDERAL TRADE COMMISSION

SALARIES AND EXPENSES

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment appropriating $2,500,000 for the Federal Trade Commission. This amount was also included in the House introduced bill (H.R. 4828).

The conferees have received reports that the Commission's staff has develped a proposed policy that would limit the free transfer of soft drink franchises from one local bottler to another. The effective distribution of soft drinks in any given area depends critically on local bottling operations. As Congress recognized in enacting the Soft Drink Interbrand Competition Act of 1980, promoting competition among soft drink concentrate manufacturers should be of primary concern to policymakers in this industry. The conferees expect that the Commission will review its soft drink franchise transfer policies carefully, to ensure that those policies take account of the goals of Congress in enacting the 1980 Soft Drink Act.

CHAPTER II

DEPARTMENT OF DEFENSE—MILITARY

The Defense conference agreement on Supplemental Appropriations for Disaster Assistance, Food Stamps, Unemployment Compensation Administration, and Other Urgent Needs, and Transfers, and Reducing Funds Budgeted for Military Spending, 1990, incorporates some of the provisions of both the House and Senate versions of the bill. The language and allocations set forth in House Report 101-434 and Senate Report 101-272 should be complied with unless specifically addressed in the accompanying bill and statement of the managers to the contrary.

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

*PROCUREMENT*

*PROCUREMENT OF AMMUNITION, ARMY*

*(INCLUDING RESCISSION)*

*For an additional amount for "Procurement of Ammunition, Army", $238,000,000, to be used only for the construction of the RDX production facility at the Louisiana Army Ammunition Plant to remain available for obligation until September 30, 1992: Provided, That of the funds appropriated under this heading in the Department of Defense Appropriations Act, 1988 (Public Law 100-202; 101 Stat. 1329-51), $238,000,000 are rescinded.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

ICEBREAKER

The House and Senate Committees on Appropriations have approved a transfer of funds within the Department of Defense to address funding shortfalls for CHAMPUS and Military Personnel. $50,000,000 of the funds transferred are from the fiscal year 1990 appropriations for one icebreaker. The conferees believe these funds are available based on the acquisition plan for the first vessel.

The conferees understand that the remaining $274,000,000 of the $329,000,000 appropriated for fiscal year 1990 fully funds construction of the first icebreaker.

The conferees direct that the Navy and Coast Guard proceed to acquire the first icebreaker with these funds.

The conferees recognize that additional funding may be required for specific outfitting and defense related features, and expect the Coast Guard and the Navy to report such additional requirements and estimates to the Congress not later than August 15, 1990.

The conferees believe that the icebreaker construction program remains a top priority for both the Navy and the U.S. Coast Guard, and expect the Navy and the Coast Guard to expeditiously proceed to acquire the first new icebreaker.

MILITARY CONSTRUCTION

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the first sum named in said amendment, insert: *$7,000,000*

In lieu of the second sum named in said amendment, insert: *$3,000,000*

The managers on the part of the Senate will move to concur in the Amendment of the House to the amendment of the Senate.

The conference agreement appropriates $7,000,000 for Military Construction, Army National Guard instead of $9,000,000 as proposed by the Senate. This conference agree-

ment amount was included in the House introduced bill (H.R. 4828). The conference agreement also appropriates $3,000,000 for Military Construction, Army Reserve instead of $9,000,000 as proposed by the Senate. This conference agreement amount was also included in the House introduced bill (H.R. 4828).

The conferees expect the Department to utilize such funds for reprogrammings to finance project cost deficiencies.

GENERAL PROVISIONS

(RESCISSIONS)

Both the House and Senate bill rescinded certain Department of Defense prior year unobligated balances to offset new obligational authority for other programs funded in the bill. The total rescinded in the House bill was $1,796,792,000; the total rescinded in the Senate bill was $1,540,974,000. The conference agreement rescinds $2,028,461,000. The programmatic detail of the conference agreement on rescissions is shown in the table below:

| | |
|---|---|
| Military Personnel, Air Force: | |
| Permanent Change of Station Travel | 100,984,000 |
| Other Military Personnel Costs | 3,500,000 |
| Total | 104,484,000 |
| Operation and Maintenance, Army: | |
| DOD Directed Management Savings | 35,800,000 |
| Overseas Repair | 27,000,000 |
| Flying Hours | 18,000,000 |
| Total | 80,800,000 |
| Operation and Maintenance, Navy: | |
| DOD Directed Management Savings | 28,500,000 |
| IOWA Turret Repair | 11,000,000 |

Amendment No. 26: Rescinds $80,800,000 from Operation and Maintenace, Army, instead of $23,305,000 as proposed by the House and $143,308,000 as proposed by the Senate.

Amendment No. 27: Rescinds $39,500,000 from Operation and Maintenance, Navy, instead of $38,834,000 as proposed by the House and $166,093,000 as proposed by the Senate.

Amendment No. 28: Rescinds $3,000,000 from Operations and Maintenance, Marine Corps, instead of $1,582,000 as proposed by the House and $21,236,000 as proposed by the Senate.

Amendment No. 29. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *$380,000,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 30: Rescinds $62,000,000 from Operation and Maintenance, Defense Agencies, instead of $7,132,000 as proposed by the House and $62,056,000 as proposed by the Senate.

Amendment No. 31: Rescinds $16,000,000 from Aircraft Procurement, Army, 1990/1992, as proposed by the Senate instead of $28,600,000 as proposed by the House.

Amendment No. 32: Rescinds $50,700,000 from Missile Procurement, Army, 1990/1992, as proposed by the House instead of no rescission as proposed by the Senate.

Rescinds $5,500,000 from Procurement of Weapons and Tracked Combat Vehicles, Army, 1990/1992, instead of $69,400,000 as proposed by the House and no rescission as proposed by the Senate.

Rescinds no funds from Procurement of Ammunition, Army, 1988/1990, as proposed by the Senate instead of $238,000,000 as proposed by the House.

Amendment No. 33: Rescinds $45,200,000 from Procurement of Ammunition, Army,

1990/1992, instead of $200,000 as proposed by the House and $60,000,000 as proposed by the Senate.

Amendment No. 34: Rescinds $23,000,000 from Other Procurement, Army, 1988/1990, as proposed by the House instead of no rescission as proposed by the Senate.

Rescinds $30,000,000 from Other Procurement, Army, 1989/1991, as proposed by the House instead of no rescission as proposed by the Senate.

Amendment No. 35: Rescinds $51,000,000 from Other Procurement, Army, 1990/1992, instead of $68,100,000 as proposed by the House and $11,000,000 as proposed by the Senate.

Amendment No. 36: Rescinds $30,000,000 from Aircraft Procurement, Navy, 1988/1990, as proposed by the House instead of no rescission as proposed by the Senate.

Rescinds no funds from Aircraft Procurement, Navy, 1990/1992, as proposed by the Senate instead of $83,000,000 as proposed by the House.

Rescinds $40,600,000 from Weapons Procurement, Navy, 1989/1991, as proposed by the House instead of no rescission as proposed by the Senate.

Rescinds $17,201,000 from Weapons Procurement, Navy, 1990/1992, instead of $21,701,000 as proposed by the House and no rescission as proposed by the Senate.

Amendment No. 37: Rescinds $2,000,000 from Other Procurement, Navy, 1990/1992, instead of $22,378,000 as proposed by the House and no rescission as proposed by the Senate.

Rescinds $15,200,000 from Procurement, Marine Corps, 1990/1992, as proposed by the House instead of no rescission as proposed by the Senate.

Amendment No. 38: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$64,864,000;*

*Missile Procurement, Air Force, 1988/1990, $34,900,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 39: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert: *$70,142,000;*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

*Research, Development, Test and Evaluation, Army, 1989/1990, $18,000,000;*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert: *$64,000,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 42: Rescinds $27,000,000 from Research, Development, Test and Evaluation, Navy, 1990/1991, instead of $29,598,000 as proposed by the House and $9,000,000 as proposed by the Senate.

Amendment No. 43: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert: *$77,900,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 44: Rescinds $102,358,000 from Research, Development, Test and Evaluation, Air Force 1990/1991, instead of $237,542,000 as proposed by the House and $16,158,000 as proposed by the Senate.

Amendment No. 45: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$25,000,000;*

*Research, Development, Test and Evaluation, Defense Agencies, 1990/1991, $70,000,000;*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*Navy Stock Fund, $15,000,000;*

*Air Force Stock Fund, $15,000,000;*

*Defense Stock Fund, $78,100,000;*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 47: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

*$36,523,000; Family Housing, Air Force, 1986/1990,*

*$25,200,000; Military Construction, Army, 1986/1990,*

*$2,850,000; Military Construction, Army, 1987/1991,*

*$4,295,000; Military Construction, Army, 1988/1992,*

*$10,470,000; Military Construction, Army, 1989/1993,*

*$29,931,000; Military Construction, Army, 1990/1994,*

*$27,700,000; Family Housing, Army, 1990/1994, $6,335,000,*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement rescinds a total of $143,303,000 instead of $17,800,000 as proposed by the House and $36,522,000 as proposed by the Senate. The conference agreements includes a rescission of $27,800,000 as specified in the House introduced bill (H.R. 4828).

The conferees agree that recissions totaling $143,303,000 from fiscal years 1986 through 1990 shall be derived from the following projects:

| | |
|---|---|
| Family Housing, Air Force 1990-94: | |
| Germany-Ramstein AB: Family Housing (200 units) | −$18,722,000 |
| Projects outside the United States, Family Housing Construction Improvements. | −17,800,000 |
| Family Housing, Air Force 1986-90: | |
| Germany-Ramstein AB: Family Housing (400 units) | −25,200,000 |
| Military Construction, Army 1986-90: | |
| Projects outside the United States, General Reduction | −2,850,000 |
| Military Construction, Army 1987-91: | |
| Projects outside the United States, General Reduction | −4,295,000 |
| Military Construction, Army 1988-92: | |
| Projects outside the United States, General Reduction | −10,470,000 |
| Military Construction, Army 1989-93: | |
| Projects outside the United States, General Reduction | −29,931,000 |
| Military Construction, Army 1990-94: | |
| Projects outside the United States, General Reduction | −27,700,000 |
| Family Housing, Army 1990-94: | |
| Projects outside the United States, Family Housing Construction Improvements. | −6,335,000 |

OPERATION AND MAINTENANCE

Due to the requirement that supplemental appropriations be provided on a deficit neutral basis, the conferees found it necessary to recommend rescissions of funding in the Operation and Maintenance accounts. The conferees note, however, that they have worked closely with the Department of Defense and that $294 million of the rescissions, representing more than one-half of the total recommended reduction, were provided by the Department. Amounts recommended by the Department include $200 million available from a reduction in fuel inventories, $83 million in savings resulting from personnel efficiencies, and $11 million saved through the planned deactivation of the USS IOWA.

*DOD Directed Management Savings.*—The conferees agree to savings which result from Department of Defense management improvements. These savings include $83 million identified by the Department from the civilian hiring freeze. The conferees expect the Department to reduce those accounts affected by force structure changes. It is further expected that funds for medical programs/CHAMPUS will not be reduced since the Department of Defense has identified a continuing funding shortfall for these efforts. The conferees must emphasize that readiness of deployed combat forces should not be placed at risk and that OPTEMPO should be maintained. The conferees strongly recommend reductions in the areas of management and administration, with particular attention to management headquarters, including the Office of the Secretary

of Defense and the Washington Headquarters Service.

*SR-71.*—The fiscal year 1990 Defense Appropriations Act included an increase of $175,000,000 to "Operation and Maintenance, Air Force" in Strategic Forces (Budget Activity 1) specifically for continued operation of the SR-71 strategic reconnaissance aircraft. Additional funds in the amount of $32,000,000 were already included in the fiscal year 1990 budget request to cover the costs associated with the termination of the program.

The conferees now direct that $140,000,000 be rescinded from the FY 1990 appropriation due to the decision of Congress to discontinue the SR-71, and that these reductions be taken only from Strategic Forces (Budget Activity 1).

The conferees agree that at least six SR-71 aircraft, tall numbers 956, 962, 967, 971, 968, and 980 and at least six associated reconnaissance and electronic countermeasure sensor systems shall be stored and maintained by the Air Force in such a fashion as to be able to return to full flight operations in no more than 90 days. In addition, the conferees also agree that within funds already available to the Air Force, $4,000,000 shall be used solely to complete the depot maintenance and rework of the SR-71 trainer (tall number 956), and $2,000,000 shall be used solely to maintain the aircraft in a "flight ready" status as defined in T. M. SR-71-17, including periodic servicing of all aircraft fluid systems, engine maintenance, recuring fuel tank sealant, pneumatic system calibration, computer system verifications, spare parts stockage, and the necessary personnel to accomplish these and other tasks.

The conferees also agree that the Air Force and NASA may proceed with plans for the loan of three SR-71 aircraft as outlined by an exchange of letters dated December 22, 1989 and January 9, 1990 between the Administrator of NASA and the Chief of Staff of the Air Force, respectively. The conferees request that copies of the final Memorandum of Understanding between the Air Force and NASA governing the loan of these aircraft be forwarded to the House and Senate Committees on Appropriations.

Finally, the conferees agree that the above outlined program should not be considered a charter for reestablishment of SR-71 flight operations which were terminated as a part of the fiscal year 1990 budget deliberations. The intent of the conferees is to ensure that sufficient assets are protected to permit NASA to conduct necessary aeronautics flight research and to permit the Air Force to reestablish within 90 days SR-71 flight operations due to a crisis contingency or the non-availability of critical National Technical Means.

*Synthetic Aperture Radar.*—The conferees agrees that the ASARS-1 (Airborne Synthetic Aperture Radar System) sensor originally developed for the SR-71 can continue to provide a significant capability for intelligence collection, drug interdiction, and arms control monitoring. Unfortunately, pending the completion with the Soviets of various treaties and associated monitoring regimes, the Department of Defense cannot at this time clearly define the alternative platforms, such as U-2 or RC-135, which will use a modified ASARS-1. However, regardless of the eventual host platform or specific mission assignment, any potential platform will require that the ASARS-1 be modified to operate in a subsonic environment as opposed to the SR-71 Mach 3 capability. Consequently, except for the 6 ASARS-1 systems to be retained for the SR-71 as discussed elsewhere in this report, the conferees agree that no less than $4,000,000 is available only for costs associated with the common modifications required to slow the performance characteristics of the ASARS-1 independent of the host platform. The conferees estimate that this work will take up to one year to perform which will provide sufficient time for the Department to identify the new host platform and to program funds for the additional necessary modifications.

*Classified Programs.*—Additional guidance by the conferees is contained in a classified annex to this Statement of the Managers.

*Fuel Inventory.*—The Department of Defense has a fuel inventory of approximately 95 million barrels. Because of the likely reductions in force levels and operating tempo in fiscal year 1991, this inventory should be reduced by approximately six million barrels. Therefore, the Defense Stock Fund can transfer the resulting savings of at least $200 million to the Operation and Maintenance, Air Force appropriation. Accordingly, the conferees have agreed to a rescission of $200 million in O&M, Air Force.

*Civil Air Patrol.*—The conferees agree with Senate report language which directs the Air Force to pay up to $225,000 out of Air Force O&M funds for FBI investigations for Civil Air Patrol personnel.

As a related issue, the conferees agree that the $1,000,000 provided in fiscal year 1990 for the Civil Air Patrol's drug interdiction mission may also be used for training, administrative cost, and travel expenses if such activities are in support of their drug interdiction mission.

*CINC Initiatives Fund.*—In FY 1990, the Congress appropriated $50,000,000 to establish a Commanders-in-Chief (CINCs) Initiatives Fund to address the requirements of the various regional and functional CINCs. The fund, however, has not been used as planned and the Department's FY 1991 budget proposes termination of this effort.

In February, the Department of Defense transmitted a list of 31 CINC projects valued at $22,100,000. The Secretary of Defense subsequently decided to review these projects and has since only approved approximately $2,000,000, four percent of the Fund, for obligation. The conferees' review of several candidate projects also indicates a lack of firm requirements. For example, Forces Command proposed to use $1,645,000 to procure an automated local area computer network. Other initiatives would more appropriately be financed through foreign assistance.

In view of the Department's poor execution of the Fund and its resistance to maintaining a flexible fund for the CINCs, the conferees believe that remaining resources would be better used for the Supplemental Appropriations bill. Accordingly, the conferees recommended a rescission of $45,000,000 from "Operation and Maintenance, Defense Agencies."

*Library of Congress Contract.*—The conferees agree that, of the $2,000,000 originally appropriated to the Defense Intelligence Agency solely to continue a research contract with the Library of Congress, $912,000 shall be transferred to the Library for costs associated with terminating the contract, including a reduction-in-force. The remaining $1,088,000 no longer required for this purpose is available to the Defense Intelligence Agency for application to other programs previously approved in the appropriation and authorization processes.

PROCUREMENT

*NBC Protective Mask.*—The conferees agree to approve $9 million from the NBC Protective Mask program as a source of funds for the reprogramming for military personnel and the CHAMPUS funding shortfall. The conferees strongly support the NBC Protective Mask program, and agree to use the program as a source of funds only because of slippage in the program related to a delay in the availability of the technical data package for this important program. The DOD has advised the conferees that these funds are not executable in fiscal year 1990 and will be restored in the outyears.

Amendment No. 48: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

*SEC. 202. Section 9080 of Public Law 101-165 is amended by inserting the following proviso before the period ": Provided, That except for M1 Garand and M1 carbine rifles, this provision does not restrict the use of funds for the destruction and disposal of other firearms".*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree to delete House language disallowing several deferrals and amend Senate language concerning excess and surplus nonautomatic firearms under .50 caliber.

It is the understanding of the conferees that the Department never intended to dispose of any M14 rifles, serviceable M1 Garand rifles, or 87 percent of the .45 caliber pistols since they may be required for other purposes. The conferees concur with this decision.

Due to the uncertainty of whether any of the unserviceable M1 Garand and M1 carbine rifles can be used to support the Director of Civilian Marksmanship Program and to loan or sell to various military associated organizations for use as ceremonial rifles, the conferees direct that the Department also not dispose of them. The Department is requested to report to the Committees on appropriations on the status of these rifles so that their disposal can be addressed in the fiscal year 1991 Defense Appropriations Bill.

For the small arms that are approved for disposal, the conferees direct that the Department of Defense shall be the responsible party for the destruction program and expect the Department of Defense to begin this destruction program expeditiously, with a goal of destroying them by the end of the fiscal year. It is also the intent of the conferees that all excess weapons shall be destroyed to the point that no remaining scrap can be used, in any fashion, in the production and/or repair of a firearm.

Amendment No. 49: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which increases from $10,000,000 to $18,000,000 the amount of funds which may be obligated for the retrograde of chemical weapons from Europe before certain certifications are made.

Amendment No. 50: Changes section number as proposed by the Senate.

Amendment No. 51: Reported in technical disagreement. The managers on trhe part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

*(a) The appropriation "Research, Development, Test and Evaluation, Air Force" contained in the Department of Defense Appropriations Act, 1990 (Public Law 101-165) is amended in the second proviso by striking out "1989" and inserting in lieu thereof "1990" and by striking the phrase "from the B-1B program that remain available for obligation".*

*(b) Section 8084 of the Department of Defense Appropriations Act, 1989 (Public Law 100-463) is amended by striking out "$109,895,000" and inserting in lieu thereof "$79,895,000".*

*(c) Section 8115 of the Department of Defense Appropriations Act, 1988 (Public Law 100-202) is amended by striking out "$90,895,000" and inserting in lieu thereof "$67,895,000".*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

B-1B AS A CRUISE MISSILE CARRIER

The conferees agree to retain the requirement enacted by the Congress in the Department of Defense Appropriations Act, 1990 that the Air Force continue testing of advanced cruise missile capability for the B-1B bomber. The conferees believe such testing should be done in the near future while both the B-1B and advanced cruise missile test programs are still ongoing. Recognizing the Defense Department's desire to have a signed START treaty prior to conducting such testing, the conferees agree to require that fiscal year 1990 RDT&E funds be used instead of fiscal year 1989 funds, which for the latter will expire in just a few months. This approach extends the time available to the Defense Department to conduct an orderly program while also minimizing any complications in the finalization of the START treaty negotiations. Since the fiscal year 1989 funds will no longer be used for the purpose intended by Congress, they have been rescinded. The conferees expect the Air Force to obligate and expend the funds for the earmarked expeditiously after the signing of a START treaty.

HIGH DEFINITION DISPLAY TECHNOLOGY

The conferees are disappointed that the Administration has not responded to the Appropriations Conference report requirement for submission of a government wide plan to develop high definition display technology. The conferees agree with the Senate report which reiterates the need for such a policy and program. The conferees further agree that there are no longer any restrictions on DARPA from obligating the additional $20,000,000 which Congress appropriated in fiscal year 1990 for research of this technology.

BALANCED TECHNOLOGY INITIATIVE

The conferees agree that of the funds appropriated in fiscal year 1990 for the Balanced Technology Initiative, $2,300,000 is available only to complete user evaluation testing of the Ground Launched Hellfire weapon system.

CAPABILITY IMPROVEMENT PROGRAM

The conferees agree to rescind $25,000,000 in unobligated fiscal year 1989 funds appropriated for the operational test and evaluation capability improvement program. The conferees agree that the remaining funds shall be allocated as follows: Base Resources ($8,347,000); Test Asset Distribution ($2,500,000); SA-12 Expedient ($5,400,000); and Aerial Threats ($3,253,000).

ROCKET ASSISTED KINETIC ENERGY (RAKE) AMMUNITION

The Army is considering the termination of development of enhanced 105mm tank rocket assisted kinetic energy (RAKE) ammunition for which funds were appropriated in 1990. The Army has over 3,200 105mm M-1 tanks and the fiscal year 1991 budget terminates plans to replace them with 120mm M-1A2 tanks. Further, the Army has testified that it intends to procure a new 105mm armored gun system. In light of the Army's decision to retain a large 105mm fleet, abandoning the development of enhanced 105mm tank ammunition does not make sense. Further, continuing with the 105mm RAKE round allows this promising technology to be adapted to the 120mm M-1A1 fleet.

Developing larger caliber tank ammunition at the expense of 105mm rounds is inconsistent with the Army's stated intention of becoming a lighter and more mobile force. Accordingly, the Army is directed to continue development of the 105mm RAKE round at the amount appropriated.

RDT&E REPROGRAMMING SOURCES

Any RDT&E source of funds proposed by the Department of Defense in Military Personnel reprogramming requests submitted to Congress through April 1990 that have not been (1) explicitly approved to finance the Military Personnel or CHAMPUS reprogramming requests as approved by Congress or (2) otherwise rescinded by this Act are hereby disapproved.

Amendment No. 52: Deletes Senate language which included a general provision to increase funding available for the military personnel accounts by $780,000,000 in a deficit neutral across the board reduction of $2,100,000,000 from unobligated balances of all defense accounts, except military personnel, by an equal percentage. The conferees agree to handle this shortfall through the normal reprogramming process.

Amendment No. 53: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 205. (a) Not less than 30 days before a cooperative project agreement is signed or amended on behalf of the United States in conjunction with the NATO Research and Development program, the President shall transmit to the Committees on Appropriations of the Senate and House of Representatives a numbered certification setting forth the text and providing an explanatory statement on the purposes of the proposed agreement or amendment.*

*(b) Any cooperative project agreement or amendment referred to in subsection (a) shall contain a provision stipulating that United States participation under the agreement or amendment is subject to the availability of appropriated funds.*

*SEC. 206. Of the $6,000,000 provided in this Act in "Research, development, test and evaluation, Navy" for the Navy Medical Research and Development Command to support the unrelated marrow donor program, not less than $4,500,000 shall be provided as a grant to the National Marrow Donor Program Foundation.*

*SEC. 207. The last proviso under the head "Research, Development, Test and Evaluation, Navy" contained in the Department of Defense Appropriations Act, 1990 (Public Law 101-165 (103 Stat. 1125)) is amended by deleting the phrase "to the Center" and inserting in lieu thereof "to the Mississippi Resource Development Corporation".*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

BONE MARROW RESEARCH AND DONATION PROGRAM

The Senate has concurred with a House amendment, similar to the House introduced bill (H.R. 4828), to provide $6,000,000 for the Navy Medical Research and Development Command to enhance efforts by the Department of Defense and the National Heart, Lung, and Blood Institute to support the National Marrow Donor Program. The conferees suggest that any Defense Department activities financed with these funds will be coordinated to the extent practicable with the National Heart, Lung and Blood Institute. Of the amount provided, $1,500,000 of these funds is to be used by the Navy to support and improve the tissue typing of active duty military and Defense Department civilian personnel, and their dependents, who volunteer to be included in the National Marrow Donor Program. It is also the intention of the conferees that the Navy make $4,500,000 of this funding available without delay to the National Marrow Donor Program Foundation, Inc. (NMDPF), to allow the NMDPF to tissue type as many volunteers as possible for inclusion in the national registry of marrow donors.

The conferees believe strongly that the funding of this effort should be contingent upon the National Marrow Donor Program's cooperation with other private bone marrow registries. This cooperation should include offering to exchange appropriate preliminary search information with the American Bone Marrow Donor Registry and other private registries, at no cost to the patient or other registry, thereby offering patients access to as many potential donors as possible.

The conferees recognize that the NMDP has the potential to save lives every day by matching terminally ill patients in need of bone marrow transplants with unrelated donors. In the 2½ years since the first match through the registry, more than 340 lives have been saved.

Bone marrow transplantation is the preferred treatment for more than 25 fatal blood disorders, and it is estimated that more than 5,000 to 10,000 Americans are in need of a transplant each year. A primary limitation of this treatment is the ability to find matched donors for patients in need of a transplant. There are more than 115,000 volunteers who already have had their blood typed and are listed in the national registry. The goal is a registry listing 250,000 volunteers nationwide and 1 million volunteers worldwide.

There is also a pressing need to ensure broad ethnic representation in the registry. Research has shown that genetics play a major role in a successful transplant. This research also shows that successful matches most often occur when donors and recipients have the same racial background. The $1,500,000 has been provided to the Navy to initiate a program to type volunteers of the armed forces because the military services provide a wide cross-section of races and ethnic backgrounds. The remaining funds

are included to permit the Navy, in cooperation with the National Heart, Lung and Blood Institute, to provide a grant to the NMDPF to type volunteers of minority groups and others who are on waiting lists to join the registry, but who cannot afford the lab fees for HLA typing.

This is a high priority, life-saving health program and the conferees expect that these funds will not be subject to any undistributed reduction or administrative budgetary limitations within the Department.

The conferees direct the Navy and the National Heart, Lung and Blood Institute, in consultation with the Board of Directors of the National Marrow Donor Program, to submit, no later than July 1, 1990, a detailed report outlining the specific activities to be supported by the total funding provided. This report should include, at a minimum, information about (1) the number of volunteers to be tested with these funds; (2) the projected ethnic and racial distribution of these volunteers; (3) the status of ongoing efforts to enhance cooperation between the National Marrow Donor Program and private donor registries; (4) a plan to broaden ethnic and racial representation in the National Marrow Donor Program; and (5) how the National Marrow Donor Program (NMOP) will allocate funds to entities such as donor centers, family bone marrow donation drives, and community "grass-roots" organizations in need of funding for the typing of potential donors.

ACOUSTICS CENTER

The conferees have included a provision, as included in the House introduced bill (H.R. 4828), which amends the Navy Research and Development paragraph in the Defense Appropriations Act, 1990, to conform the last proviso of that paragraph to previously enacted Defense Appropriations laws. The provision relate to the research effort at the National Center for Physical Acoustics.

Amendment No. 54: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 208. (a) Of funds available during fiscal year 1990 under the heading "Research, Development, Test and Evaluation, Defense Agencies", for the NATO Research and Development program—*

*(1) not less than $12,776,000 shall be transferred immediately upon enactment of this Act to the Defense Advanced Research Projects Agency to finance the advanced neural networks information processing technologies project; and*

*(2) not less than $12,224,000 shall be transferred immediately upon enactment of this Act to the Joint Department of Defense—Department of Energy Munitions Technology Development program.*

*(b) None of the funds referred to in subsection (a) may be transferred from the AV-8(B) radar development, F/A-18 radar upgrade, medium surface-to-air missile, and multifunctional information distribution system projects.*

*SEC. 209. None of the funds available to the Department of Defense may be used to purchase circuit breakers for U.S. Naval vessels unless the circuit breakers are manufactured in the United States from components which are substantially manufactured in the United States. For the purpose of this section, the manufacture of circuit breaker cradles in the United States by a foreign supplier shall not be deemed to constitute substantial U.S.-manufacture of circuit breakers. The Secretary of Defense may waive this provision if he determines that it is not in the national security interests of the United States or will have an adverse effect on a U.S. company.*

*SEC. 210. Notwithstanding any other provision of law, the Secretary of Defense shall participate in an infrastructure improvement demonstration program conducted by the Regional Equipment Center, Newport Township, Pennsylvania: Provided, That within 90 days following enactment of this Act, the Secretary shall provide directly such property within the control of the Department of Defense or any component thereof as mutually agreed to by the Regional Equipment Center and the Secretary and as necessary to carry out the provisions of this section.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Conferees agree to include language, as included in the House introduced bill (H.R. 4828), which provides the Secretary of Defense with authority to enter into an infrastructure improvement demonstration program conducted by the Regional Equipment Center, Newport Township, Pennsylvania. This authority should allow the Department of Defense through the Defense Logistics Agency to enter into an agreement with the Regional Equipment Center, Newport Township, and to provide by loan or transfer to the Center any mutually agreed upon heavy equipment, machinery, and tools necessary for the Department to conduct and evaluate this pilot demonstration program.

In addition, the conferees are concerned that as the facilities of the Defense Department are closed or drawn down, DOD will be left with unneeded vast quantities of this type equipment which could be used by states, local municipalities, and non-profit organizations. Therefore, the conferees request the Department to evaluate this situation and request legislative relief as necessary.

Amendment No. 55: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 211. Funds available to the Department of Defense during the current fiscal year may be transferred to applicable appropriations or otherwise made available for obligation by the Secretary of Defense to fund the additional cost of pay and allowances, operational expenses and other costs associated with military operations in Panama known as Operation Just Cause: Provided, That funds transferred shall be available for the same purpose and the same time period as the appropriations to which transferred: Provided further, That the Secretary shall notify the Congress promptly of all transfers made pursuant to this authority and that such transfer authority shall be in addition to that provided elsewhere in this Act.*

*SEC. 212. The Department of the Army shall explore the possibility of laying away and storing the equipment and hardware located at the Mississippi Army Ammunition Plant and make the buildings available for such other private use as may be possible.*

*SEC. 213. Of the funds available to the Department of Defense, $5,000,000 shall be made available only for the establishment of a National Defense Center for Environmental Excellence.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes section 211 as proposed by the Senate and sections 212 and 213 which were included in the House introduced bill (H.R. 4828).

*Mississippi Army Ammunition Plant.*—The conferees agree that there may be ways for the local area to use some of the facilities at the Mississippi Army Ammuniton Plant for non-defense purposes. The Defense Department is directed to investigate and report on this matter in six months.

*National Defense Center for Environmental Excellence.*—By the end of fiscal year 1989, there were 14,401 sites on 1,579 active installations and 7,200 sites on properties formerly owned or used by the Department identified with the potential for hazardous waste contamination. The number of sites requiring cleanup will continue to grow as the Department closes or realigns bases and as the Department proceeds with the chemical demilitarization program.

The conferees believe that it is time for the Department to establish a National Defense Center for Environmental Excellence (NDCEE). This Center should undertake the planning process to systematically structure a five-year program to address DOD's environmental technology requirements. The expertise of the Center for Hazardous Materials Research (CHMR), the National Environmental Technology Applications Corporation (NETAC), and other universities and organizations as required should be utilized by the Center.

Therefore, the conferees direct the Department to make available $5,000,000 to the University of Pittsburgh Trust—an existing non-profit corporation—to establish a separate not-for-profit subsidiary to develop this Center to be located in Johnstown, Pennsylvania. A representative list of initiatives to be considered by the Center follows; other initiatives as agreed to by the Department and the Center should also be addressed.

(1) Definition and staffing of a management, technical, and financial organization for the operation and administration of the NDCEE program.

(2) Systematic assessment with DOD-designated organizations to determine and prioritize the nature, seriousness and potential solutions in the following environmental technology needs areas:

Hazardous waste remediation
Management of RCRA-type wastes
Waste minimization
Municipal-type-solid waste and incineration issues
Air pollution control
Medical waste disposal
Mixed waste disposal
Contaminated site remediation
Chemical weapons destruction
Recycling
Water pollution control and water usage
Underground storage tanks
Nuclear waste disposal

(3) Identification and involvement of leading qualified academic, public and private sector environmental technology resources to develop a broadly based NDCEE consortium, capable of responding to the total breadth of DOD's environmental concerns.

Products from the first year's operation of the NDCEE program will include:

(1) A fully functioning not-for-profit NDCEE Program Office, with approved managerial, technical, administrative and financial systems in place;

(2) A detailed technical, management and budgetary plan for the full five year NDCEE program; and

(3) The solicitation of candidate organizations for the individual technology based NDCEE's required by DOD for the fully operating program.

Amendment No. 56: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 214. Of the funds made available for Research, Development, Test and Evaluation, Defense Agencies, 1990/1991, $4,000,000 shall be available only to conduct an operational test and evaluation (OT&E) of Individually Carried Record (ICR) technologies to be completed not later than August 31, 1991.*

*SEC. 215. Of the funds appropriated in fiscal year 1990 for the Defense Advanced Research Projects Agency's nuclear monitoring program, $6,500,000 is available only for the U.S.-Eurasian Seismic Studies Program administered by the Incorporated Research Institutions for Seismology.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

*Individually Carried Records (ICR).*—The conferees direct the Department of Defense to use $4,000,000 to conduct an operational test and evaluation (OT&E) of Individually Carried Record (ICR) technologies. Because of its past experience with this technology, the conferees expect that the U.S. Army Soldier's Support Center be consulted on the ICR Operational testing. However, the conferees agree to allow the Department of Defense to continue with the issuance of the Request for Proposal (RFP) for the Real Time Automated Personnel Identification System (RAPIDS). The RAPIDS is designed to provide machine readable Uniformed Services identification cards to 12 million active duty members, reservists, retirees and dependents. Following the completion of the ICR OT&E, the Department shall provide the result to the Committees on Appropriations of the House and Senate and provide an acquisition plan to replace the RAPIDS technology with the selected ICR technology for active duty military personnel, if appropriate. Furthermore, the Department is directed to incorporate into the RAPIDS RFP an optional upgrade using the ICR technology.

*DARPA.*—The conferees are concerned about an apparent misunderstanding of Congressional intent in adding funds to the fiscal year 1990 budget for DARPA's Nuclear Monitoring Program. While some of the additional funds were intended for general program support, the House authorization report (H. Rpt. 101-121, pg. 134) noted that not less than $8,000,000 be used for continuing and expanding the "existing seismological studies and data exchange program with the Soviets. . . ." The Senate authorization report (S. Rpt. 101-81, pp. 128-29) also clearly specified "$6,500,000 for the U.S.-Eurasian Seismic Studies Program."

The conferees understand that DARPA currently does not intend to allocate even the lesser amount to this program, and therefore direct that not less than $6,500,000 appropriated in fiscal year 1990 for Nuclear Monitoring be obligated for the U.S.-Eurasian Seismic Studies Program administered by the Incorporated Research Institutions for Seismology. DARPA may apply the value of equipment already purchased for this program against the $6,500,000 discussed above.

Amendment No. 57: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment, as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 216. Notwithstanding any other provision of law, the Secretary of the Air Force is authorized and directed to negotiate, compromise, and reach a determination with Shipco General, Inc. regarding contract dispute No. F29650-82-C-0201 prior to the end of fiscal year 1990. The Secretary is authorized to pay the agreed upon settlement amount from available funds.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to a general provision to resolve the Shipco claims issue. The Air Force is authorized and directed to negotiate a mutually satisfactory settlement with Shipco General, Inc. prior to the end of fiscal year 1990. This issue resulted from a dispute regarding the renovation of housing at Kirtland Air Force Base, New Mexico.

## CHAPTER III

## FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS

### MULTILATERAL ECONOMIC ASSISTANCE

#### FUNDS APPROPRIATED TO THE PRESIDENT

#### INTERNATIONAL ORGANIZATIONS AND PROGRAMS

Amendment No. 58: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*INTERNATIONAL ORGANIZATIONS AND PROGRAMS*

*Of the funds made available in Public Law 101-167, for "International Organizations and Programs", an additional $5,000,000 may be made available for payment to the United Nations Environment Program, to carry out the provisions of section 2 of the United Nations Environment Program Participation Act of 1973.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the Senate amendment which provides up to $5,000,000 from fiscal year 1990 funds provided for International Organizations and Programs to be used for an additional payment to the United Nations Environment Program's Environment Fund. This provision was also included in the House introduced bill (H.R. 4828). The conferees have included technical changes to the Senate amendment correcting the title of the Environment Program. The Department of State is to give UNEP's Environment Fund the highest priority when reallocating fiscal year 1990 funds in the International Organizations and Programs account which are withheld pursuant to Section 526 of P.L. 101-167.

The conferees are concerned about progress in controlling substances that deplete the ozone layer. The conclusion of the Montreal Protocol on Substances that Deplete the Ozone Layer was an important step in controlling the problem of chlorofluorocarbons damage to the upper ozone layer. Parties to the Protocol have agreed in principle to establish a special fund to assist Third World nations to comply with the Protocol. The need for a United States contribution to this special fund will be addressed in the Foreign Operations, Export Financing, and Related Programs Appropriations Act for fiscal year 1991.

### BILATERAL ECONOMIC ASSISTANCE

#### FUNDS APPROPRIATED TO THE PRESIDENT

#### DEPARTMENT OF STATE

#### MIGRATION AND REFUGEE ASSISTANCE

Amendment No. 59: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which requires that an equitable share of the refugee assistance funds provided in fiscal year 1990 be made available to fund the existing 2,000 semi-funded refugee admissions of Pentecostals, Evangelicals and Baptists from within Soviet refugee admission numbers. The conferees agreed that semi-funded refugee admissions also include admissions that are currently unfunded. This provision was also included in the House introduced bill (H.R. 4828).

#### BURMESE STUDENTS

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which states that funds provided in the fiscal year 1990 Foreign Assistant Appropriations Act for Burmese students may be used to provide assistance to any Burmese person in Burma or Thailand who is displaced as a result of events relating to civil conflict. This provision was also included in the House introduced bill (H.R. 4828).

The conferees strongly support assistance to refugee groups in need through regular multilateral international refugee efforts. Consequently, while they agreed to the provision in the annual act in response to an emergency situation related to students in the border areas and while they have agreed to provide the additional flexibility proposed by the Senate amendment, they are not prepared to agree quickly to long term or substantially increased bilateral funding of any Burmese person displaced in either Burma or Thailand. The conferees believe that an internationally organized multilateral program to assist such persons, restricted to discrete geographic areas, is the most appropriate approach to dealing with this problem.

#### AGENCY FOR INTERNATIONAL DEVELOPMENT

#### HAITI

Amendment No. 61: Inserts a new heading, as proposed by the Senate.

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: , *development assistance funds contained in prior foreign assistance appropriations acts that were not made available for Haiti, or pursuant to section 515 of such public law*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment permits deobligation/reobligation authority contained in Section 515 of the fiscal year 1990 Foreign Assist-

ance Appropriations Act and other previously made available development assistance funds to be used to fund the $10,000,000 earmarked for Haiti. The conferees believe that due to the relinquishment of power by General Prosper Avril the potential for democratic elections in Haiti may be greater today than any time in recent history.

The $10,000,000 in development assistance is to be in addition to other development assistance previously allocated for Haiti. The conferees agreed that none of the funds provided for Haiti are to be transferred from sub-Saharan Africa.

CHILE

Amendment No. 63: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $10,000,000 in health related development assistance for Chile. This funding was also included in the House introduced bill (H.R. 4828).

Universal health care once existed in Chile. However, in the last sixteen years public spending on health has declined by 55 percent. Today 20 percent of the population, mostly rural poor, have no access to health care. These funds have been provided to help the newly elected government in Chile to launch a primary health care program targeted for the poor. The infusion of these funds will also help the process of consolidating democracy in Chile.

The conferees acknowledge that Chile does not meet normal guidelines for development assistance funds based on per capita income levels. However, Chile does have a large indigent population and these funds are urgently needed to jump-start Chile's primary health care system.

DEVELOPMENT ASSISTANCE FOR ANTI-NARCOTICS EFFORTS OF BOLIVA AND PERU

Amendment No. 64: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*DEVELOPMENT ASSISTANCE FOR ANTI-NARCOTICS EFFORTS OF BOLIVIA AND PERU*

*Of the funds appropriated for fiscal year 1990 to carry out chapter 1 of part I of the Foreign Assistance Act of 1961 (relating to development assistance), up to $25,000,000 should be available for Bolivia, and up to $20,000,000 should be available for Peru, for the following purposes—*

*(1) providing alternative income, employment, and social services for individuals involved in illicit coca and marijuana production.*

*(2) supporting investment in infrastructure, farm credit and extension services, and other development projects in non-coca production areas, and*

*(3) otherwise assisting, in accordance with chapter 1 of part I of the Foreign Assistance Act of 1961 (relating to development assistance), such countries in continuing their anti-narcotics efforts.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes language providing up to $25,000,000 in development assistance for Bolivia and up to $20,000,000 in development assistance for Peru to be used for anti-narcotics purposes. The conferees have included language specifying that the assistance to be provided under this provision is to be in the form of development assistance. This language was also included in the House introduced bill (H.R. 4828).

HOUSING AND OTHER CREDIT GUARANTY PROGRAMS

Amendment No. 65: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

*(a) Title II of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990 (Public Law 101-167) is amended in the undesignated paragraph under the heading "HOUSING AND OTHER CREDIT GUARANTY PROGRAMS"—*

*(1) by striking out "$100,000,000," and inserting in lieu thereof "$500,000,000"; and*

*(2) by inserting after "principal" in the last proviso under such heading the following: ", of which amount $400,000,000 in commitments shall be available during fiscal year 1990 or subsequent fiscal years only for the purpose of providing housing and infrastructure in Israel for Soviet refugees: Provided further, That with respect only to the $400,000,000 in commitments to be made for housing and infrastructure in Israel referred to in the preceding proviso—*

*"(1) the guarantees shall be made available for loans made during or after fiscal year 1990, notwithstanding the limitation contained in the third sentence of section 222(a) of the Foreign Assistance Act of 1961;*

*"(2) the guarantees shall be made available for loans in increments of at least $150,000,000 or the amount requested by the borrower, whichever is lesser; and that the Agency for International Development shall review the borrower's actual or planned expenditures to ascertain that such amounts have or will be expended in accordance with the preceding proviso;*

*"(3) section 223(j) of the Foreign Assistance Act of 1961 (22 U.S.C. 2183(j)) shall not apply to such commitments; and*

*"(4) fees charged by the Agency for International Development under section 223(a) of the Foreign Assistance Act of 1961 shall be—*

*"(A) an initial fee of $2,800,000; and*

*"(B) an annual fee in an amount not more than one-half of 1 percent of the maximum face value of guarantees which may be issued for any one country in a fiscal year pursuant to the penultimate sentence of section 223(j) of such Act.".*

*(b) Section 222(a) of the Foreign Assistance Act of 1961(22 U.S.C. 2182) is amended by striking out "$2,158,000,000" and inserting in lieu thereof "$2,558,000,000".*

The managers on the part of the Senate will move to concur in the amendment of the house to the amendment of the Senate.

The conference agreement includes $400,000,000 in housing guarantees for Israel. The housing guarantees will address the needs of the large influx of refugees coming to Israel from the Soviet Union. This provision was also included in the House introduced bill (H.R. 4828).

The conferees emphasize their intent that, consistent with past practice and policy regarding all assistance agreements with Israel, no assistance provided under this Housing Investment Guaranty program may be utilized beyond the pre-June 1967 borders of Israel.

The conferees note that the unprecedented numbers of Soviet Jews immigrating to Israel will result in the need for rapid construction of housing and infrastructure to absorb them. The conferees believe that Israel should make extensive use of American housing technologies and contractors in this program, and are concerned that there are tariff impediments to the importation by Israel of American housing materials. The conferees urge the Administration to seek agreement with Israel for the removal of these impediments to participation by American housing firms.

ECONOMIC SUPPORT FUNDS

PANAMA

Amendment No. 66: Deletes language proposed by the Senate setting conditions for providing funds for Panama.

The conferees remain very concerned that despite efforts by the Government of Panama to combat drug trafficking, the Panamanian banking system is still vulnerable to money laundering. This issue has been strongly addressed by both the House and Senate fiscal year 1990 supplemental authorizing bills. Consequently, while the conferees support tough language on this issue, it was felt that the issue should be handled through the appropriate authorizing legislation.

The conferees believe it is imperative that the United States Government and the Government of Panama: (1) reach agreement for exchanging records on international currency transactions in connection with narcotics investigations and proceedings, and (2) make steady progress towards signing a Mutual Legal Assistance Treaty.

In order to underscore the importance of reforming the Panamanian banking system to protect it against a repetition of past abuses, the conferees strongly urge that no more than 80 percent of the funds for Panama be provided unless the above conditions are met.

NICARAGUA

Amendment No. 67: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds language that states that the $30,000,000 provided in assistance for the Nicaraguan resistance voluntary demobilization, repatriation and resettlement may be made available only to members of the Nicaraguan resistance who agree to and are abiding by the terms of the cease-fire agreement and the addendum to the Toncontin Agreement signed on April 19, 1990. This provision was also included in the House introduced bill (H.R. 4828).

The conferees also have agreed that $2,000,000 of the funds appropriated for Economic Support Fund assistance for Nicaragua may be used to support the Observer Group for Central America (ONUCA).

NICARAGUA NOTIFICATIONS

Amendment No. 68: Deletes language proposed by the Senate specifying notification to the House Foreign Affairs and Senate Foreign Relations Committees concerning Nicaragua. The conferees understand that notifications under section 634A of the Foreign Assistance Act of 1961 are required by law whether or not they are specifically required by this Act. Section 634A(c) states that the Senate Foreign Relations and House Foreign Affairs Committees will be notified "to the same degree and with the same conditions as the President notifies the Committees on Appropriations". Since notifications of the Appropriations Committees are required in this chapter, an added reference to section 634A is unnecessary.

NICARAGUA ENVIRONMENTAL ACTIVITIES

Amendment No. 69: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that up to $8,000,000 in Economic Support Funds provided for Nicaragua be used for environmental activities. This provision was also included in the House introduced bill (H.R. 4828).

FORESTRY PROTECTION

Amendment No. 70: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which prohibits the use of funds provided for Nicaragua or Panama for any project that would result in any significant loss of tropical forests. This provision was also included in the House introduced bill (H.R. 4828).

EVALUATION AND AUDIT

Amendment No. 71: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which requires evaluations and audits of the funds provided for Nicaragua and Panama. This provision was also included in the House introduced bill (H.R. 4828).

The conferees recognizes that CIAV, UNHCR or other United Nations or internationally affiliated organizations will be audited in accordance with standard procedures applicable to UN-affiliated organizations.

The conferees also intend that the special auditing and evaluation requirements established in this provision will be applicable only through fiscal year 1991.

PANAMA AND NICARAGUA PROJECT ASSISTANCE

The conferees agreed that the Administration should carefully review the specific programs and projects to be proposed for Panama and Nicaragua. Private sector development and budget support are needed for both countries, but assistance for child survival, health and education are also critical needs in both countries. The conferees expect to receive notifications on assistance to Panama and Nicaragua that show a concern for the social as well as the private sector development needs in these countries.

LITHUANIA EMERGENCY RELIEF

Amendment No. 72: Deletes language proposed by the Senate providing up to $5,000,000 in emergency assistance to Lithuania.

CARIBBEAN

Amendment No. 73: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

*That of the funds made available under this heading not less than $3,000,000 shall be made available only for Haiti to support the democratic electoral process: Provided further, That of the funds made available under this heading not less than $8,750,000 shall be made available only for Jamaica*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides a total of $15,000,000 in assistance for countries in the Caribbean. Funds in the amount of $3,000,000 have been earmarked for Haiti, $8,750,000 is earmarked for Jamaica. The conferees have agreed that funds not earmarked for Haiti and Jamaica are to be used to fund assistance to other countries in the Caribbean. The countries in the Caribbean Regional Program are to be given the highest priority in the allocation of these nonearmarked funds. The House has provided $15,000,000 for the Caribbean with a ceiling of no more than 50 percent to any one country. The Senate provided the same amount of funding, but earmarked $3,000,000 for Haiti and $10,000,000 for Jamaica.

The conferees expect the $3,000,000 in Economic Support Funds for Haiti to be used for electoral support, and to be in addition to other Agency for International Development funds available for technical assistance and other electoral needs. The conferees understand that this amount is insufficient to meet urgent electoral needs and urge the Administration to make additional Economic Support Funds available for this purpose from existing resources.

The conferees intend that the $3,000,000 provided in this section for Haiti be expended only after the following conditions have been met: (1) the Government of Haiti has named the members of a genuinely independent electoral council to conduct free, fair and open elections; (2) the Government of Haiti has established and promulgated an electoral law that is acceptable to such electoral council; (3) official investigations have been reopened in connection with the disruption of the November 29, 1987 election; and (4) meaningful steps are being taken by Haitian civil and military authorities to provide electoral security.

EASTERN CARRIBBEAN

Amendment No. 74: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken by said amendment, insert the following:

*ASSISTANCE FOR THE EASTERN CARIBBEAN*

*For an additional amount to carry out the purposes of chapter 1 of part I of the Foreign Assistance Act of 1961, $5,000,000, for assistance for countries of the Eastern Caribbean, to remain available through September 30, 1991.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to provide an additional $5,000,000 in development assistance funds for the Eastern Caribbean. This funding was also included in the House introduced bill (H.R. 4828). These funds are to be spent for the rehabilitation and recovery of the six major beneficiary countries in the Caribbean regional program.

SUB-SAHARAN AFRICA

Amendment No. 75: Appropriates $20,000,000 for the "Economic Support Fund" for assistance for sub-Saharan Africa instead of the $10,000,000 proposed by the Senate and the $25,000,000 proposed by the House. This provision was also included in the House introduced bill (H.R. 4828).

Amendment No. 76: Restores language stricken by the Senate earmarking $10,000,000 for Namibia. The Senate had stricken the House earmark for Namibia included in Amendment Number 76, and had included $10,000,000 for Namibia under amendment number 75. This provision was also included in the House introduced bill (H.R. 4828).

NAMIBIA

Amendment No. 77: Deletes language proposed by the Senate requiring a Presidential certification prior to obligating or expending funds for Namibia. Based on public and private assurances from the Government of Namibia that it is not the policy of that government to intervene militarily in Angola or to support military intervention from its territory into Angola, the conferees agreed that the language of the Senate amendment is unnecessary. The conferees assume that the Administration will watch the situation in Namibia and Angola closely and inform Congress if there is any breach of this policy by the Government of Namibia.

MOZAMBIQUE, ZAMBIA, AND SOUTH AFRICA DEMOCRACY

Amendment No. 78: Earmarks $10,000,000, as proposed by the House to provide assistance through the National Endowment for Democracy and other groups to support programs and activities of organizations to encourage negotiations leading to a peaceful transition to a genuine democracy based on universal suffrage within a united South Africa. As proposed in the House bill, the provision contains restrictions concerning the suspension of violence and a prohibition on using funds to support violence.

Funds provided for South Africa shall be used to support programs and activities of organizations to encourage negotiations leading to a peaceful transition to a genuine democracy based on universal suffrage within a united South Africa. These funds are intended exclusively to support the activities of the victims of apartheid. Funds shall be made available to help previously banned organizations develop their infrastructure, including office and communications equipment, vehicles, office space, clerical support and equipment needed for the publication and distribution of pamphlets. In administering the support for democratic political parties and organizations in South Africa, AID shall seek to subcontract with broad-based, non-partisan organizations such as the National Endowment for Democracy and the South African Council of Churches.

The conferees agreed to delete earmarks totalling $5,000,000 under the Economic Support Fund proposed by the House for Mozambique and Zambia. Instead, the Administration is encouraged to use $5,000,000 of the development assistance funds provided in the Act for sub-Saharan Africa to fund programs for Zambia and Mozambique.

This provision was also included in the House introduced bill (H.R. 4828).

HUMANITARIAN ASSISTANCE FOR ARMENIA AND ROMANIA

Amendment No. 79: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*HUMANITARIAN ASSISTANCE FOR ARMENIA AND ROMANIA*

*(a) For an additional amount for "International Disaster Assistance", $5,000,000, to remain available until September 30, 1991, which sum shall be made available, notwithstanding any other provision of law, for humanitarian assistance, transportation of materials provided for such assistance, medical treatment, and education and vocational training to the victims of the Armenian earthquake of December 7, 1988, which assistance shall be channeled through United States private and voluntary organizations and other United States nongovernmental*

*organizations: Provided, That such funds are in addition to funds previously made available for such purposes: Provided further, That of the funds made available by this subsection for assistance for Armenia, up to 1 percent may be used by the Agency for International Development for costs of administering such program.*

*(b) Not less than $4,000,000 of the total amount of funds available to carry out chapter 1 of part I of the Foreign Assistance Act of 1961 (relating to development assistance), which funds were—*

*(1) appropriated by the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990 (Public Law 101-167);*

*(2) made available through the exercise of the authority contained in section 515 of that Act; or*

*(3) appropriated for development assistance in prior foreign assistance appropriations acts,*

*shall be made available, notwithstanding any other provision of law, through international relief agencies and nongovernmental organizations for health assistance for children in Romania.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes $5,000,000 in disaster assistance for Armenia to assist with recovery related to the devastating earthquake. The conferees agree that assistance may be used for longer-term recovery and reconstruction activities which aid the victims of the Armenia earthquake of December 7, 1988, and may include the provision of medical assistance, education and vocational training, as well as other assistance to help the recovery of this stricken area.

The conferees have agreed to provide not less than $4,000,000 for the health care needs of children in Romania from within fiscal year 1990 or prior year development assistance funds. These funds are urgently needed to address the acute shortage of basic medical supplies and substandard conditions under which many children, particularly orphans, are forced to live. To the extent feasible these funds should also be used to move children out of institutional care either through family reunification or adoption. The conferees also agree that none of the funds for Romania are to be derived from sub-Saharan Africa.

The conferees agree that $2,000,000 of the funds provided for children in Romania should be designated to support the UNICEF program in Romania. The remaining $2,000,000 should be designated for the International Committee for the Red Cross or other relief organizations operating in Romania.

The conferees agreed that a high-priority use for funds provided for Romania should also be to assist the development of professional child welfare and adoption entities. Both of these activities are currently in short supply in Romania. There is an urgent need for assistance to the appropriate Romanian authorities in order to develop professional mechanisms for both in-country and inter-country adoption. Therefore, the conferees strongly recommend that a priority for the utilization of these funds is to train child welfare and adoption specialists so that the emergency needs of orphaned Romanian children can be met and appropriate resources developed.

SUB-SAHARAN AFRICA, DEVELOPMENT ASSISTANCE

Amendment No. 80: Appropriates $10,000,000 for sub-Saharan Africa development assistance instead of $20,000,000 as proposed by the Senate and $5,000,000 as proposed by the House. This provision was also included in the House introduced bill (H.R. 4828).

The conferees intend that this assistance will be used in the countries whose basic needs are the most critical. The conferees believe that priority should be given to Mozambique, Zambia and Uganda. Mozambique urgently needs humanitarian relief to overcome the devastation caused by years of civil war and drought. Zambia is in dire need of both health and education development assistance programs. In Uganda an estimated one million people are infected with the AIDS virus. Emergency assistance is urgently needed to combat this terrible epidemic and provide for the welfare of thousands of children orphaned by AIDS.

WAIVERS AND AUTHORITIES

Amendment No. 81: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*WAIVERS AND AUTHORITIES*

*(a) Funds appropriated by this chapter for the "Economic Support Fund" for Panama shall be available as follows: (1) up to $1,200,000 may be provided to carry out the purposes of section 534(b)(3) of the Foreign Assistance Act of 1961 for countries in Latin America and the Caribbean other than Panama; (2) assistance may be provided for technical assistance, training, and commodities with the objective of creating a professional civilian police force notwithstanding section 660 of the Foreign Assistance Act of 1961, except that such assistance shall not include more than $5,000,000 for the procurement of equipment for law enforcement purposes in Panama, and shall not include lethal equipment; and (3) the limitations contained in the second sentence of section 534(e) of the Foreign Assistance Act of 1961 and the second sentence of section 599G(c) of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990, shall not be applicable to assistance provided under this subsection.*

*(b) Funds appropriated under this chapter for Panama and Nicaragua, as well as during fiscal year 1990 funds otherwise available for economic assistance under other provisions of law and assistance under chapter 8 of part II of the Foreign Assistance Act of 1961, may be made available for Panama and Nicaragua notwithstanding section 518 of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990, section 620(g) of the Foreign Assistance Act of 1961, or any similar provision of law relating to foreign assistance repayments.*

*(c) Funds appropriated under this Act may be made available notwithstanding section 10 of P.L. 91-672 and section 15 of the State Department Basic Authorities Act of 1956.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides the necessary waivers in order to obligate and expend funds provided in this Supplemental for foreign assistance programs.

The conference agreement also deletes language proposed by the Senate specifying notification to the House Foreign Affairs and Senate Foreign Relations Committees concerning notifications of obligations. The conferees understand that notifications under section 634A of the Foreign Assistance Act of 1961 are required by law whether or not they are specifically required by this Act. Section 634A(c) states that the Senate Foreign Relations and House Foreign Affairs Committees will be notified "to the same degree and with the same conditions as the President notifies the Committees on Appropriations". Since notifications of the Appropriations Committees are required in this Supplemental, an added reference to section 634A is unnecessary.

EXPORT-IMPORT BANK

Amendment No. 82: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which requires that the funds provided for an Interest Equalization Program in the fiscal year 1990 Act be available subject only to the availability of qualified lenders under the program. This provision was also included in the House introduced bill (H.R. 4828).

The conferees expect the Bank to exercise prudent judgement in selecting suitable transactions for support under this program in accordance with its regular program criteria and policies.

## CHAPTER IV

## DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES

BUREAU OF LAND MANAGEMENT

Amendment No. 83: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *: Provided, That these funds also shall be available for repayment of advances to other appropriation accounts from which funds were previously transferred for such purposes and shall be obligated fully prior to use of any other funds for wildlife suppression and emergency rehabilitation and shall remain available until December 31, 1990*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. This language allows the money appropriated to be available to repay advances to other appropriation accounts and to remain available until December 31, 1990.

This provision was included in the House introduced bill (H.R. 4828) and modifies a Senate amendment to the original Dire Emergency Supplemental.

U.S. FISH AND WILDLIFE SERVICE

Amendment No. 84: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted in said amendment, insert the following:

*UNITED STATES FISH AND WILDLIFE SERVICE*

*RESOURCE MANAGEMENT*

*For an additional amount for "Resource Management", $827,000: Provided, That the Secretary, acting through the United States Fish and Wildlife Service, is authorized to enter into renewable contracts for the payment of reasonable and customary costs for delivery of Newlands Project water rights acquired by the Service to benefit the Federal and State wildlife areas in the Lahontan*

*Valley and the Fernley Sink in Nevada: Provided further, That the costs for delivery shall be those costs normally associated with the delivery of water to Newlands Project lands: Provided further, That the contracts shall be of a term not exceeding 40 years: Provided further, That any such contract shall provide that upon the failure of the service to pay such charges, the United States shall be liable for their payment and other costs provided for in applicable provisions of the contract subject to availability of appropriations: Provided further, That the Secretary, acting through the United States Fish and Wildlife Service, in accordance with applicable State law, may use water diversion, storage, and conveyance systems of Federal Reclamation Projects to benefit Federal and State wildlife areas in the Lahontan Valley and the Fernley Sink in Nevada.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment provides $827,000 for the Appropriate Technology for Rural Areas program instead of $1,000,000 as proposed by the Senate. The reduction eliminates that portion of the amount proposed by the Senate which would have provided funding beyond fiscal year 1990. The amount made available will repay funds borrowed to continue the activity to date as well as continue operations through September 30, 1990.

Several small technical changes were made to the Senate language that permits the U.S. Fish and Wildlife Service to enter into contracts with the Truckee Carson Irrigation District for payment of operation and maintenance fees for the delivery of Fish and Wildlife Service water to the Stillwater wetlands in Nevada.

Amendment No. 85: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*NATIONAL PARK SERVICE*

*HISTORIC PRESERVATION FUND*

*Funds appropriated under this head in Public Law 101-121 shall remain available for obligation until September 30, 1991.*

*CONSTRUCTION*

*Of the funds made available under this head in the Department of the Interior and Related Agencies Appropriations Act, 1990 (Public Law 101-121), not less than $5,852,000 shall be made available immediately for design and construction activities associated with the Franklin Delano Roosevelt Memorial.*

*GEOLOGICAL SURVEY*

*SURVEYS, INVESTIGATIONS, AND RESEARCH*

*For an additional amount for "Surveys, Investigations, and Research", $6,246,000, to remain available until expended.*

*BUREAU OF INDIAN AFFAIRS*

*OPERATION OF INDIAN PROGRAMS*

*The paragraph under this head in Public Law 101-121 is amended by inserting in front of $54,000,000 the words "up to": Provided, That none of the funds available to the Bureau of Indian Affairs in this or any other Act shall be used to transfer, through agreement, memorandum of understanding, demonstration project or other method, the Safety of Dams program of the Bureau of Indian Affairs to the Bureau of Reclamation.*

*DEPARTMENTAL OFFICES*

*OIL SPILL EMERGENCY FUND*

*For an additional amount for the Department of the Interior for contingency planning, response and natural resource damage assessment related to the discharge of oil from the tanker Exxon Valdez into Prince William Sound, Alaska, and for other purposes authorized under this head in P.L. 101-45, $7,279,000: Provided, That all authorities associated with, and funds in, the Oil Spill Emergency Fund shall remain available until september 30, 1994: Provided further, That none of the funds made available by this or any other Act with respect to any fiscal year may be used by the Department of the Interior to make any reimbursements to any other Federal department for litigation costs associated with the Prince William Sound oil spill.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree that $5,852,000 is available for design and construction of the Franklin D. Roosevelt Memorial as provided in Public Law 101-121. This provision was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

The managers have also agreed to extend the availability of the Historic Preservation Fund to September 30, 1991 to correct a technical error in Public Law 101-121.

The managers recommend an additional appropriation of $6,246,000 for emergency expenditures associated with the ongoing eruptions of Mount Redoubt Volcano near Anchorage, Alaska. Since the recent series of eruptions of this volcano occurred in December after passage of P.L. 101-130, this disaster does not qualify for allocations from the emergency fund established in section 108(d) of that law. The recommendation would make available additional monies necessary to permit the Geological Survey to monitor the Mount Redoubt Volcano for public safety purposes.

The managers have added language under the Bureau of Indian Affairs, Operation of Indian Programs account, to allow the Bureau to use whatever portion of the $54,000,000 provided in the fiscal year 1990 Act which is not needed for the costs of converting tribal contracts, for reprogramming to cover shortfalls in various Bureau programs in this fiscal year. The Bureau currently estimates that approximately $39,000,000 will be needed for the contract conversion costs. At the same time, the Bureau is estimating that there could be shortfalls in such programs as general assistance, contract support funds, teacher pay costs and student transportation costs, possibly totaling as much as $25,000,000. The change in the 1990 appropriations language will allow the Bureau to identify its highest priority needs for such programming, once the amount not needed for contract conversion is known, and to submit such reprogrammings to the Committees for approval as quickly as possible. This provision was included in the House introduced bill (H.R. 4828).

Language has also been included to prohibit the transfer of the Safety of Dams program from the Bureau of Indian Affairs to the Bureau of Reclamation in fiscal year 1990. This proposed transfer has been included in the Administration's budget request for fiscal year 1991, and the managers believe no preliminary actions related to this proposed transfer should be taken prior to the Committees' actions on the 1991 bill. This provision was included in the House introduced bill (H.R. 4828).

The managers are aware that there is a shortage of funds to carry out administrative functions related to the Hoopa-Yurok Indian Settlement Act. The managers direct that up to $500,000 shall be reprogrammed from the Hoopa-Yurok settlement funds provided in fiscal year 1990 to cover these administrative costs of the Bureau, with the proviso that these funds are to be restored to the settlement fund at the earliest possible opportunity.

The managers agree that $300,000 of funds appropriated for operation of juvenile detention centers in fiscal year 1990 may be used for an independent assessment of the status of fishery resources in the State of Wisconsin, to be conducted jointly by the Federal Government, State and six Chippewa tribal governments. These funds should be made available only when the State of Wisconsin has identified and committed the funds it will provide for this purpose.

In fiscal year 1990, a total of $200,000 was provided for the St. Regis Mohawk tribe, for development of law and order and tribal court systems on this reservation. The managers agree that $100,000 of these funds may be used for the conduct of peace forums and charter development for the tribe.

The managers also direct the Bureau to report to the Committees, by June 8, 1990, regarding the expenditure of these funds and to identify the additional requirements necessary to develop the law and order and tribal court systems on the reservation.

The managers agree that $705,000 shall be reprogrammed from available funds from various irrigation projects to replace the Zia Pueblo diversion dam and siphon. Other available funds will be considered for later reprogramming for the on-farm irrigation facilities for the Dolores Project in Colorado, once the concerns regarding the possible impact on an endangered species have been addressed.

The managers wish to reiterate language contained in the Statement of the Managers accompanying the fiscal year 1990 conference report for the Department of the Interior and Related Agencies Appropriations Act. Funds were not earmarked above the budget request for the Hannahville, Michigan Indian School. The Bureau is to proceed with planning, using existing funds, for phase II of the project to include the gymnasium and cafeteria while phase I construction is underway, and should funds become available to begin construction of phase II during fiscal year 1990, approval to reprogram funds for this purpose should be requested.

The managers recommend a supplemental appropriation of $7,279,000 for the Oil Spill Emergency Fund. Current balances in the Fund are only $267,000, with only approximately $4 million in anticipated recoveries from the Coast Guard's 311K account. The Department has identified $11,355,000 in remaining FY 1990 response, damage assessment, project support, and legal requirements associated with the Exxon Valdez oil spill in Prince William Sound, Alaska, on March 24, 1989. The recommendation will permit necessary oil spill work to continue on schedule.

Because additional monies for these recovery purposes are not expected to be provided by Exxon in the near future, bill language has been included to extend the Oil Spill Emergency Fund balances and authorities through September 30, 1994.

The conference agreement also includes bill language which prohibits the Department of the Interior from using any appropriated funds to make reimbursements to other Federal agencies for litigation costs associated with the Exxon Valdez oil spill. Funds made available for the Fish and Wildlife Service, the National Park Service and other Interior Department agencies should not be used to subsidize costs that are the responsibility of the department charged with the government's prosecution of this case.

The managers agree to reprogram in the National Park Service construction account $4,000,000 from savings and slippages associated with line-item construction projects to cover a planning shortfall. Within these funds, $150,000 is to conduct a suitability/feasibility study for an Abraham Lincoln research and interpretive center at or near Lincoln Home National Historic Site in Springfield, Illinois. The study should address the following items:

(1) location and accessibility to Lincoln Home National Historic Site; (2) interpretive programs addressing Lincoln's life and presidency through museum exhibits, audiovisual programs, and other media; (3) modern curatorial storage for Lincoln artifacts and memorabilia; (4) location and availability of documentary and artifactual material for research and display including the joint management and supervision of materials with other government agencies and private entities; (5) architectural concepts to ensure compatibility with the center's setting; (6) management and operation alternatives which could include State and private agencies; (7) estimates and funding alternatives for construction, maintenance, and operation of the centers. The report should be delivered to Congress no later than April 1, 1991.

The managers agree to the Senate provision which allows the reprogramming of $500,000 previously appropriated for the purchase of BLM of Blackwell Island for the purchase of three other parcels of land in the Coeur d'Alene BLM District.

The managers are dismayed that the National Park Service has refused to implement the following directive approved by the Congress: "[f]unds sufficient to complete the Farmington River study at a level beyond the current authorization are provided" (House Report No. 101-120). Therefore, the managers direct the National Park Service to provide immediately $85,000 for the Farmington River study now underway, and further direct that those funds shall be provided from monies previously appropriated for the General Administration activity, National Park Service. To the greatest extent practicable, funds budgeted for travel and administrative overhead should be used to provide this amount. In addition to these funds, the managers expect that the amount provided in the fiscal year 1991 budget request will be used to complete the study. No later than ten days after enactment of this act, the Director of the National Park Service shall report to the House and Senate Committees on Appropriations to certify that this directive has been implemented.

FOREST SERVICE

Amendment No. 86: Appropriates $256,700,000 for "Forest Service Firefighting" as proposed by the Senate instead of $256,000,000 as proposed by the House. This amount was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

Amendment No. 87: Reported in technical disagreement. The managers on the part of the house will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*NATIONAL FOREST SYSTEM*

*For additional expenses associated with assessment or recovery on National Forest System lands from Hurricane Hugo and the Exxon Valdez oil spill of March 24, 1989, or for assessment and recovery on associated lands affected by the Exxon Valdez oil spill, $8,633,000, to remain available until September 30, 1991: Provided, That none of the funds made available by this or any other Act with respect to any fiscal year may be used by the Forest Service to make any reimbursements to any other Federal department for litigation costs associated with the Prince William Sound oil spill.*

*CONSTRUCTION*

*Notwithstanding any other provision of law, funds originally appropriated under this head in P.L. 101-121, the Department of the Interior and Related Agencies Appropriations Act, 1990, in the amount of $371,000 for the Forest Service for the construction of an addition to the Starkville, Mississippi research office shall be available for a grant to Mississippi State University as the Federal share in the construction of a new University facility: Provided, That comparable space shall be provided to the Forest Service without charge for a reasonable period.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have also included $8,633,000 to allow the Forest Service to undertake the study and recovery efforts associated with the effects of the Exxon Valdez oil spill in Prince William Sound last year. These funds are to be used for coastal habitat assessments, archeological surveys, and economic evaluations. The managers have also included bill language prohibiting the Forest Service from using any of its funds to reimburse the Department of Justice costs associated with recouping payment for damages from the Exxon Corporation.

The managers have also included bill language which would authorize the use of funds appropriated in the FY 1990 Interior appropriations bill for a grant to Mississippi State University (MSU) as the Federal contribution towards the costs associated with construction of a new forestry building at the university. This provision was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental. The funds were appropriated for the Forest Service to expand its existing facility, by adding a new wing to the present structure. The conferees have no objection to the Forest Service providing these funds to MSU in exchange for space to be provided to the Forest Service, rent-free, for a period of twenty years. In approving this arrangement, the conferees make no commitment as to future funding for other joint-space arrangements contemplated by the Forest Service and MSU.

Amendment No. 88: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

*SETTLEMENT OF CLAIMS, FOREST SERVICE*

*The Forest Service is hereby authorized and directed to negotiate, compromise, and reach a determination on certain claims against the United States resulting from the Mink Fire (Bridger-Teton National Forest and Yellowstone National Park), Clover-Mist Fire (Yellowstone National Park and Shoshone National Forest), Storm Creek Fire (Yellowstone National Park and Gallatin-Custer National Forests), and Canyon Creek Fire (Lolo, Helena, Lewis and Clark National Forests) which were originally classified as prescribed fires but subsequently became wildfires. The Forest Service is directed to negotiate, compromise, and reach a determination on the original claims, or the claims filed by an insurer subrogated to the rights of a claimant, and to negotiate any other claims filed within ninety days of the date of enactment of this Act. Notwithstanding any other provision of the law, the Secretary of the Treasury is authorized and directed to pay the amount of each determination from the Claims, Judgments, and Relief Act Fund (Public Law 95-26): Provided, That the Secretary of the Treasury shall make no payments for claims which are determined by the Forest Service or the Department of Justice to be invalid under current law: Provided further, That nothing in this section shall prohibit any claimant from filing an appeal of any determination made by the Forest Service, Department of Agriculture, or Department of Justice pursuant to current law.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have agreed to language which will address the claims of those individuals who suffered damages as a result of the fires which occurred in the greater Yellowstone area in 1988. The language does not amend the Federal Tort Claims Act. The Forest Service is directed to negotiate, compromise and reach a determination on any claims already filed, or those that will be filed within ninety days after enactment of this Act, associated with these fires. Language is also included which continues current policy that allows a claimant to file an appeal after a decision has been reached.

CLEAN COAL TECHNOLOGY

Amendment No. 89. Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment insert:

*DEPARTMENT OF ENERGY*

*CLEAN COAL TECHNOLOGY*

*Funds previously appropriated under this head for clean coal technology solicitations to be issued no later than June 1, 1990, and no later than September 1, 1991: Provided, That the aforementioned solicitations shall not be conducted prior to the ability to obligate these funds: Provided further, That pursuant to section 202 (b) of the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987, this action is a necessary (but secondary) result of a significant policy change: Provided further, That for the clean coal solicitations identified herein, provisions included for the repayment of government contributions to individual projects shall be identical to those included in the Program Opportunity Notice (PON) for Clean Coal Technology III (CCT-III) Demonstration Projects (solicitation*

*number DE-PS01-89 FE 61825), issued by the Department of Energy on May 1, 1989.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment delays the fourth and fifth clean coal technology solicitations as proposed by the Senate and specifies that, when issued, these solicitations must use repayment provisions used successfully in the third solicitation. This provision was included in the House introduced bill (H.R. 4828) and modifies a Senate amendment to the original Dire Emergency Supplemental.

The managers agree that changes to the clean air bill, proposed by a House authorizing committee, that would modify the clean coal technology program must be resolved before a reasonable solicitation can be issued. The proposed delay will allow such resolution.

The managers have added language to ensure that provisions dealing with the repayment of government provided funds will remain the same as in the third round of procurements. These provisions were developed over a four year period based on the experience of previous procurements and negotiations, and input from industrial participants, Congress, and the managers of the program. They appear to be working well.

Based on this long-term experience, and the clear fact that the implementation of this type of technology will become even more important with the passage of clean air legislation, the managers reject proposals put forth by the Department of Energy to increase repayment rates substantially. Such proposals, while they might increase the recovery of government-provided funds over periods of up to twenty years, might also act as a deterrent to industrial participation in the program, which is already over 50 percent cost-shared by industry. The purpose of the program is to accelerate the introduction of clean uses of coal in a more efficient manner in compliance with stringent new air quality standards, not the provision of investment returns to the Government at the expense of nascent markets.

## CHAPTER V

## DEPARTMENT OF LABOR

### EMPLOYMENT AND TRAINING ADMINISTRATION

#### COMMUNITY SERVICE EMPLOYMENT FOR OLDER AMERICANS

Amendment No. 90: Appropriates $10,000,000 as proposed by the Senate. H.R. 4404 as passed the House included no funds for this purpose, but this same amount was included in H.R. 4828 as introduced in the House of Representatives.

### STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE OPERATIONS

Amendment No. 91: Appropriates $99,600,000 from the Unemployment Trust Fund as proposed by the Senate instead of $96,000,000 as proposed by the House in H.R. 4404. H.R. 4828 as introduced in the House of Representatives contained $99,600,000 for this purpose.

The conferees direct the Department of Labor to use all of the supplemental funds to restore, to the extent possible, the 6.7 percent across-the-board reductions taken to States' base and contingency allocations for fiscal year 1990.

### EMPLOYMENT STANDARDS ADMINISTRATION

Amendment No. 92: Inserts heading as proposed by the Senate.

#### SPECIAL BENEFITS

Amendment No. 93: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the date "June 15" named in said amendment insert the following: *August 15*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement changes the so-called drawdown date for the Special Benefits account to August 15 instead of June 15 as proposed by the Senate; the date under current law is September 15. The agreement also provides that unobligated balances remaining on September 30, 1990 shall remain available for obligation until September 30, 1991.

#### BLACK LUNG DISABILITY TRUST FUND

Amendment No. 94: Appropriates $700,000 from the Black Lung Disability Trust Fund as proposed by the Senate. H.R. 4404 as passed the House included no funds for this purpose, but the same amount was included in H.R. 4828 as introduced in the House of Representatives.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### HEALTH RESOURCES AND SERVICES ADMINISTRATION

#### PROGRAM OPERATIONS

Amendment No. 95: Appropriates $2,300,000 for health care for the homeless as proposed by the Senate. While H.R. 4404 as passed the House did not include funds for this purpose, the amount provided in the conference agreement is the same as that included in H.R. 4828 as introduced in the House of Representatives.

### CENTERS FOR DISEASE CONTROL

#### DISEASE CONTROL, RESEARCH, AND TRAINING

Amendment No. 96: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the first sum named in said amendment insert: *$30,500,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $30,500,000, including $7,000,000 for measles outbreak control and $23,500,000 for the purchase of a second vaccination for measles immunization. H.R. 4404 as passed the House included no funds for this purpose, but the same amount was included in H.R. 4828 as introduced in the House of Representatives.

In addition, the conferees are agreed that an additional $5,000,000 shall be available for measles outbreak control by reprogramming from other immunization activities and that an additional $2,000,000 shall be available for hepatitis B screening in the same manner.

### ALCOHOL, DRUG ABUSE AND MENTAL HEALTH ADMINISTRATION

#### ALCOHOL, DRUG ABUSE AND MENTAL HEALTH

Amendment No. 97: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the Senate amendment amended to read as follows:

In lieu of the matter inserted by said amendment, insert the following:

*ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH ADMINISTRATION*

*ALCOHOL, DRUG ABUSE, AND MENTAL HEALTH*

*The second proviso under the heading "Alcohol, Drug Abuse, and Mental Health" in title IV of Public Law 101-164 is repealed effective September 10, 1990 if the treatment waiting period reduction grants are not specifically authorized prior to that date.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are agreed that the funding reserved for treatment waiting period reduction grants shall be available only for this purpose until September 10, 1990, pending reauthorization. If the program has not been reauthorized by that time, the Committees expect a reprogramming request by the Department for other drug abuse treatment, prevention, and research activities.

#### VACCINE INJURY COMPENSATION

Amendment No. 98: Deletes without prejudice language proposed by the Senate to modify amendments to the Public Health Service Act regarding vaccine compensation which were contained in the 1989 Reconciliation Act. H.R. 4404 as passed the House included no similar provision.

The conferees have deleted without prejudice bill language which would have made a number of technical corrections in the Vaccine Injury Compensation Act. The conferees are concerned, however, that drafting errors made in amendments to the compensation system in P.L. 101-239 have made it possible for claimants who are injured by vaccines to receive an award from the Vaccine Injury Compensation System and still file a civil suit. this result is contrary to the intent of the Vaccine Injury Compensation System and threatens the viability of the system. The conferees are concerned also about the effect of this problem on the Compensation Trust Fund. The conferees hope this problem can be resolved promptly through legislative action.

### FAMILY SUPPORT ADMINISTRATION

Amendment No. 99: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter inserted by said amendment, insert the following:

*REFUGEE AND ENTRANT ASSISTANCE*

*(INCLUDING TRANSFER OF FUNDS)*

*For an additional amount for "Refugee and Entrant Assistance", $6,000,000, to be distributed under the targeted assistance program, of which $5,000,000 shall be for health and educational services in areas affected as a result of the massive influx of Cuban and Haitian entrants during the Mariel boatlift, $500,000 shall be available for communities currently conducting a "Fish/Wilson" demonstration project and which have been heavily impacted by the recent influx of Soviet Pentecostals for health and employment services, and $500,000 shall be available for schools in areas impacted by the influx of Indochinese refugees who entered the United States after October 1, 1979, in which the enrollment of Indochinese students (including secondary migrants) is greater than 2,000, and who comprise no less than 20 percent of the overall school enrollment in such a locality with a general population of no less than 75,000 persons: Provided, That the amount provided herein shall be derived by transfer from funds appropriated in Public Law 101-166*

*for Student Financial Assistance for carrying out activities authorized under part E, section 465 of the Higher Education Act, as amended.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement deletes WIN rescission language proposed by the Senate, and substitutes new language which was not included in either House or Senate bill which provides an additional $6.0 million for Targeted Assistance under the Refugee and Entrant Assistance program. $5 million of these funds are provided to offset health and education costs incurred by areas which have been heavily impacted by the massive influx of Cuban and Haitian entrants during the Mariel boatlift. In addition, $500,000 is provided for communities currently conducting a "Fish/Wilson" demonstration project and which have been heavily impacted by the recent influx of Soviet Pentecostals for health and employment services, and an additional $500,000 is provided for schools in areas impacted by the influx of Indochinese refugees who entered the United States after October 1, 1979, in which the enrollment of Indochinese students (including secondary migrants) is greater than 2,000, and who comprise no less than 20 percent of the overall school enrollment in such a locality with a general population of no less than 75,000 persons.

The additional budget authority and outlays which result from this agreement are offset by a transfer from funds appropriated in Public Law 101-166 for Perkins loan teacher cancellation payments which are in excess of current requirements.

Of the amounts agreed to for refugee assistance, $5 million for Cuban-Haitian entrants was previously provided for in H.R. 4828 as introduced in the House of Representatives.

ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES

HUMAN DEVELOPMENT SERVICES

Amendment No. 100: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter inserted by said amendment insert the following:

*ASSISTANT SECRETARY FOR HUMAN DEVELOPMENT SERVICES*

*HUMAN DEVELOPMENT SERVICES*

*For an additional amount for carrying out the Head Start Act, $165,685,000, which shall remain available until December 31, 1990.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

H.R. 4404 as passed the House included no funds for this program, but $165,685,000 was included in H.R. 4828 as introduced in the House of Representatives.

The conferees are concerned over the length of time it has taken the Department to allocate Head Start monies. Therefore, the Department is directed to furnish the Committees with a report, no later than August 1, 1990, on the disbursement of funds for the expansion of the Head Start program that were provided in the regular FY 1990 appropriations act, as well as a timetable for the disbursement of the $165,685,000 provided in this supplemental bill. The Department is expected to move expeditiously in the allocation of funds for expansion in order that additional children are brought into the Head Start program as soon as possible.

DEPARTMENT OF EDUCATION

SCHOOL IMPROVEMENT PROGRAMS

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will move to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SCHOOL IMPROVEMENT PROGRAMS*

*(INCLUDING TRANSFER OF FUNDS)*

*For an additional amount for "School Improvement Programs", $20,945,000, to remain available until September 30, 1991, of which $19,945,000 shall be to continue funding of existing School Dropout Demonstration programs as authorized under title VI, Part A and $1,000,000 shall be for carrying out the Javits Gifted and Talented Education Program as authorized under title IV, Part B of the Elementary and Secondary Education Act of 1965, as amended: Provided, That $2,520,000 of the amount provided herein shall be derived by transfer from funds appropriated in Public Law 100-436 for Student Financial Assistance for carrying out activities authorized by Part E, section 465 of the Higher Education Act, as amended: Provided further, That funds available under Public Law 101-164 for grants to States under the Drug-Free Schools and Communities Act shall also be available for Indian Youth under sections 5112(a)(2) and 5133, and for Hawaiian Natives under sections 5112(a)(3) and 5134.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement modifies and consolidates language added by the Senate in amendments 101, 102, and 103 all of which relate to the School Improvement Programs appropriation account. The agreement provides the full $19,945,000 for dropout demonstration grants as proposed by the Senate and provides that these funds shall be allocated by the Secretary as continuation awards to grantees funded in 1989. The conferees expect these funds to be awarded by September 1, 1990.

The conference agreement also includes $1,000,000 for grants under the Javits Gifted and Talented Education program instead of the $4,000,000 proposed by the Senate in amendment No. 103.

The conferees have provided supplemental funding to be awarded within the normal competitive process to support additional pending applications for the Javits Gifted and Talented program. The conferees urge that special priority be given to applications from States that have yet to establish a comprehensive approach to teaching gifted and talented students particularly those students in urban areas. Applications which would address the problems of underrepresentation in gifted and talented programs for the economically disadvantaged, those students with limited English speaking ability and minority groups should be given priority.

Finally, the conference agreement deletes the additional appropriation of $2,038,000 for Drug-Free Schools included by the Senate under amendment 102 but includes language clarifying that funds previously appropriated under Public Law 101-164 for Grants to States are also available for Indian and Native Hawaiian Youth as provided for under the basic law. The conferees expect that an additional $2,038,000 will be made available for these activities.

The additional outlays which result from this agreement are offset by a transfer of Fiscal Year 1989 funds for Student Financial Assistance. These funds are in excess of current requirements for loan cancellation payments under the Perkins program as provided for under Public Law 100-436.

While H.R. 4404 as passed the House did not include any provisions similar to amendments 101, 102, and 103, the amounts agreed to are the same as provided for in H.R. 4828 as introduced in the House of Representatives.

Amendment No. 102: Deletes appropriations of $2,038,000 for "School improvement programs" proposed by the Senate. (see Amendment No. 101).

Amendment No. 103: Deletes appropriation of $4,000,000 for "School improvement programs" proposed by the Senate. (see Amendment No. 101).

EDUCATION FOR THE HANDICAPPED

Amendment No. 104: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter inserted by said amendment, insert the following:

*EDUCATION FOR THE HANDICAPPED*

*Funds appropriated under section 619 of the Education of the Handicapped Act for fiscal year 1989 shall remain available for obligation by States through September 30, 1992.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment makes a technical change extending the availability of fiscal year 1989 funds for Preschool Grants through September 30, 1992. This language was requested by the Administration in the Fiscal Year 1991 Budget. The conference agreement modifies language inserted by the Senate to make clear that the extended availability for obligation of funds for the Preschool Grant program applies to obligation by the States.

STUDENT FINANCIAL ASSISTANCE

Amendment No. 105: Deletes language proposed by the House relating to Pell grant shortfalls in the 1989-90 award year.

RELATED AGENCIES

Amendment No. 106: Inserts heading as proposed by the Senate.

NATIONAL COMMISSION ON CHILDREN

Amendment No. 107: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended as follows:

In lieu of the sum named in said amendment, insert the following: *$400,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

WHITE HOUSE CONFERENCE ON LIBRARY AND INFORMATION SERVICES

Amendment No. 108: Deletes language proposed by the Senate that would have provided additional funds for the White House Conference on Library and Information Services.

CHAPTER VI

RURAL DEVELOPMENT, AGRICULTURE, AND RELATED AGENCIES

DEPARTMENT OF AGRICULTURE

CONGRESSIONAL DIRECTIVES

Report language included by the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference are approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

AGRICULTURAL RESEARCH SERVICE

BUILDINGS AND FACILITIES

(DISAPPROVAL OF RESCISSION)

Amendment No. 109: Deletes Senate language which had the effect of disapproving Rescission Proposal No. R90-1, in the amount of $4,075,000 relating to the Buildings and Facilities account of the Agricultural Research Service. These funds will become available on June 18, 1990, without further action by the Congress.

COOPERATIVE STATE RESEARCH SERVICE

(INCLUDING TRANSFER OF FUNDS)

Amendment No. 110: Inserts a paragraph heading as proposed by the Senate.

Amendment No. 111: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which transfers $250,000 from the higher education account to the Federal Administration account of the Cooperative State Research Service. This transfer has been made in order to allow the development of a vocational agriculture curriculum for aquaculture education as intended by Congress in the fiscal year 1990 Rural Development, Agriculture, and Related Agencies Appropriations Act. This provision was included in the House introduced bill (H.R. 4828).

BUILDINGS AND FACILITIES

(DISAPPROVAL OF RESCISSION)

Amendment No. 112: Deletes Senate language which had the effect of disapproving Rescission Proposal No. R90-2, in the amount of $41,008,000 relating to the Buildings and Facilities account of the Cooperative State Research Service. These funds will become available on June 18, 1990, without further action by the Congress.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

Amendment No. 113: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates $8,000,000 for the Animal and Plant Health Inspection Service. The conference agreement includes $6,800,000 for grasshopper control efforts and $1,200,000 for the pseudorabies eradication effort. This provision was included in the House introduced bill (H.R. 4228).

FOOD SAFETY AND INSPECTION SERVICE

Amendment No. 114: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

*FOOD SAFETY AND INSPECTION SERVICE*

*For an additional amount for necessary expenses to carry on services authorized by the Federal Meat Inspection Act, as amended, and the Poultry Products Inspection Act, as amended, $4,400,000: Provided, That none of the funds appropriated or otherwise made available by the Rural Development, Agriculture, and Related Agencies Appropriations Act, 1990, Public Law 101-161, shall be used to pay the salaries of personnel who carry out an export enhancement program if the aggregate amount of funds and/or commodities under such program exceeds $553,000,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides $4,400,000 for the Food Safety and Inspection Service instead of $6,884,000 as proposed by the Senate. The $4,400,000 provided will prevent the furlough without pay of any food inspectors. In addition, the conference agreement limits the export enhancement program to $553,000,000 instead of $556,000,000 as proposed by the Senate. H.R. 4828 included $4,400,000 for the Food Safety and Inspection Service and a ceiling of $550,000,000 on the export enhancement program.

FEDERAL CROP INSURANCE CORPORATION

ADMINISTRATIVE AND OPERATING EXPENSES

Amendment No. 115: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

*FEDERAL CROP INSURANCE CORPORATION*

*ADMINISTRATION AND OPERATING EXPENSES*

*For an additional amount for administrative and operating expenses, as authorized by the Federal Crop Insurance Corporation Act, as amended (7 U.S.C. 1516), $15,000,000: Provided, That these funds shall be available only to the extent an official budget request, for a specific dollar amount, is transmitted to the Congress.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $15,000,000 for administrative and operating expenses of the Federal Crop Insurance Corporation as proposed by the Senate. In addition, the conference agreement makes the appropriation contingent upon the submission of an official budget request for a specific dollar amount. This provision was included in the House introduced bill (H.R. 4828).

The conferees expect that not less than $300,000 of the funds available to the Commission for the Improvement of the Federal Crop Insurance Program be returned to the Federal Crop Insurance Corporation administrative and operating expenses account. The conferees expect the Commission to terminate operations by the end of fiscal year 1990.

FARMERS HOME ADMINISTRATION

RURAL WATER AND WASTE DISPOSAL GRANTS

The conferees are advised that 89 percent of the users of the planned south Washington County, Arkansas rural development water project have water sources classified as unsafe, and note that some users are drawing water from stock ponds. The conferees will expect the Secretary to give attention to meeting the needs of this community, and consider using funds from the recovery of prior year obligations, if any, for this need.

WETLANDS

The conferees agree that wetlands described in Executive Order 11990 of the President shall be protected, thus reserving non-wetland farmlands for farming. The conferees further agree that in each case where foreclosed farmland was sold to the original owner or family member subject to wetlands easements on nonwetland farmland, excluding valid buffer zones, the Farmers Home Administration shall issue a deed free of such easement.

RURAL ELECTRIFICATION ADMINISTRATION

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

The Administration has proposed the reduction of insured loan levels in the amounts of $23,500,000 for electric loans and $105,900,000 for telephone loans. The conferees reject this proposal.

Furthermore, the conferees direct that the maximum amounts of loan funds authorized in the 1990 Rural Development, Agriculture, and Related Agencies Appropriations Act be made available for obligation. An unfunded balance of $550,000,000 in eligible loan applications is anticipated for the end of fiscal year 1990. This situation is unnecessary because Congress has consistently made sufficient funds available to cover the need by authorizing a range of loan levels.

FOOD AND NUTRITION SERVICE

COMMODITY SUPPLEMENTAL FOOD PROGRAM

Amendment No. 116: Appropriates $3,100,000 for the commodity supplemental food program instead of $4,700,000 as proposed by the Senate. The amount provided should allow the commodity supplemental food program to serve, at minimum, the March 1990 actual participation levels through the end of the fiscal year. This provision was included in the House introduced bill (H.R. 4828).

FOOD STAMP PROGRAM

Amendment No. 117: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert: *$1,200,000,000, which shall be available only to the extent an official budget request, for a specific dollar amount, is transmitted to the Congress*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $1,200,000,000 for the food stamp program. In a letter to the House and Senate Appropriations Committees dated May 2, 1990, the Secretary of Agriculture stated:

* * * * *

The House bill contains $510 million. The Senate bill provides $705 million. Both of these figures were consistent at the time of their enactment with the best information that was available. However, more recent information which has just become available indicates that even the $705 million in the Senate bill may not be sufficient. Program participation is continuing to grow by nearly 200,000 individuals per month. Participation in March grew to almost 20.3 million, an increase of nearly 400,000 over February and 1.3 million (7 percent) since the end of last fiscal year. Continuation of this trend would mean that the unfunded need could approach $1.2 billion.

We will continue to monitor this program closely and keep the Committees informed. It is at least possible that the normal seasonal decline in participation may not occur in the next several months. This uncertainty causes us to again commend to your attention the Administration's proposal for an open-ended appropriation for this program. However, if the Committees continue to believe that a specific appropriation should be provided, our best advice is that a supplemental of at least $1.2 billion will cover the need and reasonable assurance that full benefits can be continued for the remainder of this fiscal year.

* * * * *

In view of the request of the Secretary of Agriculture, the conferees recommend that the food stamp program be fully funded at a level of $1,200,000,000.

In addition, the conference agreement makes the appropriation contingent upon the submission of an official budget request for a specific dollar amount. This provision was included in H.R. 4829.

INDEPENDENT AGENCY

COMMODITY FUTURES TRADING COMMISSION

Amendment No. 118: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum named in said amendment, insert: *$2,000,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates $2,000,000 for the Commodity Futures Trading Commission instead of $3,655,000 as proposed by the Senate. The House bill had no similar provision.

CHAPTER VII

DEPARTMENTS OF VETERANS AFFAIRS AND HOUSING AND URBAN DEVELOPMENT, AND INDEPENDENT AGENCIES

DEPARTMENT OF VETERANS AFFAIRS

VETERANS BENEFITS ADMINISTRATION

Amendment No. 119: Appropriates $245,000,000 for the loan guaranty revolving fund as proposed by the Senate and specified in H.R. 4828, instead of $150,000,000 as proposed by the House in H.R. 4404.

VETERANS HEALTH SERVICE AND RESEARCH ADMINISTRATION

Amendment No. 120: Appropriates $94,000,000 for medical care as proposed by the Senate and specified in H.R. 4828, instead of $50,000,000 as proposed by the House in H.R. 4404. The conferees agree that at least $30,000,000 of the amount provided is to be used to increase employment to the 194,638 level by the end of the fiscal year. The balance of up to $64,000,000 is for additional medical equipment and supplies.

Amendment No. 121: Restores language proposed by the House and stricken by the Senate earmarking $7,227,000,000 of the total 1990 medical care appropriation for personnel compensation and benefits object classifications. This will ensure adequate funds are made available to support an average employment of 194,638 by the end of the fiscal year.

DEPARTMENTAL ADMINISTRATION

Amendment No. 122: Restores language proposed by the House and stricken by the Senate increasing the amount available in the 1990 general operating expenses appropriation for travel by $1,000,000. This action does not increase the total amount of funds available in 1990 for general operating expenses but does provide the VA with flexibility to meet current requirements.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

Amendment No. 123: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In the heading "Housing for the elderly and handicapped fund", strike the word "and" and insert *"or"*.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement extends indefinitely the period during which fiscal year 1990 housing for elderly or handicapped fund direct loan authority is available, amended to make a technical change in the heading.

COMMUNITY PLANNING AND DEVELOPMENT

Amendment No. 124: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*COMMUNITY DEVELOPMENT GRANTS*

*(INCLUDING TRANSFER OF FUNDS)*

*Notwithstanding the repeal of section 107(b)(3) of the Housing and Community Development Act of 1974 by section 105(b) of the Department of Housing and Urban Development Reform Act of 1989, funds appropriated under the Community Development Grants heading of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1990, pursuant to such section 107 shall be available for grants to Indian tribes.*

*The paragraph under this head in title II of Public Law 101-144 (approved November 9, 1989) (103 Stat. 839, 849-850) is hereby amended by inserting, immediately before the final colon in the third proviso, a semicolon and the following: "and the amounts set forth for the 27 projects and purposes specified at page 19 (other than those three projects specified in this and the immediately preceding proviso) and for the first 10 projects specified on page 20, of the Joint Explanatory Statement of the Committee of Conference on H.R. 2916 (House Report 101-297), shall be made available for such projects and purposes".*

*The amount to be derived by transfer from the urban development action grants account to this head under Public Law 101-144 shall include all unobligated balances available at the end of fiscal year 1989: Provided, That such unobligated balances shall be made available for purposes authorized by section 106 of the Housing and Community Development Act of 1974: Provided further, That those amounts that are required to fund urban development action grant projects which have received preliminary approval in accordance with regulations promulgated by the Department of Housing and Urban Development shall not be transferred: Provided further, That the Secretary of Housing and Urban Development shall withhold from the amount subject to transfer such funds as may be necessary to comply with orders of United States Courts which direct the Secretary to set aside funds for possible future approval of grants to carry out urban development action grant programs authorized in section 119 of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301).*

*Of the amount that otherwise would be available under this head under Public Law 101-144 for technical assistance activities to be allocated at the discretion of the Secretary, under section 107(b)(4) of the Housing and Community Development Act of 1974, $14,000,000 shall be made available under section 106 of such Act.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes language which: (1) permits the use of community development grant funds appropriated in 1990 for grants to Indian tribes; (2) authorizes the special projects set forth in the 1990 conference report; (3) transfers unobligated balances in the urban development action grants program to the community development grants account; and (4) makes $14,000,000 of technical assistance funds available for section 106 activities as specified in the House introduced bill (H.R. 4828), instead of including only the first two paragraphs as proposed by the Senate.

Amendment No. 125: Deletes language proposed by the House and stricken by the Senate transferring unobligated balances from the urban development action grants program to the urban homesteading program to expand the homesteading of additional Federal Housing Administration properties.

Amendment No. 126: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate exempting the State of Vermont from certain rent control provisions. This language was also included in the House introduced bill (H.R. 4828).

Amendment No. 127: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate providing that the Beechwood Towers Housing Development Grant project in Pittsburgh not be canceled prior to December 31, 1990. This language was also included in the House introduced bill (H.R. 4828).

INDEPENDENT AGENCIES

AMERICAN BATTLE MONUMENTS COMMISSION

Amendment No. 128: Inserts language appropriating $500,000 for salaries and expenses as proposed by the Senate and specified in H.R. 4828.

ENVIRONMENTAL PROTECTION AGENCY

Amendment No. 129: Inserts center heading as proposed by the Senate.

Amendment No. 130: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*ABATEMENT, CONTROL, AND COMPLIANCE*

*For an additional amount for "Abatement, control, and compliance", $1,800,000, to remain available until September 30, 1991: Provided, That of the funds appropriated under this head in the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1990 (Public Law 101-144), $500,000 shall be available for a lead storage battery recycling pilot project for the State*

*of New Jersey, to remain available until expended.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes language appropriating $1,800,000 for the additional cost of renovating a Great Lakes research vessel. This language was included in the House introduced bill (H.R. 4828).

The conferees also urge that from within available resources $900,000 be allocated to the State of Michigan for a zero waste sulfonation and other technologies program applied to municipal and household wastes.

Finally, the conferees are very concerned over the failure of the Administration to provide adequate policy attention to the issue of lead poisoning due to exposure to lead-based paint. While significant scientific and technical questions abound as to the nature of this health risk, effective testing techniques, and reasonable and cost-effective exposure abatement methodologies, the Federal Government has already initiated a multi-billion dollar program for public housing modernization, that will require public housing authorities to confront lead paint testing and abatement. The Congress provided $5,000,000 in EPA's fiscal year 1990 budget to begin work on developing a technically sound program and policy. The conferees are concerned that uncertainties over continued support of this work over the next few fiscal years have prompted EPA to propose application of these funds in a manner which fails to match the aggressive, legislatively-mandated abatement program of HUD. The conferees therefore direct EPA to revise its operating plan to accelerate research and policy development activities for the current year, including an appropriate augmentation of staff support for such studies.

Amendment No. 131: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate extending the 1990 exemption from establishing State revolving loan funds for certain governments with construction grants appropriations to funds appropriated in prior and future years and makes a technical change in reference to the Republic of Palau. This language was also included in the House introduced bill (H.R. 4828).

FEDERAL EMERGENCY MANAGEMENT AGENCY

Amendment No. 132: Deletes language appropriating $500,000 for emergency management planning and assistance as proposed by the Senate.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Amendment No. 133: Deletes language rescinding $36,077,000 of 1990 space flight, control and data communications funds as proposed by the Senate.

Amendment No. 134: Appropriates $32,970,000 for research and program management as proposed by the House, instead of $45,000,000 as proposed by the Senate.

Amendment No. 135: Transfers $14,970,000 from the space flight, control and data communications account to the research and program management account as proposed by the House, instead of $27,000,000 as proposed by the Senate.

NATIONAL COMMISSION ON AMERICAN INDIAN, ALASKA NATIVE, AND NATIVE HAWAIIAN HOUSING

(TRANSFER OF FUNDS)

Amendment No. 136: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate transferring $500,000 of the funds earmarked for the public housing modernization program in the 1990 annual contributions for assisted housing appropriation to fund the Commission. This language was also included in the House introduced bill (H.R. 4828).

NATIONAL COMMISSION ON SEVERELY DISTRESSED PUBLIC HOUSING

(TRANSFER OF FUNDS)

Amendment No. 137: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate transferring $2,000,000 of the funds earmarked for the public housing modernization program in the 1990 annual contributions for assisted housing appropriation to fund the Commisison. This language was also included in the House introduced bill (H.R. 4828).

## CHAPTER VIII

## DEPARTMENT OF TRANSPORTATON

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

Amendment No. 138: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate appropriating $5,000,000 in liquidating cash for highway traffic safety grants and increasing the limitation on obligations for alcohol safety incentive grants by $5,000,000. This amount was also included in the House introduced bill (H.R. 4828).

## CHAPTER IX

## DISTRICT OF COLUMBIA

DISTRICT OF COLUMBIA FUNDS

Amendment No. 139: Inserts new chapter and headings for fiscal year 1990 supplemental appropriations for the District of Columbia government as proposed by the Senate. The District's supplemental request was submitted in House Document No. 101-186 and is included in H.R. 4228 as introduced in the House and as Senate amendments to the original Dire Emergency Supplemental. The District's fiscal year 1990 supplemental request reflects a net reduction in operating expenses of $25,466,000 and a net increase in the capital outlay program of $51,887,000. The recommendations of the conferees are discussed under subsequent amendments in this chapter.

GOVERNMENTAL DIRECTION AND SUPPORT

(INCLUDING RESCISSION)

Amendment No. 140: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates an additional $99,000 and rescinds $3,317,000 for a net decrease of $3,218,000 in appropriations for the various departments and activities included under this heading. The appropriation and this recission were also in the House introduced bill (H.R. 4828).

ECONOMIC DEVELOPMENT AND REGULATION

(INCLUDING RESCISSION)

Amendment No. 141: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment insert the following:

*ECONOMIC DEVELOPMENT AND REGULATION*

*(INCLUDING RESCISSION)*

*For an additional amount for "Economic development and regulation", $50,000: Provided, That of the funds appropriated under this heading for the fiscal year ending September 30, 1990, in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 Stat. 1269), $10,498,000 are rescinded for a net decrease of $10,448,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action appropriates an additional $50,000 and rescinds $10,498,000 for a net decrease of $10,448,000 as contained in the House introduced bill (H.R. 4828) instead of appropriating an additional $50,000 and rescinding $10,478,000 for a net decrease of $10,428,000 as proposed by the Senate. The changes reflect technical adjustments required to conform the totals to the individual items that were submitted in the District's request.

PUBLIC SAFETY AND JUSTICE

(INCLUDING RESCISSION)

Amendment No. 142: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*PUBLIC SAFETY AND JUSTICE*

*(INCLUDING RESCISSION)*

*For an additional amount for "Public safety and justice", $7,750,000: Provided, That of the funds appropriated under this heading for fiscal year 1990 in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168, 103 Stat. 1269 to 1271), $2,739,000 are rescinded for a net increase of $5,011,000: Provided further, That of the $50,000,000 previously appropriated under the heading "Criminal Justice Initiative", $10,000,000 shall be paid to the District of Columbia government to pay amounts due to the Federal Bureau of Prisons and State governments and facilities for the housing of District of Columbia Code violators: Provided further, That by November 30, 1990, the District of Columbia government shall pay $10,000,000 (from current operating revenues collected during fiscal year 1991 and not from the proceeds of borrowed funds) to the United States Treasury, and such payment shall be credited to and be available for the purposes of the "Criminal Justice Initiative" for the construction of the Correctional Treatment Facility: Provided further, That no actions taken pursuant to any of the provisions of this heading may be carried out in a manner that will delay the construction of such Correctional Treatment Facility.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action appropriates an additional $7,750,000 and rescinds $2,739,000 for a net increase of $5,011,000 instead of appropriating an additional $7,750,000 and rescinding $5,739,000 for a net increase of $2,011,000 as contained in the House introduced bill (H.R. 4828) and the Senate amendment to the original Dire Emergency Supplemental. The conferees have also agreed, although reluctantly, to allow the District to finance $10,000,000 of the current operating expenses by using

$10,000,000 of the $50,000,000 in Federal funds previously appropriated for construction of the new Correctional Treatment Facility. This matter is discussed later in this report under "Drawdown of Correctional Treatment Facility Funds".

*Metropolitan Police Department.*—The conferees have not approved the request to rescind $3,000,000 in funds for the Metropolitan Police Department. The requested rescission of $3,000,000 would have reduced the department's ability to target specific areas of the city for enforcement purposes and would have lowered the police profile throughout the city. The rescission would have also jeopardized the department's ability to provide new recruits with adequate equipment and supplies, thus delaying their deployment. The conferees have not approved the reduction of $1,000,000 in the department's equipment budget to provide pay-as-you-go capital financing to renovate a building to house the Special Operations Division (SOD). It is the understanding of the conferees that units of the SOD were recently relocated from the site of the new correctional treatment facility and that the city's master plan calls for the eventual relocation of the SOD to a permanent site elsewhere in the District. This matter will be discussed during the upcoming hearings on the District's fiscal year 1991 budget.

*Drawdown of Correctional Treatment Facility Funds.*—The conference action also includes language that allows the District government to finance $10,000,000 of current operating expenses by using $10,000,000 of the $50,000,000 in Federal funds appropriated through fiscal year 1989 for construction of the new Correctional Treatment Facility. These funds will be used to pay the Federal Bureau of Prisons and various State governments and facilities for the costs of housing District of Columbia inmates in non-District facilities.

The conferees have reluctantly agreed to this financing arrangement and have done so only after adding language to require the District government to repay the $10,000,000 by November 30, 1990, from current operating revenues collected during fiscal year 1991 and not from the proceeds of borrowed funds. The conferees have not approved the District government's proposal to replace the Fedeal funds with borrowed funds which would burden future District taxpayers who would have to pay the interest costs on such funds over the amortized period. Likewise, the conferees are concerned that the financing of some programs originally funded in the operating budget has been switched to the capital budget which, of course, is financed with borrowed funds that have to be repaid over periods of 5 to 30 years requiring District taxpayers to shoulder the added burden of interest costs as well a the principal repayment. The conferees call on District officials to avoid such financing arrangements in the future.

PUBLIC EDUCATION SYSTEM

(INCLUDING RESCISSION)

Amendment No. 143: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*PUBLIC EDUCATION SYSTEM*

*(INCLUDING RESCISSION)*

*For an additional amount for "Public education system", $3,461,000, including $2,682,000 for the D.C. Public Schooools and $779,000 for the Public Library: Provided, That for the funds appropriated under this heading for the fiscal year ending September 30, 1990, in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 State. 1271), $7,882,000 for the D.C. Public Schools, $730,000 for the University of the District of Columbia, $779,000 for the Public Library $643,000 for the Commission on the Arts and Humanities, and $10,000 for the Education Licensure Commission are rescinded for a net decrease of $6,583,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action appropriates an additional $3,461,000 and rescinds $10,044,000 for a net decrease of $6,583,000 with specific allocations of the appropriations and rescissions as contained in the House introduced bill H.R. 4828) instead of rescinding $6,583,000 with no allocations as proposed by the Senate in its amendment to the original Dire Emergency Supplemental.

*District of Columbia School of Law.*—The conferees are concerned about the effect of the denial by the District government of the Law School's supplemental request. This action could endanger the School's ability to achieve timely American Bar Association (ABA) accreditation. The request totaled $1.5 million and included such essential items as increased rental costs ($62,000), ABA site inspection fee ($15,000), additional building security ($40,000), and library books and equipment ($525,000).

The Law School submitted its application for provisional accreditation to the ABA on December 6, 1989, thus beginning the accreditation process. The Law School's fiscal year 1991 budget request is based on receiving funds to cover its 1990 supplemental needs. The supplemental would have allowed the Law School to reduce it's dependence on District appropriated funds. The District Council's Committee on Education and Libraries stated in its report that "In short, rather than consider the base budget as sacrosanct, and thus ask for additional appropriations for every new need or initiative—which is the practice throughout most of the District Government, the Law School is attempting to be fiscally responsible at a time of limited, if not scarce, revenues. The simple fact that the Board of Governors of the Law School would voluntarily propose a reduction in appropriated funds spending in FY 1991 from expected FY 1990 total expenditures, is an indication of the Board's commitment to build a quality institution of higher legal education without unnecessarily expending taxpayers' dollars. It must also be emphasized that through base budget reductions and by expending the balance of its FY 1987 one-time only appropriation in FY 1990, the Law School will need less assistance from the taxpayers next fiscal year than this fiscal year, even though the Law School will have a first through third-year student population for the first time ever and will be undergoing an exhaustive American Bar Association on-site review."

The conferees direct District officials to review the current needs of the D.C. School of Law with an eye toward recommending a reprogramming to cover the School's highest priority increases for fiscal year 1990.

HUMAN SUPPORT SERVICES

(INCLUDING RESCISSION)

Amendment No. 144: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*HUMAN SUPPORT SERVICES*

*(INCLUDING RESCISSION)*

*For an additional amount of "Human support services", $4,840,000: Provided, that $640,000 of this appropriation, to remain available until expended, shall be available solely for District of Columbia employees disability compensation: Provided further, That of the funds appropriated under this heading for fiscal year 1990 in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 Stat. 1271), $10,245,000 are rescinded for a net decrease of $5,405,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement appropriates an additional $4,840,000 and rescinds $10,245,000 for a net decrease of $5,405,000 as contained in the House introduced bill (H.R. 4828) instead of appropriating an additional $4,840,000 and rescinding $10,245,000 for a net increase of $5,405,000 as proposed by the Senate in its amendment to the original Dire Emergency Supplemental.

*Uncompensated Medical Care.*—The conferees have become aware of a serious problem at local hospitals concerning uncompensated medical care. According to information provided to the conferees, this problem could total $10,000,000 annually. The problem appears to be getting worse as a result of drug-related violence on the city's streets.

D.C. General Hospital expects to treat twice as many trauma patients as it did just three years ago and 60 percent of those will be uninsured. George Washington University Medical Center has rendered $22,000,000 worth of uncompensated care since 1988. In one recent quarter, the Washington Hospital Center provided more than $6,000,000 in medical care for which it received no payment.

This problem is not limited to the District. The City of Chicago has lost three trauma centers in the past two years as a result of these escalating costs. This does not have to happen and should not be allowed to happen in the District. The conferees expect to discuss this matter with District officials at upcoming hearings on the District's fiscal year 1991 budget and expect District officials to be fully prepared to discuss possible solutions such as those that have been undertaken in Maryland, Virginia, and California.

PUBLIC WORKS

(INCLUDING RESCISSION)

Amendment No. 145: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*PUBLIC WORKS*

*(RESCISSION)*

*Of the funds appropriated under this heading for the fiscal year ending September 30, 1990, in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 Stat. 1271 and 1272), $8,810,000 are rescinded: Provided, That none of the funds contained in this Act or any other Act shall be obligated or ex-*

*pended by the District of Columbia government to remove the safety fences at the Duke Ellington Memorial Bridge until—*

*(a) the Mayor's Agent, following an evidentiary determination, has found that the evidence indicates that the circumstances have changed to nullify the 1987 findings of the Mayor's Agent, HPA No. 87-377 (August 20, 1987), as to the benefits of the fences; and*

*(b) the Mayor has provided a detailed statement to the Committees on Appropriations of the House of Representatives and the Senate explaining the basis for the decision to remove the safety fences.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action rescinds $8,810,000 as contained in the House introduced bill (H.R. 4828) and the Senate amendment to the original Dire Emergency Supplemental and inserts language prohibiting the District government from obligating or expending funds to remove the safety fences at the Duke Ellington Memorial Bridge until the Mayor's Agent has found, following an evidentiary determination, that circumstances have changed to nullify the findings of the Mayor's Agent in *D.C. Department of Public Works* v. *ANC's 1-C and 3-C, et al,* HPA No. 87-377, and the Mayor has provided a detailed statement to the House and Senate Committees on Appropriations explaining the basis for the decision to remove the safety fences. The conference action requires that proper procedures and evidential findings, supported by facts, be made prior to final action. It should also be noted that the District's proposed action would require the District to repay the Federal government $172,000 in funds used to construct the fences in 1986. This would be in addition to the estimated $180,000 in District funds that would have to be paid for modifications to the Bridge.

WASHINGTON CONVENTION CENTER FUND

Amendment No. 146: Appropriates an additional $2,993,000 as included in H.R. 4828 and as a Senate amendment to the original Dire Emergency Supplemental for the three agencies financed under this heading.

REPAYMENT OF LOANS AND INTEREST

Amendment No. 147: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which rescinds $12,336,000 due to lower than anticipated capital expenditures and the capitalization of bond interest costs. This rescission was also included in the House introduced bill (H.R. 4828).

REPAYMENT OF GENERAL FUND DEFICIT

Amendment No. 148: Deletes language proposed by the Senate which would have repealed the paragraph in the fiscal year 1990 D.C. Appropriations Act that requires the District government to reduce its general fund accumulated deficit by $20,000,000.

SHORT-TERM BORROWINGS

Amendment No. 149: Appropriates an additional $3,349,000 as included in H.R. 4828 to cover the costs of issuing revenue anticipation notes in October 1989 rather than January 1990 as originally planned. This amount was also included in the Senate amendment to the original Dire Emergency Supplemental.

OPTICAL AND DENTAL BENEFITS

Amendment No. 150: Appropriates an additional $543,000 as included in H.R. 4828 to cover the costs required by an increase in the number of claims and an increase in the number of eligible employees. This amount was also included in the Senate amendment to the original Dire Emergency Supplemental.

ENERGY ADJUSTMENT

Amendment No. 151: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*ENERGY ADJUSTMENT*

*The paragraph under the heading "Energy Adjustment" in the Distict of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 Stat. 1273), is hereby repealed.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action repeals language in the fiscal year 1990 D.C. Appropriations Act which required the District government to reduce its energy costs by $2,000,000. The reduction in energy costs has been allocated to individual agencies within the applicable appropriation titles. This provision was included in the House introduced bill (H.R 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

EQUIPMENT ADJUSTMENT

Amendment No. 152: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*EQUIPMENT ADJUSTMENT*

*The paragraph under the heading "Equipment Adjustment" in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 Stat. 1273), is hereby repealed.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action repeals language in the fiscal year 1990 D.C. Appropriations Act which required the District government to reduce its equipment costs by $6,100,000. The reduction in equipment costs has been allocated to individual agencies within the applicable appropriation titles. This provision was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

PERSONAL SERVICES ADJUSTMENT

Amendment No. 153: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*PERSONAL SERVICES ADJUSTMENT*

*The paragraph under the heading "Personal Services Adjustment" in the District of Columbia Appropriations Act, 1990, approved November 21, 1989 (Public Law 101-168; 103 Stat. 1273), is hereby repealed.*

*SUPPLY, ENERGY AND EQUIPMENT ADJUSTMENTS*

*The Mayor shall reduce authorized supply, energy, and equipment appropriations and expenditures within object classes 20 (supplies), 30a (contracts), and 70 (equipment) in the aggregate amount of $5,000,000 within one or several of the various appropriation headings in this chapter: Provided, That notwithstanding any other provision of law, such reductions shall not be allocated to any activities or programs of the Metropolitan Police Department.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

*Personal services adjustment.*—The conference action repeals language in the fiscal year 1990 D.C. Appropriations Act which required the District government to reduce its personal services costs by $31,550,000. This lump-sum reduction has been allocated to individual agencies within the applicable appropriation titles. This provision was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

*Supply, energy, and equipment adjustments.*—The conference action inserts language to reduce supply, energy, and equipment costs by $5,000,000 instead of $2,000,000 as contained in the District's request and in the House introduced bill (H.R. 4828). The conference action also includes language providing that none of this reduction shall be allocated to any activities or programs of the Metropolitan Police Department.

CAPITAL OUTLAY

Amendment No. 154: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*CAPTIAL OUTLAY*

*(INCLUDING RESCISSION)*

*For an additional amount for "Capital outlay", $79,802,000, to remain available until expended: Provided, That $27,915,000 of prior year authority is rescinded for a net increase of $51,887,000: Provided further, That $2,362,000 shall be available for project management and $2,116,000 for design by the Director of the Department of Public Works or by contract for architectural engineering services, as may be determined by the Mayor.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Seante.

The conference action appropriates $79,802,000 and rescinds $27,915,000 of prior year authority for a net increase of $51,887,000 as contained in the House introduced bill (H.R. 4828) instead of appropriating $76,102,000 and rescinding $24,215,000 of prior year authority for a net increase of $51,887,000 as proposed by the Senate. The changes recommended by the conferees and included in the House introduced bill (H.R. 4828) are technical adjustments required to conform the totals to the individual items that were approved by the District and included in their request.

WATER AND SEWER ENTERPRISE FUND

(INCLUDING RESCISSION)

Amendment No. 155: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates an additional $12,026,000 and rescinds $17,680,000 for a net decrease of $5,654,000. This appropriation and this rescission were included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

CHAPTER X

Amendment No. 156: Inserts a center heading as proposed by the Senate.

EXECUTIVE OFFICE OF THE PRESIDENT

OFFICE OF ADMINISTRATION

SALARIES AND EXPENSES

Amendment No. 157: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which extends the availability of the $500,000 appropriated to the Office of Administration in fiscal year 1990 for the White House Conference on Indian Education. This amendment makes funds appropriated in fiscal year 1990 available until expended.

FUNDS APPROPRIATED TO THE PRESIDENT

UNANTICIPATED NEEDS FOR NATURAL DISASTERS

Amendment No. 158: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the matter proposed by said amendment, insert the following:

*FUNDS APPROPRIATED TO THE PRESIDENT*

*UNANTICIPATED NEEDS FOR NATURAL DISASTERS*

*For an additional amount for "Unanticipated Needs for Natural Disasters", $5,000,000, to remain available until expended, to enable the President to meet unanticipated needs arising from natural disasters occurring on March 13, 1990: Provided, That, notwithstanding any other provision of law, not less than $2,500,000 of such additional amount shall be available to meet disaster assistance needs in the State of Nebraska, and not less than $2,500,000 shall be available to meet disaster assistance needs in the State of Kansas.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees recommend an appropriation of $5,000,000 to provide disaster assistance to communities in the States of Nebraska and Kansas which sustained significant tornado damage on March 13, 1990. To meet disaster assistance needs in the State of Kansas, not less than $2,500,000 shall be transferred to the Economic Development Administration for title IX sudden and severe dislocation projects. To meet disaster assistance needs in the State of Nebraska, not less than $2,500,000 shall be transferred to the Federal Emergency Management Agency for a grant to the State of Nebraska. This assistance shall be without regard to the requirements of the Robert T. Stafford Disaster Assistance Act.

CHAPTER XI

LEGISLATIVE BRANCH

U.S. SENATE

PAYMENT TO WIDOWS AND HEIRS OF DECEASED MEMBERS OF CONGRESS

Amendment No. 159: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides the traditional payment to the widow of Spark M. Matsunaga, late a Senator from Hawaii.

TITLE III—GENERAL PROVISIONS

SEC. 306

Amendment No. 160: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment which adds a general provision amendment Sec. 610 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990 (P.L. 101-162). The Senate amendment adds a new subsection to Sec. 610 of said Act which amends the term "export license applications" to include requests for approval of technical assistance agreements or services that would serve to facilitate the launch of U.S.-built satellites on Soviet- or Chinese-built launch vehicles. The House bill contained no similar provision.

The provision in the conference agreement is intended to clarify the language adopted in Sec. 610 of P.L. 101-162. That language prohibits the reinstatement or approval of export license applications for launch of U.S.-built statellites on Soviet- or Chinese-built launch vehicles unless the President reports to Congress that the People's Republic of China has made progress on certain political reforms or that the reinstatement or approval of such export license applications is in the national interest of the United States. The statutory language added by the conference agreement clarifies that such export license applications include requests for approval of technical assistance agreements or services that would facilitate launch of such satellites. The conferees emphasize that this provision applies only to export license applications by U.S. companies for such agreements which could facilitate the use of Soviet- or Chinese-built launch vehicles for possible launch of U.S.-built satellites. The conferees wish to make clear that, as under current law, the conference agreement allows the President to waive the new provision if he determines that approval of an export license application for such a technical assistance agreement is in the national interest of the United States.

Amendment No. 161: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 307. None of the funds appropriated by this or any other Act with respect to any fiscal year for contractual services support of the U.S. Antarctic Program may be obligated for procurement of a multibeam bathymetric sonar mapping system manufactured outside of the United States: Provided, That not to exceed $2,400,000 shall be available for the total cost of such procurement, including software: Provided further, That this section shall not be applicate to any procurement covered by the GATT Agreement on Government Procurement.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes language concerning the procurement and cost of a mapping system for a research vessel. Parts of this language were in the Senate amendment and in the House introduced bill (H.R. 4828).

Amendment No. 162: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate making a technical change in section 319 of the Department of Transportation and Related Agencies Appropriations Act, 1990, regarding the use of funds previously appropriated to the Federal Aviation Administration. This provision was also included in the House introduced bill (H.R. 4828).

Amendment No. 163: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate directing the Secretary of Transportation to make available funds previously appropriated for "Project Break-Even" administered by the Tri-County Metropolitan Transportation District of Oregon. This provision was also included in the House introduced bill (H.R. 4828).

Amendment No. 164: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 310. Funds appropriated under Public Law 101-164, the Department of Transportation and Related Agencies Appropriations Act, 1990, for Highway Demonstration Projects involving railroad overpasses in Las Vegas, New Mexico, may be used for construction: Provided, That for loans to the Chicago, Missouri and Western Railroad, or its successors, authorized in Public Law 101-164, $3,500,000: Provided further, That such loans shall be made available no latter than thirty days after enactment of this Act.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. This provision was included in the House introduced bill (H.R. 4828) and as a Senate amendment to the original Dire Emergency Supplemental.

Amendment No. 165: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which earmarks certain amounts appropriated in Public Law 101-130 and remaining available as of April 16, 1990, for the forest research, State and private forestry and National forest system accounts of the Forest Service. The language also provides that $15,153,000 of funds appropriated in Public Law 101-130 are rescinded.

Amendment No. 166: Deletes language proposed by the Senate which would have (1) removed the restriction on the use of locally-raised revenues to perform abortions in the District of Columbia while continuing the restriction on the use of Federal funds except in those cases where the mother's life is endangered, (2) allowed the death penalty in certain cases in the District of Columbia, and (3) required a study of early childhood education development programs in the District of Columbia.

Amendment No. 167: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number "313" insert: *312*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the Senate language which amends the statutory authority of the United States Capitol Preservation Commission to provide for the transfer of works of fine art, to clarify the intent of the authorizing legislation with respect to certain project activities, and to require an annual report. The conferees wish to point out that the improvement and preservation projects subject to the approval of the Committees on Appropriations encompass planning, surveys, designs and other pre-construction activities, as well as the

construction and installation phases of these projects.

Amendment No. 168: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number "314" insert: *313*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the Senate language which extends the jurisdiction of the Capitol Police to include certain parking spaces and contiguous areas.

Amendment No. 169: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number "315" insert: *314*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the Senate language which amends the authority of certain Senate leaders with respect to the appointment of consultants.

Amendment No. 170: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number "316" insert: *315*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the Senate language which provides for donating surplus Senate personal computer and related equipment and training to the Polish parliament, the result of a recommendation by a Congressional staff delegation established pursuant to S. Con. Res. 74 (October 26, 1989). Additionally, $1,500,000 is reappropriated from unexpended balances in the appropriation account of the Sergeant at Arms and Doorkeeper of the Senate.

Amendment No. 171: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 316. (a) Effective with the fiscal year ending September 30, 1990, and each fiscal year thereafter, subject to the approval of the Committee on Appropriations of the Senate, any unexpended and unobligated funds in the appropriation account for the "Secretary of the Senate" within the contingent fund of the Senate in the case of the Senate and, subject to the approval of the Committee on Appropriations of the House of Representatives, any unexpended and unobligated funds in any appropriation account disbursed by the Clerk of the House in the case of the House of Representatives, which have not been withdrawn in accordance with the paragraph under the heading "General Provisions" of Chapter XI of the Third Supplemental Appropriation Act, 1957 (2 U.S.C. 102a), shall be available for the expenses incurred, without regard to the fiscal year in which incurred, for the conservation, restoration, and replication or replacement, in whole or in part, of items of art, fine art, and historical items within the Senate wing of the United States Capitol, any Senate Office Building, or any room, corridor, or other space therein in the case of the Senate and for the conservation, restoration, and replication or replacement, in whole or in part, of items of art, fine art, and historical items within the House wing of the United States Capitol, any House Office Building, or any room, corridor, or other space therein or for other purposes as authorized by law in the case of the House of Representatives.*

*In the case of replication or replacement of such items, the funds available under this subsection shall be available for any such items previously contained within the Capitol, or an item historically accurate.*

*(b) All such items of art, fine art, or historical items referred it in subsection (a) shall be known as the "United States Senate Collection" in the case of the Senate and the "United States House of Representatives Collection" in the case of the House of Representatives.*

*(c) Disbursements for expenses incurred for the purposes related to the United States Senate Collection shall be made upon vouchers approved by the Chairman of the Senate Commission on Art or the Executive Secretary of the Senate Commission on Art in the case of the Senate and disbursements for expenses incurred for the purposes related to the United States House of Representatives Collection shall be made upon vouchers approved by the House Office Building Commission in the case of the House of Representatives.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement provides authority to use certain unexpended and unobligated funds within the contingent fund of the Senate for the conservation and restoration of items of art, as provided in the Senate bill and, in addition, confers similar authority for the House of Representatives, covering art restoration or any authorized expenditure, subject to the approval of the House Committee on Appropriations.

Amendment No. 172: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number "318" insert: *317*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have agreed to the Senate language which provides transfer authority within the Senate contingent fund.

Amendment No. 173: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate amended to read as follows:

In lieu of the section named in said amendment insert: *318*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment prohibits the expenditure or obligation of funds made available to the Department of the Treasury for the downgrading of job classifications or the contracting out of positions in the U.S. Mint Police Force or the Bureau of Engraving and Printing Police Force. It also prohibits the use of funds for any studies to determine the feasibility of contracting out such activities.

BROOME COUNTY, NEW YORK TERMINAL HANDLING SERVICES FACILITY

The conferees are aware of the actions of the U.S. Postal Service in establishing a terminal facility in Broome County, New York which is operated entirely by a private contractor. The conferees believe that legitimate questions have been raised about this situation and its ramifications from the continuation of universal public delivery of the mail, the sancity of the mail and any broader plans the U.S. Postal Service may have to privatize the Postal Service. The conferees believe that these matters should be reviewed by the appropriate legislative committees.

HOLLY SPRINGS, MISSISSIPPI POST OFFICE

House Report 100-498, the conference report accompanying the fiscal year 1988 Appropriations Act (Public Law 100-202), contained the following language:

HOLLY SPRINGS, MISSISSIPPI POSTAL SERVICE

The conferees direct the Postal Service to continue to provide full postal service to the people of Holly Springs proper including upgrading, remodeling, and improving the U.S. Post Office building at 110 North Memphis Street in Holly Springs, Mississippi. It is contemplated that a new building for use as a center for sorting mail will proceed as long as the present building and service is maintained at the main post office and present service is maintained.

That language was an explanation of the following provision of permanent law:

Funds made available to the United States Postal Service pursuant to section 2401(a) of title 39, United States Code, shall be used hereafter to continue full postal service to the people of Holly Springs proper, including upgrading, remodeling, and improving the United States Post Office building located at 110 North Memphis Street in Holly Springs, Mississippi.

(Public Law 100-202 and Public Law 100-440)

Under the agreement and pursuant to this permanent law, the United States Post Office building located at 110 North Memphis Street in Holly Springs, Mississippi, shall continue as the Post Office of Holly Springs, Mississippi, with present operations.

The center for sorting mail may be designated as a station.

Amendment No. 174: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

*SEC. 319. The Secretary of the Army is directed to execute a local cooperation agreement prior to July 1, 1990, for construction of a modification of the existing Gulfport Harbor project in Mississippi as authorized by the Supplemental Appropriations act, 1985, (Public Law 99-88), section 202(a) of the Water Resources Development Act of 1986 (Public Law 99-662), and section 4(n) of the Water Resources Development Act of 1988 (Public Law 100-676).*

*Within available funds, the Secretary of the Interior is authorized to obligate up to $12,000,000 to initiate safety of dams modifications at Mormon Island Auxiliary Dam (Folsom Dam and related facilities) of the Central Valley Project, California, authorized under Public Law 95-578, as amended, absent the transmission of the report de-*

*scribed in the proviso of section 5 of Public Law 95-578, as amended.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement directs the Secretary of the Army to execute a local cooperation agreement for the Gulfport Harbor, Mississippi, modification project by July 1, 1990, as proposed by the Senate. This provision was also included in H.R. 4828 which was introduced in the House of Representatives.

The conference agreement also, due to the drought situation in California, provides for dam safety work. As a result of the drought conditions in California, the Bureau of Reclamation has the opportunity to initiate dam safety work at the Mormon Island Auxiliary Dam that will result in significant cost savings compared to performing the work when the reservoir is at higher levels. Accordingly, the conferees have authorized the Bureau to initiate work, including solidification of the foundation of Mormon Island Auxiliary Dam, even though the dam safety report required by Section 5 of Public Law 95-578 has not yet been submitted to Congress.

SEC. 320

Amendment No. 175: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the first section number named in said amendment, insert: *320*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement includes the provision contained in the Senate amendment to the original Dire Emergency Supplemental and included in the House introduced bill (H.R. 4828) which repeals Sec. 614 of the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1990, and makes certain technical corrections to that Act and the Foreign Relations Authorization Act, FY 1990 and FY 1991.

COMMERCIAL ASPECTS OF U.S. FOREIGN ASSISTANCE

Amendment No. 176: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

*SEC. 321. COMMERCIAL ASPECTS OF UNITED STATES FOREIGN ASSISTANCE—(a). The Secretary of Commerce, after consulting with the Administrator of the Agency for International Development, the Secretary of Agriculture, the Secretary of Energy, the Secretary of Treasury, the Secretary of State, other appropriate agencies of the United States Government, and United States business organizations, shall conduct a study which examines and explores the foreign assistance programs currently engaged in by the United States Government and major international financing programs of the United States Government, through the Agency for International Development and other appropriate departments and agencies of the United States Government and explores mechanisms and ways by which the international economic competitiveness of the United States may be enhanced through such programs. In undertaking this study, the Secretary shall—*

*(1) examine the foreign assistance and major financing programs of Japan, West Germany, France, the United Kingdom, and such other international aid donors as the Secretary may designate, for the purpose of determining what mechanisms are in use to tie foreign assistance to, and advance the industrial and commercial interests of, the donor nations, in particular, the programs currently being engaged in and planned by such countries in the Eastern European countries of East Germany, Poland, Czechoslovakia, and Hungary; and*

*(2) determine, as far as possible, for each of fiscal years 1989 and 1990, and requested for fiscal year 1991, the dollar amounts and percentages of current United States programs which support United States business investment, exports, or other business-related activities, and shall compare that assessment with a similar assessment made for each of the other international aid donors examined by this study, on a region-by-region basis, with particular attention paid to the comparable efforts in the Eastern European countries referred to in paragraph (1).*

*(b) Not later than September 20, 1990, the Secretary of Commerce shall prepare and transmit to the Committees on Foreign Relations and Appropriations of the Senate and the Committees on Foreign Affairs and Appropriations of the House of Representatives, a report setting forth the findings of the study conducted under subsection (a).*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment added a general provision requiring the Secretary of Commerce to conduct a study of the foreign assistance programs of the United States in consultation with the heads of certain United States Government agencies and Departments, explore mechanisms by which the international economic competitiveness of the United States may be enhanced through such programs and report those findings to the Appropriations Committees and Foreign Affairs Committees by September 1, 1990. The House bill contained no similar provision.

The conference agreement retains the Senate provision but makes certain changes in the language, including the reporting date and the scope of the study to include major international financing programs of the United States Government.

The conferees are concerned that the Secretary of Commerce may not have sufficient time to complete the study and thoroughly comply with all its substantial requirements in the time allowed by the conference agreement. The conferees expect the appropriate officials of the Department to keep the Appropriations Committee informed of any problems in this regard and to work closely with the Committees to ensure delivery of a study that is both timely and responsive to the conference agreement.

Amendment No. 177: Deletes Senate language nullifying the provision that restricts obligation or expenditure of $29,000,000 of Air Force, Operation and Maintenance funds until not less than $7,000,000 is expended as settlement to Contract Number F29650-82-C-0201.

CHILDREN IN CAMBODIA

Amendment No. 178: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the first section number named in said amendment, insert: *322.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agreed to provide, as proposed by the Senate, up to $5,000,000 in fiscal year 1990 development assistance funds for assistance through international relief agencies to children within Cambodia. This provision was also included in the House introduced bill (H.R. 4828). None of the funds provided may be made available directly or indirectly for the Khmer Rouge.

While assistance is already provided to the civilian population under the protection of the non-communist resistance on the Thai-Cambodian border, this assistance is intended to address the desperate needs of children, in the part of Cambodia controlled by the government in Phnom Penh, whose access to international assistance has been severely restricted by the isolation of their country. The funds are to be provided only through international relief agencies operating in Cambodia.

The Department of State and the Agency for International Development are to report to the Committees on Appropriations by July 15, 1990 and again by October 15, 1990 on the implementation of this provision.

LEASED HELICOPTERS FOR COLOMBIA

Amendment No. 179: Deletes language proposed by the Senate relating to the leasing of Marine Corps helicopters for Colombia. The conferees are in general agreement with the purpose of the Senate amendment which provided for the lease of four helicopters to Colombia for its drug interdiction program, including training of Colombian personnel in the operation, maintenance, logistical support and development of those helicopters. However, the conferees agreed that the appropriate authority for such a program is Section 506(a) of the Foreign Assistance Act. The Act was amended in the fiscal year 1990 Foreign Assistance Appropriations Act so that the President is authorized to draw down defense articles and provide military education and training for activities relating to international narcotics control assistance. The conferees urge the administration to consider using this authority to aid Colombia drug interdiction programs.

LITHUANIA SENSE OF THE SENATE

Amendment No. 180: Deletes language proposed by the Senate concerning Lithuania. The Sense of the Senate language has been passed by the Senate, and following past practice the conferees have agreed that further action is not necessary.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1990 recommended by the Committee of Conference, with comparisons to the fiscal year 1990 budget estimates, and the House and Senate bills for 1990 follow:

| | |
|---|---|
| Budget estimates of new (obligational) authority, fiscal year 1990 | $1,699,194,400 |
| House bill, fiscal year 1990 | 615,674,000 |
| Senate bill, fiscal year 1990 | 827,985,400 |
| Conference agreement, fiscal year 1990 | 2,315,721,400 |
| Conference agreement compared with: | |
| Budget estimates of new (obligational) authority, fiscal year 1990 | +616,527,000 |

House bill, fiscal year 1990 ..... +1,700,047,400

## LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. BARTON of Texas (at the request of Mr. MICHEL) for today between the hours of 7 p.m. until tomorrow at 6 p.m., on account of a family medical emergency.

Mr. HAMMERSCHMIDT (at the request of Mr. MICHEL) for today on account of representing the President at the inauguration of President Lee Teng-Hui of the Republic of Taiwan.

Mr. KOLBE (at the request of Mr. MICHEL) for today from 3 p.m. on account of official business.

Mr. HUTTO (at the request of Mr. GEPHARDT) for today on account of official business.

## SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HEFLEY) to revise and extend their remarks and to include extraneous material:)

Mr. BURTON of Indiana, for 60 minutes, on May 22, 23, and 24.

Mr. LEACH of Iowa, for 60 minutes, today.

(The following Members (at the request of Mr. POSHARD) to revise and extend their remarks and include extraneous material:)

Mr. POSHARD, for 5 minutes, today.

Mr. MONTGOMERY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. HOCHBRUECKNER, for 5 minutes, on June 6.

Mr. WEISS, for 60 minutes each day, on June 5 and 6.

## EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DYMALLY, and to include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,972.

Mr. TORRES, prior to the vote on the Kostmayer amendment on H.R. 4636 in the Committee of the Whole today.

Mr. DENNY SMITH of Oregon, concerning his absence, immediately after vote on H.R. 4636, in House, today.

(The following Members (at the request of Mr. HEFLEY) and to include extraneous matter:)

Mr. LENT in two instances.
Mr. RHODES.
Mr. GINGRICH in two instances.
Mr. BLAZ.
Mr. BALLENGER.
Mr. GOSS.
Mr. LAGOMARSINO.
Mr. BURTON of Indiana in two instances.
Mr. SHUMWAY.
Mr. HENRY.
Mr. BUNNING.
Mr. GEKAS.
Mr. BAKER.
Mr. GOODLING.
Mr. MACHTLEY in 8 instances.
Mr. DREIER of California.

(The following Members (at the request of Mr. POSHARD) and to include extraneous matter:)

Mr. SABO.
Mr. YATRON.
Mr. SKELTON.
Mr. MILLER of California.
Mr. TORRICELLI in two instances.
Mr. ATKINS.
Mr. MRAZEK.
Mr. BONIOR.
Mr. FROST.
Mr. ROE in two instances.
Mr. LEHMAN of Florida.
Mr. STARK in two instances.
Mr. LANTOS.
Mr. MANTON in two instances.
Mr. WOLPE in three instances.
Mr. TRAFICANT.
Mr. KENNEDY.
Mr. LEVINE of California.
Mr. UDALL.

## ADJOURNMENT

Mr. LEACH of Iowa. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 58 minutes p.m.) the House adjourned until tomorrow, Wednesday, May 23, 1990, at 10 a.m.

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3220. A letter from the Assistant Secretary of State for Legislative Affairs, transmitting a copy of the original report of political contributions by Eugene L. Scassa, of Virginia, Ambassador Extraordinary and Plenipotentiary-designate to Belize, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

3221. A letter from the Administrator, Agency for International Development, transmitting the agencies annual report on competition for fiscal year 1989, pursuant to 41 U.S.C. 419; to the Committee on Government Operations.

3222. A letter from the Chairman, Federal Election Commission, transmitting the Commission's inspector general semiannual report for the period October 1, 1989, through March 31, 1990, pursuant to Public Law 95-452, section 8E(h)(2) (102 Stat. 2525); to the Committee on Government Operations.

3223. A letter from the Chief Justice, Supreme Court of the United States, transmitting a copy of the Report of the Proceedings of the Judicial Conference of the United States, pursuant to 28 U.S.C. 331; to the Committee on the Judiciary.

3224. A letter from the Secretary, Department of Transportation, transmitting a copy of the National Transportation Strategic Planning Study, pursuant to 49 U.S.C. 308 nt.; to the Committee on Public Works and Transportation.

3225. A letter from the Secretary of Agriculture, transmitting two draft bills, the Plant Protection Act, and the Animal Health Protection Act; jointly, to the Committees on Agriculture, the Judiciary, Ways and Means, Foreign Affairs, Post Office of Civil Service, and Energy and Commerce.

3226. A letter from the Director, Office of National Drug Control Policy, transmitting a draft of proposed legislation to implement the national drug control strategy; jointly,

to the Committees on the Judiciary; Energy and Commerce; Public Works and Transportation; Merchant Marine and Fisheries; Foreign Affairs; Banking, Finance and Urban Affairs; Ways and Means; and Post Office and Civil Service.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XXIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee of conference. Conference report on H.R. 4404 (Rept. 101-493). Ordered to be printed.

Mr. BONIOR: Committee on Rules. House Resolution 399. Resolution providing for further consideration of H.R. 3030, a bill to amend the Clean Air Act to provide for the attainment and maintenance of the national ambient air quality standards, the control of toxic air pollutants, the prevention of acid deposition, and other improvements in the quality of the Nation's air (Rept. 101-494). Referred to the House Calendar.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SCHEUER (for himself, Mr. ROE, Ms. SCHNEIDER, Mr. WALKER, Mr. BROWN of California, Mr. WOLPE, Mrs. LLOYD, Mr. VALENTINE, Mr. HAMILTON, Mr. NOWAK, Mr. PRICE, Mr. TANNER, Mr. BROWDER, Mr. BOEHLERT, Mr. MORRISON of Washington, Mr. HENRY, Mr. SMITH of Texas, Mrs. MORELLA, Mr. SHAYS, Mr. TRAFICANT, Mr. TORRICELLI, Mr. MINETA, Mr. MCCURDY, Mr. STALLINGS, and Mr. RITTER):

H.R. 4873. A bill to authorize appropriations for environmental research, development, and demonstration for fiscal years 1991, 1992, and 1993, and for other purposes; to the Committee on Science, Space and Technology.

By Mr. WAXMAN:

H.R. 4874. A bill to amend the Public Health Service Act to establish a program of grants to provide preventive health services with respect to acquired immune deficiency syndrome, and for other purposes; to the Committee on Energy and Commerce.

By Mr. BENNETT:

H.R. 4875. A bill to amend the Federal Water Pollution Control Act to make the lower St. John's River, FL, eligible for priority consideration under the National Esturary Program; jointly, to the Committees on Public Works and Transporation and Merchant Marine and Fisheries.

By. Mr. LENT:

H.R. 4876. A bill to amend the Ocean Dumping Ban Act of 188 to delay the effective date of the prohibition on the ocean dumping of sewage sludge; to the Committee on Merchant Marine and Fisheies.

By Mr. PICKLE:

H.R. 4877. A bill to redesignate the Austin Dam located near Austin, TX, as the "Tom Miller Dam"; to the Committee on Interior and Insular Affairs.

By Mr. SARPALIUS:

H.R. 4878. A bill to establish the Lake Meredith National Recreation Area in the State of Texas, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. SCHUMER (for himself, Mr. LEACH of Iowa, Mr. LEHMAN of California, Mr. PRICE, Mr. ROTH, and Mr. VENTO):

H.R. 4879. A bill to require the President to submit quarterly reports through fiscal year 1993 on the estimated cost of resolving the savings and loan crisis and the estimated net new funding which will be required to meet such costs; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BENNETT:

H.R. 4880. A bill to extend veterans' preference on civil service examinations to members of the Armed Forces who are honorably discharged, pursuant to any reduction in force, after having served on active duty for at least 6 consecutive years; to the Committee on Post Office and Civil Service.

By Mr. JACOBS:

H.R. 4881. A bill to suspend temporarily the duty of certain composite diagnostic or laboratory reagents; to the Committee on Ways and Means.

By Mr. NAGLE:

H.R. 4882. A bill to establish a multilateral process of political and economic reform for Eastern Europe and the Soviet Union, to remove various trade restrictions, to encourage peaceful resolutions of regional conflicts, and to set a goal of a 50-percent reduction in United States military spending; jointly, to the Committees on Foreign Affairs; Ways and Means; Banking, Finance and Urban Affairs; Armed Services; and Rules.

By Mr. SCHUETTE:

H.R. 4883. A bill to amend section 922 of title 18, United States Code, to require that firearms dealers call a national hotline for a background check before transfer of firearms, and for other purposes; jointly, to the Committee on the Judiciary and Public Works and Transportation.

By Mr. DANNEMEYER:

H.J. Res. 573. Joint resolution to designate the period commencing on June 16, 1990, and ending on June 27, 1990, as "Food Science and Technology Week"; to the Committee on Post Office and Civil Service.

By Mr. MYERS of Indiana:

H.J. Res. 574. Joint resolution designating June 3-9, 1990, as a "Week for the National Observance of the 50th Anniversary of World War II"; to the Committee on Post Office and Civil Service.

By Mr. SANGMEISTER (for himself, Mr. MONTGOMERY, Mr. HARRIS, Mr. PAXON, Mr. PARKER, Mr. BURTON, of Indiana, Mrs. PATTERSON, Mr. EVANS, Mr. JONTZ, Mr. SMITH of New Jersey, Mr. BILIRAKIS, Mr. STAGGERS, Mr. GEREN, Mr. STUMP, Mr. MCEWEN, and Mr. MORRISON of Connecticut):

H.J. Res. 575. Joint resolution to designate June 25, 1990, as "Korean War Remembrance Day"; to the Committee on Post Office and Civil Service.

By Mr. LAGOMARSINO (for himself, Mr. SOLARZ, Mrs. SAIKI, Mr. BLAZ, and Mr. FALEOMAVAEGA):

H. Res. 398. Resolution urging United States ratification of the Convention for the Protection of the Natural Resources and Environment of the South Pacific Region; to the Committee on Foreign Affairs.

## MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

393. By the SPEAKER: Memorial of the House of Representatives of the State of Illinois, relative to Federal crop insurance; to the Committee on Agriculture.

394. Also, memorial of the House of Representatives of the State of Illinois, relative to savings and loans associations; to the Committee on Banking, Finance and Urban Affairs.

395. Also, memorial of the House of Representatives of the State of Illinois, relative to a White House Conference on Aging in 1991; to the Committee on Education and Labor.

396. Also, memorial of the House of Representatives of the State of Illinois, relative to Lithuania; to the Committee on Foreign Affairs.

397. Also, memorial of the Legislature of the State of Alaska, relative to persons immigrating to and requesting asylum in the United States; to the Committee on the Judiciary.

398. Also, memorial of the Senate of the State of Hawaii, relative to natural disaster reduction; to the Committee on Post Office and Civil Service.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mrs. LOWEY of New York:

H.R. 4884. A bill for the relief of Leore Shoshana Shemesh; to the Committee on the Judiciary.

By Mr. MCMILLAN of North Carolina:

H.R. 4885. A bill for the relief of Leslie Leigh Moore; to the Committee on the Judiciary.

## ADDITIONAL COSPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 222: Mr. JOHNSTON of Florida.

H.R. 446: Mr. HANCOCK and Mr. NIELSON of Utah.

H.R. 467: Mr. GLICKMAN.

H.R. 539: Mr. KOLTER and Mr. MARKEY.

H.R. 1227: Mr. OLIN, Mr. SCHAEFER, Mr. GINGRICH, Mr. MOORHEAD, Mr. LEATH of Texas, Mr. MCDERMOTT, Mr. GUNDERSON, Mr. CRANE, Mr. DOUGLAS, Mr. AUCOIN, and Mr. HAYES of Illinois.

H.R. 1287: Mr. ROHRABACHER.

H.R. 1317: Mr. JENKINS, Mr. DURBIN, Mr. LEWIS of California, Mr. TAUZIN, Mr. DREIER of California, Mr. LOWERY of California, Mr. COSTELLO, Mr. SANGMEISTER, Mr. BAKER, Mr. ROBERTS, Mr. DORNAN of California, Mr. MCCRERY, Mrs. MEYERS of Kansas, and Mr. GALLEGLY.

H.R. 1582: Mr. STARK, Mr. FOGLIETTA, and Mr. YATES.

H.R. 1875: Mr. ROWLAND of Georgia and Mr. RAVENEL.

H.R. 2121: Mr. GOSS, Mr. MILLER of Washington, and Mr. MACHTLEY.

H.R. 2228: Mr. SOLOMON.

H.R. 2353: Mr. DEFAZIO and Mr. MORRISON of Washington.

H.R. 2380: Mr. SCHAEFER.

H.R. 2418: Mr. DANNEMEYER.

H.R. 2460: Mr. JENKINS, Mr. TAYLOR, and Mr. NELSON of Florida.

H.R. 2776: Mr. DOWNEY and Mr. BRYANT.

H.R. 2852: Mr. BROWN of California.

H.R. 2951: Mr. LEVIN of Michigan.

H.R. 2952: Mr. LEVIN of Michigan.

H.R. 3099: Mr. BILIRAKIS, Mr. PALLONE, and Mr. POSHARD.

H.R. 3267: Mr. NEAL of North Carolina.

H.R. 3289: Mr. EDWARDS of Oklahoma, Mr. DENNY F. SMITH, and Mr. KOLBE.

H.R. 3421: Mr. CONDIT.

H.R. 3500: Mr. BRENNAN.

H.R. 3643: Mr. ROHRABACHER.

H.R. 3732: Mr. SHUSTER, Mr. NEAL of Massachusetts, Mr. MURPHY, Mr. DURBIN, and Mr. DYMALLY.

H.R. 3859: Mr. BUSTAMANTE.

H.R. 3880: Mr. TOWNS.

H.R. 3903: Mrs. ROUKEMA.

H.R. 3909: Mr. ESPY and Mr. POSHARD.

H.R. 3924: Mr. GALLEGLY, Mr. HYDE, and Mr. BUNNING.

H.R. 3958: Mr. WATKINS, Mr. MCGRATH, Mr. LANCASTER, Mr. SMITH of New Jersey, Mrs. VUCANOVICH, Mr. CLARKE, and Mr. SCHUETTE.

H.R. 3992: Mr. VOLKMER, Mr. MRAZEK, Mrs. UNSOELD, Mr. MAVROULES, and Mr. HOCHBRUECKNER.

H.R. 4026: Mr. JONTZ, Mr. KOLTER, and Mr. PARKER.

H.R. 4121: Mr. RITTER and Mr. RAVENEL.

H.R. 4138: Mr. SMITH of Florida.

H.R. 4212: Mr. KANJORSKI, Mr. HORTON, Mr. EMERSON, Mr. TOWNS, Mr. FIELDS, and Mr. DEFAZIO.

H.R. 4254: Mr. PRICE.

H.R. 4261: Mr. ARMEY.

H.R. 4287: Mr. FAUNTROY, Mr. HARRIS, Mr. ROWLAND of Connecticut, Mr. WOLPE, Mrs. MARTIN of Illinois, Mr. PORTER, Mr. PARKER, Mr. FAWELL, Mr. CHAPMAN, Mr. MADIGAN, Mr. SCHUETTE, Mr. DICKS, Mr. MCDADE, Mr. MYERS of Indiana, Mr. ERDREICH, and Mr. BURTON of Indiana.

H.R. 4324: Mr. LEVINE of California, Mr. TORRES, and Mr. OWENS of Utah.

H.R. 4329: Mr. PAYNE of New Jersey, Mr. RAVENEL, Mr. MCHUGH, Mr. PAYNE of Virginia, and Mr. HANCOCK.

H.R. 4379: Mr. LEVINE of California, Ms. PELOSI, Mr. WOLPE, and Mr. WILLIAMS.

H.R. 4391: Mr. SISISKY.

H.R. 4424: Mr. WEBER, Mr. BEREUTER, Mr. ROBERTS, Mr. MOORHEAD, Mr. DANNEMEYER, Mr. MADIGAN, Mr. MCCANDLESS, Mr. HASTERT, Mr. PETRI, Mr. CRAIG, and Mr. LOWERY of California.

## DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 4641A: Mr. HYDE.

## PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

176. By the SPEAKER: Petition of city of Sweetwater, FL, relative to thoroughbred racing in Florida; to the Committee on Energy and Commerce.

177. Also, petition of Dr. Paul Baron Neuman of Kara Bagh, Sydney, Australia, relative to climatic and environmental changes worldwide; jointly, to the Committees on Agriculture and Energy and Commerce.

# SENATE—*Tuesday, May 22, 1990*

*(Legislative day of Wednesday, April 18, 1990)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

## PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*For I know the plans I have for you, says the Lord, plans for welfare and not for evil, to give you a future and a hope.*—Jeremiah 29:11 RSV.

Gracious Father, God of Abraham, Isaac and Israel, You made that beautiful promise to Your people Israel exiled in Babylon. We accept that word for ourselves. Thank Thee, Lord, that You are not only a transcendent God; You are imminent. You are in touch with the world You created. You are the Lord of history and the Ruler of the nations. Rule in our Nation, in our hearts and homes. Work Your perfect plan, in spite of us if necessary.

"Thy kingdom come, Thy will be done on earth as it is in Heaven." In Jesus' name. Amen.

## RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the order, the majority leader is recognized.

## THE JOURNAL

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

## SCHEDULE

Mr. MITCHELL. Mr. President, following the time for the two leaders today, there will be a period for morning business until 10:30 a.m., under the control of Senator GORE, for the purpose of statements on the subject of global warming. Following the global warming statements, there will be an additional period for morning business, not to extend beyond 11 a.m., with Senators permitted to speak therein for up to 5 minutes each. At 11 this morning the Senate will resume consideration of S. 1970, the omnibus crime bill. Between the hours of 12:30 p.m. and 2:15 p.m. today, the Senate will stand in recess to accommodate the respective party conference luncheons.

Consideration of S. 1970 will resume at 2:15 p.m., and it is anticipated that rollcall votes will occur during today's session relative to this measure.

## CHINESE LEADERSHIP INTERVIEW

Mr. MITCHELL. Mr. President, last Friday I said President Bush should not renew most-favored-nation trading status for China at this time. I made that case based on the dismal record of the Chinese Government with respect to human rights.

In an interview aired on Friday evening, the General Secretary of the Communist Party in China inadvertently made the same case himself. The Secretary characterized Western reaction to the massacre of defenseless people in Beijing last summer as, and I quote him, "much ado about nothing."

He did not mean to strengthen the argument in this country against renewing most-favored-nation trading status with his country, but that seems to me the only decent response to his words. The Secretary said he does not "have any regret about the way in which we dealt with the events which took place last year in Beijing." No regrets.

It is evident that the Secretary is not alone. None of the Chinese leadership has expressed any regret about calling out tanks against unarmed people. The challenge to us as Members of the U.S. Senate is whether we will endorse that cynical view or reject it. Will we endorse that profoundly mistaken view of America or will we reject it, and emphasize that, for Americans, concerns about human freedom, justice, and human rights lie at the very core of our Nation and ourselves?

I urge my colleagues to give serious thought to this issue. The Secretary characterized the American reaction to the Tiananmen massacre as "some kind of misunderstanding, lack of understanding."

Did the Senators misunderstand what happened at Tiananmen Square? Is that what occurred last year? Will we endorse this Chinese Communist misstatement of our views? Should we, by now giving the Chinese Government what it wants, tacitly adopt the Chinese Government's casual dismissal of our concerns?

I say we should not. We should not because it is contrary to our principles, contrary to American interests, and wrong.

How can any leader call the cold blooded murder of nonviolent noncriminal citizens of his nation "much ado about nothing?" How can any leader reflect on the sight of armored tanks crushing defenseless people and conclude that foreign reaction to such a crime is exaggerated?

The leaders who decided that their own hold on power, their own privileges were worth a few hundred young lives deserve some response from the world community, especially from the United States. Our Nation's future lies with the people of China, not the cynical leaders who think they can paper over an outrage, a massacre of their own citizens, with words.

It is for that reason that I urge President Bush to reconsider his mistaken and failed policy toward China. By its actions, the Bush administration is sowing the seeds of disaster with respect to the next generation of leaders in China.

If there is one thing we Americans should know, it is that all governments, good and bad alike, eventually pass from the scene. What endures are the fundamental values of the society. Like other despots before them, the Chinese Government of today will pass from the scene in time. The question and the challenge for the Senate is whether we will continue to support a regime which caused the deaths of many of their own people, and call it "much ado about nothing."

Does the U.S. Senate agree that the massacre at Tiananmen Square was much ado about nothing? We will soon find out.

Mr. President, I yield the floor.

## RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. Without objection, the remainder of the time for the two leaders will be reserved.

## MORNING BUSINESS

The PRESIDENT pro tempore. Under the order there will be a period for the transaction of morning business until the hour of 11 o'clock with the Senator from Tennessee [Mr. GORE] controlling the first hour.

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

## THE MAJORITY LEADER'S SPEECH ON CHINA

Mr. GORE. Mr. President, in response to the very eloquent statement just made by the majority leader, I agree with the sentiments he has expressed. I wish to recount a brief anecdote related to me by a friend from Jackson, TN, a businessman who happens to be a Republican and happened to be visiting in Beijing at the time of the massacre.

At midnight, before the massacre, he was in Tiananmen Square, taking photographs, visiting with the young students there. He took photographs of the statue the young students called the "Goddess of Democracy" which so strikingly resembled the Statue of Liberty in New York harbor. He pointed, in his photograph, to something I had not noticed before. There were loudspeakers around the base of that statue. He said, "Senator, you will never believe what they were playing over those loudspeakers at midnight, in English." It was the old hymn "A mighty fortress is our God, a bulwark never failing."

He said that he and his friends standing there in Tiananmen Square were amazed to hear those familiar words coming across the square; and those sounds, mixed with the sight of the inspiring statue and the enthusiasm for democracy so evident in the faces and demeanor of the young men and women in Tiananmen Square, together, produced emotions inside my friend that, he said, are absolutely unforgetable.

Then a few hours later when the massacre began, he was, of course, moved to tears by the tragedy. And I was recalling his words as I listened to the eloquent statement by the majority leader, and I wished to commend the majority leader for his statement and share that anecdote with my colleagues here.

## INTERPARLIAMENTARY CONFERENCE ON THE GLOBAL ENVIRONMENT

Mr. GORE. Mr. President, I had originally asked for this time in order to present to the Senate the results of the Interparliamentary Conference on the Global Environment. Six of my colleagues from both sides of the aisle joined in organizing and hosting this conference.

We met last week to review the final recommendations of the conference and decided to come to the floor at a convenient time this week to present those recommendations. But after this time was scheduled, several committees scheduled markups this morning. It became inconvenient for several of the Senators who are members of the host delegation to participate this morning. As a result, we will choose another time convenient for the leaders and for the Senate to present our findings and recommendations in detail.

I would like to briefly preview that presentation, and then I would like to use the remainder of the time I will take this morning to discuss some legislation entitled the Ozone Protection Funding Act of 1990, which I will be introducing today.

First of all, Mr. President, I wish to thank the distinguished Presiding Officer, the President pro tempore of the Senate, for delivering the official welcome at the interparliamentary conference. When parliamentarians from 42 nations gathered here, including the counterparts of the President pro tempore of the Senate from 6 of those nations, we had quite a gathering and quite a dialog resulting in a set of consensus recommendations in seven areas: Global warming, the protection of the stratospheric ozone layer, deforestation and desertification, population policy, the oceans and estuaries of the Earth, the problem of sustainable development, and the protection of living species against the loss of what is called biodiversity.

It marked the first time that nations in what we refer to as the Third World or the underdeveloped world signed on to recommendations to lower the emissions of greenhouse gases in the atmosphere. Indeed, we were able to agree—parliamentarians from all nations—on a rather ambitious goal of a 50-percent reduction in greenhouse gas emissions by the year 2010. Not all of that, of course, is from $CO_2$. Only 20 percent in the illustrative set of reductions that we discussed would be from $CO_2$. Much of the rest would be from chlorofluorocarbons, which I am going to discuss in more detail in a moment, and from methane and the other greenhouse gases which are not quite as well-known as $CO_2$ as the cause of the problem.

In any event, on a later occasion, I will present, along with my colleagues who participated in cohosting this conference, the full recommendations from the conference.

The PRESIDENT pro tempore. The Senator from Tennessee is recognized.

Mr. GORE. I thank the Chair.

(The remarks of Mr. GORE pertaining to the introduction of S. 2666 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. GORE. Thank you, Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. KOHL). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LIEBERMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ROMANIA'S ELECTION

Mr. LIEBERMAN. Mr. President, I returned May 21 from a remarkable experience in which I served as coleader of an international delegation of observers to the elections that were held on Sunday, May 20. This delegation, though composed of people from 19 countries, was actually sponsored by the Democratic Institute for International Affairs and the Republican Institute for International Affairs of the United States of America, funded primarily with grants from the National Endowment for Democracy.

Mr. President, I wanted to take this opportunity to briefly report to my colleagues on the events leading up to and surrounding this historic election that occurred in Romania this past Sunday.

May I say first, so far as the Congress and the two major American political parties which made this delegation possible, in my opinion, it was an act of service. We were welcomed warmly by all Romanians whom we saw, and not only governmental and election officials. People who were on the streets or waiting to vote were surprisingly familiar with the presence of international observers and were grateful for that presence. They said to us quite explicitly that they thought our presence would make the prospects of a truly free and fair election more likely.

Clearly, the presence of a 60-person delegation from 19 countries was an expression of enthusiasm from outside of Romania for the revolution that occurred in December of last year.

Mr. President, people have asked and will ask, do I think the elections were free and fair or were they fraudulent. My answer is that the truth lies somewhere in between. The elections were not totally free and fair as we in Western democracies would define the terms of freedom and fairness. There was some fraud. But in my opinion, the fraud was not sufficient to affect the outcome of the election.

I think in making these comments we have to appreciate the context in which these elections occurred. In fact, it was a miracle that on Sunday, May 20, elections of any kind occurred in Romania when one considers the history of that country.

For me, the two most powerful impressions of this trip were the yearning for and excitement about democracy that I felt. I had an even greater sense, after talking to people and seeing the country, of how truly horrible and insane were the years of the Ceausescu dictatorship.

I think we saw in Romania what happens when governmental power, is totally unchecked. What you have is rule by the whim of an individual, unchecked by anyone.

The relics of this despotism are still there to be seen. They are there to be seen physically in an orphanage that I visited loaded with children, unwanted children, children whose parents could not care for them as a result of the policy by Ceausescu to increase the population of Romania by denying the Romanians, not only the right to legal abortion, but the right to legal birth control. You can see it in the extraordinary wasteful construction of a palace, literally a 1,000-room palace, about 80 or 90 percent finished, at a cost of billions of dollars, while the people of his country, during this decade, were sinking further and further into despair. In fact, they have the lowest standard of living in Europe today.

You can see it in the apartments that he decided to build along the road from the international airport in Bucharest, which in many ways is like a Hollywood movie front. He wanted visitors to not see the traditional Romanian village homes but something modern. There are apartments built so quickly that they have no running water and the plumbing is outside of them.

You can see it in the enormous environmental degradation that has occurred with no regard for the impact of their actions on the quality of their air, their water, or their health. You can in another sense feel it in the fear that still exists. After all, this is only 5 months after Ceausescu was overthrown and executed, after 25 years of ruling over a state-controlled, security police-controlled environment.

Mr. President, in that context, the very fact that elections occurred, as I have said, was a miracle, and perhaps that context explains why the elections which occurred were not perfect. Unfortunately, in the months after the revolution, some of those who were most centrally involved in the revolution have become disaffected. The students, who were a critical component in the revolution in Bucharest in 1989, are now protesting in University Square in Bucharest. The Hungarian population, an abused minority under Ceausescu, which viewed the coming of the revolution with hope now is disaffected from the ruling party. So, unfortunately, some of the revolutionary groups have become disenchanted. But still a campaign occurred, political parties were formed, and an election was held.

People have asked if the election was fair; did he really win it. I would say that there was fraud by some who supported Iliescu. Nonetheless, he is, in fact, a very popular man and, in part, he is a popular man because he is charismatic. He was anti-Ceausescu, and he has used his incumbency very well.

I think it is important for the American people to understand that as they react to this election. In the 5 months since he took office after the revolution, President Iliescu has, for instance, told the miners that they no longer have to work 7 days a week in the mines but can work 5 days. He said to the peasants, who have not owned any land, you can now own this small piece of land and enjoy profits from the produce that you develop on that land. He has said to retirees, I will raise your pensions. In fact, he has raised their pensions. He has effectively only raised them from $20 a month to $30 a month, but that is 50 percent. I can hear the response of the elderly if the President raised Social Security by 50 percent.

President Iliescu has taken food and consumer goods, which Ceausescu was exporting as a way of trying to eliminate the foreign debt of Romania, and put them back on the shelves where the Romanian people for the first time in years have had the opportunity to at least buy them. So he has enjoyed some popularity.

Is there political freedom? There is freedom of speech, certainly. There is a form of freedom of press. Perhaps the way in which freedom of the press is exercised explains how far Romania has yet to go. Before the revolution, there were 60 newspapers in the country and they were all controlled by Ceausescu and the Government security police. Today there are more than 1,000 newspapers, but in Romania there is really only one significant publishing house. It is controlled by the Government, as it was before, so that all of the opposition newspapers have to go to the Government publishing house to be printed, and that naturally led to accusations by the opposition parties and opposition papers that they were not being allowed to print enough newspapers, that the newspaper circulation system, which also is controlled by the Government, was not fairly distributing their newspapers.

So that while there is freedom of press, it is not freedom of press as we know it.

There are allegations by the opposition party that there were acts of harassment and violence against two of the Presidential candidates and several of the campaign workers.

We could not conclude in our observer delegation that, as has been suggested by the opposition parties, the Government controlled party, the National Salvation Front, was directly responsible for those acts of violence. But we did conclude that President Iliescu and those around him spent too much time explaining those acts of violence as natural occurrences in the first election after dictatorship, and not enough time condemning those acts of violence. In other words, they did not contribute adequately to the kind of environment that would have discouraged the intimidation that occurred.

The most significant, and I thought most fervent complaints that we heard, were about what happened in the preelection period leading up to election day. I concluded that there was not equal access and equal opportunity for all the candidates. Clearly, the National Salvation Front, the incumbent candidate, Iliescu, had an enormous opportunity to get his message out. In fact, there were whole sections of Romania where the revolution really has not come, where the local officials who controlled under Ceausescu remain in control today, where the opposition parties did not have the personnel nor the courage in some cases to actually enter the election.

It was the natural inclination of those who were in power, I think, to continue to favor the establishment, and Mr. Iliescu in that sense was the closest thing to an establishment candidate. In many ways, his victory can be seen as an expression by the people of Romania for stability. They are grateful for Ceausescu's end, but uncertain about the future. They wanted someone who would offer them a certain amount of stability.

On election day, there was tremendous enthusiasm, long lines at the polls, people excited about voting, willing to wait to vote, proud of what had happened. And yet, we did note throughout the country a certain amount of what we called fraud, and some of it, the kind of thing that sometimes happens in the United States, happened a lot in Romania on Sunday.

With local officials assisting voters in the voting booths, there was fear naturally arising about whether they were controlling their votes. In some cases, these were exceptions, extreme cases in which we saw actual ballot stuffing.

In another—this may express the desire of a lot of voters here in America sometimes—there was an instance where the voters were standing in line at a polling place and became so angry with the election officials about the delays that they chased them out of the voting headquarters. Then they went ahead and voted themselves for about an hour until the local police came back and restored their position.

But I would say again, by Western standards, there was some fraud on election day, but not enough to have altered the outcome. I think to judge the election we have to judge it as what it was, which was an election that occurred 5 months after a revolution from the most Stalinist despot that ruled in Eastern Europe; also, an interim election, an election that will form a constituent assembly, that must adopt a new constitution within

18 months and then hold new elections thereafter.

I think if observers return in 18 months or 2 years to observe the next round of elections, and find the fraud that we found and the unequal access that we found leading up to this election, they will have a lot more reason to condemn what happens than we did. I think we want to be in the position of criticizing, but also noting the remarkable strides forward that the Romanian Government has made. It seems to me that we have an opportunity within Romania.

I believe we have an opportunity in Romania to do what we are trying to do throughout Eastern Europe, which is to support the forces of democracy as a way to reduce the security threat to ourselves and to our allies in Western Europe.

We have an opportunity to support the development of market economies in these Eastern European countries, including Romania, as a source of trade and business for America itself. I think all of those factors are relevant as we approach the situation in Romania. Its economy is probably behind those of Hungary, Czechoslovakia, and Poland. Its political system is behind those countries. Yet there is an extraordinary opportunity for the principles of democracy and for American business, as well.

I conclude, based on what we have seen, that not enough has occurred in Romania to justify enormous aid or permanent extension of most-favored-nation status. But enough has occurred to offer targeted aid, certainly humanitarian aid for those babies in the orphanages throughout the country; and also the kind of training and entrepreneurship and the development of the market economy that we need; and particularly the extension of most-favored-nation status, but only for a year. Successive years would be conditional on the movement forward of democracy; the implementation of a truly free press; the opportunity for the political opposition to have equal opportunity to get their message across and get organized; and the development of a market economy.

Mr. President, I think that with that kind of support and pressure from the world, the newly elected leadership of Romania will have the opportunity to give to the people of Romania the freedom and improved standard of living that they have for so long desired and deeply deserve.

Mr. President, I thank my colleagues for giving me this time.

I yield the floor.

Mr. GRASSLEY addressed the Chair.

The PRESIDING OFFICER. The Chair recognizes the Senator from Iowa [Mr. GRASSLEY].

Mr. GRASSLEY. Mr. President, I ask unanimous consent to speak for 10 minutes, and I also ask unanimous consent to speak beyond that if no other Member seeks recognition.

The PRESIDING OFFICER. Without objection, it is so ordered.

## IN SUPPORT OF THE VIOLENT CRIME CONTROL AND CRIMINAL PROCEDURES REFORM ACT

Mr. GRASSLEY. Mr. President, as a cosponsor of the Violent Crime Control and Criminal Procedures Reform Act, I rise to strongly support its passage and to urge my colleagues to do the same.

Authored by my distinguished colleague and ranking member of the Judiciary Committee, Senator THURMOND, this substitute is the one, true, meaningful, and only real crime control bill the Senate has before it at this time.

Our debate today is really about how our society is to maintain both its freedom and its civility.

Mr. President, we cherish our freedoms, both as individuals, and as a nation.

Fighting out from under the yoke of an imperial power, this young colonial nation has grown to be the world's bulwark insuring domestic tranquility, promoting the general welfare, and securing the blessings of liberty for over 200 years.

Today, we all are heartened by the peoples of Eastern and central Europe who are emerging from a half century of devastating conflict and the stifling oppression of authoritarian occupation.

Longing for the freedoms we take for granted, the peoples of Eastern and central Europe have looked to the United States and our Founding Fathers as their guide and inspiration.

I trust the fruits of their efforts will meet their aspirations; and of course some of the legislation we are debating on crime reform has something to do with this.

Mr. President, the freedoms we enjoy are not limited to being protected from an oppressive form of government.

Among its many guarantees, the Constitution guarantees that Americans will enjoy the freedoms of domestic tranquility and the protection afforded the general welfare.

It is idealistic to believe that domestic tranquility includes a reasonable expectation that people will respect each others privacy, or that people will be civil to one another, or that people will just plain "leave each other alone."

However, I believe the threshold of the guarantee of domestic tranquility does at least include the right to be free from being a victim of violent criminal activity.

As elected officials, we take an oath to uphold the Constitution, which is our supreme law of the land. Consequently, the welfare of the people must always be our supreme law. The constitutional mandates, and the very survival of our society, depend upon a host of resources. Foremost among these resources are law enforcement organizations at every level, of course, operating in a professional manner.

These organizations, in turn, depend upon sufficient training, tools, and resources, including laws that can be equally enforced, to fulfill their pledge to protect the public safety.

The Violent Crime Control and Criminal Procedures Reform Act is a direct, forceful, and responsible package that will provide law enforcement personnel at every level with overdue statutory resources.

The Department of Justice has written that the adoption of the Violent Crime Control Act "would be a fundamental contribution both toward enhancing the public's security against crime and improving the effectiveness of the Federal criminal justice system."

I believe this bill will help us to fulfill our constitutional obligation to protect the rights of the citizens of this great Nation, to guard their freedoms, and to ensure their domestic tranquillity, by protecting them from those who have no regard for the law at all.

I believe that this is the least we can do for those who are on the front line of the fight against crime and those who lay their lives on the line every day against the thugs who trample upon the peace and tranquillity of what should be a law-abiding society.

The Thurmond substitute contains several key provisions:

Title I restores a fair and enforceable Federal death penalty for crimes of murder, treason, and espionage.

Title II curbs the abuse of Federal habeas corpus civil procedures that have caused a backlog in the Federal courts and that have hampered the implementation of valid State criminal sentences, including valid State death penalties.

Title II provides that State adjudications will receive deference in the Federal proceedings. It also places reasonable time limits on State prisoners to make habeas corpus applications to the Federal system.

Title III creates a general good faith exception to the judge-made exclusionary rule for cases in which Federal law enforcement officers acted in an objective and reasonable, or let me say good faith, belief that their conduct was consistent with the Constitution's fourth amendment guarantee against unreasonable searches and seizures.

Title IV of the Thurmond bill enhances penalties for serious firearms offenses.

Finally, title V requires drug testing for Federal offenders on postconviction release, including probation, parole, and postimprisonment supervised release.

The death penalty provision in the Thurmond substitute restores an effective, fair, workable, and constitutional Federal death penalty for the following crimes: Treason; espionage; murder; certain crimes involving explosives; the destroying of trains; mailing injurious articles; air piracy in which death results; certain attempts to kill the President; murder by a Federal prisoner serving a life term; hostage-taking results in death; murder for hire; murder in the aid of racketeering; and, of course, a most important decision that Congress made last year, the crime of genocide.

In contrast, the death penalty provisions offered by the Senator from Delaware in his legislative proposal will effectively abolish not only the Federal death penalty, but also the death penalty in those States that presently have a death penalty statute.

Mr. President, by an overwhelming majority, the American public supports the imposition of capital punishment. The American people are usually out in front of politicians on issues like this, issues that matter most, issues of basic fairness, equality, and true justice.

As for the ultimate criminal sanction, which, of course, is the death penalty, the American people are not out to fill some psychological blood lust. However, they do know that when it comes to heinous, outrageous, and abominable criminal acts, the death penalty is necessary, appropriate, and in these circumstances, the only just punishment. To attach a lesser sanction against such criminal acts would, in my view, undermine our system of justice and its ability to deter crime.

Worse, the lack of the capital sentencing option, which would be the result if the provision of the Senator from Delaware is adopted, is an abdication of one of the most fundamental duties of our Government: The protection of the people.

To advocate the use of society's ultimate criminal sanction is not something that I take lightly. But the Constitution permits us the option to end a convicted criminal's life if certain prescribed procedures are followed, including appropriate, as well as constitutional, due process procedural safeguards, to ensure that mitigating and aggravating factors are taken into account during the sentencing portion of a criminal proceeding. And, as a matter of criminal law policy, in addition to much thought and study on my part, I believe that the capital punishment provision in the Thurmond substitute should be a sentencing option available for those who are convicted of crimes deemed to be affronts to civilized society.

The exclusionary rule provision of the Thurmond substitute allows reliable physical evidence, including, but not limited to, such evidence as narcotics seized from a drug trafficker, to be admitted into evidence in a criminal trial.

As is well known by now, the exclusionary rule is not a guarantee grounded in the Constitution.

It is a judge-made rule adopted by the Supreme Court for use in the Federal courts in 1914 (See *Weeks* v. *United States*, 232 U.S. 383) and for the States by the Supreme Court in 1961 (See *Mapp* v. *Ohio*, 367 U.S. 643)—to deter abusive law enforcement practices that might occur under the "color" of the protections afforded by the fourth amendment.

The fourth amendment, of course, guarantees that the people shall be "secure in their persons, houses, papers, and effects, against unreasonable searches and seizures."

Consequently, the enforcement of the exclusionary rule excludes evidence from being considered at a criminal trial, where it has been determined that such evidence has been obtained illegally.

The overtechnical reliance upon the exclusionary rule has resulted in criminals—who have, in fact, been caught in the act of committing a crime—being set free; not because they are innocent, but because the evidence necessary to establish guilt is determined by the court to have been seized unreasonably.

I have already stated that it is the foremost responsibility of law enforcement officers to protect the citizenry. Sometimes in the performance of those duties, an officer makes a mistake.

There should be room to distinguish between a wholly unreasonable search of one's person or home, and the simple and honest mistake, made in good faith, of a law enforcement officer conducting a search under sometimes life-threatening circumstances.

To me that is just plain good old common sense.

Unfortunately, strict enforcement of the exclusionary rule results in all criminals and all crimes being treated alike.

In Michigan versus Tucker (1974), Justice Rehnquist said:

> Just as the law does not require that a defendant receive a perfect trial, only a fair one, it cannot realistically require that policemen investigating serious crimes make no errors whatsoever.

Ten years later, the Supreme Court, in United States versus Leon (1984), adopted a good faith exception to the exclusionary rule, in instances where a search was conducted pursuant to a warrant, issued by a magistrate, that was later invalidated.

The Supreme Court recognized that it is absurd to attempt to deter the conduct of a police officer who in good faith conducts a search pursuant to a warrant that the officer considers to be valid, or who has no reason to believe is invalid.

Can we really expect, as some courts seem to demand, that an officer should cross-examine the issuing judicial officer as to possible deficiencies in the warrant? I believe not.

And what about instances when an officer is acting under probable cause and reasonable good faith, without the benefit of a search warrant?

Should evidence that tends to prove the guilt or nonguilt of an individul be excluded because of an artificial reliance upon a rule which erects an artificial veil between the facts and common sense? I think not.

I think the American people have waited long enough for us to restore logic to the criminal justice system.

In keeping with the spirit of the rationale in Leon, title III of the Thurmond substitute requires that evidence be seized by a responsible law enforcement officer who has acted with an objectively reasonable good faith belief that his or her conduct was lawful.

As I have stated previously, the American people have a right to be secure in their dwellings, free from drug traffickers and similar predators.

The American people also have the right to prosecute those who would flagrantly disregard the laws of the United States and hide behind an overly legalistic reading of the fourth amendment of the U.S. Constitution.

By adopting the objective good faith exception to the exclusionary rule, no longer will a guilty defendant get a free ticket out of jail, for certainly no thoughtful reading of the fourth amendment, nor the judge-made exclusionary rule, ever intended such a result.

Mr. President, none of us wants the police breaking in our doors or indiscriminately making searches and seizures.

Certainly none of the supporters of this provision of the Thurmond substitute advocates such police-state tactics.

However, strict adherence to the exclusionary rule makes sense only in those instances where law enforcement personnel intended to break the law.

Title III does not abolish the exclusionary rule. It does, however, maximize the availability of reliable, physical evidence that may tend to prove the guilt or nonguilt of a defendant.

The exception to the exclusionary rule contained in title III of the Thurmond substitute is valid only so long as the law enforcement officer has acted in good faith and concludes that a particular set of facts and circumstances gives rise to probable cause.

The validity of the good faith of the law enforcement officer in question is to be determined by the finder of fact from an objective rather than subjective standpoint.

I believe that title III is essential in order to return the exclusionary rule to its original purpose of deterring unlawful police conduct.

Statistics indicate that drug cases have a high incidence of exclusionary rule search and seizure problems. With the adoption of title III, no longer will evidence, such as that which is seized from a drug trafficker or drug abuser, be thrown out of court when a law enforcement officer has acted objectively, in good faith, evidence that otherwise goes to the question of a defendant's guilt or nonguilt.

In conclusion, Mr. President, the Thurmond substitute offers us a real opportunity to enact a true crime package, rather than the hollow bill offered by the supporters of S. 1970, which is a crime bill in name only.

Mr. President, I am afraid that the bill offered by our colleague from Delaware does not pass the famous duck test.

True, it looks like a duck, it walks like a duck, and it even sounds like a duck.

But, let me assure you, it is not such a bird. It is only a turkey wearing duck's feathers.

The result of its passage will be to make it even more difficult for law enforcement personnel, prosecutors, and judges to protect the American people from criminals.

I know many of my constitutuents are sick and tired of efforts in Congress to act tough on crime, but not to in fact be tough. They want and deserve meaningful action from us.

So I urge my colleagues to support the substitute offered by the distinguished ranking member of the Judiciary Committee because this substitute happens to be the right thing to do.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WIRTH). Without objection, it is so ordered.

## EXTENSION OF MORNING BUSINESS

Mr. SPECTER. Mr. President, I have been asked by a representative of the leadership to ask unanimous consent that time for morning business be extended to 12 noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

## CRIME

Mr. SPECTER. Mr. President, we are considering the crime bill in the Senate today, a continuation from the opening discussion of yesterday. There is no problem or concern in America more important than crime. The primary function of government is to provide personal physical safety for its citizens, national defense on international problems, and domestic defense against the ravages of crime.

The crime problem is a matter of overwhelming importance in this country, as it has been for a long time. In the three decades that I have worked on the crime problem since I was an assistant district attorney in Philadelphia in 1959, I have personally seen the problems of crime in the streets, crime in our big cities, crime in our small towns, and crime in rural areas, grow by leaps and bounds.

It has always been my view that we could win the war on crime if we could devote sufficient resources to this very important issue. There have been many crime commissions. The one I worked on was the 1972 National Commission on Criminal Justice Standards and Goals which outlined a realistic blueprint to deal with crime in America.

Crime in the United States has become more acute with the advent of the drug problem. With the problems of cocaine and crack, crime has become a much more difficult problem today than it was 18 years ago when the National Commission on Criminal Justice Standards and Goals outlined the strategy to fight against crime.

Since coming to the Senate, the crime issue has been a major area of my concern, working on the Judiciary Committee and also on the Appropriations Committee. In the 98th, 99th, 100th, and 101st Congress, I have proposed major legislation which would allocate 1 percent of the Federal budget to the crime problem. Originally, when our budget was around $850 billion, that called for an allocation of about $8.5 million. At the present time, largely as a result with the problems with drugs, the Federal allocation has approximately come close to that 1 percent figure. But in the intervening time, the problem has become even more complex so that there remains an issue today as to whether 1 percent of our Federal budget is sufficient.

Mr. President, I would approach and have approached the problem of crime in two fundamental ways. One is to deal with the first offender, second offender, and youthful offenders working toward realistic rehabilitation. And, second, if a person then becomes a habitual offender—and by that I mean someone who has been committed three or more major crimes—then I think it is fair to, in effect, throw the book at that defendant with life sentences, to separate that person from society. But before that can be done, in my view, there has to be an opportunity for the youthful offender, first offender, even second offender to have realistic rehabilitation.

It is no surprise when a functional illiterate leaves jail without a trade or skill that that individual returns to a life of crime. It is no surprise that when a person cannot read or write, has no job, goes back on the street, and if not the first impulse, if not the second impulse, it does not take long for recidivism to take hold. That has been the result of the problems of crime in this country. We have not really worked at rehabilitation in any meaningful way.

When I served as chairman of the District of Columbia subcommittee in 1983, 1984, 1985, and 1986, our subcommittee crafted a program for the District of Columbia to provide for literacy training, to provide for job training, to provide for job placement. While that program has had some difficulties, it has made significant strides forward and has been significantly successful with demonstrated statistical facts showing that where education, literacy and job training has been provided, the people who have left the District of Columbia jails have had a higher rate of success on the outside in finding and in holding jobs.

Part of that program was the effort to construct a new jail in the District of Columbia and some $30 million, $40 million of Federal funds were allocated. As a demonstration of how slow the process is, in 1990, we still have not made a great deal of progress on the jail because of citizen disputes, but it is going forward. It is illustrative.

I know the distinguished Presiding Officer smiles. It is a pleasure to have his attention because most of the time with a single Senator on the floor in this cavern making speeches which are largely unnoted perhaps except for somebody watching on C-SPAN II. The fact is that the jail is moving forward under that initiative. If it is hard to get a jail constructed, which is a relatively simple task, consider how much more difficult it is to apply rehabilitation to work with functional illiterates who have come out of the school system not knowing how to read and write and have turned to a

life of crime. Take that person when they are 20, 21, or 27 trying to give them literacy training and then try to give them job training and try to find them jobs. There is a realistic hope of accomplishing that and the experience in the District of Columbia, while not perfect and very problemsome for a lot of reasons, has made some significant strides forward.

Mr. President, I believe that it is necessary as a plank for America to work on the juvenile offender, the first offender and the second offender to try to provide that kind of realistic rehabilitation.

I have introduced legislation which would encourage the States to emphasize such realistic rehabilitation. I intend to offer on this bill, Mr. President, a measure which would stimulate some State action. As a matter of federalism, the Congress cannot appropriately order the States to have rehabilitation programs, but we can condition our grant of Federal funds, for example, on the States moving in that direction. As I say, I have introduced legislation in the past and I intend to offer an amendment on that subject when the time is appropriate on this bill.

Mr. President, if society offers the first offender, juvenile offender, even second offender, a chance at realistic rehabilitation and that individual then fails and becomes a three-time loser, then I think it is fair to have life sentences, to separate that person from society.

Some 40 States in the United States have adopted this approach over the years called the habitual offender statute. States have provided if someone does commit three or four major offenses, that person then is classified as an habitual offender and ought to go to jail for life. That was the thrust of legislation which I introduced in 1981 and kept with, and finally, in 1984 we passed as part of the Omnibus Crime Control Act.

The Federal Armed Criminal Sentencing Act which provides for a life sentence under the Federal system, entitles a person to probation after serving 15 years. However, the act provides for a mandatory sentence of 15 years to life for someone who is caught in the possession of a firearm who had committed three major offenses. That is the Federal equivalent of what had been in so many of the States under the habitual offender laws.

The problem then, Mr. President, becomes one of having sufficient space for incarceration. Based on my experience as district attorney of Philadelphia and as a result of hearings which we have had in the Judiciary Committee, it is my judgment that there are approximately 200,000 to 400,000 career criminals in this country. That was an estimate which this Senator advanced in the early 1980's. There may be more by this time as a result of the increased problem of narcotics.

The job is to have enough jails to hold those prisoners. A career criminal, Mr. President, is someone who commits a major robbery or a major burglary. The statistics show and case studies show that these career criminals commit in the range of 700 crimes a year.

This Senator has proposed legislation, as I say, as part of the major package going back to the early eighties to provide $10 billion for the construction of jail cells in this country which would house these prisoners.

Finally, after a great deal of effort, there has been a focus of attention in this country on additional jail cells. President Bush has come forward with a very significant sum of money for this prison construction. This is an issue which was part of the campaign effort, campaign effort which involved the furlough issue, and involved Willie Horton, but also a more comprehensive plank in then Vice President Bush's campaign effort which included this prison construction. This Senator made a contribution to the formulation of that plan. That has been carried forward so that we now are moving to have jails.

I believe, Mr. President, the Federal Government ought to take a greater role in providing prison space for the category of habitual offenders for a number of reasons. First, when you have someone who is an habitual offender, they are moving in interstate commerce, and most of the time involved in drugs, it would be appropriate for the Federal Government to house these habitual offenders because of the Federal nexus to the problem. In addition, it would be appropriate as a way of encouraging, in the State courts, the use of the habitual offender statute.

In the 97th, 98th, 99th, and 100th Congresses that legislation has been proposed by this Senator. So it is a long evolving process, but I believe that ultimately there will be a greater recognition by the Federal Government of this role.

I am glad to see the distinguished chairman of the Judiciary Committee have as part of his plan regional Federal jails to help the States. That proposal does not tie directly to habitual offenders, but it is in line with the basic concept that the Federal Government does have a responsibility and a role in housing State convicts.

We know today that there is a horrendous problem of overcrowding in the State prisons, and there have been thousands of prisoners released prematurely. In one celebrated case in Little Rock, AR, where a person was convicted of murder in the first degree on a robbery-felony murder, was sentenced to 25 years in jail, which in Arkansas is the practical equivalent of life, he walked out of court and walked out onto the street because there was no jail to put him in.

Judges have testified before the District of Columbia Subcommittee in 1984 and 1985 that they frequently release people who ought to go to jail because there is insufficient space. That is a problem which we have not yet begun to grapple with.

So it is no surprise that there are violent criminals on the street when we have apprehended, convicted, and sentenced them, but they are not in jail because there is insufficient jail space. So it is no wonder that those people are back on the street and committing more crimes, and it is proof positive to the basic proposition that we have not allocated sufficient resources for this very important problem.

In the bill before the Congress at the present time, Mr. President, there is a great deal of concern on the issue of the death penalty. I believe that the death penalty is a deterrent. That judgment is based upon some 12 years of experience as an assistant district attorney and as a district attorney, and from the experience I have had in the 10 years I have been in the Senate on the Judiciary Commitee. It is a judgment call.

Frankly, the statistics go either way. As in most circumstances, you can find a statistical set to prove virtually anything you seek to prove. But I have seen professional robbers and burglars who will not carry weapons in the course of a robbery or burglary because they do not want to face the death penalty. When we come to the subject in further debate I will amplify those cases and the underlying factors which led to that conclusion.

Whether or not I am accurate that it is a deterrent, there is no question about the fact that 37 States have decided the death penalty is something they want carried out. The practical fact of the matter is with the lengthy delays on habeas corpus proceedings—that is the Latin term, habeas corpus, "produce the body"—where the propriety of the conviction is tested in the Federal courts and in the State courts. In these cases, proceedings can go on for years, an average of 7 years, and some cases last as long as 15 years. In fact, one case lasted as long as 17 years.

Mr. President, it is my view that the death penalty has to be very, very carefully applied, both as a matter of justice to the individual who is being subjected to that possible penalty and also in order to be able to retain the death penalty.

When the issue as to age comes up in our Judiciary Committee meetings, I have long voted that we ought not to apply the death penalty to anyone

under 18 years of age. It is not an easy call. A number of my colleagues have called for the death penalty for those who are 17 or 16, wanting to put the cutoff at age 16. There is no magic test as to what the appropriate age is. There are many juveniles who are 16 and 17 or even younger who are hardened criminals, and when you take a look at their records and their conduct there is a strong inclination to say the death penalty ought to be applied here. But as a judgmental factor and as an overview, I think that society ought not to extract the death penalty from those who are under 18 years of age, both as a matter of the age of the individual and also as a matter of societal restraint that we are to be able to retain the death penalty.

So I disagree with the decision of the Supreme Court of the United States which upheld the death penalty as a matter of State determination for those under 18, although it is a different question as to whether there ought to be a constitutional bar contrasted with a public policy determination made by a legislative body. I believe that a wiser course, as I say, is to limit the death penalty to those 18 years of age or older.

Similarly, when it comes to the issue of those who are mentally retarded, I disagree with the decision of the Supreme Court of the United States in giving States latitude to apply the death penalty to those who are mentally retarded. I believe that these issues ought to be resolved in a conservative way. When I say conservative, I mean that the death penalty ought to be restrictively applied and in close questions we ought to exercise societal restraint, both in fairness to those individuals and also in order for society to retain the death penalty, because I believe that if it is overused we will lose it.

One of the amendments, Mr. President, involves the issue denominated as the Racial Justice Act. When you so denominate a matter as racial justice it is pretty hard to vote against it. It is one of the great attributes that imaginative Senators or more imaginative staffs have of putting labels on bills so they cannot be resisted.

The Racial Justice Act in essence provides for a statistical determination to show that the death penalty has been applied in a racially discriminatory manner. It is a very complex measure. I voted in favor of the provision during the committee deliberations. I have since rethought the matter because of a concern, as I have studied the matter in greater depth, that it may set up a system which is unwieldly and impractical, and it may also move away from individualization for determination of the death penalty. A hallmark of the American criminal justice system and especially on the death penalty has been individualization; that is, taking a very close, hard, careful, very careful look at the individual involved in terms of the murder in question, the aggravating circumstances, the mitigating circumstances, that individual's prior record. I am rethinking and restudying this issue and have had quite a number of meetings on it, studied it in depth, and intend to continue to do so before the matter is called to the floor.

The issue of applying the death penalty to major drug dealers is also a matter of concern where there was no causally connected death. I have introduced legislation which would provide for the death penalty for a major drug dealer, even though you cannot show a specific death resulting. I broached this issue about a year ago with Assistant Attorney General Edward Dennis, the Assistant Attorney General in charge of the Criminal Division, and sought the administration's position which was forthcoming a few weeks later, and then crafted a bill and introduced it last fall.

This is a difficult issue because it raises a possible constitutional question as to whether constitutionally the death penalty may be imposed on an individual where you cannot prove a death results. The Supreme Court of the United States has held that the death penalty may not be applied to someone convicted of rape because the death penalty is disaproportionate. The Supreme Court of the United States has also held that you may not apply the death penalty to a coconspirator who is the driver of the getaway car in a robbery-murder because that individual is too remote.

But I believe where you have major drug dealers selling drugs, they know that the natural and probable consequence of the sale of drugs is to result in death. My bill provides for the imposition of the death penalty on a second conviction for such an individual.

We have had traditionally the death penalty for crimes like espionage or sabotage where no death resulted, because society's interest in national defense and national security was such that if someone was convicted of espionage or sabotage or treason the death penalty was appropriate.

I believe that those are analogs and analogies to a major drug dealer, even though you cannot prove death results. I expect this will be a contested issue on the Senate floor. It is one where I think we ought to expand the death penalty.

I have been disturbed that there has not been an effective Federal death penalty since Furman versus Georgia except for the Uniform Code of Military Justice and the 1988 legislation which we passed on major drug kingpins where death did result.

Last year, I introduced a provision for the death penalty in cases of terrorists, starting off with the most egregious kind of crime where I thought it would be clearest that the death penalty ought to be applied, and I offered that as an amendment to the State Department authorization bill. Under an agreement, we took it off the bill so it could be considered as a freestanding bill with 4 hours of debate. That bill was considered and passed the Senate overwhelmingly by a vote of 79 to 20 on October 26, 1989.

That was step one in trying to bring back the death penalty for a wide variety of traditional Federal offenses—murder, of course, of a Federal agent, robbery of a Federal bank, assassination of a President, use of explosives, a wide variety of cases which had traditionally been covered with the death penalty. Those are incorporated now in legislation advanced on both sides of the aisle. I think it is very important to bring back the Federal death penalty.

Mr. President, I have spoken at some length because no other Senator has appeared on the floor seeking recognition. But even with this length, I am only touching on a few of the matters which will be embodied in the debate on the crime bill, and of which I have a direct concern. But the final matter that I shall discuss is an amendment which I offered on Friday to establish a timetable for Federal habeas corpus proceedings.

The reality is that there is not much of a death penalty in America today, notwithstanding that 37 States have the death penalty. There is not much of a death penalty because, with some 2,400 men and women on death row in America, there have only been about 125 executions since 1976. So that the deterrent effect of capital punishment really cannot be demonstrated in this context.

We know that punishment can deter only if two factors are present: swiftness and certainty. Without those two factors, deterrence cannot be present. Obviously, you do not have swiftness. In some cases it takes as long as 17 years with the average case taking 7 years. And you cannot have certainty in the context where you may not be caught, and if you are caught you may not be convicted. If you are convicted, you may not get the death penalty, and if you get the death penalty, you most likely will not be executed given the statistical range.

In 1972, Furman versus Georgia came down, and everybody on death row was exonerated because their cases were tried in the context in which it was determined constitutionally impermissible by Furman versus Georgia. Then other cases have come down. Each time the death penalty is struck down, all those on death row are granted an automatic reprieve because the Supreme Court of the

United States established standards which were not known when those defendants were tried and convicted.

So that enormous delay, realistically viewed, destroys the efficacy of the death penalty in this country.

Mr. President, I have proposed a significant revision of postconviction proceedings because of my view that it is possible to give those convicted of murder in the first degree and sentenced to death an appropriate review in a much shorter time, providing adequate counsel is appointed.

That is a sine qua non, an indispensable prerequisite for any system which administers criminal justice which includes the death penalty.

My bill, which was introduced on Friday and which I intend to offer as an amendment to this crime package, would call for the filing of a petition for writ of habeas corpus in the Federal court within 30 days after the final decision on direct appeal from the conviction and imposition of the death penalty.

Mr. President, my legislation calls for the elimination of State habeas corpus proceedings as a jurisdictional prerequisite of Federal habeas corpus proceedings because in the State courts those proceedings are customarily pro forma. They go before the same court where the person is tried and sentenced to death. That case has already gone to the State supreme court, which has upheld the trial and the death penalty. The only additional ingredient customarily is the issue of competency of counsel. And as a matter of practice, it is pro forma. Several years are consumed in that process.

The defendant's rights can be adequately protected, providing he gets a decent lawyer, in a single Federal court habeas corpus proceeding. It is possible, Mr. President, to set a timetable which would move that along. We find that it is a common practice in many States for long delays to occur before the warrant of death is signed by the Governor calling for the imposition of the death penalty. That sets a procedural sequence where there is no requirement for the filing of habeas corpus review on constitutional grounds until the break in the imposition of the death penalty.

Then the cases go through collateral habeas corpus proceedings in the State courts for several years. Then there is a repetition in the Federal courts. During this time, there are frequently intervening decisions by the Supreme Court of the United States, expanding within its rights. Then they start all over again with this interminable process.

Mr. President, with provisions for adequate counsel, the defendant is on notice at the time the State supreme court holds that the death penalty matter is going to have to go forward to the Federal habeas corpus proceedings because, while the petition for a writ of certiorari is applied for, it is granted so infrequently that it is a virtual certainty that the case will go to the Federal habeas corpus, and that is the time for the preparations to be made for that Federal habeas corpus proceeding.

That is the time when counsel ought to be preparing that petition for writ of habeas corpus. I think it is timely and fair to require that it be filed within 30 days after the Supreme Court of the United States denies a petition for writ of habeas corpus. If they take the case, of course, there is review. But if the Supreme Court denies the writ of habeas corpus, that is the time for the petition timing to start.

The issues have been litigated, aside from the issue of incompetency of counsel or some intervening factual materials. They have been litigated in the State criminal proceeding.

It is then reasonable, Mr. President, to call for an answer by the State within 20 days, which is customary now, and then to limit the U.S. district court for 3 months for an evidentiary hearing, for arguments, briefing, and decision.

These cases, under my amendment, would be made a priority item for the Federal courts, and it would not be burdensome. In the State of Pennsylvania, Mr. President, we have had, over the past decade, some 120 death cases pending. Seventy of them have come out of Philadelphia and 40 from the remainder of the State. I am advised by the district attorney, Ron Castille, that 12 such cases arise each year. In the Eastern District Court of Pennsylvania, where there are 22 full-time judges and another 8 senior judges, that would be one capital case every 2 years.

I think it is then appropriate to establish a timeframe in the circuit court of 110 days, and that is not much faster than is currently the standard, again taking these cases on a priority basis, and a timetable in the U.S. Supreme Court of 110 days.

This sequence, Mr. President, would eliminate problems which are now present by the intervening rights. The Supreme Court of the United States has held that a person applying for Federal habeas corpus should not be entitled to the benefit of a decision which came down establishing new rights after his case had run its initial appeal. I believe that this rule is not an appropriate one and, of course, the Congress of the United States has the authority to establish the law on this subject, as to what is the scope of review.

I saw Chief Justice Rehnquist describe this point on television, and as he describes it, it could not be applied if there was a fundamental right involved. I suggest, Mr. President, that there would be more time consumed on what was or was not a fundamental right than it would take to decide the entire issue.

Again, in considering whether the defendant ought to have the benefit of the intervening rights, Mr. President, I believe that the benefit of the doubt ought to be given to the defendant, again, on the basic point that I make that capital punishment has to be applied with societal restraint, both in the interest of fairness to the individual and in the interest of retaining capital punishment.

The other major controversy which has arisen on the bills which have been filed, on the controversy between the Powell Commission, the commission chaired by former Chief Justice Lewis Powell, and the point of view of the judicial conference is what the scope of review should be, whether it ought to be limited to the question of innocence or whether it ought to consider also the question of penalty and how that ought to be articulated.

Here again, Mr. President, I believe that the broader standard has to be applied, again in the context of fairness to the individual and retention of the death penalty, and this is under the category of societal restraint. When hearings were held before the Judiciary Committee, this issue was addressed by Justice Powell, and I cite a brief portion of his testimony to this effect. Justice Powell testified:

> A miscarriage of justice, it sort of lies in the eyes of the beholder. I also repeat what I said earlier, that, for the most part, innocence is not an issue in these cases. The question is whether or not a death sentence was appropriate and whether or not the trial was fair.

This is the testimony of former Justice Powell in commenting on what the scope of review should be. So that when you get into the nitty-gritty and into the question-and-answer session, Justice Powell realistically comes down to the broader standard when he says: "The question was whether or not a death sentence was appropriate and whether or not the trial was fair."

So that when we really apply the death penalty and are about to extract the extreme penalty which, as I say, I think is fair, so that society can have every legitimate weapon in its arsenal to fight violent crime, the defendants for whom the death penalty is imposed necessarily ought to have a review of the sentencing process and, as Justice Powell himself puts it, "Whether the trial was fair." No matter how you articulate the term "miscarriage of justice," and a variety of other standards, you come down to what is basic fairness, and I do not think we come to a point in our courts where we will exact the death penalty without having given that ultimate process of review.

Mr. President, I have a number of comments, in the intervening time, on my amendment on speeding up the timetable. Some are concerned that it is a big step to eliminate State habeas corpus proceedings. I think that concern arises in the minds of those who have not been through State habeas corpus proceedings. They just are not meaningful.

One concern was raised about a slight disadvantage to the prosecuting attorneys, because the fact-finding State habeas corpus proceeding is to be handled with deference in the Federal court. But giving up that small advantage is far outweighed on the benefit of eliminating the several years taken up by State habeas corpus proceedings.

When you take a close look at that procedural advantage, Mr. President, it evaporates in most Federal court proceedings, because the Federal courts hold their own evidentiary hearings. If a Federal court wishes to reach and invalidate what a State court has done in cases—and I shall discuss those at greater length when this issue comes to the floor—the Federal courts make those decisions in any event.

I have litigated these cases in State habeas corpus matters and also on Federal habeas corpus matters, and this timetable is workable. There is an approach on the subsequent Federal habeas corpus petitions that they may not be filed unless leave is obtained from a court of appeals, so that the court of appeals should be the gatekeeper to stop the repetitious petitions for writs of habeas corpus.

Mr. President, I see my colleague from Colorado on the floor seeking recognition, so I shall conclude at this point. I urge my colleagues, in the crafting of the bill which is before us, to take a very hard look at the broad aspect of crime in America and to try to deal with the issue of realistic rehabilitation for the youthful offender, the first offender, and the second offender, both in the interest of that individual and also in the interest of society's willingness to extract a life sentence for the habitual offender. I do not think we will come to that judgment, and to impose the life sentence on the habitual offender as a society, until we provide that kind of an opportunity for rehabilitation to the juvenile and the first and second offenders.

As we work through the issue of the death penalty, which is a very important weapon in the arsenal against violent crime, we must structure legislation which will give defendants access to adequate counsel, because if there is not adequate counsel, nothing that we provide would work, and that means access to the records as well. With adequate counsel and with the priority in the Federal courts, we can speed up the lengthy Federal court habeas corpus timetable to a year. I would expect others to want a longer period of time. None of these timetables are nonnegotiable. There is a great deal that we can do in the Congress of the United States, through the Federal Government, if we analyze these problems closely, if we supply sufficient funding, and if we move to realistic solutions. I thank the Chair and yield the floor.

## EXTENSION OF MORNING BUSINESS

Mr. WIRTH. Mr. President, I ask unanimous consent that morning business be extended to 12:30 p.m. and Senators be allowed to speak therein.

The PRESIDING OFFICER (Mr. KERRY). Without objection, it is so ordered.

## JILL IRELAND, A REMARKABLE WOMAN

Ms. MIKULSKI. Mr. President, I rise today to pay tribute to a remarkable woman. Jill Ireland was a British actress and cancer crusader who spent the last years of her life fighting the debilitating disease of breast cancer but did not let it defeat her. Instead, she fought in public, where her courageous 5-year battle brought hope and inspiration to both the ailing and the healthy. With her death last week we lost a very special advocate for women's health.

In books and frequent lectures about her battle with the disease, Ms. Ireland spoke eloquently about self-respect and optimism in the face of devastating illness. She wrote a best-selling book about fighting her disease entitled "Life Wish." She called herself a survivor, not a victim.

In January 1988 she testified before the Senate Committee on Labor and Human Resources, of which I am a member, representing the American Cancer Society. At this hearing Jill pleaded eloquently for a bill I had introduced to address the critical heatlh issue of early detection of breast cancer through mammography, so that other women would not have to suffer as she had suffered with this terrible disease. As she stated at that hearing:

> If it were not for a mammogram, which detected my cancer before I did, I would not be standing before you today, pleading for the lives of American women. My tumor was not detectable by examination. It took a mammogram to save my life. If all women knew about the benefits of screening, and if it were available to them, so many women could be spared surgery, painful treatment, and death.

Mammography screening can detect breast cancer when it is in its very early stage. At this early stage, the chances for cure are over 90 percent. Yet is is estimated that fewer than 10 percent of women over 65 have mammograms regularly. One primary reason for this is that the cost of a mammogram can be a tremendous burden for an elderly women on a fixed income.

Jill Ireland can no longer stand here and plead for the lives of others; it is up to us to carry on that work for her. I know of no better way to attempt to carry on in her footsteps than to continue to press for measures which enable all women to receive mammography screening and other necessary medical services.

As Jill Ireland stated before my committee:

> Breast cancer is a great leveler. It knows no boundaries. It does not respect income levels, ethnic distinctions or social standing. It strikes the young, people in full stride of their most productive years and it strikes the elderly—many of whom are surviving on a mere $400 a month from Social Security.

Our memorial to this exceptional woman must be to ensure that no woman experiences the devastating effects of breast cancer simply because she could not afford to have a mammogram.

## DROPOUT PLANS NOT WORKING

Mr. KOHL. Mr. President, I rise today and ask unanimous consent that the article, "Dropout Plans Not Working, Study Finds," appearing in the New York Times on May 16, be printed in the RECORD. Joseph Berger writes:

> New York City schools spent more than $120 million in the last four years to prevent students from dropping out, but most of the participants did not improve their attendance or their academic work, a major new study says.
>
> The study, which is being released today, underscores again how intractable the dropout problem is and how difficult it is to alter the habits and the outlook of students by starting in adolescence.

New York City schools have taken the initiative to try to find what works in helping to reduce a high dropout rate. The article goes on to discuss approaches that are working and approaches that haven't worked in meeting the needs of the young people of New York City.

On April 30, the Senate unanimously agreed to an amendment which would continue funding for school demonstration dropout prevention programs for 1 year until a new round of competition for demonstration project grants can be completed by the Department of Education. Meanwhile, there will be more examples of projects undertaken by States and local governments—as in the programs described in the article by Mr. Berger—demonstrating both success and failure. But at least the efforts are being made to find what works, and what works best in each of the thou-

sands of communities across this Nation which are facing a tremendous dropout rate.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, May 16, 1990]

DROPOUT PLANS NOT WORKING STUDY FINDS

(By Joseph Berger)

New York City schools spent more than $120 million in the last four years to prevent students from dropping out, but most of the participants did not improve their attendance or their academic work, a major new study says.

The study, which is being released today, underscores again how intractable the dropout problem is and how difficult it is to alter the habits and the outlook of students by starting in adolescence.

Board of Education officials said the findings pointed to a need for making instruction more appealing to students, and not merely intensifying attendance and guidance services, as dropout programs have tried to do.

Former Chancellor Bernard Mecklowitz said the study suggested that dropout prevention had to begin much sooner, perhaps as early as nursery school.

AT A COST OF $8,000 A PUPIL

The study, prepared by the board from research by faculty members at Teachers College of Columbia University, is expected to lead to a major reshaping of the dropout program. Chancellor Joseph A. Fernandez is scheduled to brief the board today on revising the dropout progam, which deals with junior high school and high school students.

From 1985 through 1989, the system, responding to a persistently high dropout rate, showered the 150,000 participants in two parallel dropout programs, with services costing a total of $120 million, or $8,000 a pupil.

Attendance officals, equipped with automatic dialers called parents to prod the students to attend. Guidance counselors advised on careers and family problems. Neighborhood workers visited homes and trained youngsters for jobs. One community group even provided training for wilderness survival.

The results, the authors of the study concluded, were disappointing. About 40 percent of the high school students showed improved attendance. Less than 45 percent increased the number of courses they passed from one year to the next. More than half the original participants had dropped out by the third year of the program, far higher than the citywide average of 30 percent.

Most damning of all, the study suggested was a comparison between students who were in the program for three years. Both groups showed the same decline in attendance. The study did not give specific figures.

Officials of the program had set a goal of improving the attendance and academic achievement of the majority of the participants.

POLITICS AND SPEED

Although dropout figures are notoriously subject to manipulation, the board's figures indicate that almost 30 percent of the students older than 14 dropped out before they might have graduated.

A study in 1988 by a group of black, Hispanic and Indian educators said the rates for minority students had reached epidemic proportions, with 82 percent of Hispanic students, 53 percent of black students and 46 percent of Indians leaving. The board's figures for minorities are far lower.

Many educators said the problem had to be addressed long before high school. Indeed, the best results were achieved at a handful of elementary schools in the programs.

"Taking children who are already at risk and who already have one foot out of the school is worth the effort, but it doesn't pay the kind of dividends that the long-term approach pays," said Mr. Mecklowitz, now head of a principals' training institute at the Bank Street College of Education. "It's easier to prevent someone from smoking if they never start. If you get children on a positive educational track, they're going to continue their education."

The politics surrounding education, he said, often demand quick results. Working on the problem through early programs, he said, could take eight or more years and may not be as politically palatable as quicker programs.

In the mid-80's, the board, responding to criticism, started the two programs at 98 junior high and 36 high schools, as well as 5 elementary schools. The Mayor's office largely paid for one and the state, largely through bills sponsored by the chairmen of the Senate and Assembly Education Committees, paid for the second. The bills were written to assure that most of the money went to the most-troubled urban schools, bypassing the usual formulas that critics said often shortchanged the city in favor of suburban and rural areas.

INSUFFICIENT CREDITS

The programs, which eventually merged, picked students whose attendance and academic records suggested that they were likely to drop out. Both tried similar strategies, with efforts to have students attend, after-school programs and health referrals. Schools enlisted community organizations to develop job training, counseling and other programs.

An evaluation of the programs, by Joseph C. Grannis, a professor of education at Teachers College and supplemented by the board's research, found that participants were not earning sufficient credits each year to enable them to earn a diploma in four, or even five years.

High school students attended about two-thirds of the time and passed 40 percent of their courses. Average attendance declined year after year.

About 25 to 30 percent of the participants, the study said, were regularly promoted. By the third year of the program, 1987-1988, 50.7 percent of the first group of high school students had dropped out.

DECISION ABOUT SCHOOL

The executive director of the division of strategic planning at the board, Robin Willner, cited the focus of the program. In the mid-80's, she said, educators believed that schools needed the guidance counselors and attendance teachers who had been cut back in the fiscal crisis of the 70's. The findings of the dropout study, she said, indicate that such services solve just part of the problem.

"Children need enormous support, but they are also making a decision about school," she said. "The initial program focused on what was wrong with the children and did not sufficiently focus on what was wrong with the school. Children are making a decision about the school.

"If children went back to the same classes and the same program they walked away from the first time, they would walk away again. What about fixing the school, so when you bring them back they want to stay?"

Professor Grannis, who wrote the Teachers College study, declined to comment until the study is released.

## JIM HENSON

Mr. LEVIN. Mr. President, yesterday in New York, funeral services were conducted for Jim Henson, the creator of the Muppets, who died suddenly last week.

Jim Henson brought to this Nation and to the world joy and learning as well as the joy of learning through his never ending cast of creations. Whether it was teaching children to count and read, or teaching adults the value of keeping alive the child in themselves, Jim Henson's art and insight enriched the fabric of our culture for over 30 years.

Because his characters were lovable but not beautiful by any classic definition, he was able to teach children that beauty was in an attitude and in an approach to life. He also taught them that just because individuals looked different from each other, there was no reason why they could not work together in a spirit of community. In an environment which could lead children to think that being mean is an ideal, Kermit the Frog showed that it was good to be caring and thoughtful, even if you were sometime awkward in expressing those feelings. Fozzie Bear, through his repeated and usually ill-fated attempts to be a standup comic, showed children that they should not be afraid to try and try again if they really wanted to achieve something. And even Miss Piggy, that supreme example of comic self-indulgence, let children see in a humorous way the downside of thinking only about "moi."

Jim Henson through his loving creativity taught children all of that and at the same time reminded the rest of us of it, as well.

Mr. President, it is an ironic tribute to Jim Henson that it was his very success that deepens our sadness. It was the reality of his fantasy that makes us feel that in his passing we have lost a part of our own world. But, his legacy is that the fantasy will still endure for the benefit of all of our children and for the benefit of the children in all of us.

## NATIONAL HEALTH CARE PROPOSAL

Mr. INOUYE. Mr. President, today I am pleased to submit for the record a summary of a national health care proposal developed by the National Association of Social Workers [NASW].

Our health care system is in critical need of fundamental restructuring if we are to provide access to quality health care to the millions of Americans who have no coverage. We all know that health care costs are skyrocketing. Almost 12 percent of our gross national product is spent on health care with expenditures projected to reach 15 percent by the year 2000. Thirty-seven million Americans are uninsured with 50 million more who have inadequate coverage. A shocking 12 million of the uninsured are children, who from infancy are denied the benefits that medical technology has to offer. As alarming as these statistics are, the situation only continues to become more bleak as ever increasing numbers of employers eliminate health coverage or cutback on health benefits. We can no longer pay lipservice to the need for change. The health of our Nation's citizens is on the line.

NASW, representing 127,000 professional social workers nationwide, has taken this challenge seriously. They have developed a far-reaching plan that promotes a single, simplified health program that would be implemented by the States under Federal guidelines, and financed through progressive taxation and an employer-paid payroll tax. Unlike our present two-tiered system, every citizen would have equal access to comprehensive health, mental health and long-term care services. The NASW proposal would permit consumers freedom of choice to select among participating public and private providers.

Social workers practice in virtually every kind of health and mental health care setting. This breadth of experience is reflected in the proposal's emphasis on health education and preventive care, health care delivery that addresses the total needs of the individual, coordinated care to ensure a continuum of services for those with multiple health problems, and the availability of resources that enable access to health services for underserved populations. This is a program that supports access to comprehensive health care but does so within a framework that promotes administrative efficiency and cost-conscious service delivery through a single-payer system, prospective global budgeting for States and hospitals, fee schedules for all practitioners and expenditure targets, an emphasis on community-based outpatient programs rather than costly inpatient programs and health care planning at all levels.

This proposal addresses the need for a national health care system—not just a plan that proposes to increase access while continuing the same inefficient, costly, fragmented health system. This proposal challenges all of us. I believe NASW speaks not only for its own members but for all our citizens who feel that it is time for this country to ensure that everyone has the right and access to quality health care. Mr. President, I ask for unanimous consent that the text of this summary be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

EXECUTIVE SUMMARY—NASW NATIONAL HEALTH CARE PROPOSAL

The NASW national health care proposal fundamentally restructures the current health care system. The program offers full coverage to high quality, cost-efficient, and equitably-financed health and mental health care to all Americans. The national health plan proposes a single federally-administered, single-payer system with state responsibility to ensure delivery of health services, payment to all providers, and planning in accordance with federal guidelines. The plan provides coverage of comprehensive benefits, including long-term care. Enrollees have the freedom to choose among a full-range of public and private providers, including alternative delivery plans.

The national health care plan is financed primarily through a progressive federal dedicated tax on personal income and an employer-paid payroll tax with reduced rates for small businesses and for new firms facing economic hardship. States are expected to contribute their fair share, and are permitted to supplement their state global budgets. Limited copayments on certain services could be implemented, if needed, to control utilization of services.

While it's anticipated that the plan's costs may initially come close to the current level of health care expenditures, approximately $600 billion a year (11.7% of the gross national product), the unique delivery system improvements and the cost containment features built into the proposal are expected to decrease health care expenditures over time. The national health plan expands coverage to the 37 million people previously uninsured, as well as the millions more who are underinsured, and eliminates the inequities in paying for health care that characterize our current system.

The principal features of the NASW national health care plan are as follows:

COVERAGE AND ENROLLMENT

All persons residing in the United States are covered through the national health plan. Each person has the freedom to choose from among any of the participating public and private providers, facilities or care delivery options, including Integrated Health Service Plans (IHSPs). IHSPs are nonprofit, consumer-controlled plans which provide comprehensive health care services in their own facilities to an enrolled population. Individuals will enroll in the national health plan in the state in which they reside.

Coverage through employers or other privately purchased health insurance is discontinued, although private insurance plans may provide coverage for services not covered under the national health plan.

BENEFITS

Covered benefits include primary prevention and health promotion services; care coordination services; outpatient primary care services; mental health services; substance abuse treatment and rehabilitation programs; rehabilitation services; hospital services; inpatient and outpatient professional services; laboratory and radiology services; long-term care, including home and community-based services; hospice care; prescription drugs; dental care; hearing and speech services; and vision care.

EXCLUSIONS

Health services that are excluded from coverage include cosmetic surgery, except medically necessary reconstructive surgery; and certain amenities in inpatient facilities, such as private rooms, unless medically necessary.

COST-SHARING

There are no deductibles. The National Health Board (NHB) may require copayments, if necessary, to control utilization, with the following limitations: copayments must not impede access to health care; copayments must be modest in amount; the mechanism for charging and collecting must be administratively efficient; and co-payments must not implement means-testing.

Residents of nursing homes and other residential facilities are required to pay a modest room and board fee. These fees may be waived for those below the poverty line.

IMPROVED SERVICE DELIVERY PROVISIONS

The NASW national health plan provides unique and improved prevention and health promotion services; promotes comprehensive, coordinated, and continuous care that addresses the total health needs of every person through the use of primary care providers, care coordination services, and the promotion of IHSPs as comprehensive, integrated health delivery plans; provides access to health services to underserved populations; promotes the expansion of community-based health and mental health services; and establishes state screening and care coordination systems for the delivery of long-term care.

ADMINISTRATION

A new federal National Health Board (NHB) is established as an independent agency to administer the national health care plan.

All responsibilities of the Health Care Financing Administration are transferred to the NHB. Medicare, Medicaid, CHAMPUS, and the Department of Veterans Affairs' health program are phased out under the national health care plan.

The NHB provides the states with an annual global budget for all covered state health care expenditures. The global budget for each state is based on a formula that considers size of population, age distribution, the cost of delivering care, socioeconomic factors, and a number of key health status indicators. State global budgets will include all state health block grant funds.

The states will, in accordance with federal guidelines, ensure the implementation of all state health services, determine the distribution of all health care funding, develop and administer a mechanism to pay and reimburse all health care providers, work with localities and the NHB regional offices in undertaking health planning and coordination with appropriate social and human services, implement a quality assurance program, administer a consumer advocacy and information program, and license and regulate all health care providers and facilities.

PAYMENT TO PROVIDERS

The states will pay providers in the following manner:

Hospitals will receive a prospective global budget, which will be developed through annual negotiations between the designated state agency and the hospital. Global budg-

ets will only be used for operating expenses. Separate funds for capital expansion and purchase of expensive, highly-specialized equipment will be subject to approval by the state.

Other health care facilities, e.g. community clinics, migrant health centers, nursing homes, rehabilitation facilities, and Integrated Health Service Plans will be paid either on the basis of a prospective global budget or capitation as determined by the state.

Autonomous health care practitioners and group practices will be reimbursed on the basis of fee-for-service, although group practices may choose capitation. The reimbursement rate will be based on a national fee schedule, adjusted for regional variations, and negotiated by the NHB and a representative organization for each category of health care practitioner. The fee schedule will be a resource-based relative value scale similar to that being implemented for physicians under Medicare.

QUALITY ASSURANCE AND CONSUMER PROTECTION

The NHB will establish a National Council on Quality Assurance and Consumer Protection that is responsbile for determining guidelines and overseeing the quality assurance system as it is carried out by the NHB, the Peer Review Organizations, and the Consumer Boards. The NHB will establish quality assurance standards and certification and licensing criteria for all health care providers.

Peer Review Organizations (PROs) as provide for in Title XI of the Social Security Act will be extended to cover all types of health care providers and services. The PROs will be responsible for utilization review and quality control, and must be multidisciplinary in composition and reflect the types of services review. Each PRO is required to have a Consumer Board that will oversee the PROs, make recommendations on PRO contracts and carry out educational programs.

The NHB will develop a national health care data base on quality, effectiveness, utilization and cost of care with respect to all types of health and mental health services.

A consumer advocacy program will be established on the federal and state levels to administer ombudsman programs, hotlines for complaints, consumer information and education programs.

The national health plan will contain a consumer bill of rights.

PLANNING

The national health plan requires local, state and regional planning. At each level, the health planning function will include collecting and evaluating data on: the supply of and demand for health resources, the distribution of such resources, and the health needs of the population in a given jurisdiction. Goals and priorities will be formulated to serve as guides to the development of health policy and programs at each level of government.

FINANCING

The national health care plan is financed primarily from a dedicated tax on personal income and an employer-paid payroll tax. Additional sources of revenue include a state contribution based on a formula that ensures that each state pays its fair share, a dedicated estate tax, an increase in the cigarette and alcohol tax, a tax on types of businesses which have been proven to expose workers to substances that cause chronic and fatal diseases, illnesses and disabilities.

All revenues are placed in a National Health Care Trust Fund. All current federal appropriations for health programs are folded into the national health program and transferred to the Trust Fund.

Small businesses are protected by a cap on the amount they must contribute, and new firms facing financial hardships are protected by a reduced payroll tax rate for the first 3 years of operation.

TRAINING AND EDUCATION

The NHB will collect and compile data for publication related to the supply, composition and distribution of trained health care personnel.

The health plan provides for increased federal funding for a number of existing and new programs to increase the supply of needed health care personnel; encourage more health practitioners to work in underserved areas; support programs that help disadvantaged students to successfully complete health training programs; provide retraining programs for those who are displaced as a result of the program; support new approaches to continuing education programs in rural areas; and enable educational institutions to hire qualified staff to teach the importance of mental and psychosocial health in prevention, treatment and health promotion.

RESEARCH

The plan provides funds for research efforts that focus on the need to: continue basic biomedical and comprehensive mental health research; eliminate or control the major diseases affecting the greatest number of people; develop alternative models of health delivery for special populations; study the impact of psychosocial well-being on illness and disease; develop approaches to encouraging health life styles; and study effective intervention models for the mentally impaired.

The plan also directs research efforts toward examining the impact of care coordination on treatment effectivenesses and efficiency.

Additionally, funds would be available to continue to develop quality indicators for measuring treatment effectiveness in all types of inpatient and outpatient health care settings, and to develop practice guidelines that can assist physicians and other health care practitioners. Research will also be directed at reducing the number of unnecessary medical and diagnostic procedures.

MEDICAL MALPRACTICE REFORMS

The plan directs the NHB to establish a special commission to develop recommendations for medical malpractice reform. The goals of such reforms are to reduce the costs associated with malpractice insurance, reduce the basic for malpractice claims, target physicians and other health care providers who are incompetent, and develop mechanisms that will protect consumers who are victims of malpractice.

## THE S&L CRISIS

Mr. WIRTH. Mr. President, we are about to embark on a crime bill on the Senate floor and I hope we get to it. There will be a great deal of discussion during that debate about drug crimes, and there should be; about violent crimes in the Nation's streets, and there should be. We will have a vigorous debate on the death penalty. I am sure that we will have a vigorous debate on the assault provisions, and other items of not insignificant note and great controversy.

I hope, as well, we will have an opportunity during the crime bill to focus once again on perhaps the greatest example of white collar crime that has existed in our Nation's history and that is the S&L crisis. This is the largest single financial crisis in our Nation's history. We have never faced any kind of a scandal like this before. Did I say crisis? Scandal. We have never faced anything like this, and it is going to end up costing the American taxpayer hundreds of billions of dollars.

And the question is who done it? The American taxpayer is beginning to ask questions of all of us and law enforcement authorities: Who is responsible and how are we going to recover some of this ill-gotten gain? These are perfectly logical, perfectly legitimate questions to be asked, because we are finding the more we look into this the more we discover the amount of criminal fraud involved.

Mr. President, let me give you some examples: Recently Attorney General Thornburgh, President Bush's Attorney General, spoke of "Epidemic of Fraud in the S&L Industry," and the Attorney General told us that at least 25 to 30 percent of thrift failures can be attributed to criminal activity by S&L officers. I am going to repeat: 25 to 30 percent of thrift failures can be attributed to criminal activity by S&L officers. This is from the Attorney General.

In another study the General Accounting Office when they looked at 26 thrift failures and case studies to see what happened, how did this happen, what went on, they found that in these 26 thrift failures in each of the insolvent institutions there appeared to be fraud and insider abuse.

We ought to be getting after this, and the American taxpayer knows we ought to be getting after it. In fact, when we passed FIRREA, the legislation designed to start to stabilize the S&L industry, we allocated $75 million additional funding for the Justice Department. The Chair voted for that; we all voted for that.

We thought this was an appropriate expenditure of money, increasing the funding necessary for the Attorney General, U.S. attorneys, and FBI agents. But, unfortunately, the current Justice Department has said that they do not want to spend the money. They do not want to pursue these cases of fraud, abuse, and criminal activity. "We do not need the money," they told us, when, in fact, just the opposite is what the data is showing us. The political level down there says, "We do not want to spend the money."

Talk to the working people at the Justice Department and they say, "Absolutely, we have to spend money to get additional FBI agents and to get additional U.S. attorneys on the job."

Whey do they say that? Not only because the Attorney General himself found all these cases of criminal activity, not only because the GAO found all this, but the FBI itself.

Let me tell you what is going on down there. The FBI received more than 20,000 referrals involving fraud in the financial services industry, more than 20,000 that the bureau cannot examine because they do not have the personnel to do so. They certainly want to, but they are being told from the top down, "Do not get into this." There are 20,000 referrals involving fraud in the financial industry that they cannot pursue.

Now, you might say maybe those are just credit card complaints or something like that. That is not the case. More than 1,000 of these referrals to the FBI we have been able to discover are major cases that involve losses of $100,000 or more. Yet they say: "We cannot use the money; we do not want these additional FBI agents; we do not want these additional U.S. attorneys."

It does not make a lot of sense to me and I suspect when the American public catches on to this it will not make a great deal of sense to them. That is the information coming from the Justice Department itself, from the working people of the Justice Department. "These are all the referrals we have that we cannot do anything about, because we do not have the personnel."

What else are we finding out? Timothy Ryan, the new Director of the Office of Thrift Supervision, about whom we had a very spirited debate, has been in a very good and chosen set of visits going around talking to all of us on the Banking Committee, who had been critical of his appointment, coming up to meet us. We have been finding out what he is doing, getting to know him. I was very pleased to spend a good deal of time with him. He came to my office, and we had an extensive discussion. Enforcement was one of the topics he wanted to discuss.

Mr. Ryan in the process of that discussion told me the following: He indicated that bank and thrift regulators were sending the Department of Justice 8,000 referrals per month regarding criminal and civil violations, and there were now at the Department of Justice 80,000 cases pending. This is the new Director of the Office of Thrift Supervision saying they are sending to the Department of Justice 8,000 referrals a month; they have 80,000 cases pending. This is the same Department of Justice that is telling us that they do not need any more resources.

I had offered an amendment during the time of the supplemental appropriation—and we had works, the Chair will remember, in the supplemental appropriation—for some $450 million for Panama. Clearly we have to do some things for Panama. We caused a great deal of destruction. We want to help rebuild the country. We look at the rationale, how do you get the $450 million. In the rationale, forgetting the $450 million, the administration had included $30 million emergency supplemental funding, $30 million for the promotion of tourism as an emergency supplemental item that we had to have right now, we are told, to promote tourism this spring and this summer before the fiscal year comes out.

I think most people looking at this are going to say, there probably is not an emergency, and I do not think we ought to be spending and can usefully spend $30 million in a dire emergency supplemental to promote tourism in Panama.

Why, Mr. President, we only spend altogether in the United States out of Federal Treasury, $14 million for tourism. I am sure that the Presiding Officer would think we could spend $14 million to promote Cape Cod and tourism in Massachusetts alone; spend that amount of money in the State of Colorado alone. All we spend annually in the United States is $14 million, but we are going to spend $30 million to promote tourism in Panama.

Common sense said to me, it does not seem to me that probably is a dire emergency supplemental. Why do we not make a shift? Why do we not shift the money from the Panama fund that is going to promotion of tourism and instead let us spend that money to pursue fraud, waste, abuse and criminal activity, and see if we can recover those hundreds of thousands of dollar cases that we know are there, millions and millions of dollars, probably billions of dollars, see if we can start to enforce the law and send some of these people to jail.

Do you know anyone in the S&L crisis who has gone to jail? Do your constituents know anyone who has gone to jail? Not many do. There has been a lot of gagging around this and lots of guys waiting for the statute of limitations to run out. Maybe they are going to be OK. I think there is, maybe, a sense of urgency in all this.

Unfortunately, when that amendment was offered, and Senator DIXON was a strong supporter of the amendment, and others were strong advocates of the amendment, the minority raised a procedural point of order. You could not transfer money from within one part of the budget to another part of the budget without getting a waiver of the Budget Act. That required 60-plus votes. We were not able to have 60 votes to do that and we did not transfer that money, and now under the dire emergency supplemental we are going to spend $30 million to promote tourism in Panama but not going to spend the money that is authorized to hire the FBI agents and to hire the U.S. attorneys for the purpose of going after this fraud, waste, abuse and criminal activity.

It may or may not be that the supplemental bill is the place to bring this amendment up again, but the purpose of my taking the floor today was to again outline to my colleagues the size and scope of the problem that sits out there, the need among our financial institutions for the kind of pursuit of the people that have been disobeying the law and effectively stealing from the American public.

The Attorney General is telling us at least 25 to 30 percent of the thrift failures can be attributed to criminal activity. That is from the Attorney General. The FBI has more than 20,000 referrals involving fraud which they cannot pursue. More than 1,000 of those are major cases.

Mr. Ryan is telling us the Justice Department is getting 8,000 referrals per month, and there are now 80,000 cases pending. If we do not think this is a crisis, the American public certainly does. It knows it is a crisis, Mr. President. I can assure you as this crime bill comes up there will be a variety of initiatives taken related to the S&L industry, related to the pursuit of ill-gotten gain and this criminal activity.

We not only have criminal activity that relates to the drug trade, we have white color criminal activity, and it is about time we pursued a good deal of that as well. I hope we will have the opportunity in this crime bill to fashion the kinds of amendments that are going to be necessary.

Mr. President, I yield the floor.

## TRIBUTE TO COL. MARK LOWRY

Mr. SASSER. Mr. President, I rise today to recognize 35 years of service to our great country by Col. Mark Lowry II, who, in June of this year will complete his command of the 401st Military Police Prisoner of War Camp, in Nashville, TN.

Throughout his many years of service, Colonel Lowry has distinguished himself on all fronts. He is a 1960 graduate of West Point and holds a doctorate degree from Syracuse University.

While in the Active Army, Colonel Lowry completed coursework at the Military Police School, Command and General Staff College, the National Defense University, and the Army War College.

Colonel Lowry has served with the 101st Airborne Division at Fort Campbell, KY, 173d Airborne Brigade in

Okinawa, and Headquarters, U.S. Army, Ryukyu Islands. He served two tours of duty in Vietnam, the last as operations officer, G3, Headquarters, U.S. Army, Vietnam.

Returning to the United States, Colonel Lowry served on the faculty at West Point for 4 years, whereupon he traded active service for the U.S. Army Reserve.

Colonel Lowry served with distinction in four assignments with the 100th Training Division in Kentucky. He had two battalion-level commands and, under his direction, the 100th Leadership Academy soared to unprecedented achievements and was widely recognized as a standard-setting unit in the 5th Army.

In 1987, after serving assignments to 5th Army Headquarters at Fort Sam Houston and 2d Army Headquarters in Atlanta, Colonel Lowry brought his experience and talents to Tennessee, where he assumed control of the 401st.

A decorated veteran, a highly respected and inspiring leader, Colonel Lowry now leaves the Volunteer State for the rich bluegrass of Kentucky. I want to take this opportunity to commend him for his partriotism, his valor, and his commitment to his country.

## CONGRATULATIONS TO DR. RALPH SCORZA, ARTHUR S. FLEMING AWARD RECIPIENT

Mr. BYRD. Mr. President, I have long put an emphasis on the need to achieve excellence in the classroom, in the workplace, and in the community. Consequently, when I find an individual who has exhibited excellence, and that individual happens to live in West Virginia, I take special pride in calling those achievements to the attention of the Senate.

Today, I congratulate Dr. Ralph Scorza on receiving the Arthur S. Fleming Award on May 3 of this year. The Arthur S. Fleming Awards Program honors outstanding young men and women in the Federal Government who have performed outstanding and meritorious work. Dr. Scorza is one of the five individuals governmentwide receiving this award this year for outstanding achievement in science and technology.

Dr. Scorza is a research horticulturist at the Appalachian Fruit Research Station in Kearneysville, WV. He has pioneered research on peach tree growth habits, canopy architecture, and light interactions with regard to high density production systems. Dr. Scorza was the first to report a spur-type peach tree, and has released a new peach cultivar "Bounty" and a nectarine "Earliscarlet." Peach cultivation has been declining in many areas of the United States, and particularly in the Northeast during the last 25 years. Much of this decline is due to high production costs associated with disease, insects, and crop loss due to cold. It is because of research such as that being undertaken by Dr. Scorza and others at the Appalachian Fruit Research Station that we can look forward to healthier, more productive, and more cold-resistant peach trees.

Dr. Scorza's pursuit of excellence does not stop at the door to his laboratory. He is a Cub Scout leader, has been involved in coaching elementary schoolchildren in the local American Youth Soccer Organization, and has spoken to local elementary school classes about careers in science. Dr. Scorza has shared his expertise in plant science by teaching classes at the local elementary school and guiding local college students through research projects in his laboratory as a part of a program to give college biology students practical research experience.

I commend Dr. Scorza for his dedication and for his pursuit of excellence. I also commend him for the work he is doing to encourage our young people to enter the scientific field. We need more people like Dr. Scorza, and I wish him a long and productive career.

## TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,893d day that Terry Anderson has been held in captivity in Beirut.

## J.A. JONES CONSTRUCTION CO. CELEBRATES 100 YEARS OF BUSINESS

Mr. HELMS. Mr. President, this year marks a century of business for J.A. Jones Construction Co., and I am proud to note the commemoration of this special centennial celebration.

In 100 years, the company founded by brickmason, James A. Jones, has grown into the 12th largest construction company in the United States. The Jones signature is seen on diverse projects from barracks to bridges, towers to tunnels, in city skylines and landscapes. During these 100 years, J.A. Jones Construction Co. has expanded operations from its headquarters in Charlotte, NC, into 40 States and more than 60 countries. As a diversified general contractor, J.A. Jones now employs more than 8,000 people worldwide.

Jones' construction is seen throughout the Charlotte skyline, having built the first skyscraper in the Carolinas in 1908 and, more recently, the tallest building in the Carolinas. J.A. Jones Construction is also well known outside North Carolina and throughout construction and engineering circles for such landmarks as the National Gallery of Art east wing in Washington, DC; AT&T Headquarters in New York City; and the Peachtree Plaza Hotel in Atlanta, GA.

J.A. Jones Construction played an invaluable role in our country's war efforts through construction projects during World War II and Vietnam. In 1945, the U.S. Department of War awarded the Army-Navy "E" Award for excellence in war production for the company's role in the Manhattan project with the construction of the gaseous diffusion plant at Oak Ridge, TN. From 1965 to 1972, J.A. Jones Construction participated in the military construction program in Vietnam. This was the first time a civilian contractor has been asked to work in a war zone. Deputy Assistant Secretary of Defense Edward Sheridan said:

> The volume and diversification of work performed in a few short years in a hostile environment staggers the imagination.

The company has a long association with the U.S. Army Corps of Engineers, dating back to the Great Depression with the construction of Albrook Airfield in Panama. That association has continued through the years and now includes contracts for a medical center in Egypt, a Voice of America relay station in Morocco, and a powerplant in New York State. Gen. H.J. Hatch of the U.S. Army has commended Jones' work with the Corps of Engineers and its long history of civil military activities noting the company's timely completion of projects and quality work.

J.A. Jones Construction has played a historic role here in the U.S. Capitol. In the fifties and sixties, the company constructed the addition to the Capitol's east front and performed interior restoration work. In 1984, the Architect of the Capitol again awarded the contract for renovation of the Capitol's west front to a Jones company.

Overseas, J.A. Jones Construction has designed and upgraded security facilities for several U.S. Embassies. The company's work brought high praise from Assistant Secretary Robert Lamb, Bureau of Diplomatic Security in the State Department, who noted Jones' "outstanding commitment to excellence" and the company's "great service to our country."

Mr. President, J.A. Jones Construction Co. places a high priority on commitment and service to the U.S. Government. The company is a strong supporter of the Government's efforts to privatize many government facilities. Jones is currently constructing a high-temperature water cogeneration plant in Watertown, NY, for the U.S. Army and will own and operate the completed project for the Government. This arrangement benefits all parties involved.

Both the Federal and State governments have placed environmental concerns high on the agenda. J.A. Jones

Construction shares these concerns and is eager to implement ideas that will prevent the deterioration of our living environment. Jones is also working to preserve the infrastructure of the country through evaluation and replacement of highways and bridges, water and sewer mains, and waste treatment plants.

Today, the Jones Group oversees Jones Construction and 12 subsidiaries throughout the country. The group continues to make construction history. It is currently rebuilding the Newark Airport in New Jersey and the world's tallest concrete structure in Chicago. J.A. Jones Construction Co. is now building a drydock for the Trident submarine fleet in Georgia and continues to upgrade security facilities for U.S. State Department Embassies in many countries. In its hometown, Charlotte's One First Union Center is one of Jones' proudest achievements.

As J.A. Jones Construction Co. and the Jones Group look to the next 100 years, the tradition and high standard of quality marking each Jones endeavor will ensure continued success and reinforce its position as an industry leader.

North Carolina takes pride in the accomplishments of J.A. Jones Construction. On behalf of my fellow North Carolinians, I extend my sincere congratulations on the celebration of this remarkable company's centennial and offer best wishes for continued success in the next century.

## DRUG ABUSE TREATMENT AND PREVENTION IMPROVEMENT ACT

Mr. CRANSTON. Mr. President, last Thursday, the distinguished chairman of the Labor and Human Resources Committee, Mr. KENNEDY, introduced S. 2649, the Drug Abuse Treatment and Prevention Improvement Act of 1990. I am proud to be a cosponsor of this important and far-reaching legislation.

I have long believed that we will never successfully beat back the drug plague until so-called demand-reduction activities—drug treatment and prevention—receive serious attention and support at least on a par with supply-reduction activities law enforcement and interdiction. As long as drug addicts who want to get off of drugs are turned away from treatment programs and as long as young people see no real alternatives to the drug culture and the profitable criminal activities of drug-trafficking gangs, we cannot and will not succeed.

Mr. President, S. 2649 seeks to establish comprehensive and long-term drug treatment and prevention programs. It recognizes that a broad spectrum of programs is needed to meet different community and population needs, such as programs targeted to pregnant women and children and individuals incarcerated in prison. I congratulate the chairman for his vision and his leadership in introducing this legislation.

Mr. President, I am particularly pleased that S. 2649 includes provisions, based on legislation I introduced, to enhance community drug prevention efforts and to expand training programs concerning drug abuse prevention.

Over the last couple of years, I have been holding public forums and meeting with community leaders throughout California on how best to reduce the demand for drugs. Working at the grassroots level, these parents, teachers, and community leaders are truly the foot soldiers in the war on drugs. But they need help. They need the financial assistance to put together comprehensive, effective and community-wide drug prevention programs. And they need the technical assistance to develop the strategies most likely to succeed.

As a result of these forums, last June, I introduced the proposed Comprehensive Community Substance Abuse Prevention Act, S. 1233. This bill would direct the Office of Substance Abuse Prevention [OSAP] to support coalitions of public and private organizations that represent law enforcement, schools, health and social service agencies, community-based organizations, and substance abuse prevention specialists in their efforts to develop substance abuse prevention programs. Representatives from among the clergy, academia, business, parents, youth, the media, and civic and fraternal groups would also be included in the community coalitions.

The bill would also establish a National Substance Abuse Prevention Training Program. Because of the emphasis over the last 10 years of dealing with the drug epidemic from a law enforcement point of view, there are few individuals trained in the field of drug prevention. Training programs are badly needed to enable communities to develop and implement comprehensive drug prevention programs.

Mr. President, $50 million has been appropriated for fiscal year 1990 for community prevention programs. The program is being conducted under a general authority for OSAP. I believe, however, that more specific congressional direction is needed to provide this new program with the greatest chance for success. I also believe the legislation is necessary to ensure the program's continuation in future years. This legislation would provide a blueprint for the implementation and continuation of this essential program.

Mr. President, there are many other provisions of this bill that I think are outstanding, including provisions to expand research into new medications to treat drug addiction that Senator BIDEN proposed and provisions to enhance drug treatment programs that Senator KENNEDY discussed previously. I again want to congratulate the Senator from Massachusetts and urge the enactment of this bill.

## REAUTHORIZATION OF THE RESOURCE CONSERVATION AND RECOVERY ACT

Mr. BURDICK. Mr. President, as chairman of the Committee on Environment and Public Works, I rise to discuss the reauthorization of the Resource Conservation and Recovery Act, also known as RCRA. On June 1, 1989, I stated that after Clean Air Act amendments, the next priority of the Environment and Public Works Committee would be RCRA reauthorization amendments. While I have tried to adhere to a schedule which would have had the committee reporting such amendments to the Senate in sufficient time to allow us to pass the legislation, conference with the House, and send a bill to the President for his signature this year, events may well have overtaken us.

It is well known that committee members, along with many other Senators, were engaged in a long, exhaustive debate on amendments to the Clean Air Act. The urgent need to address liability issues regarding oilspills, highlighted by the Exxon oilspill in Prince William Sound, AK, led my committee to send oilspill legislation to the Senate in mid-1989. The Senate subsequently passed that bill, and we are now engaged in a conference with the House on the oilspill issue. The House of Representatives is soon expected to pass its version of Clean Air Act amendments. Assuming it does so, I expect that we will be in conference on the Clean Air Act by mid-June.

Mr. President, it is anybody's guess now long it will take to get through the clean air conference and to have a conference report before the Senate for a vote. Because time is short, with only 14 weeks before Congress is expected to adjourn sine die, I can no longer assume that there exists enough time for the requisite hearings, markups, and debate necessary to address the wide range of RCRA issues in committee and on the Senate floor.

Amendments to the Resource Conservation and Recovery Act will not be a simple matter. The waste reduction, recycling, composting, and other matters related to municipal solid waste will require much consideration and will, in all likelihood, affect the population at large and numerous economic sectors, as well. Though I prefer to keep changes to the RCRA hazardous waste title to a minimum, any legislation in this area is always contentious.

Recently promulgated EPA land ban rules have already been the subject of controversy. I suspect commenters will have much to say about them in the context of reauthorization activities. A myriad of other hazardous waste issues are also likely to surface.

The Environmental Protection Agency has, for a considerable time, been working on pollution prevention legislation. We hope the Office of Management and Budget will clear the agency's draft and allow EPA to send an administration-approved package to us for consideration. Much of the administration's proposal relates to the municipal solid waste provisions of RCRA. Indeed, I am informed that many of the ideas contained in EPA's draft pollution prevention bill are similar to those contained in legislation introduced last year by Senator BAUCUS as S. 1113 and by Senator CHAFEE as S. 1112.

On the hazardous waste side, RCRA is the statute which, I believe, represents a strong connection among all environmental media: land, air, ground water, surface water. Consequently, I believe RCRA reauthorization rightfully should include waste reduction or pollution prevention issues. I believe that it would be wasteful for my committee and for the Senate to address such issues separately from RCRA itself. Were a freestanding waste reduction bill to proceed, it is my judgment that we would have to revisit similar issues in RCRA reauthorization.

I now intend that RCRA reauthorization be my committee's first priority in the 102d Congress. In order to proceed as soon as possible on such legislation next year, I have asked the chairman of the Environmental Protection Subcommittee, Senator BAUCUS to thold additional RCRA hearings this year. Senator BAUCUS and I have agreed that subsequent to those hearings we will work toward a comprehensive RCRA package for our consideration in the next Congress. In the interim, I have directed my staff to meet with interested parties to discuss their RCRA related concerns and ideas.

Mr. President, I hope those interested in the reauthorization of the Resource Conservation and Recovery Act now have a better understanding of the committee's plans regarding such important legislation. Again, all interested parties are invited to discuss with the committee their thoughts on solid and hazardous waste.

## ANNOUNCEMENT OF RCRA HEARINGS

Mr. BAUCUS. Mr. President, now that the Senate has passed clean air legislation, I have been getting many inquiries from my colleagues about the schedule for reauthorizing the Resource Conservation and Recovery Act. As chairman of the Environmental Protection Subcommittee, I want to spend a few moments to notify my colleagues of my plans for RCRA legislation.

I have publicly mentioned on several occasions that, after clean air legislation has been put to rest, RCRA will be the next major environmental initiative. As my colleagues know, the Environmental Protection Subcommittee and the full Committee on Environment and Public Works spent the better part of this Congress discussing and debating clean air legislation. And we are still not finished.

The House is now considering their own clean air bill, and we expect to be in conference shortly. And as my colleagues also know, we are now in the midst of a conference on oilspill legislation.

This is all to say that, while RCRA is the next major piece to environmental legislation, given our workload, it is doubtful that we will have enough time to fully debate all of the complex and controversial RCRA issues this year. But, as subcommittee chairman, I want to let my colleagues know that I intend to begin serious RCRA discussions this year.

Last June I held a hearing on pending RCRA legislation. I intend to continue hearings on RCRA issues, beginning next month. On or about June 26 I will hold a hearing to consider interstate waste transport issues. This politically charged issue will be at the heart of the RCRA debate.

For my colleagues who do not yet understand this issue, the interstate waste transport controversy calls into question the extent of States rights. And let me point out that in our environmental laws we have been very careful to reserve a State's right to provide more restrictive controls within each State. States should not be deprived of their right and obligation to protect their citizens and environment from the hazards of solid waste. In my own State of Montana, we feel strongly that our State should not become a dumping ground for the rest of the Nation.

The latest controversy—regarding the creation of State barriers to restrict the interstate transport of solid waste—is pitting waste exporting States against waste importing States. It is calling into question just how far States are allowed to go. The hearing will provide the first opportunity to examine this issue in detail, and more importantly decide what we can do about it.

I also plan to hold a hearing on recycling. I plan to use this hearing to examine recycling incentives and disincentives. I intend to examine regulations, policies, and other barriers which discriminate against recycling, as well as policies that can be used to stimulate recycling.

These hearings will continue to establish a foundation for enacting comprehensive RCRA legislation in the next Congress.

This will not be easy. But as chairman of the Environmental Protection Subcommittee I will be working toward a comprehensive RCRA package. I have discussed these plans with Chairman BURDICK and we both agree that this is what we need to do.

I am convinced, as is Chairman BURDICK, that there is no single problem and no single solution. Our Nation has many solid waste problems and we must provide for a variety of solutions. We must resist the temptation to tackle the sexy issues—like pollution prevention—now and leave the tough but critically important issues until tomorrow, when it may be too late.

During this Congress a number of individual bills have been introduced to tackle different portions of this crisis. Many are excellent bills and my colleagues should be commended for their leadership on the issue. But as I'm sure they will agree, as separate bills they will not solve our crisis. But weaved together in a comprehensive fashion, they will help us through the solid waste maize and put us on track toward a responsible solid waste program.

I look forward to working with my colleagues to join me in working to enact strong comprehensive RCRA legislation.

## RECESS

The PRESIDING OFFICER. Under the previous order the Senate will stand in recess until the hour of 2:15 p.m.

Thereupon, at 12:30 p.m., the Senate recessed until 2:15 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer [Mr. SANFORD].

The PRESIDING OFFICER. In my capacity as the Senator from North Carolina, I suggest the absence of a quorum. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Republican leader is recognized.

Mr. DOLE. I thank the Chair.

(The remarks of Mr. DOLE pertaining to the introduction of Senate Joint Resolution 324 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BRYAN). Without objection, it is so ordered.

Mr. McCAIN. Mr. President, I ask unanimous consent that I be allowed to speak as if in morning business for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## PASSAGE OF THE AMERICANS WITH DISABILITIES ACT BY THE HOUSE OF REPRESENTATIVES

Mr. McCAIN. Mr. President, I am pleased that the House of Representatives has just passed the Americans With Disabilities Act. This important legislation, of which I was proud to be an original cosponsor, will ensure equality for our Nation's 43 million disabled citizens.

I am particularly gratified that the telecommunications section, title IV, was passed and will now open our Nation's telecommunications network to the 24 million Americans who are hearing and/or speech impaired. Mr. President, the ADA continues the goal of universal telephone service which I set forth 2 years ago when I introduced the Telecommunications Accessibility Enhancement Act of 1989, which subsequently became Public Law 100-542. That bill mandated that the Federal Government become accessible to our deaf and hearing impaired citizens. Here, we require that the whole Nation be accessible.

It has been over 100 years since Alexander Graham Bell invented the telephone as a device to help his deaf wife. Can you imagine not being able to pick up a phone and call anyone, anyplace? The telephone has become an essential part of our daily lives and commerce, but as a result, it has also become one of the major barriers deaf and hard of hearing people must face everyday.

We must ensure that our entire telephone system truly becomes universal. Last year I introduced S. 1452 to mandate that accessibility. This measure was incorporated into the ADA as title IV, and it will move us closer than ever before toward granting the hearing- and speech-impaired community the type of independence and greater opportunities sought by other sections of the ADA.

Legislation, however, cannot alone break down the walls of isolation or solve all these problems. Action at all levels of society, by each of us, is critical. If given the opportunity, the only thing that limits these individuals are their own dreams—but we must all work especially hard to make sure they are given the opportunity.

Mr. President, the opportunity I speak of is a very fragile concept. Our Nation stands on the world stage as the torch bearer of freedom and opportunity. The ADA reaffirms our historical commitment to that goal. I am confident that by passing this legislation, we are sending forth a resounding message that we will not accept discrimination and that Americans should be viewed on the basis of merit, nothing else.

I call on everyone who has expanded the concept of opportunity to rally together and make equal opportunity more than law, but a state of mind. I call on these heroes of the American way, individuals such as Justin Dart, I. King Jordan, and others who daily overcome the barriers society places before them to continue their fight and never, never give up.

Mr. President, I want to thank my colleagues for their help and support as I crafted title IV of the ADA, but most importantly, I want to thank the 24 million deaf and hearing impaired Americans who have continued their valiant crusade to see their dreams become reality.

Mr. President, I yield back the remainder of my time.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## DEATH PENALTY FOR MAJOR DRUG DEALERS

Mr. D'AMATO. Mr. President, on November 21, 1989, I introduced S. 1955, along with 33 cosponsors. That bill provided for the death penalty for major drug dealers, because I believe that those who sow the seeds of death and destruction should face the death penalty.

They are indeed the worst of the worst, and they deserve the death penalty. They bring death and destruction to our communities. They make us prisoners in our own homes.

I pointed out, there were 33 cosponsors. It was carefully crafted and drawn to deal with those who lead the criminal enterprise system within the drug cartels—not the street corner dealer, not the addict, not the young college student who might become involved in a small transaction of the selling of drugs to a friend or a fellow student—but for those who were involved in at least three felonies and for those that distribute the large quantities that we hear increasingly more about. We define it as 30 kilograms or 66 pounds of heroin; 150 kilograms, which translates into 330 pounds of cocaine; or enterprises which receive $10 million during any 12-month period from the manufacture, importation, or the distribution of drugs.

Mr. President, let us look at some of the relevant things that take place in our communities, in our urban centers, and throughout our Nation. Because of these dealers, traffickers in death, we not only have the kinds of robberies and killings and muggings, and the fear that is constant and pervasive not only in our inner core cities but throughout our rural hamlets, but we have something much more tragic—the most innocent of the innocent; we hear of children shot down on playgrounds because of turf battles. What about the 200,000 addicted babies that are born each year whose mothers are drug addicts. That is 200,000 babies annually; again the most innocent of the innocent.

We need to talk about the incredible pain and anguish that that brings to a family, and the incredible cost it brings to society.

Last week the drug czar, William Bennett, submitted legislation similar to my death penalty bill as part of his National Drug Control Strategy Implementation Act.

His legislation, which I intend to file as an amendment to S. 1970, permits the death penalty for major drug dealers and drug kingpins who attempt a killing to obstruct an investigation or prosecution and for drug-related killings resulting from extreme recklessness, for example, killing of innocent bystanders during a shootout among drug dealers.

As you recall, we passed legislation 2 years ago which brought about the death penalty, for the first time, for a killing that comes about as a result of the drug organizations and the kingpin ordering that killing. I understand that in Chicago, for the first time, that Federal law is being implemented.

This bill says that where there is that reckless endangerment, where innocent bystanders are shot down, the death penalty can be applicable. It is interesting to note that this body passed that legislation overwhelmingly and that, in conference, the House of Representatives dropped it out. What they were thinking about is beyond me, because, again, if a person demonstrates that kind of reckless disregard for innocent bystanders, why should he not face the death penalty?

The only change I make in the legislation and the amendment which I intend to offer along with others of my colleagues is to make it clear that those who commit these crimes, if they are not sentenced to the death penalty, will be sentenced to life in prison. So you can say that this

amendment to our crime package will provide life imprisonment or the death penalty.

Why do I do that? Because, Mr. President, we have heard those who say, if you offer a bill that provides penalties of 20 years up to life that this is more severe. So, we are making a statement very clearly that there will be, if you are convicted, life imprisonment at the least and the death penalty where the jury finds that there are no extenuating circumstances and you are a major importer or transactor of the kind of drugs we are talking about. As far as this Senator is concerned, there are no mitigating circumstances; there are no mitigating factors. They are responsible for consigning the innocent of the innocent, 200,000 babies a year, to a living death of being born into addiction. These people forfeit their right, as far as I am concerned, to be treated any more humanely than the death penalty.

Mr. President, 34 percent, one third, of the convicted murderers surveyed by the Justice Department in 1986 used a drug every day in the month before their crimes, and a third to a half of the homicides in our Nation's cities are drug related. Three-quarters of all robberies and half of all felony assaults by young people now involve drug users. Over one-third of all violent felonies are committed by persons under the influence of drugs.

I cite these statistics to show the kind of incredible impact and harm these major dealers and organizations have on our communities and how this nation has, because of these dealers, lost its domestic tranquility.

In one 12-month period in Miami, 573 narcotics users were responsible for committing over 12,000 crimes, 6,000 robberies and assaults and 6,700 burglaries.

A 1983 study, conducted by researchers at Temple University, the Johns Hopkins University School of Medicine, and the University of Maryland, produced a staggering statistic in terms of what happens to those people who do become addicted, what happens to their lives and how that transcends into a community. Three hundred fifty-four heroin addicts in this study committed over 770,000 crimes over a 9-year period of time. We are talking about walking crime machines.

When people wonder about the loss of domestic tranquility and people wonder about the loss of quality of life that is taking place in our communities, one must look to the drug epidemic as a cause. The drug traffickers know how dangerous the crimes they commit are but they do not care. The fact is that they know that innocent people will die. The fact is they know that they traffic in a dangerous business. But the fact of the matter is that this Government has lacked the gumption to stand up and say, yes, we know and we recognize that this is not going to stop the drug epidemic, but it certainly symbolizes that we are going to undertake a serious effort. Those who are responsible for the tragic consequences that are taking place in our communities, who are part and parcel of this, and who make these profits and are responsible for incredible shipments or sales of these drugs—and I call them merchants of death—that they should be prepared to face the ultimate punishment. And I think that sends a very strong message.

Hopefully, with the adoption of other measures, in the areas of education, training, rehabilitation, and drug testing, we can turn the tide. Drug testing as well as education is going to play an important role in attempting to reverse that tide.

Mr. President, I ask unanimous consent that the text of the amendment that I will be proposing along with other Members be printed after my remarks.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

At the appropriate place insert the following:

SECTION . SHORT TITLE.

This subtitle may be cited as the "Drug Kingpin Death Penalty Act of 1990."

SEC. . DEATH PENALTY AUTHORIZATIONS AND PROCEDURES.

Title 18 of the United States Code is amended—

(a) by adding the following new chapter after chapter 227:

"CHAPTER 228—DEATH PENALTY

"Sec.
"3591. Sentence of death.
"3592. Factors to be considered in determining whether a sentence of death is justified.
"3593. Special hearing to determine whether a sentence of death is justified.
"3594. Imposition of a sentence of death.
"3595. Review of a sentence of death.
"3596. Implementation of sentence of death.
"3597. Use of State facilities.
"3598. Appointment of counsel.
"3599. Collateral attack on judgment imposing sentence of death.

"SEC. 3591. SENTENCE OF DEATH.

"A defendant who has been found guilty of—

"(a) an offense referred to in section 408(c)(1) of the Controlled Substances Act (21 U.S.C. 848(c)(1)), committed as part of a continuing criminal enterprise offense under the conditions described in subsection (b) of that section;

"(b) an offense referred to in section 408(c)(1) of the Controlled Substances Act (21 U.S.C. 848(c)(1)), committed as part of a continuing criminal enterprise offense under that section, where the defendant is a principal administrator, organizer or leader of such an enterprise, and the defendant, in order to obstruct the investigation or prosecution of the enterprise or an offense involved in the enterprise, attempts to kill or knowingly directs, advises, authorizes, or assists another to attempt to kill any public officer, juror, witness, or member of the family or household of such a person; or

"(c) an offense constituting a felony violation of the Controlled Substances Act (21 U.S.C. 801 et seq.), the Controlled Substances Import and Export Act (21 U.S.C. 951 et seq.), or the Maritime Drug Law Enforcement Act (46 U.S.C. App. 1901 et seq.), where the defendant, intending to cause death or acting with reckless disregard for human life, engages in such a violation, and the death of another person results in the course of the violation or from the use of the controlled substance involved in the violation;

shall be sentenced to death if, after consideration of the factors set forth in section 3592 in the course of a hearing held pursuant to section 3593, it is determined that imposition of a sentence of death is justified: Provided, That no person may be sentenced to death who was less than eighteen years of age at the time of offense; and provided that if a defendant described in section 3591(b) or (c) is not sentenced to death, said defendant shall be sentenced to life in prison.

"SEC. 3592. FACTORS TO BE CONSIDERED IN DETERMINING WHETHER A SENTENCE OF DEATH IS JUSTIFIED.

"(a) MITIGATING FACTORS.—In determining whether a sentence of death is justified for an offense described in section 3591, the jury, or if there is no jury, the court, shall consider each of the following mitigating factors and determine which, if any, exist:

"(1) MENTAL CAPACITY.—The defendant's mental capacity to appreciate the wrongfulness of his conduct or to conform his conduct to the requirements of law was significantly impaired, regardless of whether the capacity was so impaired as to constitute a defense to the charge.

"(2) DURESS.—The defendant was under unusual and substantial duress, regardless of whether the duress was of such a degree as to constitute a defense to the charge.

"(3) PARTICIPATION IN OFFENSE MINOR.—The defendant is punishable as a principal (as defined in section 2 of title 18 of the United States Code) in the offense, which was committed by another, but the defendant's participation was relatively minor, regardless of whether the participation was so minor as to constitute a defense to the charge. The jury, or if there is no jury, the court, shall consider whether any other aspect of the defendant's character or record or any other circumstance of the offense that the defendant may proffer as a mitigating factor exists.

"(b) AGGRAVATING FACTORS.—In determining whether a sentence of death is justified for an offense described in section 3591, the jury, or if there is no jury, the court, shall consider each of the following aggravating factors and determine which, if any, exist—

"(1) PREVIOUS CONVICTION OF OFFENSE FOR WHICH A SENTENCE OF DEATH OR LIFE IMPRISONMENT WAS AUTHORIZED.—The defendant has previously been convicted of another Federal or State offense resulting in the death of a person, for which a sentence of life imprisonment or death was authorized by statute.

"(2) PREVIOUS CONVICTIONS OF VIOLENT OFFENSES.—The defendant has previously been convicted of two or more Federal or State offenses, each punishable by a term of imprisonment of more than one year, committed on different occasions, involving the infliction of, or attempted infliction of, seri-

ous bodily injury or death upon another person.

"(3) PREVIOUS CONVICTIONS OF DRUG OFFENSES.—The defendant has previously been convicted of two or more Federal or State offenses, each punishable by a term of imprisonment of more than one year, committed on different occasions, involving the importation, manufacture, or distribution of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)).

"(4) PREVIOUS CONVICTIONS OF VIOLENT AND DRUG OFFENSES.—The defendant has previously been convicted of a Federal or State offense, punishable by a term of imprisonment of more than one year, involving the infliction of, or attempted infliction of, serious bodily injury or death upon another person, and has previously been convicted of a Federal or State offense, committed on a different occasion and punishable by a term of imprisonment of more than one year, involving the importation, manufacture, or distribution of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)).

"(5) SERIOUS DRUG FELONY CONVICTION.—The defendant has previously been convicted of another Federal or State offense involving the manufacture, distribution, importation, or possession of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)) for which a sentence of five or more years of imprisonment was authorized by statute.

"(6) USE OF FIREARM.—In committing the offense, or in furtherance of a continuing criminal enterprise of which the offense was a part, the defendant used a firearm or knowingly directed, advised, authorized, or assisted another to use a firearm, as defined in section 921 of this title, to threaten, intimidate, assault, or injure a person.

"(7) DISTRIBUTION TO PERSONS UNDER TWENTY-ONE.—The offense, or a continuing criminal enterprise of which the offense was a part, involved a violation of section 405 of the Controlled Substances Act (21 U.S.C. 845) which was committed directly by the defendant or for which the defendant would be liable under section 2 of this title.

"(8) DISTRIBUTION NEAR SCHOOLS.—The offense, or a continuing criminal enterprise of which the offense was a part, involved a violation of section 405A of the Controlled Substances Act (21 U.S.C. 845a) which was committed directly by the defendant or for which the defendant would be liable under section 2 of this title.

"(9) USING MINORS IN TRAFFICKING.—The offense, or a continuing criminal enterprise of which the offense was a part, involved a violation of section 405B of the Controlled Substances Act (21 U.S.C. 845b) which was committed directly by the defendant or for which the defendant would be liable under section 2 of this title.

"(10) LETHAL ADULTERANT.—The offense involved the importation, manufacture, or distribution of a controlled substance (as defined in section 102 of the Controlled Substances Act (21 U.S.C. 802)) mixed with a potentially lethal adulterant, and the defendant was aware of the presence of the adulterant.

The jury, or if there is no jury, the court, may consider whether any other aggravating factors exist.

"SEC. 3593. SPECIAL HEARING TO DETERMINE WHETHER A SENTENCE OF DEATH IS JUSTIFIED.

"(a) NOTICE BY THE GOVERNMENT.—Whenever the Government intends to seek the death penalty for an offense described in section 3591, the attorney for the government, a reasonable time before the trial, or before acceptance by the court of a plea of guilty, or at such time thereafter as the court may permit upon a showing of good cause, shall sign and file with the court, and serve on the defendant, a notice—

"(1) that the Government in the event of conviction will seek the sentence of death; and

"(2) setting forth the aggravating factor or factors enumerated in section 3592 and any other aggravating factor not specifically enumerated in section 3592, that the Government, if the defendant is convicted, will seek to prove as the basis for the death penalty.

The court may permit the attorney for the government to amend the notice upon a showing of good cause.

"(b) HEARING BEFORE A COURT OR JURY.—When the attorney for the government has filed a notice as required under subsection (a) and the defendant is found guilty of an offense described in section 3591, the judge who presided at the trial or before whom the guilty plea was entered, or another judge if that judge is unavailable, shall conduct a separate sentencing hearing to determine the punishment to be imposed. Prior to such hearing, no presentence report shall be prepared by the United States Probation Service, notwithstanding the provisions of the Federal Rules of Criminal Procedure. The hearing shall be conducted—

"(1) before the jury that determined the defendant's guilt;

"(2) before a jury impaneled for the purposes of the hearing if—

"(A) the defendant was convicted upon a plea of guilty;

"(B) the defendant was convicted after a trial before the court sitting without a jury;

"(C) the jury that determined the defendant's guilt was discharged for good cause; or

"(D) after initial imposition of a sentence under this section, reconsideration of the sentence under the section is necessary; or

"(3) before the court alone, upon motion of the defendant and with the approval of the attorney for the government.

A jury impaneled pursuant to paragraph (2) shall consist of twelve members, unless, at any time before the conclusion of the hearing, the parties stipulate, with the approval of the court, that it shall consist of a lesser number.

"(c) PROOF OF MITIGATING AND AGGRAVATING FACTORS.—At the hearing, information may be presented as to—

"(1) any matter relating to any mitigating factor listed in section 3592 and any other mitigating factor; and

"(2) any matter relating to any aggravating factor listed in section 3592 for which notice has been provided under subsection (a)(2) and (if information is presented relating to such a listed factor) any other aggravating factor for which notice has been so provided.

Information presented may include the trial transcript and exhibits. Any other information relevant to such mitigating or aggravating factors may be presented by either the government or the defendant, regardless of its admissibility under the rules governing admission of evidence at criminal trials, except that information may be excluded if its probative value is outweighed by the danger of creating unfair prejudice, confusing the issues, or misleading the jury. The attorney for the government and for the defendant shall be permitted to rebut any information received at the hearing, and shall be given fair opportunity to present argument as to the adequacy of the information to establish the existence of any aggravating or mitigating factor, and as to the appropriateness in that case of imposing a sentence of death. The attorney for the government shall open the argument. The defendant shall be permitted to reply. The government shall then be permitted to reply in rebuttal. The burden of establishing the existence of an aggravating factor is on the government, and is not satisfied unless the existence of such a factor is established beyond a reasonable doubt. The burden of establishing the existence of any mitigating factor is on the defendant, and is not satisfied unless the existence of such a factor is established by a preponderance of the evidence.

"(d) RETURN OF SPECIAL FINDINGS.—The jury, or if there is no jury, the court, shall consider all the information received during the hearing. It shall return special findings identifying any aggravating factor or factors set forth in section 3592 found to exist and any other aggravating factor for which notice has been provided under subsection (a) found to exist. A finding with respect to a mitigating factor may be made by one or more members of the jury, and any member of the jury who finds the existence of a mitigating factor may consider such factor established for purposes of this section regardless of the number of jurors who concur that the factor has been established. A finding with respect to any aggravating factor must be unanimous. If no aggravating factor set forth in section 3592 is found to exist, the court shall impose a sentence other than death authorized by law.

"(e) RETURN OF A FINDING CONCERNING A SENTENCE OF DEATH.—If an aggravating factor required to be considered under section 3592(b) is found to exist, the jury, or if there is no jury, the court, shall then consider whether the aggravating factor or factors found to exist outweigh any mitigating factor or factors. The jury, or if there is no jury, the court, shall recommend a sentence of death if it unanimously finds at least one aggravating factor and no mitigating factor or if it finds one or more aggravating factors which outweigh any mitigating factors. In any other case, it shall not recommend a sentence of death. The jury shall be instructed that it must avoid any influence of sympathy, sentiment, passion, prejudice, or other arbitrary factors in its decision, and should make such a recommendation as the information warrants.

"(f) SPECIAL PRECAUTION TO ASSURE AGAINST DISCRIMINATION.—In a hearing held before a jury, the court, prior to the return of a finding under subsection (e), shall instruct the jury that, in considering whether a sentence of death is justified, it shall not consider the race, color, religious beliefs, national origin, or sex of the defendant or of any victim and that the jury is not to recommend a sentence of death unless it has concluded that it would recommend a sentence of death for the crime in question no matter what the race, color, religious beliefs, national origin, or sex of the defendant or of any victim may be. The jury, upon return of a finding under subsection (e), shall also return to the court a certificate, signed by each juror, that consideration of the race, color, religious beliefs, national origin, or sex of the defendant or any victim was not involved in reaching his or her individual decision and that the individual juror would have made the same recommendation

regarding a sentence for the crime in question no matter what the race, color, religious beliefs, national origin, or sex of the defendant or any victim may be.

"SEC. 3594. IMPOSITION OF A SENTENCE OF DEATH.

"Upon the recommendation under section 3593(e) that a sentence of death be imposed, the court shall sentence the defendant to death. Otherwise the court shall impose a sentence, other than death, authorized by law. Notwithstanding any other provision of law, if the maximum term of imprisonment for the offense is life imprisonment, the court may impose a sentence of life imprisonment without the possibility of release or furlough.

"SEC. 3595. REVIEW OF A SENTENCE OF DEATH.

"(a) APPEAL.—In a case in which a sentence of death is imposed, the sentence shall be subject to review by the court of appeals upon appeal by the defendant. Notice of appeal of the sentence must be filed within the time specified for the filing of a notice of appeal of the judgment of conviction. An appeal of the sentence under this section may be consolidated with an appeal of the judgment of conviction and shall have priority over all other cases.

"(b) REVIEW.—The court of appeals shall review the entire record in the case, including—

"(1) the evidence submitted during the trial;

"(2) the information submitted during the sentencing hearing;

"(3) the procedures employed in the sentencing hearing; and

"(4) the special findings returned under section 3593(d).

"(c) DECISION AND DISPOSITION.—

"(1) If the court of appeals determines that—

"(A) the sentence of death was not imposed under the influence of passion, prejudice, or any other arbitrary factor; and

"(B) the evidence and information support the special findings of the existence of an aggravating factor or factors;

it shall affirm the sentence.

"(2) In any other case, the court of appeals shall remand the case for reconsideration under section 3593 or for imposition of another authorized sentence as appropriate.

"(3) The court of appeals shall state in writing the reasons for its disposition of an appeal of sentence of death under this section.

"SEC. 3596. IMPLEMENTATION OF SENTENCE OF DEATH.

"(a) A person who has been sentenced to death pursuant to the provisions of this chapter shall be committed to the custody of the Attorney General until exhaustion of the procedures for appeal of the judgment of conviction and for review of the sentence. When the sentence is to be implemented, the Attorney General shall release the person sentenced to death to the custody of a United States Marshal, who shall supervise implementation of the sentence in the manner prescribed by the law of the State in which the sentence is imposed. If the law of such State does not provide for implementation of a sentence of death, the court shall designate another State, the law of which does so provide, and the sentence shall be implemented in the manner prescribed by such law.

"(b) A sentence of death shall not be carried out upon a person who lacks the mental capacity to understand the death penalty and why it was imposed on that person, or upon a woman while she is pregnant.

"(c) No employee of any State department of corrections or the Federal Bureau of Prisons and no employee providing services to that department or bureau under contract shall be required, as a condition of that employment or contractual obligation, to be in attendance at or to participate in any execution carried out under this section if such participation is contrary to the moral or religious convictions of the employee. For purposes of this subsection, the term 'participate in any execution' includes personal preparation of the condemned individual and the apparatus used for the execution, and supervision of the activities of other personnel in carrying out such activities.

"SEC. 3597. USE OF STATE FACILITIES.

"A United States Marshal charged with supervising the implementation of a sentence of death may use appropriate State or local facilities for the purpose, may use the services of an appropriate State or local official or of a person such as an official employed for the purpose, and shall pay the costs thereof in an amount approved by the Attorney General.

"SEC. 3598. APPOINTMENT OF COUNSEL.

"(a) FEDERAL CAPITAL CASES.—

"(1) REPRESENTATION OF INDIGENT DEFENDANTS.—Notwithstanding any other provision of law, this subsection shall govern the appointment of counsel for any defendant against whom a sentence of death is sought, or on whom a sentence of death has been imposed, for an offense against the United States, where the defendant is or becomes financially unable to obtain adequate representation. Such a defendant shall be entitled to appointment of counsel from the commencement of trial proceedings until one of the conditions specified in section 3699(b) of this title has occurred.

"(2) REPRESENTATION BEFORE FINALITY OF JUDGMENT.—A defendant within the scope of this subsection shall have counsel appointed for trial representation as provided in section 3005 of this title. At least one counsel so appointed shall continue to represent the defendant until the conclusion of direct review of the judgment, unless replaced by the court with other qualified counsel.

"(3) REPRESENTATION AFTER FINALITY OF JUDGMENT.—When a judgment imposing a sentence of death has become final through affirmance by the Supreme Court on direct review, denial of certiorari by the Supreme Court on direct review, or expiration of the time for seeking direct review in the court of appeals or the Supreme Court, the government shall promptly notify the district court that imposed the sentence. Within 10 days of receipt of such notice, the district court shall proceed to make a determination whether the defendant is eligible under this subsection for appointment of counsel for subsequent proceedings. On the basis of the determination the court shall issue an order: (A) appointing one or more counsel to represent the defendant upon a finding that the defendant is financially unable to obtain adequate representation and wishes to have counsel appointed or is unable competently to decide whether to accept or reject appointment of counsel; (B) finding, after a hearing if necessary, that the defendant rejected appointment of counsel and made the decision with an understanding of its legal consequences; or (C); denying the appointment of counsel upon a finding that the defendant is financially able to obtain adequate representation. Counsel appointed pursuant to this paragraph shall be different from the counsel who represented the defendant at trial and on direct review unless the defendant and counsel request a continuation or renewal of the earlier representation.

"(4) STANDARDS FOR COMPETENCE OF COUNSEL.—In relation to a defendant who is entitled to appointment of counsel under this subsection, at least one counsel appointed for trial representation must have been admitted to the bar for at least five years and have at least three years of experience in the trial of felony cases in the federal district courts. If new counsel is appointed after judgment, at least one counsel so appointed must have been admitted to the bar for at least five years and have at least three years of experience in the litigation of felony cases in the federal courts of appeals or the Supreme Court. The court, for good cause, may appoint counsel who does not meet these standards, but whose background, knowledge, or experience would otherwise enable him or her to properly represent the defendant, with due consideration of the seriousness of the penalty and the nature of the litigation.

"(5) APPLICABILITY OF CRIMINAL JUSTICE ACT.—Except as otherwise provided in this subsection, the provisions of section 3006A of this title shall apply to appointments under this subsection.

"(6) CLAIMS OF INEFFECTIVENESS OF COUNSEL.—The ineffectiveness or incompetence of counsel during proceedings on a motion under section 2255 of title 28, United States Code, in a capital case shall not be a ground for relief from the judgment or sentence in any proceeding. This limitation shall not preclude the appointment of different counsel at any stage of the proceedings.

"(b) STATE CAPITAL CASES.—The laws of the United States shall not be construed to impose any requirement with respect to the appointment of counsel in any proceeding in a state court or other state proceeding in a capital case, other than any requirement imposed by the Constitution of the United States. In a proceeding under section 2254 of title 28, United States Code, relating to a state capital case, or any subsequent proceeding on review, appointment of counsel for a petitioner who is or becomes financially unable to afford counsel shall be in the discretion of the court, except as provided by a rule promulgated by the Supreme Court pursuant to statutory authority. Such appointment of counsel shall be governed by the provisions of section 3006A of this title.

"SEC. 3599. COLLATERAL ATTACK ON JUDGMENT IMPOSING SENTENCE OF DEATH.

"(a) TIME FOR MAKING SECTION 2255 MOTION.—In any case in which a sentence of death has been imposed for an offense against the United States and the judgment has become final as described in section 3598(a)(3) of this title, a motion in the case under section 2255 of title 28, United States Code, must be filed within 90 days of the issuance of the order relating to appointment of counsel under section 3598(a)(3) of this title. The court in which the motion is filed, for good cause shown, may extend the time for filing for a period not exceeding 60 days. A motion described in this section shall have priority over all non-capital matters in the district court, and in the court of appeals on review of the district court's decision.

"(b) STAY OF EXECUTION.—The execution of a sentence of death shall be stayed in the course of direct review of the judgment and during the litigation of an initial motion in the case under section 2255 of title 28,

United States Code. The stay shall run continuously following imposition of the sentence, and shall expire if—

"(1) the defendant fails to file a motion under section 2255 of title 28, United States Code, within the time specified in subsection (a), or fails to make a timely application for court of appeals review following the denial of such a motion by a district court; or

"(2) upon completion of district court and court of appeals review under section 2255 of title 28, United States Code, the motion under that section is denied and (A) the time for filing a petition for certiorari has expired and no petition has been filed; (B) a timely petition for certiorari was filed and the Supreme Court denied the petition; or (C) a timely petition for certiorari was filed and upon consideration of the case, the Supreme Court disposed of it in a manner that left the capital sentence undisturbed; or

"(3) before a district court, in the presence of counsel and after having been advised of the consequences of his decision, the defendant waives the right to file a motion under section 2255 of title 28, United States Code.

"(c) FINALITY OF THE DECISION ON REVIEW.—If one of the conditions specified in subsection (b) has occurred, no court thereafter shall have the authority to enter a stay of execution or grant relief in the case unless—

"(1) the basis for the stay and request for relief is a claim not presented in earlier proceedings; and

"(2) the failure to raise the claim is (A) the result of governmental action in violation of the Constitution or laws of the United States; (B) the result of the Supreme Court recognition of a new federal right that is retroactively applicable; or (C) based on a factual predicate that could not have been discovered through the exercise of reasonable diligence in time to present the claim in earlier proceedings; and

"(3) the facts underlying the claim would be sufficient, if proven, to undermine the court's confidence in the determination of guilt on the offense or offenses for which the death penalty was imposed."; and

(b) in the chapter analysis of part II, by adding the following new item after the item relating to chapter 227:

"228. Death penalty ..... 3591".

Mr. D'AMATO. Mr. President, I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ROBB). Without objection, it is so ordered.

## JIM HENSON

Mr. ADAMS. Mr. President, I rise today to pay tribute to a man who has impacted the lives of millions of Americans with his creative genius. Last week, Jim Henson, the creator of "Sesame Street" and "The Muppets" died tragically and suddenly of pneumonia.

There are no words that can adequately describe the feeling of sadness across the Nation at the news of Jim Henson's death. But, sometimes it is true that one picture is worth at least a thousand words. One picture that I want to share, even though I must do it descriptively with words, is an image of one house in this town, the Nation's Capitol.

There is a house in this city that contains a big plate glass window. In that window hangs four children's drawings of Kermit the Frog, Big Bird, and Bert, and Ernie. Tears are coming from the eyes of Kermit, Bert, and Ernie, and Big Bird is saying, "Bye Friend."

We have lost a friend. A friend who spent his life caring about all of our children and grandchildren. I cannot imagine that we will see the likes of Jim Henson again soon. He brought magic and hope to so many households across this Nation. He reached out to help children read, learn science and math and to help them realize that learning can be fun. He showed them how to be good citizens, good neighbors, and to distinguish right from wrong.

"Sesame Street" and "The Muppets" will continue but they will never again be quite the same. There will have to be a new Kermit and Ernie. But as will all those who have influenced the course of history, Jim Henson leaves a legacy behind him that will endure and continue to go on capturing the imagination of millions and millions of children in years to come.

## OPENNESS AND PREDICTABILITY IN DEFENSE AND SPACE

Mr. DOLE. Mr. President, last week, Lt. Gen. George L. Monahan, Director of the Strategic Defense Initiative Organization traveled to Geneva to provide Soviet negotiators at the defense and space talks with an in-depth look at the progress being made in the SDI Program.

General Monahan outlined the architecture which is taking shape around the promising brilliant pebbles—highly independent, small, low-cost satellites which would acquire, track, and destroy nuclear weapons flying toward the United States.

Moreover, the general answered all Soviet questions regarding the SDI Program.

In my view, through the Monahan visit the United States took a significant step toward furthering openness in the area of defense and space. Openness has long been a U.S. objective at these talks.

The value of openness is that it contributes to predictability in the strategic relationship. It does so by averting miscalculation and surprise which can be destabilizing.

The United States has traditionally been open about its defense policy, while the Soviet Union has been closed. The SDI Progam, among others, has been conducted openly as is evident in the annual report to the Congress on the strategic defense initiative.

My colleagues may recall that last December, top Soviet scientists toured two United States labs engaged in work on strategic defenses. This trip was organized by the United States in order to demonstrate how a U.S. proposal in the defense and space talks—visits to labs—would work. And, the Soviets, upon their return to Geneva, accepted this United States concept.

To followup on the December visit, the United States recently proposed that we and the Soviets each choose a ballistic missile defense project for a pilot run through all the U.S. proposed predictability measures: data exchange, meetings of experts, briefings, exercise of ABM test satellite notification procedures, visits to labs and observations of tests.

If we are able to do this, we will be well on the way to a free-standing agreement on predictability measures which the United States proposed just last month.

Predictability measures will not resolve all our differences in defense and space, but efforts like this recent visit to Geneva by General Monahan should demonstrate to the Soviets that we truly want an open, cooperative transition to a more stable deterrence—a deterrence which includes defenses. This, after all, is the United States objective at the defense and space talks.

As I have said before, the goal of arms control is to enhance stability and security. A cooperative transition to greater reliance on defenses will serve to enhance deterrence and thus, stability, as we move to lower levels of offensive weapons under a START regime.

And, as the President noted earlier this year, strategic defense "doesn't threaten a single person anywhere in the world * * * God forbid, if it ever had to be used, it would be used against missiles, not against people."

Mr. President, 5 years ago, maybe even a year ago, few would have imagined that the United States and the Soviet Union could even come this far together in the defense and space talks. But, I believe that the United States and the Soviet Union share some compelling interests—such as greater stability and security against the threat of ballistic missile proliferation—that could serve to move us even closer in this endeavor.

## THE MONTREAL PROTOCOL

Mr. LEAHY. Mr. President, there are reports that the White House has, against the recommendations of the State Departmnent and the Environmental Protection Agency, decided not to join over 140 other nations in setting up a special fund to assist poor Third World countries to comply with the Montreal protocol to reduce the emission of chlorofluorocarbons into the atmosphere. This is a replay of the White House decision earlier this year not to provide U.S. leadership in negotiating an international agreement on global warming.

Conclusion of the Montreal protocol was a fundamental step forward in controlling the problem of CFC damage to the upper ozone layer, and it is very much in the long-term national interests of the United States that there be maximum compliance with its requirements. This is why I am so disappointed with this latest sign of Bush administration refusal to cooperate with other nations in fighting international environmental threats such as global warming, and release of CFC's. There is an international meeting in June to negotiate additional arrangements under the Montreal Convention and to capitalize this special fund. I regret that the administration apparently intends not to declare its intention to make a U.S. contribution.

My information is that the United States share of a $100 million fund to help Third World compliance with the Montreal protocol would be $25 million over 3 years, or about $8.3 million per year. This is a pittance alongside the more than $8 billion the President has requested for security assistance in the fiscal year 1991 budget.

Mr. President, the legislation introduced today by Senator GORE would authorize a United States contribution of up to $25 million for the Montreal protocol. I strongly support it and only wish the President would use the authority he already has to provide these funds at the June meeting.

In my capacity as chairman of the Foreign Operations Subcommittee and in anticipation of Senator GORE's legislation, I recently included language in the statement of managers accompanying the fiscal year 1990 supplemental appropriations bill, indicating my intention to provide sufficient funds in the 1991 foreign operations bill for a U.S. contribution. We cannot stand by and allow U.S. leadership in protecting the atmosphere to be eroded for lack of $8 million. I will be contacting the members of my subcommittee soon to ask for their help and support as I seek the necessary money out of security assistance.

## "SONG OF STATEHOOD" RHODE ISLAND'S BICENTENNIAL

Mr. PELL. Mr. President, the month of May is a very special time in the historical calender of Rhode Island. On May 4, 1776, Rhode Island became the first of the Thirteen Colonies to declare its independence from the British crown. And 14 years later, on May 29, 1790, Rhode Island became the last of the Colonies to join the Union of States.

The same patriots who were determined to assert their independence from Britain were almost as reluctant to cede any of that independence to the new Federal Union. Only after 3 years of acrimonious debate over States rights did the motion to join the Union eke through the general assembly by a 34-to-32 vote.

Perhaps because of some lingering sense of the narrowness of that historic vote, its 200th anniversary is being observed rather quietly this year. I hasten to assure my colleagues, however, that there is no move afoot to reconsider the matter.

One Rhode Islander who wants to celebrate the occasion appropriately is Virginia Louise Doris, historian and poetess who frequently commemorates in epic verse important milestones of Rhode Island's history. I ask unanimous consent that her poem entitled "Song of Statehood" be printed in the RECORD at this point.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

"SONG OF STATEHOOD" RHODE ISLAND 1790–1990

Statehood, sweet statehood! our voices resound,
Queen by God's blessing, unsceptred, uncrowned!
Statehood, proud statehood! our pulses repeat,
Warm with her life-blood, as long as they beat!

Listen! The music of their dream perchance may linger still
In the old familiar places beneath their Emerald Hill.

Here at this alter our vows we renew
Still in thy cause to be loyal and true,
True to thy flag on the field and the wave,
Living to honor it, dying to save!

Wake in our breasts the living fires,
The holy faith that warmed our sires,
Thy spirit shed through every heart,
To every arm thy strength impart!

Our lips should fill the air with praise,
And pay the debt we owe,
So high above the songs we raise
The floods of garlands flow.

Harken! The trill of their drama perchance may linger still
In the new explored arbors beneath their Emerald Hill.

Statehood, sweet statehood! our voices resound,
Queen by God's blessing, unsceptred, uncrowned!
Statehood, proud statehood! our pulses repeat,
Warm with her life-blood, as long as they beat!

This Poem is dedicated to the Isle of Rhode men who drafted the proclamation of statehood, de fide!

While hope shall on her anchor lean,
May history fondly turn
To wreath the amaranth and the palm
Around their funeral urn. In Memoriam.

Land of Roger Williams, the Providence peacemaker and our founder! (1636)

## ACHIEVEMENT OF NORTH PROVIDENCE, RI

Mr. PELL. Mr. President, I wish to share with my colleagues the outstanding achievement of the town of North Providence, RI. The North Providence Senior Center Partnership was awarded the 1990 Community Achievement Award from the Administration on Aging for its excellent work in promoting community public/private partnerships to serve the needs of area senior citizens. I congratulate the town of North Providence and the NPSCP for receiving this honor.

Mr. President, in the late 1970's the North Providence Senior Center noticed a shortage of primary care physicians in their community and a resulting lack of accessibility to health care to many of the area's senior citizens. Emergency rooms were being overutilized at high costs to senior citizens and to the State.

The senior center, in concert with the town of North Providence, the Brown Medical School and Roger Williams General Hospital acted to fill the void. The solution—the establishment of a primary health care clinic at the North Providence Senior Center. The partnership now serves the needs of 200 of the town's senior citizens and their early intervention on numerous occasions has prevented disabling and more serious and costly illnesses for many seniors.

Rising health care costs and increasingly limited State and Federal budgets have made it more and more difficult to ensure that our Nation's senior citizens receive the care they need and deserve. The North Providence Senior Center Partnership fills a gap in services to the elderly by a carefully planned and innovative coordination of public and private efforts. The town of North Providence has risen to the task in an increasingly difficult situation.

In addition, Mr. President, I am pleased to report that since the inception of this partnership in North Providence other similar partnerships have been developed in other parts of my home State. These initiatives are especially critical in Rhode Island which boasts the Nation's third highest population of senior citizens.

The town of North Providence and the NPSCP truly deserve this award for excellent work in coordinating

community and public resources to provide care and services to senior citizens and for the example which the partnership has set in other parts of the State.

Mr. President, I congratulate Ms. Kathleen M. McKeon of the Rhode Island Department of Elderly Affairs; the Honorable Salvatore Mancini, mayor of North Providence; Ms. Corinne Calise Russo, director of the North Providence Senior Center; Mr. John Testa, chairman of the board of the North Providence Senior Citizens Center, and Dr. Marsha Fretwell, of Brown University's Program in Geriatric Medicine, who have been invited to Washington to receive this award.

## SENATE JOINT RESOLUTION 304

Mr. SHELBY. Mr. President, on May 3, I introduced Senate Joint Resolution 304 which designates October 17, 1990, "National Drug-Free Schools and Communities Education and Awareness Day." This joint resolution focuses schools on kicking off their 1990-91 academic year with drug education and awareness programs, which they will share with their communities on October 17, and throughout the year. I am happy to note that we already have 22 cosponsors for this joint resolution.

For too long, this country focused its antidrug abuse campaign on "Just Say No." Now, Mr. President, we are waking up and realizing that just saying "no" will not solve our problems. Rather, we must provide our children with positive choices to which they can say "yes." However, this is a very difficult job and one that can not be accomplished by any single group. Providing choices to which our children can say "yes" is a three-step process which requires the involvement of parents, educators, and members from all segments of the community.

The first step is to teach our children that the decisions they make affect not only themselves, but also their families, friends, schools, and communities. Our youth must learn that such decisions often have long-term effects which can irreversibly change their lives, for example, using drugs once can cause a student to lose a college scholarship or not be hired to a good job.

The second step is to provide our children with decisionmaking tools which will serve them throughout their lives. Decisionmaking tools are what we employ every day when we analyze the effects of the choices we make and view our options. Today's world is a complex and confusing place; therefore, we must teach our youth to cope with the many difficult situations they will find themselves in so they can confront and conquer problems instead of escaping through the use of drugs.

The third step is to provide our children with positive alternatives. These alternatives need to include, but not be limited to, after school sports programs, activities, and clubs, as well as community service projects and employment opportunities. We must provide our youth with enough positive alternatives to say "yes" to so they no longer view drugs as a viable option.

Self-esteem is critical for our youth. Unfortunately it is not something we can teach or give our children. However, it is something we can nurture and help our children develop. To do so, we must show our youth how important they are to us. If we as parents, educators, and community members do not show our children that they are important to us, how can we expect our children to value themselves and their communities. Listening to and becoming active participants in our youths' lives is the best way to demonstrate to our children their importance. While this role is often easier to see when discussing parents and teachers it is still vitally important that the community reach out to our youth.

Mr. President, I urge my colleagues to become cosponsors of the joint resolution.

## MESSAGE BY MAYOR DINKINS TO NEW YORK CITY ON RACIAL HARMONY

Mr. MOYNIHAN. Mr. President, as we proceed here on this floor, Mayor David Dinkins, in New York City, is speaking to a unity rally at the Cathedral of St. John the Divine.

Mayor Dinkins speaks with determined reason against bigotry, ignorance, and hate. He is, with inspiring effort, striving to calm the fears and passions which have ignited into violence, and have infected communities with noxious vigor. We fervently hope that his words find their audience with composing effect. New York City could scarcely be more in need for just that.

Mr. President, I ask unanimous consent that the text of this address by Mayor Dinkins be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

REMARKS BY MAYOR DAVID N. DINKINS

Good evening and thank you all for coming—and caring—about this City we all call home.

Look around you. This is a beautiful sight, in a magnificent place, and there is a feeling here—a spirit and a power—that simply cannot be denied.

So look around. Look at all the people who have joined here tonight out of concern for our community.

We are New York City—a gorgeous mosaic of race and religion, national origin and sexual orientation.

We come from every corner of every borough, old and young, disabled and temporarily able bodied, some with a little money and some with next to none. But we all came tonight because we care—about walking the streets without fear of force or violence; about having an affordable home and sending out kids to a decent school; and about living in peace with dignity and respect.

So look around you—look at your neighbor, look at all your neighbors. You are looking at the people who can change this City.

We are a proud and powerful people. We came here in droves, from around the world, seeking freedom and opportunity.

But the promise of New York has not always become the reality of our lives here in our hometown.

The poverty of the old world often gave way to the deprivation of the new world, for the streets were not paved with gold.

And the official discrimination of the old south was replaced by the unofficial—but sometimes more painful—prejudice of the north; for too long now, the dream deferred has seemed like a dream denied.

Too often, African-Americans came up from the red clay hills of Georgia, the fertile fields of Alabama and the Mississippi Delta, just to be ghettoized and victimized in Harlem, Bed-Stuy and South Jamaica.

And for Latinos, life in East Harlem and the South Bronx was sometimes little better than the lives they left behind in San Juan and Santo Domingo.

Some say this society has done all it can—but I say we've only just begun our long march for freedom.

Just a generation ago, legal segregation was still the law of this land.

Many Asians had been in this country, building and working for a long, long time, yet Koreans and other Asians were still excluded by quotas.

And the Ku Klux Klan and other haters were spreading their poison against African-Americans, Jews and Catholics alike.

So today, we have come a long way, but racism is still with us—and the lessons taught to us by Doctor Martin Luther King, Junior remain as valid and viable today as they were a generation ago.

When the cynics say there is nothing that can be done, let us remember Rosa Parks—and let's recall the power of principle.

And when we hear the voices of despair who say there's nothing more we can do about poverty and injustice, let's remind ourselves that on his last day on earth, Doctor King walked the picket line with sanitation workers—so likewise, let's renew our commitment to coalition.

Here tonight, in this hallowed hall, let us rededicate ourselves to the values of justice, opportunity and caring; let's renew our commitment to the spirit of struggle; and let's open a new front in the old fight for decency, tolerance and respect.

When a few shout out words of hate, we can drown them out with acts of hope.

When the bigots resort to violence, we can contain them and condemn them with our unity.

And when the instigators seek to turn us against each other, we can respond by turning to each other—and coming together to fight our common foes: cracks and crime; poverty, prejudice and pollution.

That's what brings us together: the shared sentiments and combined convictions of people squirming and struggling through the hard passages of urban life.

My friends, these are tough times in our City. The economy, of the nation and the region, barely sputters along. Crack and

AIDS have combined to create hardships like we've never seen before. And for ten long, hard years now, the national government has acted as if this City—and all cities—were on another planet.

I believe in foreign aid—and I support it for democracies around the world. I just wish we could get a little bit of it here in New York.

I promise you all, again here tonight, that I will devote every ounce of energy I have to confronting these challenges. But let me tell you, things will not get better overnight. And none of us will get ahead if we're fighting each other over crumbs falling from the the table of opportunity.

We are witnessing the children of the immigrants and the oppressed fighting each other as never before. The powerless are trying to prove their power by hurting those who are just as powerless.

It must stop—and it must stop now.

It matters not whether you are African-American, Italian, Puerto Rican, Dominican, Haitian, Jewish, Greek, Korean, Vietnamese, Indian, West Indian, native American—for no matter where you come from or what's been done to you—you have no right to lash-out against others.

Each of us must ask ourselves, our families and our own communities: Why do we fear people who are different—people we don't even know? Why do we use words and names that hurt when we've felt that sting ourselves?

No one among us can say we're immune; we're all in this together.

Each of us could be a victim; some of us—like Yusuf Hawkins—are victimized just because of the color of our skin, and we will never forget that those who killed him are guilty of racism in the first degree.

We must not allow his sacrifice to be forgotten.

So each of us must search for solutions.

There are a lot of communities in this City—and within each community there are a lot of conflicts.

I'll be walking the streets, meeting with you in your neighborhood schools, churches and synagogues. But I can't come to every community and I can't intervene in every conflict. And those who say that my presence is the solution misunderstand the problem.

Bias and bigotry wear a thousand different faces, in a thousand different places. And I look at each incident—each attack on decency, justice and the rule of law that protects us all—and I wonder where people learn to hate.

I'm tired of hatred. I've seen too much of it—too much pain and too much suffering—and I'm sick of it.

So let me be blunt: I need your help; I need you to be my eyes and ears, and my arms and legs in the community; I need you to be my companions in this campaign for respect and unity.

And I ask you to carry this spirit, the spirit of New York, of tolerance and togetherness, back with you to your neighborhoods.

When you're back home, I hope you will continue this campaign—by speaking with your family, your neighbors, and your colleagues.

Get involved—and stay involved.

Let's get to work fighting to bring infant mortality down and to get literacy and opportunity up.

Help out with your local anti-crime group—or work with me to make our schools community centers so kids have a place to go besides the evil world held out by the drug dealers.

Give me a hand—by speaking-up and speaking-out for new homes for our people, not new homeports for nuclear battleships.

Do what you can, but find something to do each day—just one thing—everyday, to spread the spirit.

Reach out to a neighbor or a local merchant to whom you've never spoken. Find out where he comes from; find out who she is. Give them a blue ribbon. Let your guard down—and let your neighbors into your life.

Find one group in your neighborhood—or one more group—and join. And whether it's your block association or parents association, your tenants' group or community group, go to the next meeting, stand up and say: let's fight bigotry and teach tolerance; let's band together to demand justice and to make our City better; and ask, "what can we do?"

Just say it, for these simple words—repeated time and time again—will unleash the energy and ingenuity bottled up inside all of us who want life to get better.

For there is much you can do.

Organize forums for people of different cultures and communities to come to know one another, as people, as individuals.

Write to your State Senator to urge passage of the bias-related violence bill that includes protection for gays and lesbians. Remind them those who killed James Zappalorti because he was gay are just as culpable and just as despicable as those who killed Michael Griffith because he was African-American, those who assaulted Victor Ramon because he was Latino, and those who killed Israel Rosen because he was a Hasidic Jew.

And when school is out and kids are on the streets and in the parks, make it your business to know what they're up to. Find something for them to do; talk with them; and give them a job or a chore if you can. We must not let them go to waste, for we must not lose our most precious opportunity.

I believe we have it within our power, in this City, in this decade, to transform our diversity from a source of division into a beautiful blossom of creativity, imagination and strength.

This is the time to come together—to create a wave of energy and unity so powerful that it can wash away the hate and the hurt.

So right here, right now, let us resolve to join in a permanent campaign to bring our City together.

Let us locate the love of life and love for this City that lies within each of us—and let's focus it and channel it to build a better City.

Together, let's follow our hopes and not our fears—because together, we can change the world.

Together—all together—we can spread the spirit of respect, of tolerance and unity into every corner of this City.

Tonight is just the start. We'll be talking and working and marching together for a long time to come. But someday, we will look back on this day, and we'll say that this was the time when New York woke up, turned around, and set out again to become the best place on earth.

Thank you.

God bless you.

And keep the faith.

## SUPPORT FOR CRIME CONTROL AND REFORM

Mr. COATS. Mr. President, I am pleased to be a cosponsor of S. 1971, the Violent Crime Control and Criminal Procedures Reform Act, introduced by Senator THURMOND. This omnibus package of legislative initiatives takes seriously both the prevalence of violent crime in America and the necessity for punishment. It incorporates criminal law and procedural reform measures called for by President Bush and contained in his national drug control strategy and crime control package.

Enactment of this legislation is strongly supported by the Department of Justice. In the words of Attorney General Thornburgh:

> Its adoption would be a fundamental contribution both toward enhancing the public's security against crime and improving the effectiveness of the Federal criminal justice system.

Let me mention the key provisions of S. 1971. Title I establishes constitutional procedures for implementation of the Federal death penalty for certain capital crimes and authorizes the death penalty for additional aggravated crimes, such as attempts to assassinate the President, hostage taking where death results, and genocide. It embodies most of the provisions of S. 32, which was recently reported by the Senate Judiciary Committee, but does not include the language of the so-called Racial Justice Act, and it is almost identical to legislation passed by the Senate in 1984 by a vote of 63 to 32. I shall discuss the death penalty provision at greater length later.

Title II reforms current habeas corpus procedures to promote finality of litigation and speedier criminal convictions in State courts. This provision incorporates the recommendations of the Powell commiteee which was formed in June 1988 by Chief Justice Rehnquist to look into the problems of delay and the lack of finality in capital cases. This provision was contained in similar legislation which passed the Senate in 1983 by a vote of 67 to 9. I shall return to this reform shortly.

Title III codifies the good faith exception to the exclusionary rule which has been sanctioned by the Supreme Court of the United States. Unfortunately evidence has been excluded at trial in many cases involving violent crime and drugs because a law enforcement officer mistakenly and innocently violated search and seizure rules, preventing conviction of known criminals. The Supreme Court has recognized that the exclusionary rule should not be used when the officer has acted in good faith. S. 1971 will close this legal loophole which has allowed violent criminals and drug offenders to go free on a technicality, so

that henceforth evidence of guilt will be admissible whenever the State shows that the arresting officer acted in good faith compliance with the fourth amendment.

Title IV strengthens the penalties for drug-related crimes and other violent crimes involving the use of firearms. This provision permits consideration of pretrial detention for certain offenses involving firearms and explosives, provides mandatory revocation of supervised release for possession of a firearm, and increases the penalties for giving false information in connection with the acquisition of a firearm.

Title V provides for mandatory drug testing of Federal defendants on postconviction release.

Title VI, which incorporates the provisions of S. 326 which earlier passed the Senate as an amendment to antidrug legislation, will enable the prosecution and imprisonment of persons who corrupt the administration of government at the Federal, State, and local levels.

Finally, section VII would facilitate the use of officially sanctioned undercover investigations, including sting operations, to combat crimes of trafficking in, or receiving stolen or counterfeited property.

Mr. President, I wish to comment briefly on two very important sections of S. 1971 which I believe are critical to the success of our wars on drugs and crime in America.

The Thurmond bill provides an enforceable Federal death penalty for a number of aggravated crimes, most of which result in the taking of innocent life. Specifically it would establish the necessary constitutional procedures for implementation of the death penalty for those Federal crimes which curently authorize a death sentence, namely, treason, espionage, murder, certain crimes involving explosives where death results, wrecking trains where death results, and air hijacking where death results. In addition, the legislation authorizes the death penalty for several additional serious crimes—murder by a Federal prisoner serving a life sentence, the taking of hostages where death results, murder for hire, murder in aid of racketeering, genocide and certain Presidential assassination attempts.

Let me add personally I do not believe that capital punishment should ever be imposed simply out of utility or vengeance. It must be imposed only when an innocent life is deliberately taken. Thus, it may be an appropriate penalty for certain violent crimes resulting in the murder of innocent victims. That is why I have voted in the past for the death penalty for drug-related murder, but not for peacetime espionage where no death results. Accordingly I am troubled by imposition of death for attempts to kill when no murder occurs. In S. 1971, however, the death penalty would be provided only if the defendant is found guilty beyond a reasonable doubt of an attempt to assassinate the President which results in bodily injury to the President or comes dangerously close to causing his death.

I am convinced that this crime control bill provides the necessary safeguards and complies with the constitutional procedures approved by the Supreme Court to ensure that capital punishment will be imposed only under very limited circumstances involving the most violent and heinous of crimes. For instance, the death penalty may be imposed for specific Federal aggravated offenses pursuant to a sentencing hearing only if it is determined that the death penalty is justified. In homicide cases the jury must find at least one threshold requirement regarding the defendant's state of mind at the time of the offense; if not, the death penalty cannot be imposed. The bill prohibits execution of a person under 18 years of age at the time of the crime—versus 16 years under current law. It also bars imposition of a death sentence on a pregnant woman and on mentally retarded persons, regardless of the nature of the crime. And a State employee will be excused from participating in an execution if such participation is contrary to his or her religious or moral beliefs.

The bill also sets forth the statutory mitigating and aggravating factors to be considered by the jury or judge in determining whether a sentence of death is justified. For instance, the Government has the burden of proving beyond a reasonable doubt the aggravating factors, while the defendant must show any mitigating factor by a preponderance of the evidence, and if the jury is not unanimous in finding a particular aggravating factor, the death penalty cannot be imposed. The jury must then decide whether aggravating factors outweigh mitigating factors to justify a death sentence, but regardless of such a finding, the jury still has the discretion to refrain from imposing the death penalty and must be so instructed. If the defendant appeals his death sentence, the appellate court must consider the entire record including trial evidence, information submitted, and the procedures employed during the sentencing hearing, and special findings returned at sentencing as to aggravating factors.

Thus, S. 1971 clearly provides strong protections and guarantees for the Federal criminal defendant convicted of an offense for which the death penalty is available. I am persuaded that this legislation contains sufficient procedural safeguards which will prevent arbitrary and capricious imposition of the death penalty for capital crimes.

Clearly, the death penalty provisions of S. 1971 are far superior to those contained in S. 1970, the Biden bill. Title I of that bill incorporates the language of the so-called Racial Justice Act, based on the unsubstantiated claim that the death penalty has been administered in a way that shows a significant risk of racial discrimination to both defendants and victims of crime in violation of the Constitution for which current legal safeguards are inadequate.

The Racial Justice Act in the Biden bill stipulates that capital punishment cannot be used whenever a death sentence "furthers a racially discriminatory pattern," and provides that, to establish a prima facie case of such a pattern, a petitioner must merely offer evidence that there is a disproportion between the number of persons in a racial group who are sentenced to death or executed and the number of persons from that racial group in the aggregate of persons who are arrested for, charged with or convicted of crimes that are punishable by death under any circumstances. Similarly, the petitioner need only show that there is a disproportion between the number of persons in a racial group who constitute the victims of crime for which the death penalty is actually imposed and the number of persons in that racial group who make up the class of persons against whom crimes are committed that may be punished by death under any circumstances. To rebut such a prima facie case, the Government would have to establish by clear and convincing evidence that "identifiable and pertinent nonracial factors persuasively explain the observable racial disparities comprising the pattern."

The Racial Justice Act would also require every jurisdiction that authorizes capital punishment to set up an elaborate central data bank on racial factors and other information related to all persons charged with or victims of crimes in death penalty cases. The act's provisions would apply retroactively to all defendants subject to the death penalty, whether or not they raised any claim of racial discrimination or that claim was raised and rejected by the court. Finally, the act mandates the appointment of counsel and provision of other services to any indigent person raising such a claim in a death penalty case.

Aside from the unjustifiable claim that the death penalty has been applied in a manner that unconstitutionally discriminates against certain racial groups—a claim rebuttable by the Bureau of Justice's 1988 statistics showing that 66.2 percent of those sentenced to death were white while whites constituted only 50 percent of those who commit murder—the Racial Justice Act is fundamentally flawed and wrong-headed in that it would require imposition of the death penalty

purely on the basis of race and statistics.

The Supreme Court has already rejected this approach to racial justice in the courtroom in the case of *McCleskey* v. *Kemp*, 481 U.S. 279 (1987). Justice Powell, writing for the majority, held that the question of whether a death sentence was unconstitutionally affected by racial discrimination must be determined by evaluating the fairness of the procedures applied in the particular case in question. The Court specifically rejected the argument that deviations from statistical racial proportionality in the imposition of past death sentences could provide a basis for invalidating the death penalty in cases which otherwise complied with the requirements constitutionally imposed by the Court's earlier decisions. The Constitution requires highly individualized determinations based on the moral culpability of individual defendants, not on a comparison of racial proportionality. In the words of Justice Powell:

> Each jury is unique in its composition, and the Constitution requires that its decision rest on consideration of innumerable factors that vary according to the characteristics of the individual and the facts of the particular capital case. Id. at 294.

The only effective way to achieve the goal of a nondiscriminatory system of sentencing in capital cases is to adhere to the strict requirements for fairness and due process that have been articulated by the Supreme Court in a series of capital punishment decisions.

I agree with Senators THURMOND, HATCH, and other members of the Judiciary Committee who stated that the Racial Justice Act "imposes an unworkable and unconstitutional system of statistical sentencing." As Attorney General Thornburgh observed, the Racial Justice Act:

> relies on dramatically incorrect factual assumptions, employs constitutionally impermissible mechanisms, and would inject race into the prosecution of death penalty cases to an extent unprecedented in the United States.

By mandating that a criminal justice system not susceptible to mathematical predictability produce, nonetheless, mathematically predictable results, this act would effectively abolish capital punishment.

Under the Thurmond and administration proposals, the death penalty will be administered in a way that strengthens racial neutrality and prevents discrimination. The jury must focus on the existence and weight of specific aggravating and mitigating factors which do not allow race or other such factors to be considered. S. 1971 specifically requires an instruction to the jury that the race, religion, national original, and sex of the defendant or victim must not be considered. Moreover, each juror must certify that these factors did not enter his or her decision regarding the death sentence.

By contrast, the death penalty provisions of the Biden bill would make any death penalty unworkable—not just at the Federal level but in State courts as well. That is not just my view; it is also the opinion of the Attorney General. Senator GRASSLEY of Iowa, a member of the Senate Judiciary Committee which reported out that act on a close vote—himself a strong supporter of the death penalty—voted against the death penalty bill for that reason alone.

Indiana is one of 37 States which impose the death penalty for certain crimes. The Biden bill would effectively nullify the death penalty in my State. My fellow Hoosiers and the Indiana d legislature have spoken on this issue, and I do not believe that their collective judgment should be nullified by the Congress.

The other issue remedied in S. 1971 which I wish to address is habeas corpus reform. I am not referring to the writ of habeas corpus referred to in the Constitution which guarantees to persons detained prior to conviction the right to know the charges on which they are held. I am speaking of the statutory remedy afforded to State prisoners to challenge their convictions or sentences by petition filed in Federal district court. Under section 2254, of title 28, United States Code State prisoners have a virtually unlimited right to challenge their convictions, using habeas corpus petitions to relitigate their cases over and over again, throughout their prison terms. Because the prisoner has nothing to lose and everything to gain from prolonging this litigation, it has become evident that the habeas corpus remedy has been abused.

Let me cite examples of the kind of abuses common to habeas corpus petitions by Federal prisoners. One death row inmate, sentenced over 10 years ago for murdering four innocent persons, for which he does not deny guilt, recently received a stay of execution by the Supreme Court of the United States. This marked the fourth time his case had been before the Supreme Court. You may recall the horrible case in Illinois of John Wayne Gacy who was convicted of murdering 33 young men, including several Indiana youths. Although it has been 13 years since he was sentenced to death, his appeals go on and on. It is conceivable that he will be able to delay the carrying out of his sentence for at least 20 years.

These are by no means isolated instances of using habeas corpus to prevent the speedy execution of justice. Unless Congress acts soon to remedy this abuse, some of the most notorious criminals who have been convicted of most heinous crimes in our history could die of natural causes before their adjudicated penalties are executed.

Title II proposes amendments to various sections of chapter 153 of title 28 of the United States Code and a related Federal rule of appellate procedure in order to eliminate habeas abuses which have had the effect of overturning State death penalty convictions and nullifying State capital punishment laws. These amendments contain the legislative recommendations of the Ad Hoc Committee on Federal habeas corpus in capital cases chaired by former Associate Supreme Court Justice Lewis Powell which thoroughly addressed the problem of habeas corpus review of capital cases in which the prisoner had or had not been offered counsel.

The Powell committee recommendations were aimed at achieving one goal. In the words of its chairman:

> Capital cases should be subject to one complete and fair course of collateral review in the State and Federal system, free from the time pressure of impending execution, and with the assistance of competent counsel for the defendant. When this review has concluded, litigation should end.

I agree with this goal. We need to reform habeas corpus procedures so as to minimize Federal judicial interference with State capital convictions and at the same time ensure finality of litigation.

This proposal would allow a State to bring capital litigation by its prisoners by providing competent counsel for inmates on State collateral review. Participation in these new procedures would be optional with the States. Because it is optional, the changes would cause minimal intrusion on State prerogatives. But for those States concerned with delay in capital litigation, the Powell committee believed that the procedural mechanisms would furnish an incentive to provide the counsel that are needed for fairness.

This proposal also provides for a 6-month period within which a Federal habeas petition must be filed. This 6-month period begins to run only upon the appointment of counsel for the prisoner—or the prisoner's refusal of the offer of counsel—and is tolled during the pendency of all State court proceedings. In light of the provision for counsel and the exhaustion requirement that the prisoner's Federal petition contain the same claims made in the State petition, 6 months is clearly adequate time for the development and presentation of claims by the prisoner. Moreover, a further extension of time is available for cases where good cause is shown. This change would prevent petitions in cases in which the passage of time has made a reliable adjudication of the petitioner's claim or retrial of the petitioner difficult or impossible.

The proposal also provides for an automatic stay of execution which is to remain in place until Federal habeas proceedings are completed or until the prisoner has failed to file a petition within the allotted time. This automatic stay would ensure that habeas claims not be considered by a court under the time pressure of an impending execution. It should eliminate the rush litigation over stay motions that is troubling for both litigants and the courts.

Federal habeas proceedings under these amendments would encompass only claims that have been exhausted in State court. With the provision for counsel, there should be no reason for the defendant's failure to raise claims in State court. The change in current practice under this bill is the provision for immediate presentation of new claims in Federal court in extraordinary circumstances. Moreover, subsequent and successive Federal habeas petitions can no longer be the basis of a stay of execution or grant of relief absent extraordinary circumstances and a colorable showing of factual innocence.

I believe that the amendments provided in the Thurmond bill will ensure fairness and promote finality in habeas corpus proceedings. In the words of Associate Justice Powell:

> The fundamental requirement of a criminal justice system is fairness. In habeas corpus proceedings fairness requires that a defendant be provided a searching and impartial examination of his claims. Fairness also requires that if a defendant's claims are found to be devoid of merit after such examination, society is rightfully entitled to have the penalty prescribed by law carried out without unreasonable delay.

This proposal fills a gap that now exists by encouraging the appointment of competent counsel in State habeas corpus or collateral proceedings—the same right that is now available to every capital defendant at State trial and appeal and in Federal habeas corpus proceedings. Moreover, this proposal assures that upon completion of State proceedings a defendant will have one opportunity to have his claims reviewed carefully by the Federal courts. Thereafter, assuming no infirmity is found in the conviction and absent exceptional new developments, judicial proceedings will be at an end.

In summary, this legislation balances the need for finality in death penalty cases with the requirement that a defendant have a fair examination of his claims. Therefore, if the conviction and sentence are found to be appropriate, judicial proceedings will be at an end, absent any exceptional developments in the defendant's case.

The effect of the Thurmond amendments will be to preclude granting relief with respect to matters that have been fully and fairly adjudicated in State proceedings. These changes would enhance the finality of State criminal adjudications and avoid duplicative litigation of claims that have already been adequately considered and decided.

These amendments also make clear that a Federal court can deny a habeas petition on the merits without requiring prior exhaustion of State remedies. This change would avoid a waste of judicial resources when a prisoner presenting a frivolous petition is sent back to the State system to exhaust State remedies.

By contrast, the habeas corpus provisions contained in title II of the Biden bill would not remedy the abuses that have led to the endless litigation and relitigation resulting from the present system of repetitive habeas corpus review that has undermined the capital punishment laws of Indiana and other States. In fact, I believe that S. 1970 would increase the number of habeas cases. Under section 2257(c)(3) a State prisoner on death row can receive a stay of execution and obtain another review of his conviction and sentence in Federal courts if he alleges that such relief is "necessary to prevent a miscarriage of justice." No wonder retired Associate Justice of the Supreme Court Lewis Powell and the chief judges of both the Fifth and Eleventh Circuit Courts of Appeal have testified that the enactment of title II of S. 1970 will result in more, not fewer habeas corpus cases.

Justice Powell also testified concerning the deleterious effect that would result should the procedural default rule in S. 1970 be enacted. The Biden bill would overrule the leading precedent in *Wainwright* v. *Sykes*, 433 U.S. 72 (1977), which held that a State prisoner could not raise in Federal court a claim which he is legitimately barred from raising in State court unless he can show good cause for the default which resulted in prejudice to his case. This is a reasonable rule, which would allow every genuine case of constitutional error to be heard, while reducing the number of unnecessary habeas corpus cases.

The Ad Hoc Committee of the Judicial Conference on Federal Habeas Corpus in Capital Cases—the Powell committee—in its report of August 23, 1989, specifically recommended restricting successive habeas corpus petitions to those involving questions of guilt or innocence. This recommendation corresponded to the opinion in *Kuhlmann* v. *Wilson*, 477 U.S. 436, 454 (1986). However, S. 1970 would overrule the Supreme Court and expand current law by permitting any petition alleging a "miscarriage of justice" to be reviewed.

Moreover, title II has no effective time limitation. Although the Biden bill, in section 2258(1), proposes to limit the availability of Federal habeas corpus relief to the first 365 days after the prisoner has exhausted all his available State court remedies, there is a significant exception which destroys the effectiveness of such a rule. Whenever the State prisoner seeking review of a capital sentence files a petition for certiorari in the Supreme Court—and he can file as many of these petitions as he needs—the statute of limitations is tolled.

Finally, S. 1970, in section 2260, would create an absolute right of appeal from adverse rulings on habeas petitions. Under current law, most unsuccessful petitioners may appeal the dismissal of their habeas petitions only when the district judge issues a certificate of probable cause, asserting that the legal issues raised are not entirely frivolous. This change would further aggravate the current case overload being experienced by the Federal courts of appeals.

The point is: Regardless of one's personal views concerning the effectiveness or justice of the death penalty, so long as a State and its citizens believe that capital punishment is appropriate and it is that State's law, it should be imposed in a timely way according to constitutional procedures. Permitting the appeals process to be dragged out for years and years, as too frequently happens under current habeas corpus procedures, is bad public policy for it makes a mockery of the criminal justice system. Justice delayed is justice denied. The Thurmond bill remedies this situations; the Biden bill cannot.

For the reasons I have discussed, I consider the Thurmond crime control package of reforms in S. 1971 to be far better than the Biden proposals in S. 1970. Whatever reservations I may have concerning the death penalty, I regard the urgency of crime control legislation to be of primary importance if we are to address seriously the crime and drug problems in our Nation.

We have read the awful statistics and seen the death and terrible damage that crime, violence, and drugs have done to our social fabric. We all realize that action is long overdue. We must act now to provide a comprehensive death penalty with constitutional procedures and protections, increase the penalties for those who use firearms in the commission of crime, and reform those criminal procedures which result in delay and injustice within our criminal justice system. I call on my Senate colleagues to join me in swiftly passing effective, tough, and fair crime control legislation. The law-abiding citizens of our Nation deserve and demand it.

## CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The period for morning business is closed.

## OMNIBUS CRIME BILL

The PRESIDING OFFICER. The Senate will resume consideration of S. 1970, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 1970) to establish constitutional procedures for the imposition of the sentence of death, and for other purposes.

The Senate resumed consideration of the bill.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that Senator METZENBAUM be recognized to offer an amendment relative to the banning of assault weapons; that there be 2 hours of debate equally divided on his amendment; that upon the expiration or yielding back of time, the Senate, without any intervening action or debate, vote on a motion to table the Metzenbaum amendment; that if the motion to table the Metzenbaum amendment is not successful, there be no limitation on time or on amendments to this amendment; that upon the disposition of the Metzenbaum amendment, Senator HATCH be recognized to offer an amendment to strike the language in the bill relating to assault weapons; that there be 3 hours of debate equally divided on the Hatch amendment; that upon the expiration or yielding back of time, the Senate proceed to vote, without any intervening action or debate, on the Hatch amendment; that no other amendments or motions be in order prior to the disposition of these two amendments; and that the agreement be in the usual form with respect to division of time.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Reserving the right to object, and I shall not object, I think it is precisely the request Senator MCCLURE made earlier. We cannot contact him now. He is in the middle of a speech. We have been on the bill almost a day and nothing has happened. This does reserve the right to table. I assume Senator MCCLURE can make that motion to table if he wishes. So I have no objection.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I thank my colleagues for their cooperation. I will advise Senators, therefore, that both of these matters will be disposed of today so that there will be at least these two rollcall votes today. In the meantime, discussions will be continuing on efforts to resolve the remaining issues on the bill.

The PRESIDING OFFICER. Under the previous order, the Senator from Ohio [Mr. METZENBAUM] is recognized.

AMENDMENT NO. 1676

[Purpose: To define the term "assault weapon" and to ban the sale of large-capacity magazines]

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 1676.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 49, between lines 4 and 5, insert the following:

"(J) Springfield Armory SAR-48 (.308 caliber) and its variations;

"(K) Cobray SWD 9mm in any of its variants;

"(L) Mossberg Model 500 Bullpup 12 shotgun;

"(M) Ruger Mini-14/5F semiautomatic firearms;

"(N) Feather AT-9 centerfire semiautomatic in 9mm;

"(O) AP 9, 9mm assault pistol;

"(P) Thompson Ordnance M1, semiautomatic in .45 caliber;

"(Q) Franchi SPAS 12 shotgun;

"(R) Heckler and Koch HK-94 pistol;

"(S) Austrian Automatic Arms SAP pistol;

"(T) F.I.E. Spectre P. pistol;

"(U) Sterling Mark 7 pistol;

"(V) all other models by the same manufacturer with the same design which may have slight modifications or enhancements including a folding stock; adjustible sight; case deflector for left-handed shooters; left-handed fire adapter; shorter barrel; wooden, plastic, or metal stock; large size magazine; different caliber provided the caliber exceeds .22 rimfire; bayonet mount; tripod or bipod mount; or flash suppresser; and

"(W) any other firearm with an action design identical or nearly identical to an assault weapon specified in this pargraph which has been redesigned from, renamed, renumbered, or patterned after one of such specified assault weapons regardless of the company of production or country of origin, or any other firearm which has been manufactured or sold by another company under a licensing agreement to manufacture or sell an identical or nearly identical assault weapon as those specified in this paragraph, regardless of the company of production or country of origin."

SEC. . BAN ON SALE OF MAGAZINES AND BELTS HOLDING GREATER THAN 15 ROUNDS OF AMMUNITION.

(a) BAN.—Section 922 of title 18, United States Code, is amended by adding at the end thereof the following:

"(s)(1) Except as provided in paragraph (2), it shall be unlawful for any person to transfer, import, transport, ship, receive or possess a large-capacity detachable magazine or large-capacity ammunition belt, which can be employed by a semiautomatic firearm.

"(2) This subsection does not apply with respect to—

"(A) any transfer, importation, transporting, shipping or receiving to or by, or possession by or under, authority of the United States or any department or agency thereof, or of any State or any department, agency, or political subdivision thereof; or

"(B) any transfer, transporting, shipping, receiving or possession of such magazine or ammunition belt that was lawfully possessed before the date of this subsection, except that no federally licensed firearms dealer shall transfer such magazine or ammunition belt."

"(3) For purposes of this subsection—

"(A) The term 'large-capacity magazine' means a box, drum or other container which holds more than fifteen rounds of ammunition to be fed continuously into a semiautomatic firearm, or a magazine which can be readily converted into a large-capacity magazine. Such term shall not include any magazine that has been permanently modified so that it will not hold more than fifteen rounds of ammunition.

"(B) The term 'large-capacity ammunition belt' means a belt or strip which holds more than fifteen rounds of ammunition to be fed continuously into a semiautomatic firearm, or an ammunition belt which can be readily converted into a large-capacity ammunition belt. Such term shall not include any ammunition belt that has been permanently modified so that it will not hold more than fifteen rounds of ammunition.".

(b) PENALTY SECTION.—Section 924 of title 18, United States Code is amended by adding at the end thereof the following new subsection:

"(1) Whoever violates the provisions of this Act relating to large capacity detachable magazines and ammunition belts shall be fined not more than ten thousand dollars, imprisoned not more than two years, or both.".

Mr. METZENBAUM. Mr. President, the amendment that I have offered is an effort to strengthen the assault weapons provisions of the crime bill. The amendment contains provisions that were part of my assault weapons bill, S. 386, which I introduced in February of last year along with Senators CHAFEE, PELL, CRANSTON, WIRTH, GLENN, KENNEDY, DODD, MOYNIHAN, ADAMS, LAUTENBERG, and KERRY.

What prompted me to introduce that bill was a tragic event that took place on January 17 of last year on a Stockton, CA, schoolyard. It was recess time at Cleveland Elementary School. Four hundred children were playing in the schoolyard when a deranged man opened fire with an AK-47 assault rifle. In less than 2 minutes, he fired over 100 rounds. A round is a bullet. Each round is a bullet.

The tragic result was 5 children dead and 30 wounded. No reason; no logic; no explanation; no cause. The gun used by Patrick Edward Purdy on that day was not a hunting rifle designed for sportsmen but a combat weapon made in China for use by Communist troops.

Purdy carried enough ammunition to arm a small army. He had two large magazines, 75 rounds; the other, 35

rounds. Prior to that day, I admit, I had never even heard of an AK-47. But as my colleagues know, I have long been concerned with the ease with which criminals and mentally ill people can obtain firearms in our society.

I felt that perhaps something should be done, and I began to look into the issue of these assault weapons. I conferred with my friends in the law enforcement community since I had already relied on their expertise in matters relating to firearms legislation. They told me how the problem of assault weapons was not new to the police officer on the street. For some time, the police have faced criminals, particularly drug dealers, who are heavily armed with these weapons of war. These assault weapons in the hands of criminals put our law enforcement officers at a great disadvantage in any exchange of gunfire.

In 1986, eight FBI agents in Miami became involved in a gunfight with two bank robbers, one of whom was armed with a Ruger mini-14/5F assault weapon. The result was two agents killed, five wounded before the gunman was fatally shot.

Two years ago in Los Angeles, a police officer was shot and killed by a gang member armed with an AR-15, an assault weapon similar to the U.S. Army's M-16. Three years earlier, another Los Angeles police officer was killed when ambushed by a gunman armed with a MAC-10.

And in 1988, a Dallas police officer was killed by a gunman armed with a TEC-9. In 1988, in San Diego, one deputy sheriff was killed and two were seriously wounded in a shootout with a lone gunman armed with an AK-47.

As the Stockton massacre frankly illustrated, police officers are not the only victims of assault weapon violence. Last year in Los Angeles, a 2-year-old boy and a teenager were killed when a gunmen using an assault weapon fired on a crowd from a speeding car. Six people were killed in a Florida shopping center when a gunman opened fire with a Ruger mini-14/5F. And last September, a disgruntled employee, being treated for mental illness, entered a Louisville, KY, printing plant armed with an AK-47, open fired and killed 7 of his coworkers and wounded 13 others.

My friends in the Senate, in every instance when you saw this on the nightly TV and your wife saw it and your children saw it, you were distraught and they were distraught and the American people were concerned. They said, "Why does this need to happen? Why should these police officers be mowed down? Why should children in a schoolyard be killed for no purpose at all? Because somebody has a gun that can shoot so many bullets so rapidly?"

Today we are debating this issue, as to whether or not we ought to include more assault weapons to be banned than those that are presently banned as imports into this country.

While I studied this issue and learned about it, I came to learn that while thousands of these weapons are imported into the United States each year, about 75 percent of all assault weapons in this country are made in this country. The police groups I conferred with were clear and unanimous in their recommendations—ban assault weapons. And why not. They are concerned about their lives each day, each night, they go out there to protect us. If the drug dealer or the criminal, whatever his activities may be, is armed with more weaponry than the police officer, the police officer all too often has to pay with his life.

Perhaps Los Angeles Police Chief Daryl Gates said it best when he told the Senate Judiciary Committee, "I think it is a nonpartisan issue," said he, "I really do. And the police of America are pleading with you. I mean we are pleading with you. My guys are pleading with you. We need something done and we are asking you to get it done."

I remember the day he testified. He was being pressed by one of my colleagues on the opposite side of the aisle, and I remember he went out of his way to say to my colleague on the other side of the aisle, the other political party than mine, "I'm a member of your party. I agree with you most of the time, and I need you to agree with me on this issue." He made it very clear that it was not a Democrat or Republican issue. He was, as a Republican, pleading with us, pass this legislation.

While drafting my bill, I was hearing some people argue that these assault weapons were suitable for hunting. I have never been opposed to people owning firearms for hunting, sport shooting. There are a lot of hunters in Ohio, and this amendment would not deny them or any other sportsman the right to hunt that they have today.

I want to emphasize that. There is nothing in this amendment that would take away any sportsman's right to hunt or any sportsman's right to go to a gallery and have target practice.

I had a member of my staff contact a number of State game wardens and guns stores throughout the country to be certain that I was right in what I just represented to you, to see if hunters have any use for these assault weapons and large magazines. I learned that most hunters use bolt action or lever action guns and that those hunters that do use semiautomatic rifles do so with magazines of between five and eight rounds. In fact, many State laws limit the number of rounds that you can have in the magazine while hunting.

I remember I told you that the ones that Purdy had, one magazine contained 70 rounds and the other contained 35 rounds. So much for the argument that sportsmen would be hurt by a ban on assault weapons.

But even when I received that information, I thought there was one more group I would consult while drafting my bill. I contacted the National Rifle Association. I said to the National Rifle Association I was drafting legislation on assault weapons, and I invited their input. They declined, saying that they would oppose any effort, any effort, to limit the availability of assault weapons.

I have been on a number of programs with spokespersons for the National Rifle Association, and in each instance I have said to them I am prepared to negotiate; I want to be reasonable. If you can tell me there is something wrong with the language of my amendment or my bill, let us work it out together. I said my door is open. They never came through that door. So I went ahead and introduced my bill with the support of the law enforcement community, and that bill is pretty much the essence of this amendment. I am proud to stand before you and say that the law enforcement community supported my bill and supports the amendment that is on the floor today.

We held hearings on my bill. We heard from police officers and victims of shootings and from the NRA. Then the NRA started their campaign of lies and distortion against the bill and me, too. But not all NRA members were opposed to an assault weapons ban. Former President Reagan, a member, said, "Semiautomatic military weapons should not be sold to sportsmen or the public in general." Our former colleague, Senator Barry Goldwater, who has appeared in magazine ads for the NRA, said, "I've never used an automatic or semiautomatic for hunting. There's no need to. They have no place in anybody's arsenal. If a SOB can't hit a deer with one shot, then he ought to quit shooting." Even President Bush, an NRA member, realized that something had to be done, and he banned the importation of foreign-made assault weapons.

When that occurred, I praised the President. I thought he had joined the team and understood the problems of assault weapons for the law enforcement community in this country. I praised him for taking the first step banning the importation of assault weapons. Then I waited for him to take the logical next step, banning assault weapons made in this country. But I waited and I waited and I waited. Nothing happened.

The President has refused to support legislation that would ban the sale of assault weapons made in this

country. Frankly, I say to my colleagues in the Senate, that position defies logic. How can you possibly say you are going to permit the manufacture of assault weapons in this country, permit them to be exported, but ban the importation of those same weapons, or similar ones? Seventy-five percent of the assault weapons used in this country are made in this country.

So, Mr. President, how can you possibly explain your position, unless it was some kind of a trade matter? But it was not in this instance. He mentioned nothing about that. How can you explain banning the importation of foreign-made assault weapons and not be willing to ban those made in this country? It does not make sense. It is illogical. And the American-made ones are every bit as deadly.

Any police officer will tell you that with an imported assault weapon or a domestic assault weapon, you are just as dead one way or the other.

Shortly after the President announced his import ban, my colleague on the Judiciary Committee, Senator DECONCINI, introduced his assault weapons bill. That bill did not go as far as mine did. It covered fewer weapons and did not address the problem of large magazines.

Mr. THURMOND. Mr. President, will the distinguished Senator yield for a half a minute?

Mr. METZENBAUM. Without losing my right to the floor.

Mr. THURMOND. Mr. President, I am now due at the Armed Services Committee in a meeting. I have some other meetings this afternoon. I am going to request that the able Senator from Utah handle this amendment and the next amendment, the two amendments on firearms, and ask him to take my place.

Mr. METZENBAUM. Mr. President, before my colleague from South Carolina leaves, I want to say to him that I hope he might wait 5 or 7 minutes, because I wanted to quote some words of his in connection with this issue to which I am now addressing myself.

Mr. THURMOND. I will stay for that if it will not take over 5 or 7 minutes.

Mr. METZENBAUM. I will not.

Even the DeConcini bill was claimed to be a compromise; it did not change the NRA position. The NRA opposed his bill as strongly as it opposed mine.

To my colleagues, I say if you are going to oppose the NRA and their political operatives, you may as well restore the strengthening language that is included in my amendment that law enforcement wants. If you vote for the DeConcini bill or the Metzenbaum amendment, the NRA will not love you, but I will guarantee if you vote for the strongest language banning assault weapons, the law enforcement community will. Yes, and so will the American people.

The amendment that I offer today would strengthen the DeConcini bill in two important ways. First, it adds to a list of banned assault weapons 13 other American-made assault weapons. This amendment, like the DeConcini bill, would not affect the guns that are currently owned by anyone. It would merely prohibit the future sale of these specifically listed weapons. The amendment also bans nearly identical firearms so that gun manufacturers cannot circumvent the law by making minor cosmetic changes in the design of a banned firearm.

That language was carefully drafted with the assistance of firearms experts to ensure that it applies only to a firearm—that is one of the listed assault weapons—with only superficial changes. Opponents of assault weapons restrictions have distorted the facts, saying that all semiautomatic guns, including some legitimate hunting rifles, would be banned by this legislation. That is not true.

They say there is no way to distinguish between semiautomatic assault weapons and semiautomatics used by hunters and sportsmen. The Bush administration has found otherwise.

Last year, after a 3-month comprehensive study, the Bureau of Alcohol, Tobacco and Firearms concluded there "are viable clear differences between semiautomatic assault rifles and semiautomatic rifles used in traditional sports." That is from the Bureau of Alcohol, Tobacco and Firearms.

The assault weapons that my amendment would add have been identified by law enforcement groups as the most dangerous ones. While assault weapons account for one-half of 1 percent of all privately owned firearms, an assault weapon is 20 times more likely to be used in a crime than a conventional firearm. These are the weapons of choice of criminals, especially those in the drug trade.

Everybody talks about the necessity of winning the war on drugs. Yet we are hesitant to take a major step toward disarming the enemy in that war.

Again, I repeat, none of these weapons have any sporting purpose. Hunters do not use them; drug dealers do. By voting against my amendment, you vote against law enforcement, and you vote to protect the drug dealers' right to use assault weapons.

My amendment also bans the sale of magazines larger than 15 rounds. This provision was in my original bill, at the suggestion of law enforcement groups. They correctly point out that nobody uses large magazines for hunting. There is no need to fire that many bullets. Any good hunter knows your first shot is your best shot.

The 75-round magazine attached to Patrick Purdy's gun enabled him to turn a playground into a playing field. All of the law enforcement officers who testified at two Judiciary Committee hearings we had last year stressed the importance of having legislation that would ban the sale of not just assault weapons, but of the large magazines as well.

I am happy to say that I am in good company in supporting a ban on large magazines. A few months after I introduced my bill, President Bush announced his anticrime package in a speech at the National Peace Officers Memorial Day ceremony on the steps of the Capitol. He called for the banning of magazines larger than 15 rounds. The President put it this way:

> One thing that we do know about these assault weapons is that they are invariably equipped with unjustifiably large magazines. The notorious AK-47—

Said the President—

> for example, comes with a magazine that pumps 30 explosive bullets without reloading. That is why we stand on the steps here in front of the Capitol and ask support for our legislation prohibiting the importation, manufacture, sale, or transfer of these insidious gun magazines of more than 15 rounds.

That is the end of the President's quote. That magazine was included when the President's bill, S. 1225, was introduced in the Senate by my distinguished colleague from South Carolina. That bill, with a magazine ban is his bill, is cosponsored by ROBERT DOLE, the minority leader; and Senators SPECTER, MCCLURE, D'AMATO, DECONCINI, SIMPSON, WILSON, MCCONNELL, NICKLES, and KASSEBAUM.

In introducing that bill last June, Senator THURMOND said:

> As a direct response to the deadly firepower used by drug kingpins, hired thugs, and other violent offenders, the President is calling for important restrictions on clips and magazines that hold more than 15 rounds. Legitimate sportsmen and hunters can still pursue their avocation without undue interference.

Senator THURMOND was right when he said it at that time. He is right today.

These guns do not need these large magazines, and my amendment includes a provision to eliminate the large magazines. It is only fair to say that my amendment also adds a number of assault weapons.

But I would say to my colleague from South Carolina, if it be the case that my amendment should be voted down, and the amendment which includes the larger list of semiautomatic assault weapons and the ban on the magazines, I hope that he will see fit to be a supporter of a ban on those larger magazines today, as he was then, and I hope that he will join with me, or I will join with him, in an amendment to ban magazines which holds more than 15 rounds.

I thank the distinguished Senator for remaining.

Mr. THURMOND. Mr. President, if the Senator will yield for just a

minute. We have to take steps to stop this violence in this Nation. There is no question about it.

However, a great many people feel that the lawless element, those who bring in drugs and guns, are going to smuggle them in some way. There is a strong feeling on the part of many people that the best way is to give stiff punishment if they use those guns in the form of violence.

In other words, in the bill, the provision I have contained in the substitute provides for 10 years in prison. We think that might be more effective than this other method. If that does not work, then we can try something else. We have to take very step we can to stop this violence.

I commend the Senator for his interest in trying to stop violence, and to get the people in this country to abide by the law.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the time taken by the Senator from South Carolina not be charged against the minority or the majority, and that we each continue to have the 2 hours that we had originally.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio [Mr. METZENBAUM].

Mr. METZENBAUM. Further carrying on with this dialog we just had with the Senator from South Carolina, the Senator from Ohio has no problems about increasing the penalty. I would be prepared to cosponsor an amendment having to do with banning of the larger magazines, and increasing the penalties for violating the law. I do not have any problem about that at all. I hope that, if this amendment does not pass, the Senator from South Carolina will see fit, or someone in his stead, to join with me in supporting the President of the United States' position in banning magazines that contain more than 15 rounds.

As I said previously, I appear to be in the company of some of the NRA's best friends in my support of a ban on large magazines. While I am attempting to strengthen Senator DECONCINI's bill, I want to make it clear that I applaud his effort to take some action to limit the availability of these weapons of war.

But we can pass the DeConcini amendment, hopefully, and we also can pass the ban on large magazines, which is not in his amendment and which is in mine. But, if mine should fail, we can put that in. I hope that some of those who will lead the opposition to my proposal will see fit to support a ban on magazines containing more than 15 rounds, as has been urged by the President of the United States and as has been provided for in a bill pending in this body, supported and introduced by Senator THURMOND and a number of other Senators, whose names I mentioned previously.

As a matter of fact, coming back to Senator DECONCINI's amendment, I want to point out that his amendment, his provision in the bill, covers a lesser number of assault weapons, some of the imported ones, some of those manufactured in this country. It took a lot of courage for Senator DECONCINI to offer that amendment in the committee, because the Senator from Arizona is not known as an advocate of gun control. In fact, in July 1988, he was named legislator of the month by the NRA.

I have received a lot of different honors since I have been here in the U.S. Senate, and I am very proud of each and every one of them, but I know there is one that I am never going to receive. The NRA is never going to name me legislator of the month, and you can bet all the tea in China on that.

Forgetting any past support Senator DECONCINI had given the NRA, after he proposed his amendment, which is far less strong than mine, the NRA attacked him as fiercely as they ever did any Senator. They went after him tooth and nail.

I know something about being attacked by the NRA. I have been in that privileged position. In 1988, when I was running for reelection in Ohio, the NRA, I am proud to say, made me their No. 1 target for defeat. I did not make their honor roll or their legislator of the month, but I was made a target in the elections of 1988. The NRA sent out thousands of letters to my constituents; they supported my opponent. They took out newspaper ads against me; they used radio and TV ads against me. They mounted a full court press. As a matter of fact, in a letter to their membership that year, they said: "Our biggest foe, HOWARD METZENBAUM, is up for reelection, but he is not unbeatable."

What had I done to earn such opposition? Had I done something to violate the laws of this country or something that transgressed on the rights of the NRA or their members? Let me tell you what I did. I introduced a bill banning plastic guns that terrorists use to get through airport metal detectors. The U.S. Congress thought that was good legislation. We passed it, and it was signed into law.

The second thing I did is I pushed for passage of a bill banning cop-killing bullets that could go through bullet-proof vests worn by police officers. The NRA opposed that very strongly. As a matter of fact, they kept it from coming to the Senate floor for about 8 months. And the only way it finally came to the Senate is I indicated I was going to add it as an amendment to some agriculture bill that one of the NRA's strongest supporters very badly wanted. It really did not belong on an agriculture bill, but I had no other way of getting it to a vote. So when I threatened to add it to the agriculture bill, which would then have forced my colleague who was supporting the agriculture bill to vote either against the bill with my amendment on it and thereby against his own bill, or for it and have to vote for my ban on cop-killer bullets, he finally came over to me and said, "Let us work this out and see if we cannot bring your measure to a vote at an early date." We did, and it passed, and if my recollection serves me right, it was something like 98 to 1.

I also introduced a bill NRA did not like, requiring a 7-day waiting period before the purchase of a handgun. We have not passed that yet, but we will, and we will do it with the support of Jim Brady and his wife. Jim Brady, who was shot down when he was with President Reagan, has testified before our committee in connection with the need for a 7-day waiting period. We will pass that bill. But to the NRA, those bills that I supported were sufficient reason to make me their No. 1 target in 1988.

In order to try to defeat me, the NRA never minded resorting to lies. Lies are their stock in trade. They lie and lie and lie, and the worst part is, too often they get away with it. NRA was saying back in Ohio that I wanted to take away everybody's gun. I do not have any legislation to take away everybody's gun. I never had such legislation, and I do not contemplate introducing or proposing such legislation. That did not bother NRA. They were not worried about the facts; they were only worried about trying to defeat HOWARD METZENBAUM.

I remember numerous times when campaigning back home in Ohio, at a union meeting or a veterans meeting or someplace, and someone would come up to me and say, "Senator, why are you trying to take our guns away?" I would say, "Who said I am trying to take your gun?" The reply would be, "I got this letter from the NRA." I would say, "The bills I support are against plastic guns and cop-killer bullets and for a 7-day wait to buy a handgun." Then I would say, "Do you have any need for a plastic gun or cop-killer bullets or a need to get a handgun in less than a week?" The answer normally would be, "No, I do not need any of those things. I did not know that is all your bills do. The NRA says you want to ban all guns."

I would hear the same thing time and time again in Ohio, because of the lies told by the NRA. In fact, sometimes I would be speaking at a meeting, and if there were some people in the crowd who were sportsmen and hunters, I would say, "I guess some of you have something on your mind be-

cause you received literature from NRA." And they would start to shake their heads, yes, they have, and I would state the facts and get the facts out to the electorate of Ohio.

Obviously, their lies did not work. In spite of the attacks by NRA, I am pleased to say that I was sent back here to the U.S. Senate.

I was not the only Member of Congress that they attacked. In a mailing to their members, they said:

> Our biggest foe, HOWARD METZENBAUM, is up for reelection, but is not unbeatable. Neither is his anti-gun buddy in the House, BILL HUGHES, of New Jersey, who is also up for election, along with other prominent anti-gunners, such as TED KENNEDY, of Massachusetts; FRANK LAUTENBERG, of New Jersey; JOHN CHAFEE, of Rhode Island; and dozens of others.

All of them were targeted for defeat by the NRA. You know the facts: All of them were reelected. The same 1988 letter talks of the strong support the NRA intended to give to their Senate supporters, and they named two of them. One was in Nebraska and the other was in Nevada.

I am happy to report for my colleagues that the ones they marked for defeat they were not successful in defeating and those that they were very strongly supporting in Nebraska and Nevada did not return to this body. Apparently their support is not that meaningful.

I mention this because, frankly, the amendment that I offer today has struck fear into the hearts of my colleagues, the Senators in this body. My colleagues come up to me and say: "I agree with you. Assault weapons should be banned, but I cannot vote for your amendment because the NRA would go after me in my next campaign."

I say to my colleagues: Do not be afraid of the NRA. Their record shows there is no reason to be. The NRA is a paper tiger. Its bark is louder than its bite, and the record proved that. There is a reason, because opinion polls show that the American people overwhelmingly support responsible gun laws.

Perhaps the most revealing of these polls was one taken earlier this year by CNN and Time magazine, as a matter of fact, headed "Who Is The NRA? A look at America's embattled gun lobby." That poll showed something quite interesting. It showed that 73 percent of gun owners think assault weapons should be banned. Seventy-three percent of gun owners think assault weapons should be banned. As a matter of fact, the Time magazine article reported that 73 percent of all gun owners favor registration of semiautomatic guns.

I want to make it clear. My amendment does not go that far. I have nothing in this amendment providing for registration. But that is what gun owners are saying throughout the country. I would guess that the American people are far greater in numbers and support of the amendment that I offer here today. With support such as that, 73 percent from gun owners, the largest support from people across the country, no Senator need be afraid of the wrath of one special interest group, the NRA.

But Senators fearing the NRA, frankly, is not the issue here. The issue is whether police officers should have to perform their duties in fear of being outgunned by some drug dealer. It is whether school children should have to play in fear while in their own schoolyard. It is whether any person should have to fear being caught in the crossfire of a street gang shootout.

People have a right not to be afraid. People have a right to expect some courage from their elected officials. Let us show some courage here today. Let us stand up to the National Rifle Association and stand up with the police officers of this country. By supporting this amendment you cast your vote with the law enforcement officers of this country. You cast your vote with the overwhelming majority of people in this country.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

The Chair recognizes the Senator from Utah [Mr. HATCH].

Mr. HATCH. I yield such time as I may so need.

The PRESIDING OFFICER. The Senator is recognized.

Mr. HATCH. Mr. President, I rise in opposition to the amendment and for very good reason.

I state at the outset of this debate that the only real assault these so-called assault weapons provisions make is on the legitimate rights of law-abiding Americans.

Let us understand that over the last several years we have witnessed a steady attack on the second amendment rights of law-abiding Americans. For the most part, these attacks, often in the name of reducing crime, have focused on the availability of and access to handguns. In the 101st Congress, those opposed to the right to bear arms have shifted gears. With the introduction of S. 1970 and similar legislative proposals, law-abiding gun owners find themselves confronted with an attack on the right to possess semiautomatic long arms.

Because they realize they are attacking the rights of legitimate, honest, law-abiding sports people, they bring up a bugaboo called the National Rifle Association. Frankly, I am not arguing for the National Rifle Association. I think there are a lot of good people there. But that is not the issue. The issue is the rights of law-abiding citizens to have their own weapons and to have semiautomatic long arms which they have used for hunting purposes for 100 years.

I have watched this issue with interest. When I first heard of reference made to the assault weapons issue, I thought to myself, the media must be referring to criminals who have somehow gained easy access to the fully automatic military weapons that we had severely restricted with passage of the Firearms Owners Protection Act, a couple of Congresses ago.

I know about that. I managed the floor on that bill. We restricted it then.

Then I started to read the legislation that was being written. Boy, was my first assumption wrong.

As I read through these bills, I was amazed to find that the weapons under attack were semiautomatic long arms, firearms that employ a firing action that has been popularly used in hunting weapons for over 100 years. My next thought was that somehow, despite statutory language that has been on the books for some time now, the weapons being referred to must be easily converted from semiautomatic to fully automatic. Why else would the media refer to these rifles with such a fiendish sounding name as assault weapons? It was therefore with anticipation that I reviewed the Judiciary Committee hearings to find if the testimony received would reveal that some of these weapons were readily convertible. Again, I was wrong.

Testimony by witnesses indicated that very few of these semiautomatic weapons were actually being converted to fully automatic. The witnesses testified that it was actually very difficult to bring about such a change and, in fact, police testimony indicated that for the most part, when these weapons had been confiscated as crime weapons, they had not been converted. By that time, of course, I began to have a sneaking suspicion in the back of my mind that what we were actually confronting was simply a new effort by the antigun groups and media to attack the constitutionally guaranteed right to keep and bear arms. It seems that it is only for dramatic effect, that the semiautomatic firearms under attack are being referred to as assault weapons.

If you change the stocks on some of these weapons, you have weapons that have been used for hunting for many, many years and used by honest, decent law-abiding citizens who would not hurt a flea.

After a careful review of this amendment, the underlying amendment, and the other antifirearm legislation that has been considered by the Judiciary Committee in connection with this issue, I want to repeat, as I stated at the outset of these remarks, the only real assault that these so-called assault weapon bills make is on the le-

gitimate rights of law-abiding citizens. Furthermore, regardless of terminology, this legislation will not have any real impact in reducing the number of violent crimes committed with these or other weapons.

DEFINITION OF "ASSAULT WEAPONS"

The Bureau of Alcohol, Tobacco and Firearms has no definition of assault weapon. The military definition—a selective fire weapon capable of firing in either an automatic or semiautomatic mode—is inapplicable to the commercial arena. Indeed, with the enactment of the Firearms Owners Protection Act, the private purchase of new fully automatic machineguns is banned and the possession of existing automatic machineguns is highly restricted, requiring an extensive background check and permission from both local law enforcement and the Federal Government before such a firearm can be transferred to a new owner. The proponents of this amendment and the underlying legislation have sought a workable definition of assault weapons, other than simply listing guns by brand name and model, but they have been unable to produce one.

This lack of a definition for assault weapons has been a major stumbling block to gun control advocates from the outset of the consideration of this legislation. The firearms listed in this amendment and the bill employ a semiautomatic firing action. They are not fully automatic, neither are they readily or easily convertible to fully automatic. In fact, the semiautomatic firing action employed in these firearms is the same as the action found in every popular semiautomatic hunting rifle. And, as I mentioned earlier, the technology behind the semiautomatic firing action has been employed for well over 100 years.

These weapons utilize a portion of the energy of a firing cartridge to extract the fired cartridge case and chamber the next round. Furthermore, they require a separate pull of the trigger to fire each cartridge. You cannot simply hold the trigger and fire all the cartridges in the magazine as with a machinegun.

In the attempt to generate support for banning these guns, they have been referred to as assault weapons, a term which conjures up some idea of terrible weapons that have no purpose other than killing innocent people. When pressed on a definition for this term, the typical response is that these are dark, sinister-looking weapons that are well suited for combat—in other words, you will know one when you see one.

Regardless of what they are called, these firearms are functionally no different from semiautomatic hunting rifles. A semiautomatic rifle used for hunting has the same capability as a semiautomatic rifle that cosmetically looks more sinister, or vice versa. And that is the only difference between many hunting rifles and the firearms listed in this legislation—there appearance. The weapons in this amendment, and in S. 1970 are referred to individually by model type and brand name because it is inherently impossible to define assault weapon in such a way so as not to also ban many, if not virtually all, semiautomatic hunting rifles.

The proposed banning of specific firearms causes me grave concern about the potential impact on other semiautomatic weapons because they are all functionally the same.

SECTION ANALYSIS

Mr. President, to appreciate the effect of the pending amendment, it is necessary to examine the underlying language which it would amend.

While the Judiciary Committee devoted a great deal of time to the consideration of the assault weapons issue in general, surprisingly little time was devoted to the specifics now found in S. 1970 and the underlying amendment. There were two hearings in which assault weapons in general and the merits of an earlier version of S. 1970 and other proposals were discussed, but the committee received little testimony in the way of section-by-section analysis.

There is the underlying problem in attempting to define assault weapons so as not to include hunting weapons. The firing action of the weapons listed in these bills is the same as any other semiautomatic weapon. Furthermore, any semiautomatic firearm that employs a detachable ammunition clip or magazine is capable of accepting a clip holding any number of rounds. The only distinction between these firearms and the firearms listed in these bills is that the latter look more sinister.

To overcome the definitional problem, these legislative efforts simply list those particular firearms which their sponsors would like to ban. This approach, however, raises some concerns. In the event that manufacturers of the listed firearms change the names of the firearms or make minor modifications in the firearms to avoid the prohibitions placed on these guns, a discretionary determination will have to be made on whether or not the prohibitions still stand.

As my colleagues may remember, last Congress, during the consideration of the plastic gun bill, this discretionary authority question was one of the major issues I, and others, saw at that time.

I am sure that I, and I am also sure that others, will oppose any such discretion being granted to the Secretary of the Treasury. Similar questions arise with respect to those sections which would require the use of Federal firearms purchase forms, the form 4473, for the future transfer of those assault weapons already legally owned.

As noted in the majority report on S. 747, the bill "requires current owners of a firearm listed in section 3, and purchased prior to the act's effective date, to acquire a form 4473, or equivalent, from any federally licensed gun dealer." This same approach is found in S. 1970 and the underlying amendment. The Secretary of the Treasury would promulgate regulations which with which gunowners and dealers must comply, within 90 days. Although the majority report gives no guidance on these regulations, we assume that such regulations would take into account adequate notice to gunowners and possible situations in which a gun dealer might refuse to comply with a form request.

Additional concerns remain about the application of these sections requiring from 4473. Some concern has been expressed about the use of the copy of form 4473 which must be retained by each current owner of one of the listed guns. Will this form eventually become a carry permit for each individual gun? Will an owner need to carry the form whenever he or she transports or uses the firearm? Will law enforcement agents be empowered to confiscate the listed firearms if the form 4473 is not physically with the firearm at all times? Will these officers be allowed to go to the house of any citizen who they know owns one of these weapons and demand to see the form 4473? Exactly how will these sections be enforced? These questions have not been addressed either during the hearings or during committee debate.

In my view, the form 4473 requirements appear to be subtle registration requirements. Under title 18, United States Code, section 922(r), a new section proposed in this legislation, no later than 90 days after the Secretary of the Treasury issues regulations regarding the acquisition of copies of form 4473, each current owner of the banned firearms listed in the bill must obtain a copy of the form that was filled out when the firearm was originally purchased from a licensed dealer. If the firearm was purchased before the forms were originally required or if the current owner is not able to ascertain which dealer from which a previous owner might have purchased the gun, then the owner must go to any other licensed dealer and fill out a new form. The dealer and the owner must each maintain a copy of that form. Thereafter, for each subsequent sale or other transfer of that particular firearm, each new purchaser or owner must fill out a new form 4473; a record of the sale or transfer must be noted on the earlier copy of form 4473 already held by the seller or transferor; a copy of the new form 4473 and the amended old form 4473 must be maintained by the cur-

rent seller and purchaser; and they are required to obtain copies of any form 4473 that is created from any future transaction regarding that firearm.

In other words, while there may not be a central registry for the listed firearms here in Washington, DC, each person who owns one of these firearms when the bill is enacted will become the registrar for that firearm. That owner will be required to obtain a copy of the original form 4473. The owner must maintain a copy of a new form 4473 when he or she sells or transfers the gun, and, pursuant to the second sentence of title 18, United States Code, section 9922(r)(3), as added by this bill, obtain copies of all future forms 4473 involved in subsequent transactions involving that firearm.

This last requirement is particularly troubling when read in conjunction with the penalties section of the bill. Under those provisions, any person who knowingly fails to obtain the required copies of form 4473 may be fined up to $1,000 or imprisoned for up to 6 months, or both. If the original owner knows that the subsequent owner has resold the firearm, but the subsequent owner refuses a request to provide the original owner with a copy of the new form 4473, as required by this bill, the original owner is subject to the proposed penalities even though he or she made all possible attempts to comply with the law. Each future owner of the firearm in question is likewise responsible for obtaining copies of forms for all subsequent transactions that might occur after he or she transfers the gun. These sections of the bill are unworkable and unfair. Their full consequences were never analyzed or discussed by any of the witnesses before the committee.

And the pending amendment could expand these form 4473 requirements to literally every semiautomatic weapon.

Now, come on. That is why those of us who live in the Midwest and those of us who love to hunt and those of us who love to fish and be outdoors get sickened by this type of stuff, all done under this excited, frenetic, scare-all-the-people idea that somehow these weapons are going to be used in the commission of crimes. They are not. And you will not be able to stop the importation of illegal arms by those who are criminals, anyway.

Senator THURMOND is absolutely right when he says the way to stop this misuse of automatic and semiautomatic weapons, is to get tough on crime, not tough on law-abiding citizens by making it so miserable to own firearms that none of them can.

Let me just talk about this amendment.

First, in addition to expanding that stupid form and all of the subsequent forms, it would add more guns to the list of those already specifically mentioned by name.

While this long list of guns is objectionable, even more troubling are the catchall subsections which are very ambiguous. The first subsection V bans all other models by the same manufacturer with the same design which may have slight modifications or enhancements in every case. These modifications include things such as folding stocks, adjustable sights, and others. Under subsection V, the Secretary has the discretion to decide what other models made by the same manufacturers have the same design as those listed and will then instruct the Bureau of Alcohol, Tobacco, and Firearms to enforce the law against those weapons as well.

Thus, citizens will not find out whether a firearm falls within this clause until they wind up in court and Federal judges start telling us if the Secretary and BATF have properly exercised their discretion. Talk about bureaucracy, talk about ensnarlments, talk about a way of nailing decent, honest, law-abiding sports people. As if this discretion would work is objectionable enough.

Subsection W of this amendment then goes on to include any other firearm regardless of the manufacturer with an action design that is identical or nearly identical to the specifically listed weapons and which has been redesigned from or patterned after one of those listed firearms. With this subsection, the Secretary's discretion is broader still.

Some experts with whom I have consulted have indicated that virtually all semiautomatic weapons employ actions that are nearly identical. I received a letter from the Bureau of Alcohol, Tobacco, and Firearms I would like to print in the RECORD which states that the meaning of "action design" is unclear and its inclusion within the definition of assault weapons could be interpreted to include many conventional sporting semiautomatic weapons. This section could easily be read to include all semiautomatic firearms, including hunting rifles, which I understand the sponsors of this measure claim they do not wish to ban.

Mr. President, I ask unanimous consent to print the letter from the Bureau of Alcohol, Tobacco, and Firearms in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BUREAU OF ALCOHOL,
TOBACCO AND FIREARMS,
*Washington, DC, July 12, 1989.*

HON. ORRIN G. HATCH,
*U.S. Senate, Washington, DC.*

DEAR SENATOR HATCH: This is in reference to your letter requesting our opinion whether the language in S. 386, the Assault Weapon Control Act of 1989, or S. 747, the Antidrug, Assault Weapons Limitation Act of 1989, could be read to include all semiautomatic firearms.

Section 2 of both bills would amend 18 U.S.C. § 922 to make it unlawful for any person to transfer, import, transport, ship, receive, or possess an "assault weapon." This provision would not apply to the transfer, receipt, importation, or possession by or under the authority of a Government entity, or any lawful transfer or possession of an "assault weapon" before the effective date of the bill.

Section 3 of both bills would define the term "assault weapon" to include: (1) certain named firearms, (2) all models of the named firearms, and (3) any firearms which have an "action design which is identical or nearly identical to the named firearms." The meaning of the phrase "action design" is unclear and its inclusion within the definition of assault weapons could be interpreted to include many conventional sporting semiautomatic weapons. We are unsure whether the sponsors of the legislation intend to prohibit such firearms and would recommend that this provision be clarified.

We trust this information is responsive to your inquiry and, again, apologize for the delay in our reply.

Sincerely yours,

STEPHEN E. HIGGINS,
*Director.*

(Mr. KERRY assumed the chair.)

Mr. HATCH. Mr. President, this amendment appears to leave the door to firearms restriction wide open. This amendment also proposes the banning of large-capacity gun clips.

I am opposed to this amendment because it will not have any effect on violent crime and it will be, in fact, impossible to enforce. Short of registering existing large-capacity clips, there is no way of determining if such clips were possessed before the date of enactment of this bill.

It is my belief that this amendment would result in an administrative and enforcement nightmare. I defy anyone to present a plan which will effectively carry out the banning under this amendment. For someone who is even semiproficient in the use of a firearm, it will not matter whether a clip holds 5, 10, 15, or even 100 rounds. It takes a matter of seconds to change the clip on a semiautomatic firearm, and this amendment would simply have no useful effect.

In summary, the second amendment to the Constitution provides that every citizen of this country has the right to keep and bear arms in order to help in the preservation of our freedom. By banning the fireams listed in this legislation, Congress would seriously undermine that constitutionally protected right. Moreover, this bill will not keep the listed weapons out of criminals' hands and, even if it did so, these criminals will be able to obtain other weapons to commit their crimes. But it will not do that. The criminals always have access to these. They always have access to things that the rest of the community does not.

While the ban on the listed firearms may serve the purpose of appearing to

respond to the incidents of violent crime, in my view such a ban constitutes only a form of gun control, not crime control. Indeed, if this legislation's proponents had confidence in gun control as an effective means of crime control, the underlying legislation would not sunset after 3 years.

This language does not belong in this crime bill. It simply does not belong. I have to say that I get a little tired of some of the cheap shots that are taken from time to time by some of these gun control groups at the sporting organization called the National Rifle Association. Yes; they are very strong proponents of the right to keep and bear arms. Yes; they are very strong proponents of the law-abiding sportsmen and women in this country. Yes; they spend millions of dollars and all kinds of time teaching young people how to care for, treat, and use hunting weapons. Yes; they do an awful lot of good in our society from the Olympics to training young people in the safe use of firearms.

I get a little tired of some of the cheap shots that are being taken against them, because they are a tough group of people. They do believe in the sportsmanship of maintaining arms, keeping them, and handling them in an appropriate way and they, above all, are tough as nails on crime because they do not want weapons used in the commission of crimes.

Every time we try to get tougher on the criminal side of this, we wind up with this type of stuff.

I just want to say that I think every organization, I suppose, has aspects we can criticize politically. But the fact of the matter is this organization does a lot of good.

I can tell my colleagues, this bill is going to do a lot of harm. This amendment will do destructive harm to every sports person in this country. This amendment would do destructive harm to a lot of people who honestly want to own these weapons and want to use them for sporting purposes and rightfully ought to be able to since the same firing action in what are listed in this amendment and the underlying bill basically are virtually the same.

I think we have to go after criminals and quit going after the honest law-abiding citizens.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, how much time does the Senator from California wish?

Mr. CRANSTON. Not more than 5 minutes.

Mr. METZENBAUM. I yield 5 minutes to the Senator from California.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, few Californians, let alone Americans, remember who James Huberty and Patrick Edward Purdy were. These names will forever be tied to two tragedies which occurred in California in San Ysidro and in Stockton. Some Californians and some Americans will remember their names forever with horror.

James Huberty wielded an American version of the Uzi semiautomatic weapon. Patrick Edward Purdy brandished an AK-47. Their names and their weapons are linked forever with anguished parents and loved ones who were shocked beyond belief that their children and relatives could be cut down so brutally and so swiftly. None of the residents of these communities can every forget that Purdy fired over 100 rounds of ammunition in less than 2 minutes. He killed 5 children, he wounded another 29, and he wounded 1 teacher. Huberty was armed with a gun which was advertised as "the perfect choice for the sportsman who wants unfailing reliability and top performance in a rugged compact size." He killed 21 people.

I am glad that the language in the measure now before us bans the Uzi and the AK-47. That ban must be kept in the bill. But there are similar assault weapons the bill does not ban. It should do so. Therefore, I support the Metzenbaum amendment.

Mr. President, I support the right of legitimate gun owners and sportsmen to possess guns. But I do not believe that weapons whose sole purpose is to make the killing of human beings more efficent are weapons for sportsmen. Nor do I believe that such weapons ought to be available to the general public. Nonetheless, our laws today allow assault weapons, which can only be characterized as the machines of war, which could flood our streets with blood and turn them into urban trenches.

I am not alone in this recognition of the danger posed by assault weapons. A little over a year ago, the California legislature passed the Nation's first law banning military-style semiautomatic assault weapons. Similarly, the Los Angeles City Council outlawed the sale and possession of assault weapons. Even President Bush, a lifetime member of the National Rifle Association, instituted a ban on certain foreign-made assault weapons.

These legislative actions reinforce the belief that the privilege of gun ownership does not and cannot extend to any and every gun. These are not simply the actions and opinions of detached observers catering to the whims of gun abolitionists. Police officers, the Nation's front-line defenders, also recognize the threat which these weapons pose to the officers on the street.

The chief of the Los Angeles Police Department has testified that such weapons should be legislated out of the hands of killers because they turn our streets into battlefields. The National Association of Police Officers, the National Sheriffs Association, and the International Association of Chiefs of Police have also voiced support for Federal legislation regarding assault weapons. We should back up our police.

What the legislators and police organizations recognize is that as criminals become more armed, so must the police. If this mini-arms race goes unchecked, we run the risk of turning our cities into American versions of Beirut.

Mr. President, the legislation before us is a crucial step toward striking the balance between legitimate gun ownership and protection of the public. The true sportsman will not be impeded by this legislation in his or her use of a weapon. The law enforcement officers will face less firepower in his or her daily duties, and the public will begin to understand that we are serious about curbing assault weapon violence, and the public will be safer.

There is one question I want to leave for consideration, Mr. President. Imagine that assault weapons are already prohibited and that the Senate were voting on whether to legalize them. Who would support that bill for legalization? Drug gangs, organized crime, or the James Hubertys and Patrick Edward Purdys of our Nation?

The time for action is now. I urge adoption of the amendment offered by the Senator from Ohio, HOWARD METZENBAUM.

Mr. METZENBAUM. Mr. President, I thank my colleague from California for his support. I appreciate the fact of his willingness to stand up and be counted strongly in support of our amendment.

Mr. President, I wish to take one moment to clarify a matter. In the Democratic conference this morning, I was asked about whether any additional weapons could be added to this legislation by a member of the administration, and I indicated that in some circumstances it could. That was not the correct answer. I want to clarify that. No additional weapons may be added by a member of the administration.

The language of the amendment does provide that, if there is something almost identical which is called something a little bit different than the gun that is banned, that would be added. But the administration does not have—nor anybody in the administration—the right to add additional weapons.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. I yield 5 minutes to the distinguished Senator from Idaho.

Mr. McCLURE. Mr. President, I compliment the distinguished Senator

from Utah for the comments he has made already, and the leadership which he has given in the fight to preserve the constitutional right to keep and bear arms.

I will not take long, but I would like to remind my colleagues that the Constitution of the United States does not give us rights. The Constitution of the United States and the Bill of Rights guarantees us the continuation of rights which are believed to have been endowed upon us as free human beings by our Creator.

The framers of the Constitution very clearly had that in mind at the time they adopted the Bill of Rights, including the second amendment to the Constitution of the United States, dealing with the right to keep and bear arms. It is not something that they suddenly dreamed up. It is something that had been discussed over a decade or more prior to that time in the debate over what are the inalienable rights of man, and the right to keep and bear arms was believed by the framers of the Constitution to be one of such rights which when the Constitution was written were guaranteed to us. It was not something they decided to give to us that we did not have.

So the burden lies on the part of the other people who wish to deprive us of rights which we believe we are endowed with as free men and women in a free society, and the burden is on them to explain to us why they wish to inhibit the freedom of human beings.

Let us stop for a moment and look at what the Senator from California said just a moment ago. The Senator raised the issue of Mr. Purdy. Let us look at the facts in the Purdy case. Let us not look at the emotions, because none of us would deny what was done was horrible. It was revolting. It sickened each of us, and each of us as a parent, as a grandparent, must be concerned about whether something like that might happen to one of our family.

But let us look at the Purdy case. It was not a crime of gun ownership. It was a failure of the criminal justice system that produced Mr. Purdy. As a matter of fact, the lesson to be drawn from the Purdy case is that he should have been in jail. He was a criminal. Our criminal justice system released him from jail and he committed a horrible crime. It was not a failure of the second amendment of the Constitution but a failure of the justice system in our country.

Mr. Purdy had been arrested for the crimes of drug possession, solicitation of sex, illegal possession of dangerous weapons, receipt of stolen property, attempted robbery, criminal conspiracy, firing a pistol in a national forest, and resisting arrest. Those were things for which he had been charged, and the criminal justice system released him without ever once making a felony conviction record.

That was not because of the second amendment to the Constitution. It was because our criminal justice system failed to take him off the streets of our country. He plea bargained on some of those charges, which resulted in misdemeanor convictions only and not felonies. His last contact with the criminal justice system before he committed this terrible crime was a probation report that described him as a danger to himself and others.

It was not because he had not committed crimes that disqualified him from gun ownership. It was not because he had not been identified as a danger to society. It was because the criminal justice system failed to protect society against that kind of a psychopathic killer.

Yes, because of the lack of a felony record, he could and did comply with and pass much more strict statutes than we are dealing with here today. He passed a 15-day waiting period and a police background check. For those police organizations that say, "Hey, just give us a waiting period; we will stop all of this kind of violent crime," the Purdy case proves as a matter of fact it does not. Mr. Purdy passed a 15-day waiting period test, and he passed a police background check required under the California law to purchase five pistols. It was a criminal justice system failure that resulted in the death of those schoolchildren in California, not ownership of firearms in the hands of legitimate and law-abiding citizens.

Now, let us look for a moment at what is in the amendment with respect to what is proposed to be banned. I do not mean to go through the entire list and discuss each one of them, but I notice that subsection (M) under the Metzenbaum amendment, the Ruger Mini-14 would be banned specifically. I happen to know from my contact with sportsmen that the Ruger Mini-14 happens to be a weapon that is used a great deal by those who just go out and plink and target shoot, and the various kinds of recreational shooting familiar to those of us who keep and own and use firearms ourselves.

I would look at subsection (T) as an example; F.I.E. Spectre P. pistol. Somebody has decided that this is an assault weapon, whatever that may mean, but Senator METZENBAUM says in his amendment ban it. We have decided that it is dangerous and it should be banned.

Very recently the Maryland board that has to pass on the suitability of weapons of this kind under provisions of the Maryland statute approved this as an appropriate firearm for ownership by the ordinary American citizen, and yet that judgment by this board is going to be wiped out by somebody's idea, whomever it may be, that indeed that particular weapon ought to be banned.

The PRESIDING OFFICER. The 5 minutes yielded to the Senator have expired.

Mr. HATCH. I yield 2 additional minutes.

Mr. McCLURE. I thank the Senator for yielding more time. I will not take long, because I think most Members of this body are already familiar with these issues and are prepared to vote.

I intend to allow them to do that very soon.

The thing what concerns me about this basic thrust is that, because somebody has an abhorrence for a crime, they wish to strike out the instrument of that crime, not the perpetrator of the crime but the means by which the crime was perpetrated. Let us assume that somebody used a Molotov cocktail against a schoolbus full of children. Does that mean we are going to ban gasoline? Let us look at the incidents of mayhem on our highways from those who are drunken drivers? Are we going to ban automobiles?

Let us look at the criminal behavior of the individuals rather than the means by which they perpetrate these crimes against our society, rather than looking at the instrument they use.

As a matter, of fact, I am not sure what an assault rifle is. Am I a criminal because I own and use a 1903 A-3 Remington? That was the assault rifle of its day. Does that mean that my brother is a criminal because he has the 30-40 Krag that my father used and carried in World War I? It was the assault rifle of the 1890's. What is an assault rifle? What is there about a weapon that says it is so repulsive that we do not want it? In whose mind and by what criteria do we come to that conclusion?

Finally, Mr. President, with respect to the allegation the Senator just made about the discussion in the Democratic caucus earlier today, does this bill give anybody the right to ban weapons? I will say categorically, yes, it does.

There is discretionary action to determine what is similar or like or a slight modification. That is arbitrary discretion in the mind of some administative official to determine whether that provision is operative.

No amount of talk can take away the fact that this amendment gives discretion to administrative officials to exercise the same kind of arbritary judgment that the Senator from Ohio has exercised in drafting this amendment; the same kind of arbitrary discretion that says the mini-14 is an assault weapon; the people that own it are somehow criminal psychopaths, and there are a lot of people out there—I suspect some of the Senator's constituents in Ohio may be condemned as

criminal psychopaths in the mind of the Senator from Ohio as a result of this language—for the same kind of arbitrary discretion that says the Maryland board is wrong in describing the one pistol that I referred to earlier as an appropriate weapon to be owned by ordinary citizens. And the Senator from Ohio says, "Oh, I know that this is an assault weapon that should be banned."

I hope that the motion to table the Metzenbaum amendment will be agreed to and we can get on to discussing the very important measures that are involved in this crime package—and legitimately in the crime package—that deal with the incidence of crime, deal with the punishment of criminals, and to protect the American public against violent crime.

I thank the Chair.

I thank the Senator from Utah.

Mr. METZENBAUM. Mr. President, how much time does the Senator from Ohio have?

The PRESIDING OFFICER. Seventeen minutes, 15 seconds.

Mr. METZENBAUM. Mr. President, let me first address myself to the constitutional issue and yield myself 3 minutes for this purpose.

When we talk about the right of people to keep and bear arms, that shall not be infringed upon; it is in the Constitution. But the Supreme Court has recognized that it is a part of a total sentence. That sentence says:

A well-regulated militia being necessary to the security of a free state, the right of the people to keep and bear arms shall not be infringed.

So we are talking about a militia, a well-regulated militia, and guns that one owns in connection with that well-regulated militia. This matter has been before the Supreme Court a number of times on the constitutional issue, and in no instances has the Supreme Court ruled that that language in the Constitution gives an unlimited right to own guns.

My colleague from Idaho talks about the Ruger Mini-14/5F which is the Ruger model with a folding stock which makes it easy for criminals to conceal. Hunters do not need folding stocks, but criminals do, because they do not want to be walking around with a big gun all day long or when they are out on their night escapades. So they want the folding stock.

This gun actually was used to gun down FBI agents in Florida and one of those agents testified before our committee in connection with that loss of life that occurred to one of his fellow FBI agents.

Having said that, my colleague speaks about this gun or that gun, something Maryland did, did not do. I would say to my colleague that if he came to me and said, "This gun does not belong on the list and, if you take that off, we can support the amendment," my guess is we could work out something.

That is what I said to the NRA. I make no bones about it. I am not an authority on guns. I do not know much about guns. In order to compile this list, I went to the best source we could find, the Bureau of Alcohol, Tobacco and Firearms. I am not suggesting that they support this amendment. I am not sure whether they do or they do not. But I am saying that they were the ones who told us which guns properly belonged in this category.

Mr. President, one of my colleagues, I believe, is on the way to the floor to speak further on this subject.

I suggest the absence of a quorum.

Mr. HATCH. Will the Senator withhold?

Mr. METZENBAUM. I certainly do.

Mr. HATCH. My colleague makes the case for the particular point we are making. To compile the gun list, he went to the appropriate governmental authority and asked them what to include. They gave him this list. Look, it is a subjective judgment. It is one of the things that we are complaining about.

With regard to the second amendment, we have been over this issue many times in the past. It is my view that the right to keep and bear arms is an individual right to be enjoyed by all citizens if they so choose. In 1982, the Constitutional Subcommittee of the Judiciary Committee produced a report that I think makes several very effective arguments for this position.

In further support of that position the Supreme Court, in the recent case of U.S. versus Verdugo-Urguidez, a 1990 case, the Supreme Court equates the rights preserved in the second amendment with those preserved in the 1st, 4th, 9th, and 10th amendments. These are rights, according to the Supreme Court, to be enjoyed by all, as opposed to the rights guaranteed in the fifth and sixth amendments, which extend to criminal defendants.

That is precisely what we have been saying. The very arguments out of the mouth of the proponent of this particular amendment, my friend from Ohio, I think makes the case that we have been making here today and the distinguished Senator from Idaho has so eloquently made.

With that, I reserve the remainder of my time and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I suggest the absence of a quorum, but I ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object, I do not intend to object, do I understand I have about 15 minutes left?

The PRESIDING OFFICER. Fourteen, twenty-three.

Mr. METZENBAUM. The Senator from Utah has about 24 minutes left. I wonder if he would mind, until such time as we get down to an even amount of time left, charging it against himself.

Mr. HATCH. I am prepared to even yield the time, except we have the distinguished Senator——

Mr. METZENBAUM. I am waiting for Senator KENNEDY. I want to be sure he has enough time.

Mr. HATCH. Here is Senator KENNEDY. The distinguished Senator from Wyoming, also, would like to speak, and I know the Senator from Massachusetts is here.

Mr. METZENBAUM. The Senator from Ohio has 14 minutes left and the Senator from Massachusetts may take it.

Mr. METZENBAUM. Mr. President, I have no objection, and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY, Mr. President, I ask for 7 minutes.

Mr. METZENBAUM. Without objection, I yield 7 minutes.

Mr. KENNEDY. Mr. President, I rise to support the amendment of the Senator from Ohio. Senator METZENBAUM has, over a long and distinguished career, made an extraordinary contribution to the safety and the security of the people of this country by his tireless efforts to try and deal with the proliferation of weapons of violence in our society.

Once again this afternoon the Senate of the United States will have an opportunity to address a very basic and fundamental issue that does not take a great deal of time to debate, an issue which has been presented in the Judiciary Committee on a number of different occasions, an issue that has basically been studied to death.

Mr. President, I believe that with the acceptance of the Metzenbaum amendment, we will do more in terms of safety and security for the American family than any other provision in this legislation. I think all of us know

that in a short while we will have the opportunity here in the Senate to see whether the Members are prepared to stand up to the authority and the power of the National Rifle Association, which has placed this particular amendment and the DeConcini amendment on the top of their legislative agenda.

The Members of this body will have a very clear choice, so to speak, Mr. President. On the one hand, they will be able to vote on behalf of the National Rifle Association. On the other hand, they will be able to vote for their local police men and women in this country, those that are out patroling the streets of this Nation, those men and women who put their lives on the line virtually every day, those men and women whom we call upon to try and come to grips with the problems of substance abuse and the drug kings in our society. We will have a chance to find out where the Members of the U.S. Senate stand on this issue.

The Senator from Ohio has presented the case that has been made by thoughtful men and women who are on the front lines of American defense in law enforcement. There are repeated examples of how these law enforcement officials are trying to deal with violence in our society and are basically outgunned by these types of weapons. What possible response is there to the amendment of the Senator from Ohio? Well, you get your noses under the tent on these assault rifles, then who knows what is going to be down the road in terms of legitimate hunting weapons in this society?

Mr. President, that is hogwash. That argument has been around here for 20-odd years. It is irrelevant to this debate and discussion. Every Member of this body understands it, Mr. President. We are talking about an issue which even Secretary Bennett was persuasive in terms of getting this President of the United States, who had looked at this in a different way, to take a very limited step with regard to the prohibition of certain types of assault weapons into the United States.

Then we asked him, why not include assault pistols; they are even more preferable to the assault rifles. We will study that; we will give that a little more study by the administration.

Mr. President, we all know what is at issue here. It is a question of safety and security. One-half of 1 percent of the weapons brought in here fall within these categories; yet, they are used by the most sophisticated drug barons in our country.

Then we are in the intolerable position of taking those which are manufactured here in the United States and shipping them down to the Andean countries. We shake our fist at those Andean countries and send big aircraft carriers out there telling them to stop this violence, stop this transportation of the various illicit substances; meanwhile, we are sending right in there the weapons of destruction that put at risk the lives of courageous men and women who are trying to bring about peaceful change through democratic process and procedures. We do it shamelessly, Mr. President, absolutely shamelessly.

Mr. President, this is an issue that has been around. We can take this small step with regard to the automatic weapons. We know where the American people stand. I have not seen the most recent polls, but the one that I just saw about a year ago by the American people was 83 to 10.

We know the Members around here hope and say, well, let us just vote against the Metzenbaum amendment, and we will take our chances with the DeConcini and, by God, that NRA will not forget it. That is true. They are betting again that the American people, hard-working families who are trying to provide for their families, for their children, would just sort of forget about his until next election time.

Well, Mr. President, I believe that there is a movement out there. We saw those extraordinary killings that have taken place in school yards across this country, and I think the American people have said: "We have had enough." And, hopefully, with that sense and that feeling among the families of this country on this issue, saying we have had enough, the Senate will vote in support of the Metzenbaum amendment.

Mr. President, I support the strengthening amendment proposed by my colleague, the Senator from Ohio, just as I supported a similar proposal, S. 386, when it was considered by the Senate Judiciary Committee last year.

The assault weapons language in this Democratic crime package only attacks a small portion of the domestic assault weapon problem. This amendment, sponsored by the Senator from Ohio, a courageous leader on these issues, would attack the assault weapons issue more broadly. The Senate should act swiftly on this measure and send it to the other body for its approval. Action to stem the proliferation of assault weapons is long overdue.

This amendment would expand the list of assault weapons banned pursuant to the Democratic crime package. This amendment would also add a provision restricting the sale of ammunition magazines and ammunition belts in excess of 15 rounds, as President Bush proposed last year.

The weapons that will be added to the list reflect the expert assessment of the finest of our law enforcement community. The expanded list includes eight domestic assault weapons, five foreign made assault rifles and five foreign made assault pistols.

This proposal would ban a specific list of semiautomatic assault weapons identified by law enforcement as a danger to the community. The weapons are listed by name, model, and manufacturer. To make sure our intent is not easily evaded, the proposal applies to these weapons even if they are modified in minor, cosmetic ways. It does not apply to conventional semiautomatic rifles, shotguns or handguns. It also does not apply to popular semiautomatic hunting rifles, such as the Remington 4 and similar weapons.

The committee's efforts on the assault weapons issue date back to the early stages of the 1988 drug bill—before assault weapon violence became commonplace and before some urban neighborhoods began turning into free fire zones. These guns have put awesome killing power in the hands of drug runners and other criminals.

With this legislation, we have a chance to stem the tide of assault weapons and the senseless violence they cause.

Two decades have passed since Congress enacted major legislation restricting firearms sales.

Since then, we have witnessed a runaway arms race as neighborhoods descend into anarchy, ruled by heavily armed gangs and others who answer to no law.

Assault weapons put awesome killing power in the hands of drug runners, hate groups, and other criminals. Assault weapons go by names like: "Street Sweepers," "Bushmaster," "Paratrooper," and the "Commando."

The ease with which these weapons can be obtained is fueling the arms race on the streets of every community in America. There is no reason that individuals should find it easier to acquire assault weapons than it is to acquire a drivers license or a pet cat.

Sales of assault weapons across the United States increased from 4,000 in 1985 and 1986 to over 40,000 in 1988 and even more last year. In the past few years, tens of thousands of assault weapons have entered the United States.

Many of these guns wind up in the hands of drug dealers who use them against officers of the law and innocent bystanders. Jamaican drug traffickers have smuggled over 1,200 assault weapons to dealers in the North. Sophisticated firearms have been seized in more than half of all crack arrests.

The popularity of assault weapons among criminals in the United States and drug traffickers in South America continues to grow. For the first time since police began categorizing weapons by type, semiautomatic pistols are outdistancing revolvers and all other

firearms as the weapon of choice of criminals. According to a recent study of Bureau of Alcohol, Tobacco, and Firearms weapons tracing records, in the 15 months between January 1, 1988, and March 27, 1989, semiautomatic models moved ahead of revolvers and the trend toward semiautomatics continues. In addition, despite the fact that only 0.5 percent of the 200 million privately owned guns are assault weapons, those guns turn up in disproportionate numbers in a variety of crimes:

Nearly 30 percent of all firearms traced to organized crime, gun trafficking and terrorist crimes in the past year were assault weapons;

Nearly 12.4 percent of the weapons traced to narcotics crimes were of the assault variety.

The use of assault weapons in crime rose more than 78 percent in 1988 over 1987.

The addition of assault pistols to the prohibition is crucial. Not only are many of the assault pistols on the market as lethal as the assault rifles, they are easy to conceal.

Gun industry catalogs market assault pistols by freely noting that they have relatively little sporting use and are primarily designed for military and combat purposes: Jane's Infantry Weapons describes the Uzi assault pistol as:

A shortened and lightened modification of the Uzi submachinegun * * *. It has been designed for civilian use, but there are obivious applications to military and security forces.

A test report on the British made Sterling Mark 7 assault pistol describes it as a "pistol * * * in name only; it is an assault weapon."

The Gun Digest Book of Assault Weapons describes the Spectre pistol as:

A semiautomatic pistol, with all the submachine gun features. It accepts the standard submachine gun magazines.

The Gun Digest also made the following general statement about assault pistols:

You can buy perfectly legal versions of the Uzi, MAC-10, M-16, Sterling and countless other modern assault weapons. The vast majority of these weapons were built for and sold to the same individual that wanted a souvenir M-1 rifle or carbine.

Special Weapons magazine talks this way about the Uzi carbine, minicarbine and pistol:

Let me first say that the prime design purpose of the weapons covered here is combat.

Lest anyone doubt the popularity or killing power of assault pistols as compared to assault rifles, keep in mind that a Cox Newspapers study concluded that three of the five weapons most often traced to crime in 1988 were the following assault pistols: MP-25, J22, and TEC-9. The same study noted that,

For the first time since records on firearms used in crimes have been kept in the United States, semiautomatic pistols outnumber revolvers.

Similarly, the Washington Times reported last year that experts have described the MAC-10 as the "Weapon of Choice" for Colombian assassins because the small assault pistol fires powerful .45 caliber ammunition at a rate of hundred of rounds per minute.

Cox concluded that while assault guns make up only 0.5 percent of the 200 million privately owned firearms in the United States, in 1988 and the first quarter of 1989, assault guns showed up in nearly 30 percent of all firearms traced to organized crime, gun trafficking and crimes committed by terrorists in the United States. Out of 385 weapons traced by the Bureau of Alcohol, Tobacco and Firearms [BATF] at the request of the Colombian Government, the majority were found to have been bought illegally in the United States.

Cox:

Semiautomatic guns patterned after military firearms are the favored weapon of a growing number of criminals, especially violence-prone drug gangs that infest larger U.S. cities.

Cox:

Of the thousands of gun models sold in the United States, just 10 of them—all members of the so-called assault gun family—accounted for 12.4 percent of the Nation's drug-related crime.

Cox:

In sheer numbers, assault guns were most common in drug-related crime, accounting for 12.4 percent of all narcotics firearms traced. On the west coast, that frequency jumped to 21 percent, and in Arizona to 38.6 percent.

Over 2 years ago, when our national drug director was Secretary of Education, William J. Bennett urged the Reagan Justice Department to take action on assault weapons. Bennett concluded that:

The easy access to firearms has put increasing firepower in the hands of drug traffickers. We should consider supporting legislation to better manage the production, importation, and sale of automatic weapons and other firearms, as sought by the major law enforcement organizations.

Secretary Bennett clearly understood the increasing linkage between drugs, guns, and drug-related crime. The organized narcotics trade generates enormous amounts of cash and huge amounts of narcotics.

Guns are the tools of protection for organized drug traffickers.

One week after Bennett became drug director, he persuaded President Bush to examine the dangerous spread of assault weapons like the AK-47. Within weeks, Bennett announced the administration's decision to halt importation of a specific list of foreign-made assault weapons, compiled after thorough examination of the issue by a panel of experts at the Bureau of Alcohol, Tobacco and Firearms.

The BATF experts examined each weapon and surveyed gun clubs and other experts before it arrived at its conclusions.

The Bush administration's 1989 ban on a specific list of assault weapons imports is a significant step in the right direction and I applaud it.

The real test is whether Congress has the will to apply the logic of the Bush administration's ban on certain assault weapons imports to assault rifles made in America and sold over the counter with few questions asked. The import ban only encompasses 25 percent of the assault weapons in the United States.

The 75 percent that are manufactured domestically include the TEC-9 and the Ruger Mini-14 which are among the weapons of choice for narcotics traffickers.

Congress must take the next step and ban domestic production.

The time is long past for Congress to enact legislation to ban the sale and transfer of assault weapons, while protecting the interests of law-abiding citizens. Until we tighten the controls on the sale of these and other dangerous weapons whose only use seems to be to kill human beings, the proliferation of assault weapons and the senseless violence they cause will continue.

Critics of this proposal argue that it is too broad and that it will effectively ban most semiautomatic rifles, shotguns, and pistols. This is plainly wrong.

The National Rifle Association and other critics try to equate assault weapons with all semiautomatics. While all assault weapons are semiautomatics, very few semiautomatics are assault weapons. Of the estimated 20 to 30 million semiautomatics in existence, roughly 1 million—3 to 5 percent—are assault weapons; because this proposal is not comprehensive, an even smaller number would be covered under the Democratic proposal.

Do not be misled by other criticism of this proposal:

It would not give the Treasury Secretary or the Bureau of Alcohol, Tobacco and Firearms special authority to ban all sales of new semiautomatics; it would neither require gun owners to register semiautomatics nor require that they submit to an FBI background check for each such weapon they currently own;

Gun owners would not be required to pay a transfer fee because of this legislation;

Semiautomatic gun owners would not be required to obtain written permission from the Treasury Secretary to transport a semiautomatic weapon across State lines; and

This legislation would not result in punishment for an inadvertent failure to follow its requirements.

At a time when budget constraints make it difficult for law enforcement agencies to outfit themselves with basic crime-fighting equipment, drug dealers and other criminals are increasingly able to expand their own firepower by purchasing assault weapons. Too often, measures which would restrict such purchases fail because of the gun lobby's inability to distinguish between the interests of legitimate sportsmen and the serious problem of gun crimes in our society.

For those who wondered whether senseless daily gun killings in America could get worse, the answer lies in the fact that gruesome killings caused by easily obtained assault weapons are becoming all too frequent. And for those, like the National Rifle Association, who opposed our efforts during deliberations on the 1988 Anti-Drug Abuse Act to limit paramilitary weapons, and others who opposed our efforts to prevent gun violence in schools, we know how wrong were their claims that existing laws are adequate.

This legislation bans the sale and transfer of assault weapons, while protecting the interests of law-abiding citizens. Until we tighten the controls on the sale of these weapons, their proliferation and the senseless violence they cause will continue.

Some of the witnesses who testified before the Judiciary Committee during hearings on assault weapons, like some opponents of this amendment, would have us ignore the weapons and deal only with the criminals. Their arguments are half-right. We should be doing more to combat the criminals.

But we should not ignore the weapons they use or the countless law enforcement officials from around the Nation who plead for help in stemming the flow of ever-more powerful guns.

Legislation to restrict assault weapons has the overwhelming support of the Nation's police, including the 90,000-member National Association of Police Organizations, which has indicated that it will—

• • • vigorously support the provisions of [the Democratic crime package] as a moderate but responsible measure designed to deal with the proliferation of weapons which have no purpose other than to gun down and maim police officers and other innocent citizens including young children.

In its letter to Members of this body, the National Association of Police Organizations emphasized that:

[T]he Bush administration already has banned the importation of these lethal weapons of mayhem.

The Senate must now follow suit with legislation which would ban their counterparts.

This issue is literally a matter of life and death for the law enforcement officials who support these proposals.

In Escondido, CA, a diagnosed schizophrenic walked into a gun store in December 1987, lied on his Federal form about his arrest record, mental condition, and drug use, and purchased the Norinco variation of the AK-47 assault rifle. The following day, under the influence of methamphetamines, he used his new acquisition to kill a San Diego County Deputy Sheriff, wound two other deputies, and hold police off for over 12 hours. The ensuing shootout resulted in the exchange of 300 shots.

In December 1988, a Dallas police officer was killed while making an undercover narcotics purchase. The weapon used was a TEC-9 assault pistol.

Last spring, a MAC-11 assault pistol was used by a man in Louviers, CO, to kill himself, but not before he used it to kill a woman and her mother and wound a police officer.

Last August, a New Jersey State trooper was shot four times in the chest and abdomen by drug traffickers wielding a MACK-11 assault pistol.

The 200,000-member Fraternal Order of Police and the 3,300-member National Sheriffs Association and the other leading law enforcement organizations across this country support this measure. They are on the front lines of the war on crime. They know what is needed, and so does the Senate.

Once again, I commend the Senator from Ohio for bringing this amendment to the Senate which, as I say, I believe will do more about peace, stability, and tranquillity in our communities than perhaps anything else in this bill. I thank the Senator.

Mr. METZENBAUM. Mr. President, I thank the distinguished Senator from Massachusetts. Over a period of years, since I have been here and before I got here, he has been in the forefront in attempting to remove the guns from the streets of America.

He has had courage. He has spoken up and spoken out and sometimes under very difficult circumstances. But his support is very meaningful to us in connection with this amendment. We are very grateful to him for coming over to speak in behalf of it. I think what we are talking about is so well enunciated by him.

This is not a very controversial issue. This issue really says, Do you believe that the streets of America should continue to be filled with gun dealers and racketeers and criminals who have weapons that are stronger, more effective, more powerful than the law enforcement officers of this country?

This concerns me, as I stand here at this moment and I say to myself, Why is it this way? Why do my colleagues in the Senate not have the courage? They have courage in so many other areas but when it comes to the NRA and this one issue of guns, so many buckle under, so many say: "I wish there were not an amendment coming to the floor. I wish I did not have to vote on it."

I can only say this: The American people are on my side, whether the NRA is or is not, and obviously they are not. The fact is if there is some particular language in my amendment that you are not comfortable with, then we will change it. But overall the issue is, Do you want to permit an unlimited proliferation of guns, semiautomatic weapons, in the hands of the criminals, or, today, are you prepared to stand up and cast a vote for law and order and cast the vote for those little children who were mowed down in a California schoolyard?

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I do not believe the American people as a whole do support his side. Frankly, polls sometimes show remarkable numbers because polls are asked in different ways. If the American people knew that their right to keep and bear arms is going to be removed because of these types of activities, I think they would vote this down overwhelmingly.

Second, I have never seen the criminals in this country have any difficulty at all getting these weapons. They can get them. They do not worry about registration. They do not worry about the BATF or all these laws, rules, and regulations that are going to be saddled, if this amendment passes and the underlying amendment, upon good, law-abiding, decent sportspeople. That is what is really involved here, more Government.

Let me tell you another thing. This is an important issue. The very people who support these types of amendments when it comes time to getting really tough on crime, when it comes down to capital punishment, which we know deters, not only specifically because that person is never going to commit murder again, but generally, and it deters among some of the worst criminals on this Earth, not only because of capital punishment, but in so many other ways when you try to strengthen the criminal laws of this country they worry more about the rights of criminals than the rights of victims. I think it is important to worry about both sides.

Our Constitution protects criminals' rights and that ought to be maintained, and we ought to get as tough on criminal activity in this country as we can. If you want a perfect illustration of how easy some of these people are in this body on crime and criminal activity, look at S. 1970 and compare it

to the Thurmond substitute, and I think it will give you a pretty good insight into what is really going on here. We are talking about law-abiding, decent people.

Mr. KENNEDY. Mr. President, will the Senator yield for a question?

Mr. HATCH. I would like to not do it on my time if I could help. I will yield on the Senator's time.

Mr. METZENBAUM. I do not have time remaining.

Mr. HATCH. Mr. President, what is the time situation?

The PRESIDING OFFICER. Nineteen minutes and twenty seconds.

Mr. HATCH. I yield to the distinguished Senator for a question.

Mr. KENNEDY. Mr. President, will the Senator outline what sporting purposes it would have?

Mr. HATCH. I make it clear the action on all these rifles is exactly the same as long hunting rifles. It is difficult to determine the difference between the two. I cite the particular time according to BATF that would lead to banning all long hunting rifles with similar actions. That is what BATF tells me.

The second amendment is not just sporting weapons either. Section 3, according to BATF, the Department of Treasury says:

> Section 3 of both bills would define the term "assault weapon" to include: (1) certain named firearms, (2) all models of the named firearms, and (3) any firearms which have an "action design which is identical or nearly identical to the named firearms." The meaning of the phrase "action design" is unclear and its inclusion within the definition of assault weapons could be interpreted to include many conventional sporting semiautomatic weapons.

That is how radical this amendment is. That is why so many of our sporting people are up in arms objecting to this type of stuff. What I am saying is let us get tough on the criminals. Let us quit getting tough on the people who are sports-related people, who are honest and decent. That is the story that is never asked in these polls.

The American people are basically fair. They know that we have had time-honored rights to go hunting and use guns for sporting purposes and teach our kids how to target shoot, and so forth. They would resent it if they knew that this type of activity is for no other reasons than to take guns away from people who have always abided by the law and frankly those who do not abide by the law would have access to them anyway.

I challenge friends on the other side to get tough on crime. Let us not get tough on the law-abiding citizens. Let us really do some habeas corpus reform. Let us do get the death penalty, the strong penalty used only in the most heinous crimes and most vicious committed crimes and let us stop these 16- and 17-year multiple appeals going on that cost the taxpayers millions and millions of dollars that are frivolous.

Mr. KENNEDY. Does the Senator support the Bush ban?

Mr. HATCH. I do not.

Mr. KENNEDY. The Senator does not.

Mr. HATCH. I believe it is taking away rights of decent, law-abiding citizens, and I think the President even has second thoughts about it.

Mr. KENNEDY. Does the Senator differ with the police organizations who are risking their lives every day and have indicated support of these particular proposals? Does the Senator think that they are representing the legitimate interests of policemen and women across this country who are on the frontline, and many of them are members of the NRA, or does the Senator think they are being duped, too?

Mr. HATCH. Let me answer that question. I think if a poll were taken of the vast amount of law enforcement officers of this country, they would vote this amendment down almost 100 to 1. Let me tell the Senator another thing. Every one of those police officers that I know of or at least the vast majority are for the death penalty, too.

Do not use the argument on me and argue against the death penalty on the other side of this case.

If I could, Mr. President, the fact of the matter is that the leaders of some of the police organizations do support the DeConcini amendment. The rank and file do not. I have to tell you there is going to be a lot of uproar over this. The fact is that the officers on the streets, some of them do support that, but the majority of them do not.

But I will tell you almost to a person they all support capital punishment in these vicious, rotten murders that are going on in our society by vicious, rotten people who sometimes get out and murder others, some of whom are on death-row and murdered some of the officers in the jails and penitentiaries. They are in because of multiple appeals and other soft things we are trying to do all the time in this body.

This is our chance right now on this crime bill. It is our chance to get tougher on these criminals. It is our chance to put our money where our mouths are. I have to admit that it is important to always take care of constitutional rights, but I think there are constitutional responsibilities, too. I just want to say that there are victims' rights that are not being taken care of every time we are soft on crime.

Mr. METZENBAUM. Mr. President, will the Senator from Utah yield for a question on my time?

Mr. HATCH. If I could, let me yield to the distinguished Senator from Wyoming because I have to leave the floor for a minute.

I yield such time as the distinguished Senator from Wyoming needs.

The PRESIDING OFFICER (Mr. ADAMS). The Senator from Wyoming.

Mr. SIMPSON. How much time is remaining?

The PRESIDING OFFICER. The Senator from Utah has 13 minutes 51 seconds remaining and the Senator from Ohio has 5 minutes and 3 seconds remaining.

Mr. HATCH. I yield 8 minutes to the distinguished Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 8 minutes.

Mr. SIMPSON. Mr. President, I see my good colleague from Massachusetts is not in the Chamber. I wanted to respond to him in the best faith on this. Senator METZENBAUM is also carrying on a cause that he has long held dear.

The issue is so clear, if we just try to keep in mind the difference between those of us who live, say, in a State like Wyoming and those who live in, say, the State of Massachusetts. There are signs at the border of the State of Massachusetts that say that anyone who is apprehended with a weapon in their possession is given an automatic fine of $100 and a prison sentence. I cannot remember the exact punishment.

It is very clear that such a border sign in Wyoming would be totally offensive and unbelievable. Wyomingites would never understand why a person in Massachusetts would be punished for that, any more than a person in Massachusetts could understand a person of good intellect, and sharp as a tack, with a gun in the back of his pickup on a rack, that he uses to shoot coyotes and other predators. It is a sport weapon, and the owners simply go about their lawful business. There it is right there. These gun owners are not slobbering beasts just tooling along the highway looking for a fellow human being to blast away. Making that distinction is the tough part of this issue.

I knew Jim Brady before he became a part of the Reagan administration. He has been one of my loveliest friends since I came to Washington. His wife Sarah is a magnificent lady who goes all across this land talking about these kinds of things. She does it with great passion, great logic, and great patience. But this amendment brings us to the point where we really are intruding on a person's right to own a weapon, which happens to be a semiautomatic.

I know it is hard for people to believe, but there are things like .270 rifles that are magnificent hunting weapons. I have one. I shoot deer. I do not mount them. I eat them. I do not get some macho kick out of that.

Some people go out and bang cattle in the head every day, butcher them,

and eat them. Nobody says anything about that. But if you say that you go out and get a deer around here; people go crazy. They think you are some kind of a sadistic nut. So that is what you have to deal with when you deal with these gun control issues.

This amendment is really an infringement. It is an infringement on certain weapons people use lawfully and appropriately—Ruger semiautomatic, .22 rifle, for instance. My daughter is a better shot with one than I am, and she does not kill anything. She dislikes hunting. But she does enjoy target shooting. That type of legal activity is exactly what you are reaching with this amendment. I know it is hard to believe. Do not throw anything—but it is true.

I cannot say it clearly enough. I do not think anyone here "buckles under" to the NRA. The NRA is speaking for, obviously, a great number of American people. If we really are listening to the American people, which we say we are—we are going to find out in a few minutes with this vote. Because we represent the American people—we will find out how they feel about this. But what the American people really feel is: Put these guys in the clink. Take this screwball Purdy, who blasts away little children—a terribly brutal and savage act. He opened fire. Put him away. Help us do that.

Why do the proponents of this amendment not help the American citizens "salt away" some "animals," who are worse animals than the animals you could ever go hunting for and kill with a gun? These criminals have no remorse. Read what is happening in New York City. The fabric of that city is breaking down because 13- and 14- and 15-year-olds are allowed to do anything they want to, apparently. They do it with gusto and savageness. They have no remorse. Start putting those people in the clink. Get capital punishment going. Get habeas corpus petitions restricted and reduce all the things we go through in the exercise of an effort to put these particular people away. Let us lay some heavy penalties on them. Help us do that. Then we will see where we have to go to refine the law and we will begin to make corrections.

There are some real "nuts" out there. That is what the American people know. Do we think the American people are going to sit still in their homes while a bunch of "nuts" are running around on the outside? This debate is being watched somewhere. Probably in prisons around the country they are sitting there in their cells watching television and just giggling; saying, "What do you think that means to us? We will get our guns any way we want them. That is the hideous background laughter to this debate.

I hope my colleagues will keep another thing in mind. Those of us who support the constitutional right to keep and bear arms are not some kind of hideous people who really do not care or who get some macho kick out of carrying guns on our hips out in the wild West. That is not what we are talking about.

My grandmother was a very gentle, and genteel, woman. She lived to be 100. She always "packed a little iron" toward the end of her life. She did finally put it under the bed. We all thought it was quite good of her. It was a very gentle little derringer she had for many years. She said:

> That is what I learned about living in the West. I had people who tried to take my babies and my animals, and sometimes this is the only way I could protect myself.

So it really is not as bad as my colleagues think. I say to people, help us put away these sick, sick people, who are in our society, instead of allowing them to get out time after time, helped by a bunch of "bleeding hearts" who just outdo themselves.

I always say: "Button your shirt, your heart fell out. Let us 'try 'em and fry 'em.'" That will start a lot of good action in the United States. It will stop a lot of crime, and we will not have to worry so much about the legal use of guns.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, how much time remains on both sides?

The PRESIDING OFFICER. Six minutes and 20 seconds to the Senator from Utah controlled by the Senator from Idaho; 5 minutes and 3 seconds controlled by the Senator from Ohio.

Mr. McCLURE. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from Idaho is recognized for 3 minutes.

Mr. McCLURE. Mr. President, I want to take this time to indicate, partially, a response to what the Senator from Massachusetts said a moment ago. I wish he were on the floor to hear this comment. I hope he is hearing it elsewhere.

There is an organization known as the Law Enforcement for the Preservation of the Second Amendment. That does not come from the wide open spaces of Idaho nor the big game hunting territories of Wyoming. That organization is headquartered in Waterford, NJ. I will not take the time to read the names of all the people that are on a partial list of steering committee members for that organization, but there is a sergeant from Arizona, a deputy sheriff from California, there are others from California, a lieutenant from Florida and a deputy sheriff from Florida, a sergeant from Illinois, a major from Indiana, an officer from Kansas, a trooper in Louisiana, a detective sergeant in Mississippi, and a police chief in New Hampshire, a police officer in New Jersey, a deputy sheriff in New York, a police chief in Ohio, a sergeant from Ohio, and a sergeant from Utah. That is just a partial reading from a listing of the steering committee members of the Law Enforcement for Preservation of the Second Amendment.

I want to read just one portion of this statement from them.

> The thousands of law enforcement officers belonging to LEPSA believe that such legislation is not only unreasonable and unworkable, but will breed contempt for the law, and those of us who enforce it.

Mr. President, I ask unanimous consent that that entire document be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

> LAW ENFORCEMENT FOR THE PRESERVATION OF THE SECOND AMENDMENT,
>
> *Waterford, NJ, January 23, 1990.*
>
> To: Members of the U.S. Senate.
>
> From: L.E.P.S.A.
>
> Subj: Unreasonable/unworkable legislation.
>
> The entire membership of LEPSA, a law enforcement organization with constituents in all 50 states, urges you to scuttle any attempt at passage of S. 1970, S. 1971, and S. 1972. In short, we would urge you to rebuff any attempt at banning any type of firearm, under any pretext. Those few positive aspects embodied within these bills is negated by their intolerable attempt to ban firearms in the name of "crime-control". The thousands of law enforcement officers belonging to LEPSA believe that such legislation is not only unreasonable and unworkable, but will breed contempt for the law, and those of us who enforce it!
>
> We would wish to emphasize the need to consider constructive alternatives to the Biden/Thurmond notions that everyone should suffer for the criminal transgressions of a few. LEPSA is supporting legitimate crime suppression proposals; 1. Massive expansion of our nation's prison capacity through the utilization of unneeded military land assets for prison expansion, 2. Mandatory sentencing for crimes committed with firearms, and 3. Implementation of a "Point-Of-Purchase" firearms screening system (such as the one being studied by the U.S. Justice Dept.). Basically, all of these proposals involve little more than giving existing laws the teeth they now lack, and focusing all governmental energies on punishing criminals, rather than the general public. Those among us must suffer with every ill-conceived piece of legislation that we are compelled to enforce. Whatever "good intentions" lie beneath these bills won't mean anything on the street. Without adequate prison capacity, and through misdirecting your energies, we as lawmen will look upon your efforts as nothing more than "legislative masturbation". For these reasons we urge you not to support these bills.
>
> Sincerely,
>
> THOMAS J. AVENI, JR.,
> *LEPSA Founder/NJ Rep.*

Mr. McCLURE. Mr. President, I also wish to make reference to a publication, the Dickson Herald, Dickson, TN:

"Cops Speak on Gun Ban," a "public voice," published in that newspaper.

The following headlines probably sound familiar to you: "Police Bitterly Oppose NRA Stand." "NRA Defends Cop Killer Teflon Bullet." "Tough New Gun Laws Needed to Keep Guns From Criminals." "Assault Rifles Should Be Banned." These headlines share one common feature. They are all false.

The article goes on to make a statement on behalf of law enforcement officers from Dickson, TN, in opposition to this type of legislation.

I ask unanimous consent that that article also be printed in the RECORD in full at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Diekson (TN) Herald, Mar. 29, 1990]

COPS SPEAK ON GUN BAN

The following headlines probably sound familiar to you:

1. "Police Bitterly Oppose N.R.A. Stand"
2. "N.R.A. Defends Cop Killer Teflon Bullet"
3. "Tough New Gun Laws Needed To Keep Guns From Criminals"
4. "Assault Rifles Should be Banned"

These headlines share one common feature, they are all FALSE!

Take number one for example. The vast majority of America's rank and file street cops support the N.R.A. in every way. A high percentage of cops are members of the N.R.A.

Now look at number two. There does not seem to be a single documented report of any cop ever being killed by a teflon-coated bullet. Besides, many non-teflon bullets can out-penetrate the so-called "Cop Killer" rounds.

And now number three. This is one of our favorites! You don't have to worry about armed criminals—if they are behind bars where they belong! Patrick Purdy killed five children on a playground recently, yet prior to that he was set free by the courts on seven occasions after being arrested for serious crimes! In addition to that, he was classified as mentally unstable! So instead of putting him away, our system allowed this mentally unstable multiple offender full freedom—to kill at his will! And his case is identical to thousands of others, it is not an isolated incident.

And now number four. Lawmakers are banning assault rifles because Patrick Purdy killed five children with one. He could have killed that many innocent children with a bowie knife, then the lawmakers could go after knives. He could have driven a car through the playground killing far more than five children, what then?

When will we start making criminals pay for their deeds instead of decent citizens who own firearms for legitimate reasons? Why do lawmakers fear and detest armed citizens and at the same time pamper armed criminals?

We would all benefit from Criminal Control, but who really benefits from Gun Control? Two groups of people come to mind. First, the violent criminal-killers, rapists, muggers, burglars, robbers, kidnappers and drug dealers. These people would benefit in a big way-job safety! They will be armed no matter what kind of laws we pass, but YOU will be unarmed! The criminal is the predator and you will be his defenseless prey, thanks to the lawmakers you voted into office to serve your needs. If you were a violent criminal, wouldn't you support strict gun control? You bet! The second group of people who would benefit from gun control is Organized Crime. These "businessmen" would make gun and ammo running into a blackmarket venture equal to rum running of prohibition days. They would smuggle factory-made foreign guns and ammo into the U.S. by the tons. They would manufacture crude guns in underground machine shops. They would steal police and military weapons and ammo. And they would peddle these items on every street corner in America! If you were an organized crime boss, wouldn't you love a financial windfall like gun control? Of course! Does this make you wonder who is really behind gun control and who our elected officials are really being influenced by?

Nashville Police Chief Joe Casey and a few other law enforcement political figureheads may oppose the N.R.A. and your right to keep and bear arms, but most of us in law enforcement hope that the N.R.A. gets bigger and tougher each year and we hope and pray that your elected lawmakers can see things your way, so they can keep their jobs come election time! The word VOTE does ring a bell, doesn't it?

You have heard the old saying, "When guns are outlawed, only the outlaws will have guns." That's not true. When guns are outlawed, only outlaws, cops, and politicians (who took your guns) will have guns. Where does that leave you? Pinned down in the crossfire!

Some of us who signed this letter have been shot at in the line of duty. But you (the decent citizen) didn't do it, and we (cops) don't want YOUR guns, any of them, from AK-47's down to .22 pistols, no more than we want your cars, because drunks and reckless drivers kill 35,000 innocent people each year. Not even your high-performance sports cars!

In closing, we urge you to do two things. Join the N.R.A. today. It is the spearhead behind your constitutional right to keep and bear arms. Secondly call or write all of your local, state and national lawmakers and tell them how you feel. Tell them it is better to crowd prisons with criminals than to crowd our streets and neighborhoods with them. And tell them you have got as much right to own guns for self-defense as cops and lawmakers do. Tell them to protect your right to keep and bear arms or you will replace them with someone who will, when election time rolls around. Tell them: "The Cops" sent you!

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I heard discussions this afternoon about the guns we are talking about banning are really guns that are used for hunting. Here is one picture of one called the MAC-10. There is nothing about that gun anybody would use for hunting. That is not a hunting gun.

Here is the MAC-11. This is not a hunting gun. That is the kind of gun criminals use when they are on the streets. Here is another one, the Intratec or the TEC-9. That is not a hunting gun. That is the kind of gun that you use when you are a drug lord or drug dealer and you want to go out and protect yourself and maybe mow down some of your competitors and, worst of all, mow down police officers in this country.

You can give all the arguments you want about the police not being supportive of this amendment, but the fact is they are. You can say some members are not, and there is going to be some convention, they have gone to a convention. This is not new legislation. This is a subject we have been discussing for a long time, the fact is, and the issue is simple: Either you are with the law enforcement groups or you have yielded to the pressure of the NRA. That is how simple it is. It is not complicated at all.

I respect those who are not going to vote for this amendment. But let us face it, we have two divided sides: law enforcement on one side and the NRA on the other side.

I do not doubt some of my western colleagues who have already spoken feel very strongly about this amendment. They talk about capital punishment. Capital punishment has nothing to do with this particular amendment except if you happen to be a police officer, you are the one who is giving of your life, and that is a kind of capital punishment as far as they are concerned.

I say this is a very simple issue. Sure, there will be some old ones that are out there, but we will get rid of those eventually because there is nothing in the bill that would take away the guns that are presently owned. But if you bought a new one and you were caught with it, you would be in violation of the law. I think that is a step in the right direction.

It will not solve the problem completely, but it is the least we can do to try to save the lives of the law enforcement officers of this country.

I reserve the remainder of my time.

Mr. McCLURE. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Idaho has 3 minutes 17 seconds. The Senator from Ohio has 2 minutes 37 seconds.

Mr. McCLURE. I thank the Chair. Mr. President, I yield myself such time as I may consume.

The PRESIDING OFFICER. The Senator is recognized.

Mr. McCLURE. Mr. President, I guess if I were in the position of the Senator from Ohio, I would try to make it that kind of either/or. Either you are for policemen or for the NRA. The fact of the matter is law enforcement officers by and large, and certainly by the tens of thousands across this country, do not agree with the statement that was just made. It is not that kind of an either/or statement.

There are millions of citizens across this country that regard this as a constitutional right switch. Are you going to tamper unnecessarily and needlessly with the rights guaranteed to us by the Constitution of the United States; are you going to give cavalier, back-of-the-hand treatment to something that has been very carefully protected over the years?

Certainly, the Senator from Ohio and others are correct; that right to keep and bear arms is not an unlimited right any more than is the right of free speech. But we are concerned every time there is an infringement upon the right of free speech with that infringement upon a constitutionally guaranteed right.

I submit to my colleagues, we should be no less careful in this instance dealing with second amendment rights than we are with dealing with other rights guaranteed to us under the Constitution.

Mr. President, this is not just the kind of line described by the Senator from Ohio with the good guys wearing badges on one side and the bad guys being NRA members on the other side. NRA members are friends of mine. The organization is a fine organization, in my view.

The Senator from Ohio has a right to have his opinion about the NRA as an organization, and about the individuals who are dues-paying members of that organization. That is not something I share with him in condemnation of those people who feel very strongly about the Constitution and the rights guaranteed in the Constitution.

If you really believe this amendment will help effect law enforcement, then I think you are misled. If you really care about law enforcement, then do enact tough laws with respect to the incidence of crime. Get criminals off the street; get them put in jail; do something about habeas corpus; do something about the exclusionary rule; do something about capital punishment. On those, you will find almost unanimous agreement among law enforcement officers. They are in favor of those steps. They are not in favor of this step.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? If neither side yields time, time will be deducted equally. There are 28 seconds remaining on the side of the Senator from Idaho, and 2 minutes 37 seconds remain for the Senator from Ohio.

The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I have time left. I will not take it all. I just want to conclude my remarks with a quote given by one of the law enforcement officers today at a press conference the law enforcement organizations had indicated their support of my amendment, and for Senator DECONCINI's amendment. I think it sums it all up, and I think it is just eloquently stated. He said: "I am tired of going to my brothers' funerals."

I think that is what this amendment is all about. "I am tired of going to my brothers' funerals," as a law enforcement officer said. That is what this issue is that is before us.

My President, I am prepared to yield back the remainder of my time, if my colleague is.

Mr. MCCLURE. Mr. President, I think I have 28 seconds left. I do not mean to try to get the last word in. I will repeat that back to the Senator from Ohio when we are dealing with getting criminals off the street.

I yield back my time.

Mr. DOLE. Mr. President, I rise to congratulate my colleague from Ohio for offering an amendment which, under the theory that reductions in crime will only occur when we ban all the guns, is a better amendment than the underlying DeConcini amendment.

The Metzenbaum amendment specifically bans more guns outright and gives discretion to unelected bureaucrats to ban the rest of the guns when they feel like it. I assume if any guns remain available after these first two swipes, we would get them under an amendment next year.

But, what do we really get with this amendment? Why should we not ban these assault weapons, this sole reason that we have crime on the streets of America?

First of all, the term assault weapons is traditionally applied to rifles used by the military, like the M-16. The key feature of assault weapons is that they can, by the flip of a lever, be made into either a machinegun—which is correctly called an automatic firearm—or into a rifle which shot one bullet at a time—which is correctly called a semiautomatic when it uses this type of loading mechanism or action.

Under Federal law, true assault weapons are already banned using the definition of "ban" employed by both Senators METZENBAUM and DECONCINI. But, they are not really banned; a law abiding citizen can still obtain and legally possess one. The only difference between these and other firearms is that new ones cannot be manufactured and a Federal permit and background check are required to purchase and possess a true assault weapon.

So, the Metzenbaum amendment merely seeks to change the definition of assault weapon, arbitrarily, by a list which we are told represents the source of evil.

But the list is arbitrary. It creates a category that is neither fish nor fowl. Currently, we treat automatic weapons as one category, and firearms which shoot ony one bullet or shell with each pull of the trigger as a separate category.

The Metzenbaum amendment creates a category of pistols, rifles, and shotguns that have as the only common denominator the distinction of appearing on the Metzenbaum list.

They aren't assault weapons, because they are not automatic weapons—or machineguns—they are Metzenbaum weapons.

The second problem I have with the Metzenbaum amendment is that creates even a further category—the bureaucrat list. The new result would be to change today's law to say there are two types of guns. The first category would be machineguns, Metzenbaum guns, and bureaucrat guns. The second category would be guns which remain to be banned.

Rather than trying to create distinctions where none exist, we should stop those individuals who will abuse the responsibility of gun ownership. First, all felons, illegal aliens, those dishonorably discharged from the military. These individuals are already prohibited from owning firearms, and we have a program which, while being implemented slower than we would like, will be able to immediately identify them through a computer. Just like a credit check which is undertaken when someone uses a credit card, we will have a computer check on everyone buying a firearm.

And this will work, except in one instance. And I would challenge my colleague from Ohio to help find the solution to the remaining category—those who have a mental impairment to the extent that gun ownership should be at least temporarily denied. Proponents of gun bans cite celebrated cases—John Hinkley shooting President Reagan and his Press Secretary, Jim Brady, Patrick Purdy shooting the schoolchildren in Stockton, CA, Joseph Wesbecker shooting fellow employees at a print shop in Louisville, KY, or Lori Dunn who shot schoolchildren and herself in a suburb of Chicago. While they do not mention it, they could add Charles Whitman who killed 15 people while firing from the clock tower on the campus of the University of Texas in August 1967.

The common thread here is not the type of gun, but that they all had some contact with mental health professionals. This is a difficult but real problem. If we had some way to identify these killers, to keep guns—all guns—from them, these tragedies would not have occurred. As I said, the type of gun was not important, all guns have the ability to kill.

We must find some way to keep guns from falling into the wrong hands, and I hope my colleague will join me in finding that true solution to our problem.

Mr. CHAFEE. Mr. President, I have listened carefully to those in favor of assault weapons ban and also to those who adamantly oppose such bans. Many arguments have been made, and debate has been sharp.

The law enforcement community wants an assault weapons ban. They view such a ban as a crime control tool. Right now, they are waging war against criminals who are stocked with firepower worthy of Rambo. Criminals who are better stocked than some small armies, it seems to me. If we are serious about fighting crime, we should help those out there who are doing the fighting for all of us.

Assault weapons represent less than one-half of 1 percent of all privately owned firearms. Yet a comprehensive survey of Bureau of Alcohol, Tobacco and Firearms' gun trace requests shows that assault weapons are 20 percent more likely to be used for crime then any others.

Last year, after studying 50 kinds of weapons, BATF advised the President that all but 7 were not being used for hunting and sporting purposes. The agency looked carefully at the guns, looking for components that point to military—not hunting or sporting—use. Examples of these components are large-capacity ammunition magazine, a folding stock, silencers, bayonets, barrel shrouds. Hunters and target shooters don't need these things. Military fighters do. And drug dealers do. Based on this knowledge, the President banned the importation of 43 types of assault rifles, and he deserves great credit for doing so.

An import ban, however, cannot stop domestic manufacture of assault weapons. And that means criminals—anyone—can still get these military-style guns. In fact, such weapons can be easier to obtain than a marriage license or library card. These are the same guns that can pierce concrete.

That availability is frightening. We have seen terrible massacres—Stockton, in Louisville—in the past couple of years by persons wielding assault weapons. Those senseless deaths filled Americans with horror and revulsion and a sense of loss; and every poll I've seen shows overwhelming public support for limiting the availability of these guns.

No one is trying to wrest hunting guns from law-abiding citizens. We are trying to keep military weapons away from criminals. Assault weapons like the AK-47 are designed for one thing only: to kill human beings. The Fraternal Order of Police, the National Association of Police Organizations, and the International Brotherhood of Police Officers are asking our help to get these military weapons off of our streets.

I believe this amendment will be a major step foward in achieving that goal.

The PRESIDING OFFICER. The Senator from Ohio has yielded back his time. All time is expired.

Under the previous order, the question occurs on agreeing to the motion to table the amendment of the Senator from Ohio [Mr. METZENBAUM].

Mr. McCLURE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Idaho [Mr. SYMMS] is absent on official business.

I further announce that, if present and voting, the Senator from Idaho [Mr. SYMMS] would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 82, nays 17, as follows:

[Rollcall Vote No. 102 Leg.]

YEAS—82

NOT VOTING—1

Symms

So the motion to lay on the table amendment No. 1676 was agreed to.

Mr. HATCH. I move to reconsider the vote.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Utah [Mr. HATCH] is recognized to offer an amendment.

AMENDMENT NO. 1681

(Purpose: To strike the gun provisions)

Mr. HATCH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Utah [Mr. HATCH] proposes an amendment numbered 1681.

Strike on page 46, line 15, through page 53, line 5.

The PRESIDING OFFICER. Under the previous order, there will be 3 hours of debate on the Hatch amendment, equally divided and controlled in the usual form. The Senator from Utah is recognized.

Mr. HATCH. Mr. President, this amendment that I have just sent to the desk will strike all of the Antidrug, Assault Weapons Limitation Act, found in title IV of S. 1970.

As I have said before, the only real assault these so-called assault weapons provisions make is on the legitimate rights of law-abiding citizens.

As I mentioned during our earlier debate, the Bureau of Alcohol, Tobacco, and Firearms has no definition of assault weapons. The military definition—a selective fire weapon capable of firing in either an automatic or semiautomatic mode—is inapplicable to the commercial arena. Indeed, with the enactment of the Firearm Owners Protection Act a few years ago, the private purchase of new fully automatic machineguns is banned, and the possession of existing automatic machineguns is highly restricted, requiring an extensive background check and permission from both local law enforcement and the Federal Government before such a firearm can be transferred to a new owner.

The proponents of this particular bill, and similar restrictive legislation, have sought a workable definition of assault weapons, other than simply listing guns by brand name and model, but they have been unable to produce one.

The lack of a definition for assault weapons has been a major stumbling block to gun control advocates from the outset of the consideration of this legislation. The firearms listed in this bill employ a semiautomatic firing action. They are not, and I repeat not, fully automatic, neither are they readily or easily convertible to fully automatic. In fact, the semiautomatic firing action employed in these firearms is the same as the action found in every popular semiautomatic hunting rifle in existence today. As I mentioned earlier, the technology behind the semiautomatic firing action has been employed for well over 100 years.

We have overwhelmingly voted down an amendment to ban some semiautomatic firearms. We should support

that vote and vote to strike the ban on the rest of these particular weapons.

The committee report on S. 747, which is virtually identical to this legislation, states that the purpose of this bill "is to reduce the number of deaths and injuries attributable to assault-type semiautomatic firearms abuse by drug traffickers and violent criminals." The assumption by proponents of these bills is that drug traffickers and violent criminals rely on such firearms being available in the commercial arena. While this bill, if enacted into law, would reduce the number of these firearms available to law-abiding citizens, it will not restrict access to them by drug traffickers and violent criminals.

As the committee learned during hearings on the assault weapon issue, most firearms used during the commission of crimes are obtained through illegal means. It, therefore, seems highly likely that a drug trafficker who is able to smuggle large amounts of illegal drugs into the country will have little difficulty in obtaining these weapons by illegal means. I do not believe, based on testimony received by the committee, that the bill will affect the overall incidence of death and injury resulting from crime. If denied a particular type of weapon, a violent criminal will simply find another weapon to carry out his or her goal.

It has been argued time and time again, if Congress truly wants to reduce death and injury caused by violent crime and not merely shift the focus from one weapon to another, then the proper scope of any legislation should be directed at the criminals themselves. As long as the criminal justice system allows violent criminals to commit crimes with little or no threat of apprehension or serious punishment, it will not matter how many guns or weapons we actually ban. Criminals will continue to find weapons to use in their heinous activity, and law abiding citizens will experience an infringement of their constitutionally protected rights.

I believe that the most effective approach toward reducing death and injury due to violent crime must involve major adjustments to the criminal justice system. The Federal death penalty must be reinstated and enforced.

Both the exclusionary rule and habeas corpus proceedings must be reformed. Federal and State prison facilities must be expanded, and sentences requiring internment in those facilities must be carried out to their full term. We need additional law enforcement agents, prosecutors, and judges. In short, we need to reinforce deterrence in the criminal justice system by instituting certain firm and sure enforcement of our criminal laws. Some of these steps have been taken in the appropriations bills and the drug legislation that we worked on last year, but there is still much more that we can do.

I spent a great deal of time, during the earlier debate on the Metzenbaum amendment, discussing the form 4473 requirement under this bill. These requirements are only going to burden law-abiding citizens. It is burdensome; it is unfair. And I refer those interested to my prior comments concerning form 4473.

In summary, the second amendment is, I think, a valuable amendment, that provides each citizen of this country the right to keep and bear arms in order to help in the preservation of our freedom.

By banning the firearms listed in this legislation, Congress would seriously undermine that constitutionally protected right. Moreover, this bill will not keep the listed weapons out of criminals' hands, and, even if it did so, those criminals will be able to obtain other weapons to commit their crimes. While the ban on the listed firearms may serve the purpose of appearing to respond to the incidence of violent crime, in my view, such a ban constitutes only a form of gun control, not crime control.

Indeed, if the legislation's proponents had confidence in gun control as an effective means of crime control, then why do they sunset the underlying legislation after 3 years?

My friend from Arizona indicated on the MacNeil show earlier this evening they do not know how it is going to work, and therefore they have that sunset provision in, and that is reasonable. That will protect the public from abuse. That means 3 years of what we consider to be abuse and abusive practices. We have seen it happen in the past. That was the whole reason for the Firearm Owners Protection Act. It was on this floor a number of years ago, and I led the fight for it on this side. That bill stripped a lot of the laws from their abusive, bureaucratic, overly regulated approaches to the decent, honest, law-abiding sports people in this country.

I think, why do this? Why not go after the criminals? Why not do what we all know has to be done? Why abuse the decent, law-abiding, supporting people? this language does not belong in this crime bill.

I urge my colleagues to support this amendment to strike this language. I think it is important that we ban this language, and I think it is important that we do it straight up and that we make it clear that we are not going to tolerate the further abuse of decent, law-abiding, honest sports people. I think it is easy to get emotional over some injustices that occur in our society and some of the things that happen.

There is no use in kidding ourselves. None of us want anyone to suffer from the use of firearms. As a general rule, those who use firearms illegally do so because of the failure of our justice system, not because we need legislation like this that would actually make it more difficult for the decent, law-abiding, honest-sporting people of this country.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator reserves the remainder of his time.

Who yields time?

The Senator from Arizona [Mr. DECONCINI].

Mr. DECONCINI. Mr. President, I rise in opposition to the motion to strike title IV of S. 1970.

The people of this Nation have spoken, and they have spoken loud and clear. In an age of increasing violence, it is important to note that in recent polls the American public has overwhelmingly supported Federal legislation banning the manufacture, sale, and possession of semiautomatic assault weapons. A Gallup poll conducted nationwide between February 28 and March 2 of last year found 72 percent of the American public in favor of such legislation. That is more than 7 out of every 10 people polled. When broken down between gun owners and nongun owners, 68 percent of the gun owners favored such legislation compared to 76 percent for nongun owners. The Gallup poll has since been confirmed in separate polls conducted by NBC, the Wall Street Journal, and CBS News.

A Yankelovich-Clancy-Shulman poll conducted for Time and CNN in February 1989 found that 84 percent of the American public thinks that violence from the use of guns is becoming a bigger problem in this country. In my home State of Arizona, where guns have long been a part of everyday life, 69 percent of the people polled believe that semiautomatic weapons should be banned. In the great State of Utah, a poll published in the Salt Lake Tribune showed that 74 percent of Utahns agreed with President Bush's ban on import of assault weapons. By a 2-to-1 margin, the people of Utah supported the Antidrug Assault Weapon Limitation Act which is in a provision in this bill also known as S. 747.

Mr. President, in recent months we have taken tremendous strides in the war on drugs. Yet the problems of drug use, drug-related crime, and drug-related violence continue to escalate.

The drug war has taken an enormous toll on families, on children, on jobs, on safety in our society, in our communities and neighborhoods, and on the very well-being of this entire country. As the Nation faces this enemy from within, all available resources must be brought to bear on the war on drugs.

I applaud President Bush and my distinguished colleagues for their solid commitment to taking the steps necessary to end the scourage of drugs in this country.

But I remain concerned, concerned for the safety of law enforcement officers who increasingly find themselves facing drug dealers armed with sophisticated equipment and heavy firepower.

In my own State of Arizona, law enforcement officials along the Mexican border wage a constant battle against smugglers who arm themselves with military-style weapons and other high-technology hardware firepower.

In our cities, gangs fight turf wars, armed with assault weapons, often killing or severely wounding innocent bystanders because of capability of spray firepower. Police officers and law enforcement groups from all parts of the country report that assault weapons are rapidly becoming the weapons of choice for drug dealers. We in Congress must not stand idly by while our police and the people of this Nation are subjected to the violent ravages of drug-related crime.

Our law enforcement officers are literally fed up with this situation. That is what was said today at a press conference. Indeed, every major law enforcement organization in America supports this legislation, including the Fraternal Order of Police, the International Brotherhood of Police Officers, the National Sheriff's Association, the National Association of Police Organizations, the Police Executive Research Forum, the Major Cities Chiefs, the National Organization of Black Law Enforcement Executives, and the Police Management Association. These groups want congressional action to avert another tragedy from occurring.

Over here to my left, Mr. President, is a detailed list of all the organizations that endorsed this particular section of the bill that is before us. They oppose the motion to strike offered by the distinguished Senator from Utah.

Mr. President, these assault weapons that I am describing are not simply handguns, hunting rifles, or sporting rifles. I am describing civilian versions of military firearms, often equipped with combat hardware, and designed for one purpose and one purpose only—pure, cold, killing efficiency.

Consider, for example, the AK-47, an assault rifle designed in Russia and currently manufactured in China and other countries. The AK-47, even in its semiautomatic civilian form, can fire up to 80 rounds of ammunition in 1 minute. One minute. The AK-47 is equipped with a flash suppressor, allowing the shooter to remain hidden at night. It will take a high-capacity magazine, allowing the shooter to fire multiple rounds without reloading. It has a pistol grip so that it can be spray-fired from the hip, and has a folding stock so that it can be easily concealed. Finally, the AK-47 has a barrel mount designed to accommodate a bayonet, which serves no sporting purpose.

That is the picture of the gun that is commonly used.

This is supposed to be a sporting rifle with a bayonet, with a muzzle suppressor so you cannot see where the shot is coming from. Tell me that that is used for hunting and I will eat the stock of it.

Speaking of the stock, it collapses, so you can fire it from the hip. These are literally not sporting guns in anybody's imagination and it is hard to believe we would see the resistance of the organizations to oppose the banning of these weapons and making it illegal to possess them.

Consider also the TEC-9, manufactured in Florida and traced to one in five crimes involving an assault weapon in the United States. The manufacturer calls this gun "as tough as your toughest customer." Among other things, the TEC-9 has a threaded barrel designed to accommodate a silencer, and is equipped with a 36-round magazine. It also has a barrel shroud which cools the barrel during rapid firing and allows the shooter to grasp the barrel during rapid fire without incurring serious burns. Gang members love this gun because in their drive-by shootings from their automobiles and assaults on other people, they do not have to aim; they just spray. Tell me that that is a gun you are going to shoot wild turkeys or deer with, and you obviously cannot sustain that. With the multiple shots they have a greater chance, the organized crime and drug dealers have, of hitting someone because they can spray that firepower.

An example is officer Dan Pratt of the Los Angeles Police Department who was killed in a drive-by shooting. Fifteen shots were fired at him but only one hit him. That was enough to kill him, and he was armed with a revolver.

Mr. President, these assault weapons were never intended for hunting or sporting purposes. Silencers, barrel shrouds, pistol grips, bayonets, folding stocks—these are the trademarks of assassins, not sportsmen. And, I am sorry to say, they are rapidly becoming the favored tools of the drug lords and violent criminals. These weapons were designed solely to conduct modern warfare; that is exactly what drug dealers are using them for in their war against police.

Let me support that statement with some specific examples.

On August 23, 1989, a New Jersey State trooper was shot four times in the chest and abdomen by three drug dealers armed with a MAC-11 assault weapon after the trooper pulled them over for a routine traffic stop.

I will put the MAC-11 picture up there so we can get a quick picture of what the MAC-11 looks like. That is the typical type of weapon that the drug dealers are using today to combat law enforcement. I am sorry to say the law enforcement in Arizona and most agencies do not have that kind of weapon yet to respond.

On June 15, 1989, Arizona Department of Public Safety officers raided a Tucson, AZ, home, seizing five AK-47's, an assault shotgun, ammunition, $3,000 in cash and an ounce of cocaine.

On March 23, in Colorado, a gunman armed with a MAC-11 assault pistol kidnaped a woman, killed her and her mother, raped another woman, and wounded several other people. And the stories go on and on. In my own State, a Navajo County deputy sheriff made a routine traffic stop. Before he was able to exit his automobile the passenger of the stopped vehicle got out with an Uzi-type weapon and sprayed the deputy's windshield with 24 rounds. Three of these rounds hit the deputy and he died 3 days later.

The stories go on. These are stories that police officers will tell you if you just ask them to come in and talk to you. There just is no end to it.

Let me give a couple of examples, if there is any doubt whatsoever.

Pima County, where I live, near Tucson, AZ, extends to the border. I was Pima County attorney for 4 years before I came to the Senate, and I personally know many of the Pima County law enforcement officers; I worked with them then. Many of them are still around. These officers are facing a growing arsenal of weaponry. They are literally scared to go out on the border because they are going to end up with this type of weapon being shot at them and they do not have the responding firepower. They do not have it yet.

Recently Clarence Dupnick, the sheriff of Pima County, reported that in a 6-week period 30 search warrants were served by his SWAT team and AK-47's were confiscated under each warrant. Each one.

This is out of 30 warrants that were issued by this sheriff alone. An AK-47 was in every one of those arrests.

Last October a Tucson police officer tried to stop a car for speeding and found himself in a chase. As he began to close in on the speeding car he saw the barrel of the semiautomatic rifle coming out of the car window. The officer reported that gunmen "blew out the back window, and he started shooting, maybe 50 rounds or so. You could see that muzzle flashing." The car hit a curb and crashed into a median. Both gunmen fled, one carrying an AK-47 and the other carrying an AR-15. As the officer would later describe the shootout, "It was luck

that I could be here today to talk about it."

Mr. President, our law enforcement officers should not have to rely on luck. They should not have to rely on going into their combat with that kind of weapon against them.

There are those who contend these types of firearms serve no legitimate use. Frankly, I am not convinced that they do serve a legitimate use. When one considers the awesome destructive power of these weapons, there increasing use by drug dealers, and the threat they pose to law enforcement officers and civilians alike, it becomes painfully clear the Congress must act to do something to curb this carnage that is happening to our law enforcement.

Proliferation of these assault weapons has had an incredible impact upon our law enforcement. The cop on the beat is heavily outgunned.

Dewey Stokes, who is the president of the Fraternal Order of Police, the largest police organization in the United States, says increasingly this battle finds the cop on the beat heavily outgunned. The superior firepower now possessed by the criminal elements in many of this Nation's cities has already taken an enormous toll of our police officers.

These are the words from the men and the women who have to face this situation every day. They are the ones who have to fight the drug war for America.

The assault weapon rage has indeed caused our law enforcement officials to make some adjustments. The FBI is a perfect example of how the proliferation of assault weapons has changed the terms of the war that they have to conduct.

FBI Director William Sessions commented at a recent hearing that the assault weapon problem has caused the FBI to initiate a search for a new standard issue firearm, a firearm which, as he puts it, would restore the advantage in firepower and reliability to the agent over the armed criminal.

Mr. President, I have always been and will continue to be a strong supporter of the constitutional right to bear arms. My voting record is very clear in this body and on the Judiciary Committee. The NRA has been kind enough to single me out as the legislator of the month for my participation in preserving what they consider to be the second amendment rights of the Constitution, and I am pleased to have that award, or that compliment.

Because of my commitment to the second amendment and my opposition to legislation which infringes on this constitutional right, I have had the full support of the NRA over the 13 or 14 years that I have been in the Senate.

When I ran for reelection in 1988, I was strongly endorsed by the NRA and other organizations like that. I say now as I have said all along: The bill that we have here, this particular bill before us, and the motion to strike it—that motion is to strike not an antigun bill but an antidrug bill. I am sorry to say the NRA has refused to face reality, the reality of what the assault weapon is doing to the officers on the street.

When I first started looking at this issue I asked the NRA to help out, see if they would help draft some legislation that would deal with this problem and assist the law enforcement community and grant them some kind of protection based on getting rid of some of these weapons. I unfortunately could not get them to move on it because of their beliefs, and they have every right to those.

It is time for us to do something. This is an antidrug bill that, to me, is overdue. I approach this very cautiously because I do not want a bureaucracy or the Federal Government telling me what weapon I can own or use. This does not do that.

By using the tactic the NRA has used, it is succeeding in alienating, in my judgment, its closest friend in the fight the NRA likes to place itself in—that is against the criminal element. The NRA has refused to participate in a constructive manner except to say let us have more enforcement, and we will get into that later.

The NRA support is clearly not a litmus test, in my judgment. I think every Member here has to stand on his own and not be worried about what the repercussions are. If my colleagues are looking for the political side of it, the polls strongly support this particular part of the bill, and the entire bill for that matter.

I am not the only politician in Arizona, I might say—as conservative as my State is—who is speaking out on the assault weapon issue. Former Senator Barry Goldwater, who has been a member of the NRA for years and who is seldom, if ever, accused of harboring a liberal thought, was quoted in the Washington Post last year regarding semiautomatic weapons. Let me read to my colleagues what our former colleague said:

> I'm completely opposed to selling automatic rifles. I don't see any reason why they ever made semiautomatics. I've been a member of the NRA; I collect, make and shoot guns. I've never used an automatic or semiautomatic for hunting. There's no need to. They have no place in anybody's arsenal. If any SOB can't get a deer with one shot, then he ought to quit shooting.

I take a little bit more conservative approach than my former colleague, Senator Goldwater, and I suggest there are legitimate reasons to own semiautomatic firearms. I also believe it is acceptable to hunt deer, even if it takes two shots.

The point I am making is that the assault weapon proliferation and the change it has caused in the streets of America should make us all rethink our positions on the semiautomatic assault weapon issue. It is not only law enforcement, however, who is concerned about the destruction and death caused by assault weapons. This bill is also supported by the American Medical Association, the American Public Health Association, and many, many others.

Recently we have observed a disturbing trend. It was quoted at a hearing on this bill. A surgeon from a Chicago hospital testified, and she said:

> Recently we have a very disturbing trend. Victims are now coming in with multiple bullet wonds through many different parts of their bodies; in shock, barely alive; many times it is difficult to decide which organ system to address first.
>
> It is not atypical to have several such victims come in, especially on a Friday or Saturday night, and require immediate life-saving operations.

(Mr. DIXON assumed the chair.)

Mr. DECONCINI. Mr. President, I have been in contact with law enforcement groups across the country, as well as the Bureau of Alcohol, Tobacco, and Firearms. The statistics are frightening, Mr. President. According to the BATF, there has been a tremendous surge in requests to import semiautomatic assault weapons.

For example, in 1986, the BATF approved the import of 4,000 AK-47 assault rifles. By 1988, that figure had increased tenfold to 44,000. And in 1989, the BATF received requests to import over 113,000 AK-47 assault rifles.

The National Drug Policy Coordinator, William Bennett, cited these figures last year when he announced the administration decision to ban the importation of certain semiautomatic assault rifles. The NRA and others oppose this. They said, "You are going to destroy and take away our constitutional right."

Nobody has lost any constitutional right by the banning of those guns. I submit the administration has made a good start, but it has not gone far enough. Not only are imports of assault weapons that are not banned on the rise, but domestic manufacture is also increasing to make up the particular problem.

A TEC-9, one of the most popular assault guns in the country and traced to one out of every five crimes involving an assault weapon, is being produced at the rate of 3,000 per month. This is double the number being manufactured last year at the same time.

Not only has the actual number of these weapons increased at an alarming rate, but there has been a dramatic increase in their use in the commission of crime. According to the BATF, the number of assault weapons linked to crime has doubled over the last 3 years. It is also the general consensus of law enforcement officials that the

ever-increasing presence of assault weapons in the illicit drug trade and other types of crimes places the safety and every life in America in danger.

A 1989 study by the Washington Bureau of Atlantic Journal Constitution provided a case in point. The study tabulated trace request forms filed with the Bureau of Alcohol, Tobacco, and Firearms. According to the study, assault weapons constituted approximately one-half of 1 percent of the over 200 million privately owned firearms in the United States. However, these weapons were used in 1 of every 10 crimes resulting in firearm traces last year.

The bottom line is that an assault weapon is 20 times more likely to be used in the commission of a crime than a conventional firearm—20 times more. In response to the concerns voiced by the law enforcement groups and BATF, I introduced the Antidrug Assault Weapon Limitation Act, known as S. 747.

This bill is concise. It is a direct attack on the spread of assault weapons and their use in the commission of violent and drug-related crimes. The bill is tightly focused on nine specific types of assault weapons that have emerged as the firearm of choice of violent criminals.

By focusing on these nine specific types, I have attempted to avoid general categories which might inadvertently include legitimate hunting and sporting firearms.

The bill is very straightforward. It will prohibit future imports of five imported types of firearms and make that the law, not subject to the President's change by Executive order or the Treasury, and the future manufacture of four domestic semiautomatic weapons. It will not prohibit legal ownership of the listed firearms, provided they are legally owned at the time the bill is enacted.

In addition to barring future imports or manufacture of the specified firearm, the bill imposes tough penalties for the use of an assault weapon in the commission of a violent or drug-trafficking crime. Specifically, any person using or carrying an assault weapon in the commission of one of these crimes will face imprisonment of up to 10 years in addition to the punishment provided for the commission of the actual crime.

The bill also imposes new penalties for the theft of firearms and the smuggling of firearms while engaged in drug trafficking or violent crime. The bill also provides a mandatory revocation of a supervised release if the defendant is found in possession of a firearm and the court has provided as a condition of release that the defendant refrain from possessing any firearm.

This bill also contains two additional provisions that should have the support of all of us who are not only concerned about our second amendment rights, but also about doing something to stop the maiming and killing of our citizens—our children and our police officers—with these drug guns.

It calls for an 18-month study by the Attorney General to determine the effect of the provisions of the act on violent and drug trafficking crimes. The bill also has a sunset provision that ends the prohibition on these assault weapons after 3 years. This should provide us with sufficient time to see whether or not this works.

I do not stand here, Mr. President, and make representations that this is the answer to the war on drugs. What I say is let us try something that is not going to infringe on anybody's constitutional rights if they already own the gun. It is only going to go after those drug dealers that would have one of these guns and not properly get the form.

I do not believe this is a panacea, and I do not support more restrictive versions because I think it is worth trying this to see how it works.

We have to attack the drug war, in my judgment, on all fronts. But I will not stand up here and claim that this bill is the complete solution, because it very well may not be and probably is not. But in 18 months, we are going to have a comprehensive study of all crimes in the country in which firearms were involved, and we will see whether the banning of this saved some lives and actually had some good benefits to our law enforcement.

In our war against drugs, we have asked for all groups and sectors of America to join us and to make some sacrifice. I am requesting the gun manufacturers to join us. I hope they will take this bill, if it is passed with this provision in it, as a message that we can no longer tolerate our law enforcement officers being out-gunned by drug traffickers with assault weapons manufactured right here in the United States.

I believe this bill represents a reasonable approach to the issue that we are talking about here; and that is, semiautomatic assault weapons and the constitutional right to bear arms, and to do something about the war on drugs.

The second amendment cannot be said to sanction destructive violence by drug dealers and violent criminals. Daryl Gates, chief of police of Los Angeles, probably described how assault weapons should be treated under our second amendment about as well as anybody I know when he said the following:

> A reasonable right to bear arms does not mandate that weapons designed and built for the express purpose of killing human beings on battlefields be made available to the general public.

That is the chief of police of the city of Los Angeles, a conservative law enforcement official.

I am willing to try this measure. I think it is worth the effort, and I hope my colleagues will look at it from the standpoint of an attack on the war on drugs.

In order to stem the flow of drugs and arms into the country, a Federal law, in my judgment, is required. State laws banning assault weapons are simply ineffective if the weapons can be easily purchased in a neighboring State. I strongly urge everyone to look at this from a different perspective and not from the perspective of the fear and intimidation of what the voters are going to say, because the voters are going to support this.

Mr. President, I believe strongly in our second amendment right to bear arms, but I also believe that the right of our citizens to life is the most precious right we have. So I urge the defeat of the amendment offered by the Senator from Utah.

I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I think it needs to be pointed out to all of our colleagues that five out of the nine guns the distinguished Senator from Arizona is talking about are already banned by the President of the United States. Manufactured offshore, he has banned them from this country. There is no reason to have them in this bill. The other four are domestically manufactured.

Frankly, the letters and the comments that I get from my fellow Utahans, and I think from people all over this country, basically consist of this: we do not want the Federal Government telling us honest, law-abiding people that we cannot own some of these guns as collectors. That is the way a lot of them own them. A lot of them buy them because they collect guns, they love guns, and they want to have them in their arsenals or in their museums or in their gun cabinets or whatever.

Second, a lot of them like to plink with them and like to go out and target shoot with them. These guns are basically good guns. They can shoot with them. And they have lots of fun doing it, and they do it in a law-abiding decent, honorable way.

Third, these guns are not generally used for hunting, so that is a red herring. Frankly, I do not know of any of these pistol-type guns that are used for hunting. They are used for collections; they are used for plinking; they are used for target practice; they are used for sporting purposes and gunnery range purposes.

Fourth, why take these rights of ownership away from our honest, law-abiding citizens? That is not going to

stop the criminals from getting them. If it did, maybe that would be a good argument, but it does not. I might add that the criminals are going to use those guns whether or not they are sold in this country. They are going to be illegally used. That is always the case.

The way to solve this problem is through tougher criminal enforcement procedures. That is the way to solve this problem.

My distinguished colleague from Arizona referred to a Utah poll regarding this bill. I am not sure how the questions in that poll were phrased, but poll questions are poll questions. You can make them come out almost any way you want. But I do know that my constituent mail from Utah is overwhelmingly against what he wants to do and opposed to this bill.

Furthermore, during a recent series of meetings that I conducted in my home State, I found that most of my constituents are against this. Now, true, there are always some who are for this type of legislation. But our experience in the past is, if you pass legislation like this, it is not going to hurt the criminals; it is not going to stop criminal use of weapons; it is going to hurt decent, honest, law-abiding sports people. Regardless of what the distinguished Senator from Arizona says as to the narrow scope of this particular part of this bill, it is still an infringement on the second amendment rights of American citizens to keep and bear arms.

The only citizens who are going to be affected by the type of language which the distinguished Senator from Arizona is advocating are those who comply with the law. They are the only ones who are going to be affected, because criminals will not be prohibited from getting the listed firearms, and they for sure are not going to comply with the requirements of Form 4473 in this bill. They are not going to that. Only law-abiding American citizens do that, and, if they do do it and they make a mistake, they will find themselves hauled into Federal court with all of onus of that, with the need to attorneys, and all of the might of the honorable Federal Government arrayed against them, and they will find themselves being fined for $1,000 and maybe even sentenced to 6 months in jail. That is the way they have done it in the past.

That is one reason the distinguished Senator from Idaho and myself and others worked so hard to get the Firearm Owners Protection Act, commonly known as the McClure-Volkmer bill, named after my friend from Idaho, because we were sick and tired of this kind of legislation that abuses the decent, honorable sports people of this country. That is what happens.

The way to reduce violent crime in the streets is to put the criminals in jail. We need to enforce firearm statutes that are already in place, and we are not doing that. So why abuse, through the type of legislation, decent, honorable, law-abiding citizens when five of these are already banned by the President and the other four are domestically manufactured? I have to say many people love to have these because they collect them. It is a legitimate thing for them to do. Many of them love to have them because they love to shoot them in target practice. I do not know if anybody hunts with them; maybe there are some. But that is their right. We can make all the ridiculing remarks we want. We are talking about sports people in this country. They are not criminals. This type of legislation implies that some of them might be.

We have to fight that, and I hope our colleagues on both sides will listen to this important debate. It is a question not to criminal activity on the part of honest people; it is a question of whether or not we are going to continue to pour it on the honest people while ignoring the criminals who are never going to comply with this legislation anyway.

I yield 15 minutes to the distinguished Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 15 minutes.

Mr. GRASSLEY. Mr. President, I supported the motion to table the amendment by the Senator from Ohio [Mr. METZENBAUM].

I also support the motion to strike the gun control provisions in the crime bill, that have been authored by the Senator from Arizona [Mr. DECONCINI].

I opposed similar provisions in the Judiciary Committee, of which I am a member.

Aristotle once observed that law is reason free from passion.

The senseless deaths of innocent individuals make it easy for us to be inclined to create laws as a reaction to our anger and grief—to legislate by passion instead of reason.

However, we can only serve the best interests of all Americans if we set aside our anger and employ our wisdom.

There are 60 to 65 million firearms owners in the United States. There are around 200 million firearms in existence.

Of the approximately 200 million firearms, less than two-tenths of 1 percent are misused.

Or, as a constituent of mine from Spencer, IA, noted: 99.8 percent of the firearms in our country today are used properly.

I believe that the second amendment is the "forgotten civil right," and is every bit as important as any right guaranteed by any other amendment in the bill of rights.

Many Americans, including many Iowans, desire firearms for legitimate uses such as personal protection or for sporting purposes.

I find it very curious that some—who advocate an ever expanding and broad interpretation of the various individual rights enumerated in our constitution—are often quite willing—indeed, some can't wait—to constrict, narrow, or limit the right to keep and bear arms enumerated in the second amendment.

I believe that our deliberations should reflect efforts to protect that right—as we have sworn to protect any other portion of the constitution—rather than infringe upon it.

On March 29, 1989, Paul Craig Roberts, a nationally syndicated columnist, observed that "our leaders invariably blame crime on inanimate objects, such as guns, or law abiding citizens, otherwise known as 'society'. The criminal himself is seen as a victim of society."

Legislation that bans guns deflects the responsibility of both the criminal and the legal system, to those who sell or import guns. These individuals become the scapegoat.

Firearms should be controlled only if there is sufficient evidence that firearms currently held legally by individual, law-abiding citizens pose a serious threat to the general safety and welfare of the public.

An article in the San Diego Union earlier this year found that so-called assault weapons comprise less than 1 percent of the 4,800 firearms that the San Diego Police Department confiscated last year.

Further, in the District of Columbia—which has been labeled the "murder capital" and the "drug war zone" of America—police rarely encounter an assault weapon, according to a Washington Post article of March 6, 1989.

I maintain that it is not enough to dislike the personal ownership of classes of firearms—nor is it enough to believe that people should not own firearms. Troublesome social issues are not solved by compounding the problem with ill-conceived legislation.

First, there is a lack of hard evidence in the form of statistics that proves exactly where firearms fall within the spectrum of weapons used in crimes of violence.

Nearly all of the pronouncements regarding the danger posed by semiautomatic firearms is based upon anecdotal information.

The Uniform Crime Report for 1987 indicates that rifles—including so-called assault rifles—are used in only 4 percent of homicides committed in the United States.

There is no evidence to support the well-worn phrase that "there is a full-scale war in our city street that is

being fueled by these assault weapons".

Second, attempts to attach a definition to assault weapons are flawed.

The measures we are presently considering would encompass at a minimum 3.4 to 4 million firearms, plus millions more if the language: "identical or nearly identical to an assault weapon," is vigorously enforced.

Without an adequate means of identifying what attributes constitute an assault weapon, the supporters of banning these firearms are reduced to relying on a list of banned firearms, based on a manufacturer's name or by terminology that refers to a firearm's model type.

This is a sure prescription for an administrative nightmare.

And, since there are at least 3.5 to 4 million semiautomatic assault rifles—that look like their military counterparts in private hands—that would fall under the explicit terms of the proposed legislation, the documentation and tracking of such weapons would be a major administrative undertaking, to say the least.

Third, the perception of fairness in the law is a keystone for public support of the social contract between the Government and the governed.

The legitimate owners of firearms in our country are increasingly concerned with the debate over firearms that seems to be going on without the facts.

Many of these law-abiding citizens believe that a constitutionally guaranteed right—the second amendment's right to keep and bear arms—is being treated as a less important right than others guaranteed in the Constitution.

These folks agree that there is a crisis in the country regarding firearms, but the crisis involves the abuse of firearms by criminals—not by law-abiding citizens.

I share these very real concerns of these law-abiding American citizens.

I believe that one common thread that unites many of the crimes committed in America today is: Not the type of weapon used, but the person who commits the crime.

The source of interpersonal violence in our society is not the weapons used, but the lack of respect for our fellow human beings, and an absence of concern about the consequences of our actions.

In fact, statistics show that the recidivism rate of those incarcerated in many States is between 60 to 80 percent.

Such evidence suggests to me that gun control does not translate into crime control.

A gentleman from Des Moines wrote me to express his view—one that I agree with—that the blame for crimes should be placed on the individual pulling the trigger, and not on the particular object he or she chooses to use during the commission of the crime.

I cannot agree that gun control legislation protects the residents of our inner cities or rural America.

Therefore, efforts that concentrate on punishing the actions of individuals—rather than outlawing the possession of individual firearms—would seem to me to be more effective and appropriate.

We need to put our criminals behind bars and keep them there. We cannot allow individuals who commit crimes that involve the use of a firearm to negotiate their sentences with prosecutors.

In the meantime—regarding the measures before us—many have tried, but no one has been able to find a mechanical difference that distinguihses a so-called semiautomatic assault weapon, from a semiautomatic hunting rifle. No one has even been able to give a practical definition to the term "assault weapon."

Yet, some are willing to establish a precedent that will group all of these firearms together and classify them as illegal assault weapons.

By attempting to address a problem with the wrong solution, we may be creating another situation that is even more deadly.

A high school teacher from Cresco, IA, called me to express his concerns about the proposed legislation that would ban some semiautomatic firearms. He contends that many of his high school students enjoy hunting. He is afraid that if their firearms are outlawed, out of boredom, they could turn to drugs.

Now certainly, boredom from a lack of something to do is absolutely no excuse to turn to using drugs, or committing any kind of crime for that matter. I am absolutely adamant in condemning such behavior.

However, I do not consider a high school teacher to be an irresponsible member of the community.

I think he is only trying to relay his realistic assessment of the potential results of such a gun-ban law.

I believe that his opinion should be given great consideration. I believe that we should be very cautious about the potential consequences of our actions regarding this issue.

In conclusion, freedom from fear is one of the traditional four freedoms.

The President has called for a partnership among the Federal Government and the cities and States to take back the streets by taking criminals off the streets.

The law-abiding citizens of America must not only be safe, they must feel safe.

The right to keep and own firearms is no license to harm others; therefore, the individual must be held accountable for any harm caused to others, with no excuses—not the instrument used to cause harm.

Once again, I urge my colleagues to support the real, anticrime provisions contained in the Thurmond substitute and to oppose the anticrime firearms provisions of S. 1970.

Mr. President, I yield the floor.

The PRESIDING OFFICER. I inform the managers on both sides that the distinguished manager on behalf of the committee has 61 minutes, 12 seconds, the distinguished manager on behalf of those advocating the motion to strike has 61 minutes and 8 seconds, 4 seconds difference. Who yields time?

Mr. McCLURE. Mr. President, I yield to the Senator 15 minutes.

The PRESIDING OFFICER. The Senator from Idaho yields 15 minutes to the Senator from Alabama.

The Senator from Alabama.

Mr. HEFLIN. Mr. President, I rise in support of a motion to strike title IV of S. 1970. I believe that this provision, which prohibits law-abiding citizens from purchasing certain semiautomatic firearms and regulates the ownership of those firearms already owned by citizens, is a violation of the second amendment in the Bill of Rights.

First and foremost in my determination to support the sriking of title IV is my concern for those Americans residing in rural areas. In most cases, it is highly unlikely that these citizens have ready-access to police protection. In these situations, a firearm could be their only means of security. At least that is their perception and belief.

While the second amendment has been controversial in recent times, it was certainly clearer to the framers of the Constitution. I would ask my colleagues to read the December 1989 issue of the Yale Law Journal, specifically an article by Prof. Sanford Levinson entitled "The Embarrassing Second Amendment." While I do not agree with everything Professor Levinson writes, his thoughts that firearms are protected by the Constitution are strong. He may be right that military-style semiautomatic firearms may be the most clearly protected firearms of all.

I do not intend to review all of the literature regarding the private right of citizens to keep and bear arms. Yet the history is clear, and it clearly weighs against the type of action we are today contemplating.

In the Federalist, No. 46, James Madison predicted that encroachments by the National Government would provoke "plans of resistance" and an "appeal to a trial of force." He wrote that a standing army "would be opposed [by] a militia amounting to near half a million citizens with arms in their hands." Alluding to "the advantage of being armed, which the Americans possess over the people of

almost every other nation," Madison continued:

Notwithstanding the military establishments in the several kingdoms of Europe, which are carried as far as the public resources will bear, the governments are afraid to trust the people with arms.

By refusing to strike title IV, this body would send a message to citizens throughout the country, that we are afraid to trust them with certain semiautomatic firearms.

The framers were explicit in insisting that American citizens would be able to possess military-type small arms. Noah Webster, the influential federalist of dictionary fame, stated:

Before a standing army can rule, the people must be disarmed; as they are in almost every kingdom in Europe. The supreme power in America cannot enforce unjust laws by the sword; because the whole body of the people are armed, and constitute a force superior to any band of regular troops that can be, on any pretense, raised in the United States.

What became the second amendment was seen as embodying the proposal drafted by Samuel Adams:

That the said constitution be never construed to authorize congress * * * to prevent the people of the United States, who are peaceable citizens, from keeping their own arms * * *.

THE SUPREME COURT AND THE SECOND AMENDMENT

Some allege that the second amendment is a collective right, and that it has been so interpreted by the Supreme Court. Mr. President, this is an inaccurate statement.

The U.S. Supreme Court has analyzed the second amendment as guaranteeing an individual right to keep and bear arms— particularly arms that could be used for militia purposes. It has also held that all guarantees of the Bill of Rights are entitled to respect, and must be interpreted consistently with the intent of the framers. A ban on transfer or possession of semiautomatic firearms would be inconsistent with second amendment jurisprudence as developed by the Supreme Court.

In *United States* v. *Verdugo-Urquides* [108 L.Ed. 2d 222, 232-3, 10 S.Ct. 1056, 1060-61 (1990)], the U.S. Supreme Court makes clear that the second amendment protects the rights of all law-abiding persons. The Court stated:

"The people" seem to have been a term of art employed in select parts of the Constitution * * *. The Second Amendment protects "the right of the people to keep and bear arms," and the Ninth and Tenth Amendments provide that certain rights and powers are retained by and reserved to "the people." * * * While this textual exegesis is by no means conclusive, it suggests that "the people" protected by the Fourth Amendment, and by the First and Second Amendments, and to whom rights and powers are reserved in the Ninth and Tenth Amendments, refers to a class of persons who are part of a national community or who have otherwise developed sufficient connection with this country to be considered part of that community.

The other opinions in the case did not dispute the above. Concurring, Justice Stevens stated that "aliens who are lawfully present in the United States are among those 'people' who are entitled to the protection of the Bill of Rights. * * *" [108 L. Ed.2d at 241].

During Reconstruction, the Court stated that the rights of the people "peaceably to assemble for lawful purposes" and "of bearing arms for a lawful purpose" were not "granted" by the Constitution because they existed long before its adoption [*United States* v. *Cruikshank*, 92 U.S. 542, 551, 553 (1876)]. The amendments which recognize these rights serve to "restrict the powers of the national government * * *" [Id. at 553]. A later opinion again recognized "the right of the people to keep and bear arms" and repeated that the second amendment is a limitation "upon the power of Congress and the National government * * *" [*Presser* v. *Illinois*, 116 U.S. 252, 265 (1886). *Miller* v. *Texas*, 153 U.S. 535, 538 (1894) repeats that "the restriction of" the second and fourth amendments operate "upon the Federal power."].

At the turn of the century, the Court wrote of "the freedom of speech and of the press" and "the right of the people to keep and bear arms" that "the law is perfectly well settled that the first ten Amendments to the Constitution, commonly known as the Bill of Rights, were not intended to lay down any novel principles of government, but simply to embody certain guarantees and immunities which we inherited from our English ancestors * * *" [*Robertson* v. *Baldwin*, 165 U.S. 275, 281-2 (1897)].

In *United States* v. *Miller* [307 U.S. 174 (1939)], the Court avoided determining whether a short barrel shotgun had to be registered under the National Firearms Act in order to be consistent with the second amendment. The district court had declared the Act unconstitutional as in violation of the second amendment, and thus no evidence was in the record that such a shotgun was an ordinary military arm. The Supreme Court remanded the case for fact-finding based on the following:

In the *absence of any evidence* tending to show that possession or use of a "shotgun having a barrel of less than eighteen inches in length" at this time has some reasonable relationship to the preservation or efficiency of a well regulated militia, we cannot say that the Second Amendment guarantees the right to keep and bear such an instrument. Certainly it is *not within judicial notice* that this weapon is any part of the ordinary military equipment or that its use could contribute to the common defense. [*Aymett* v. *State*, 2 Hump. 154, 158 (307 U.S. at 178)].

Whether a semiautomatic firearm today is ordinary military equipment or could contribute to the common defense should be within judicial notice, but is at a minimum a factual issue which is easily resolved in the affirmative by noncontrovertible evidence. The Miller court did not suggest that the possessor must be a member of the militia or National Guard, asking only whether the arm could have militia use. The private, individual character of the right protected by the second amendment appears to have been unquestioned.

Referring to the militia clause of the Constitution, the Supreme Court stated that "to assure the continuation and render possible the effectiveness of such forces the declaration and guarantee of the Second Amendment were made." [307 U.S. at 178]. The Court then surveyed colonial and State militia laws to demonstrate that "these men were expected to appear bearing arms supplied by themselves and of the kind in common use at the time." [307 U.S. at 179].

I will now read from the Yale Law Review Journal:

Returning, though, to the question of Congress' power to regulate the keeping and bearing of arms, one notes that there is, basically only one modern case that discusses the issue, *United States v. Miller*,[82] decided in 1939. Jack Miller was charged with moving a sawed-off shotgun in interstate commerce in violation of the National Firearms Act of 1934. Among other things, Miller and a compatriot had not registered the firearm, as required by the Act. The court below had dismissed the charge, accepting Miller's argument that the Act violated the Second Amendment.

The Supreme Court reversed unanimously, with the arch-conservative Justice McReynolds writing the opinion.[83] Interestingly enough, he emphasized that there was no evidence showing that a sawed-off shotgun "at this time has some reasonable relationship to the preservation or efficiency of a well regulated militia." [84] And "[c]ertainly it is not within judicial notice that this weapon is any part of the ordinary military equipment or that its use could contribute to the common defense." [85] *Miller* might have had a tenable argument had he been able to show that he was keeping or bearing a weapon that clearly had a potential military use.[86]

Justice McReynolds went on to describe the purpose of the Second Amendment as "assur[ing] the continuation and render[ing] possible the effectiveness of [the Militia]." [87] He contrasted the Militia with troops of a standing army, which the Constitution indeed forbade the states to keep without the explicit consent of Congress. "The sentiment of the time strongly disfavored standing armies; the common view was that adequate defense of country

[82] 307 U.S. 174 (1939).

[83] Justice Douglas, however, did not participate in the case.

[84] *Miller*, 307 U.S. at 178.

[85] *Id.* at 178 (citation omitted).

[86] Lund notes that "commentators have since demonstrated that sawed-off or short-barreled shotguns are commonly used as military weapons." Lund, *supra* note. †, at 109.

[87] 307 U.S. at 178.

and laws could be secured through the Militia—civilians primarily, soldiers on occasion." [88] McReynolds noted further that "the debates in the Convention, the history and legislation of Colonies and States, and the writings of approved commentators [all] [s]how plainly enough that the Militia comprised all males physically capable of acting in concert for the common defense." [89]

It is difficult to read *Miller* as rendering the Second Amendment meaningless as a control on Congress. Ironically, *Miller* can be read to support some of the most extreme anti-gun control arguments, e.g., that the individual citizen has a right to keep and bear bazookas, rocket launchers, and other armaments that are clearly relevant to modern warfare, including, of course, assault weapons. Arguments about the constitutional legitimacy of a prohibition by Congress of private ownership of handguns or, what is much more likely, assault rifles, might turn on the usefulness of such guns in military settings.

Some common military firearms from the time Miller was decided to the present include the M-1 Garand and M-1 carbine semiautomatic rifles; and the M-2 carbine, M-14, and M-16 automatic rifles; 12 gauge semiautomatic and pump shotguns; and .45 caliber and 9 millimeter semiautomatic pistols.

While it has not discussed the second amendment in any detail since Miller, the Supreme Court has recently denied that some Bill of Rights freedoms "are in some way less 'fundamental' than" others. "Each establishes a norm of conduct which the Federal Government is bound to honor—to no greater or lesser extent than any other inscribed in the Constitution. Moreover, we know of no principled basis on which to create a hierarchy of constitutional values * * *" [*Valley Forge College* v. *Americans United,* 454 U.S. 464, 484 (1982)].

After quoting the first amendment, the Court has referred to "the equally unqualified command of the second amendment: 'the right of the people to keep and bear arms shall not be infringed.'" [*Konigsberg* v. *State Bar of California,* 366 U.S. 36, 49 n. 10 (1961)].

The framers intended to "safeguard fundamental values which would far outlast the specific abuses which gave it birth." [*United States* v. *Chadwick,* 433 U.S. 1, 9 (1977)]. Moreover, constitutional protections for physical objects—such as the press, arms, and houses—are not frozen into colonial technologies:

We may asume that the framers of the Constitution * * * did not have specifically in mind the selection and elimination of candidates for Congress by the direct primary any more than they contemplated the application of the commerce clause to interstate telephone, telegraph and wireless communication, which are concededly within it. But in determining whether a provision of the Constitution applies to a new subject matter, it is of little significance that it is one with which the framers were not familiar. For in setting up an enduring framework of government they undertook to carry out for the indefinite future and in all the vicissitudes of the changing affairs of men, those fundamental purposes which the instrument itself disclosed. [*Tashjian* v. *Republican Party of Connecticut,* 479 U.S. 208, 226 (1986)].

Mr. President, in reviewing all of this, I feel that the argument that title IV is unconstitutional has much merit.

I yield the floor.

The PRESIDING OFFICER. The distinguished Senator from Alabama yields the floor.

Who yields time?

The Senator from Arizona is recognized.

The senior Senator from Arizona.

Mr. DECONCINI. Mr. President, I yield 5 minutes or whatever the Senator from Nebraska would like.

The PRESIDING OFFICER. For the information of the managers, the Senator from Arizona has 40 minutes and 54 seconds; the Senator from Utah has 43 minutes and 41 seconds.

How many minutes are yielded to the distinguished Senator from Nebraska?

Mr. DECONCINI. I yield the Senator from Nebraska 5 minutes.

The PRESIDING OFFICER. The Senator from Nebraska is recognized for 5 minutes.

Mr. KERREY. Mr President, I do rise in support of the position of the Senator from Arizona in opposition to striking this law provision. Before I comment and describe why, let me say that in the short and happy time that I have been a Member of this body I have heard on repeated occasions that what we need in the United States of America are people who will disregard public opinion and simply stand and say what they believe is right; and why is there not more of that, particularly in the Senate, I have heard it said.

I think we have an example of that tonight. It is not a popular position in Arizona; it is not an easy position for a westerner to take. I must confess that part of the reason that I come to the floor in support is that I trust that the Senator from Arizona thought this through very carefully and that he believes in it very much. He fought in the committee for it. He thought it through very carefully and he runs a great deal of risk. The next time some journalist or some observer of this body laments the absence of leadership, people willing to stand upon principle, let it be said that the Senator from Arizona did that here today.

Second, let me also say that I have a clean slate here in this venture since the NRA opposed me in 1982 when I ran for Governor and again in 1988 saying incorrectly that I was antigun and against collecting guns. So I have a clean slate. I have a great deal of admiration for the educational side and almost none for the political side. So I can look at this issue without being terribly concerned that anything worse than what happened to me in 1982 or 1988 will happen if I choose to put myself before the voters again.

I being my analysis of this by saying it is not without precedent that we do in fact take away at times in a measured way the freedom of people. I believe we are doing that in this case. I have listened to people say that we are not, but in fact we are. There is no question. I have friends who own some of these weapons and they have purchased them for the purpose of target shooting.

They purchased them for perferctly legitimate reasons. And I understand that, in fact, I am, in supporting this legislation, restricting their freedom.

But I also believe in the doctrine of relative rights. My freedom is not absolute. The Chair will cut me off in 5 minutes, for example. I do not have the right to stand and say anything I want, or to do anything I want. I measure my freedom against the freedom of other people and their capacity to live with order and protection.

I have heard it said all we are simply doing is letting people who were in the service do the same things on the private side they did when they were in the service. I listened to Gary Anderson of the NRA, a man whom I respect a good deal, say there were a lot of people who fired the AR-16 in the service, and therefore on that principle we should permit them to fire it outside of the service. It is a persuasive argument.

However, when I was in the service, I enjoyed firing the light antitank weapon, and I was pretty good at it. And I enjoyed throwing a grenade or two when I had the opportunity to do that. But you do not give me the opportunity to do that on the weekends here in Washington, to go out and find a field where I can enjoy firing a law or two, as I did fire a law.

I am concerned that we provide an exemption for law enforcement. I must tell the Chair, I believe one of the reasons the second amendment is there is in fact the Founding Fathers were concerned about a government so much having the right to have arms. They wanted to make sure they preserved that right for themselves. And to preserve the right to organize militias, as well.

I have concluded in the end that the protections are sufficient that the Senator from Arizona has provided us, particularly the waiting period, particularly saying we have a 3-year sunset provision in this, we have an 18-month study to evaluate the efficacy of the new law, and particularly, since I believe the Senator from Arizona is

[88] *Id.* at 179.
[89] *Id.*

very concerned about the paperwork and the bureaucracies of Government and what it might require of people to conform to this law. I see a real and present danger, particularly with law enforcement people, as they try to control the scourge of drugs in this country.

With several of these weapons I have no difficulty at all saying they ought to be outlawed. The fundamental question I had at the beginning and that I still have is: Will this work? My opposition to previous gun control measures has been based upon my belief that they would not work. This one I believe has a chance, in fact, of improving public safety, of decreasing unnecessary killings in our cities and in our towns. And, as a consequence, I am willing to roll the dice and run a bit of a risk.

We will be denying some freedom to the American people. Make no mistake about that. But make no mistakes as well that there were sufficient precedents for us doing that before, for the purpose of protecting order and for the purpose of establishing a more safe place for all to live.

Finally, I say again, I believe the Senator from Arizona should not just be commended for fighting this battle in the face of great opposition, not just supported for the thoroughness with which he has examined this issue, but he should be pointed to with pride the next time the idle observer of this body concludes that there is no one around with the courage to stand up on principle and declare their beliefs.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. SIMON). The Senator from Arizona.

Mr. DECONCINI. I will yield to the Senator from Kansas, if she will indicate how much time she would like.

Mrs. KASSEBAUM. I believe, Mr. President, 5 minutes.

Mr. DECONCINI. I yield 5 minutes to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized for 5 minutes.

Mrs. KASSEBAUM. Mr. President, I rise not as a legal scholar or a lawyer. I rise as a mother of sons who like to hunt. I also have never believed that banning guns would solve our crime problem. But I rise, I hope, with some—at least from my own perspective—common sense on this particular issue at this time.

I, like all of my colleagues, I am sure, have received a lot of mail, a lot of phone calls on this particular issue. Most of it, really, has been from people feeling very strongly that, as a matter of fact, they oppose any form of gun control.

On the other side are those who raise questions and are very angry about the brutality and the bloodshed that they believe is caused by the widespread and easy access to firearms. It is always difficult to find or even seek a middle ground in a debate as polarized as this one becomes.

However, I believe we must carefully weigh the legitimate interests that exist on both sides of this issue. On the one hand, every citizen has a right to safe streets and neighborhoods. On the other, hunters and sportsmen, and I would say all who wish to, have a right to own and use firearms for purposes that no one disputes are legal.

I support that right, even though I believe it is too often overstated as a right to bear almost any firearm that has ever been invented.

The facts, as I see them, are these. Today, drug rings, street gangs, and other criminal elements are able to obtain a host of paramilitary assault weapons with firepower far in excess of police officers on patrol, and often equal to police special weapons teams.

Weapons like the MAC-10 or the TEC-9 are relatively easy to conceal and can spray a large number of bullets with indiscriminate accuracy. The so-called Street Sweeper is a shotgun with a rotary magazine designed to fire off a dozen shotgun blasts very rapidly.

Mr. President, I frankly cannot imagine any legitimate hunting or sporting purpose for this kind of weapon. No hunter, certainly, in Kansas, in his right mind, would go after a deer or a pheasant with this firepower. No sportsman, concerned with highly accurate target shooting, would use such a weapon in a serious match.

I have concluded, Mr. President, that while banning assault weapons of this type would curtail the rights of some gun enthusiasts, the people who would benefit most from widespread, easy access to such weapons are criminal elements who least deserve our consideration.

I believe, therefore, that the limited ban in this bill on nine specific assault weapons is a necessary step to protect the lives of police officers and private citizens. And it seems to me to say a message about what we are about, as citizens of this country.

In many ways, this issue reminds me of the debate 2 years ago on the so-called plastic guns, which could pass through metal detectors without triggering an alarm. These weapons were a real and immediate threat to security at airports and other public facilities. In that case, the National Rifle Association initially opposed any limit on plastic guns, but later agreed to language that addressed the problem of protecting public safety.

I believe the NRA can and should join in a similar effort on this issue. Surely there is no rational reason to allow the continued sale of easily concealed, rapid-fire weapons of the type listed in the DeConcini bill. Surely, there is no public interest in the sale of large magazines that would allow someone to fire off 30 to 40 bullets at a time, which is not part of the language of the DeConcini measure that we are talking about right now, but it is something President Bush originally proposed to restrict.

For the life of me, I cannot comprehend why the National Rifle Association would object to this limited ban on specific assault weapons that could help curtail access by criminals without doing real harm to legitimate gun owners.

I agree with the NRA and others that gun bans cannot solve all of our crime problems. I strongly agree that we must have strict enforcement of existing laws, and I support the tougher penalties and fines called for in Senator THURMOND's proposal.

But I also do not see why these nine weapons should not be banned. Mr. President, I do not think this is the camel's nose under the tent. This is always an argument used when we get into a particular situation and we fear the next step will be something more.

Surely we can bring judgment to bear when we believe a case is well stated and it should be made, and we should stand up and be counted, when we can see at least that it might have some small merit.

I think anyone who has read this bill knows it does not allow anyone, elected or unelected, to ban all semiautomatic weapons or to confiscate every rifle and shotgun in America, as some have stated who have made calls into my office.

Mr. President, I do not think any gun ban should be done lightly, and it was for this reason that I could not support the broader ban proposed by Senator METZENBAUM, which I believe was too sweeping and vague.

But I am weary of propaganda, strong-arm tactics, and threats. It is time for common sense and reason to prevail on this issue. A limited ban on assault weapons is in the public interest. It is time for us to act responsibly and to ban these weapons and also to seek tough enforcement of our laws.

I yield the floor, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I yield 5 minutes to the distinguished Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho is recognized for 5 minutes.

Mr. McCLURE. Mr. President, I thank the Senator from Utah for yielding. I take this time to respond to two or three of the statements made on the floor during the debate so far. Obviously, I am at a disadvantage compared to the Senator from Kansas. I cannot rise as a mother, and that, I hope, is both obvious and irrefutable.

But I can rise as a father and a grandfather, someone who is as concerned about the safety of my family, my community, and my streets as anyone else in this country. So let us not get into the question of whether we care about safety. Let us talk about whether this bill addresses safety, whether, indeed, it does anything at all meaningful with respect to the incidence of violent crime on the streets of our country.

I could not help but notice, as the Senator from Arizona was defending the provision in the bill, that he not once made the distinction between legally owned and illegally possessed firearms. Not once in the entire debate did he recongize the fact that much of the crime, if not most of the crime, committed by drug gangs are by guns that are illegally possessed in the first place or illegally acquired or that are, by themselves, illegal firearms.

I notice that he left on the stand, as he concluded his debate, a picture of an Intratec TEC-9. I believe that is one in his oral argument he referred to as having a threaded barrel so that a silencer could be put on. A silencer is prohibited by current law. It is illegal to have one under current law. So there are those who will pretend by passing a second law, maybe making it doubly illegal, it will be doubly impossible for anyone to use it. How silly can we get with respect to that particular kind of argument? If it is illegal under a given law, then it is a law enforcement question and not a question of, once again, banning it under a separate list for a different reason.

The Senator from Arizona made reference to a Colorado case. He either did not know or conveniently did not say that in that Colorado case to which he had reference, the gun was stolen from a person who possessed it legally and did not use it illegally, and the banning of the purchase of the firearm would in no way have changed the commission of that crime. It was an illegal crime by a mentally deranged person, who stole the gun and used it in that crime rampage. How familiar is that story as we look at the various incidents of crime around this country to which people point with a tremendous amount of emotion, if not reason.

Much has been made in the debate against the Hatch amendment today, which I support, and I think I should state very clearly I do support it. I think the provision in the bill is unwise, unwarranted, and is a further encroachment. It is a camel's nose under the tent, in my view.

Why do I view it that way? Because I watched, and we passed the 1968 Gun Control Act, and, in spite of the very obvious excesses of that bill, it took us nearly 20 years to correct some of the most obvious abuses under that bill. What was the argument against our attempts to correct the abuses? The bill had failed because it did not go far enough.

So we just finished the debate. How long should the list be? Should it be this long or should it be this long? I suspect there are those who voted against the Metzenbaum amendment so they could vote against the Hatch amendment so they could say a list this long is all right, but a list this long is a violation of the constitutional rights, and that way they have it both ways when they go back home. That is not an unfamiliar tactic around here either.

But the fact of the matter is the limitation stated in the DeConcini provision in the bill has almost nothing to do with making guns unavailable to criminals. All of the statistics that I have seen over the years will indicate that most of the firearms used in violent crime are illegally obtained and/or illegally possessed.

There has been quite a lot suggested here today that if, indeed, you ban these from importation or ban them from purchasing in this country, then criminals will not have them. Let me ask my colleagues this: If, indeed, criminals can import tons of illegal narcotics into this country, how are they going to be inhibited from bringing a few more pounds of illegal guns into this country?

Criminals involved in the drug trade will continue to have these firearms. They are doing an illegal activity already. What do they care it may be an illegal activity to have a gun? It is illegal to be selling the drugs. So you only compound their law violations, but you do not inhibit their conduct simply by passing another law that has more effect upon law-abiding citizens than it does upon those criminals.

Much has been said about the police are outgunned on the streets. Let me suggest, Mr. President, that if that were true, the police would have these firearms. The fact of the matter is the police do not judge these firearms to be the most effective to be used by the law enforcement agencies. It has been said several times how many of these guns have been seized, confiscated from drug dealers. As I recall, under the law, a confiscated firearm can be made available to law enforcement officials.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. McCLURE. Will the Senator yield me 3 additional minutes?

Mr. HATCH. I am delighted to yield 3 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. McCLURE. Mr. President, if, indeed, the police believe these to be superior firearms and are readily available to them at no cost through the confiscated weapons that are seized from the drug dealers, then the police would have them and would be using them. The very fact the police do not carry them normally, do not use them normally, tells us the problem is something other than the fact that these firearms are the source of the problem. It is not true. There are other reasons why police are gunned down in the street, and there is not anyone who is more concerned about that than is the Senator from Idaho.

But let us focus on what produces the crime and how we eliminate that crime. As the Senator from Kansas indicated a moment ago, let us focus on these provisions that are contained in the Thurmond substitute. Let us focus on law enforcement that gets these would-be criminals off the street.

I am disturbed when I read of law enforcement officials who say, "I cannot enforce that law against juveniles carrying these firearms because I simply do not have enough resources," and it is already against the law for them to be carrying a concealed weapon.

I might just say parenthetically to the Senator from Kansas, we are not here talking about easily concealable weapons. That is another issue, a separate, distinct other issue. This has nothing to do with easily concealable. I have not seen anybody limping down the street with an AK-47 stuffed in his pants leg. That just is not a part of the problem we are dealing with.

I do believe there are problems with respect to heavily armed criminals involved in illicit trade, and the police need our help, they desperately need our help, but they do not need the kind of action that is taken here in a congressional decision as to whether or not we ought to limit the rights of an individual in our society trying to exercise in a lawful manner rights which are guaranteed in the Constitution of the United States. This is unwise legislation. In my judgment, it is unconstitutional legislation, and the worst part of it is it has almost no relevance to dealing with the problem that is identified with the sponsors of this provision.

I hope we will adopt the Hatch amendment and get on with the question that is really addressing this body, and that is, how do we deal with violent crime?

Mr. President, I yield the floor.

Mrs. KASSEBAUM addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. DeCONCINI. Mr. President, I yield to the Senator from Kansas.

Mrs. KASSEBAUM. Mr. President, I just want a minute to respond to the Senator from Idaho because we certainly agree on the law enforcement provision. When he mentioned the language of the Metzenbaum amend-

ment and why perhaps some voted against it as a screen then to vote for the DeConcini language, I point out when the Senator used the example of the legislation in 1968, which was before my time here, I think the very reasons the Senator mentioned that there were problems with that legislation was that it was not drafted in a way that was precise.

That is why we get frequently into a great deal of difficulty, and it is one of the reasons, as I mentioned, I voted against the language of Senator METZENBAUM, because it was vague.

There were two aspects that were catch-all language, where the amendment states, "all other models by the same manufacturer with the same design", for instance, is not precise. Again, "Any other firearm with an action design identical or nearly identical to an assault weapon specified in this paragraph," and so forth. I think, personally, that is why we do have to be careful. The DeConcini language is much more specific and narrowly drawn. I want to make that point, Mr. President, because I think it is a major distinction among others, between the two approaches.

Mr. McCLURE. Mr. President, will the Senator yield to the Senator from Idaho 1 additional minute.

The PRESIDING OFFICER. The Senator from Utah yields to the Senator from Idaho.

Mr. McCLURE. I thank the Chair. I say to the Senator from Kansas, the 1968 gun control law was not flawed because it was imprecise. It was flawed because it aimed at the wrong target. It attempted to do, in 1968, what this provision attempts to do now. It aimed at firearms, not at criminal misbehavior. That is what was wrong with the 1968 law, and that is why 2 years ago we got some substantial changes made in the other direction.

Mrs. KASSEBAUM. Mr. President, I would just like to say now we are attempting to deal with both, law enforcement and some types of firearms.

Mr. DECONCINI. Mr. President, I want to point out a couple of things. The distinguished Senator from Idaho said that criminals only obtain their guns illegally or something close to that, or most of them.

That just is not the case. Oakland, CA, law enforcement authorities did a study of this and only 12 percent of the 383 assault weapons confiscated between 1986 and 1988 in that jurisdiction were illegally obtained. The remaining 88 percent were purchased legally over the counter. So we are talking about you are not being able to buy these guns over the counter, so they are going to have to steal them if they are going to use these guns, and they have other things to do. Other things include selling drugs.

Then the Senator points out that, well, more enforcement. How often have we heard that argument—well, we just get tough and so more enforcement.

Look at what has happened on the enforcement side. It has not been the administration that has asked for more for enforcement. It has been the Congress that has added more for enforcement. In the Bureau of Alcohol, Tobacco and Firearms, the 1987 request of the administration was for $178.5 million. We appropriated $198.5 million. The Congress said let us do more for enforcement. The administration opposes this bill.

In 1991, the administration is proposing a reduction of 185 staff for the BATF. This cut is being made to offset increased costs of pay.

Mr. President, it just does not wash that this bill is a copout, or whatever you want to call it, to the Metzenbaum bill. The Metzenbaum bill, as the Senator from Kansas pointed out, includes any firearm with an action, that means a firing action, designed identical or nearly identical to an assault weapon specified in this paragraph, which has been redesigned from, renamed, and renumbered or patterned after one of such specific assaults.

So anything identical can be and is included so you are talking about a very widespread bill.

I have the greatest respect for the Senator from Ohio. He has stood on this floor and made splendid arguments. He just has not been able to convince me. That is one of the reasons. I do not want some unelected official to arbitrarily say yes, it is identical or nearly identical so it goes into the category. So there is a great deal of difference between these two bills. I think it ought to be noted.

The Senator from Idaho also says that the police would use these weapons if they thought they were superior. Well, the police are moving to use these weapons because not only are they superior, but it is the only way they can combat these drug dealers.

The FBI is now issuing Uzi's or something similar to that because they have to have the firepower. The border patrol in my State along the southwest border, if they can get the money for them, are going to have, and some of them do have, M-16's.

Why? You ask them. Because they are getting shot at by these things and they are not covering themselves. They know what is superior. They are trying to catch up with the God-awful weapons these drug dealers are using.

I yield the floor.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. GRAMM. Mr. President, I ask the Senator from Utah to yield me 5 minutes.

Mr. HATCH. I will be happy to yield 5 minutes to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas is recognized for 5 minutes.

Mr. GRAMM. Mr. President, there are several points I wish to make. I would not speak except we are under a time limit and so we are all going to be here anyway. I think the distinguished Senator from Idaho has spoken very clearly on this subject. If people are listening to the debate and they enter it with two things; No. 1, at least any kind of practical or logical approach to the problem; and, No. 2, any kind of institutional knowledge about the fact that there are probably at least 100 million firearms, as a conservative estimate, owned legally in the United States—we do not know how many are owned illegally—the logic of the Senator is irrefutable. Since we are here anyway, and silence is consent, I want to say a little bit about this subject. First of all, I think it is interesting that as terrible as the assault rifles are, this bill does not propose that we make people turn them in. If they are all this bad, if they are all this dangerous, why are we not going to try to take them up?

Second, Mr. President, does it make sense that we let somebody go out and, with a background check, buy an automatic weapon, but we are going to ban the purchase of semiautomatic weapons?

My point is that the bill is structured not to meet a problem, not to deal with a legitimate threat. If it were dealing with a legitimate threat of automatic and semiautomatic weapons, it would propose taking up those weapons, not just preventing their sales; it would ban the resale and confiscate automatic weapons. In fact, this amendment is set out to deal with a political perception. That is what I would like to focus on.

Mr. President, I never cease to be amazed at the arrogance of government. I never, ever cease to be amazed at the arrogance with which government claims capacity to accomplish things which any reasonable, knowledgeable person knows government cannot do.

Does anybody really believe that the passage of this amendment, or our failure to strike this bill language is going to prevent people that are going to go out and kill somebody, the ability to obtain a weapon to do it? With 100 million firearms in the country, with millions of these kinds of weapons owned legally now, does anybody really believe that anyone who is going to go out and kill somebody in a gangland drug murder is going to be deterred by the fact that the weapon he possesses is possessed illegally?

In fact, as I talk to law enforcement officials around my State, when they raid crack houses or engage in major drug busts, they almost always find

class 3 weapons, automatic weapons, and yet I am not aware that any of those automatic weapons are licensed. And the law says you have to have an FBI background check, and you have to have it licensed, and you have to pay $200 to do it.

So that is a law that is on the books. If it makes you feel good, you can go find a dusty law book somewhere, look at it and feel safe. But the plain truth is the people that want these weapons have them. So what we are really dealing with here is a symptom. The symptom is the fact that people are using firearms to violate the law, and to kill people.

There are really two fundamental ways of approaching that, it seems to me. One is to say let us take the guns away. It is very revealing to me that that is not what is being proposed here. What is being proposed here is sort of a political sham. We will not take the guns away, we will just say you cannot buy legally any new ones.

The other alternative, the alternative that I think has some chance of working, the one I would like to see tried, and the one that at some point during the consideration of this bill I intend to offer—there will be many solutions, and there is nothing magic about mine. But the alternative is to penalize very severely the people that abuse firearms.

That is an amendment that I will offer later in the debate—and I hope we adopt the motion to strike. If we do not, I will offer my amendment as a substitute to this language. If we are successful here I will offer my amendment free standing to the bill.

My amendment is very simple. If you are carrying any firearm, period, single shot or whatever—if you are carrying a firearm while you are committing a drug felony or a violent crime, if you are apprehended, and you are convicted of that firearm violation, no matter what sentence you get for the drug felony, or the violent crime, you are going to do 10 years in prison without parole for possessing the firearm. Second, if you discharge the firearm with intent to do bodily harm, you are going to get 20 years in prison without parole. And, if you kill somebody, you are going to be put to death.

Mr. President, I submit that is going to do a lot more to, one, deter people from carrying firearms while they are out committing drug felonies, or violent crimes. No. 2, it will deter them from using the firearm once they have made the mistake of carrying it. No. 3, if they kill somebody, they are going to be put to death. So we are going to have an effective ultimate deterrent.

If our objective is to respond politically to a concern the public has, then we can do it by the provision in this bill. But if our objective is to deal with the problem, to protect our fellow citizens, to protect our bleeding Nation, the way to do that is by adopting this motion to strike and then impose stiff minimum mandatory sentences, and the death penalty.

I thank the Chair.

Mr. DODD. Mr. President, I rise in opposition to the Hatch amendment. As I do so, I am well aware that this is not the first time this body has debated gun control—nor will it be the last. During the 1960's, the Senate debated legislation to restrict mail-order purchases of firearms, and supporters and opponents of gun control trotted out the very same arguments in use at the present. I can only hope that the current debate will end as the one in the sixties did—with enactment of needed gun control legislation.

My father, the late Senator Thomas Dodd, was the sponsor of that legislation during the 1960's. His support for gun control resulted from his own personal experience in law enforcement. He was a special agent for the FBI in the 1930's, and he spent his wedding night staking out one of John Dillinger's suspected hideouts. Between 1938 and 1945, he served as an assistant to five successive Attorneys General of the United States. In these capacities, my father saw firsthand the threat posed to law-abiding citizens by drug addicts, criminals, and crackpots who obtain firearms.

That is why in 1961, as chairman of the Senate Subcommittee on Juvenile Delinquency, he ordered a study of interstate firearms sales. The findings were disturbing. No existing law prohibited mail-order sales of firearms to drug addicts, children, crackpots, or criminals. The study also found that a wide variety of foreign military surplus weapons, from handguns to bazookas and antitank guns, were readily available to all who sought them. As a result of this study, my father introduced legislation in 1963 to stop mail-order sales of handguns.

Mr. President, opponents of my father's measure fought against it for 5 long years. they argued that it was unconstitutional. They asserted that it would be ineffective at keeping firearms out of the hands of criminals and other people unfit to have them. They claimed that it amounted to nothing other than a burden on law abiding citizens. In the interim, President Kennedy was shot by an assassin armed with a fraudulently obtained mail-order rifle. It was only in 1968, after the twin tragedies of the murders of Martin Luther King, Jr. and Senator Robert Kennedy that my father and fellow proponents of gun control were able to overcome resistance and put an end to mail-order sales of firearms.

I hope it will not be 5 years before we act to end further sale of semiautomatic assault weapons. I believe that Americans have witnessed evidence enough of the awesome and awful capabilities of these weapons when they fall into the wrong hands. We have seen Patrick Purdy's senseless rampage with a semiautomatic AK-47 in a Stockton schoolyard, and Joseph Wesbecker's deranged shootings at a Louisville newspaper plant. We have seen police officers killed by outlaws armed with semiautomatic assault weapons, while the officers themselves are armed only with their service revolvers. Moreover, it is clear that semiautomatic assault weapons are more apt to be used in criminal activities than are other types of firearms. While semi-automatic assault weapons account for but one-half of 1 percent of all privately owned firearms in this country, they accounted for 10 percent of all firearms traces requested of the Bureau of Alcohol, Tobacco and Firearms by law enforcement officials between January 1988 and April 1989.

Mr. President, opponents of this measure would have us believe that the guns covered by this bill are identical in form and function to conventional firearms. Indeed, the firearms covered by this measure are similar to conventional guns in that they are semiautomatic. One pull of the trigger, one shot. But in ancestry, design, and most importantly, magazine capacity, these firearms are most closely related to military weapons. The Bureau of Alcohol, Tobacco and Firearms, admitted as much last year, when it permanently banned importation of 43 types of foreign-manufactured semiautomatic assault weapons—including 9 covered by this legislation—because they had no sporting purpose. Clearly, it makes little sense to ban foreign firearms that are considered to be dangerous while permitting the domestic manufacture of similar firearms to continue unabated.

Mr. President, both experience and common sense tell us that a ban on these types of firearms will help to staunch the supply of these weapons in the hands of criminals and crazies. The fewer the number of these guns that are in civilian hands, the lower the chance that a shipment will go awry, or that an assault weapon will be stolen from a law-abiding citizen. In the wake of the 1986 ban on new machine guns, the Drug Enforcement Administration found that its seizure of machineguns have decreased, while seizure of other weapons has increased.

Mr. President, for my father, gun control was not a liberal issue. It was not a conservative issue. It was a law and order issue. And so it should be today. The legislation before us today is backed by a host of law enforcement groups, including the National Sheriffs Association, the National Association of Police Organizations, the Fraternal Order of Police, the Interna-

tional Association of Chiefs of Police, and the Police Executive Research Forum. When law enforcement officers tell us that they are facing a new problem in the battle against criminals, we owe it to them to listen, and to help in any way we can to make their work easier and the odds against their survival better.

I urge rejection of the Hatch amendment.

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, parliamentary inquiry. Whose time is being charged in this quorum call?

The PRESIDING OFFICER. The Senator asked for the quorum call. The time is charged against him.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the time for the quorum call not be charged against either side.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DECONCINI). Without objection, it is so ordered.

Mr. SIMON. Mr. President, I speak with the consent of the Senator from Arizona, who controls the time here.

First of all, I want to commend my colleague from Arizona for showing incredible courage. What we need in this body is more people who have the fortitude to stand up and say what is in the best interest of this country. I have seen him do that time and time again in committee, and here he is doing it on the floor of this body, and I want him and everyone to know I am proud to serve with him.

There were two points the Senator from Arizona made just a little bit ago that I would like to repeat and then make a few other comments. First, the survey by the Oakland police, that of the guns confiscated in the process of drug raids and so forth. Twelve percent of those guns were obtained illegally.

Let us not fool ourselves with this myth that if we pass this, it will not make any difference to the criminal element. The reality is that it is going to make a difference. Perhaps not a huge difference, but a difference, and a huge difference to those families where needless death has occurred.

Second, while it is not part of this bill, the proposal by the administration, the staff, that BATF be cut by 185, that is not the direction we ought to be going in if we are interested in law enforcement in this country.

Will this amendment solve all of the problems we have? Absolutely not. No one pretends this. The real question is—and I say this to my colleagues from Idaho for whom I have great respect—will this proposal in this bill, thanks to the Senator from Arizona, discourage proliferation? I think the answer is that it can. To what degree, we do not know. But let us give it a try.

I have to say, as I approach various amendments on this floor, sometimes I consider a lot of them very gray; they are not clear cut. This one, at least to the Senator from Illinois, is clear cut. This one is a question of whether we are going to provide greater safety for the people of our country. And I know the political liability. It is no secret that some of the people on my staff are urging me not to vote the way I just voted on the Metzenbaum amendment, and the way I am voting on this one. But let us all recognize that we are not going to be here forever.

I just, a couple of hours ago, learned that my wife's brother died. It makes you think about how long you are going to be around here. Whether it is death or an election or retirement, we are not going to be around here forever, and we ought to be thinking about what we can contribute. I would like to contribute something substantial. In a small way, we can do it right here. One-half percent of the weapons of this country are the kind described in the DeConcini amendment. Yet, they are involved in about 30 percent of the crimes. Can we do better? Well, of course, we can do better.

They call one gun the "street sweeper." Why do they call it the street sweeper? Is it because we can clean our gutters and get all the candy wrappers and Pepsi cans off the streets? Of course not. It is called a street sweeper because we can sweep the streets of people. That is the only purpose of that gun.

Do we need to tolerate that in our society? I do not think so. I remember the testimony of the chief of police of Los Angeles who described himself as a conservative Republican, who said that 60 percent of the people who were killed by these guns are innocent bystanders. But he said:

> If you do not do something to stop the proliferation of these weapons, I am going to ask for these weapons for my police. You know what will happen if I have to ask for them for my police? Sixty percent of the people who are going to be killed are going to be innocent bystanders.

Are we going to have an endless arms race here? I hope we can do better. I hope, frankly, that we can work out some kind of a compromise. I asked for a meeting with the officers of the National Rifle Association in my office, and they were there, together with their counsel, for whom I have great respect. We all know him. But it was very clear when we met in my office that they were not interested in any practical compromise, because they felt they had the votes here today to beat this kind of an amendment, or any other amendment that comes up.

Maybe they are right today. But I just add that I have been in this business long enough to know that the pendulum swings from one side to the other. The coal industry in my State opposed any acid rain legislation. I told them years ago, there is going to be acid rain legislation, and you ought to be formulating it so that it is sensible, so that it does not hurt the Midwest. They did not want to have anything to do with that. They were going to resist all acid rain legislation.

You know what happened. We passed it, and it hurts the Midwest. I do not know what will happen, but the Midwest will get hurt and part of the reason is that the coal industry in my State, in the Midwest, did not have the foresight to say let us get a sensible compromise.

The National Rifle Association people who are unwilling to work out sensible compromises may well win today and tomorrow and the next day. But let me tell you the danger is that that pendulum is going to swing too far.

I live in hunting territory down in southern Illinois. Our home on 12 acres is right next to the Shawnee National Forest. I see more deer than I do people most days. The last time I was home I saw 16 deer right near my place. I am around hunters all the time.

I want to defend the rights of hunters and responsible citizens to have guns. But that is not what this is about. That is not what this fight is about.

This bill is not the answer to all the crimes that we have in this country. There is no single answer. But this bill provides a part of the answer and we ought to be willing to make that step. It takes a little bit of courage on our part, not as much courage as the Senator from Arizona has shown, but a little bit. I hope we would have the courage to do it.

We face the choice, and it is really a fairly simple choice. We face the choice of siding with the gun lobby or the law enforcement people. In that choice, I am going to stick with the law enforcement people.

Mr. President, I am going to ask for quorum call. I ask unanimous consent that the time of the quorum call not be charged to either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BREAUX). Without objection, it is so ordered.

## MORNING BUSINESS

Mr. CRANSTON. Mr. President, I ask unanimous consent that we have a period of morning business now with Senators permitted to speak therein; that the time not count against the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MESSAGES FROM THE HOUSE

At 9:38 a.m., a message from the House of Representatives, delivered by Mr. Hays, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4151. An act to authorize appropriations for fiscal years 1991 through 1994 to carry out the Head Start Act, the Follow Through Act, and the Community Services Block Grant Act; and for other purposes.

At 6:44 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4252. An act to authorize the Secretary of the Air Force to purchase certain property at Pease Air Force Base, New Hampshire.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 324. Concurrent resolution concerning human rights, democracy, and illicit narcotics production and trafficking in Burma.

## MEASURES REFERRED

The following bill was read the first and second time by unanimous consent, and referred as indicated:

H.R. 4151. An act to authorize appropriations for fiscal years 1991 through 1994 to carry out the Head Start Act, the Follow Through Act, and the Community Services Block Grant Act; and for other purposes; to the Committee on Labor and Human Resources.

H.R. 4252. An act to authorize the Secretary of the Air Force to purchase certain property at Pease Air Force Base, NH; to the Committee on Armed Services.

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 324. Concurrent resolution concerning human rights, democracy, and illicit narcotics production and trafficking in Burma; to the Committee on Foreign Relations.

## EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate together with accompanying papers, reports, and documents which were referred as indicated:

EC-3017. A communication from the Director of the Congressional Budget Office, transmitting, pursuant to law, a report entitled "Medicare's Disproportionate Share Adjustment for Hospitals"; to the Committee on Finance.

EC-3018. A communication from the Secretary of Labor, transmitting, pursuant to law, the quarterly report on the expenditure and need for worker adjustment assistance training funds under the Trade Act of 1974; to the Committee on Finance.

EC-3019. A communication from the Assistant Secretary of Legislative Affairs, U.S. State Department, transmitting, pursuant to law, a report on what steps the United Nations Environment Program [UNEP] had taken to implement the concerns expressed by the General Accounting Office in its June 1989 study on UNEP; to the Committee on Foreign Relations.

## PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-495. A resolution adopted by the Senate of the State of Hawaii to the Committee on Commerce, Science, and Transportation.

"SENATE RESOLUTION NO. 5

"Whereas, the Pacific states, which include Alaska, Washington, Hawaii, Idaho, Oregon, California, and the Canadian Province of British Columbia share a common resource, the Pacific Ocean; and

"Whereas, a large part of the economy of these states depends on the renewable resources of the Pacific Ocean; and

"Whereas, it is the goal of these Pacific states and the Province of British Columbia to conserve the long-term values, benefits, and natural resources of the Pacific Ocean and to set an example by giving priority to the proper management and protection of renewable ocean resources over nonrenewable ones; and

"Whereas, the Pacific Ocean's renewable resources are continually threatened with degradation and destruction from improper offshore oil and gas development, potential seabed mineral mining impacts, and the potential oil spills resulting from transshipment of oil; and

"Whereas, many proposed developments originate with the federal government, but impact Pacific states directly; and

"Whereas, ocean developers and shippers would prefer to work cooperatively with one regional body which overseas ocean resources; and

"Whereas, the federal government has encouraged states to work together on ocean issues through the Coastal Zone Management Act; and

"Whereas, Section 309 of the Coastal Zone Management Act provides advanced Congressional consent for a compact of Pacific states; and

"Whereas, a compact between the Pacific states and the Province of British Columbia would provide a method to address common needs and concerns in the Pacific Ocean; and

"Whereas, regional cooperation, planning, and action are required to achieve the ocean conservation goal of Pacific states: Now, therefore, be it

*"Resolved by the Senate of the Fifteenth Legislature of the State of Hawaii, Regular Session of 1990,* That the United States Congress, the Pacific state legislatures, and the legislature of the Province of British Columbia are respectfully urged to support the establishment of a compact of Pacific states and the Canadian Province of British Columbia to provide for future planning and protection of ocean resources which are of regional concern, develop a coastwide oil spill response plan, and to oversee the management and utilization of ocean resources so as to ensure their continued contribution to the economies of Pacific states and the Province of British Columbia; and be it further

*Resolved,* That the Ocean Resources Committee of the Western Legislative Conference of the Council of State Governments is urged to develop specific compact language for transmittal to the legislatures of the affected states and province; and be it further

*Resolved,* That should Idaho's inclusion as a signatory of the compact interfere with Section 309 of the Coastal Zone Management Act, then Idaho be precluded from being a signatory; and be it further

*Resolved,* That certified copies of this Resolution be transmitted to the President of the United States Senate, the Speaker of the United States House of Representatives, the Members of Hawaii's congressional delegation, the Ocean Resources Committee of the Western Legislative Conference of the Council of State Governments, and to each of the presiding officers of the legislative bodies of each Pacific state mentioned, and the Canadian Province of British Columbia."

---

POM—496. A joint resolution adopted by the General Assembly of the State of Colorado; to the Committee on Environment and Public Works.

"SENATE JOINT RESOLUTION 90-23

"Whereas, The federal government's enforcement of its "no net loss" of wetlands policy has become mired in controversy; and

"Whereas, in the past, marshes, swamps, bogs, and wet meadows were not associated with environmental protection issues; now deemed "wetlands", such lands are the focus of stringent enforcement action; and

"Whereas, The definition of a wetland is imprecise and broad and susceptible to so many interpretations that almost any mud puddle or dry bottom land qualifies as a wetland; and

"Whereas, The "no net loss" of wetlands policy is also vague and imprecise and in need of significant clarification; and

"Whereas, Governmental agencies, in their efforts to protect wetlands, are, in effect, condemning property without either due process or just compensation because once property is designated as a wetland it become off-limits for farming and ranching activities; and

"Whereas, "Normal" farming and ranching activities are to be exempt from permitting requirements for dredging and filling wetlands; and

"Whereas, The agricultural exemption for basic production practices is being inconsistently applied by the Environmental Protection Agency and the U.S. Army Corps of Engineers; and

"Whereas, There are a number of instances where farmers and ranchers have been fined or imprisoned for continuing to farm and ranch their lands consistent with longstanding farming and ranching activities; and

"Whereas, the results of implementing such stringent enforcement action are beginning to emerge, with consequences causing great hardship to landowners: Now, therefore, be it

*"Resolved by the Senate of the Fifty-seventh General Assembly of the State of Colorado, the House of Representatives concurring herein:*

"(1) That the Congress of the United States pass the Agricultural Wetlands Exemption Act introduced in the Second Session of the One Hundred First United States Congress.

"(2) That the policy of "no net loss" of wetlands be clarified and simplified for purposes of equitable and consistent enforcement.

"(3) That the definition of wetlands and the delineation criteria with respect to identifying a wetland be clarified with specificity; and be it further

*"Resolved,* That a copy of this Resolution be transmitted to the Chief Justice of the United States Supreme Court, the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and each member of Congress from the State of Colorado."

POM—497. A resolution adopted by the Northeast Georgia Presbytery; to the Committee on Foreign Relations.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RIEGLE, from the Committee on Banking, Housing, and Urban Affairs, with an amendment in the nature of a substitute and an amendment to the title:

S. 648. A bill to amend the Securities Exchange Act of 1934 (Rept. No. 101-300).

By Mr. JOHNSTON, from the Committee on Energy and Natural Resources, with amendments:

H.R. 1109. A bill to amend the National Trails System Act to designate the California National Historic Trail and Pony Express National Historic Trail as components of the National Trails System (Rept. No. 101-301).

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 1839. A bill to provide authorization of appropriations for activities of the National Telecommunications and Information Administration, and for other purposes (Rept. No. 101-302).

By Mr. BURDICK, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute:

S. 1875. A bill to redesignate the Calamus Dam and Reservoir authorized under the Reclamation Project Authorization Act of 1972 as the Virginia Smith Dam and Calamus Lake Recreation Area.

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HOLLINGS, from the Committee on Commerce, Science, and Transportation:

Tommy G. Thompson, of Wisconsin, to be a member of the Board of Directors of the National Railroad Passenger Corporation for a term of 4 years.

Tommy G. Thompson, of Wisconsin, to be a member of the Board of Directors of the National Railroad Passenger Corporation for the remainder of the term expiring April 27, 1990.

Rear Adm. William J. Kime, U.S. Coast Guard, to be Commandant, U.S. Coast Guard for a term of 4 years with the grade of admiral while so serving.

Andrew Camp Barrett, of Illinois, to be a member of the Federal Communications Commission for a term of 5 years from July 1, 1990.

The following rear admiral, as Vice Commandant, U.S. Coast Guard with the grade of vice admiral while so serving:

Martin H. Daniell, Jr.

The following rear admiral, as Commander, Pacific Area, U.S. Coast Guard with the grade of vice admiral while so serving:

A. Bruce Beran

The following officer of the U.S. Coast Guard Reserve for appointment to the grade of rear admiral (lower half):

George R. Merrillees.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. GORE (for himself, Mr. PELL, Mr. MITCHELL, Mr. LEAHY, Mr. WIRTH, Mr. KERRY, Mr. BAUCUS, Mr. BIDEN, Mr. ADAMS, Mr. CRANSTON, and Mr. LIEBERMAN):

S. 2666. A bill to authorize the United States contribution to an international account established by the Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer, for the purpose of assisting developing nations in their efforts to comply with the provisions of the Protocol, and for other purposes; to the Committee on Foreign Relations.

By Mr. KENNEDY:

S. 2667. A bill to establish a National Needs Trust Fund to invest the peace dividend in the future of America; to the Committee on Labor and Human Resources.

By Mr. MITCHELL:

S. 2668. A bill to amend the Internal Revenue Code of 1986 to exempt certain transportation by ferry from the tax imposed on transportation by water; to the Committee on Finance.

By Mr. JOHNSTON (by request):

S. 2669. A bill to provide for increases in appropriation ceilings for land acquisition and development in certain units of the National Park System, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. REID:

S. 2670. A bill to amend the Trade Act of 1974 in order to require reciprocal responses to foreign acts, policies, and practices that deny national treatment to United States investment; to the Committee on Finance.

By Mr. CRANSTON:

S. 2671. A bill for the relief of Restituta Cayubit Brick; to the Committee on the Judiciary.

By Mr. THURMOND:

S. 2672. A bill to establish a United States Marshals Foundation; to the Committee on the Judiciary.

By Mr. KOHL:

S. 2673. A bill for the relief of Dragan Stankovic; to the Committee on the Judiciary.

By Mr. McCLURE:

S. 2674. A bill to provide for the reestablishment of the gray wolf in Yellowstone National Park and the Central Idaho Wilderness Areas; to the Committee on Energy and Natural Resources.

By Mr. BRADLEY (for himself and Mrs. KASSEBAUM):

S.J. Res. 323. Joint resolution designating November 11 through 17, 1990, as "Geography Awareness Week"; to the Committee on the Judiciary.

By Mr. DOLE (for himself, Mr. INOUYE, Mr. ADAMS, Mr. CHAFEE, Mr. DIXON, Mr. GLENN, Mr. HEFLIN, Mr. HOLLINGS, Mr. LAUTENBERG, Mr. McCLURE, Mr. MOYNIHAN, Mr. PELL, Mr. ROTH, Mr. SANFORD, Mr. THURMOND, and Mr. WARNER):

S.J. Res. 324. Joint resolution to designate June 3, 1990, as "Week of the National Observance of the 50th Anniversary of World War II"; to the Committee on the Judiciary.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTION

By Mr. GORE (for himself, Mr. PELL, Mr. MITCHELL, Mr. LEAHY, Mr. WIRTH, Mr. KERRY, Mr. BAUCUS, Mr. BIDEN, Mr. ADAMS, Mr. CRANSTON, Mr. BUMPERS, and Mr. LIEBERMAN):

S. 2666. A bill to authorize the United States contribution to an international account established by the Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer, for the purpose of assisting developing nations in their efforts to comply with the provisions of the Protocol; and for other purposes; to the Committee on Foreign Relations.

OZONE PROTECTION FUNDING ACT

Mr. GORE. Mr. President, I would like to discuss the Ozone Protection Funding Act of 1990. This legislation, which I am introducing today, authorizes funds for the purpose of assisting developing nations in their efforts to comply with the Montreal protocol on substances that deplete the ozone layer, including bilateral assistance and the U.S. contribution to an international account established by the parties to the protocol.

I remember quite well, Mr. President, when we ratified the protocol. It is the first and, to date, the most important international agreement protecting the global environment. That

protocol contained a passage endorsed by all here who voted for it which clearly contemplates assistance from the wealthy developed nations of the world to the poorest nations in the process of attempting to develop their economies, in order to help them develop and use substitutes for the chlorofluorocarbons that are responsible for depleting the stratospheric ozone layer.

Mr. President, this problem is, in some ways, difficult to discuss simply because it sounds a little like a science fiction movie. Many people still have difficulty believing that the environment of the entire Earth could be affected by the activities of human civilization. We tend to assume that our activities cannot possibly have any irreparable effect on the Earth itself because the Earth is such a large place.

Mr. President, 500 years ago, most people believed the Earth was flat and they walked ouside and looked at the horizon and the Earth did, indeed, look flat. The new model of a round Earth was based on mathematical calculations: difficult to touch, difficult to understand, and there was, indeed, great resistance to those who urged upon humankind the new realization that the Earth was not flat but was round.

Today when one walks outside and the environment seems all right, there is the temptation to conclude that all this talk about a threat to global environment is nonsense and there is nothing really amiss. But, Mr. President, something is amiss. There has been a dramatic change. First, the population explosion is so dramatic. It took a million years to reach a population of 2 billion people, and yet in the last 40 years, we have gone from 2 to 5 billion and in the next 40 years we will go at least to 10 billion and perhaps to a number higher than that.

Second, the technological and scientific revolution has greatly magnified the ability of each human being on Earth to have an impact on the environment.

Third, we have a very old way of thinking about our relationship to the environment which does not take into account our new collective ability to change the Earth's environment. As an example, Mr. President, the air in this historic Chamber all of us in here now are breathing into our lungs has six times as many chlorine atoms as it did 40 years ago or when this Chamber was built or, for that matter, 3 billion years ago in this particular spot on the surface of the Earth. It is not surprising that in a period of only 40 years, the air everywhere on Earth could be changed so dramatically as to increase the concentration of a basic element—chlorine—by 600 percent at the North Pole, the South Pole, in West Virginia, in Tennessee, in Washington, DC, and Beijing, China—everywhere on Earth? That is because 40 years ago, we began using a new family of chemicals called chlorofluorocarbons. These chemicals were part of the industrial and scientific revolution which has been accelerating throughout this century and burst into a new form after World War II with the cessation of hostilities and the diversion of moneys into the building up of our industrial strength which has had such beneficial effects but which has also had some harmful and deleterious effects for the environment which we are only now beginning to recognize.

That chlorine which we are breathing into our lungs now does not, as far as we know, hurt human health directly. But it is those chlorine atoms in the stratosphere which are responsible for eating away the hole in the ozone layer and thinning the stratospheric ozone layer above Washington, DC, Tennessee, West Virginia, China, everywhere else on the face of this Earth.

I noticed in the newspapers yesterday the reports of the explorers who had just completed their trek across Antarctica. Our colleague from Minnesota, Senator DURENBERGER, has given the Senate regular updates on their journey which I have enjoyed. Upon the conclusion of their journey, they reported on something that was not discussed very much during their trek. They walked under the ozone hole as they were crossing the continent of Antarctica, and they had to wear special protective clothing; they had to keep every part of their skin covered up because the extra ultraviolet radiation striking the surface of the Earth underneath the ozone hole is so dangerous to human health.

One of the explorers accidentally exposed the skin of his face for a few hours during their journey, and he was so burned that he became nauseous for a long period afterward. He required extensive medical attention and did survive—all this because of just a few hours underneath this intense ultraviolet radiation.

Mr. President, the circumstances in Antarctica are so unique that the dangers there during 3 months of the year now exceed the dangers from ozone depletion anywhere else in the world. But it is a clear warning.

Last year another team of scientific explorers came back from the Arctic region of the North Pole with the disturbing and troubling news that now an ozone hole has opened above the North Pole—a smaller one, not as deep as the one above the South Pole, but clearly another warning.

The air above this Capitol building in the stratosphere has thinned; the ozone layer has thinned about 3 to 4 percent over the last few decades. The scientists tell us that if we continue to put these chemicals into the atmosphere, damage to the ozone layer will accelerate.

What will be the consequences? Skin cancer is one of the best known consequences. Indeed, in parts of the world now, those inhabited parts of the world closest to the South Pole, skin cancer rates are climbing dramatically. In fact, in Australia, Mr. President, when the weather report comes on the news each day, they report on the temperature, the barometric pressure, the wind speed, and the levels of ultraviolet radiation.

In Patagonia, in the southernmost part of South America, there has been advice from the Health Ministry of Argentina to the citizens of the southernmost inhabited community of that nation to stay indoors during the 3 months of the year when the ozone layer is thinnest in the Southern Hemisphere, redefining the relationship between men, women, children and the sky.

Do we wish to stand and do nothing as this threat continues to worsen worldwide? Should we pretend the danger is only at the South Pole or the North Pole when we know full well from the evidence presented by the scientists that it is a threat present all over the Earth? I think not.

Mr. President, my religious faith, if I may be indulged for a moment in some personal comments, includes the parable of the unfaithful servant who was left in charge of the master's house and who was told that if the vandals came to ransact the house while he had fallen asleep, that would be no excuse; he would be held accountable nonetheless.

In a manner of speaking, this Earth is the home in which we all live, and in effect it is being ransacked today by the collective actions of all of us using these dangerous chemicals, proceeding in a manner that results in destruction of the global environment. It is insufficient for us to claim that we do not know anything about it; we are asleep; we are not aware of the problem; and therefore it does not matter whether we react to it or not.

What do we tell our grandchildren when they find an Earth very different from the one we inherited from our grandparents? Do they have a right to expect stewardship from us, a level of concern and care for the Earth appropriate to the threat which it now faces? Of course they do. When will we wake up?

The least controversial threat of all is the threat to the stratospheric ozone layer. There are many others: global warming, which I have discussed in this Chamber on many occasions; the destruction of the rain forests; the loss of living species. During the lifetimes of the young pages who work in this Chamber, the scientists

tell us we may see the loss of more than half of all the living creatures God put on this Earth unless we change the pattern of activity which is now leading to their destruction.

But today let me focus on this least controversial issue, that is, the destruction of the stratospheric ozone layer by a family of chemicals just used in the last four decades. We in the United States and in the other nations wealthy enough to have a robust industrial sector have been developing substitutes for these chlorofluorocarbons, and for most of the applications where chlorofluorocarbons are now used, substitutes are becoming available rapidly. We have entered into this international agreement to phase out chlorofluorocarbons as quickly as possible.

What about the developing nations, the poorer nations aspiring to lift their standards of living to some level approximating that enjoyed in the United States of America, nations like India, China, the poorest nations in Africa and Latin America? They agreed to consider joining this global effort to phase out these chemicals if they could look forward to some assistance in introducing the substitutes that are now becoming available in the developed world. We agreed in principle to that kind of assistance.

Then the world entered a follow-up negotiation to put some teeth in the Montreal Protocol, to say to the entire world, "Now we are ready to be serious about solving this problem, we are ready to really put into place the measures to introduce the substitutes." Other nations in the world which have been signatories to the Montreal protocol agreed to accept this principle and to participate in the formation of a development fund that would assist the poorest nations in introducing the substitutes for these harmful technologies.

One Nation, the United States, decided not to go along. Did our Environmental Protection Agency take that position? No, of course not. The Environmental Protection Agency knows full well how serious this crisis is. They advised the President, of course, to join this fund, and to follow through on the commitments we made in the Montreal Protocol.

What about the State Department? Of course, the State Department advised the President, yes, we must join this fund, and take the responsible actions to save the Earth's environment.

Then why would the President reject the advice of the Environmental Protection Agency and the State Department, the two parts of his administration most directly involved with the issue at stake here? Because Mr. John Sununu in the White House said the ideology is more important than saving the Earth's environment, that ideology should guide this decision, and the President, unfortunately, decided to reject the advice of the environmental policymakers in his administration, to reject the advice of the State Department, and adopt a "Go-it-alone; What, me worry?" policy on the environment. It is a mistake, Mr. President, a very serious mistake.

This policy will, I hope, be ultimately reversed. It is so wrong. It really has to be reversed, but a great deal of damage can be done between now and the time the President finally wakes up and reverses this policy. As a result, I am introducing legislation today to have the Congress of the United States take the initiative where the President of the United States has refused to do so.

I am proud to be joined in this effort by my good friend and colleague from Rhode Island, the chairman of the Foreign Relations Committee, Senator PELL; by the distinguished majority leader, my friend, Senator MITCHELL; by my friend, the chairman of the Foreign Operations Subcommittee of the Appropriations Committee, which appropriates the money in this case, Senator LEAHY; by my friend from Colorado, and my colleague and partner in so many efforts to protect our environment, Senator WIRTH; by my friend from Massachusetts, who has also been an invaluable ally in efforts to protect the global environment, Senator KERRY; by my friend from Montana, who has been an outstanding leader in this policy area, Senator BAUCUS; by my friend from Delaware, long active in this field, Senator BIDEN; by my friend from Washington, who has expressed his concern and been active on the issue, Senator ADAMS; by my friend from California, Senator CRANSTON, who has provided distinguished leadership in this area; by my friend from Arkansas, who has brought effectiveness and eloquence to this issue from the early days of this concern, Senator BUMPERS.

Mr. President, earlier this month, along with many of my colleagues, I heard the news that President Bush had decided to go it alone and put forward a policy in direct opposition to what every other nation in the world was doing on this issue, and I sent a letter to the President which was cosigned by 11 of my colleagues. At the conclusion of my statement, I will ask unanimous consent to put that letter into the RECORD.

But let me just paint the picture. The negotiations were in Geneva at the time. They were putting the final touches on this new agreement. Then the news was delivered by our negotiators that shocked the world community. The entire conference broke down. There was an uproar. Every single speaker from that point forward in this international negotiation concentrated exclusively on trying to figure out what in the world was going on in the minds of the President and his principal advisers on this subject, Mr. Sununu and Mr. Richard Darman of the Office of Management and Budget, that they would override the EPA and the State Department.

It was such a serious mistake. There is still a great deal of puzzlement around the world as to why we would have originally signed the Montreal protocol if the President was not prepared to go through with it and to live up to it at a time when the threat is so evident. It really is a very puzzling development. And, of course, it is a diplomatic embarrassment brought to us by the "floppy hats and sunglasses" gang within this administration. It is an embarrassment, and something, which as I have said earlier, I hope that we will soon change.

So, Mr. President, I believe it is high time for this administration to change its policy, stop the foot dragging, and begin to offer some leadership instead.

I would like to accompany the legislation with a series of statements from leading publications in this country: Time magazine, which entitled its analysis of this issue "A Baffling Ozone Policy"; the New York Times, which entitled its editorial opinion "Overboard on Ozone"; the Washington Post, which entitled its editorial opinion "A Serious Mistake on CFCs"; and lengthy business analysis entitled "Pennywise on Ozone?"; the editorial from the Chattanooga Times entitled "Backsliding on the Environment", and then the text of the letter to which I referred earlier, which has been signed by most of the cosponsors that I mentioned, and in addition Senator JOE LIEBERMAN of Connecticut; the Senator from New Jersey [Mr. LAUTENBERG]; and the other Senator from New Jersey [Mr. BRADLEY]. I ask unanimous consent to print those documents in the RECORD, as well as the full text of the bill.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

S. 2666

*Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Ozone Protection Funding Act of 1990."

SEC. 2. FINDINGS.

The Congress finds that—

(1) the depletion of the stratospheric ozone layer by manmade chemicals is a global phenomenon, whose solution will require national action and international cooperation;

(2) while stratospheric ozone depletion has had its most pronounced effects in polar regions, depletion is occurring worldwide, with current levels over the United States already reduced by about 2 percent to 3 percent;

(3) a depleted ozone layer will allow more ultraviolet-B radiation to reach the Earth's surface, with serious health implications for

all peoples, as well as deleterious effects on agricultural crops and natural ecosystems;

(4) in order to terminate emissions of chlorofluorocarbons and other ozone-depleting substances as rapidly as possible, the highest priority must be given to developing and deploying safe alternative chemicals and technologies worldwide, to replace ozone-depleting substances;

(5) many developing nations that have not signed the Montreal Protocol on Substances that Deplete the Ozone Layer are now acquiring inefficient, chlorofluorocarbon-based refrigeration equipment, which could lead to large increases in emissions of ozone-depleting chemicals in the coming decades;

(6) in order to assist developing nations in acquiring non-ozone depleting chemicals and technologies, the Parties to the Montreal Protocol agreed in principle to provide special funding for that purpose; and

(7) the United States' share of that assistance has been determined during recent negotiations to be a minimum of $25 million over the next three years, with a possible increase to $75 million over the next three years if the remaining nations that have not ratified the Montreal Protocol do so.

SEC. 3. OBJECTIVE AND NATIONAL GOAL.

(a) The objective of this Act is to protect human health and natural ecosystems from all known and potential dangers due to depletion of the stratospheric ozone layer, which is or would be caused by emissions of chlorofluorocarbons, halons, or other ozone-depleting chemicals.

(b) In order to achieve the objective of this Act, it is the national goal to provide a United States contribution to an international account established by the Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer, for the purpose of assisting developing nations in their efforts to comply with the provisions of the Protocol.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Department of State up to $25 million in each of Fiscal Year 1991, Fiscal Year 1992, and Fiscal Year 1993, for the purpose of assisting developing nations in their efforts to comply with the provisions of the Montreal Protocol on Substances that Deplete the Ozone Layer, including bilateral assistance and the United States contribution to an international account established by the parties to the Protocol.

---

U.S. SENATE,
*Washington, DC, May 9, 1990.*

The PRESIDENT,
*The White House, Washington, DC.*

DEAR MR. PRESIDENT: We are writing to request a meeting with you at the earliest possible date to discuss your recent decision to oppose efforts to strengthen the Montreal Protocol. We are deeply disappointed in your decision and gravely concerned about its implications for the United States and for all of the nations of the world. We strongly believe this decision should be reversed immediately so that the Geneva negotiations may produce meaningful new agreements.

By refusing to support an international effort to help developing nations move toward environmentally safe technologies, the United States is threatening to undermine the Montreal Protocol, the single most important international agreement to date to protect the world's environment. At a time when the United States should be providing leadership in the world community, it is instead being isolated within a world community that recognizes an urgent problem and the critical need for action.

We are concerned that advice from the Environmental Protection Agency and the Department of State is being ignored and, in fact a course opposite to their recommendations is being pursued by our negotiators. It is unconscionable to us that U.S. negotiators would be instructed to reject a provision calling the industrialized nations of the world to provide minimal sums for technology conversion to developing nations who want to comply with the Protocol. Serious questions remain about our policy in light of this action.

The negotiations underway in Geneva are critical to the massive international effort to reduce emissions of ozone-depleting chemicals—an effort prompted by hard, scientific evidence that if we reduce emissions of these chemicals we can protect the ozone layer which shields all life on earth from dangerous ultraviolet radiation.

Here in the U.S. Senate, we acted to strengthen our laws to reduce the use and emissions of these chemicals: we called for the faster phase-out of ozone-destroying chemicals, we called on the federal government to develop a plan to promote the safest alternatives, and we called for the immediate prohibition on the export of technologies that produce these chemicals. We believe that U.S. companies could be in a position to develop alternatives, and to lead the world to post-CFC technologies. This would not only be a great benefit for the environment, but also for U.S. competitiveness in world markets.

Immediate action is needed to change the direction of Administration policy on these issues. We look forward to discussing these matters with you further as soon as possible.

Sincerely,

Al Gore, Alan Cranston, Patrick J. Leahy, John F. Kerry, Joseph Lieberman, Max Baucus, Claiborne Pell, Joseph R. Biden, Jr., Frank R. Lautenberg, Timothy E. Wirth, Brock Adams, Bill Bradley.

---

[From time magazine, May 21, 1990]

A BAFFLING OZONE POLICY

George Bush has come under heavy fire for failing to live up to his promise to be the Environmental President. Last month, he infuriated environmentalists by arguing that action against the threat of global warming should wait for more research. The man behind that go-slow position was John Sununu. An announcement by the U.S. delegate to a United Nations meeting in Geneva last week came as a further shock: the U.S. will oppose the creation of a new $100 million fund to help developing countries avoid using chlorofluorocarbons.

CFCs, used as refrigerants and solvents, are believed to be destroying the planet's ozone layer, and President Bush has joined in a worldwide call for sharp cut in their use. But by refusing to supply additional funds to help Third World countries switch to substitutes, the U.S. would make reductions difficult. The White House argues that the money should come from existing World Bank funds and not from new contributions—but also admits that the World Bank does not have the extra money available.

At least there is some legitimate controversy over the science of global warming. There is virtualy none when it comes to ozone depletion. So why is the U.S. balking, when the country's share would amount to no more than $25 million over the next three years? Sununu and Budget Director Richard Darman contend that the economic costs of protection the environment have been overlooked. They fear the precedent of turning money over to international bodies that may try to dictate how countries, including the U.S., respond to environmental problems.

Even with Sununu's and Darman's influence, such stances may in the end prove to be unsustainable. Predicts, Senator Albert Gore of Tennessee: "If the Administration persists in its position, eventually it will be so isolated and so embarrassed that the President will have to reverse himself." Thus Bush's campaign pledge would be fulfilled, but against the President's will.

---

[From the New York Times, May 11, 1990]

OVERBOARD ON OZONE

Every President needs a Darth Vader in the White House to thwart special pleaders and scrutinize even apply-pie issues. President Bush's chief of staff, John Sununu, and Budget Director, Richard Darman, have played this role zestfully in curbing what they see as excessive solicitude for the environment. But in their latest foray, an assault on the international effort to protect the ozone layer, they have simply abandoned all sense of proportion and judgment.

The U.S. persuaded the world to reach agreement on phasing out production of CFC's, a class of industrial chemicals that destroy the life-protecting layer of ozone in the upper atmosphere. Many developing countries that signed the Montreal protocol of 1987 asked for help in converting to the most costly substitutes, and Washington agreed in principle to provide it.

An international group in Geneva has been working out the details, and proposed setting up a fund to which the U.S. would contribute around $20 million a year. The State Department and Environmental Protection Agency urged the Administration to support the proposal. But Mr. Darman and Mr. Sununu have now instructed that it be opposed.

There is only one ozone layer, and there are a lot of people in India and China. It's in America's own interest for these and other developing economies to abandon CFC's as soon as possible. If the price tag is only $20 million, it is bargain, particularly as the Treasury is reaping windfall profit taxes of $5 billion from the CFC industry as it phases down.

The considerable damage already done to the ozone layer has been caused by CFC's manufactured in the United States. It's not too much to ask that Americans help less-developed countries avoid the same error.

Every speaker from other countries at the Geneva conference expressed dismay at the U.S. stand. It's glorious to stand along against the world when one is right, less so to cling to a position that puts the U.S. in the doghouse of world opinion.

Mr. Sununu and Mr. Darman are said to fear that modest help on CFC's now would lead to greater demands later if the world agrees to take action against the gases of global warming. But that's an issue for the future, to be dealt with on its merits. The threat to the ozone layer, and all living things on the planet, is present and real.

A Secretary of the Interior in the Reagan Administration once suggested that the way to solve the ozone problem was to continue producing CFC's but let people buy sunglasses and sunscreen lotion to protect

against the bath of ultraviolet rays. Mr. Bush risks gaining a reputation for equal profundity unless he quickly instructs Messrs. Darman and Sununu to quit trifling with serious issues.

---

[From the Washington Post, May 11, 1990]

A SERIOUS MISTAKE ON CFC'S

This time President Bush has made a serious mistake in his environmental policy. He has suddenly pulled the United States out of the international plan, which it had supported until this week, to cut Third World production of the highly damaging gases known as CFCs. The rich countries had an agreement—or thought they had one—to put up a modest amount of aid to help poor countries convert their manufacturing from CFCs to less-harmful alternatives. CFCs generated on the other side of the Earth are a threat to the health of Americans. You have to wonder what's going on in the White House.

Mr. Bush was right earlier this year when he refused to lead a massive campaign against global warming. Some environmentalists are pressing for a hugely expensive and disruptive attempt to reduce emissions of carbon dioxide. But, as Mr. Bush said, the scientific evidence is far from adequate to support that. The administration sensibly proposed, instead, to go after those gases that are demonstrably dangerous for other reasons and which, by the way, would also contribute to global warming. The secretary of state, James A. Baker, laid out that policy in an excellent speech last February and, in fact, used CFCs as the leading example.

CFCs—chlorofluorocarbons—are widely used in refrigeration, air conditioning and the production of some plastics. When they escape into the upper atmosphere, they eat away at the high ozone layer, which protects the planet from radiation that causes skin cancer. A huge hole in the ozone layer has already appeared over Antarctica, and it is urgent to prevent it from widening farther. There is no scientific doubt at all about this one. The chemical industry is stoutly supporting the elimination of CFCs and is developing alternatives to replace them.

As for the money involved, the American contribution to the CFC aid fund would be $25 million over three years. That is less than 1 percent of the money raised by the tax imposed on CFC production in this country to speed up its disappearance. The extreme feebleness of the White House's defense of this new position on CFCs lends credence to the suspicions that it is based less on careful thought than on a visceral dislike of the environmental movement among some of the White House aides—notably, John H. Sununu, the chief of staff.

Immediately after the White House announced this decision, 12 Republican senators, led by John H. Chafee of Rhode Island, sent Mr. Bush a letter warning him that it's a classic case of being penny-wise and pound-foolish. The aid fund, they told him, is the world's best chance of getting the developing countries to join the industrial ones in preserving the ozone layer that shields us all. The Republican senators—Mr. Bush's friends and supporters—urged him to reverse himself. It's good advice.

---

[From the New York Times, May 16, 1990]

ECONOMIC SCENE: PENNY WISE ON OZONE?

(By Peter Passell)

It was time to ante up last week on the latest global deal to save the ozone layer, and the Bush Administration decided not to play: The White House announced it would not share the cost of weaning poor countries from the use of ozone-depleting chemicals before they became truly addicted. Subsidies to encourage the substitution of nonpolluting gases in air-conditioners, refrigerators and plastic insulation, the Administration suggested, would have to come from the existing resources of the World Bank.

This decision may not have surprised hard-line "greens" who have always interpreted President Bush's efforts to find a middle road to environmental virtue as a rationale for pollution as usual. But it bewildered political operatives who viewed American leadership on ozone as an easy way for the President to win points with the folks who reach for their checkbooks whenever they see a picture of a baby seal. Perhaps most important, it confounded policy analysts within the Administration who are eager to apply economic principles to pollution control and thought they had an ally in the White House.

Chlorofluorocarbons—CFC's for short—are cheap, nontoxic gases that are almost perfect as refrigerants and aerosols. Once released, however, they wreak havoc on the layer of ozone in the upper atmosphere that absorbs much of the ultraviolet radiation from sunlight. Most experts believe that a failure to control the production of CFC's and a few related chemicals would lead to dramatic increases in skin cancer and eye cataracts, as well as disrupting plant life at the base of the aquatic food chain.

According to the Environmental Protection Agency, the projected loss of ozone would lead to an extra 170 million cases of cancer by the year 2075 within the United States alone. The estimated cost in medical bills and premature mortality: $3.5 trillion. That is no misprint: $3.5 trillion.

Happily, though, an ozone fix would be relatively cheap. The E.P.A. estimates that a 50 percent cut in CFC production would eliminate about 95 percent of the damage. And the cost of the switch to less damaging chemicals would run to less than $40 billion. Or perhaps much less: Stephen DeCanio, an economist at the University of California at Santa Barbara, believes that cheaper, more efficient substitutes for CFC's now in the technological pipeline would reduce the cost to about $3 billion.

That is why the Reagan Administration signed onto the Montreal Protocol in 1987, agreeing to cut CFC use in half by the year 2000. Congress later put teeth into the decision, imposing a tax on CFC's that will encourage recycling and substitution, as well as collecting some $5 billion over the next five years. And this year President Bush went a step further, responding to new evidence of accelerating deterioration of the ozone layer by agreeing in principle to a complete phaseout of CFC's.

While the industrialized countries all seem prepared to bear the domestic costs of a rapid phaseout of CFC's, two larger potential users, China and India, do not. And their failure to go along would undercut the logic of a global agreement. China alone, Mr. DeCanio notes, plans to produce some 300 million refrigerators over the next few decades.

Consequently, northern Europe has been lobbying hard for a fund to subsidize the transfer of benign refrigeration technologies to the have-nots. And since Washington was asking Americans to spend billions of dollars to rid the country of CFC's, analysts widely assumed the Bush Administration would view its 20 percent slice of a $100 million-a-year carrot as a minuscule price to pay for broad compliance. But something happened to the Administration's position on the way to the latest global forum.

The least implausible explanation for Mr. Bush's tough line is that he fears the precedent. The $20 million token may be enough to convince the poorest third of the world to forgo CFC's. But delivery might lead to demands for a hundred times that much to require the use of fossil fuels that are implicated in global warming. Better, then, to rely on the stick rather than the carrot: The Administration wants to make CFC Treaty compliance a condition for receiving loans from the World Bank.

But even many of the Administration's friends believe the President's advisers are worrying about the wrong precedent. Since Mr. Bush took office, his economists have been urging caution before continuing big bucks to solving poorly understood environmental problems. By failing to act decisively when action plainly does make economic sense, the President is in danger of losing the initiative to those who care not a whit about costs.

---

[From the Chattanooga Times]

BACKSLIDING ON THE ENVIRONMENT

The Bush administration has taken the misguided position of reneging on a commitment to help developing nations phase out their use of chemicals that are destroying the Earth's protective ozone shield. This is hardly the work of an "environmental president."

Stratospheric ozones filters out excessive ultraviolet radiation from the sun, which can cause skin cancer, eye disease and damage to crops and wildlife. The primary culprits in the layer's disintegration are chlorofluorocarbons, commonly known as CFCs.

The Montreal Protocol of 1987 calls for a 50 percent cut in production and use of CFCs by 1999. And there is general agreement that meeting that goal should merely be a step toward eliminating these chemicals, widely used as refrigerants and solvents and for insulation foam.

But many of the developing countries that signed the Montreal Protocol did so with the understanding that the United States and other developed nations would help them make the transition to the more expensive substitutes for CFCs. The United States agreed in principle then to provide that assistance. Two months ago the United States agreed with other industrial nations to establish a new fund for financial and technical assistance to stop the use of CFCs in the developing world. Now the Bush administration opposes such a fund.

Ironically, the new U.S. position was made public as representatives of about 50 nations met in Geneva to prepare for a U.N. conference on strengthening the Montreal Protocol. The Bush policy was much discussed in Geneva, and it is not surprising that it was universally denounced.

A member of the Brazilian delegation noted that the ability of developing nations to adhere to the Montreal Protocol "depends on the political will of our partners in the developed world." And India and China, with their massive populations, have refused to sign the protocol absent assurances of financial assistance. So the Bush administration's position both dims the prospect of strengthening the treaty and makes it less

likely that the full promise of the existing protocol will be realized.

There is simply no good reason for Mr. Bush's backsliding. The U.S. contribution to the assistance fund would be only $20 million a year and could easily be paid from the $5 billion in excise taxes the government will collect from the CFC industry over the next five years. Moreover, it is appropriate that the United States, a major producer of the CFCs that have damaged the ozone layer, should help our poorer neighbors find a better way.

But there seems to be developing in the administration a hostility to international cooperation on environmental issues. There was, for instance, the U.S. effort at the recent conference on global warming to dampen enthusiasm for action on that issue. And in a recent speech, budget director Richard Darman raised the specter of environmentalism as a mask for political ideologies that represent a threat to American values. His attempt to impute sinister motives to those who call for global cooperation on solving global environmental problems should be repudiated by the president.

And it should be remembered that while blame for retrenchment on environmental issues is often laid at the doorstep of Mr. Darman or White House Chief of Staff John Sununu, George Bush is the president. What his administration does is his policy. Mr. Bush should acknowledge the wrongheadedness of the recent policy change on the CFC assistance fund and reverse it.

Mr. GORE. Thank you, Mr. President.

Mr. President, again on another occasion, I will take the floor with my colleagues who were members of the host delegation to the Interparliamentary Conference on the Global Environment for a full presentation of the recommendations and findings of that conference.

One of those findings addressed this issue I have spoken about this morning, and was fully consistent with the legislation that I am introducing today, and I commend this legislation to my colleagues.

I note that 12 of our colleagues on the Republican side of the aisle sent a separate letter to President Bush very similar to the one that 12 of us on this side of the aisle sent, urging the President to change his policy on protecting the ozone layer.

So it really is a bipartisan concern, and one which I hope the President will respond to.

Mr. PELL. Mr. President, today I join Senator GORE in introducing a bill which authorizes U.S. contributions to an international fund to help developing nations avoid dependency on the use of chlorofluorocarbons or CFC's. This bill is urgently needed.

In 1987, 23 nations, the European Community, and the United States, took a remarkable step in the history of international efforts to protect the global environment by negotiating the "Montreal Protocol on Substances That Deplete the Ozone Layer." This ground-breaking agreement committed signatories to reducing their emissions of CFC's by 50 percent by the year 1999.

Equally important, the signatories recognized that protection of the ozone layer would require a global effort and that for this effort to be effective, developed nations would need to provide assistance to developing nations to help them use substitutes for CFC's.

Unfortunately, 2 weeks ago, the Bush administration reneged on this commitment by opposing the creation of an international fund expressly for this purpose. This shortsighted decision made a mockery of administration claims to leadership on international environmental issues.

For $25 million over 3 years, the administration could have supported a fund that, by preserving the stratospheric ozone layer, could save thousands of lives over the next decade from the ravages of skin cancer and help prevent global climate change. Put another way, the administration has decided that the health of thousands of American citizens is not worth the $8 million annual contribution the United States would have made to the proposed CFC fund.

Not only does the administration's decision ignore the interests of the American people, it also undermines policy commitments most recently by Secretary of State Baker in a speech to the National Governors Association. In that speech, he noted:

> We fully recognize, however, that developing countries may need some additional aid in order to meet the incremental costs associated with fulfilling their international environmental obligations.

Mr. President, I for one support U.S. participation in the creation of a CFC fund. This fund is one of the best investments that we as a nation can make to protect the health of our people and the environment of our planet.

I would hope that in the few weeks prior to the next meeting of the parties to the Montreal protocol, the administration will also come around to support increased aid for creation of a CFC fund. This step would send a reassuring signal to our diplomatic partners and to the developing nations that the United States is serious about its commitments stemming from the Montreal protocol. In order for this policy reversal to take place, I believe it is essential that Secretary of State Baker reassert the State Department's role in formulating U.S. international environmental diplomacy; decisions on these issues should be made by the Secretary of State and not the White House Chief of Staff.

Mr. President, the bill we are introducing today underscores the U.S. commitment to protecting the global environment. I commend it to my colleagues and urge their support.

By Mr. KENNEDY:

S. 2667. A bill to establish a National Needs Trust Fund to invest the peace dividend in the future of America; to the Committee on Labor and Human Resources.

NATIONAL NEEDS TRUST FUND

● Mr. KENNEDY. Mr. President, today I am introducing legislation to encourage the Nation to invest in the future and meet the essential domestic challenges facing us. Dramatic changes in the Soviet Union and Eastern Europe have substantially reduced our defense needs. A major national debate is now underway to determine the size of the peace dividend and how to make effective use of the savings.

The most appropriate baseline to measure the size of the peace dividend is the savings in military spending above and beyond the budget request of the Bush administration. In effect, the President's request ignored the opening of the Berlin Wall and the far-reaching changes that have taken place in Eastern Europe and the Soviet Union. The administration proposed a 5-year plan for military expenditures in fiscal years 1991 through 1995 that simply reflected the gradually declining path of defense spending that we have been following ever since the peak of the Reagan military buildup in 1985.

In all likelihood, the actual size of the peace dividend, at least for the next fiscal year, will be determined by the outcome of the current budget summit. But the House of Representatives has already adopted a budget resolution that gives us a realistic estimate of the savings that can be achieved in Pentagon spending. The House-passed resolution proposes the following peace dividends, measured in terms of budget authority:

| Fiscal year: | *Amount in billions* |
|---|---|
| 1991 | $24 |
| 1992 | 32 |
| 1993 | 43 |
| 1994 | 52 |
| 1995 | 60 |
| Total 5 years peace dividend | 211 |

These savings, averaging over $40 billion a year for the next 5 years, are large by any standard—except when measured against the magnitude of the unmet challenges we face. But if we invest these peace dividends wisely now and in the years ahead, we can make a sizable start in addressing these challenges, reviving our economy, and revitalizing our country.

In my view, because these domestic needs are so great, we should not use the peace dividend to reduce the deficit, as some have suggested. The Gramm-Rudman deficit reduction process has been on track in recent years, and it is still on track today, requiring us to balance the Federal budget by the mid-1990's.

We can reach that deficit target as planned, without dipping into the peace dividend or jeopardizing the unusual opportunity we now have to invest in long-neglected vital needs. Essential domestic programs, shortchanged to finance defense, should not be depleted further as part of any plan to resolve the current budget crisis or bail ourselves out of the massive savings and loan mess.

That does not mean I oppose any or all domestic spending cuts. We need to reduce nonessential spending wherever possible, and I have supported such cuts in the past. But we also need to devote significant new resources to meet essential domestic needs.

With our standard of living now only sixth in the world, our highest budget priority should be rebuilding our economy and investing in fundamentals that have long been ignored—from education and health care to research and transportation. These priorities all paid the price for the steep military buildup of the past decade. Now, because of the peace dividend, we have a once-in-a-lifetime opportunity to address these priorities properly, and we must not throw it away.

At the same time, the arrival of the peace dividend must not become an excuse for the needless proliferation of old spending programs or the random invention of new programs. The peace dividend is there to be invested, not just spent.

To avoid the danger that Congress and the administration will yield to special interest pleading and fritter away the peace dividend on pork barrel spending, the legislation I am introducing today creates a National Needs Trust Fund. Savings from the military budget will be invested through the trust fund in designated, critical national priorities—such as education, health care, research and development, job training, reviving our faltering transportation system, and other critical parts of our infrastructure, and converting military plants to peacetime production. Investments such as these are essential to our future, and we cannot afford to neglect them any longer.

In spending the peace dividend, we must judge both current and new programs by their actual performance, not just our good intentions. The returns must be measurable and real. Conditioning programs on results is critical to gathering public support for such spending. The peace dividend can become a way to start solving our problems, as distinct from merely throwing money at them.

We must start with the education of very young children, because our future depends on their generation. Head Start must be made available to 100 percent of eligible children, instead of the shameful 20 percent who are now served. We must encourage States and local governments to provide access to child care, and to begin education programs for all young children. Each dollar we invest in early childhood education now will save $6 in the future in lower costs for welfare, unemployment, and crime.

We must break the downward spiral of student dropouts and academic failure, by restructuring our school systems and investing in the hardest pressed schools of our communities. We must enhance the status of teaching, to keep good teachers in the classroom and attract new ones to the profession. We must provide more support for math and science instruction and for antidrug education. We must ensure that no students anywhere in the Nation are denied a college education because their families cannot afford it. Above all, we must stop investing in star wars and start investing in star schools.

In health care, it is an American disgrace that 37 million citizens have no insurance at all. It is an American tragedy that millions of severely disabled senior citizens are struggling to survive in their own homes or their children's homes, because decent home care and long-term nursing care are neither available nor affordable. It is an American scandal that we are unwilling to help three-quarters of the drug addicts who seek treatment and cannot get it—and that we refuse to face up to the epidemic of AIDS that is forcing the health care system to the brink of collapse.

We must deal with the challenge of economic conversion—an unparalleled opportunity to turn the talents of our most highly skilled citizens to serve the Nation's highest interests. Engineers and contractors who once built rockets and tanks can now build the bridges, airports, and rapid rail and telecommunications systems that will be the heart of our 21st-century economy. Scientists in no-longer-needed defense labs can craft solutions to the massive new needs to clean up the environment, and create safe—and nonnuclear—energy sources.

Economic conversion is more than adjustment assistance to displaced workers and disrupted communities. It is also the liberation of talent and treasure to revitalize our free enterprise system—and assure that America never becomes an economic colony of Germany or Japan.

Perhaps most of all, we must use the peace dividend to encourage opportunities for community service by all citizens, not just those who have wealth. Our goal is nothing less than to reinspire the youth of America to make service to others a part of our future. A quarter century ago, President Kennedy summoned all citizens to ask what they could do for their country. Americans responded by the millions, and together we built the strongest nation and the strongest economy in the world.

We lost sight of that goal in the medecade of the 1980's. But citizens across the country can help us find it again. Service to others—to the community and the Nation—is an idea as old as America, but it still symbolizes America at its best. It was the spirit of the first frontier and of the new frontier—and with our involvement and commitment, it will be the spirit of the next frontier as well.

Investing in America is sound social policy—and sound economics too. Missiles built to be launched across the frontiers of other nations can now be replaced with master teachers and microbiologists pushing back the frontiers of knowledge.

As the areas of old and dangerous confrontations with the Soviet Union continue to decline, we can open new and more hopeful confrontations with our own economic future. We need to regain the vigor and economic leadership of our own Nation, which did so much and spent so much to restore the freedom of so many others. We must begin to wage new battles—for our own people, for our own ideals and best ambitions. It is the right and only thing to do.

There is a famous saying in American history that "God looks after fools, drunkards, and the United States of America." Now, because of the peace dividend, we have a fresh chance—a chance to make up for the proliferation, waste, and neglect of the past decades.

The peace dividend is an unexpected nest egg for the Nation. We cannot afford to waste it, any more than a typical family would gamble away their life savings. The windfall from the collapse of communism should be invested wisely, in ways well-designed to meet the challenge of rebuilding our economy and country. Let us hope that we are equal to this unprecedented challenge and opportunity.

Mr. President, I ask unanimous consent that a table illustrating the calculation of the peace dividend and the text of the legislation may be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2667

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as "The National Needs Trust Fund Act of 1990".

SEC. 2. FINDINGS.

The Congress finds that—

(1) recent developments have significantly reduced tensions between the United States and the Soviet Union;

(2) as a result of the reduction of tensions, fewer funds need to be devoted by both countries to military expenditures;

(3) the reduction in military spending by the United States is a peace dividend that should be available to meet urgent domestic priorities; and

(4) funds attributable to the peace dividend should be placed in a National Needs Trust Fund and invested in areas most likely to strengthen the competitive position of the United States in the international economy.

SEC. 3. NATIONAL TRUST FUND.

(a) ESTABLISHMENT.—There is established within the Treasury of the United States a National Needs Trust Fund (hereafter in this Act referred to as the "Trust Fund"), consisting of such amounts as are appropriated to the Trust Fund under subsection (e).

(b) EXPENDITURE OF FUNDS.—(1) Amounts in the Trust Fund shall be available, as provided in appropriations Acts, to support any authorized Federal program in any or all of the following areas:

(A) early childhood education or development;

(B) elementary, secondary and higher education;

(C) job training, job retraining, and conversion of the economy from a Cold War economy to a peacetime economy;

(D) basic research and development;

(E) communications and transportation infrastructure;

(F) health care; and

(G) such other fundamental investments as Congress may determine are necessary to strengthen the economic and competitive position of the United States and to build a stronger future for the Nation.

(2)(A) Amounts in the Trust Fund shall be available only to supplement and not supplant Federal, State, and local expenditures in the areas described in paragraph (1).

(B) For the purposes of subparagraph (a), expenditures from the Trust Fund shall not be taken into consideration in determining Federal, State, and local expenditures in the areas described in paragraph (1).

(c) MANAGEMENT.—The Trust Fund shall be managed in the same manner as trust funds are managed under section 9602 of the Internal Revenue Code of 1986.

(d) EVALUATION AND REPORT.—In fiscal year 1991 and every 2 fiscal years thereafter, the Congressional Budget Office shall evaluate the impact of expenditures from the Trust Fund, and shall submit a report to the Congress on such evaluation.

(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated $24,000,000,000 for fiscal year 1991, $32,000,000,000 for fiscal year 1992, $43,000,000,000 for fiscal year 1993, $52,000,000,000 for fiscal year 1994, and $60,000,000,000 for fiscal year 1995 to carry out the provisions of this Act.

---

DEFENSE SPENDING—Budget Authority

By Mr. MITCHELL.

S. 2668. A bill to amend the Internal Revenue Code of 1986 to exempt certain transportation by ferry from the tax imposed on transportation by water; to the Committee on Finance.

EXEMPTION OF TAXATION ON CERTAIN FERRY TRANSPORTATION

Mr. MITCHELL. Mr. President, I am introducing legislation today to address a problem that has arisen with a provision in the Omnibus Reconciliation Act of 1989 that imposes a $3 departure tax on ship passengers. That provision originated in the Senate Commerce Committee and was intended to apply to passengers on cruise ships and gambling voyages. The language of the statute is vague, however, and the Internal Revenue Service is concluding in soon to be released rules, that the tax will apply to a much broader class of passenger ship traffic, including ferry services that operate between Maine and Nova Scotia.

The two ferry services carry trucks, cars and passengers in on an 11 hour trip between Portland and Bar Harbor, ME and Yarmouth, NS. Because the Portland vessel leaves in the evening for an 11 hour voyage that extends past midnight, it is most probably subject to the departure tax because it "extends over 1 or more nights". The Bar Harbor ferry leaves in the morning and arrives within the day but there is incidental gambling on board which brings it within statutory language that applies the departure tax in the case of vessels "transporting passengers engaged in gambling".

It is my understanding that the Commerce Committee did not intend to apply this new departure tax to these types of ferry operations. The tax was instead meant to apply to cruise ships and gambling ships. Nevertheless, the IRS will be giving a reasonable interpretation to the statutory language when it applies the tax to the ferry operations in Maine. A similar vessel operating between Seattle, WA and Victoria, will also be subject to the tax.

The legislation I am introducing today corrects this problem by exempting voyages on ferrys from the departure tax. The definition of "ferry" is picked up from 19 U.S.C. 58 the Customs user fee established in 1985 legislation. Paragraph C of that section exempts "ferrys" from the Customs fee and this legislation would do the same with respect to the international depature tax on ship passengers.

This legislation is not intended to give a special break to a certain class of passenger ships. It is instead intended to permit the IRS to carry out the objectives of the statute: to tax cruise ships and gambling ships, not ferry boats.

Mr. President, I ask unanimous consent that a copy of the introduced legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2668

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. TRANSPORTATION BY WATER.

(a) IN GENERAL.—Section 4472(1) of the Internal Revenue Code of 1986 (relating to definitions of covered voyage) is amended by adding at the end the following new subparagraph:

"(C) EXCEPTION FOR CERTAIN FERRIES.—The term "covered voyage" shall not include a voyage on a ferry being used—

"(i) to provide transportation only between places that are no more than 300 miles apart, and

"(ii) to transport only—

"(I) passengers, or

"(II) vehicles, or railroad cars, which are being used, or have been used, in transporting passengers or goods.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect as if included in the amendments made by section 7504 of the Revenue Reconciliation Act of 1989.

---

By Mr. JOHNSTON (by request):

S. 2669. A bill to provide for increases in appropriation ceilings for land acquisition and development in certain units of the National Park System, and for other purposes; to the Committee on Energy and Natural Resources.

INCREASING APPROPRIATION CEILINGS FOR CERTAIN UNITS OF THE NATIONAL PARK SYSTEM

● Mr. JOHNSTON. Mr. President, I am introducing today at the request of the Department of the Interior a bill to provide for increases in appropriation ceilings for land acquisition and development in certain units of the National Park System, and for other purposes.

I ask unanimous consent that the bill, a section-by-section analysis, executive communication which accompanied the proposal from the Department of the Interior be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2669

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. ACQUISITION CEILING INCREASES.

The limitations on appropriations for the acquisition of lands and interests therein within units of the National Park System contained in the following Acts are amended as follows:

(a) Channel Islands National Park, California: section 208 of the Act of March 15, 1980 (94 Stat. 77) is amended by striking out "$30,100,000" and inserting in lieu thereof "$48,940,000";

(b) Chesapeake and Ohio Canal National Historical Park, Maryland and District of Columbia: section 8(b) of the Act of January 8, 1971 (84 Stat. 1980) is amended by

striking out "$28,400,000" and inserting in lieu thereof "$34,740,226"; and

(c) Cumberland Island National Seashore, Georgia: section 10 of the Act of October 23, 1972 (86 Stat. 1068) is amended by striking out "$28,500,000" and inserting in lieu thereof "$36,079,500".

SEC. 2. DEVELOPMENT CEILING INCREASES.

The limitations on appropriations for development of units of the National Park System contained in the following Acts are amended as follows:

(a) Cuyahoga Valley National Recreation Area, Ohio: section 6(b) of the Act of December 27, 1974 (88 Stat. 1788) is amended by striking out "$13,000,000" and inserting in lieu thereof "$22,223,000"; and

(b) Kalaupapa National Historical Park, Hawaii: section 110 of the Act of December 22, 1980 (94 Stat. 3324) is amended by striking out "$1,000,000" and inserting in lieu thereof "$4,190,000".

---

SECTION-BY-SECTION ANALYSIS

Section 1. Acquisition ceiling increases. Amends statutory limitations on appropriations for land acquisition in following National Park System areas:

(a) Channel Islands National Park, CA: from $30,100,000 to $48,940,000;

(b) Chesapeake and Ohio Canal National Historical Park, MD-DC: from $28,400,000 to $34,740,226; and

(c) Cumberland Island National Seashore, GA: from $28,500,000 to $36,079,500.

Section 2. Development ceiling increases. Amends statutory limitations on appropriations for development in following National Park System areas:

(a) Cuyahoga Valley National Recreation Area, OH: from $13,000,000 to $22,223,000; and

(b) Kalaupapa National Historical Park, HI: from $1,000,000 to $4,190,000.

---

DEPARTMENT OF THE INTERIOR,
*Washington, DC, May 4, 1990.*

Hon. J. DANFORTH QUAYLE,
*President of the Senate,*
*Washington, DC.*

DEAR MR. PRESIDENT: Enclosed is a draft bill, "To provide for increases in appropriation ceilings for land acquisition and development in certain units of the National Park System, and for other purposes."

We recommend that the draft bill be introduced, referred to the appropriate committee for consideration, and enacted.

The President's budget estimate for fiscal year 1991 for the National Park Service includes funds for land acquisition at three units of the National Park System and for development at two units of the System which exceed statutory limitations on appropriations for these purposes. Such limitations are contained in the enabling legislation for each unit. The enclosed draft bill would amend each enabling Act to increase the appropriation limitation by an amount sufficient to accommodate the budget estimate.

Acquisition ceiling increases are recommended for three areas. At Channel Islands National Park in California, an increase of $18,840,000 is needed to accommodate $4,340,000 already appropriated over the current ceiling (under authority of P.L. 95-42) and $14,500,000 in the fiscal year 1991 budget. At Chesapeake and Ohio National Historical Park, Maryland and the District of Columbia, an increase of $6,340,226 is needed to accommodate $7 million in the fiscal year 1991 budget ($659,774 remains unappropriated under the existing ceiling). At Cumberland Island National Seashore in Georgia, an increase of $7,579,500 is needed to accommodate $10 million in the fiscal year 1991 budget ($2,420,500 remains unappropriated under the existing ceiling).

Development ceiling increases are recommended for two areas. at Cuyahoga Valley National Recreation Area, Ohio, an increase of $9,223,000 is needed to accommodate $915,000 already appropriated over the current ceiling and $8,308,000 in the fiscal year 1991 budget for completion of two construction projects, the rehabilitation of utilities at the Kendall Unit ($1,508,000) and waste removal, filling, and restoration of the Krejci toxic waste site ($6,800,000).

At Kalaupapa National Historical Park, Hawaii, an increase of $3,190,000 is needed to accommodate $3,510,000 in the fiscal year 1991 budget ($320,000 remains unappropriated under the existing ceiling). This will complete replacement of the old water distribution lines, which are a health risk and a fire hazard.

The Office of Management and Budget has advised that enactment of this legislation would be in accord with the program of the President.

Sincerely,

CONSTANCE B. HARRIMAN,
*Assistant Secretary.*●

By Mr. REID:

S. 2670. A bill to amend the Trade Act of 1974 in order to require reciprocal responses to foreign acts, policies, and practices that deny national treatment to United States investment; to the Committee on Finance.

FAIR INVESTMENT ACT OF 1990

Mr. REID. Mr. President, today I am introducing the Fair Investment Act of 1990. This legislation is a companion bill to H.R. 3699, introduced by Representative TOM CAMPBELL on November 17, 1989. As of today, this legislation has 97 cosponsors in the House and strong bipartisan support.

The Fair Investment Act of 1990 is a direct result of the unfair business practices of Japan, Korea, and other countries.

We all know about the unfair trading practices of Japan and Korea. They slap obscenely high tariffs on American beef and cars so that our products cannot be sold in their countries. Then, they turn around and flood this country with cheap products and consistently undersell us. And they do this at the very time that the American taxpayer is paying for their military defense. We are subsidizing their national security so that they can take advantage of us economically.

The untold story is what the Japanese and Koreans are doing to us through unfair investment practices.

The Japanese are the most extreme in their unfairness. Consider what they think is fair investment in the United States.

The Japanese have penetrated just about every American industry. These incursions have had more than a few big ticket items. Sony Corp. recently paid $3.4 billion for Columbia Pictures. Rockefeller Center, the home of NBC and one of the most prestigious addresses in New York City, now has a Japanese landlord. Seventy percent of Honolulu is controlled by Japanese investors.

It's no wonder the Organization for Economic Cooperation, and Development calls our economy "the most open in the world." If other nations played by our rules, we would be in good shape; but they don't.

In contrast to our free and open markets, Japan is practically off-limits to American investors. For years, many United States manufacturers have tried to sell their goods in Japan—only to face repeated delays and setbacks.

The primary problem is that the Japanese distribution system has not accommodated American goods. For example, Japanese auto dealers often refuse to sell American-made cars. The alternative—establishing an entirely separate distribution system—is prohibitively expensive in most instances. Only a few American companies, such as the Amway Corp., have been able to establish their own, independent distribution systems to achieve market penetration.

Japan may be the worst offender, but it is hardly alone in this international double standard.

South Korea has flooded the American car market with Hundai's during the past several years. They like free trade when they come to America. They hate it on their own doorstep. And they have proven it in their investment policies, by outlawing foreign investment in 28 lucrative industries, including farming, publishing, and radio and television broadcasting.

This double standard is also practiced by European countries—who also rely on American military power to gain an economic advantage over us.

France will not grant most-favored-nation status to the United States or other countries outside the European Community. Approval to invest in France is sometimes even linked to specific requirements like maintaining a positive balance of trade. Recent cases have demonstrated that U.S. firms have had difficulty in obtaining such approval.

But it remains the Japanese who perpetuate the cruelest hoax on America—talking about free trade and open investment, while closing their borders in an economic move that mortally damages American workers and businesses.

Japan's economy is dominated by a shadow government of business leaders who make many of the decisions affecting that country's industrial, economic, and trade policies. This internal cartel of interlocking corporations is known as "keiretsu." Because of the keiretsu, economic power in Japan is extremely concentrated, even

to the detriment of the vast majority of Japanese citizens.

This tightly knit control group is closed to all newcomers—Japanese as well as foreign. Most Japanese investors cannot penetrate the powerful, secretive keiretsu.

These are the Japanese men who make it almost impossible for American retailers to establish a presence in Japan. They keep restrictive laws on the books in Japan, such as the legal right of small store owners to contest the opening of large department stores in their neighborhoods.

An American retailer can expect to wait 10 years before opening doors for customers. Ten years is a long time to receive any return on an investment. And that's only if the American investor gets past all the Government regulations and potential lawsuits from small store owners.

One of the most egregious examples of discrimination occurs against Americans who merely want to invest in the Japanese capital markets. While the Japanese continue to buy controlling interests in American companies and freely enter our corporate board rooms as voting members of corporate boards of directors, they prohibit Americans from doing the very same thing in their country. They will sell us the stock and take our money, but they won't allow us to vote as stockholders.

Mr. T. Boone Pickens' experiences as a shareholder of Koito Manufacturing Co. are a perfect example of this unfairness.

He is now the company's largest shareholder, but Mr. Pickens cannot even get a look at the company books and records. Representation on the Koito board is out of the question. The corporate insiders controlling Koito do not want a foreigner to have a look at how their system operates.

This outrageous behavior has even prompted ordinary Japanese citizens to write in support of Pickens' efforts.

Earlier this month, a small businessman from Japan testified anonymously before a House subcommittee on the anticompetitive behavior of keiretsu. Testifying from behind a cloak so the keiretsu could not retaliate against him, this brave Japanese businessman described how he is forced to accept arbitrary price cuts, hire particular individuals, and blacklist suppliers who act independently of the keiretsu.

The Fair Investment Act of 1990 would stop the double standard that allows Japan and other countries to take our money without giving anything in return.

This legislation would use the successful carrot and stick approach. If foreign countries practice fair investment and don't discriminate against us, we won't retaliate against them. But if they discriminate against our businessmen, then they shouldn't expect to get a free ride in this country.

It's a question of fairness, that's all. If they play fair, so will we.

To achieve this reciprocal relationship, the Fair Investment Act amends section 301(c) of the Trade Act of 1974 (19 U.S.C., section 2411(c)) to authorize reciprocal responses to foreign acts, policies, and practices that deny national treatment of U.S. investments. My bill merely seeks the creation of the "level playing field" that has been talked about but has never materialized.

The current administration, like its predecessor, views open investment and free trade as the two policy components to cure our foreign trade ills. Unfortunately, the pursuit of these policies has done nothing to improve our staggering trade deficit. I think I know why. Only our Government has a truly open and free trade policy.

The Japanese Government does everything in its power to preserve, protect, and defend Japanese industry. It's time we in the United States did the same thing for our economy.

We in Congress must pass legislation that encourages a reciprocal trade relationship. The policymakers in the administration must implement fair investment and fair trade policies. Failing to place Japan on the Super 301 list demonstrates they have not yet learned the wisdom of those kind of policies.

Mr. President, Congress is watching the implementation of our trade policies very carefully and it appears Americans keep getting shortchanged in these matters. Therefore, it is time to give our trade negotiators the proper tools. The legislation I am introducing today does just that. It puts a nation's money where its mouth is. If a nation really has free trade laws, then it will receive the benefit of America's open market. If it places restrictions on foreign investment on our economy, then America will place the same restrictions on investments here. This is a reasonable response to a situation that has grown out of control.

By Mr. CRANSTON:

S. 2671. A bill for the relief of Restituta Cayubit Brick; to the Committee on the Judiciary.

RELIEF OF RESTITUTA CAYUBIT BRICK

Mr. CRANSTON. Mr. President, I am today introducing a private relief bill on behalf of Mrs. Restituta C. Brick, a citizen of the Philippines, the widow of a U.S. serviceman, John P. Brick, and the mother of their 3-year-old daughter born and raised in the United States.

In November 1986, Mrs. Brick became a widow when her husband sustained fatal head injuries due to a vehicular accident. They had only been married 3 weeks and were planning to relocate in San Diego, CA, in the following month.

Serviceman and Mrs. Brick met in the Philippines in October 1984 while Serviceman Brick was stationed aboard the U.S.S. *Schenectady* at Subic Bay. Serviceman Brick filed the appropriate marriage forms with the United States Navy and with the Philippine Government in May 1986, but they had to wait until October 17, 1986, for the ceremony due to delays on the part of both the United States and the Philippine Government.

In expectation of relocating to San Diego in December 1986, Serviceman Brick filed the necessary forms and affidavit of support to secure his wife's U.S. permanent residency on October 27, 1986. Unfortunately, the petition was not approved prior to his untimely death. After his death, Mrs. Brick came to San Diego for her husband's funeral and to give birth to their only child.

Mrs. Brick has resided with her inlaws in Escondido, CA, since her arrival. They have welcomed Mrs. Brick into their family as an adopted daughter and are extremely hopeful that she and their granddaughter, Katherine, will be able to remain in the United States permanently.

As the spouse of a U.S. citizen, Mrs. Brick would not have had difficulty obtaining a permanent resident visa had her husband survived. It is only due to his unexpected death that she has been denied permanent residency. In fact, because Mrs. Brick married a member of the U.S. Navy, she has already successfully completed a background check by the U.S. Government. Mrs. Brick's only alternative to private legislation is to wait 18 years for her daughter, a U.S. citizen, to be old enough to file a petition on her behalf.

Serviceman and Mrs. Brick had always planned to raise and educate their children in the United States. Understandably, Mrs. Brick hopes to remain in the United States to fulfill the wishes of her husband and raise their daughter, Katherine, here. I believe that this is a clear and compelling case for which private legislation is necessary. Mrs. Brick has no other viable alternative and she has arrived at this situation through no fault of her own. I am hopeful that my colleagues will support this bill.

By Mr. THURMOND:

S. 2672. A bill to establish a United States Marshals Foundation; to the Committee on the Judiciary.

UNITED STATES MARSHALS FOUNDATION ESTABLISHMENT ACT

● Mr. THURMOND. Mr. President, I am pleased to introduce today legislation which would establish a United States Marshals Foundation.

The U.S. Marshals Service last year celebrated its bicentennial anniversary. Created by the First Congress in the Judiciary Act of 1789—the U.S. marshals and the Federal judicial system were established in the same legislation. George Washington appointed the first 13 marshals, and for the next 150 years the marshals was the only Federal agency authorized to make arrests and enforce Federal law.

Though best known as the frontier lawmen, U.S. marshals were the first Secret Service men and even took the population census every 10 years until 1870. Because they perform general purpose law enforcement duties, marshals are often confused with the CIA, FBI, the county sheriff, and other law enforcement agencies.

U.S. marshals, appointed by the President, are under the jurisdiction of the Justice Department. Last year, the 2,694 marshals (including 94 full marshals and 2,600 sworn deputies) arrested 14,000 Federal fugitives—more than all other Federal law enforcement agencies combined. They protected 505 judicial facilities and 1,611 judges and magistrates. Their responsibilities include not only ensuring security and proper decorum in the courtroom, but also providing personal protection for judges, U.S. attorneys, jurors, and witnesses while away from the court facilities when warranted. Their court security officers detected 55,970 weapons at courthouse checkpoints and they administered the Witness Security Program with its 5,500 protected witnesses and 6,000 witness family members. The Marshals' National Prisoner Transportation Network transported 92,000 defendants to 333,987, court appearances, and last year the marshals managed almost $1 billion in property seized from alleged lawbreakers in the National Asset Seizure and Forfeiture Program.

I feel it is only appropriate to elevate and strengthen public knowledge of law enforcement in general, and the U.S. Marshals Service in particular by introducing this legislation to establish a United States Marshals Foundation. The legislation is modeled after similar legislation which established the National Fish and Wildlife Foundation and the National Park Foundation. Governed by a board of directors, the Foundation would be a charitable and nonprofit corporation and would not be an agency or establishment of the United States. The directors—appointed with the advice and consent of the Director of the U.S. Marshals Service—would serve for terms of 4 years, and the legislation requires that they be knowledgeable or experienced in law enforcement matters.

I urge my colleagues to join with me in supporting this worthwhile legislation.●

---

By Mr. McCLURE:

S. 2674. A bill to provide for the reestablishment of the gray wolf in Yellowstone National Park and the Central Idaho Wilderness Area; to the Committee on Energy and Natural Resources.

NORTHERN ROCKY MOUNTAIN GRAY WOLF RESTORATION ACT

Mr. McCLURE. Mr. President, today I am introducing a bill that will bring about the return of the gray wolf to Yellowstone National Park and to the Wilderness of central Idaho.

My bill, the Rocky Mountain Gray Wolf Restoration Act of 1990, is the result of almost 3 years of attempting to bring together the opposing sides in an issue that is as polarized as any I have seen in my 24 years in the Congress.

At the center of the bill is a plan that will guarantee the return of the wolf to some of his ancestral haunts within the next few years. It also provides for the protection of the interests of those who live and work in the three states directly affected and who must be able to depend on access and use of public lands to make their living and those who have private lands adjacent to public lands.

The Northern Rockies Gray Wolf Reintroduction and Management Act provides for the transplanting and maintaining a minimum of three mating pairs of gray wolves into each of two core zones. One of the zones is 2.2-million-acre Yellowstone National Park. The second zone is an area of roughly 2 million acres located in central Idaho within the boundaries of the Selway-Bitteroot and River of No Return Wilderness areas.

Within those two core zones, as well as within portions of northwestern Montana where natural recovery is already well underway, wolves will continue to be listed as endangered. Transplanted wolves as well as those which might eventually make their own way into the zones will be fully protected as long as they remain within the core zone boundaries.

Core zone translocations under provisions in the bill in conjunction with the natural process underway in the Glacier Park area will guarantee safe sanctuary and provide an opportunity to maintain adequate gene pools as wolf populations increase and disperse throughout the northern Rockies.

The process in the solution I offer on this issue has not been developed in a vacuum. In fact, experts like Dr. David Mech—probably the authority on wolves in North America—and Dr. Steve Fritts, wolf coordinator for the U.S. Fish and Wildlife Service have both examined my approach. While they agree there might be better ways to get the job done from a purely biological standpoint, they also acknowledge that the proposed program can work.

Along with providing for translocating and maintaining minimum numbers of wolves within the core zones, the bill provides for the immediate delisting of wolves outside the core zones. Such action, while viewed with suspicion and opposed with philosophical arguments by some environmental organizations is the necessary ingredient to make it workable in the three States directly affected.

When Congress passed the Endangered Species Act, it envisioned legislation to make certain that species would not become extinct. The key to success of the law was finding a way to conserve and protect species truly in danger of becoming extinct. In fact, the act has become a vehicle by which some organizations and individuals seek to halt all activities on our public lands which they happen to oppose.

Mr. President, I would submit to you that such use of the Endangered Species Act was not envisioned nor would it have been condoned by a majority of those who originally crafted the law.

As the act applies to the gray wolf, there are three major points I would like to make. First, and perhaps most important, the wolf is not endangered as a species. There are thousands alive and well in North America including an estimated 1,200 to 1,500 in Minnesota, Wisconsin, and Michigan.

Second, transplanted wolves would not be the same wolf that probably roamed in and around the park historically. That particular subspecies is already extinct. Neither by reintroducing—or by allowing natural colonization to take place—would we be protecting and conserving that particular animal.

While that point may not seem important to some, I believe arguments about the return of the wolf to the Northern Rockies as an endangered species should recognize the fact before considering what is or is not the proper legal way to get the job done.

And last but not least, this bill would speed up actual recovery of wolf populations in precisely the same geographic areas recommended in the wolf recovery plan that has been approved by the Department of the Interior.

Arguments that the areas need to be larger are unfounded. Yesterday, the National Park Service released to Congress the results of its studies about how reintroduction might affect Yellowstone Park.

The official recovery plan calls for a target of 10 packs—approximately 100 animals—within each of the three areas to be recovered before delisting takes place. In the Yellowstone area, that plan concluded that an area almost three times the size of the park would be necessary to support such a number.

The study released yesterday, after 2 years of intensive examination of both new and already existing information, concludes that the park proper could likely sustain a population of up to 13 packs.

In fact, wolves are not going to know or care where recovery plan lines or my core zone lines are drawn. They will roam wherever necessary to find adequate food and habitat. In my opinion, that means that within a short time following translocation of wolves from Canada or Alaska, some of them are going to take off for a look at the rest of the world.

As long as wolves straying outside the core zones do not become a threat to domestic livestock or pets, do not—in the opinion of professional wildlife managers—threaten the survival of other wildlife species, or otherwise wind up in unacceptable conflict, they will remain free to live wherever they please.

Research indicates that wolf and ungulate populations are generally inversely proportional and cyclical over relatively long periods of time. My bill provides for professional management of that critical balancing act when necessary by restoring management authority over the wolf outside the boundaries of the core zones to the appropriate State fish and game departments in the three States involved.

Despite most of the rhetoric, reintroduction of wolves is not opposed just by the livestock industry. Hunting organizations are very concerned about what might happen to key elk herds we have worked for years to develop, and wolves seem to eat a lot of elk—especially calves—when they are available.

The Park Service study says that one wolf will eat 7 to 28 ungulates each year. That means that 100 wolves in Yellowstone Park or central Idaho could be expected to consume up to 3,000 animals annually.

In fact, the study shows that elk populations in the Park can be expected to decline by 10 to 25 percent; bison populations by 5 to 20 percent; and mule deer populations by 10 to 30 percent. Those numbers are not insignificant. For example, based on current populations, a recovered population of wolves in Yellowstone would kill approximately 3,000 elk per year.

Mr. President, as I stated near the beginning of my remarks, this issue has become about as polarized as any I can remember since coming to Washington. Some groups want to use the wolf as a surrogate for other agendas. Others have used it to raise a lot of money from citizens of this country truly concerned about the place of the wolf in our environment. Still others have used it for political purposes. What a shame that the laws of this Nation can be subverted for purposes other than the reason the law was originally written.

On either end of the issue spectrum are the hard liners, those who will use the wolf as a surrogate and those whose pioneering ancestors—with a lot of help and support from the Federal Government—finally managed, in the early part of this century, to virtually wipe out this animal they viewed as a threat to their survival.

Mr. President, we must not allow arguments over what is past to force us into decisions today which may, in the future, be found to be just as misguided as how some view those earlier decisions.

Like it or not, our world has changed and there is no turning back the clock of history as much as we might wish it to be so. Those whose radical positions place them at one end of the spectrum or the other on this issue should not be allowed to hamper the resolution of an issue that is important to all the American people.

The gray wolf has been on the endangered species list since 1973, the year the Endangered Species Act was passed. The single exception to that classification is in the State of Minnesota where they are classified as threatened.

The original recovery plan for the gray wolf in the Northern Rockies was written in 1974. The team responsible for the plan was asked to review and revise the plan in 1983. That task was completed in 1987.

The recovery team felt that recovery by natural dispersal was not practical for Yellowstone within the foreseeable future. Instead, they recommended a reintroduction program.

In central Idaho, they recommended waiting for 5 years to see if natural recolonization would begin by means of dispersing animals from Canada and northwestern Montana.

As I have already noted, wolves from Canada or Alaska that might be available for reintroduction are not the same subspecies that would have historically been found in the Yellowstone area. According to experts, that wolf—commonly referred to as the "buffalo wolf"—has been extinct since at least the late 1920's. The recovery plan itself does not recognize any gray wolf subspecies. In other words, as far as the official recovery plan is concerned, a wolf is a wolf and as far as the Government is concerned it doesn't matter that the species of concern longer exists.

The three States involved are owned largely by the Federal Government. Thirty percent of Montana, 50 percent of Wyoming and 64 percent of Idaho is federally owned. Access to and use of the public lands and resources on them has a great deal to do with the economy of our sparsely populated States. When the economy suffers, so do our communities and our people.

The working men and women of our States have no alternative but to rely on continued access to and the use of grass, water, logs and minerals from public lands to support their families. Those working people have mortgages to pay just like you and I; they have bills that are due each month; and they want to be able to feed and clothe their chidlren just as you and I do.

Reintroducing the wolf into their back yards presents a very real threat to them and they will resist any and all such efforts unless their own concerns are considered.

Mr. President, it is relatively easy for you and me and other Government workers to support actions such as the reintroduction mandated by my bill because our income and ability to make a living is not threatened. If recovery of the wolf is to be successful, we must recognize the legitimate concerns of the hundreds of honest, hard-working citizens who will be directly affected by our actions here in Congress. In my opinion, we have a responsibility to protect their right to make an honest living and to live the lifestyle they have chosen.

The effects of the reintroduction of wolves into the two areas proposed in my bill will be felt across a spectrum of land ownerships including a national park, wilderness areas, national forest lands, and both State and private lands.

Mr. President, I believe this bill provides exactly what the Congress had hoped for when it passed the Endangered Species Act. It provides for the reintroduction, population maintenance and permanent protection for wolves in large portions of the three geographically distinct areas recommended by the wolf recovery team.

It also provides authority for State management and control of problem wolves outside the core zone sanctuaries.

And finally, it provides a means of protecting the interests of the people most directly affected by any decision we make.

I hope my colleagues will join me in this attempt to resolve this important issue. By doing, so, the American people may soon be able to once again hear the wailing howl of the wolf in the Northern Rockies and in Yellowstone.

Mr. President, I ask unanimous consent that a copy of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2674

*Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled,* That this Act may be referred to as the Northern Rocky Mountain Gray Wolf Restoration Act of 1990.

SEC. 2. Within two years from the date of enactment of this Act, the Secretary of the Interior is directed to introduce three Alpha pairs of gray wolves each into Yellowstone National Park and into the Idaho portion of the Selway-Bitteroot and River of No Return Wilderness areas within the areas designated as "Core Zone" on the map entitled "Wolf Core Zone—Idaho, Montana, Wyoming" dated May 17, 1990. Prior to introduction of such wolves, the Secretary shall consult with the Governors of Idaho, Montana, and Wyoming and the Secretary of Agriculture.

SEC. 3. Upon introduction, natural dispersal of the wolves shall be permitted and no effort may be taken to restrict such dispersal: *Provided,* That, the Secretary shall immediately replace any wolves that do not remain within the core zones. Each wolf introduced pursuant to this Act shall be equipped with a radio collar for monitoring purposes. At such time as the Secretary determines that three pair have established themselves within the core zone in Idaho for a period of three years, the Secretary shall restrict the boundaries of the core zone to coincide with the established territories.

SEC. 4. The Secretary is authorized and directed to permit the natural re-colonization of gray wolves in the area designated as a "Natural Recovery Area" on the map entitled "Natural Recovery Area-Montana" dated May 22, 1990.

SEC. 5. Effective on the date of enactment, the gray wolf is hereby declared and determined not to be a threatened or endangered species within the meaning of the Endangered Species Act (P.L. 93-205, 87 Stat. 884, as amended) outside the areas designated as "Core Zone" on the map referred to in section 2 of this Act and outside the area designated as a "Natural Recovery Area" on the map referred to in section 4 of this Act within the States of Idaho, Montana, and Wyoming and may not be so determined in the future other than by specific designation as such in an Act of Congress.

---

By Mr. BRADLEY (for himself and Mrs. KASSEBAUM):

S.J. Res. 323. Joint resolution designating November 11 through 17, 1990, as "Geography Awareness Week"; to the Committee on the Judiciary.

GEOGRAPHY AWARENESS WEEK

● Mr. BRADLEY. Mr. President, I rise today with my distinguished colleague from Kansas [Mrs. KASSEBAUM] to introduce a resolution to declare the week of November 11 to November 17, 1990, as "Geography Awareness Week."

Mr. President, 3 years ago, I introduced the first Geography Awareness Week resolution, because I saw alarming reports of geographic illiteracy in our Nation. Surveys found that our Nation's students had at best a distorted understanding of our world and at worst were totally ignorant of the most basic geography. A survey by the Asbury Park Press in one part of New Jersey found that on the average, 12th graders could identify only 41 percent of the States. In Dallas, 25 percent of the high school students could not name Mexico as the country that bordered the United States to the south. In Boston, 39 percent of the surveyed students could not name the six New England States.

Mr. President, since Congress first took note of the problem by establishing Geography Awareness Week, we have started to confront the problem of geographic illiteracy. Many schools have reintroduced geography as part of their curriculum. But much needs to be done to revitalize and expand the role of geography in the public consciousness.

Three years ago, I sponsored the first statewide geography bee in New Jersey. Over 600 eighth graders from all over the State competed. Robin Cadwallender, a 13-year-old eighth grader from Hopatcong, NJ, won that competition. Now, we have a national geography bee (modeled after that first New Jersey bee) which is in its second year. All 50 states are involved in the competition, run much like the national spelling bee.

In addition, for the past 3 years, I have challenged elementary school classes to develop outstanding geography class projects. The response has been phenomenal. In fact—last year, 14,000 students and 450 teachers from 200 schools in New Jersey participated in the program. I gave one school an outstanding achievement award, and 10 schools special recognition awards for their efforts. I am proud of all the students and teachers who have participated over the past 3 years.

I believe that national attention must be focused on the importance of world geography in preparing our young people for the future of an increasingly interdependent and interconnected world. Knowledge of geography offers necessary perspectives and information for understanding ourselves, our relationship to the Earth, and our interdependence with other peoples of the world.

Yet even with this critical need to know, a majority of American students today still receive no significant exposure to geography in school. This is illustrated by a recent Gallup poll which ranked Americans in the bottom third in an international test of geographic knowledge, with those aged 18 to 24 ranking last. Less than half of these young people could find Central America on a map; only one in three could locate Vietnam; and three-quarters could not find the Persian Gulf. Clearly, continued ignorance, such as this, places the United States at a distinct disadvantage in matters of business, politics, and the environment.

That's why I am introducing this resolution—to focus national attention on the essential role that knowledge of world geography plays in our lives. It is my hope that this will be just one step in a revitalization of the study of geography. All of our citizens should have access to the sort of education which will help them appreciate both the great beauty and diversity of this Nation and its place in the world.●

● Mrs. KASSEBAUM. Mr. President, once again I am pleased to join Senator BRADLEY in introducing a resolution designating the week of November 11 through 17, 1990, as "National Geography Awareness Week." I cannot stress enough how important the knowledge of geography is in a world of constant change and emerging democracy. One cannot appreciate the transformations taking place in Eastern Europe and South America without the knowledge of geography.

The commemoration of Geography Awareness Week has provided the United States with an opportunity to concentrate on the national improvement of geographic literacy. For three consecutive years public officials, schools, businesses and communities have participated in special events and activities promoting the nation's geography awareness.

Currently, American students receive limited exposure to geography in their curricula. According to the results of the National Assessment of Education Progress in geography, the Nation's high school seniors responded correctly to only 57 percent of the geography test items. Only 33 percent of the students tested could correctly identify the order of the oceans, moving West to East from Africa. Clearly, unless renewed emphasis is placed on geography, the United States will remain at a distinct disadvantage in international business and politics.

I believe National Geography Awareness Week will once again strengthen public awareness of the importance of improving geographic literacy in our educational systems and our communities. I urge our colleagues to join Senator BRADLEY and me in supporting this resolution.●

---

By Mr. DOLE (for himself, Mr. INOUYE, Mr. ADAMS, Mr. CHAFEE, Mr. DIXON, Mr. GLENN, Mr. HEFLIN, Mr. HOLLINGS, Mr. LAUTENBERG, Mr. MCCLURE, Mr. MOYNIHAN, Mr. PELL, Mr. ROTH, Mr. SANFORD, Mr. THURMOND, and Mr. WARNER):

S.J. Res. 324. Joint resolution to designate June 3 through 9, 1990, as "Week of the National Observance of the 50th Anniversary of World War II"; to the Committee on the Judiciary.

WEEK OF THE NATIONAL OBSERVANCE OF THE 50TH ANNIVERSARY OF WORLD WAR II

Mr. DOLE. Mr. President, today, on behalf of myself, Senator INOUYE and my distinguished cosponsors, I offer a joint resolution to commemorate the week of June 3 through June 9, 1990, as the National Observance of the 50th Anniversary of World War II.

It seems to me, that with the rapid spread of democracy and freedom throughout Eastern Europe, it is especially fitting that we now honor those Americans who fought and sacrificed during World War II to lay the foundations of this new freedom unfolding in Europe.

There is no doubt that America's contribution during World War II was decisive in the defeat of the violent tyrannies that had ignited the most destructive war in history. It was the bravery, productivity, and genius of the American people that made this victory possible.

The U.S. contribution began long before Pearl Harbor: American ships ensured that England kept its sea lanes open; American intelligence experts were breaking the codes that would be a key to our future naval victories in the Pacific and the Atlantic; and the U.S. Army was perfecting the tactics that would allow our forces to take North Africa, Italy, and France. By 1940, there were Americans actually flying combat missions as volunteers over England and China.

With America's full entry into the war, the American people were galvanized into action that would change the world. American valor on the battlefield was supported by the efforts of the American farmer and worker, as we became the most productive nation in history. Billions of tons of ships, aircraft, and vehicles were produced at unprecedented rates. And, as the arsenal of democracy became an awesome reality to our enemies, American farmers produced enough food to feed the world. It's also important to remember that our farmers saved both our allies and our defeated enemies from starvation after the war.

Our Nation's productivity was exceeded only by its creative genius. American science and technology gave us the ability to transform imagination into reality, with an engineer's exacting precision. The computer would increase our capabilities in all fields. New medical techniques and pharmaceuticals would provide new possibilities in health care. New materials and processes would forever change our manufacturing and construction techniques.

Moreover, the period between 1940 and 1945 was a time of great transition for our Nation. Internationally, we became a superpower. Domestically, we experienced great social changes, as vast population shifts changed the demographics of our Nation, and women took on new challenges in the workplace which would redefine their roles in society.

The week of June 3 to June 9, is especially significant to our Nation. It was during this first week in June 1942, at Midway, that our naval forces dealt a devastating blow to the Japanese navy, a victory so complete, that it never recovered. It was in this week in 1944, that Americans liberated Rome from the Fascists and stormed the beaches of Normandy, to liberate Europe from the Nazis.

Mr. President, I believe we need to honor the men and women of this Nation who gave their all so that others could live in freedom. I, therefore, send this joint resolution to the desk to authorize the President of the United States to issue a proclamation establishing the week of June 3 to June 9, 1990, as the Week of the National Observance of the 50th Anniversary of World War II.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 324

Whereas the brave men and women of the United States of America made tremendous sacrifices during World War II to save the world from tyranny and aggression;

Whereas the winds of freedom and democracy sweeping the globe today spring from the principles for which over 400,000 Americans gave their lives in World War II;

Whereas World War II and the events that led up to that war must be understood in order that we may better understand our own times, and more fully appreciate the reasons why eternal vigilance against any form of tyranny is so important;

Whereas the World War II era, as reflected in its family life, industry, and entertainment, was a unique period in American history, and epitomized our Nation's philosophy of hard work, courage, and tenacity in the face of adversity;

Whereas, between 1990 and 1995, over 9,000,000 American veterans of World War II will hold reunions and conferences and otherwise commemorate the 50th anniversaries of various events relating to World War II;

Whereas June 4, 1990, marks the anniversary of the Battle of Midway and June 6, 1990, marks the anniversary of the D-Day battle: Now, therefore, be it

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That June 3, through June 9, 1990, is designated as "National World War II Observance Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate activities and ceremonies.

## ADDITIONAL COSPONSORS

S. 324

At the request of Mr. WIRTH, the name of the Senator from Nevada [Mr. REID] was added as a cosponsor of S. 324, a bill to establish a national energy policy to reduce global warming, and for other purposes.

S. 345

At the request of Mr. DODD, the name of the Senator from New Jersey [Mr. BRADLEY] was added as a cosponsor of S. 345, a bill to grant employees family and temporary medical leave under certain circumstances, and for other purposes.

S. 435

At the request of Mr. REID, the name of the Senator from Oklahoma [Mr. NICKLES] was added as a cosponsor of S. 435, a bill to amend section 118 of the Internal Revenue Code to provide for certain exeptions from certain rules determining contributions in aid of construction.

S. 682

At the request of Mr. SIMON, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of S. 682, a bill to amend chapter 33 of title 18, United States Code, to prohibit the unauthorized use of the names "Visiting Nurse Association," "Visiting Nurse Service," "VNA," "VNS," or "VNAA," or the unauthorized use of the name or insignia for the Visiting Nurse Association of America.

S. 980

At the request of Mr. MITCHELL, the name of the Senator from Montana [Mr. BURNS] was added as a cosponsor of S. 980, a bill to amend the Internal Revenue Code of 1986 to improve the effectiveness of the low-income housing credit.

S. 1140

At the request of Mr. MITCHELL, the name of the Senator from Nevada [Mr. REID] was added as a cosponsor of S. 1140, a bill to to provide that Federal facilities meet Federal and State environmental laws and requirements and to clarify that such facilities must comply with such environmental laws and requirements.

S. 1579

At the request of Mr. FOWLER, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 1579, a bill to amend the National Historic Preservation Act, the Historic Sites Act, the Archaeological Resources Protection Act, and the Abandoned Shipwreck Act, and certain related acts to strengthen the preservation of our historic heritage and resources, and for other purposes.

S. 1690

At the request of Mr. DODD, the name of the Senator from North Dakota [Mr. CONRAD] was added as a cosponsor of S. 1690, a bill to establish programs to improve foreign language instruction, and for other purposes.

S. 1890

At the request of Mr. THURMOND, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of S. 1890, a bill to amend title 5, United States Code, to provide relief from certain inequities remaining in the crediting of National Guard technician service in conection with civil service retirement, and for other purposes.

S. 1911

At the request of Mr. DODD, the name of the Senator from Ohio [Mr. METZENBAUM] was added as a cosponsor of S. 1911, a bill to provide assistance in the development of new or improved programs to help younger individuals through grants to the States for community planning, services, and training; to establish within the Department of Health and Human Services an operating agency to be designated as the Administration on Children, Youth, and Families; to provide for a White House Conference on Young Americans; and for other purposes.

S. 1930

At the request of Mr. GORE, the name of the Senator from Hawaii [Mr. INOUYE], and the Senator from Maryland [Ms. MIKULSKI] were added as cosponsors of S. 1930, a bill to amend the Higher Education Act of 1965 to require colleges and universities to establish and disclose campus security policies and to inform students and employees of campus crime statistics, and for other purposes.

S. 2179

At the request of Mr. SIMON, the name of the Senator from New Mexico [Mr. DOMENICI] was added as a cosponsor of S. 2179, a bill to maintain funding for State and local law enforcement programs in the war against drugs and crime.

S. 2186

At the request of Mr. MCCONNELL, the name of the Senator from Wisconsin [Mr. KASTEN] was added as a cosponsor of S. 2186, a bill to repeal the provisions of the Revenue Reconciliation Act of 1989 which require the withholding of income tax from wages paid for agricultural labor.

S. 2189

At the request of Mr. PRYOR, the name of the Senator from New Mexico [Mr. BINGAMAN] was added as a cosponsor of S. 2189, a bill to establish a grant program to provide health insurance information, counseling, and assistance to individuals eligible to receive benefits under title XVIII of the Social Security Act, and for other purposes.

S. 2250

At the request of Mr. DECONCINI, the name of the Senator from Virginia [Mr. WARNER], and the Senator from Tennessee [Mr. GORE] were added as cosponsors of S. 2250, a bill to amend title 5, United States Code, with respect to setting rates of basic pay for law enforcement officers, and for other purposes.

S. 2356

At the request of Mr. SYMMS, the name of the Senator from Minnesota [Mr. BOSCHWITZ] was added as a cosponsor of S. 2356, a bill to amend the Internal Revenue Code of 1986 to allow tax-exempt organizations to establish cash and deferred pension arrangements for their employees.

S. 2385

At the request of Mr. DOMENICI, the name of the Senator from Missouri [Mr. BOND] was added as a cosponsor of S. 2385, a bill to establish the National Forest Foundation.

S. 2434

At the request of Mr. D'AMATO, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 2434, a bill to permit the implementation of the Department of Transportation antidrug program rule for recipients of Federal mass transit assistance.

S. 2447

At the request of Mr. JOHNSTON, the name of the Senator from Louisiana [Mr. BREAUX] was added as a cosponsor of S. 2447, a bill to establish the Bayou Cocodrie National Wildlife Refuge.

S. 2598

At the request of Mr. GRAMM, the name of the Senator from Texas [Mr. BENTSEN] added as a cosponsor of S. 2598, to amend title 38, United States Code, to authorize the Secretary of Veteran Affairs to make grants (in conjunction with the Secretary of Defense) for the establishment of research centers at qualifying medical schools to carry out medical research in areas of interest to the Department of Veterans Affairs.

S. 2611

At the request of Mr. HARKIN, the name of the Senator from Wyoming [Mr. SIMPSON] was added as a cosponsor of S. 2611, a bill to authorize assistance to the Washington Center for Internships and Academic Seminars.

SENATE JOINT RESOLUTION 271

At the request of Mr. MCCONNELL, the names of the Senator from Illinois [Mr. SIMON], and the Senator from Wisconsin [Mr. KOHL] were added as cosponsors of Senate Joint Resolution 271, a joint resolution to designate July 10, 1990 as "Wyoming Centennial Day."

SENATE JOINT RESOLUTION 274

At the request of Mr. LAUTENBERG, the name of the Senator from Delaware [Mr. ROTH] was added as a cosponsor of Senate Joint Resolution 274, a joint resolution to designate the week beginning June 10, 1990 as "National Scleroderma Awareness Week."

SENATE JOINT RESOLUTION 282

At the request of Mr. WILSON, the names of the Senator from Alabama [Mr. SHELBY], the Senator from Hawaii [Mr. INOUYE], and the Senator from Tennessee [Mr. SASSER] were added as cosponsors of Senate Joint Resolution 282, a joint resolution to designate the decade beginning January 1, 1990, as the "Decade of the Child."

SENATE JOINT RESOLUTION 283

At the request of Mr. CRANSTON, the names of the Senator from Illinois [Mr. DIXON], the Senator from North Dakota [Mr. CONRAD], the Senator from Alabama [Mr. SHELBY], the Senator from South Carolina [Mr. HOLLINGS], and the Senator from North Dakota [Mr. BURDICK] were added as cosponsors of Senate Joint Resolution 283, a joint resolution to commemorate the centennial of the creation by Congress of Yosemite National Park.

SENATE JOINT RESOLUTION 289

At the request of Mr. SIMON, the names of the Senator from North Dakota [Mr. BURDICK], the Senator from Utah [Mr. HATCH], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from Wyoming [Mr. SIMPSON] were added as cosponsors of Senate Joint Resolution 289, a joint resolution to designate October 1990 as "Polish American Heritage Month."

SENATE JOINT RESOLUTION 299

At the request of Mr. JOHNSTON, the names of the Senator from Illinois [Mr. SIMON], the Senator from Maine [Mr. COHEN], the Senator from Montana [Mr. BURNS], the Senator from Idaho [Mr. MCCLURE], the Senator from Minnesota [Mr. DURENBERGER], and the Senator from Alabama [Mr. SHELBY] were added as cosponsors of Senate Joint Resolution 299, a joint resolution to designate the period October 1, 1990, through October 1, 1991, as the "Year of the Wetlands."

SENATE JOINT RESOLUTION 301

At the request of Mr. PELL, the names of the Senator from Rhode Island [Mr. CHAFEE], the Senator from Iowa [Mr. GRASSLEY], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from Ohio [Mr. GLENN], the Senator from Nevada [Mr. REID], the Senator from Kansas [Mr. DOLE], the Senator from West Virginia [Mr. BYRD], the Senator from Kansas [Mrs. KASSEBAUM], the Senator from Nevada [Mr. BRYAN], and the Senator from Idaho [Mr. SYMMS] were added as cosponsors of Senate Joint Resolution 301, a joint resolution designating October 1990 as "National Breast Cancer Awareness Month."

SENATE JOINT RESOLUTION 304

At the request of Mr. SHELBY, the names of the Senator from New York [Mr. MOYNIHAN], the Senator from Illinois [Mr. DIXON], the Senator from Minnesota [Mr. DURENBERGER], the Senator from California [Mr. WILSON], the Senator from Tennessee [Mr. SASSER], the Senator from Vermont [Mr. JEFFORDS], the Senator from Texas [Mr. BENTSEN], the Senator from Washington [Mr. ADAMS], the Senator from California [Mr. CRANSTON], the Senator from Hawaii [Mr. AKAKA], the Senator from Louisiana [Mr. BREAUX], the Senator from Nebraska [Mr. EXON], the Senator from

Kentucky [Mr. FORD], the Senator from Ohio [Mr. GLENN], the Senator from Alabama [Mr. HEFLIN], the Senator from South Carolina [Mr. HOLLINGS], the Senator from Nebraska [Mr. KERREY], the Senator from Colorado [Mr. WIRTH], the Senator from Colorado [Mr. ARMSTRONG], the Senator from Mississippi [Mr. LOTT], the Senator from Missouri [Mr. BOND], the Senator from Minnesota [Mr. BOSCHWITZ], the Senator from Missouri [Mr. DANFORTH], the Senator from Washington [Mr. GORTON], the Senator from Florida [Mr. MACK], the Senator from Kentucky [Mr. MCCONNELL], the Senator from Oklahoma [Mr. NICKLES], and the Senator from Pennsylvania [Mr. SPECTER] were added as cosponsors of Senate Joint Resolution 304, a joint resolution to designate October 17, 1990, as "National Drug-Free Schools and Communities Education and Awareness Day."

SENATE JOINT RESOLUTION 308

At the request of Mrs. KASSEBAUM, the names of the Senator from Virginia [Mr. WARNER], the Senator from Connecticut [Mr. DODD], the Senator from Illinois [Mr. DIXON], the Senator from Idaho [Mr. MCCLURE], the Senator from New Jersey [Mr. LAUTENBERG], the Senator from South Carolina [Mr. HOLLINGS], the Senator from South Dakota [Mr. PRESSLER], the Senator from Vermont [Mr. JEFFORDS], the Senator from Washington [Mr. ADAMS], the Senator from New York [Mr. MOYNIHAN], the Senator from Indiana [Mr. LUGAR], the Senator from California [Mr. WILSON], the Senator from Alaska [Mr. STEVENS], the Senator from Alabama [Mr. SHELBY], the Senator from Indiana [Mr. COATS], the Senator from North Dakota [Mr. BURDICK], the Senator from North Carolina [Mr. HELMS], the Senator from Alabama [Mr. HEFLIN], the Senator from California [Mr. CRANSTON], the Senator from Tennessee [Mr. GORE], the Senator from New Jersey [Mr. BRADLEY], the Senator from Tennessee [Mr. SASSER], and the Senator from Ohio [Mr. GLENN] were added as cosponsors of Senate Joint Resolution 308, a joint resolution to designate the month of June 1990, as "National Huntington's Disease Awareness Month."

SENATE JOINT RESOLUTION 311

At the request of Mr. INOUYE, the names of the Senator from Tennessee [Mr. SASSER], and the Senator from California [Mr. WILSON] were added as cosponsors of Senate Joint Resolution 311, a joint resolution to designate the month of November 1990 as "National American Indian and Alaska Native Heritage Month."

SENATE CONCURRENT RESOLUTION 127

At the request of Mr. KENNEDY, the names of the Senator from New Mexico [Mr. BINGAMAN], the Senator from Pennsylvania [Mr. HEINZ], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of Senate Concurrent Resolution 127, a concurrent resolution to express the sense of Congress that Greyhound Lines, Inc., and the Amalgamated Transit Union should pursue meaningful negotiations under the auspices of the Federal Mediation and Conciliation Service and the Secretary of Labor to resolve their dispute and restore vital transportation services to the American communities.

## AMENDMENTS SUBMITTED

## CONSTITUTIONAL PROCEDURES FOR THE IMPOSITION OF THE SENTENCE OF DEATH

### McCONNELL AMENDMENT NO. 1674

(Ordered to lie on the table.)

Mr. MCCONNELL (for himself, Mr. KERRY, Mr. BRYAN, Mr. BURNS, Mr. SANFORD, Mr. REID, and Mr. LUGAR) submitted an amendment intended to be proposed by him to the bill (S. 1970) to establish constitutional procedures for the imposition of the sentence of death, and for other purposes, as follows:

At the appropriate place, insert the following:

(a) NEGOTIATIONS.—(1) The Attorney General shall enter into negotiations with the appropriate law enforcement and judicial agencies and any other officials of any foreign country with jurisdiction over companies who manufacture, market, sell or purchase certain precursor and/or essential chemicals used in the production of illicit narcotics. The priority of negotiations should be determined based on an assessment by the Attorney General which countries have jurisdiction over companies that may be knowingly or unknowingly supplying chemicals for the illicit manufacture of controlled substances.

(2) The purposes of the negotiations shall be to (a) establish a list of precursor and essential chemicals contributing to the illicit manufacture of controlled substances, as defined in the section 102 Controlled Substances Act (21 U.S.C. 802); (b) reach one or more international agreements on a method for maintaining records of transactions of these listed chemicals; (c) establish a procedure by which such records may be made available to (and kept confidential as necessary by) United States law enforcement authorities for the exclusive purpose of conducting an investigation relative to precursor chemicals, essential chemicals and/or controlled substances contributing to the manufacture of illicit narcotics; (d) encourage chemical source countries to enact national chemical control legislation which would (i) impose specific record keeping and reporting requirements for domestic transactions involving listed chemicals; (ii) establish a system of permits or declarations for imports and exports of listed chemicals; and (iii) authorize government officials to seize or suspend shipments of listed chemicals based on evidence that they may be destined for the illicit manufacture of controlled substances.

(b) REPORTS.—Not later than one year after the date of enactment of this Act, the Attorney General shall submit an interim report to the Judiciary Committee and the Foreign Relations Committee of the Senate on progress in the negotiations. Not later than eighteen months from date of enactment, the Attorney General shall submit a final report to the aforementioned Senate Committees on the result of negotiations identifying countries with which agreements have not been reached and which have jurisdiction over companies believed to be engaged in the manufacture, marketing, sale or purchase of precursor and/or essential chemicals used in illicit manufacture of controlled substances.

(c) PENALTIES.—After consulting with the Attorney General and the Director of National Drug Control Policy, the President shall impose penalties or sanctions including temporarily or permanently prohibiting any corporation, partnership, individual or business association (i) refusing to maintain records for the purpose of monitoring and regulating transactions of listed precursor chemicals, or (ii) refusing to make such records available to United States law enforcement authorities for investigative purposes from engaging in any or all transactions within the commerce of the United States.

(d) DEFINITIONS.—A record under subsection (a) shall be retrievable and include the date of the transaction, the identity of each party to the transaction, including the ultimate consignee, an accounting of the quantity and form of listed chemical(s) and a description of the method of transfer.

(e) This Act shall not apply to the manufacture, distribution, sale import or export of any drug which may, under the Federal Food, Drug and Cosmetic Act be lawfully sold over the counter without prescription.

### McCONNELL AMENDMENT NO. 1675

(Ordered to lie on the table.)

Mr. MCCONNELL submitted an amendment intended to be proposed by him to the bill S. 1970, supra, as follows:

At the appropriate place, insert the following:

SEC. . PORNOGRAPHY VICTIMS' COMPENSATION ACT OF 1990.

(a) SHORT TITLE.—This section may be cited as the "Pornography Victims' Compensation Act of 1990".

(b) FINDINGS AND PURPOSE.—

(1) FINDINGS.—The Congress finds and declares that—

(A) protecting freedom of speech, within the bounds of safety to individuals and society, is essential to the preservation of a just and free society;

(B) consistent with the constitutional protection of freedom of speech, the State has a legitimate interest in restricting sexually explicit material, if there is a danger of harm or actual harm to individuals or society, such as the sexual exploitation of children by child pornography, the invasion of privacy and the home by indecent broadcasts, or the promotion of rape and sexual homicide by violent sexual material;

(C) the Attorney General's Commission on Pornography in 1986 found clinical and experimental evidence of a causal relationship between exposure to sexually explicit materials and sexual aggression, including the commission of unlawful sexual acts;

(D) the Attorney General's Commission on Pornography also found evidence that sexually explicit material need not be legally obscene to stimulate anti-social and potentially unlawful sexual aggression, if the material presents violation acts in a clear sexual context, or the sexual abuse of children:

(E) behavioral studies of serial murderers conducted by the Federal Bureau of Investigation have revealed a strong correlation between heavy exposure to violent sexual material and violent serial criminality;

(F) investigations conducted by the Child Pornography and Protection Unit of the United States Customs Service have revealed a nearly absolute correlation between heavy consumption of child pornography and child sexual abuse, including the use of child pornography to entrap children into the performance of sexual acts;

(G) recent psychological studies indicate a correlation between the growing number of children and youths who commit rape and other violent sexual offenses, and the declining age of first exposure to sexually explicit materials;

(H) sexual crimes such as rape and child abuse usually leave life-long psychological scars that may prevent the victims and his or her family from leading normal, fulfilled lives;

(I) the State has a legitimate interest in protecting its citizens, including children, from sexual crimes and in preventing such crimes through reasonable, effective, and constitutional means; and

(J) the State has a legitimate interest in providing adequate compensation to the victims of sexual crimes for their physical injuries, complete medical and psychological treatment, and continuing pain and suffering.

(2) PURPOSE.—It is the purpose of this section to require the producers, distributors, exhibitors, disseminators, and sellers of sexually explicit visual material to be jointly and severally liable for all damages resulting from any sexual offense that was at least partially caused by the sexual offender's exposure to the sexually explicit material.

(3) CONSTRUCTION.—The cause of action created by this section shall be available to any cause of action against a sex offender or any sexual offense.

(c) CAUSE OF ACTION.—

(1) IN GENERAL.—Notwithstanding any other provision of law, a civil action may be instituted in an appropriate court against a producer, distributor, exhibitor, disseminator, or seller of sexually explicit visual material, pursuant to the provisions of this section, by—

(A) a victim of a rape, sexual assault, sexual abuse, sexual murder, or sexual crime as described under the relevant State or Federal law, whether or not such rape, assault, abuse, murder, or crime has been prosecuted or proven in a separate criminal proceeding.

(B) the estate of such a victim, or

(C) the guardian or survivors of any such victim.

(2) PROOF AND EVIDENCE.—To recover pursuant to the provisions of this section, the individual bringing such action must prove, by a preponderance of the evidence, that—

(A) the victim was a victim of a rape, sexual assault, sexual abuse, sexual murder, or sexual crime, as defined under the relevant State or Federal law, whether or not such rape, assault, abuse, murder, or crime has been prosecuted or proven in a separate criminal proceeding;

(B) the material—

(i) is obscene;

(ii) is child pornography; or

(iii) in the case of rape, sexual assault, sexual abuse, sexual murder, or any other violent sexual crime, is both sexually explicit and violent;

(C) the material was a proximate cause of the offense, by—

(i) inciting the sexual offender to commit the offense perpetrated against the victim; or

(ii) producing imminent lawless action or was likely to incite or produce imminent lawless action;

(D) the defendant is a producer or distributor of the material, or exhibited, disseminated, or sold the material to the sexual offender; and

(E) the sale or transport of the material affects interstate or foreign commerce.

(3) SEXUALLY EXPLICIT VISUAL MATERIAL AS CAUSE.—For purposes of this section, the finder of fact may reasonably infer that the sexually explicit visual material was a proximate cause of the offense, by inciting the offender to commit the offense if any of the following are found—

(A) similarities between the acts depicted in such material and the actual offense;

(B) tesimony of the offender to the effect that such material incited the commission of the offense; and

(C) testimony of experts, to the effect that such material incited or tended to incite the offender to commit the offense.

(4) APPLICABILITY.—The provisions of this section shall apply only to visual depictions of sexually explicit activity, including photographs, films, video-tapes, and live performances. The provisions of this section shall not apply to written descriptions, texts, or narratives.

(5) DAMAGES.—Any person who has brought an action pursuant to the provisions of this section and has met the requirements of the provisions of this section shall be awarded economic damages and compensation for pain and suffering as well as reasonable attorney's fees and costs of the suit.

(6) STATUTE OF LIMITATIONS.—Any action commenced under this subsection shall be forever barred unless the complaint is filed within 6 years after the right of action first accrued or, in the case of a person under a legal disability, not later than 3 years after the termination of such disability.

(d) DEFINITIONS.—For the purposes of this section, the term—

(1) "sexually explicit conduct" means actual or simulated—

(A) sexual intercourse, including genital-genital, oral-genital, anal-genital, or oral-anal, whether between persons of the same or opposite sex;

(B) bestiality;

(C) masturbation;

(D) sadistic or masochistic abuse; or

(E) lascivious exhibition of the genitals or pubic area of any person;

(2) "violent" describes any acts or behavior, or any material that depicts such acts or behavior, in which women, children, or men are—

(A) victims of sexual crimes such as rape, sexual homicide, or child sexual abuse;

(B) penetrated by animals or inanimate objects; or

(C) tortured, dismembered, confined, bound, beaten, or injured, in a context that makes these experiences sexual or indicates that the victims derive sexual pleasure from such experiences;

(3) "minor" describes any person under the age of 18 years; and

(4) "child pornography" describes any depiction of a minor engaging or participating in sexually explicit conduct as defined in section 2256 of title 18, United States Code.

---

## METZENBAUM AMENDMENT NO. 1676

Mr. METZENBAUM proposed an amendment to the bill S. 1970, supra, as follows:

On page 49, between lines 4 and 5, insert the following:

"(J) Springfield Armory SAR-48 (.308 caliber) and its variations;

"(K) Cobray SWD 9mm in any of its variants;

"(L) Mossberg Model 500 Bullpup 12 shotgun;

"(M) Ruger Mini-14/5F semiautomatic firearms;

"(N) Feather AT-9 centerfire semiautomatic in 9mm;

"(O) AP 9, 9mm assault pistol;

"(P) Thompson Ordnance M1, semiautomatic in .45 caliber;

"(Q) Franchi SPAS 12 shotgun;

"(R) Heckler and Koch HK-94 pistol;

"(S) Austrian Automatic Arms SAP pistol;

"(T) F.I.E. Spectre P. pistol;

"(U) Sterling Mark 7 pistol;

"(V) all other models by the same manufacturer with the same design which may have slight modifications or enhancements including a folding stock; adjustible sight; case deflector for left-handed shooters; left-handed fire adapter; shorter barrel; wooden, plastic, or metal stock; large size magazine; different caliber provided the caliber exceeds .22 rimfire; bayonet mount; tripod or bipod mount; or flash suppresser; and

"(W) any other firearm with an action design identical or nearly identical to an assult weapon specified in this paragraph which has been redesigned from, renamed, renumbered, or patterned after one of such specified assault weapons regardless of the company of production or country of origin, or any other firearm which has been manufactured or sold by another company under a licensing agreement to manufacture or sell an identical or nearly identical assault weapon as those specified in this paragraph, regardless of the company of production or country of origin."

SEC. . BAN ON SALE OF MAGAZINES AND BELTS HOLDING GREATER THAN 15 ROUNDS OF AMMUNITION.

(a) BAN.—Section 922 of title 18, United States Code, is amended by adding at the end thereof the following:

"(s)(1) Except as provided in paragraph (2), it shall be unlawful for any person to transfer, import, transport, ship, receive or possess a large-capacity detachable magazine or large-capacity ammunition belt, which can be employed by a semiautomatic firearm.

"(2) This subsection does not apply with respect to—

"(A) any transfer, importation, transporting, shipping or receiving to or by, or possession by or under, authority of the United States or any department or agency thereof, or of any State or any department, agency, or political subdivision thereof; or

"(B) any transfer, transporting, shipping, receiving or possession of such magazine or ammunition belt that was lawfully possessed before the date of this subsection, except that no federally licensed firearms

dealer shall transfer such magazine or ammunition belt.

"(3) For purposes of this subsection—

"(A) The term 'large-capacity magazine' means a box drum or other container which holds more than fifteen rounds of ammunition to be fed continuously into a semiautomatic firearm, or a magazine which can be readily converted into a large-capacity magazine. Such term shall not include any magazine that has been permanently modified so that it will not hold more than fifteen rounds of ammunition.

"(B) The term 'large-capacity ammunition belt' means a belt or strip which holds more than fifteen rounds of ammunition to be fed continuously into a semiautomatic firearm, or an ammunition belt which can be readily converted into a large-capacity ammunition belt. Such term shall not include any ammunition belt that has been permanently modified so that it will not hold more than fifteen rounds of ammunition.".

(b) PENALTY SECTION.—Section 924 of title 18, United States Code is amended by adding at the end thereof the following new subsection:

"(1) Whoever violates the provisions of this Act relating to large capacity detachable magazines and ammunition belts shall be fined not more than ten thousand dollars, imprisoned not more than two years, or both.".

---

## BURNS AMENDMENT NO. 1677

(Ordered to lie on the table.)

Mr. BURNS submitted an amendment intended to be proposed by him to the bill S. 1970, supra, as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . FINANCIAL INCENTIVES FOR CITIZEN INVOLVEMENT IN THE WAR AGAINST DRUGS.

Section 524(c)(1) of title 28, United States Code, is amended—

(1) by striking "Justice—" and inserting "Justice:";

(2) in subparagraph (A)—

(A) by striking "the" the first place it appears and inserting "The"; and

(B) by striking the semicolon at the end and inserting a period; and

(3) in subparagraph (B)—

(A) by striking "the" the first place it appears and inserting "The"; and

(B) by striking the semicolon at the end and inserting a period; and

(4) in subparagraph (C)—

(A) by striking "the" the first place it appears and inserting "The"; and

(B) by striking the semicolon at the end and inserting a period;

(5) in subparagraph (D)—

(A) by striking "the" the first place it appears and inserting "The"; and

(B) by striking the semicolon at the end and inserting a period;

(6) in subparagraph (E)—

(A) by striking "disbursements" and inserting "Disbursements"; and

(B) by striking the semicolon at the end and inserting a period;

(7) in subparagraph (F)—

(A) by striking "for" the first place it appears and inserting "For"; and

(B) by striking the semicolon at the end and inserting a period;

(8) in subparagraph (G)—

(A) by striking "for" the first place it appears and inserting "For"; and

(B) by striking the semicolon at the end and inserting a period;

(9) in subparagraph (H)—

(A) by striking "after" and inserting "After";

(B) by striking "H" and inserting "(I)"; and

(10) by inserting after subparagraph (G) the following:

"(H)(i) For the payment of an award to any person or persons who provide information leading to the arrest and conviction under Federal law of any individual or individuals for the unlawful sale, or possession for sale, of a controlled substance or a controlled substance analogue. The aggregate amount of such award shall be equal to 50 percent of the fair market value (as of the date of forfeiture) of all property forfeited to the United States as a result of such conviction and pursuant to a law enforced or administered by the Department of Justice: *Provided,* That payment of such awards shall not reduce the amount of such moneys or property available for distribution to State and local law enforcement agencies.

"(ii) For the payment to the State or States in which the Federal offense was committed by such individual or individuals, of an incentive award to encourage such State or States, at their option, to establish a program (including outreach) to pay rewards to individuals who provide information leading to the arrest and conviction under State law of individuals for the unlawful sale, or possession for sale, of controlled substances or controlled substance analogues. The aggregate amount of such incentive award shall be equal to 5 percent of the fair market value (as of the date of forfeiture) of all property forfeited to the United States as a result of the convictions referred to in clause (i) and pursuant to a law enforced or administered by the Department of Justice.

"(iii) For purposes of this subparagraph—

"(I) the term 'controlled substance' has the meaning stated in section 102(6) of the Controlled Substances Act;

"(II) the term 'controlled substance analogue' has the meaning stated in section 102(32) of the Controlled Substances Act; and

"(III) the term 'individual' does not include an individual who is convicted under Federal or State law for the unlawful sale, or possession for sale, of a controlled substance or a controlled substance analogue.".

---

## DeCONCINI (AND OTHERS) AMENDMENT NO. 1678

(Ordered to lie on the table.)

Mr. DeCONCINI (for himself, Mr. D'AMATO, Mr. JOHNSTON, Mr. BIDEN, Mr. WILSON, Mr. CRANSTON, Mr. COATS, Mr. BOSCHWITZ, Ms. MIKULSKI, Mr. SIMON, Mr. DOMENICI, Mr. BRADLEY, Mr. LOTT, Mr. SHELBY, Mr. INOUYE, Mr. SARBANES, Mr. LAUTENBERG, Mr. JEFFORDS, Mr. BRYAN, Mr. HEFLIN, Mr. MOYNIHAN, Mr. BURNS, Mr. GORE, Mr. REID, and Mr. WARNER) submitted an amendment intended to be proposed by them to the bill S. 1970, supra, as follows:

At the end of the bill add the following new title:

### TITLE —FEDERAL LAW ENFORCEMENT PAY REFORM

SEC. SHORT TITLE.

This title may be cited as the "Federal Law Enforcement Pay Reform Act of 1990".

SEC. . PAY FOR LAW ENFORCEMENT OFFICERS.

(a) AMENDMENTS.—

(1) IN GENERAL.—Subchapter VII of chapter 53 of title 5, United States Code, is amended by adding at the end the following:

"§ 5376. Pay for law enforcement officers

"(a) For the purpose of this section, the term 'law enforcement officer' means any law enforcement officer within the meaning of section 8331(20) or section 8401(17) with respect to whom the provisions of subchapter III of chapter 53 apply (or would apply, but for this section).

"(b) Except as otherwise provided in subsection (c)—

"(1) effective for pay periods beginning on or after October 1, 1990, and until otherwise provided for under this subsection—

"(A) The minimum rate of basic pay for a law enforcement officer whose position is classified at a grade above GS-2 and below GS-11 shall be determined in accordance with the following table:

| "If classified at the following grade: | The minimum rate of basic pay shall be the rate payable for the following step of that grade (determined using the rates of basic pay in effect as of September 30, 1990): |
|---|---|
| GS-3 | step 10; |
| GS-4 | step 10; |
| GS-5 | step 10; |
| GS-6 | step 8; |
| GS-7 | step 6; |
| GS-8 | step 6; |
| GS-9 | step 4; |
| GS-10 | step 3; and |

"(B) the rate for each step above the minimum rate for each grade under subparagraph (A) shall, for any law enforcement officer, be the rate prescribed by the Office of Personnel Management, taking into consideration the minimum rates set forth in subparagraph (A) and the need to provide for appropriate pay relationships within and between grades;

"(2) in order to ensure the continued competitiveness of the rates of pay established under this subsection—

"(A) the Office of Personnel Management shall prescribe regulations under which the Office shall—

"(i) compare rates paid to law enforcement officers under this subsection with the rate generally being paid to individuals performing the same levels of work for State and local governments (determined on a nationwide basis); and

"(ii) determine whether an increase should be made under this paragraph as of the next opportunity allowable under subparagraph (B) and, if so, the size of that increase; and

"(B) whenever the Office makes an affirmative determination under the provisions of subparagraph (A)(ii), provide for any pay increase determined under those provisions to be appropriate, effective beginning with the first applicable pay period beginning on or after October 1, 1993, or October 1 of any third year thereafter (whichever occurs next);

"(3) effective at the beginning of the first applicable pay period beginning on or after the first day of the month in which an adjustment takes effect under section 5305 in the rates of pay under the General Schedule, the rates of pay in effect under this subsection shall be adjusted by the overall

average percentage (as set forth in the report transmitted to the Congress under such section 5305) of the adjustment in the rates of pay under the General Schedule; and

"(4) the Office shall prescribe such regulations as may be necessary for the coordination of paragraphs (2) and (3).

"(c)(1) The purpose of this subsection is to establish a pay-adjustment mechanism for law enforcement officers which takes into account the fact—

"(A) that the cost of living in certain parts of the United States is appreciably higher than in others; and

"(B) that the Government's success in recruiting and retaining the best-qualified individuals to serve as law enforcement officers, particularly in areas having higher living costs, will in large part depend on its ability to keep rates of pay at levels that are competitive with those offered by State and local governments.

"(2) To carry out the purpose of this subsection, the Office of Personnel Management shall prescribe regulations which shall provide for the following:

"(A) The establishment of an appropriate number of geographic regions (established using consolidated metropolitan statistical areas, as defined by the Office of Management and Budget) with respect to which pay comparisons shall be made, special pay rates for law enforcement officers may be established or adjusted, and the provisions of this subsection shall otherwise be carried out.

"(B)(i) Procedures for identifying those regions for which higher pay rates are needed, as identified under clause (ii).

"(ii) A region shall be considered to satisfy the requirements for higher pay rates if, using the average of—

"(I) a value (determined by the Office, and expressed as a percentage) representing that region's relative cost of living, as compared with the cost of living in the United States as a whole, and

"(II) a value (determined by the Office, and expressed as a percentage) representing the relative size of the average salary for State and local law enforcement officers within that region (expressed as a single weighted average salary), as compared with the average salary for State and local law enforcement officers in the United States as a whole (expressed as a single weighted average salary),

such region is determined to be at least 5 percent above the national average (which, for purposes of this clause, shall be deemed to be equal to 100 percent).

"(C) Procedures under which higher rates of pay for law enforcement officers within a particular region shall be established or adjusted under this subsection.

"(3)(A) A rate of basic pay payable to a law enforcement officer under this subsection may not be less than the rate to which such officer would otherwise be entitled if this subsection had not been enacted.

"(B) A rate of basic pay payable to a law enforcement officer under this subsection, based on such officer's serving in a particular region, shall cease to apply if such officer is transferred or reassigned to a place outside of such region.

"(4) The first rates of pay established under this subsection shall be effective for pay periods beginning on or after April 1, 1991, and, notwithstanding any other provision of this subsection, shall be based on pay data compiled by the National Advisory Commission on Law Enforcement, as contained in its report under section 6160(h) of the Anti-Drug Abuse Act of 1988. Subsequent adjustments under this subsection may be made, effective for applicable pay periods beginning on or after October 1, 1993, and October 1 of any third year thereafter, subject to the preceding paragraphs of this subsection.

"(d)(1) the Bureau of Labor Statistics shall conduct such pay surveys as may be necessary in order to compile any data (relating to rates of pay being paid by State or local governments) which may be necessary to carry out this section. To the extent practicable, data so compiled shall reflect rates of pay in effect as of Janaury 1, 1993, and January 1 of every third year thereafter.

"(2) Except as otherwise expressly provided for in this section, any comparisons or determinations under this section shall, to the extent that they involve rates of pay or other data relating to State or local government, be based solely on data compiled under this subsection.

"(e)(1) If higher rates of basic pay under subsection (c) are in effect for any law enforcement officers within a goegraphic region (as established under subsection (c)(2)(A)), the head of the agency concerned (or designee thereof) may, with respect to any employee described in paragraph (2), provide for such higher rates of basic pay as the agency head (or designee) considers appropriate.

"(2) Authority under this subsection may be exercised with respect to any employee of the agency who—

"(A) are assigned to the same organizational unit or component, and the same geographic region (as established under subsection (c)(2)(A)), as the law enforcement officers receiving the higher rates of basic pay; and

"(B) perform services ancillary to or in support of those performed by law enforcement officers within that unit or component.

"(3) The head of each agency (or designee thereof) shall prescribe such regulations as may be necessary to carry this subsection out within such agency.".

(2) TABLE OF SECTIONS.—The table of sections for chapter 53 of title 5, United States Code, is amended by adding after the item relating to section 5375 the following:

"5376. Pay for law enforcement officers.".

(b) SAME BENEFITS FOR OTHER LAW ENFORCEMENT OFFICERS.—

(1) IN GENERAL.—The appropriate agency head (as defined in paragraph (3)) shall prescribe regulations under which the purposes of the amendments made by subsection (a) shall be carried out with respect to individuals holding position described in paragraph (2) (and appropriate support personnel under the jurisdiction of such agency head).

(2) APPLICABILITY.—This subsection applies with respect to any—

(A) member of the United States Secret Service Uniformed Division;

(B) member of the United States Park Police;

(C) special agent within the Diplomatic Security Service;

(D) postal inspector;

(E) probation officer (referred to in section 3672 of title 18, United States Code); or

(F) pretrial services officer (referred to in section 3153 of title 18, United States Code).

(3) DEFINITION.—For the purposes of this subsection, the term "appropriate agency head" means—

(A) with respect to any individual under paragraph (2)(A), the secretary of the Treasury;

(B) with resepct to any individual under paragraph (2)(B), the Secretary of the Interior;

(C) with respect to any individual under paragraph (2)(C), the Secretary of State;

(D) with respect to any individual under paragraph (2)(D), the Postmaster General; and

(E) with respect to any individual under paragraph (2)(E) or (2)(F), the Director of the Administrative Office of the United States Courts.

(c) REPORT TO CONGRESS.—Not later than January 1, 1993, the Office of Personnel Management, in consultation with Federal law envorcement agencies and law enforcement employee groups, shall submit to Congress, in writing, a plan to establish a separate pay and classification system for law enforcement officers and specifications for legislation to implement such plan.

SEC. . RETENTION ALLOWANCES.

(a) IN GENERAL.—Subchapter IV of chapter 59 of title 5, United States Code, is amended by adding at the end the following:

**"§ 5949. Retention allowances for law enforcement officers**

"(a) For the purpose of this section, the term 'law enforcement officer' means—

"(1) a law enforcement officer within the meaning of section 5376(a);

"(2) a member of the United States Secret Service Uniformed Division;

"(3) a member of the United States Park Police;

"(4) a special agent within the Diplomatic Security Service;

"(5) a postal inspector;

"(6) a probation officer (referred to in section 3672 of title 18, United States Code); and

"(7) a pretrial services officer (referred to in section 3153 of title 18, United States Code).

"(b)(1) Notwithstanding any other provision of law, and in order to retain highly qualified law enforcement officers who possess special skills or experience or whose continued services are particularly important due to factors associated with the geographic area to which they are assigned, the head of an agency, subject to the provisions of this section and such regulations as the President or his designee may prescribe, may enter into a service agreement with a law enforcement officer.

"(2) Under any such agreement, the law enforcement officer shall agree to complete a specified period of service in such agency in return for an allowance, for the duration of such agreement, in an amount determined by the agency head and specified in the agreement, but not to exceed $10,000 per year.

"(c) In order to be eligible for an allowance under this section, a law enforcement officer must then satisfy the age and service requirements under section 8336 or 8412, as the case may be, for entitlement to an annuity.

"(d) Any agreement entered into by a law enforcement officer under this section shall be for a period of 1 year of service in the agency inmvolved unless the officer requests an argument for a longer period of service.

"(e) Unless otherwise provided for in the agreement under subsection (f), an agreement under this section shall provide that the law enforcement officer, in the event that such officer voluntarily, or because of misconduct, fails to complete at least 1 year

of service pursuant to such agreement, shall be required to refund the total amount received under this section, unless the head of the agency, pursuant to such regulations as may be prescribed under this section by the President or his designee, determines that such failure is necessitated by circumstances beyond the control of the officer.

"(f) Any agreement under this section shall specify, subject to such regulations as the President or his designee may prescribe, the terms under which the head of the agency and the law enforcement officer may elect to terminate such agreement, and the amounts, if any, required to be refunded by the law enforcement officer for each reason for termination.

"(g)(1) Any allowance paid under this section shall not be considered as basic pay for the purposes of subchapter VI and section 5595 of chapter 55, chapter 81, 83, 84, or 87, or other benefits related to basic pay.

"(2) Any allowance under this section for a law enforcement officer shall be paid in the same manner and at the same time as the officer's basic pay is paid.

"(h) An agency head may delegate, in whole or in part, any functions vested in such agency head under this section."

"(b) TABLE OF SECTIONS.—The table of sections for chapter 59 of title 5, United States Code, is amended by adding after the item relating to section 5948 the following:

"5949. Retention allowances for law enforcement officers.".

SEC. . RELOCATION PAYMENTS.

(a) IN GENERAL.—Subchapter II of chapter 57 of title 5, United States Code, is amended by inserting after section 5724c the following:

**"§5724d. Relocation payments for law enforcement officers**

"(a) For the purpose of this section, the term 'law enforcement officer' has the same meaning as under section 5949(a).

"(b) Under such regulations as the head of an agency (or designee thereof) may prescribe and to the extent considered necessary and appropriate, as provided therein, appropriations or other funds available to such agency for administrative expenses are available for payments under this section.

"(c) Payments under this section—

"(1) may be paid to any law enforcement officer within the agency who is transferred or reassigned, in the interest of the Government, to an area or region (not within a foreign country) having higher than average housing costs (as determined under the regulations); and

"(2) may not be made to a law enforcement officer if, or to the extent that, such payment would cause the total amount paid to such officer under this section to exceed $20,000 (including, in the case of any individual who is married to another law enforcement officer, any amounts paid under this section to the spouse).

"(d) An agency may make a payment under this section only after the law enforcement officer selected agrees in writing to remain a law enforcement officer for a period of time (not to exceed 3 years) specified in the agreement, unless separated for reasons beyond the officer's control which are acceptable to the agency. If the individual violates the agreement, any money paid to the individual under the agreement is recoverable from the individual as a debt due the United States.".

"(b) TABLE OF SECTIONS.—The table of sections for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5724c the following:

"5724d. Relocation payments for law enforcement officers.".

SEC. . OTHER AMENDMENTS TO TITLE 5, UNITED STATES CODE.

(a) MINIMUM RATE FOR NEW APPOINTMENTS.—

(1) IN GENERAL.—Section 5333 of title 5, United States Code, is amended by adding at the end the following:

"(c) In applying subsection (a) with respect to a law enforcement officer (within the meaning of section 5376(a)), the reference in such subsection to 'GS-11' shall be deemed to read 'GS-3'.".

(2) OTHER OFFICERS.—Each of the appropriate agency heads (as defined in section (b)(3)) shall prescribe regulations under which the purpose of the amendment made by paragraph (1) shall be carried out with respect to individuals under section (b)(2) under the jurisdiction of such agency head.

(b) INCENTIVE BONUS FOR FOREIGN LANGUAGE CAPABILITIES.—

(1) IN GENERAL.—Chapter 45 of title 5, United States Code, is amended by adding at the end the following:

"SUBCHAPTER III—AWARDS TO LAW ENFORCEMENT OFFICERS FOR FOREIGN LANGUAGE CAPABILITIES

"§ 4521. Definition

"For the purpose of this subchapter, the term 'law enforcement officer' has the same meaning as under section 5949(a).

"§ 4522. General provision

"An award under this subchapter is in addition to the basic pay of the recipient.

"§ 4523. Award authority

"(a) An agency may pay a cash award, up to 25 percent of basic pay, to any law enforcement officer employed in or under such agency who possesses and makes substantial use of 1 or more languages (other than English) in the performance of official duties.

"(b) Awards under this section shall be paid under regulations prescribed by the head of the agency involved (or designee thereof). Regulations prescribed by an agency head (or designee) under this subsection shall include—

"(1) procedures under which foreign language proficiency shall be ascertained;

"(2) criteria for the selection of individuals for recognition under this section; and

"(3) any other provisions which may be necessary to carry out the purposes of this subchapter.".

(2) TABLE OF SECTIONS.—The table of sections for chapter 45 of title 5, United States Code, is amended by adding at the end the following:

"SUBCHAPTER III—AWARDS TO LAW ENFORCEMENT OFFICERS FOR FOREIGN LANGUAGE CAPABILITIES

"4521. Definition.
"4522. General provision.
"4523. Award authority.".

(c) AGE FOR MANDATORY RETIREMENT.—

(1) CIVIL SERVICE RETIREMENT SYSTEM.—Section 8335(b) of title 5, United States Code is amended—

(A) in the first sentence, by striking "law enforcement officer or a"; and

(B) by inserting after the first sentence the following: "A law enforcement officer who is otherwise eligible for immediate retirement under section 8336(c) of this title shall be separated from the service on the last day of the month in which he becomes 57 years of age or completes 20 years of service if then over that age."

(2) FEDERAL EMPLOYEES' RETIREMENT SYSTEM.—Section 8425(b) of title 5, United States Code, is amended—

(A) in the first sentence, by striking "law enforcement officer or" each place it appears; and

(B) by inserting after the first sentence the following: "A law enforcement officer who is otherwise eligible for immediate retirement under section 8412(d) shall be separated from the service on the last day of the month in which that law enforcement officer becomes 57 years of age or completes 20 years of service if then over that age."

(d) OVERTIME RATES.—Section 5542(a) of title 5, United Stats Code, is amended by adding at the end the following:

"(4) Notwithstanding paragraphs (1) and (2) of this subsection, for an employee who is a law enforcement officer (within the meaning of section 5949(a) of this title), the overtime hourly rate of pay is an amount equal to one and one-half times the hourly rate of basic pay of the employee, and all that amount is premium pay.".

(e) LIMITATION ON PREMIUM PAY.—Section 5547 of title 5, United States Code, is amended by adding at the end the following:

"(c)(1) The provisions of subsection (a) shall not apply to the pay of a law enforcement officer for any pay period in which such officer is required to perform overtime under section 5542(a) or administratively uncontrollable overtime under section 5545(c)(2).

"(2) Notwithstanding the provisions of paragraph (1), no law enforcement officer may be paid premium pay to the extent that the aggregate rate of pay of such employee for the aggregate of all pay periods in any calendar year exceeds the scheduled rate of pay for level V of the Executive Schedule.

"(3) For purposes of this subsection, the term 'law enforcement officer' has the same meaning as under section 5949(a).".

(f) DEFINITIONAL AMENDMENT.—Section 5541(2)(iv) of title 5, United States Code, is amended to read as follows:

"(iv) a member of—

"(I) the Metropolitan Police or the Fire Department of the District of Columbia; or

"(II) a member of the United States Secret Service Uniformed Division, a member of the United States Park Police, a special agent within the Diplomatic Security Service, a postal inspector, a probation officer (referred to in section 3153 of title 18), or a pretrial services officer (referred to in section 3153 of title 18), other than for purposes of sections 5545(a) and 5546;".

On page 2, add at the end of the matter related to the table of contents the following:

TITLE —FEDERAL LAW ENFORCEMENT PAY REFORM

Sec. . Short title.
Sec. . Pay for law enforcement officers.
Sec. . Retention allowances.
Sec. . Relocation payments.
Sec. . Other amendments to title 5, United States Code.

---

## SPECTER AMENDMENT NOS. 1679 AND 1680

(Ordered to lie on the table.)

Mr. SPECTER submitted two amendments intended to be proposed by him to the bill S. 1970, supra, as follows:

AMENDMENT No. 1679

Section 1. Authorization of Death Penalty.

Section 408(e)(1) of the Controlled Substances Act (21 U.S.C. 848(e)(1)), as amended by—

(1) deleting the word "and" at the end of paragraph (A);

(2) deleting the period at the end of paragraph (B) and inserting in lieu thereof "; and"; and

(3) inserting the following new paragraph (C):

"(C) any person who commits an offense in violation of subsection (a) under the conditions set forth in subsection (b) after one or more prior convictions of him under this section have become final, may be sentenced to death, or shall be imprisoned for life and fined in accordance with subsection (a) of this section. In a hearing held pursuant to subsection (i), the trier of fact shall consider those aggravating and mitigating factors hereafter described to the extent they are relevant to an offense which did not directly result in death.".

---

AMENDMENT No. 1680

SHORT TITLE

SECTION 1. This Act may be cited as the "Torture Victim Protection Act of 1989".

LIABILITY; LIMITATIONS ON REMEDIES

SEC. 2. (a) Every person who, under actual or apparent authority of any foreign nation, subjects any person to torture or extrajudicial killing shall be liable to the party injured or his or her legal representatives in a civil action.

(b) The court shall decline to hear and determine a claim under this section if the defendant establishes that clear and convincing evidence exists that the claimant has not exhausted adequate and available remedies in the place in which the conduct giving rise to the claim occurred. The court shall not infer the application of any statute of limitations or similar period of limitations in an action under this section.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) the term "torture" shall include any act by which severe pain or suffering (other than pain or suffering arising only from or inherent in, or incidental to, lawful sanctions), whether physical or mental, is intentionally inflicted on a person for such purpose as obtaining from that person or a third person information or a confession, punishing that person for an act that person or a third person has committed or is suspected of having committed, or coercing that person or a third person, or for any reason based on discrimination of any kind; and

(2) the term "extrajudicial killing" means a deliberated killing without previous judgment pronounced by a regularly constituted court affording all the judicial guarantees which are recognized as indispensible by civilized peoples.

---

## HATCH AMENDMENT NO. 1681

Mr. Hatch proposed an amendment to the bill S. 1970, supra, as follows:

Strike on page 46, line 15, through page 53, line 5.

## MEDALS IN COMMEMORATION OF THE CENTENNIAL OF YOSEMITE NATIONAL PARK

---

## McCLURE AMENDMENT NO. 1682

Mr. McCLURE proposed an amendment to the bill (S. 2388) to provide for the striking of medals in commemoration of the centennial of Yosemite National Park, as follows:

At the end of S. 2388, add the following new title:

TITLE III—SILVER PROOF SETS

SEC. 301. SHORT TITLE.

This title may be cited as the "Silver Coin Proof Sets".

SEC. 302. AMENDMENT TO TITLE 31, UNITED STATES CODE.

Subsection (a) of section 5132 of title 31, United States Code is amended by re-designating paragraphs (2), (3), and (4) as paragraphs (3), (4), and (5), respectively, and by inserting after paragraph (1) the following new paragraph:

"(2)(A) In addition to the proof sets under paragraph (1), the Secretary shall annually sell to the public directly and by mail, sets of proof coins minted under paragraphs (1) through (6) of section 5112(a) of this title in which, notwithstanding any other provision of law, the coins described in paragraphs (1), (2), (3), and (4) of section 5112(a), shall be an alloy of 90 percent silver and 10 percent copper. All coins under this paragraph shall have a Mint mark indicating their place of manufacture. For purposes of subsection (a)(3) of section 5111 of this title, and paragraph (1) of this subsection, all coins minted under this paragraph shall be considered numismatic items.

"(B) The Secretary shall obtain silver for coins authorized under this title by purchase from stockpiles established under the Strategic and Critical Materials Stock Piling Act (50 USC, 98 et seq.). At such time as the silver stockpile is depleted, the Secretary shall acquire silver for such coins by purchase of silver mined from natural deposits in the United States, or in a territory or possession of the United States. Within one year after the month in which the ore from which it is derived was mined. The Secretary shall pay not more than the average world price for the silver. The Secretary may issue such regulations as may be necessary to carry out this paragraph.

"(C) The coins issued under this title shall be legal tender as provided in section 5103 of title 31, United States Code."

SEC. 303. GENERAL WAIVER OF PROCUREMENT REGULATIONS.

"(a) IN GENERAL.—Except as provided in subsection (b), no provision of law governing procurement or public contracts shall be applicable to the procurement of goods and services necessary for carrying out the provisions of this title.

"(b) EQUAL EMPLOYMENT OPPORTUNITY.—Subsection (a) shall not relieve any person entering into a contract under the authority of this title from complying with any law relating to equal employment opportunity. No firm shall be considered a Federal contractor for purposes of 41 C.F.R. part 60 et seq. as a result of participating as a United States Mint coin consignee."

## CONSTITUTIONAL PROCEDURES FOR THE IMPOSITION OF THE SENTENCE OF DEATH

---

## AKAKA (AND INOUYE) AMENDMENT NO. 1683

(Ordered to lie on the table.)

Mr. AKAKA (for himself and Mr. INOUYE) submitted an amendment intended to be proposed by them to the bill S. 1970, supra, as follows:

At the appropriate place in the bill, add the following new title:

TITLE —ICE ENFORCEMENT AND PREVENTION ACT

SECTION 1. SHORT TITLE.

This title may be cited as the "Ice Enforcement and Prevention Act of 1990."

SEC. 2. STRENGTHENING FEDERAL PENALTIES.

(a) Section 401(b)(1)(A) of the Controlled Substances Act (21 U.S.C. 841(b)(1)(A)) is amended as follows:

(1) at the end of clause (vii) by striking the word "or";

(2) by inserting at the end of clause (viii) the word "or"; and

(3) by adding a new clause (ix) as follows:

"(ix) 25 grams or more of methamphetamine, its salts, isomers, and salts of its isomers, that is 80 percent pure and crystalline.

(b) Section 401(b)(1)(B) of the Controlled Substances Act (21 U.S.C. 841(b)(1)(B)) is amended as follows:

(1) at the end of clause (vii) by striking the word "or";

(2) by inserting at the end of clause (viii) the word "or"; and

(3) by adding a new clause (ix) as follows:

"(ix) 5 grams or more of methamphetamine, its salts, isomers, and salts of its isomers, that is 80 percent pure and crystalline.

SEC. 3. EDUCATION AND PREVENTION.

(a) Not later than six months after the date of enactment of this section, the Department of Education and the National Institute on Drug Abuse shall jointly develop model, community-based curricula for disseminating comprehensive information on methamphetamine, crystal methamphetamine, and chemically related stimulants.

(b) Not later than 12 months after the date of enactment of this section, the Department of Education shall establish not less than four state-wide or regional methamphetamine prevention demonstration programs, including one such project in California, Hawaii, Oregon and such other state that is experiencing serious methamphetamine abuse problems as determined by the Secretary of Education.

(c) There is authorized to be appropriated $4,000,000 in fiscal years 1991 and 1992 to establish and operate the model demonstration programs required under subsection (b) of this section.

(c) Not later than 18 months after the date of enactment of this section, the Department of Education and the National Institute on Drug Abuse, in consultation with the Secretaries of Education from the States listed under subsection (b), conclude that the model curricula developed under subsection (a) demonstrate practical educational merit, the Department of Education shall distribute such model curricula to every primary and secondary school in the country.

SEC. 4. RESEARCH AND TREATMENT

(a) The Director of the National Institute on Drug Abuse, through the Medications Development Program, shall prioritize the development of a drug to treat addictions to:

(1) amphetamine,
(2) methamphetamine,
(3) crystal methamphetamine, and
(4) chemically related stimulants.

(b) The Director of Health and Human Services shall investigate or cause to be investigated the syndrome that results from methamphetamine addiction at birth.

(c) The Director shall, on the basis of the findings from subsection (6), develop a protocol for treating, physically and mentally, newborns afflicted with methamphetamine addiction.

Mr. AKAKA. Mr. President, I have an amendment at the desk which I have introduced and hope the committee will be able to consider it at the earliest opportunity. It would carry out a multipronged attack on the use of crystal meth.

Crystal meth, or "ice" as it is known on the streets has the potential for overtaking "crack" cocaine as the most insidious drug of choice for our young people today. Although both crack and ice may be smoked, the similarity ends there. Ice is cheaper—only $50 will buy enough of the drug to keep someone high for a week; its high lasts anywhere from 7 to 30 hours; it leaves its user prone to extreme, uncontrolled violence; and many times it is taken in conjunction with other drugs.

Mr. President, I regret to say that my own State of Hawaii is setting the nationwide trend on smoking ice. In fact, last year, as a member of the House Select Committee on Narcotics Abuse and Control, I sought the assistance of William Bennett, the Director of National Drug Control Policy in urging the administration to address the looming ice epidemic. I renewed my plea to Mr. Bennett again this March before a House Appropriations Subcommittee hearing. Unfortunately, it appears that the administration is continuing to underestimate Hawaii's ice problem, which soon may become everyone's problem.

I disagree with the notion that ice poses no threat to the United States at the present time. A National Institute of Drug Abuse [NIDA] study showed that in 1989 there was a 70-percent increase nationwide in hospitalizations related to ice.

In the area of enforcement and crime prevention, I am proposing a tough, no-nonsense, no-compromise approach. The message will be clear. We want ice off the streets, out of the schoolyard, and beyond the reach of our young people. And if you violate the law, you will do time—hard time.

My amendment attacks ice distribution by allowing prosecutors to seek sharply increased penalties for major crystal meth dealers. For example, under my amendment an ice dealer who sells 5 grams of ice—up to 200 hits—faces up to 40 years in prison, double the penalty under the existing law. It also doubles the mandatory minimum penalty for midlevel ice dealers from 5 to 10 years.

The second aspect of my amendment directs the Institute of Drug Abuse to improve the methods of treating ice addicts and assist with the treatment of infants born with ice addictions. Finally, my amendment would develop a model educational program in the State of Hawaii to educate students against the dangers of ice.

I stongly believe that we must act immediately to let the drug dealers know that we want ice away from our most precious natural resources, our Nation's young people. Ice is like a cancer. We can treat it now before it becomes a serious problem, or we can wait until it spreads so far that there will be no hope for a cure.

Thank you, Mr. President. I urge my colleagues to support this important amendment.

Mr. President, I ask unanimous consent that section-by-section analysis of my amendment be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION ANALYSIS

Section 101. This section creates stiff federal penalties for the production, manufacture, sale or distribution of "ice," a highly pure and smokable form of methamphetamine. Under existing law, the penalties for "ice" are the same as those for methamphetamine generally, regardless of the fact that "ice" is more highly addictive and physically dangerous than methamphetamine.

Specifically, this amendment provides a penalty of not less than 10 years and up to life imprisonment for the manufacture, distribute or possession with intent to distribute extremely large quantities of "ice" (25 grams or more). For mid-level distribution (2 grams or more), the federal penalty is not less than 5 years and not more than 40 years.

## AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the full Committee on Environment and Public Works be authorized to meet during the session of the Senate on Tuesday, May 22, beginning at 10 a.m., to conduct a business meeting to mark up S. 2183, the Water Resources Development Act (as modified).

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Tuesday, May 22, 1990, at 2 p.m. to hold a closed hearing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet on Tuesday, May 22, at 10 a.m. for a hearing on the nomination of Annice M. Wagner, to be associate judge, District of Columbia Court of Appeals.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON EMPLOYMENT AND PRODUCTIVITY

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Subcommittee on Employment and Productivity of the Committee on Labor and Human Resources be authorized to meet during the session of the Senate on Tuesday, May 22, at 2:15 p.m., for a hearing on "Job Training and Education for the Homeless as Authorized by the Stewart B. McKinney Homeless Assistance Act."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be allowed to meet during the session of the Senate, Tuesday, May 22, 1990, at 10 a.m. to conduct an oversight hearing on deposit insurance reform.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation, be authorized to meet during the session of the Senate on May 22, 1990, at 10 a.m. to consider pending committee business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PROJECTION FORCES AND REGIONAL DEFENSE

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Armed Services Committee Subcommittee on Projection Forces and Regional Defense be authorized to meet in open session on Tuesday, May 22, 1990, at 9:30 a.m. to receive testimony on the Navy Shipbuilding and Conversion Program in review of S. 2171, the Department of Defense Authorization Act for fiscal year 1991.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the

Senate on Tuesday, May 22, 1990, at 4 p.m. to receive a briefing on the supplemental appropriations conference; to review and decide on alternative sources for the manpower personnel reprogramming; and to consider a CHAMPUS reprogramming.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ARMED SERVICES

Mr. MITCHELL. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet on Tuesday, May 22, 1990, at 2 p.m. in open session to consider the nomination of Lt. Gen. Carl W. Stiner, USA, to be general and commander-in-chief, U.S. Special Operations Command.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ADDITIONAL STATEMENTS

### AUNT MAE

● Mr. KOHL. Mr. President, 100 years ago, on May 21, 1890, Mae Croak was born in the city of Chicago. Ultimately she had the good sense to move to Wisconsin and, as a result, I have the good fortune to represent her in the Senate. In recognition of her birthday, I rise to pay a small tribute to her today.

Mae's mother, born Catherine Anastasia Jackson, was an Irish woman who emigrated to our country from London in 1880. Her father, Thomas Francis Croak, was a "true American," having been born on the Fourth of July in 1864. Mae was the third of nine children, and after the early death of her father and eldest sister, much of the responsibility for raising this clan fell on her shoulders. In an effort to meet that responsibility, she lied about her age and went to work at Marshall Fields when she was just 14 years old. After 17 years at Fields, she began an even longer distinguished career with the Pullman Co.

While her work history is impressive, I think there is something else we can learn from Mae Croak. You know, sometimes I think that in every immigrant family there must have been at least one saint, one person always relied on for strength and love and support. Aunt Mae was that saint to her 8 brothers and sisters, to her 15 nieces and nephews, to her 47 grand nieces and nephews, and to the 22 great grand nieces and nephews so far born to her family. Aunt Mae is a bridge to the past for the youngest of them, and she was diaper changer, babysitter, and nurse to most of the older ones. Visits from Aunt Mae were always a highpoint for her family and friends; they looked forward to seeing her—and getting the special treats she always brought and listening to her sing "Is It True What They Say about Dixie."

Mr. President, most of the small incidents of steadfast love that demonstrate what is best in this world remain unreported. For the RECORD, I would like to simply mention one example Aunt Mae's commitment to the best of human values. When her sister Frances was in a nursing home for several years, Aunt Mae and another sister, Evelyn—a wonderful person in her own right who is a mere 86—did not let a day pass without one of them staying with her. That kind of love cannot be understood, Mr. President, it can only be cherished—and it should be recognized.

The Croak clan is blessed by having Aunt Mae with them still. Her quick memory and good humor make her a delightful companion, and her 100 years make her a living history book. I would like to just share a few reflections on this amazing century Mae witnessed.

The year Mae was born, Congress was in the midst of passing the Sherman Antitrust Act. Benjamin Harrison was President; the railroad barons were kings. We had not yet invented the car, and the Wright Brothers had not flown. Oklahoma became a territory that year, as Wyoming and Idaho became States; 1890 was the year Yosemite National Park was created and the year peanut butter was invented. Tchaikovsky was composing, Ibsen was writing, Monet was painting. And a pitcher named Cy Young signed that year with Cleveland.

Think of the progress Aunt Mae has seen. Mae was 27 when the United States entered World War I. She was 40 when we entered the Depression. While we may not have found another pitcher like Cy Young, we did manage to put a human on the Moon. She now uses cordless telephones and remote control color televisions, and the young girls who call her great great Aunt Mae learn about computers in school.

Mr. President, 100 years is a landmark in time. We recognize the amazing achievement simply to have survived that long in good health. But Aunt Mae is and has been something very special in this world, in ways which far outnumber her years. The lives she has touched with her kindness all carry a bit of Aunt Mae's grace with them. The members of her family are engaged in productive lives, contributing to their communities in many important ways all over the United States. We all owe a special debt to our ancesters, to the sacrifices they made, and to the world they helped create for us. In the name of Mae Croak, I would like to take this occasion to say "thank you" to the thousands of saints in the thousands of families who have helped make America great. And in the name of the thousands of Americans who have been touched by this wonderful woman, I would like to say. "happy birthday, Aunt Mae." May it bring you as much joy as you have brought us.●

### RETIREMENT OF JOHN BONASSI, MAYOR OF GREEN TREE, PA

● Mr. HEINZ. Mr. President, at the end of this year, after 14 years in local elected office, Mayor John Bonassi of Green Tree, PA, will be retiring from public service. I rise today to recognize his accomplishments and dedicated service to Green Tree and neighboring communities.

John's government service spans two decades, as an appointed official in county government, as Green Tree councilman, as council president, and most recently as mayor. I might add, as well, that this Senator has an especially keen appreciation for John's talents, as he also served for a number of years as my executive assistant in Pittsburgh, directing my Senate office operations in western Pennsylvania.

As a lifelong resident of Green Tree, John exhibited an early interest in his community's affairs. At the age of 30, he was elected to council for the first of three consecutive terms, and during his last 6 years he was elected president of council. In 1986 his constituents demonstrated their confidence in him by electing him their mayor.

John has worked tirelessly on behalf of his constituents—to secure both public and private investment in jobs and economic growth, to improve the quality of roads and streets, to make the borough a safe and good place to live, and to educate parents and children alike about the dangers of drugs and alcohol. Indeed, in all of these endeavors and more he always sought to raise the standard of living for Green Tree residents.

John brought a well-developed professionalism to his responsibilities, in budgeting, personnel, and providing local services. But John's constituents count on him not just to make sure the streets are plowed free of snow and safe to walk at night. They know, too, that they can find him ready with a listening ear, or a fresh notepad to take down their ideas and concerns, or perhaps just to talk across the fence about the weather. His personal concern for people recalls all that is uniquely special to America's small towns. Indeed, John's ideals have played a significant role in making Green Tree a great community, large or small.

Mr. President, from thousands of neighborhoods and communities like Green Tree, our Nation draws its values and innate strength. On behalf of all of my Pennsylvania constituents, I salute my good friend, John Bonassi, for doing so much for his community,

and in a larger context, for supporting the small town foundation of our democracy.●

## TRIBUTE TO RICHARD CISEK

● Mr. DURENBERGER. Mr. President, the Minnesota Orchestra will soon lose a great man, a great manager and a great leader when Richard Cisek retires later this year.

I first met Dick Cisek when I served as executive director of the Governor's Commission on the Arts in Minnesota. The wisdom and insight he shared, helped develop my own thoughts and attitudes toward music and the arts in general. And as we now face trying times here in the Congress for funding for the arts, it is these values that I return to to help guide my efforts.

Through his 32 years with the Minnesota Orchestra as public relations director, general manager, and finally as president, Dick shepherded the Minnesota Orchestra from a 35-week, two concerts a week performance to a full 52-week ensemble. He turned a city orchestra into an orchestra that reaches to all areas of the State and the region. Under Cisek's direction, the Minnesota Orchestra has turned into one of the country's finest orchestras.

Mr. President, while Cisek would be the last person to call himself a great artist, he was indeed that. His love and understanding of the music allowed Dick to never lose sight of the fact that music making is first an artistic activity, not a business. But through his skill and leadership, he was able to take the music and apply the business techniques he learned at the Warton School of Finance and Commerce to come up with a delicate balance between policy and performance that has helped pass on to others the music he loves so dearly.

Cisek has engineered some of the early performances of such great composers as Leonard Slatkin, Pinchas Zukerman, Henry Mancini, Marvin Hanisch, Andre Watts, and Andre Previn. As each of these artist has moved on, so too is it time for Dick Cisek to move on. He will now take a well deserved rest and spend time with his family. But he will also continue to assist the orchestra and will continue to share with others the love he has found in music. The departure of Dick Cisek closes the door to an eloquent and successful chapter of the Minnesota Orchestra. He will be missed.●

## APPOINTMENT OF RICHARD WEST, JR., AS DIRECTOR OF THE NATIONAL MUSEUM OF THE AMERICAN INDIAN

● Mr. BINGAMAN. Mr. President, a few weeks ago, I had the pleasure of recommending Richard West, Jr., to serve as Director of the National Museum of the American Indian. But to be quite honest, I do not know how much my words of praise mattered—Rick's strong qualifications and experiences in the Indian community and in Washington beckoned him to this most important position.

Although I could elaborate on Rick's impressive educational and work experiences, I think it is more appropriate to focus on the mutual respect he shares with the Indian community. This museum—which has been a labor of love for so many people on the Hill and across the country—will, of course, be a tremendous source of pride for the Indian people. But it will also be much more: It will be a place where opinions are formed, where stereotypes are dispelled, and where a better understanding of native Americans begins. The knowledge learned and the myths broken will last a lifetime and they will even be passed down to future generations.

With the proper tools, with the proper care, and with the proper direction, visitors to this museum can learn about the real contribution of the native American culture. I believe that Rick will offer that proper direction. His life experiences—as a person whose upbringing was built on a Cheyenne cultural heritage, as a member of family that enjoys a national reputation in the art world, and as a person whose long time work with the Indian tribes and in Indian affairs has earned him the respect of the Indian people—indicate that he will do an outstanding job serving not only the Indian community, but also the many millions of us who have such a great respect and interest in this most unique and fascinating culture. It is with a great sense of pride that I offer my congratulations to Rick.●

## OPPOSITION TO ENACTMENT OF IDAHO WILDERNESS ACT HEARD

● Mr. JOHNSTON. Mr. President, over the past several weeks I have received almost 40,000 postcards from individuals all over the country regarding S. 371, the Idaho Wilderness Act. These cards, all of which are indentical, strongly oppose the enactment of S. 371 and urge the Senate to defeat it. There have been no efforts to bring this measure before the Senate and with the significant workload still remaining before the end of the Congress, chances that this bill will pass the Senate this year are slim.

Mr. President, rather than respond to each card individually, I am taking this opportunity to acknowledge the receipt of the cards and to express my appreciation to those who expressed their views on this matter.●

## THE CALENDAR

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of calendar items 550 and 552 en bloc; that the committee amendments, where appropriate, be agreed to; that the bills as amended, where amended, be read a third time and passed; that the motion to reconsider the passage of these bills be laid on the table.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? The Chair hears none, and it is so ordered.

Mr. CRANSTON. I further ask unanimous consent that the consideration of these calendar items appear individually in the RECORD and that any statements appear at the appropriate place.

The PRESIDING OFFICER. Without objection, it is so ordered.

## AROOSTOOK BAND OF MICMACS SETTLEMENT ACT

The Senate proceeded to consider the bill (S. 1413) to settle all claims of the Aroostook Band of Micmacs resulting from the band's omission from the Maine Indian Claims Settlement Act of 1980, and for other purposes, which had been reported from the Select Committee on Indian Affairs, with amendments; as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the part of the bill intended to be inserted are shown in italic.)

S. 1413

SECTION 1. SHORT TITLE.

This Act may be cited as the "Aroostook Band of Micmacs Settlement Act".

SEC. 2. CONGRESSIONAL FINDINGS AND DECLARATION OF POLICY.

(a) FINDINGS AND POLICY.—Congress hereby finds and declares that:

(1) The Aroostook Band of Micmacs, as represented as of the time of passage of this Act by the Aroostook Micmac Council, is the sole successor in interest, as to lands within the United States, to the aboriginal entity generally known as the Micmac Nation which years ago claimed aboriginal title to certain lands in the State of Maine.

(2) The Band was not referred to in the Maine Indian Claims Settlement Act of 1980 because historical documentation of the Micmac presence in Maine was not available at that time.

(3) This documentation does establish the historical presence of Micmacs in Maine and the existence of aboriginal lands in Maine jointly used by the Micmacs and other tribes to which the Micmacs could have asserted aboriginal title but for the extinguishment of all such claims by the Maine Indian Claims Settlement Act of 1980.

(4) The Aroostook Band of Micmacs, in both its history and its presence in Maine, is similar to the Houlton Band of Maliseet Indians and would have received similar treatment under the Maine Indian Claims Settlement Act of 1980 if the information avail-

able today had been available to Congress and the parties at that time.

(5) It is now fair and just to afford the Aroostook Band of Micmacs the same settlement provided to the Houlton Band of Maliseet Indians for the settlement of that Band's claims, to the extent they would have benefited from inclusion in the Maine Indian Claims Settlement Act of 1980.

(6) Since 1820, the State of Maine has provided special services to the Indians residing within its borders, including the members of the Aroostook Band of Micmacs. During this same period, the United States provided few special services to the Band and repeatedly denied that it had jurisdiction over or responsibility for the Indian groups in Maine. In view of this provision of special services by the State of Maine, requiring substantial expenditures by the State of Maine and made by the State of Maine without being required to do so by Federal law, it is the intent of Congress that the State of Maine not be required further to contribute directly to this settlement.

(b) PURPOSE.—It is the purpose of this Act to—

(1) provide Federal recognition of the Band;

(2) provide to the members of the Band the services which the United States provides to Indians because of their status as Indians; and

(3) place $900,000 in a land acquisition fund and property tax fund for the future use of the Aroostook [Band of Micmacs.] *Band of Micmacs; and*

(4) ratify the Micmac Settlement Act, which defines the relationship between the State of Maine and the Aroostook Bank of Micmacs.

SEC. 3. DEFINITIONS.

For the purposes of this Act:

(1) The term "Band" means the Aroostook Band of Micmacs, the sole successor to the Micmac Nation as constituted in aboriginal times in what is now the State of Maine, and all its predecessors and successors in interest. The Aroostook Band of Micmacs is represented, as of the date of enactment of this Act, as to lands within the United States, by the Aroostook Micmac Council.

(2) The term "Band Tax Fund" means the fund established under section 4(b) of this Act.

(3) The term "Band Trust Land" means land or natural resources acquired by the Secretary of the Interior and held in trust by the United States for the benefit of the Band.

(4) The term "land or natural resources" means any real property or natural resources, or any interest in or right involving any real property or natural resources, including (but not limited to) minerals and mineral rights, timber and timber rights, water and water rights, and hunting and fishing rights.

(5) The term "Land Acquisition Fund" means the fund established under section 4(a) of this Act.

(6) The term "laws of the State" means the constitution, and all statutes, regulations, and common laws of the State of Maine and its political subdivisions and all subsequent amendments thereto or judicial interpretations thereof.

(7) The term "Maine Implementing Act" means the Act entitled "Act to Implement the Maine Indian Claims Settlement" that was enacted by the State of Maine in chapter 732 of the Maine Public Laws of 1979, as amended by chapter 675 of the Maine Public Laws of 1981 and chapter 672 of the Maine Public Laws of 1985, and all subsequent amendments thereto.

*(8) The term "Micmac Settlement Act" means the Act entitled "Act to implement the Aroostook Band of Micmacs Settlement Act" that was enacted by the State of Maine in chapter 148 of the Maine Public Laws of 1989, and all subsequent amendments thereto.*

[(8)] *(9)* The term "Secretary" means the Secretary of the Interior.

SEC. 4. AROOSTOOK BAND OF MICMACS LAND ACQUISITION AND PROPERTY TAX FUNDS.

(a) LAND ACQUISITION FUND.—There is hereby established in the Treasury of the United States a fund to be known as the Aroostook Band of Micmacs Land Acquisition Fund, into which $900,000 shall be deposited by the Secretary following the appropriation of sums authorized by section 10.

(b) BAND TAX FUND.—(1) There is hereby established in the Treasury of the United States a fund to be known as the Aroostook Band of Micmacs Tax Fund, into which shall be deposited $50,000 in accordance with the provisions of this Act.

(2) Income accrued on the Land Acquisition Fund shall be transferred to the Band Tax Fund until a total of $50,000 has been transferred to the Band Tax Fund under this paragraph. No transfer shall be made under this subsection if such transfer would diminish the Land Acquisition Fund to a balance of less than $900,000.

(3) Whenever funds are transferred to the Band Tax Fund under paragraph (2), the Secretary shall publish notice of such transfer in the Federal Register. Such notice shall specify when the total amount of $50,000 has been transferred to the Band Tax Fund.

(4) The Secretary shall manage the Band Tax Fund in accordance with section 1 of the Act of June 24, 1938 (52 Stat. 1037; 25 U.S.C. 162a), and shall utilize the principal and interest of the Band Tax Fund only as provided in paragraph (5) and section 5(d) and for no other purpose.

(5) Notwithstanding the provisions of title 31, United States Code, the Secretary shall pay out of the Band Tax Fund all valid claims for taxes, payments in lieu of property taxes, and fees, together with any interest and penalties thereon—

(A) for which the Band is determined to be liable;

(B) which are final and not subject to further administrative or judicial review; and

(C) which have been certified by the Commissioner of Finance in the State of Maine as valid claims that meet the requirements of this paragraph.

(c) SOURCE FOR CERTAIN PAYMENTS.—Notwithstanding any other provision of law, if—

(1) the Band is liable to the State of Maine or any county, district, municipality, city, town, village, plantation, or any other political subdivision thereof for any tax, payment in lieu of property tax, or fees, together with any interest and penalties thereon, and

(2) there are insufficient funds in the Band Tax Fund to pay such tax, payment, or fee (together with any interest or penalties thereon) in full,

the deficiency shall be paid by the Band only from income-producing property owned by the Band which is not held in trust for the Band by the United States and the Band shall not be required to pay such tax, payment, or fee (or any interest or penalty thereon) from any other source.

(d) PROCEDURE FOR FILING AND PAYMENT OF CLAIMS.—The Secretary shall, after consultation with the Commissioner of Finance of the State of Maine, and the Band, prescribe written procedures governing the filing and payment of claims under this section.

SEC. 5. AROOSTOOK BAND TRUST LANDS.

(a) IN GENERAL.—Subject to the provisions of section 4, the Secretary is authorized and directed to expend, at the request of the Band, the principal of, and income accruing on, the Land Acquisition Fund for the purposes of acquiring land or natural resources for the Band and for no other purposes. Land or natural resources acquired within the State of Maine with funds expended under the authority of this subsection shall be held in trust by the United States for the benefit of the Band.

(b) ALIENATION.—(1) Land or natural resources acquired with funds expended under the authority of subsection (a) and held in trust for the benefit of the Band may be alienated only by—

(A) takings for public use pursuant to the laws of the State of Maine as provided in subsection (c);

(B) takings for public use pursuant to the laws of the United States; or

(C) transfers made pursuant to an Act or joint resolution of Congress.

All other transfers of land or natural resources acquired with funds expended under the authority of subsection (a) and held in trust for the benefit of such Band shall be void ab initio and without any validity in law or equity.

(2) The provisions of paragraph (1) shall not prohibit or limit transfers of individual use assignments of land or natural resources from one member of the Band to another member of such Band.

(3) Land or natural resources held in trust for the benefit of the Band may, at the request of the Band, be—

(A) leased in accordance with the Act of August 9, 1955 (25 U.S.C. 415 et seq.);

(B) leased in accordance with the Act of May 11, 1938 (25 U.S.C. 396a et seq.);

(C) sold in accordance with section 7 of the Act of June 25, 1910 (25 U.S.C. 407);

(D) subjected to rights-of-way in accordance with the Act of February 5, 1948 (25 U.S.C. 323 et seq.);

(E) exchanged for other land or natural resources of equal value, or if they are not equal, the values shall be equalized by the payment of money to the grantor or to the Secretary for deposit in the land acquisition fund for the benefit of the Band, as the circumstances require, so long as payment does not exceed 25 percent of the total value of the interests in land to be transferred by the Band; and

(F) sold, only if at the time of sale the Secretary has entered into an option agreement or contract of sale to purchase other lands of approximate equal value.

(c) CONDEMNATION BY STATE OF MAINE AND POLITICAL SUBDIVISIONS THEREOF.—(1) Land or natural resources acquired with funds expended under the authority of subsection (a) and held in trust for the benefit of the Band may be condemned for public purposes by the State of Maine, or any political subdivision thereof, only upon such terms and conditions as shall be agreed upon in writing between the State and such Band after the date of enactment of this Act.

(2) The consent of the United States is hereby given to the State of Maine to further amend the [Maine Implementing Act] *Micmac Settlement Act* for the purpose of

embodying the agreement described in paragraph (1).

(d) ACQUISITION.—(1) Lands and natural resources may be acquired by the Secretary for the Band only if the Secretary has, at any time prior to such acquisition—

(A) transmitted a letter to the Secretary of State of the State of Maine stating that the Band Tax Fund contains $50,000; and

(B) provided the Secretary of State of the State of Maine with a copy of the procedures for filing and payment of claims prescribed under section 4(d).

(2)(A) No land or natural resources may be acquired by the Secretary for the Band until the Secretary files with the Secretary of State of the State of Maine a certified copy of the deed, contract, or other conveyance setting forth the location and boundaries of the land or natural resources to be acquired.

(B) For purposes of subparagraph (A), a filing with the Secretary of State of the State of Maine may be made by mail and, if such method of filing is used, shall be considered to be completed on the date on which the document is properly mailed to the Secretary of State of the State of Maine.

(3) Notwithstanding the provisions of the first section of the Act of August 1, 1888 (40 U.S.C. 257) and the first section of the Act of February 26, 1931 (40 U.S.C. 258a), the Secretary may acquire land or natural resources under this section from the ostensible owner of the land or natural resources only if the Secretary and the ostensible owner of the land or natural resources have agreed upon the identity of the land or natural resources to be sold and upon the purchase price and other terms of sale. Subject to the agreement required by the preceding sentence, the Secretary may institute condemnation proceedings in order to perfect title, satisfactory to the Attorney General of the United States, in the United States and condemn interests adverse to the ostensible owner.

(4)(A) When trust or restricted land or natural resources of the Band are condemned pursuant to any law of the United States other than this Act, the proceeds paid in compensation for such condemnation shall be deposited into the Land Acquisition Fund and shall be reinvested in acreage within unorganized or unincorporated areas of the State of Maine. When the proceeds are reinvested in land whose acreage does not exceed that of the land taken, all the land shall be acquired in trust. When the proceeds are invested in land whose acreage exceeds the acreage of the land taken, the Band shall designate, with the approval of the United States, and within 30 days of such reinvestment, that portion of the land acquired by the reinvestment, not to exceed the area taken, which shall be acquired in trust. The land acquired from the proceeds that is not acquired in trust shall be held in fee by the Band. The Secretary shall certify, in writing, to the Secretary of State of the State of Maine the location, boundaries, and status of the land acquired from the proceeds.

(B) The State of Maine shall have initial jurisdiction over condemnation proceedings brought under this section. The United States shall be a necessary party to any such condemnation proceedings. After exhaustion of all State administrative remedies, the United States is authorized to seek judicial review of all relevant matters involved in such condemnation proceedings in the courts of the United States and shall have an absolute right of removal, at its discretion, over any action commenced in the courts of the State.

(5) Land or natural resources acquired by the Secretary in trust for the Band shall be managed and administered in accordance with terms established by the Band and agreed to by the Secretary in accordance with section 102 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450f) or other applicable law.

SEC. 6. LAWS APPLICABLE.

(a) FEDERAL RECOGNITION.—Federal recognition is hereby extended to the Aroostook Band of Micmacs. The Band shall be eligible to receive all of the financial benefits which the United States provides to Indians and Indian tribes to the same extent, and subject to the same eligibility criteria, generally applicable to other federally recognized Indians and Indian tribes.

(b) APPLICATION OF FEDERAL LAW.—For the purposes of application of Federal law, the Band and its lands shall have the same status as other tribes and their lands accorded Federal recognition under the terms of the Maine Indian Claims Settlement Act of 1980.

(c) ELIGIBILITY FOR SPECIAL SERVICES.—Notwithstanding any other provision of law authorizing the provision of special programs and services by the United States to Indians because of their status as Indians, any member of the Band in Aroostook County, Maine, shall be eligible for such services without regard to the existence of a reservation or the residence of members of the Band on or near a reservation.

(d) AGREEMENTS WITH STATE REGARDING JURISDICTION.—The State of Maine and the Band are authorized to execute agreements regarding the jurisdiction of the State of Maine over lands owned by, or held in trust for the benefit of, the Band or any member of the Band. *The consent of the United States is hereby given to the State of Maine to amend the Micmac Settlement Act for this purpose: Provided, That such amendment is made with the agreement of the Aroostook Band of Micmacs.*

SEC. 7. TRIBAL ORGANIZATION.

(a) IN GENERAL.—The Band may organize for its common welfare and adopt an appropriate instrument in writing to govern the affairs of the Band when acting in its governmental capacity. Such instrument and any amendments thereto must be consistent with the terms of this Act. The Band shall file with the Secretary a copy of its organic governing document and any amendments thereto.

(b) MEMBERS.—For purposes of benefits provided by reason of this Act, only persons who are citizens of the United States may be considered members of the Band except persons who, as of the date of enactment of this Act, are enrolled members on the Band's existing membership roll, and direct lineal descendants of such members. Membership in the Band shall be subject to such further qualifications as may be provided by the Band in its organic governing document, or amendments thereto, subject to approval by the Secretary.

SEC. 8. IMPLEMENTATION OF THE INDIAN CHILD WELFARE ACT.

For the purposes of this section, the Band is an "Indian tribe" within the meaning of section 4(8) of the Indian Child Welfare Act of 1978 (25 U.S.C. 1903(8)), except that nothing in this section shall alter or affect the jurisdiction of the State of Maine over child welfare matters as provided by the Maine Indian Claims Settlement Act of 1980.

SEC. 9. FEDERAL FINANCIAL AID PROGRAMS UNAFFECTED BY PAYMENTS UNDER THIS ACT.

(a) STATE OF MAINE.—No payments to be made for the benefit of the Band pursuant to this Act shall be considered by any agency or department of the United States in determining or computing the eligibility of the State of Maine for participation in any financial aid program of the United States.

(b) BAND AND MEMBERS OF THE BAND.—(1) The eligibility for, or receipt of, payments from the State of Maine by the Band or any of its members shall not be considered by any department or agency of the United States in determining the eligibility of, or computing payments to, the Band or any of the members of the Band under any Federal financial aid program.

(2) To the extent that eligibility for the benefits of any Federal financial aid program is dependent upon a showing of need by the applicant, the administering agency shall not be barred by this subsection from considering the actual financial situation of the applicant.

SEC. 10. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated $900,000 for the fiscal year 1990 for transfer to the Aroostook Band of Micmacs Land Acquisition Fund.

SEC. 11. INTERPRETATION.

In the event of a conflict of interpretation between the provisions of the Maine Implementing Act, *the Micmac Settlement Act*, or the Maine Indian Claims Settlement Act of 1980 and this Act, the provisions of this Act shall govern.

SEC. 12. LIMITATION OF ACTIONS.

No provision of this Act may be construed to confer jurisdiction to sue, or to grant implied consent to the Band to sue, the United States or any of its officers with respect to the claims extinguished by the Maine Indian Claims Settlement Act of 1980.

Mr. COHEN. Mr. President, I am very pleased that the Senate is set to approve S. 1413, legislation to settle the claims of the Aroostook Band of Micmacs. Passage of this legislation will correct an unintentional oversight that occurred when the Maine Indian Claims Settlement Act was signed into law in 1980. With the enactment of MICSA, the Micmac Tribe of Maine was excluded from the settlement's provisions despite the fact that it was an existing tribe with a claim similar to that put forward by another Maine tribe, the Houlton Band of Maliseets, which was included in the 1980 settlement. For a number of legitimate reasons, the Micmac's claim was not presented at the time of the negotiations on the Maine settlement bill and so it was not included in the final act.

While this might be seen as a minor slight, the impact on the Micmacs was substantial. With passage of the 1980 act, the State of Maine withdrew its own tribal assistance programs, from which the Micmacs had received funds. To make matters worse, however, the Micmacs also were cut off from Federal funding and have been unable to benefit from various programs like

health services, child welfare, and education. For a poor tribe whose members are basketmakers and migrant laborers, the omission from the 1980 act has made it extremely difficult for the tribe to tackle its unemployment, illiteracy, and health problems.

S. 1413 aims to remedy this unfortunate situation by providing the Aroostook Band of Micmacs with Federal recognition and a $900,000 land trust fund so that a permanent land base can be secured. It is a bill that simply addresses the basic unfairness which has resulted from the enactment of the original Maine Settlement Act.

This bill has gained significant support in Maine, having been memorialized by the Maine State Legislature and strongly supported by the State's attorney general. Legislation to implement the Federal law in Maine has already been approved by the legislature. It is obvious that the need for addressing this issue is quite compelling.

I want to add a few words of thanks to several people who helped in securing passage of this bill in the Senate. The first is my dear colleague, Senator INOUYE, chairman of the Select Committee on Indian Affairs, whose support for this bill has been invaluable. In addition, Pete Taylor of the committee's staff deserves thanks for his wise counsel and guidance in the drafting and consideration of the bill.

Finally, I must commend Becca Yturregui and Reed Dyer, students at Winthrop High School in Winthrop, ME, for revealing, in a most eloquent fashion, the real needs of the Micmacs and the importance of bringing to the tribe a fair resolution of this issue. Becca and Reed, at the urging of their teacher, Linda McKee, organized a group at Winthrop High called Students Organized to Support Micmacs. Thus began a kind of cultural exchange program between the Winthrop students, who lived hundreds of miles from the Micmacs, and their Micmac peers. From all accounts, the program has been an unqualified success. Becca and Reed traveled to Washington, DC, in March to testify at the hearings on S. 1413, and their strong message of support had a great impact on all who listened.

The Senate is now poised to follow Becca and Reed's lead and approve S. 1413. It is only fair that we do so, and I hope the bill will be enacted into law in the near future so that the Aroostook Band of Micmacs can obtain the benefits that have been accorded other Maine tribes.

I thank my colleagues for their support of this legislation.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendments.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass?

So the bill (S. 1413) was passed.

## HOUSING AND COMMUNITY DEVELOPMENT ACT AMENDMENTS

The Senate proceeded to consider the bill (S. 2354) to amend the Housing and Community Development Act of 1974 to make technical corrections for grants to Indian tribes, and for other purposes.

Mr. McCAIN. Mr. President, I am pleased that the Senate is moving to prompt consideration of S. 2354, my bill making technical corrections necessitated by the enactment of the Housing and Urban Development Reform Act of 1989.

When the HUD Reform Act was adopted, the authority to make community development block grants to Indian tribes was inadvertently eliminated. There was no intention to do so; in fact, we have appropriated $27 million for this purpose for the current year.

This bill will restore the authority to make such grants under a 1 percent set-aside for Indian tribes. It is supported by the Department of Housing and Urban Development, and was approved unanimously by the Select Committee on Indian Affairs.

I have sought to move this bill expeditiously because applications by tribes for funding have already been received and are under review in regional HUD offices. Prompt action will allow the most meritorious applications for economic development projects on reservations to be soon aproved, and construction or rehabilitation work to begin.

I thank all of my colleagues for their support of S. 2354. I hope that the House will move swiftly and favorably on S. 2354.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. AMENDMENTS TO HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974.

(a)(1) Subsection (c) of section 109 of the Housing and Community Development Act of 1974 (42 U.S.C. 5301(c)) is amended by inserting immediately after "Federal assistance provided" the following: "to States and units of general local government".

(2) Subsection (a) of section 106 of such Act (42 U.S.C. 5306(a)) is amended to read as follows:

"(a)(1) For each fiscal year, of the amount approved in an appropriation Act under section 103 for grants in any year, the Secretary shall reserve for grants to Indian tribes not less than one percent of the amount appropriated under such section. The Secretary shall provide for distribution of amounts under this paragraph to Indian tribes on the basis of a competition conducted pursuant to specific criteria for the selection of Indian tribes to receive such amounts. The criteria shall be contained in a regulation promulgated by the Secretary after notice and public comment. Notwithstanding any other provision of this Act, such grants to Indian tribes shall not be subject to the requirements of section 104, except subsections (f), (g), and (k) of such section.

"(2) After reserving such amounts for Indian tribes, the Secretary shall allocate amounts provided for use in accordance with section 107.

"(3) Of the amount remaining after allocations pursuant to paragraphs (1) and (2), 70 percent shall be allocated by the Secretary to metropolitan cities and urban counties. Except as otherwise specifically authorid, each metropolitan city and urban county shall be entitled to an annual grant from such allocation in an amount not exceeding its basic amount computed pursuant to paragraph (1) and (2) of subsection (b).".

(3) Paragraphs (1) and (2) of subsection (b) of section 106 of such Act (42 U.S.C. 5306(b)) are each amended by deleting "after taking into account the set-aside for Indian tribes under paragraph (7), the" and inserting in lieu thereof "The".

(4) Paragraph (7) of subsection (b) of section 106 of such Act (42 U.S.C. 5306(b)) is repealed.

(5) Paragraph (1) of subsection (d) of section 106 of such Act (42 U.S.C. 5306(d)) is amended by deleting "section 107 and section 119" and inserting in lieu thereof "paragraphs (1) and (2) of subsection (a) of section 106".

(6) Paragraph (2) of subsection (e) of section 107 of such Act (42 U.S.C. 5307(e)) is amended by inserting immediately after "this section" a comma and the following: "section 106(a)(1),".

SEC. 2. AMENDMENTS TO DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT REFORM ACT.

(a) Subsection (c) of section 702 of the Department of Housing and Urban Development Reform Act of 1989 is repealed.

(b) Subsection (e) of section 702 of such Act is amended by deleting "1991" and inserting in lieu thereof "1990".

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Nos. 515, 548, 549 en bloc; that the Committee amendments, where appropriate, be agreed to; that the bills, as amended, where amended, be deemed read a third time and passed; that the motion to reconsider the passage of these bills be laid upon the table.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I ask unanimous consent that any statements relating to these calendar items appear at the appropriate place in the RECORD, and that the consideration of these items appear individually in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

## DESIGNATIONS OF COMPONENTS OF THE WILD AND SCENIC RIVERS SYSTEM

The bill (H.R. 644) to amend the Wild and Scenic Rivers Act by designating segments of the East Fork of the Jemez and Pecos Rivers in New Mexico as components of the National Wild and Scenic Rivers System, was considered, ordered to a third reading, read the third time, and passed.

## ENERGY POLICY AND CONSERVATION ACT AMENDMENTS

The Senate proceeded to consider the bill (S. 2088) to amend the Energy Policy and Conservation Act to extend the authority for titles I and II, and for other purposes; which had been reported from the Committee on Energy and Natural Resources, with an amendment to strike all after the enacting clause, and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

That this Act may be referred to as the "Energy Policy and Conservation Act Amendments of 1990";

SEC. 2. EXTENSION OF AUTHORITY.

The Energy Policy and Conservation Act (42 U.S.C. 6201 et seq.) is amended—

(a) in section 104(b)(1) by striking out "August 15, 1990" and inserting in lieu thereof "September 30, 1993";

(b) in section 171, by striking out "August 15, 1990" each place it appears and inserting in lieu thereof "September 30, 1993"; and

(c) in section 281, by striking out the term "August 15, 1990" each place it appears and inserting in lieu thereof "September 30, 1993";

SEC. 3. ENLARGEMENT OF SPR TO ONE BILLION BARRELS.

(a) Section 159 of the Energy Policy and Conservation Act (Public Law 94-163), as amended (42 U.S.C. 6239), is amended by adding the following new subsections:

"(i) No later than eighteen months after enactment of the Energy Policy and Conservation Act Amendments of 1990, the Secretary shall transmit to the Committee on Energy and Natural Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives a report on the results of negotiations undertaken pursuant to part C. The report shall—

"(1) describe the terms of any contracts negotiated pursuant to part C and any cost savings that would result from such contracts relative to the costs of acquisition pursuant to part B.

"(2) give estimates, or ranges of estimates, of any cost savings that would likely result from additional contracts that could be negotiated pursuant to part C for completion of the storage of one billion barrels of petroleum products in the Reserve relative to the costs of acquisition pursuant to part B.

"(j) No later than twenty-four months after enactment of the Energy Policy and Conservation Act Amendments of 1990, the Secretary shall amend the Strategic Reserve Plan to prescribe plans for completion of storage of one billion barrels of petroleum products in the Reserve. Such amendment shall comply with the provisions of section 159 and shall detail the Secretary's plans for the design, construction, leasing or other acquisition, and fill of storage and related facilities of the Reserve to achieve such one billion barrels of storage. Such amendment shall not be subject to the congressional review procedures contained in section 551. In assessing alternatives in the development of such plans, the Secretary shall consider leasing privately owned storage facilities.".

(b) Section 160 of the Energy Policy and Conservation Act, as amended (42 U.S.C. 6240), is amended—

(1) by substituting in paragraph (c)(3)—

(A) the term "fiscal year 1993" for the term "fiscal years 1988 and 1989", and

(B) the term "1,000,000,000" for the term "at least 750,000,000", and

(2) in paragraph (d)(1)—

(A) by substituting in subparagraph (A) the term "1,000,000,000" for the term "750,000,000", and

(B) in inserting before the period at the end of subparagraph (B) the words "and the Secretary has amended the Strategic Petroleum Reserve Plan as required by section 159(j).".

SEC. 4. PREDRAWDOWN DIVERSION OF SPR OIL.

(a) Section 161 of the Energy Policy and Conservation Act, as amended (42 U.S.C. 6241), is amended by adding the following new subsection:

"(h)(1) If the President finds that a severe energy supply interruption may be imminent, then the execution of new contracts for petroleum products for injection into the Strategic Petroleum Reserve may be curtailed or suspended for a period not to exceed thirty days, and the provisions of sections 160 (c) and (d) shall not apply: *Provided, however,* That the President may extend such finding for additional thirty-day periods if he finds that the conditions that justified the initial finding still exist.

"(2) The period during which such Presidential findings is in effect, and the quantity of any petroleum products involved, shall be disregarded in applying the provisions of such subsections for periods following the effective period of such finding.

"(3) When such a finding is in effect, the Secretary is authorized to sell, in accordance with rules or regulations which he shall promulgate, any petroleum products acquired for storage in, but not injected into, the Strategic Petroleum Reserve.".

(b) Section 167(b)(3) of the Energy Policy and Conservation Act (42 U.S.C. 6247(b)(3)) is amended by inserting a comma and the words "and from the sale of petroleum products under section 161(h)" before the period at the end of the section.

(c) Section 167(d) of the Energy Policy and Conservation Act (42 U.S.C. 6247(d) is amended by inserting a comma and the words "and from the sale of petroleum products under section 161(h)" after the words "such section".

SECTION 5. LEASING AUTHORITY.

Title I of the Energy Policy and Conservation Act is amended by adding the following new part after part B and redesignating parts accordingly:

"PART C—SUPPLEMENTARY OIL RESERVE

"DECLARATION OF POLICY

"SEC. 171. (a) The Congress finds that budgetary constraints have hindered completion of a one billion barrel Strategic Petroleum Reserve, and that establishment of a Supplementary Oil Reserve can help diminish the vulnerability of the United States to the effects of a severe energy supply interruption, and contribute to the effectiveness of the international energy program.

"(b)(1) It is hereby declared to be the policy of the United States, to the extent consistent with the Strategic Petroleum Reserve program, to encourage supplementation of the Strategic Petroleum Reserve and other domestic petroleum product stocks by contracting for Supplementary Oil Reserve storage of petroleum products in, or readily accessible to, the United States by private firms or foreign governments in facilities not owned by the United States, and by contracting for Supplementary Oil Reserve storage in Government-owned facilities.

"(2) The purpose of this part is to add to the Secretary's existing authority under part B to contract for petroleum products and storage and related facilities for the Strategic Petroleum Reserve by authorizing the Secretary to contract for Supplementary Oil Reserve storage in facilities other than those of the Strategic Petroleum Reserve, and for Supplementary Oil Reserve storage, in otherwise unused Strategic Petroleum Reserve storage facilities, of petroleum products owned by any person or government.

"(3) It is the policy of the United States that the authorities provided by this part shall be used as a complement to the Strategic Petroleum Reserve and not in any manner which reduces the effectiveness of, or diminishes the control of the President and the Secretary over, the drawndown or distribution of the Strategic Petroleum Reserve.

"DEFINITIONS

"SEC. 172. Terms used in this part have the same meaning that they have in part B.

"CONTRACTING FOR PETROLEUM PRODUCTS AND FACILITIES

"SEC. 173. (a) The Secretary may contract for Supplementary Oil Reserve storage, in storage facilities other than those of the Strategic Petroleum Reserve, of petroleum products not owned by the United States.

"(b) Petroleum products stored under such a contract are subject to the Secretary's authority under section 161 (except sections 161(e) and (g)) to draw down and distribute petroleum products, as if those petroleum products were in the Strategic Petroleum Reserve.

"USE OF STRATEGIC PETROLEUM RESERVE FACILITIES

"SEC. 174. (a) The Secretary may contract for Supplementary Oil Reserve storage, in otherwise unused Strategic Petroleum Reserve facilities, of petroleum products not owned by the United States, to the extent consistent with the purposes of part B and of this part. A contract entered into under this section shall not limit the discretion of the President or the Secretary to conduct a drawdown and distribution of the Strategic Petroleum Reserve.

"(b) Petroleum products stored under any such contract are subject to the authority of the Secretary under section 161 (except sections 161(e) and (g)) to draw down and distribute petroleum products, as if those petroleum products were in the Strategic Petroleum Reserve.

"(c) The Secretary may store petroleum products under this section with or without charge, or pay a fee for their storage.

"STRATEGIC PETROLEUM RESERVE TIE-IN

"SEC. 175. (a) If the Secretary determines that one or more contracts or proposed contracts for Supplementary Oil Reserve storage of petroleum products under section 173 or 174 would for their duration achieve benefits comparable to equivalent storage of petroleum products in the Strategic Petroleum Reserve and that, because of budgetary constraints, equivalent storage of petroleum products in the Strategic Petroleum Reserve cannot be accomplished, the Secretary may so notify each House of the Congress, including in his notification the same information required under section 154(e) with regard to storage and related facilities proposed to be included, or petroleum products proposed to be stored, in the Strategic Petroleum Reserve. From sixty calendar days after notification, all petroleum products actually stored under such a contract shall be counted as part of the Strategic Petroleum Reserve for purposes of part B.

"(b) Petroleum products counted as part of the Strategic Petroleum Reserve under this section, if otherwise eligible, qualify to satisfy an applicable provisions for Regional Petroleum Reserves or noncontinuous storage under part B.

"(c) Notwithstanding any other law, the expiration of a contract for the storage of petroleum products under section 173 or 174 is not a violation of any requirement concerning the size or rate of fill of the Strategic Petroleum Reserve. For purposes of section 160(d), the reduction in the quantity of crude oil in storage in the Strategic Petroleum Reserve attributable to expiration of such a contract is considered to occur between the end of the fiscal year in which expiration actually occurs and the beginning of the following fiscal year.

"IMPLEMENTATION

"SEC. 176. (a) Notwithstanding subsection 160(c), the Secretary may use, for the acquisition of petroleum products or of petroleum product storage under this part, without further appropriation, funds available for the planning, administration, acquisition, and construction of storage and related facilities of the Strategic Petroleum Reserve, and funds available for the acquisition, transportation, and injection of petroleum products into the Strategic Petroleum Reserve. For the purposes of this section, the acquisition of petroleum products includes payments of amounts due upon the expiration, termination or other conclusion of the acquisition contract.

"(b) The Secretary, in any contract entered into under this part, may provide for the acquisition by purchase or exchange of stored petroleum products by the United States, for storage in, or use in connection with, a drawdown and distribution of petroleum products from the Strategic Petroleum Reserve.

"(c) An amendment of the Strategic Petroleum Reserve Plan is not required for any action taken under this part.

"(d) Petroleum products stored and facilities used in the Supplementary Oil Reserve have the same status as petroleum products and facilities owned by the United States for all purposes associated with the exercise of the laws of any State or political subdivision thereof.

"(e) Contracts under this part may be of such duration as the Secretary considers necessary or appropriate.

"(f) For purposes of any law or regulation affecting the solicitation, negotiation, execution or performance of contracts, contractual action pursuant to this part need not comply with applicable laws and regulations (other than those directly relating to safety, health or the environment) governing the construction of facilities, or the acquisition or provision of services or property.

"(g) Upon the expiration, termination or other conclusion of a contract with a foreign government or agency thereof entered into under section 173 or 174, the President, notwithstanding any other law, may permit export of crude oil which has been stored pursuant to such contract.

"(h) The Secretary may agree to binding arbitration of disputes under any contract, including a contract with a foreign government or agency thereof, entered into pursuant to section 173 or 174.

"(i) Section 3(c) of the Trade Agreements Act of 1979 (19 U.S.C. 2504(c)) shall apply to a bill submitted by the President in implementation of an international agreement or other agreement negotiated in fulfillment of this part, as if the international agreement of other agreement were an agreement approved under section 2(a) of that Act when the President determines that it is necessary or appropriate to amend, repeal or enact a statute of the United States to implement a requirement of, or amendment to, the international agreement or other agreement.".

SEC. 6. EXEMPTION FROM INTERSTATE COMMERCE ACT.

Section 159 of the Energy Policy and Conservation Act, as amended (42 U.S.C. 6239), is amended by adding the following new subsection:

"(k) A storage or related facility of the Strategic Petroleum Reserve owned by or leased to the United States is not subject to the Interstate Commerce Act."

SEC. 7. AUTHORITY TO ALLOW EXCHANGE OF SPR OIL.

Section 161 of the Energy Policy and Conservation Act, as amended (42 U.S.C 6241), is amended by adding the following new subsection:

"(h) Notwithstanding any other law, the President may permit any petroleum products withdrawn from the Strategic Petroleum Reserve in accordance with this section to be sold and delivered for refining or exchange outside of the United States, in connection with an agreement for the delivery of refined petroleum products to the United States.".

SEC. 8 CONFORMING AMENDMENTS.

The Energy Policy and Conservation Act is amended by inserting in the table of contents at the end of Title I—Matters Related to Domestic Supply Availability, the following items:

"PART C—SUPPLEMENTARY OIL RESERVE

"Sec. 171. Declaration of Policy.
"Sec. 172. Definitions.
"Sec. 173. Contracting for Petroleum Products and Facilities.
"Sec. 174. Use of Strategic Petroleum Reserve Facilities.
"Sec. 175. Strategic Petroleum Reserve Tie-In.
"Sec. 176. Implementation.".

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, shall it pass?

So the bill (S. 2088) was passed.

## JUAN BAUTISTA DE ANZA NATIONAL HISTORIC TRAIL

The Senate proceeded to consider the bill (H.R. 1159) to amend the National Trails System Act by designating the Juan Bautista de Anza National Historic Trail, and for other purposes, which had been reported from the Committee on Energy and Natural Resources, with an amendment.

On page 2, line 18, strike "Interior.", and insert the following: "Interior. No lands or interests therein outside the exterior boundaries of any federally administered area may be acquired by the Federal Government for the Juan Bautista de Anza National Historic Trail without the consent of the owners thereof.".

So as to make the bill read:

H.R. 1159

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Juan Bautista de Anza National Historic Trail Act".

SEC. 2. JUAN BAUTISTA DE ANZA NATIONAL HISTORIC TRAIL.

(a) DESIGNATION.—Section 5(a) of the National Trails System Act (16 U.S.C. 1244(a)) is amended by adding at the end thereof the following:

"(17) The Juan Bautista de Anza National Historic Trail, a trail comprising the overland route traveled by Captain Jaun Bautista de Anza of Spain during the years 1775 and 1776 from Sonora, Mexico, to the vicinity of San Francisco, California, of approximately 1,200 miles through Arizona and California, as generally described in the report of the Department of the Interior prepared pursuant to subsection (b) entitled 'Juan Bautista de Anza National Trail Study, Feasibility Study and Environmental Assessment' and dated August 1986. A map generally depicting the trail shall be on file and available for public inspection in the Office of the Director of the National Park Service, Washington, District of Columbia. The trail shall be administered by the Secretary of the Interior. No lands or interests therein outside the exterior boundaries of any federally administered area may be acquired by the Federal Government for the Juan Bautista de Anza National Historic Trail without the consent of the owner thereof. In implementing this paragraph, the Secretary shall encourage volunteer trail groups to participate in the development and maintenance of the trail.".

(b) AUTHORIZATION OF APPROPRIATIONS.—Section 10(c)(2) of the National Trails System Act (16 U.S.C. 1249(c)) is amended by striking the first sentence and inserting: "Except as otherwise provided in this Act, there is authorized to be appropriated such sums as may be necessary to implement the provisions of this Act relating to the trails designated by section 5(a).".

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read the third time.

The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill pass?

So the bill (H.R. 1159), as amended, was passed.

## YOSEMITE NATIONAL PARK CENTENNIAL MEDAL ACT

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 537, S. 2388, Yosemite National Park commemorative medals bill.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 2388) to provide for the striking of medals in commemoration of the centennial of Yosemite National Park.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Banking, Housing, and Urban Affairs, with an amendment to strike all after the enacting clause, and inserting in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Coin Act of 1990".

### TITLE I—YOSEMITE CENTENNIAL MEDALS

SEC. 101. SHORT TITLE.

This title may be cited as the "Yosemite National Park Centennial Medal Act".

SEC. 102. YOSEMITE NATIONAL PARK CENTENNIAL MEDALS.

(a) STRIKING AND DESIGN OF MEDALS.—In commemoration of the centennial of Yosemite National Park in 1990, the Secretary of the Treasury (hereafter in this title referred to as the "Secretary") shall strike medals with suitable emblems, devices, and inscriptions capturing the scenic and historic significance of the park. The design of the medals shall be determined by the Secretary in consultation with the Secretary of the Interior and the Commission of Fine Arts.

(b) SALE OF MEDALS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, the medals issued under this title shall be sold by the Secretary at a price equal to the cost of designing and issuing such medals (including labor, materials, dies, use of machinery, and overhead expenses) and the surcharge provided for in paragraph (3).

(2) BULK SALES.—The Secretary shall make bulk sales at a reasonable discount.

(3) SURCHARGES.—All sales shall include a surcharge of $2 each.

SEC. 103. DISTRIBUTION OF SURCHARGES.

All surcharges which are received by the Secretary from the sale of medals issued under this title shall be promptly paid by the Secretary to a permanent endowment fund for the benefit of Yosemite National Park to be administered by the National Park Foundation. The net income from the fund shall be paid to the Secretary of the Interior for purposes of funding special supplemental projects relating to back country trail development and rehabilitation, and the preservation of Sequoia groves within the boundaries of Yosemite National Park.

SEC. 104. SALE OF MEDALS IN NATIONAL PARK FACILITIES.

The Secretary and the Secretary of the Interior shall enter into a memorandum of agreement to allow—

(1) the Secretary to deliver medals to the Secretary of the Interior; and

(2) the Secretary of the Interior to provide for the sale of the medals in national park facilities.

SEC. 105. METAL CONTENT AND SIZE OF MEDALS.

The medals authorized to be struck and delivered under this title shall be struck in bronze and in the size determined by the Secretary in consultation with the Secretary of the Interior.

SEC. 106. NATIONAL MEDALS.

The medals authorized by this title are national medals for purposes of chapter 51 of title 31, United States Code.

SEC. 107. EXAMINATION OF RECORDS.

The Comptroller General of the United States shall have the right to examine all books, documents, and other records of the National Park Foundation which are related to the medals authorized by this title.

### TITLE II—GENERAL PROVISIONS

SEC. 201. DENOMINATIONS, SPECIFICATIONS, AND DESIGN OF COINS.

Subsection (d)(1) of section 5112 of title 31, United States Code, is amended by striking the fourth sentence.

SEC. 202. DESIGN CHANGES REQUIRED FOR CERTAIN COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(3) The design on the reverse side of the half dollar, quarter dollar, dime coin, 5-cent coin, and one-cent coin shall be selected for redesigning. One or more coins may be selected for redesign at the same time, but the first designated coin shall have a design commemorating the two hundredth anniversary of the United States Constitution for a period of 1 years after it is first issued. After that 2-year period, the bicentennial coin shall have its design changed in accordance with the provisions of this subsection. Such selection, and the minting and issuance of the first selected coin shall be made not later than 1 year after the date of the enactment of this paragraph. All such redesigned coins shall conform with the inscription requirements set forth in paragraph (1) of this subsection.".

SEC. 203. DESIGN ON OBVERSE SIDE OF COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end the following new paragraph:

"(4) Subject to paragraph (2), the design on the obverse side of the half dollar, quarter, dime coin, 5-cent coin, and one-cent coin shall contain the likenesses of those currently displayed and shall be considered for redesign. All such coin obverse redesigns shall conform with the inscription requirements set forth in paragraph (1) of this subsection.".

SEC. 204. SELECTION OF DESIGNS.

The design changes for each coin authorized by the amendments made by this title shall take place at the discretion of the Secretary of the Treasury and shall be done at the rate of one or more coins per year, to be phased in over 6 years after the date of enactment of this Act. In selecting new designs, the Secretary of the Treasury shall consider, among other factors, thematic representatives of the following constitutional concepts: freedom of speech and assembly; freedom of the press; right to due process of laws; right to a trial by jury; right to equal protection under the law; right to vote; themes from the Bill of Rights; and separation of powers, including the independence of the judiciary. The designs shall be selected by the Secretary of the Treasury upon consultation with the United States Commission on Fine Arts.

SEC. 205. REDUCTION OF THE NATIONAL DEBT.

Subsection (a)(1) of section 5132 of title 31, United States Code, is amended by inserting after the third sentence the following: "Any profits received from the sale of uncirculated and proof sets of coins shall be deposited by the Secretary in the general fund of the Treasury and shall be used for the sole purpose of reducing the national debt.".

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for the striking of medals in commemoration of the centennial of Yosemite National Park, and for other purposes."

AMENDMENT NO. 1682

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The Clerk will report.

The legislative clerk read as follows:

The Senator from Idaho [Mr. McCLURE] proposes an amendment numbered 1682.

Mr. McCLURE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of S. 2388, add the following new title:

### TITLE III—SILVER PROOF SETS

SEC. 301. SHORT TITLE.

This title may be cited as the "Silver Coin Proof Sets".

SEC. 302. AMENDMENT TO TITLE 31, UNITED STATES CODE.

Subsection (a) of section 5132 of title 31, United States Code is amended by re-designating paragraphs (2), (3), and (4) as paragraphs (3), (4), and (5), respectively, and by inserting after paragraph (1) the following new paragraph:

"(2)(A) In addition to the proof sets under paragraph (1), the Secretary shall annually sell to the public directly and by mail, sets of proof coins minted under paragraphs (1) through (6) of section 5112(a) of this title in which, notwithstanding any other provision of law, the coins described in paragraphs (1), (2), (3), and (4) of section 5112(a), shall be an alloy of 90 percent silver and 10 percent copper. All coins under this paragraph shall have a Mint mark indicating their place of manufacture. For purposes of subsection (a)(3) of section 5111 of this title,

and paragraph (1) of this subsection, all coins minted under this paragraph shall be considered numismatic items.

"(B) The Secretary shall obtain silver for coins authorized under this title by purchase from stockpiles established under the Strategic and Critical Materials Stock Piling Act (50 U.S.C. et seq.). At such time as the silver stockpile is depleted, the Secretary shall acquire silver for such coins by purchase of silver mined from natural deposits in the United States, or in a territory or possession of the United States within one year after the month in which the ore from which it is derived was mined. The Secretary shall pay not more than the average world price for the silver. The Secretary may issue such regulations as may be necessary to carry out this paragraph.

"(C) The coins issued under this title shall be legal tender as provided in section 5103 of title 31, United States Code."

SEC. 303. GENERAL WAIVER OF PROCUREMENT REGULATIONS.

"(a) IN GENERAL.—Except as provided in subsection (b), no provision of law governing procurement or public contracts shall be applicable to the procurement of goods and services necessary for carrying out the provisions of this title.

"(b) EQUAL EMPLOYMENT OPPORTUNITY.—Subsection (a) shall not relieve any person entering into a contract under the authority of this title from complying with any law relating to equal employment opportunity. No firm shall be considered a Federal Contractor for purposes of 41 C.F.R. part 60 et seq. as a result of participating as a United States Mint coin consignee."

Mr. McCLURE. Mr. President, the amendment I offer has been agreed to by the Senate and the House. However, due to circumstances beyond my control, it has not yet been enacted. Unfortunately, to my knowledge, there is no opposition to this measure, it simply dies because it has been attached to vehicles which are defeated for other reasons. Therefore, I hope it will make it this time and will not get caught up in an unrelated debate.

Mr. President, this amendment is very simple. It directs the Secretary of the Treasury to issue coin proof sets which are 90 percent silver. Under existing law, proof sets are issued which include the dollar, half dollar, quarter, dime, nickel, and penny. This amendment requires that the dollar, half dollar, quarter, and dime will be 90 percent silver and 10 percent copper. These proof sets will be in addition to the proof sets currently issued under section 5132 of title 31.

A year ago, a poll was conducted in the Coin World paper. Over 1,100 responses were received. Of those, 92.3 percent said they would purchase proof sets containing 90 percent silver coins, even though the prices would be greater than the current proof set prices. Responses were from collectors, investors, dealers, and others.

Mr. President, I believe it is clear that the American public would like the opportunity to purchase proof coins which are 90 percent silver. Therefore, I hope this legislation will be enacted quickly and sent to the President for his signature.

The PRESIDING OFFICER. The question in on agreeing to the amendment.

The amendment (No. 1682) was agreed to.

Mr. CRANSTON. I move to reconsider the vote.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2388

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. SHORT TITLE.

This Act may be cited as the "Coin Act of 1990".

TITLE I—YOSEMITE CENTENNIAL MEDALS

SEC. 101. SHORT TITLE.

This title may be cited as the "Yosemite National Park Centennial Medal Act".

SEC. 102. YOSEMITE NATIONAL PARK CENTENNIAL MEDALS.

(a) STRIKING AND DESIGN OF MEDALS.—In commemoration of the centennial of Yosemite National Park in 1990, the Secretary of the Treasury (hereafter in this title referred to as the "Secretary") shall strike medals with suitable emblems, devices, and inscriptions capturing the scenic and historic significance of the park. The design of the medals shall be determined by the Secretary in consultation with the Secretary of the Interior and the Commission of Fine Arts.

(b) SALE OF MEDALS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, the medals issued under this title shall be sold by the Secretary at a price equal to the cost of designing and issuing such medals (including labor, materials, dies, use of machinery, and overhead expenses) and the surcharge provided for in paragraph (3).

(2) BULK SALES.—The Secretary shall make bulk sales at a reasonable discount.

(3) SURCHARGES.—All sales include a surcharge of $2 each.

SEC. 103. DISTRIBUTION OF SURCHARGES.

All surcharges which are received by the Secretary from the sale of medals issued under this title shall be promptly paid by the Secretary to a permanent endowment fund for the benefit of Yosemite National Park to be administered by the National Park Foundation. The net income from the fund shall be paid to the Secretary of the Interior for purposes of funding special supplemental projects relating to back country trail development and rehabilitation, and the preservation of Sequoia groves within the boundaries of Yosemite National Park.

SEC. 104. SALE OF MEDALS IN NATIONAL PARK FACILITIES.

The Secretary and the Secretary of the Interior shall enter into a memorandum of agreement to allow—

(1) the Secretary to deliver medals to the Secretary of the Interior; and

(2) the Secretary of the Interior to provide for the sale of the medals in national park facilities.

SEC. 105. METAL CONTENT AND SIZE OF MEDALS.

The medals authorized to be struck and delivered under this title shall be struck in bronze and in the size determined by the Secretary in consultation with the Secretary of the Interior.

SEC. 106. NATIONAL MEDALS.

The medals authorized by this title are national medal for purposes of chapter 51 of title 31, United States Code.

SEC. 107. EXAMINATION OF RECORDS.

The Comptroller General of the United States shall have the right to examine all books, documents, and other records of the National Park Foundation which are related to the medals authorized by this title.

TITLE II—GENERAL PROVISIONS

SEC. 201. DENOMINATIONS, SPECIFICATIONS, AND DESIGN OF COINS.

Subsection (d)(1) of section 5112 of title 31, United States Code, is amended by striking the fourth sentence.

SEC. 202. DESIGN CHANGES REQUIRED FOR CERTAIN COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end of the following new paragraph:

"(3) The design on the reverse side of the half dollar, quarter dollar, dime coin, 5-cent coin, and one-cent coin shall be selected for redesigning. One or more coins may be selected for redesign at the same time, but the first designated coin shall have a design commemorating the two hundredth anniversary of the United States Constitution for a period of 2 years after it is first issued. After that 2-year period, the bicentennial coin shall ahve its design changed in accordance with the provisions of this subsection. Such selection, and the minting and issuance of the first selected coin shall be made not later than 1 year after date of the enactment of this paragraph. All such redesigned coins shall conform with the inscription requirements set forth in paragraph (1) of this subsection.".

SEC. 203. DESIGN ON OBVERSE SIDE OF COINS.

Subsection (d) of section 5112 of title 31, United States Code, is amended by adding at the end of the following new paragraph:

"(4) Subject to paragraph (2), the design on the obverse side of the half dollar, quarter, dime coin, 5-cent coin, and one-cent coin shall contain the likenesses of those currently displayed and shall be considered for redesign. All such coin obverse redesigns shall conform with the inscription requirements set forth in paragraph (1) of this subsection.".

SEC. 204. SELECTION OF DESIGNS.

The design changes for each coin authorized by the amendments made by this title shall take place at the discretion of the Secretary of the Treasury and shall be done at the rate of one or more coins per year, to be phased in over 6 years after the date of enactment of this Act. In selecting new designs, the Secretary of the Treasury shall consider, among other factors, thematic representations of the following constitutional

concepts: freedom of speech and assemply; freedom of the press; right to due process of law; right to a trial by jury; right to equal protection under the law; right to vote; themes from the Bill of Rights; and separation of powers, including the independence of the judiciary. The designs shall be selected by the Secretary of the Treasury upon consultation with the United States Commission on Fine Arts.

SEC. 205. REDUCTION OF THE NATIONAL DEBT.

Subsection (a)(1) of section 5132 of title 31, United States Code, is amended by inserting after the third sentence the following: "Any profits received from the sale uncirculated and proof sets of coins shall be deposited by the Secretary in the general fund of the Treasury and shall be used for the sole purpose of reducing the national debt.".

TITLE III—SILVER PROOF SETS

SEC. 301. SHORT TITLE.

This title may be cited as the "Silver Coin Proof Sets".

SEC. 302. AMENDMENT TO TITLE 31, UNITED STATES CODE.

Subsection (a) of section 5132 of title 31, United States Code is amended by re-designating paragraphs (2), (3), and (4) as paragraphs (3), (4), and (5), respectively, and by inserting after paragraph (1) the following new paragraph:

"(2)(A) In addition to the proof sets under paragraph (1), the Secretary shall annually sell to the public directly and by mail, sets of proof coins minted under paragraphs (1) through (6) of section 5112(a) of this title in which, notwithstanding any other provision of law, the coins described in paragraphs (1), (2), (3), and (4) of section 5112(a), shall be an alloy of 90 percent silver and 10 percent copper. All coins under this paragraph shall have a Mint mark indicating their place of manufacture. For purposes of subsection (a)(3) of section 5111 of this title, and paragraph (1) of this subsection, all coins minted under this paragraph shall be considered numismatic items.

"(B) The Secretary shall obtain silver for coins authorized under this title by purchase from stockpiles established under the Strategic and Critical Materials Stock Piling Act (50 USC, 98 et seq.). At such time as the silver stockpile is depleted, the Secretary shall acquire silver for such coins by purchase of silver mined from natural deposits in the United States, or in a territory or possession of the United States within one year after the month in which the ore from which it is derived was mined. The Secretary shall pay not more than the average world price for the silver. The Secretary may issue such regulations as may be necessary to carry out this paragraph."

"(C) The coins issued under this title shall be legal tender as provided in section 5103 of title 31, United States Code.

SEC. 303. GENERAL WAIVER OF PROCUREMENT REGULATIONS.

"(a) IN GENERAL.—Except as provided in subsection (b), no provision of law governing procurement or public contracts shall be applicable to the procurement of goods and services necessary for carrying out the provisions of this title.

"(b) EQUAL EMPLOYMENT OPPORTUNITY.—Subsection (a) shall not relieve any person entering into a contract under the authority of this title from complying with any law relating to equal employment opportunity. No firm shall be considered a Federal contractor for purposes of 41 C.F.R. part 60 et seq. as a result of participating as a United States Mint coin consignee.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## AUTHORITY FOR COMMITTEES TO FILE REPORTS DURING RECESS OR ADJOURNMENT

Mr. CRANSTON. Mr. President, I ask unanimous consent that during the recess-adjournment of the Senate the Senate committees may file reported Legislative and Executive Calendar business on Thursday, May 31, between the hours of 11 a.m. and 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

## EXECUTIVE SESSION

Mr. CRANSTON. Mr. President, I ask unanimous consent that the Senate proceed to executive session to consider the following nomination, Calendar No. 777, Carl J. Kunasek to be Commissioner on Navajo and Hopi Relocation.

Mr. President, I ask that any statements appear in the RECORD as if read; that a motion to reconsider be laid on the table; that the President be immediately notified of the Senate's action; and that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

## NAVAJO AND HOPI RELOCATION

The legislative clerk read the nomination of Carl J. Kunasek, of Arizona, to be Commissioner on Navajo and Hopi Relocation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

STATEMENT ON THE NOMINATION OF CARL KUNASEK

Mr. McCAIN. Mr. President, I am pleased to be able to support Mr. Carl Kunasek, the President's nominee for the position of Navajo-Hopi Relocation Commissioner. I am delighted that the Select Committee on Indian Affairs unanimously supported this nomination. I thank our distinguished chairman, Senator INOUYE for his leadership and courtesy in moving this nomination forward. Mr. Kunasek has a long and distinguished career in the Arizona State Legislature and has exhibited both the leadership and personal commitment that are necessary for a position of public office. These fine qualities will serve him well in his position as Navajo-Hopi Relocation Commissioner.

I think those of us who worked on the recent amendments to the Navajo-Hopi Relocation Act can appreciate the magnitude of the job at hand for the new commissioner. We have seen the many difficulties faced by both tribes as the location program was implemented and as the program progressed. We have wrestled with many very difficult and heart-rending situations.

The time is at hand to complete the process of delivering relocation benefits to those eligible persons who are most in need, to continue the progress that has been achieved in the development of the new lands project, to ensure that eligible relocatees receive the benefits to which they are entitled, and to work toward the development of joint projects and cooperative approaches to community development.

Recently, I was greatly encouraged by the creation of a joint Navajo and Hopi airport authority to operate and maintain the new airport at Tuba City. The FAA awarded $1.8 million to the Navajo and Hopi tribes for the construction of the airport. This award represented an important milestone in the efforts of both tribes to seek areas of mutual benefit and pursue cooperative development projects. I believe that we can all share in this effort and that as the new relocation commissioner Mr. Kunasek's leadership and dedication can only serve to expand opportunities to the people of both tribes.

Again, I would like to offer my congratulations to Mr. Kunasek. I wish him every success in this difficult undertaking.

## LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will now return to Legislative Session.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Idaho is recognized.

Mr. McCLURE. I thank the Chair.

(The remarks of Mr. McCLURE pertaining to the introduction of S. 2674 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The majority leader is recognized.

## ORDERS FOR TOMORROW

RECESS UNTIL 9:30 A.M.; RESERVATION OF LEADER TIME; AND RESUME CONSIDERATION OF S. 1970

Mr. MITCHELL. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m. on Wednesday, May 23, and that following the prayer, the Journal of proceedings be deemed approved, that the time for the two leaders be reserved for their use later in the day; that following the reservation of leader time, the Senate resume consideration of S. 1970, the omnibus crime legislation, and upon resumption of the bill there be 45 minutes for debate on the Hatch amendment, No. 1681, with 30 minutes under the control of Senator DECONCINI and 15 minutes under the control of Senator HATCH; that when the time is used, the Senate proceed to vote on the Hatch amendment, No. 1681, without any intervening action, and that no amendments be in order to the Hatch amendment.

The PRESIDING OFFICER. Is there objection to the request? Without objection, it is so ordered.

## ORDER OF PROCEDURE

Mr. MITCHELL. Mr. President, there will be no further rollcall votes this evening. Under the unanimous-consent agreement just approved, a vote will occur on the Hatch amendment to strike the DeConcini provision from the bill at 10:15 a.m. tomorrow morning.

I regret the inconvenience to Senators by the lengthy delay that has ensued. There have been discussions between the managers and other interested Senators in an effort to resolve this and other matters related to the bill. We hope to have a further announcement later this evening in that regard, with respect to action taken following the disposition of the Hatch amendment.

I appreciate the effort made by all those concerned. I again regret the inconvenience to Senators as a result of this delay, but we will proceed to vote tomorrow morning at 10:15 on the Hatch amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, under a previous unanimous-consent agreement, the Senate will vote on the Hatch amendment No. 1681 tomorrow at 10:15 a.m. I am now about to propound a unanimous-consent request for the next matter to be considered with respect to the pending legislation following disposition of the Hatch amendment.

## UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that immediately following disposition of the Hatch amendment No. 1681, Senator GRAHAM be recognized to offer an amendment modifying the Biden language in title II of the bill; that without any intervening action or debate, the amendment be considered agreed to; that title II be considered original text for the purpose of further amendment; that Senator THURMOND then be recognized to offer a perfecting amendment in behalf of himself and Senator SPECTER regarding title II of the bill, notwithstanding the fact that the title has previously been amended; that there be 6 hours for debate on the Thurmond amendment, equally divided in the usual form; that after all time is used or yielded back, the Senate proceed to vote, without any intervening action or debate on the Thurmond amendment; that no other amendments or motions be in order to the Thurmond amendment; that following the disposition of the Thurmond amendment, no other amendments on the subject of habeas corpus be in order to this bill prior to third reading; and that the expedited procedures authorized in section 7323, Public Law 100-690, shall not apply to the consideration of S. 1757.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request?

Mr. THURMOND. Just a minute, Mr. President.

The PRESIDING OFFICER. The Senator reserves the right to object.

Mr. THURMOND. No objection, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I thank my colleagues for their cooperation, the distinguished acting Republican leader, the chairman and ranking member of the committee. So the Senate should be aware that we will vote on the Hatch amendment at about 10:15 tomorrow, then have 6 hours of debate on the Thurmond amendment relating to habeas corpus, with a vote on that at the conclusion or yielding back of that time.

Mr. President, I yield to the distinguished junior Senator from Hawaii.

(The remarks of Mr. AKAKA pertaining to a proposed amendment are printed in today's RECORD under "Amendments Submitted.")

## RECESS UNTIL 9:30 A.M. TOMORROW

The PRESIDING OFFICER (Mr. BIDEN). In my capacity as a Senator from the State of Delaware, on behalf of the majority leader, and if the distinguished Republican leader has no further business, and if no Senator is seeking recognition, I now ask unanimous consent that the Senate stand in recess under the previous order until 9:30 a.m. tomorrow, Wednesday, May 23, 1990.

There being no objection, the Senate, at 10:44 p.m., recessed until Wednesday, May 23, 1990, at 9:30 a.m.

## CONFIRMATION

Executive nomination confirmed by the Senate May 22, 1990:

NAVAJO AND HOPI RELOCATION

CARL J. KUNASEK, OF ARIZONA, TO BE COMMISSIONER ON NAVAJO AND HOPI RELOCATION.

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO THE NOMINEE'S COMMITMENT TO RESPOND TO REQUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY CONSTITUTED COMMITTEE OF THE SENATE.

# EXTENSIONS OF REMARKS

## THE CONTINUING CRISIS IN THE KASHMIR PROVINCE

**HON. ENI F.H. FALEOMAVAEGA**

OF AMERICAN SAMOA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. FALEOMAVAEGA. Mr. Speaker, I want to bring to your attention the grim conditions presently confronting the people of Kashmir Province as a result of the repressive policies of the Indian Government against these people. I call upon President Bush and Secretary Baker to take action to investigate these events that are taking place in Kashmir.

Mr. Speaker, I submit for the RECORD several relevant newspaper accounts of the problems on Kashmir.

[From the Washington Post, May 6, 1990]

INDIAN CRACKDOWN IN KASHMIR HELPS FUEL SEPARATIST CAUSE—MILITANTS, TROOPS SKIRMISH DAILY IN CITY

(By Steve Coll)

SRINAGAR, INDIA.—Rifle shots popped like firecrackers in the thin mountain air of this once-idyllic capital of Kashmir. A panicked horde of civilians rushed down a dirty alley from the main road, the men slapping mules into motion, the women gathering children under their arms as they ran.

Metal storefront shutters clanged shut. As if on cue, veiled women leaned from apartments above and pulled their windows closed. "Crossfiring," several of those fleeing called out.

Moslem militants who favor separation from India had ambushed an Indian army patrol around the corner, prompting the soldiers to return fire at a crowd of civilians. Two young men were wounded in the legs, hospital doctors said later. There were unconfirmed reports that a soldier died.

Bloody skirmishes between militant separatists and Indian soldiers now occur several times a day in Srinagar, a former tourist haven gripped these days by anger, fear and violence after five months of armed rebellion, prolonged curfews and a brutal crackdown by Indian security forces.

The Indian government contends that the situation is coming under control, but the popular separatist uprising here that has led India and Pakistan to threaten a fourth war for control of Kashmir appears more intractable than ever. Interviews with scores of Kashmiris over several days—from slum dwellers to doctors and bankers—suggested that the crackdown has polarized the population, driving many previously neutral civilians to the side of the militants.

Hindu-majority India claims full sovereignty over the region, while Islamic Pakistan urges that Kashmiris be allowed to choose their own destiny in a plebiscite. Meanwhile, Kashmiri militants have taken matters into their own hands, regularly attacking Indian soldiers and assassinating government officials.

Well-armed urban guerrillas here, some of whom have apparently obtained weapons originally supplied by the United States to Afghan rebels based in Pakistan, continue to operate with virtual impunity despite the presence of about 15,000 Indian soldiers and paramilitary troops in the Kashmir Valley. And the region's people, most of whom are Moslems, appear to be broadly sympathetic to the militants, despite severe deprivations caused by around-the-clock curfews, house-to-house searches, arbitrary detentions and beatings meted out by security forces.

The valley's several million residents have been confined to their homes for long, uninterrupted stretches—12 continuous days and nights at one point during April—while soldiers pour through slum buildings and house boats nestled along the city's lakes and canals. The searches appear to have raised the population's temper to the boiling point.

"When they have taken the gun against the people, why not take up a gun—if we have to die tomorrow, why not today?" asked Mohammed Yusuf, a 70-year-old retired school teacher.

Yusuf wept as he told how two days earlier, his son, an engineer visiting from his home in the Middle East, had been beaten by security forces after refusing to wash off anti-Indian slogans painted on a tree on the street in front of his house.

"They fell on him. They began to beat him with rifles. They hit on his head, and I fell on him and they hit me. They took him away. His whole body is injured . . . What has happened to us? I am an old man. I can't fight them."

In a slum quarter across town, Bashir Ahmed, a tailor, displayed deep scars on his arms, shoulders and feet, which he said were the result of beatings administered by Indian soldiers after he was detained during a house-to-house search in April. Ahmed said he was beaten with sticks and rifle butts until he passed out.

"I thought, 'This is the end of my life.' I asked, 'Just shoot me.' But they only beat me."

Indian government officials describe the reports of abuses by security forces—including alleged rapes and widespread thefts—as exaggerations concocted by propogandists for the separatist militants. Kashmiris opposed to the government agree that the valley is rife with rumors about atrocities allegedly committed by soldiers, and that many of the rumors are unfounded.

But physical evidence of abuses by security forces—in the form of scars, bruises, smashed windows and charred buildings—is widely visible in Srinagar.

Indian forces have virtually occupied the city, which normally overflows in May with foreign and Indian tourists attracted by the colors of the springtime bloom and spectacular views of peaks in the Himalayan range. Sandbag bunkers with machine gun barrels protruding have been erected by the army in front of hotels and handicraft shops. The houseboats, hiking trails and lakeside walks are empty.

Jammu and Kashmir Gov. Jagmohan, who has overseen the recent Indian crackdown, during which more than 300 people have died, said the recent curfews and searches were forced upon him by the Moslem militants. He denied that there had been excesses by Indian soldiers.

But Jagmohan, who uses only one name, said he had no plans to ease the crackdown. "Now I am saving the [Indian] union," he said. "How many people did Abraham Lincoln kill? If I have to use force, there is a moral legitimacy to it."

Jagmohan said his approach had produced "a massive gain" for the Indian government. But the valley's economy, which depends heavily on tourism, has been virtually shut down, and many Kashmiris said they felt they no longer had anything left to lose by fighting the Indians.

A network of police informers, known as mukhbirs and developed by the Indian government here, coupled with the growing strength of the armed militants, has forced ordinary Kashmiris to take sides as they never have before. "Now there are only two choices," said a Srinagar businessman. "You become a mukhbir or a mujahed," or Moslem holy warrior.

Doctors at a downtown Srinagar hospital said that because of a recent epidemic of meningitis in the city, a number of people had died, unable to reach medical help during the curfews. The doctors complained of acute shortages of medicines, including drugs for testing cancer.

"I'm sure Pakistan should give their highest award to Jagmohan for pushing people to become Pakistanis." said one doctor. "There are many [Kshmiri] nationalists who have become pro-Pakistani. A doctor is a suspect. A bureaucrat is a suspect, an engineer, a businessman. If we are all suspects [to the Indians], who is with them?"

The anger and desperation expressed by Kashmiris in interviews appears to have fed the growing strength of the valley's radical Islamic militant groups, particularly the Hezbollah mujaheddin, whose members say they have received money and arms—including U.S.-made Stinger anti-aircraft missiles, rocket-propelled grenades and land mines—from private sources in Pakistan, Saudi Arabia and Iran, as well as from the U.S.-backed Afghan mujaheddin rebels.

In recent months, the pro-Pakistan Hezbollah has joined the nationalistic, pro-independence Jammu and Kashmir Liberation Front in a coordinated and apparently well-planned insurgency against the Indian security forces. "We have to prepare [Kashmiris] for a long-term war, instead of a short-term war," said, instead of a short-term war," said a Hezbollah guerrilla who uses the nom de guerre Nadim.

He said his group is stockpiling weapons for what he called a "new phase" of the uprising, including assassinations of Indian government officials, plane hijackings and a full-scale guerrilla war in the Kashmir mountains. "The first thing at this time is just to catch them sleeping," he said.

While Nadim sat talking in a slum house just 50 yards from a well-manned Indian army bunker, a 15-year-old colleague brought in one of Hezbollah's weapons, an AK-47 automatic assault rifle with Chinese markings and bullets manufactured in the United States—the same type of weapon supplied by the U.S. government to Afghan

39-059 O-91-35 (Pt. 8)

rebels based across the border in Pakistan. Nadim said some Kashmiri Hezbollah guerrillas had received training from the Afghan rebels.

Many Kashmiris interviewed expressed discomfort about Hezbollah's fundamentalist ideology and pro-Pakistan stance—Islamac guerrillas have smashed and forced the closing of the valley's popular bars, video shops and cinemas as part of their crusade. Nevertheless, virtually all of Kashmir's Moslems appear to support the immediate goal of the insurgency, which is to expel India from the region, which it has controlled since independence in 1947.

"It is a matter of circumstances—if we are being terrorized, we must take up arms. It is permitted by the Koran," said Mullah Mohammed Hussain, 71, who said he had been detained and beaten by Indian security forces and told that he should stop preaching in his local mosque. "We are not going to be with India. They must either leave us, or, if they don't, we will go for the holy war."

Five months ago, many Kashmiris interviewed here said they were adamantly opposed to any war between India and Pakistan for control of the region because they wished to achieve independence on their own. Now the public mood appears to have shifted.

While few of those interviewed openly longed for war, a number said that because the international community has expressed little support for Kashmiri aspirations for independence, they now believe that only a military victory by Pakistan could free the valley from Indian control.

Kashmiris have struggled to define an identity for themselves separate from India for more than 40 years, but in the Indo-Pakistan wars of 1948, 1965 and 1971, valley residents watched quietly while the rival armies clashed along the border. This time Kashmiri militants and civilians would make life difficult for the Indian forces by stepping up guerrilla attacks and sabotaging roads and communications.

"We want the problem to be solved through peaceful means," said a Srinagar teacher. "But if that is not possible, we welcome war."

INDIA AND PAKISTAN MAKE THE MOST OF HARD FEELINGS

(By Barbara Crossette)

ISLAMABAD PAKISTAN.—Heirs of a shared ancient history, products of the same colonial administration and home to similar peoples and languages, Pakistan and India might be expected to understand and communicate with each other in times of crisis. Yet more than 40 years after their simultaneous creation, their differences have them once again polishing the words and weapons of war.

The crisis, once again, is over Kashmir, the predominantly Muslim region long disputed between Islamic Pakistan and Hindu-dominated India.

Indians and Pakistanis are drifting toward what many of them feel instinctively is a dangerous state of belligerence because grandstanding is politically useful to two beleaguered Prime Ministers, V.P. Singh and Benazir Bhutto.

There probably will not be a war, at least not in the near future, experienced diplomats and officials say. But this kind of peace is disturbing.

Democracy's normal brakes are failing, as most news organizations in both countries trumpet the government line rather than examine it. Neither the Pakistani nor the Indian Parliament is debating the issue in any productive way. Myths are thrown around: Pakistan is run by generals. India is out to conquer the region. Neither side seems interested in negotiating.

"South Asians, all of us, seem to have a fatal problem in politics," a Pakistani official said, "We do not analyze and we don't seem to understand where things are taking us. We are driven by events."

Pakistan and India have fought three times over the picturesque Kashmir Valley: in 1947, in 1965 and as part of a larger war in 1971. The last, inconclusive talks on Kashmir followed in 1972. Now, no questions are asked more frequently on both sides of the border than these: Will there be another war? And why?

India says Pakistan is behind a secessionist movement blazing out of control in the Indian part of Kashmir Indians produce "evidence" of Pakistani training camps and official plots, but diplomats say much of this does not stand up to investigation.

Pakistan, with better evidence and a stronger legal position—New Delhi won't allow a United Nations mandated plebiscite the valley—accuses India of supressing Kashmiri self-determination.

Separatism began to grow dramatically in India's Jammu and Kashmir state in 1987, when the Congress Party of former Prime Ministers Rajiv Gandhi co-opted the last independent, mainstream Kashmiri party and rigged elections there. In his first crisis after taking office in November. Prime Minister Singh, Mr. Gandhi, successor, freed jailed separatists to secure the release of the abducted daughter of his Home Minister, a Kashmiri Muslim.

With Kashmiris emboldened by the militants victory, unrest grew. New Delhi cracked down and since late January score of people have been killed in clashes with the police. Srinagar, the summer capital, remains under curfew.

The cause of a beleaguered Muslim people is a powerful one in Pakistan, and Mr. Bhutto, her administration drifting from crisis to crisis, has made the most of it. A diplomat said "there is no other single issue that has consolidated her position here as much as Kashmir." Pakistanis say that Ms Bhutto's emotive language recalls the style of her father, the late Zulfakar Alt Bhutto, when he fanned the flames that led to the 1971 war with India.

Mr. Singh's brinksmanship is also a matter of political survival. He precarious minority Government depends on support from the Hindu right and ideological left, neither of which wants to concede power to Muslims in Kashmir.

As threats grow harsher, military forces on both sides are getting prepared. Still, the overwhelming military superiority of India would seem a deterrent to conflict. Diplomats here say that the Pakistani military leadership, wary of this, might try to step in to cool the civilian Government's language.

Ms. Bhutto plans a speaking tour of Pakistani Kashmir, a semi-autonomous region, soon to back her party's candidates in elections on May 21. Tension is high there, as Indian Kashmiris arrive from across the cease-fire line with accounts of Indian brutality.

In India, there is also reported to be a cautious attitude among military leaders, some of whom were bruised by getting into the wrong kind of war in Sri Lanka. There are also concerns about a more advanced Pakistani Army growing out of its pivotal role in supplying the Afghan rebels.

In a candid interview with the news magazine India Today, Gen. Krishnaswami Sundarji, a former army chief, suggested that India's military edge may have eroded slightly. He also took issue with his Government's assertion that the war of secession in Kashmir was created in Islamabad.

The current conditions are not something that they have engineered." he said of Pakistan. It's something we've also done or not done in the last few years in Kashmir."

A LEGACY OF CONFLICT

1947—When British India is partitioned into India and Pakistan, a Muslim revolt backed by tribesmen from Pakistan flares up against the maharaja governing the state of Jammu and Kashmir, or simply Kashmir, Indian forces are dispatched to suppress the uprising and Pakistan sends troops to back the rebels.

1949—Fighting ends with a United Nations cease-fire. Kashmir is divided between Pakistan and India along the cease-fire line. Pakistan controls roughly a third of the region, in the west and northwest, and India the rest. Repeated clashes break out along the cease-fire line.

1956—A vote by the assembly in the Indian controlled part of Kashmir leads to the formation of the Indian state of Jammu, and Kashmir. India spurns Pakistani protests, backed by United Nations resolutions for a plebiscite on the future of the entire region. Azad Kashmir, or Free Kashmir, remains under the control of Pakistan.

1962—Indian and Chinese forces clash over a portion of northeastern Kashmir where China has built a road of strategic importance.

1965—War breaks out again between India and Pakistan over Kashmir. A United Nations ceasefire ends the fighting.

1971—India again fights Pakistan, wresting independent Bangladesh from what was East Pakistan. A secondary front in the war is Kashmir, where India makes some gains.

1972—India and Pakistan agree to a new cease-fire line along positions held at the end of the 1971 war.

KASHMIRIS SET FOR HIGH-TECH WAR

(By Shamim ur Rahman)

MUZAFFARABAD, KASHMIR.—Calling themselves soldiers of God, the latest batch of Kashmiri youths crossed the porous border with India into Pakistani-controlled Kashmir, claiming to have been primed for battle by Afghan war veterans.

Some of them said they were trained to use rifles, anti-tank weapons and even anti-aircraft guns in their rebellion against Indian rule of Kashmir.

"I can operate Kalashnikovs [rifles], light machine guns and the anti-tank weaponry," Shafiq Ahmed, a 26-year-old militant in the Jammu and Kashmir Liberation Front, said in a recent interview.

"I received weapons training in the semi-autonomous tribal area" on the Pakistan-Afghanistan frontier, added Hamshal Siddiqi, who comes from Baramula, on the Indian side of Kashmir.

Claiming that he fought with the Afghan resistance against the pro-Soviet regime in Kabul, he said he was trained inside Afghanistan.

"I am now trained to operate the anti-aircraft guns," Mr. Siddiqi said.

These militants, whose fighting skills appear to have been more polished recently, said they started the anti-India fight with "sticks and stones."

"Now we fight with weapons snatched from the Indian soliders or bought from the arms smugglers," the militants said, echoing Afghan resistance tactics.

Those crossing the border call themselves soldiers of God and come with few assets in search of guns and bombs to carry on the armed struggle against "outsiders in Kashmir," the Indian troops.

Their targets are the troops, government installations or pro-New Delhi officials.

Gun trade is easy in the Afghan tribal area, where people can buy arms even with Indian currency. Authorities in the Afghan resistance based in Peshawar, bordering Afghanistan, have no control over the arms dealers and avoid comments on such deals.

"These youth not only got practical training by participating in the Afghan jihad [holy war], but also returned to the occupied Kashmir with substantial weapons," said Ghulam Mohammed Safi, chief of the Kashmiris' Hizbul Mujahideen, which is backed by the Pakistani fundamentalist movement Jamaat-i-Islami.

Mr. Safi, a science graduate and a vocal leader of the multiparty alliance in Kashmir, came here a few months ago, apparently to coordinate with the local Jamaat-i-Islami, which is also well entrenched in Kashmir and India.

Zigzagging hundreds of miles across snow-capped high peaks on the way from Indian-held Kashmir's capital of Srinagar—the hub of the secessionist campaign—thousands of people have reached Muzaffarabad, the capital of Pakistan-administered Azad (free) Kashmir.

The Kashmiris, having blood relations on both sides, never recognized the Line of Control delineated as the border after the partition of the northern Himalayan state in 1949.

As the militancy grew, the perception of the valley's younger generation has also changed. For a sizable number of the educated, unemployed youths it is no longer a question of choosing between India and Pakistan.

They now demand "total independence," although others want to postpone the issue for the moment. But almost all arriving here after an arduous journey seemed united on one point—liberation from Indian rule.

The Indians also seem to have taken a cue from the Kabul-Soviet forces, another militant observed. Like the Soviets, he said, they are indulging in not only house-to-house, but "room-to-room searches."

The action outrages Kashmiri sentiments, as respect for women in the home is important for them, a Jamaat-i-Islami spokesman said.

"More and more people are supporting the struggle," he said, noting the Indians did not realize that "violation of sanctity of women" would lead to a rise in recruits.

## KEY TO DEMOCRACY IN AFRICA

### HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BURTON of Indiana. Mr. Speaker, the recent victory by the UNITA freedom fighters at Mavinga, illustrates graphically the fact that there is no military solution to the tragic conflict in Angola. UNITA has offered unconditional talks and a reconciliation process, and it is now up to the MPLA government to respond.

The people of Angola were promised democracy in 1975, and had it snatched away from them by Cuba, the Soviet Union, and the MPLA. It is time to give back to the Angolan people their shot at democracy.

I would like to commend to my colleagues this essay about Dr. Savimbi and UNITA by Rev. Maurice Dawkins, distinguished public servant, tireless fighter for civil rights, and former Republican Senate candidate in Virginia.

JONAS SAVIMBI KEY TO DEMOCRACY IN AFRICA

Democracy in Eastern Europe, as an amazing revolutionary process, has startled world opinion and freedom fighters have gained new hope in those countries where one party authoritarian rule still prevails.

Hungary, Czechoslovakia, East Germany, Poland and segments of the U.S.S.R. have been joined by Nicaragua and the Philippines as examples of democratization. Free and fair elections in Namibia have encouraged African freedom fighters to continue to struggle for the right to vote and choose their own leaders and determine their own destiny.

Against this background, the question must be asked in the spirit of the late Robert Kennedy—Why not? Why not free elections in Angola? Why not a ceasefire and U.N. monitored negotiations to follow up the Accord between Cuba, South Africa and Angola to make Namibia independence a reality.

Unfortunately, Angola and the freedom and democracy movement led by UNITA's Jonas Savimbi does not get the kind of high visibility coverage that Poland's Solidarity Movement with Lech Waleasa has enjoyed.

Instead the high powered well connected U.S. left wing public relations machinery does a superb job of painting a negative picture or even arranging for a complete black out of the "fight for democracy" in Angola.

Their propagandists would have the reader believe that the present ruling Marxist Government does not differ ideologically from the United States Government. The one-party rule, the ruthless seizing of power with the help of four and a half billion dollars of Soviet military power and Cuban mercenaries backed by the Warsaw Pack Countries Technical Assistance is pushed aside. The U.S. commitment to multiparty politics, one man one vote and free and fair elections is not mentioned. The failure of the Dos Santos government to permit opposition political views to be considered is swept under the rug.

Instead those who broke the original Alvor Agreement that called for MPLA-UNITA and FNLA participation in a democratic political process are depicted as reasonable—misunderstood—free market advocates who will make great trading partners for America.

They would have us believe that the hardline Marxist Leninists in Angola who are more in line with Castro than with Gorbachev are about to become neocapitalists and adopt a conciliatory policy granting amnesty to the "UNITA rebels" who want freedom and democracy so bad that they are willing to die for it.

They smoothly and adroitly avoid any recognition of the MPLA military failure to crush the desire for freedom from autocratic dictatorship and the hunger for independence, self determination, democratic free elections. Hiding behind the smoke screen of American anti-apartheid hatred for South Africa's inhumanity to man—he fails to tell the true facts about UNITA's anti-apartheid position and Savimbi's fierce opposition to South African control of Angola's destiny. He would have you believe that in a 15 year civil war, the only casualties were the victims of UNITA—that the MPLA and the 60,000 Cubans, the North Koreans and East Germans and North Vietnam and Portuguese mercenaries units never killed any Angolan families and children.

They would have you believe that the helicopters and MIG fighters, tanks and artillery under the guidance of Soviet "Advisers" never dropped bombs or fired rounds of ammunition that hit and killed innocent Angolans.

They would have you believe that peace initiatives and offers of political negotiations to open the Benguela Railway to permit economic trade were never undertaken by UNITA even after they soundly demonstrated that there could be no military victory in the Angolan civil war.

Most of all, they would have you believe that Dr. Jonas Savimbi is totally bad and Eduardo dos Santos is totally good. That is not so!

Savimbi, the son of a Christian minister, himself a practicing protestant, has organized or encouraged the organization of Catholic and Protestant churches in Jamba, the capitol of Free Angola territory. This man, a product of the Mao Tse Tung guerrilla training is an efficient military commander fighting a war against tremendous odds. He is also a product of the fight for freedom against Portuguese colonialism, a strong advocate of democracy and free elections to let people determine their own destiny. He also has learned all about communism and like Lech Waleasa, Corazon Aquino, and Violeta Chammoro, knows that freedom is not possible under one party Marxist dictatorship. He saw the flaws in the communist system even before Gorbachev did. He has turned to America and the free world for help while the dictatorship in Angola turned to the communist world for help.

Free market economies and one man one vote politics have been adopted as standard brand doctrine by this advocate of democratization.

For the survival of his people who faced total destruction—he accepted help from any source available—a drowning man does not care who throws him a plank or a life preserver. His anti-apartheid convictions were never compromised as military supplies came from South Africa.

This brilliant strategist and tactician is a consummate politician and has earned the respect of even his enemies for his skill in international diplomacy. Privately the African heads of state will tell you he is one of the best products that African politics has produced.

He is an important key to unlock the door of opportunity for democracy in the southern region of Africa. His vision of a Free Angola holding free elections monitored by the United Nations following the Namibia model has captured the imagination and mobilized the energies of Angolans who are willing to fight and die to make his dream a reality. A guerrilla movement cannot survive without the support of the masses of the population.

A free and fair election based on one man one vote in Angola would give independence, freedom and democracy movements in all of Africa a very much needed impetus.

The corrective medicine for dictatorship is democracy. If it is good for Namibia and South Africa, then one man one vote ought to be good for Angola too. What's good for the goose is good for the gander.

Multi-party democracy in Namibia should encourage multi-party democracy in Angola. Who knows, perhaps the dictatorships in Liberia and Ethiopia could learn a lesson from Ortega in Nicaragua and admit that people need to have a right to self-determination. Democracy would have a real future in Africa in the 21st century if the visions of Jonas Savimbi prevails. The Front Line nations in the southern region could perhaps serve as a model in a post apartheid era. Freedom and democracy could perhaps one day break out in Africa as it is today breaking out in Europe. The historical necessity for political economic and social change ultimately could prevail on the African continent. The status quo conservative will perhaps one day accept the realities of freedom as advocated by the reformers.

This vision of peace and brotherhood and the end of black fratricide is what Dr. Jonas Savimbi shared with some of the African-Americans who have visited with him in Jamba. This expression of hope for the future is what this man has shared with African-Americans who have been willing to listen to him when he visited the United States.

Is this a man too dangerous to sit at the conference table with President dos Santos of Angola—I think not! Is this a man that the African Heads of State would have included in any plans for the future of Angola—I think so!

These are the true facts.

The true picture is one where Jonas Savimbi is seen clearly as a key to democracy in Africa.

By Dr. Maurice Dawkins.

Reverend Maurice Dawkins was the Virginia Republican candidate for the U.S. Senate in 1988. He has served in a subcabinet position during the Lyndon Johnson Administration. He was Professor of Domestic Policy and Urban Affairs at the Presidents Executive Training Institute at Charlottesville. He was the West Coast Chairman of Martin Luther King Christian Leadership Conference and the Chairman of the West Coast NAACP Convention as well as President of the Los Angeles branch. The late A. Philip Randolph appointed him as West Coast Coordinator for the 1963 march on Washington. He was a founding member of the American Committee on Africa, a board member of the Negro Leadership Conference on Africa, and one of the early members of TransAfrica in its organizing year. He has traveled and visited with leaders in Angola, South Africa and was appointed by President Bush to serve on the observer team at the Namibia elections.

## IN HONOR OF CHARLES VIOLA

### HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. TORRICELLI. Mr. Speaker, it is with great respect and admiration that I address my colleagues in the House today, for I rise to extend my heartiest congratulations and warmest best wishes to Mr. Charles Viola who has been selected "All American Commander" by the National V.F.W.

Charles was born and raised in Fort Lee, NJ. He served honorably in the U.S. Army in Korea. He worked for Universal Pictures for 18 years and later was employed as a restaurant manager.

Charles was elected post commander of the Cairola-Barber Post 2342 V.F.W in 1964, and was elected post commander 13 out of the past 15 years. After joining the post in 1958, he became club manager in charge of all post affairs. He was selected "All State Commander" in 1966 and again this year. he is the only post commander in the State of New Jersey to receive this honor.

This year the post achieved 200 percent of last year's membership. The National V.F.W. chose Charles for their "All American Commander Team." He has received many awards from State and National V.F.W.'s, and he has made Post 2342 a model for all others throughout the Nation. Charles has dedicated his life to serving the V.F.W. and the community of Fort Lee. He served as the chairman of the Memorial Day Parade in Fort Lee last year, and was invited to do so again this year. Charles is one of those special few who truly make a difference in our society.

Mr. Speaker, I am proud to join in paying tribute to this exceptional man and extend my best wishes to him.

## TRIBUTE TO "MAN OF THE YEAR" MICHAEL HASHIN

### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. YATRON. Mr. Speaker, today I would like to pay tribute to one of the most inspiring men in Schuylkill County. I am speaking of Mr. Michael Hashin, who has been selected by the American, Slovak, Ukrainian, Russian Club of Schuylkill County as "Man of the Year." Mr. Hashin has well-deservedly earned such an honor. Through his dedication to his family, church, community, and business, he has served as an exemplary member of the Minersville community.

As a successful businessman, Mr. Hashin has generously contributed his knowledge and expertise to numerous community organizations, such as the Minersville Municipal Water Authority, the Miners National Bank Advisory Board of Directors, the Minersville Merchants Association, and the Nativity BVM High School. Furthermore, serving as a trustee of the St. Nicholas Ukrainian Catholic Church and as manager of its catering service, in addition to being a member of the Holy Name Society, Shamokin Deanery, Mr. Hashin has been an outstanding church leader.

Mr. Speaker, Mr. Hashin has brought guidance, inspiration, and leadership to the community, and he epitomizes the essence of civic and community service. It is only fitting that he be recognized for his contributions to Schuylkill County. Indeed, it is an honor and a privilege to commend Michael Hashin and to say thank you for his outstanding service.

## GOOD SHIP ESTHER FOUNDATION

### HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. WOLPE. Mr. Speaker, I rise to pay tribute to the Good Ship Esther Foundation of southwestern Michigan. The foundation was organized to transform the *Good Ship Esther,* a 36-foot boat built in 1896 for the U.S. Navy, into a solar-powered ship. The ship was totally remodeled by adding 300 square feet of photovoltaic solar panels which would give it a full power to travel 6 knots.

Cofounders of the nonprofit organization, Bruce Herron of Ganges and Richard Orawiec of Pullman, launched the solar-powered ship at South Haven Port, along the shores of Lake Michigan, as part of the opening celebration of Earth Day. The *Good Ship Esther* is an effort to bring worldwide attention to the use of solar power as an alternative energy source. In June 1990, the foundation members plan to sail the solar-powered vessel from South Haven, MI, to Chicago, IL. After its initial voyage, it will continue on route to New York City while stopping along the way to promote the use of solar power.

Mr. Speaker, I am sure that my colleagues will want to join me in commending members of the Good Ship Esther Foundation for their efforts in addressing the plaguing energy and environmental problems that we face as a nation. We owe all who continue to participate in this educational effort an enormous amount of gratitude.

## TRIBUTE TO THE BOROUGH OF NAZARETH, PA, ON ITS 250TH ANNIVERSARY

### HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. RITTER. Mr. Speaker, I rise today to pay tribute to the Borough of Nazareth, PA, on the occasion of its quartimillenial this year.

The land on which Nazareth, PA, was established was known as The Barony of the Rose. William Penn had deeded the land to his daugher Letetia for the payment of one red rose annually.

In the late 1730's, the Moravians left Moravia in what was then Germany and settled in the colony of Georgia to establish a Christian mission. Border uprisings between the Span-

ish in Florida and the English in Georgia led the Moravians to accept the invitation of a methodist evangelist George Whitfield to relocate in Pennsylvania. Whitfield's purpose was to establish a school for blacks in Pennsylvania.

Fanning out from Philadelphia in search of land, the search led the Moravians to purchase and settle this land which today is Nazareth. The school that Whitfield envisioned was started in 1740 and finished in 1743. It was never used as a school. In 1741, the Moravians bought the entire tract of 5,000 acres to establish a society of brotherhood and cooperation. The Whitfield House was used as a church home from which a communal form of existence took place.

Nazarth Hall, an example of the best form of Moravian architecture, was erected in 1745. It became an elementary and secondary school and then a military academy before closing in 1929. The buildings today are apartments, Moravian craft houses and preserved open space—a beautiful place to visit.

Nazareth remained as a strict Moravian community until a petition was presented to Northampton County Court in 1855, asking for borough status. Borough status was granted in 1856.

Approximately 23,000 people populate the Nazareth area, making a living in various ways. Cement manufacturing has played the most important part in the economy for many years. Other industries have become vital to Nazareth's economy, including textiles, woodworking and agriculture. The process of dehydrating alfalfa was invented in here. Nazareth is also the home of Martin Guitar company, an internationally recognized manufacturer.

Nazareth is also home to world champion race car driver Mario Andretti and his racing family. In 1987, the Pennsylvania International Raceway was opened on the site of the old Nazareth speedway. Drivers, their teams and spectators come from all over the world to participate.

Nazareth boasts a comprehensive educational program from nursery care through senior high school, including vocational-technical training, and school district support of the Northampton Community College. Nazareth is known for the quality of its public education program.

Mr. Speaker, I would also like to recognize the civic organizations in the Nazareth area who make an invaluable contribution to the borough through commuity service:

General Federation Women's Clubs.
Kiwanis Club of Nazareth.
Nazareth Women's Club.
Ladies of Retirement Age (LORA).
Men of Retirement Age (MORA).
Nazareth Area Chamber of Commerce.
Lower Nazareth Lioness Club.
Lower Nazareth Township Women's Club.
Nazareth Area Industrial Management Club.
Nazareth Business and Professional Women's Club.
Nazareth Heritage, Incorporated.
Nazareth Lions Club.
Nazareth Lioness Club.
Rotary Club of Nazareth.
Hecktown-Lower Nazareth Lions Club.
Tatamy-Stockertown Lions Club.
Buskill Township Lions Club.
Whifield Lodge 662 F. & A.M.
Moravian Historical Society.

In particular, I would like to recognize the 250th Anniversary Celebration Committee of Nazareth and its officers—Robert Reichard and Robert Danner, co-chairmen; Edith Oswald, vice chairman; Robert Rolling, treasurer and Kathleen Unger, secretary. These volunteers have been the coordinating and driving force behind what is sure to be an outstanding and memorable celebration.

Mr. Speaker, my colleagues, please join me in congratulating the good people of Nazareth, PA, on its 250th anniversary.

## CONGRESSIONAL CALL TO CONSCIENCE VIGIL FOR SOVIET JEWRY

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. ROE. Mr. Speaker, I rise today to participate in the Congressional Call to Vigil for Soviet Jewry. At the outset, I would like to thank my colleagues, Representatives PETER KOSTMAYER and JOHN MILLER, cochairmen of the 1990 Congressional Call to Conscience Vigil for Soviet Jewry, for coordinating this effort.

How ironic it is that glasnost for the Soviet Union, and soaring emigration figures for Jews leaving the Soviet Union, have unleashed the ugly forces of anti-Semitism in the Soviet Union. Groups such as Pamyat and others openly speak of eliminating the Jewish presence from "Mother Russia," the infamous "Elders of the Protocols of Zion" is sold from bookstores, and prominent Soviet writers, invited by the United States Government to tour America, publicly espouse and defend anti-Semitic canards and half-truths, accusing the Jews of the Soviet Union for many of the problems, past and present, that have plagued all of the Soviet peoples. Glasnost was certainly not meant to produce this anti-Semitic reaction, yet this is what precisely has happened, and not only in the Soviet Union, but in Eastern Europe as well.

Despite the record emigration numbers, and in light of the increasing tide of anti-Semitism, it is vital that all those Soviet Jews who wish to leave, and all refuseniks, be allowed to do so. One such person is Dr. Irena Voronkevich of Moscow. She has been waiting for over 10 years to emigrate, and there is no conceivable reason why a 77-year-old woman, a professor of botany who has not worked in a decade, should be denied a visa for what the Soviet authorities consider are security reasons.

This woman has endured her share of suffering in her lifetime. Stalin's police murdered her father in 1938, her husband fell on the battlefield in 1943, and she raised her son alone for those many years. He was a long-term refusenik, who with his family and her mother first applied for a visa in 1979. They were refused, and told to wait for 10 years. They reapplied in 1987, were turned down again, and told to wait until 1992 to reapply. Now, the date for application has been changed to 1997. In 1989, the son was granted a visa, but his mother was turned down again.

Mr. Speaker, this world-renowned botanist, who has published in the Soviet Union as well as abroad, does not present a threat to the security of the Soviet State. Her continued incarceration directly violates the Helsinki accords and the Vienna concluding document binding the Soviet authorities to the principle of freedom of immigration. I have written to President Gorbachev asking him to intercede in this case, to help allow this magnificent woman to live out the years she has left with her son and grandchildren. As much as we admire glasnost, we cannot lose sight of the fact that many Soviet Jews, such as Dr. Voronkevich, are arbitrarily denied their fundamental rights. We must, under current conditions, use all and every available means to assist those Soviet Jews who wish to emigrate from the Soviet Union.

## RAYMOND W. SMITH HONORED BY THE AMERICAN CANCER SOCIETY

### HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MANTON. Mr. Speaker, I have the pleasure to represent Raymond W. Smith, who currently serves as the president and chief executive officer of Maspeth Federal Savings in Maspeth, NY. Raymond Smith was born in Middle Village and has been with Maspeth Federal Savings for 40 years.

Recently, Raymond Smith was honored by the American Cancer Society, Queens division, for his outstanding leadership and effectiveness as a member of the Cancer Society's executive committee. I urge my colleagues to review the following article on the career and achievements of Raymond W. Smith which appeared in a commemorative issue of the Maspeth Federal Savings newsletter. I know my colleagues join me in congratulating Mr. Raymond W. Smith.

HAPPY 40TH ANNIVERSARY MR. SMITH!

In January of 1950, a young man started to work at the local bank, Maspeth Federal Savings, as an Assistant Teller, his name was Raymond W. Smith.

Here is a look at his illustrious career:

January, 1950: Assistant Teller.
January, 1953: Teller.
January, 1960: Auditor.
February, 1967: Treasurer.
June, 1969: Vice President & Treasurer.
November, 1972: Vice President, Treasurer & Personnel Director.
July, 1974: Elected to the Board of Directors.
January, 1975: Secretary to the Board of Directors.
June, 1975: Vice President, Secretary & Personnel Director.
November, 1977: Executive Vice President, Managing Officer & Secretary to the Corporation.
October, 1978: President.
December, 1983-Present: President & Chief Executive Officer.

Raymond Smith was born in Middle Village and in his youth moved to Maspeth,

where he attended Public High School 78. A graduate of Grover Cleveland High School, Mr. Smith served in the U.S. Army during the Korean War.

His wide ranging education in banking and finance includes special programs at the Institute of Financial Education, Adelphi University; Garden City, Hofstra University; Hempstead, LaGuardia Community College; Long Island City and C.W. Post Center, Brookville. He also attended the American Savings & Loan Institute of Indiana University.

A licensed insurance and real estate broker and a Certified Financial Planner, Mr. Smith is a past president of the Queens County Group and the Long Island Group of Savings Institutions. He is also a member of the Fiancial Managers Society and the Independent Free Appraisers. Is also a past member of the Board of Directors New York League of Savings Institution, and since 1985 a member of the Board of Directors of the Queens Botanical Gardens.

A long time community activist, he is a member of the Maspeth Lions Club and the Catholic Accountants Guild and is on the Executive Commitee of the Queens Division of the American Cancer Society, where he serves as Treasurer, and was very recently honored by the American Cancer Society, with the "Medal of Honor".

Mr. Smith and his wife, Dorothy, reside in Glen Head, Long Island. They have two daughters, Kathleen and Janet.

Once again Mr. Smith, Congratulations!

On Saturday, February 24th, 1990, the American Cancer Society, Queens Division, honored Raymond W. Smith, President and Chief Executive Officer, of Maspeth Federal Savings.

At a gala black tie affair, Terrace on the Park, Flushing Meadow Park, Queens, was turned into "The Jewels of India" with a very special Guest of Honor, His Excellency, Dr. Karan Singh, Ambassador of India to the United States.

Mr. Smith is on the Executive Committee of the Queens Division of the American Cancer Society, where he serves as Treasurer. Under his able leadership and direction, the Queens Division financial strength has grown in a constant upward motion for the past ten years, reversing a serious negative cash balance. The fund balance went from below 0% to 100%.

The Division now has the substantial resources to fund the programs and services that Queens Cancer Patients and their families so desperately need.

In addition to providing his financial acumen, Mr. Smith has been a dedicated volunteer in supporting every American Cancer Society activity and event since he joined the Board of Directors years ago.

The Honor awarded to Mr. Smith, the "Medal of Honor", is an award that not only he and his family can be proud of, but one that all Maspeth Federal Savings employees and friends can be proud of also.

Mr. Smith, our hats are off to you! Congratulations!

## ADL RESEARCH REPORT

## HON. MERVYN M. DYMALLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. DYMALLY. Mr. Speaker, I wish to bring to the attention of the Members a report from the Anti Defamation League of B'nai B'rith regarding the New Alliance Party: A Study in Deception.

### THE NEW ALLIANCE PARTY: A STUDY IN DECEPTION

#### INTRODUCTION

One of the most visible and vocal groups to emerge on the far left in recent years is the New Alliance Party. Part Marxist sect, part therapy cult, part entertainment enterprise (producer of "talent shows" and "Musicruises" in New York City featuring big name performers), the party is active across the country, running candidates in both national and local elections, and promoting its unique brand of radicalism. New Alliance Party politics is an amalgam of eccentric "therapy" theories, revolutionary rhetoric, black nationalism, and sexual references. It is tainted with anti-Semitism and an intense anti-Israel bias.

Although the party claims to be led by blacks and other minorities and by women, in fact its leadership is centered in one man: Fred Newman.

Like the extremist politics of Lyndon LaRouche (with whom the party was once affiliated), the New Alliance Party has the trappings of a cult: a one-man leadership and authority figure in Fred Newman; a small, devoted following; a wide variety of "front groups" that spread its message; an ability to raise money successfully; and a private agenda not readily evident from the party's public positions.

This report will examine the history and background of the party, its mode of operation, its recurrent themes and doctrines, and the manipulative methods it uses to advance its goals.

#### EARLY HISTORY

The New Alliance Party (NAP) is in large measure the handiwork of Fred Newman, a one-time college teacher whose therapeutic theory and practice have inspired the formulation of several small, cult-like organizations over the past decade. Newman was a philosophy instructor in the City College of New York when he first came to notice in the radical political community. In 1968 he formed a collective called "If-Then" which boasted that its pamphlets and brochures were the most obscene in New York. "If-Then" evolved into the Centers for Change, a commune that ran sensitivity groups; there, Newman also beagn a therapy clinic.

In 1974 Newman and his small band of followers joined Lyndon LaRouche's National Caucus of Labor Committees (NCLC), a bizarre sect making a transition from the far left to the far right. The NCLC at that time had just completed a campaign of violence and intimidation against other left-wing groups and was concentrating on charges that the Rockefeller interests and the CIA were engaged in a massive brainwashing effort. After a brief stay in the NCLC, Newman and his followers resigned to form the International Workers Party (IWP).

The IWP, formed in 1974, called for the formulation of united fronts with working class organizations and movement groups to lead to "international socialist revolution." It claimed to have disbanded in 1976, and its activists formed the New York City Unemployed and Welfare Council, whose president, Joyce Dattner, was a Newman follower. A host of other Party fronts soon appeared, including the Coalition of Grass Roots Women, New York City Union of Lesbians and Gay Men, Federation of Independent Unions, New Black Alliance and Women's Independent Democratic Organization. Finally, in 1979, the Newmanites organized the New Alliance Party.

#### EXTENDING THE NAP'S REACH

While there are probably not many more than a hundred hard-core members of the New Alliance Party, several thousand people may be involved in its front groups. The NAP claims to have thirteen thousand dues-payers and a hundred thousand readers of its weekly newspaper, the *National Alliance.* However, the *National Alliance* had a paid circulation of only 6,167 in 1989. On occasion NAP candidates for public office have received a substantial vote. Dennis Serrette and Nancy Ross, the NAP's presidential ticket in 1984, were on the ballot in thirty-three states; the ticket received 47,209 votes. (Serrette broke with the party shortly afterwards. Testifying in a deposition dated May 29, 1987, Serrette described the group as a therapy cult that used Newman's brand of therapy as a means of controlling its members. See Appendix B.)

#### 1988 PRESIDENTIAL TICKET

In 1988 the New Alliance Party presidential ticket headed by Dr. Lenora Fulani was on the ballot in all fifty states. Fulani, the party's most visible and effective representative, is a psychologist and "director of social therapy" for the organization's medical centers. She was certified by the Federal Election Commission to receive federal matching funds of $205,565.18. She received a national vote of 201,430 or less than one-quarter of one percent of the total vote cast.

#### NEW YORK CITY: POLITICS AND PRIMARY

The party's center of activity to be on the Upper West Side of New York, where it has tried to be active in community politics. It has focused its attacks on Democratic reformers and occasionally supported some traditional Democrats. For several years its co-chair was New York City Councilman Gilberto Gerena-Valentin of the Bronx. The NAP's goal is to build an independent party to counter "fascism."

The NAP ran candidates in New York City's primary election in September, 1989. The NAP's candidate for City Council President, Rafael Mendez, received 193,842 votes, about 25 percent of the total vote cast. The party's candidate for Manhattan Borough President, Barbara R. Taylor, recevied 31,968 voted, about 16 percent of the total vote. While these results might be construed by some observers as representing a "protest vote," the party's performance in the primary was an impressive one, and its most significant garnering of votes thus far.

#### ROLE OF THE "THERAPY CENTERS"

Fred Newman's psychological theory, implemented by what he calls "social therapy," holds that each individual is governed by a "bourgeois ego" that prevents unity with others and encourages self-gratification. The role of the radical therapist is to lead the individual to overthow the dictatorship of the bourgeois ego and to liberate the proletarian ego by means of a personal revolution.

Newman directs a group of eight so-called "medical and therapeutic" centers in the New York area, as well as individual centers in Boston, Chicago, Los Angeles, Philadelphia, Washington, DC, Denver, and Jackson, Mississippi. The party, which claims to have regional offices in 26 states, attempts to be politically active in areas where these therapy centers are located.

The New York Institute for Social Therapy and Research, set up in 1978, became

the headquarters for Newman's therapy practice; its profits appear to be the major source of funding for the New Alliance Party. Party members and supporters have been recruited from patients undergoing therapy at the Institute.

An article in the *Village Voice* of June 1, 1982 observed: The most disturbing aspect of NAP * * * has remained conistent from the beginning: the total integration, under Fred Newman's guidance, of psychotherapy and political recruitment. * * * With about 300 patients, at least half of whom are NAP members and many of whom pay around $40 an hour for group sessions, the Institute's annual cash flow may be above $500,000 a year. A substantial part of that sum finds it way into NAP and its satellites, but there is no way of knowing how much.

Four years later, an article in *Newsday* revealed: But perhaps the most controversial aspect of the party is its network of six therapy clinics, grouped together under the Institute for Social Therapy and Research. The Institute, which sometimes works with Medicaid and Medicare patients, treats 1,500 patients a month, Newman said. Therapists connected with the party follow a "drug-free" program of treatment, stressing the social origins of emotional illnesses, he said.

Also in 1986, the black newspaper, *New York Voice* (Nov. 1, 1986) wrote of the NAP's Harlem center of the Institute for Social Threapy and Research:

The three-year-old Harlem center * * * offers group, individual, family, and couples therapy as well as workshops, seminars and medical testing and referral. * * *

"Race and class, being a woman or being gay is not neutral to emotional health but must be considered," said Dr. Fulani, who says she was radicalized in the sixties when she realized that the model for excellence was the white upperclass male. * * * Therefore, for her and for the staff and clients at the center, the emotional and medical issues they address are seen as political.

Fulani * * * has been accused by critics of brainwashing the people who come to the center. In response to these charges, she says: "To some significant extent emotional problems are social and there is a realtionship between psychology and politics. We're just more open about it."

The *Village Voice* article noted earlier (entitled "Psychopolitics") provided further insight into the cult aspects of the NAP. The article noted that Newman "has determined [the party activists"] political direction at every turn" and has "treated most of the NAP leaders" with his "social therapy." The article went on:

Understanding "social therapy" from reading works of Fred Newman and his various collaborators isn't a simple undertaking. * * * Yet half a dozen blooklets and pamphlets Newman has self-published over the past 10 years do offer some clues about what he calls the "practice of method"—which he regards as the best way to teach Marxism. * * * the end result, when a cure is achieved, is that "the patient is organized * * * [a cure] must result in the patient performing revolutionary acts * * * acting in ways which reject * * * the mode of understanding, explaining and meaning authoritarianly identified with bourgeois ideology. * * * This may sound like a formula for indoctrinating patients into NAP, and vice versa—especially because the Institute funnels money into NAP organizations, seeks members at NAP events, and teaches and trains current and prospective members of NAP and its affiliates. * * *

Former NAP activist Dennis Serrette has described the group as "basically a threapy cult centered around the person of Dr. Fred Newman." Serrette characterized NAP as "an organization that portrays itself as a Marxist-Leninist organization when, in effect, they were nothing more than a power play by an individual to just exercise control over a large number of people." He described the overall atmosphere of party meetings as follows: "I certainly felt that the folks that were in there were basically under some assumption or intimidation that they shouldn't oppose anything that came from the front. I fet that way, I felt intimidated." (See Appendix B.)

NAP ANTI-SEMITISM: THE JEWISH "DEAL WITH THE DEVIL"

For years the New Alliance Party has been plagued by charges of anti-Semitism—for good reason. In the *National Alliance* of October 25, 1985, Fed Newman referred to Jews as "the storm-troopers of decadent capitalism," and complained that they had "sold their souls to the devil—international capitalism."

Fred Newman's further remarks in this vein about Jews were contained in this *National Alliance* article (a transcript of his speech to the NAP's 1985 regional convention in Harlem), entitled "Breaking a Deal with the Devil":

* * * I'm saying all this because I want you to know what happened, what the Jewish people as a people did in response to almost being destroyed. I want to share this with you honestly and openly because it's very painful to say aloud. As a people, we responded to that genocide by selling our souls to the devil.

And the contact with the devil has been clear-cut. It become clearer every day and we have to hear it in New York and have to hear it in Johannesburg, and we have to hear it in the Middle East; we have to hear it throughout the world. The contract with the Jewish people, with the Jewish leadership, has been: "We're going to let you live. We're going to let you survive. We're going to make sure it never happens to you again as long as *you* function as the stormtroopers of decadent capitalism against people of color the world over! That's the goddamned deal with the devil * * *

You make sure that you Jews will be in the forefront in the war against the empowerment of Black people, of Puerto Rico people, in this country. We need you to play that role. We have the right to use you to play that role. We will degrade your struggle and your degradation by waving the flag of your Holocaust in the name of putting down and oppressing other sisters and brothers. * * *

A special issue of *Stono*, a new NAP publication, entitled "What of the Jew?" appeared in August, 1989. In an editorial, *Stono*—speaking "as Marxist thinkers and activists"—stated:

The deal with the devil, [i.e., Jews serving capitalism] forged in the wake of the Holocaust, was quite explicitly made; the survivors had the Scylla-and-Charybdis choice of doing the bidding of capital or dying. * * *

Elsewhere, *Stono* asserted: "Our anti-zionism needs little explanation: We oppose the Jewish colonization of Palestine."

NAP is a fervent supporter of anti-Semitic Muslim leader Louis Farrakhan. It has claimed that "it was the racist white media which inaccurately portrayed Farrakhan as anti-Semitic." In a statement supportive of Farrakhan at the party's Harlem convention in 1985, Newman again proclaimed his "devil" theory, this time attacking Zionism:

The history of Zionism, the manipulation that is Zionism, is nothing more than the making of a deal with the devil * * * To be saved * * * means to follow and build the leadership, the great struggle of people of color all over the world, and in the United States of America, to follow the leadership of the Afro-American people . . . . as Jews, as Puerto Ricans, as gays, as straights—because that's the progressive leadership that will end these sick, vulgar, inhuman deals with devils. So as with Minister Farrakhan, our party is about "doing in the devil." And we'll do in the devil in the way that we can. Whatever Minister Farrakhan can do by way of helping us in doing in the devil—we don't turn anybody away!

In 1986 Practice Press, the party's publishing arm, published a pamphlet titled "The Hon. Louis Farrakhan: A Minister of Progress." It is advertised weekly in the *National Alliance*. The introduction to the pamphlet states that Farrakhan and the New Alliance Party "are the leading targets of Zionist terror," and calls Farrakhan "the most progressive religious leader on the American political landscape."

MORE HOSTILITY TOWARD ISRAEL AND JEWS

Regarding Israel, Jews and Zionism, Newman has further stated: As a well-paid client state, Israel's function was always to defend Washington's politics and American capital in the Middle East. The dirty role for the American Zionist Jew, and the new Jew, was to support Washington's advance and survival and to use Israel as a bargaining chip in the ongoing political poker game that was post-war, cold war politics * * * the Judeo-Christian God, long controlled by finance capital, authorized the murder and dislocation of the Palestinian people. Israel's right to exist is actually capitalism's might-makes-right to create whatever the hell it needs. * * * The so-called Jewish lobby which, myth has it, spends and works feverishly to maintain U.S. support for Israel, is an insult to Jewish intelligence, and especially, Jewish entrepreneurial skills. * * * From the West Bank to the West Side of Manhattan international Jewry was being forced to face its written-in blood deal with the capitalist devil. * * * The Jew, the dirty Jew, once the ultimate victim of capitalism's soul, fascism, would become a victimizer on behalf of capitalism; a self-righteous dehumanizer and murderer of people of color; a racist bigot who in the language of Zionism changed the meaning of 'Never Again' from 'Never Again for anyone' to 'Never Again for us—and let the devil take everyone else'. * * * there was no room for Zion, no less community, no less communism, in Zionism. And international Jewry, which bravely survived German fascism, succumbed to American capitalism. Zionism was the hitman. * * *

The *National Alliance* has stridently attacked the Anti-Defamation League. On November 21, 1986, the newspaper described ADL as "A multi-million dollar slander machine against progressive, and Black and Latino leaders, and Arab and pro-Arab organizations, purposely setting these groups up for attack by an increasingly sophisticated Jewish fascist underground modeled on Israel terrorist groups" The paper's lead article in the February 2, 1989 issue was entitled, "The ADL: Jews Without Principles."

In another article attacking the ADL entitled, "ADL May Pay Heavy Price for Attacks on Fulani," the *National Alliance* (De-

cember 26, 1986) stated: Says Fred Newman, a Jew who was viciously attacked by the ADL, "The Anti-Defamation League * * * and many other so-called Jewish leadership groupings are dangerous to be sure. On the other hand they are really a pack of bullies who thrive on scaring progressive-minded Jewish people the world over. If Jews and non-Jews stand up in solidarity to these police agents, these disgraces to Judaism, these liars, the likes of the ADL will be destroyed."

TARGETING THE BLACK COMMUNITY

The NAP is actively involved in courting the black community on many fronts. In addition to its support for Louis Farrakhan, it has attempted to forge an alliance with New York radical activist Rev. Al Sharpton, and its newspaper runs a weekly ad for an "Al Sharpton Defense Fund." The *National Alliance* contains effusive praise both for Farrakhan and Sharpton on a regular basis. Moreover, in general, a great many of the articles in *National Alliance* feature subjects of particular interest to the black community, regarding political, social and cultural events.

Dr. Lenora Fulani has also been a strong supporter of Tawana Brawley, whose 1988 claims of having been raped by a white police officer were later discredited. Fulani marched in Poughkeepsie along with other backers of the New Alliance Party in March 1988, in support of Brawley's "struggle against white male supremacists." Fulani stated of Brawley: "Her struggle is our struggle. Her fight is our fight." (New York *Daily News*, March 8, 1988.)

The group's deceptively named front group, the "Rainbow Lobby," (a name very similar to that of Rev. Jesse Jackson's "Rainbow Coalition"), actively solicits money in black and liberal communities around the country. The organization's entertainment enterprise, "All Stars Talent Show," sponsors talent competitions in black communities throughout the New York area under the sponsorship of another front group, "The Community Literacy Research Project." NAP's most prominent black figure, Dr. Fulani, frequently writes for such black newspapers as *Big Red News* and the *Black American*, and party press releases about Fulani are published in many of the major black newspapers in the New York area. And, as noted, the Institute for Social Therapy and Research has a major facility in Harlem.

INDOCTRINATING STUDENTS

The American Psychological Association's newspaper, the *APA Monitor*, described the party's Barbara Taylor School in its April, 1988 issue. (Barbara Taylor is a leading member of the party.) The school comprises a day care center and elementary school at two sites in Harlem, and purportedly has one hundred students, ages 3-13. The *Monitor* reported that the school curriculum is "scientifically based" on the theories of Soviet psychologist Lev Vygotsky and, among others, party leaders Lenora Fulani, Fred Newman, and Lois Holzman. Key social issues are explored by "visiting courts and government officers, creating mock trials and role plays, and the use of the media." The school states that contributions to it are tax-deductive.

In a profile of the school, New York *Newsday* (October 6, 1988) reported that students were sent to Poughkeepsie to march in a demonstration in support of Tawana Brawley, and to be demonstration in Washington "memorializing those who suffered in the bombing of Libya." The article reported that the school had "social therapy groups" for its children, and that "numerous leaflets posted on the door promote New Alliance Party activities * * *". *Newsday* wrote:

The Barbara Taylor School seems suffused not just with an unusual educational approach but with a specific political agenda * * *

While the curriculum for social studies is "adapted" from a traditional seventh-and-eighth grade syllabus established by the Board of Education, there is a noticeable twist. "The basic foundation of the curriculum is the perspective of historical materialism," the introduction begins. "It is not the history of great men; it is the history of the organization of production. It is a working class history of the U.S."

RECENT NAP ACTIVITIES

The past year has seen an intensification of NAP activities on many fronts. NAP activities, enterprises and front groups have multiplied.

The party has recently produced two more publications: *Probe*, "the intelligence magazine of the working left," and *Stono*, "an international journal of culture and politics." Both publications are lavishly produced. *Stono*, states it is "anti-Zionist and pro-Jewish * * * we oppose the Jewish colonization of Palestine * * * a brutal settler regime supported by U.S. arms and money." *Stono* runs an advertisement for itself in *Probe* which features a picture of a young black girl holding a large rifle.

A *National Alliance* article referred to some of the other NAP enterprises: "New Alliance Productions, which produces one of the country's largest amateur talent events, the All-Stars Talent Show Network * * * Musicruise, a summer festival of 'music under the stars' on the Hudson River dayline featuring artists like Dizzy Gillespie, Hugh Maskela * * * The International People's Law Institution, which now takes on most contentious human and civil rights cases from Haiti to Harlem.* * *"

According to the Boston newspaper, *The Tab*, the NAP's Rainbow Lobby collected money from more than 1,000 people when it knocked on doors in Brookline and Newton in the summer of 1989. *The Tab* reported NAP activist Nancy Ross' assertion that the Rainbow Lobby "ranks as the 11th largest grassroots lobby in the country with about 150,000 members nationwide."

A NEW "CULTURAL CENTER"

The most significant recent development the party has reported is the construction of a new 9,000 square foot complex, the Castillo Cultural Center, in Manhattan's Greenwich Village. A two column banner headline in the *National Alliance* announced: "U.S. Left Opens $2.7 Million Psychology and Cultural Center."

The newspaper reported that the center would house the group's East Side "Center for Short Term Psychotherapy," which "grosses nearly $45,000 a month, $35,000 of which is income directly from the practice of Social Therapy." The Castillo Cultural Center, "a multi-disciplinary collective of radical artists," would occupy about 6,000 square feet. According to the article, the price tag for the space came to "nearly $1 million." The center will house an "art factory" [sic], a darkroom, a workshop and a publishing house. The article also stated that the Castillo Center "grosses in the neighborhood of $55,000 a month, or nearly three quarters of a million dollars annually." It announced a series of plays under the title, "A Festival of Revolution," including one by Fred Newman, "No Room for Zion."

An article in the *Village Voice* (October 17, 1989) referred to several artists and other cultural figures who have lent their names to the Castillo Center, and noted:

One side of Castillo's $2.7 million (!) loft serves as offices of the Institutes for Social Therapy and Research, run by Fred Newman, also head of the Castillo Center and the mastermind of NAP. * * *

How are they *paying* for it all? Lenora Fulani * * * told me this is a "white liberal question".* * * Signs on the wall record the total for last month's efforts—$33,293. At that (unbelievable) rate, the center would have eaten up nearly seven years' fundraising.

If this is an "art factory," where is the theater, the painting studio, the dance space? If this is about building a "multiracial, multi-ethnic, working people's cultural movement," why haven't community-based art groups been invited to participate?

THE MONEY TRAIL

The National Alliance has explained how the New Alliance Party raises money: "[Fred] Newman turned to the Social Therapy Centers * * *. Therapy was the one activity of the political network of which he was the architect that generated a financial surplus * * *. He assembled a team of grassroots organizers—he called them Community Social Workers—who began going door to door with a portfolio of community-based service organizations, soliciting members and contributors. The experiment was oriented towards creating a mass production organizing model that could turn the practice of political organizing into a money making activity which could in turn fund the expansion of the mass organizing * * *.

The article went on to describe NAP's outreach efforts in middle income communities following the formation of the Rainbow Lobby in 1985. "The results," the article noted, "were startling."

Within weeks the canvassers were raising between $50 and $100 in one evening shift * * *. Canvassers collected consistently large amounts of money * * *. Nearly 35,000 people have joined the Lobby in the last four years and an additional 90,000 have contributed to its cause. By 1988, the Lobby had dozens of canvassers in the field, was running a telemarketing operation to reach contributors for follow-up donations and grossed $548,000. In 1989 the Lobby has put 60 canvassers in the field and projects that it will gross $1.2 million.

* * * The scientifically proven responsiveness of broad cross sections of the population to a door-to-door appeal for more democracy gave Newman the data he needed to design the ground-breaking matching funds drive for * * *. Dr. Lenora Fulani * * *. In 1988 Fulani became the first African American woman in history to qualify for federal primary matching funds. Over 66,000 people contributed to the drive. Her campaign raised a total of $2,757,548—$938,798 of which was the matching grant from the federal government. (According to the New York Times of August 17, 1989, the Fulani campaign had adjusted receipts of $2.15 million and expenditures of $2.13 million.)

FOREIGN POLICY POSITIONS: THE LIBYAN CONNECTION

The New Alliance Party has maintained sympathetic support for the Libyan regime of Col. Muamar Quaddafi. Dr. Lenora Fulani headed a New Alliance Party delega-

tion at an "international Peace gathering" in Tripoli on April 14, 1987 to "commemorate * * * the genocidal U.S. bombing of the Gulf of Sidra and the Libyan coast." The National Alliance reported on April 24, 1987 that Dr. Fulani stated: "It was so extraordinarily moving, so powerful to be a part of an entire nation's demonstration against U.S. militarism and racism." Highlights of the conference included an appearance by Muammar el Qaddafi.

A simultaneous demonstration was held in Lafayette Park in Washington, D.C. at which the New Alliance Party participated along with the Nation of Islam, the General Conference of Libyan Students in the USA, the All-African People's Revolutionary Party (a radical group headed by Kwame Toure, the former Stokely Carmichael) and several other groups.

In November, 1987, at a tribute to Nation of Islam Minister Akbar Muhammad, Fulani again took the opportunity to express her solidarity with the Libyan people and rail against the "terror of the U.S. government on people of color around the world."

After the shooting down of two Libyan MIG planes by the U.S. in January, 1989, the National Alliance ran a full page article condemning the act. The article stated: "Outside the U.S., few take seriously the American charges that Qaddafi is a * * * terrorist," and "the specter of Libyan chemical weapons [is not] causing the rest of the world to tremble." The article continued, "no country has used chemical weapons against a civilian population on so huge a scale as the U.S." (National Alliance, January 19, 1989).

For the third year in a row, two rallies were held in 1989, in New York and Washington, marking the U.S. bombing of Libya. In New York, a reception was held at the Castillo Cultural Center. Speakers included Dr. Lenora Fulani, Fred Newman, and Dr. El Moakkif, representing the Libyan regime. The speeches condemned "these Democratic and Republican murders" (National Alliance, April 27, 1989). The article stated: "It is not generally acknowledged that the bombing of Tripoli was an assassination attempt against Qaddafi in retaliation for his—and his people's—support for liberation struggles around the world."

Fred Newman stated: "Some so-called progressives do not give unconditional support to the Libyans, the Congolese people, the Palestinians and others. They will not stand up to American imperialism regardless of the political price. That is a criminal act. * * *"

OTHER FOREIGN CONCERNS

In April, 1988, the National Alliance mourned the death of Palestinian terrorist Abu Jihad (also known as Khalil al-Wazir), former second-in-command of the PLO. (Abu Jihad was known for his involvement in Black September, the PLO underground terrorist cell of the early 1970's responsible for the 1972 Munich Olympic massacre of eleven Israeli athletes.) The newspaper published an "In Memoriam" article with a picture of Abu Jihad and Yasir Arafat, and stated that "the international progressive community" was mourning "the loss of one of its greatest political-military tacticians." The newspapers credited Abu Jihad with leading "the first Palestinian guerilla attack against Israel" in January, 1965, and lamented his "assassination by a Zionist murder squad."

The new party magazine, Stono, wrote in August, 1989: [W]e recognize the Palestine Liberation Organization as the sole, legitimate political representative of the Palestinian people. . . . While the majority of Jews continue to support the repression against the Palestinian nationalist movement, increasing numbers have become disillusioned with Jewish national utopianism."

The other major foreign policy area of concern for the New Alliance Party is the African country of Zaire. The party, its Rainbow Lobby and U.S.-Congo Friendship Committee, are actively involved in a "Dump Mobutu" (the leader of Zaire) movement. The Rainbow Lobby sponsored a forum in November, 1989, at the annual conference of the African Studies Association (ASA) in Atlanta on the subject: "Are Mobutu's Days Numbered?"

SEX AND THE NAP

The New Alliance Party's "therapy" places an emphasis on overt sexuality and its projects and publications reflect that tone.

On November 16, 1989, "Comrade Eugene" wrote to the National Alliance complaining about "x-rated graphics and other pornographic illustrations" in the newspaper. Dan Friedman, managing editor, replied that "[I]t is our duty as revolutionists to destroy the vile and oppressive organization of sex under capitalism. In order to do this work, we can not confine sex to the bedroom, to the toilet stall or to the closet. We must participate in public displays of sexuality. * * *"

Several leaders and members have testified to their "love" for Fred Newman. Dr. Lenora Fulani wrote in the National Alliance (November 16, 1989), "Yes, Fred Newman and I do have a very intimate, close, sensuous, powerful and passionate relationship."

Until late in 1989, the National Alliance ran a weekly column entitled "Sexually Speakin' and Otherwise" by therapist and NAP activist Freda Rosen that dealt with a wide range of sexual issues.

Finally, in an article in Practice (Winter, 1990), entitled "The Women I Live With," Fred Newman wrote that he considers himself "an American Marxist/Leninist revolutionary" but also "a controversial revolutionary," noting, "I don't like the institution of the family in any of its forms." After quoting an unnamed critic of the NAP who had asserted that Newman had three wives, Newman observed: "I do not 'have' three wives. In fact I have none . . . But I am terribly, terribly in love and empowered by all the women I live with." Newman's article went on to describe the personalities of, and his relationships with, seven women who have all taken active part in various NAP activities.

TO SUM UP

Given its ability to attract money, votes, attention and acceptance, its tactics of deception and manipulation—as well as its radical brand of anti-Semitism—the New Alliance Party is of concern to the democratic community. It is an organization on the fringe of American politics whose history and propaganda suggests a strong affinity with other anti-democratic and anti-Semitic forces in our society.

APPENDIX A

New Alliance Party front groups and enterprises include the following entities:

*The Rainbow Lobby (Washington, DC).[1]

U.S. Congo Friendship Committee.

Musicruise (Boat cruises in Manhattan that feature famous musicians).

All Stars Talent Show Network.

Harlem Institute for Social Therapy and Research.

Bronx Institute for Social Therapy and Research.

East Side Center for Short Term Psychotherapy.

New York Institute for Social Therapy and Research.

Stewart Polk Center.

Free legal clinics (one in Harlem, three in the Bronx).

People's Independent Democratic Club (Bronx).

Association of Progressive Helping Professionals.

The Barbara Taylor School (Harlem).

Castillo Cultural Center (Greenwich Village).

Coalition for a Progressive New York.

International People's Law Institution.

Adam Abdul Hakeem Coalition to Save Our Youth.

New Alliance Productions.

This group also publishes four periodicals: the *National Alliance, Practice* (a journal of "psychology and economics"), *Stono* and *Probe.*

The NAP also maintains its "therapy centers" in Boston, Chicago, Denver, Jackson, Mississippi, Los Angeles, Philadelphia, and Washington, D.C.

APPENDIX B

AN INSIDER'S VIEW

Dennis Serrette, former NAP presidential candidate, provided an inside view of the party when he was a witness on May 29, 1987 in the lawsuit of plaintiff Emily Carter of the New Alliance Party against the Jackson (MS) *Advocate.* The Mississippi newspaper had run articles critical of the NAP. Questioned by New Alliance Party lawyer Harry Kresky, Serrette said that the only person wielding absolute power in the party was its leader, Fred Newman. Serrette stated: "The inner circle to me was only Fred and those who Fred may have had to share his thinking, who carried out his bidding * * * his wives * * * I think Hazel Daren, Gail Elberg * * * and Debra Greene. Those were the people who live with him * * *."

Serrette stated that another organization, the International Workers Party, was in effect the "underground" apparatus of the party. He testified: "Well, the New Alliance Party was basically an organization put together by * * * Fred and some of those who may have served him, to possibly hide the existence of IWP. * * * it was considered secret * * *."

The group's focus on "therapy" was particularly disturbing to him, Serrette asserted. "They seemed more preoccupied to me around therapy than they did [with regard to] the political." Serrette found many similarities between the behavior of Lyndon LaRouche's groups and the Party, including its use of character assassination: " * * * their attempts to uncover and to defame me by calling up people to talk about my sexual life. * * * I felt that that was sort of like a tactical thing that the LaRouche people might be using * * * there was no other organization I could ever recall that controlled their people the way the New Alliance Party * * * with therapy, had controlled their people, and the National Caucus of Labor Committees [a Lyndon LaRouche group] in my opinion * * *

[1] Not affiliated with Rev. Jesse Jackson's National Rainbow Coalition, Inc.

seemed to have absolute control of their people in basically the same way. So those are some of the similarities that had me thinking that, well, I really have my doubts about what I was a part of."

"TACTICAL" EFFORT TOWARD BLACK COMMUNITY

Instead of being a "black-led group" as it pretended to be, Serrette said, "the party exploited this imagery, but it was a lie, it was clearly a tactical means of using blacks, and a racist scheme of using black and Latino and Asian people to do the bidding of one man, namely Fred Newman * * *" Serrette went on to state the treatment of blacks within the New Alliance Party was "unequal" and "very abusive." He found this similar to the treatment of blacks by LaRouche's National Caucus of Labor Committees.

Serrette stated that he began to be suspicious about who was running things when he noticed that "there was a lot of people who weren't advertised as operatives or officers in the New Alliance Party, which tended to have very high * * * amount of respect within the New Alliance Party and seemed to be giving orders, you know running things, it just seemed far too organized, it seems like the people in charge are not always the people who are making the decisions around here. * * *" It was at this point, he said, that he learned of the existence of a "secret organization, and that they were asking me to be a member of that organization, and the nature of it was that it was Marxist-Leninist. * * * I said absolutely, you know, this is great, you know, but what is it?" Serrette stated that this "secret" organization was the International Workers Party, and "They made it clear to me that this was a secret organization."

A SECRET AGENDA

Serrette was queried: "Why was it secret?" He answered: "Well, the reason that I was given was that they didn't feel that an above-ground organization would be able to carry out, you know, changing this country in an effective way, meaning the changing of the social order * * * The New Alliance Party was basically * * * above-ground for the IWP." He went on to state: "It basically served as an electoral function to attract people there and to organize them into organizations and eventually take them in as members of, I imagine the IWP."

THERAPY AS MANIPULATION

Asked about the function that "therapy" played in the group, he said "Fred Newman was the chief therapist. It was my experience that he was, he and whoever he may have appointed for those who trained therapists and generally, it was those he placed in control and in power. Lenora Fulani is the chief therapist, that's the way she was in there. * * *"

Serrette defined the therapy as "a way of controlling every aspect of their lives."

Asked about how the party financed itself, Serrette said that the bulk of finances came from the therapy centers. He was asked: "How much money are we talking about?" He answered: "A lot of money, a lot of money. As a matter of fact, it was stated in one meeting * * * that the organization. * * * had made a million dollars that year."

Serrette was asked: "Do you know or do you have an opinion whether members of this organization would kill if they were so instructed by Mr. Newman?" He responded: "I wouldn't be surprised of anything that this organization might do upon instruction from Fred Newman. I certainly believe that given the therapy and the way that people have taken directly to him, that they would do anything, just about, that he would ask them to do."

Referring to the group as a "cult," Serrette summed up his opinion of the NAP by characterizing it as "an organization that portrays itself as a Marxist-Leninist organization when, in effect, they were nothing more than a power play by an individual to just exercise control over a large number of people." He described the overall atmosphere of party meetings as follows: "I certainly felt that the folks that were in there were basically under some assumption or intimidation that they shouldn't oppose anything that came from the front. I felt that way, I felt intimidated."

## IN RECOGNITION OF DESOTO SCHOOLS SUPERINTENDENT FRANK MOATES

### HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. FROST. Mr. Speaker, on July 1 of this year, Mr. Frank Moates will retire after serving 16 years as the superintendent of public schools in DeSoto, TX. Before all my colleagues, I would like to personally commend and thank Superintendent Moates for his work on behalf of the families in DeSoto.

We entrust no one with a more important assignment than the educators of our children. We ask them to prepare and guide our most precious resource, our children. Frank Moates, throughout his distinguished career has indeed proved worthy of this trust.

A recent profile from the Dallas Morning News summarizes well Superintendent Moates' contributions to the DeSoto community and to our Nation. I would like to share it with my colleagues.

[From the Dallas Morning News, Apr. 29, 1990]

DESOTO'S MOATES RETIRING

(By John Yearwood)

J.B. Boisse was returning to class at Frank D. Moates Elementary School when he spotted a familiar figure strolling down the hall.

The 9-year-old ran past his third-grade classroom to give a big hug to Frank Moates, who held up his hand for a "high five" from the youngster.

"Are you doing well today?" asked Mr. Moates, before hugging J.B. and walking him to class.

Inside the classroom, J.B.'s classmates all ran to Mr. Moates, offering hugs and kisses.

"They are all my kids," said Mr. Moates, the DeSoto school superintendent, "and they are all special."

The trip to the school was routine for Mr. Moates. But every visit during the last few months has taken on special significance. On July 1, Mr. Moates will retire after 16 years as superintendent.

He will be replaced by John Moore, 49, assistant superintendent of instruction with the North Little Rock, Ark., Public School District.

Mr. Moates, 59 who was paid an annual salary of $77,000, will leave the job as one of the district's most popular superintendents.

"I like him a lot. I feel like he's a close friend," said J.B. "He's a real nice guy, and I really appreciate him. I don't want him to leave."

School board President Gordon Roak said it will be difficult to forget the mild-mannered Mr. Moates and his contributions to the district.

"He has gotten us through a lot of changes and transitions and allowed the district to come out ahead and stay ahead," Mr. Roak said.

During Mr. Moates' 16 years at the helm, the DeSoto district doubled its enrollment, built a half-dozen new schools, improved academic test scores and jumped to Class 5A athletic competition.

DeSoto residents can feel proud to send their children to the district's schools, he said.

"I feel we compare very favorably with surrounding districts. If you look at test scores, we are always above state and national norms," said Mr. Moates. "We are very proud of this. We feel that we more than meet the test of quality schools."

The task of shaping the district into one that earned the respect of others was not always without controversy. Two years ago, school officials won a bitter showdown with some residents in a tax rollback election. Mr. Moates became the district's point man and ended up in the center of the issue.

Mr. Roak said he came to truly admire Mr. Moates during that tumultuous period, as he fended off personal attacks by proponents of the rollback.

"It took a pretty heavy toll on him," Mr. Roak said. "Despite the personal attacks, he stood tall."

Although the rollback campaign became negative, some proponents now say they harbor no ill feeling toward Mr. Moates and they wish him well in retirement.

President Tommy Cole, who supported the rollback, said he has since lost any bitterness he had toward the superintendent and the school district. There was never any doubt, he said, about whether Mr. Moates was doing a good job running the district.

"He has done fine, and I wish him well," Mr. Cole said. "When you are in a town 16 years, you aren't going to make everybody happy. You can't. But right now, nobody's mad at him."

Mr. Moates said he always was careful about how he spent school funds. The tax dispute made him more frugal and sensitive to residents' concerns, he said.

As a youngster growing up in Beaumont, Mr. Moates never thought he woud one day be fighting for funds to build schools so children can have a better education. He said becoming an educator was not one of the careers he had "a burning desire" to pursue.

"I was intrigued by law enforcement," he said.

It wasn't until he was a college student in Beaumont that he became interested in teaching.

Mr. Moates said his love for teaching began while he was working as a teacher's aide at an elementary school to help pay his way through college.

"My experience with teachers there and the young people probably had the biggest single impact on the change," he said.

After graduating from the University of Texas at Austin, Mr. Moates went to work for the Burleson Independent School District, becoming a teacher and assistant superintendent.

He spent 10 years in Burleson before being named superintendent of the Malakoff Independent School District.

Mr. Moates was hired as superintendent in DeSoto in 1974 to replace Fred Nickles, who had retired. He said more responsibility and a new challenge brought him to the southwest Dallas County suburb.

"I was looking for a little larger district," he said.

Malakoff had about 2,000 students compared with DeSoto's 2,800.

Dr. Bob Coggins, who was on the school board when Mr. Moates was hired, said he impressed school board members throughout the interview process.

"The thing that impressed me the most was when we were discussing salary," Dr. Coggins said. "We asked him what he wanted to be paid. He said, 'I'll tell you what. You pay me what you want for the first year, and if I don't like you at the end of the year, I'll leave. If you don't like me, you don't have to renew my contract.'

"That's the way it was left. He was hired at the salary of the outgoing superintendent."

Dr. Coggins, who has since left the school board, gave Mr. Moates high marks for the job he has done.

"I feel like he ran a good, tight ship and did what the board asked him," Dr. Coggins said.

Mr. Moates said he received several job offers during the last 16 years, but always decided to stay with the DeSoto district because of the backing of staff members and the community.

"The public has been very supportive," he said. "It's a comfortable place to be."

He also credited students with his decision to remain in DeSoto. He said he tries to visit the district's 10 campuses often.

At Moates Elementary, principal E. Mac Geren said the high fives and hugs Mr. Moates received from students were genuine.

"The reaction he received today was spontaneous and it would be tomorrow," said Mr. Geren. "He's just very student-oriented and well-liked by students."

## THE ROLE OF THE NATIONAL COUNCIL ON DISABILITY IN THE DEVELOPMENT OF ADA

### HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GINGRICH. Mr. Speaker, The National Council on Disability is an independent Federal agency comprised of 15 Presidentially appointed members. The Council's mandate is to review policies and programs which impact upon persons with disabilities and make recommendations to the President and the Congress concerning how these policies can be improved. In 1984, the National Council issued a policy statement entitled "National Policy for Persons with Disabilities," which articulated the need for legislation which would provide comprehensive civil rights protections for persons with disabilities. After the publication of this statement, the National Council held numerous forums across the country in which it heard from literally thousands of persons with disabilities about the discrimination they face every day.

In February 1986, the National Council issued a major report to the President and the Congress entitled, "Toward Independence." In this report the National Council outlined the key components required for comprehensive civil rights legislation protecting persons with disabilities. This report was well received by the Congress and has become central in the development of the "Americans With Disabilities Act" [ADA]. In January 1988, the National Council issued another report, "On the Threshold of Independence," in which the National Council authored the specifics of the "Americans With Disabilities Act of 1988." The goals of the ADA, currently being debated by the House of Representatives, are to remove attitudinal, architectural, transportation, communication, and employment barriers which exist for persons with disabilities in American society.

I agree with the National Council on Disability in its belief that the provisions of this legislation send persons with disabilities a clear message that their dream of equal civil rights protections will soon become a reality.

## TRIBUTE TO JOHN M. "MAC" AICHELE

### HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GEKAS. Mr. Speaker, I rise to ask my colleagues to join me in recognizing a Pennsylvania whose accomplishments and contributions to the community are indeed exemplary.

John M. "Mac" Aichele is an example of the spirit of community service. He is retired president and former chairman of the board of the Milton S. Hershey School in beautiful Hershey, PA. This school was founded to provide a home and academic training to orphaned boys. The tradition of dedication to others has continued through the years as countless students have been educated on the school's sprawling campus.

In addition to overseeing the education of his students, Mac has been involved with a long list of organizations, including the Harrisburg Community Theater, the Hershey Sumphony Orchestra Association, the M.S. Hershey Foundation, and the Dauphin County Mental Health/Mental Retardation Board. He currently serves on the boards of the Boy Scouts of America, Family and Children's Service, and Ronald McDonald House.

Clearly, Mr. Speaker, Mac is one of the "points of light" on which our Nation depends. His selflessness represents the very best that we can be. On behalf of my constituents, I thank him for his work.

## RICHARD COHEN ON "MADNESS AND MALICE" IN THE MIDDLE EAST

### HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LANTOS. Mr. Speaker, the anguishing event of last weekend in Israel in which a mentally unstable Israeli killed eight Palestinians in a reminder to all of us of the irrational tragedies that far too often take place despite concerted efforts of government leaders and officers to prevent them.

Today's Washington Post published an excellent article by columnist Richard Cohen which puts this tragic event in its appropriate context. As Cohen notes, when a similar event took place in 1985 and an Egyptian soldier stationed in the Sinai went berserk and killed seven unarmed Israeli tourists, the Israeli Government responded by deciding that a soldier is not a nation. But in the aftermath of this latest tragedy, Arab leaders throughout the Middle East—including so-called moderates, as well as the PLO—have used the occasion to fan the flames of violence and unrest in Israel.

Mr. Speaker, I ask that Richard Cohen's outstanding article be placed in the CONGRESSIONAL RECORD, and I urge my colleagues to give it careful and thoughtful attention.

MADNESS AND MALICE

(By Richard Cohen)

In 1985 an Egyptian solider stationed in the Sinai went berserk, killing his own commander and seven unarmed Israeli tourists. A number of the tourists, including a 10-year-old boy, apparently bled to death because other Egyptian soldiers would not permit an Israeli medical team to aid the victims. For a moment, the Middle East tensed up and then relaxed. In essence, Israel said that one soldier is not a nation. The peace with Egypt was never in doubt.

Now, though, something similar has happened within Israel. There, a former soldier also has gone berserk, killing seven Palestinians. The gunman has been characterized as deranged, attributing his action to the loss of a girlfriend and an alleged rape by Arabs when he was a boy. Nonetheless, both the Palestine Liberation Organization and several Arab governments have not hesitated to use this horrible incident in their propaganda war against Israel.

Kuwait simply labeled the killer a "Zionist" and said his action would "lead to a new cycle of violence in the region." A PLO spokesman called the killings "a message to the Arab summit" about to begin in Baghdad, and a PLO official, Yasser Abed Rabbo, asked Egypt to close the Israeli Embassy in Cairo. "What is happening in the occupied territories is an act of organized crime carried our under the supervision and planning of the Israeli government," he said. From Damascus and Amman have come similar statements.

Well, first of all, the killing did not take place in the Occupied Territories, but in Israel proper. (The victims were, however, residents of the occupied Gaza Strip who had come to Israel seeking work.) In the second place, there is not a scintilla of evidence that the Israeli government had anything to do with the killings. If it had, then possibly the gunman would have been allowed to escape and not have been arrested. The current Israeli government is capable of doing some bonehead things, but not even its severest critic would suspect it of wanting to foment the riots in the Occupied Territories and Israel proper that followed the killings.

Maybe it's understandable that Arab leaders (and non-Arab ones in Tehran) would overreact to the recent massacre. After all, both the West Bank and Gaza Strip are under military occupation, and from time to

time it's a harsh one. The intifada proceeds, and with it comes a daily loss of life, including, of course, children. To some Israelis (and others), these deaths are the inevitable result of rebellious activity, such as stone throwing. To Arabs though, the victims are just kids who want to live in a Palestinian state. It's the occupation that's killed them, not their behavior.

Palestinians long ago made the point that they are entitled to their own state. But they have not yet made another and possibly more important point: that if they get that state they will not continue their war against Israel. Very likely, Arab leaders know that the rampage of a single Israeli does not represent government policy. Yet their followers are a different matter. They are quite willing to believe—indeed, for generations they have been taught—that the so-called Zionists are ruthless killers. Until recently, for instance, the PLO itself did not stoop to distinguish between soldiers and, say, women and children on a kibbutz.

Now both the PLO and certain Arab governments will not distinguish between state policy and a single man who went berserk. By inflamming populations in their own countries and within Greater Israel (Israel plus the Occupied Territories) they show themselves to be more passionate than logical and hardly punctilious when it comes to truth. By claiming that the massacre is anything more than a tragedy, they are propagating a lie.

But there is yet another issue that has to be dealt with. Washington has been putting pressure on Israel to come to the bargaining table and deal with the Palestinians. So far that hasn't happened. But if someday it should, Israel has to be assured that the Palestinian leadership can sell some sort of compromise to its people. Given the performance of the leadership following the shooting, any compromise will be a harder sell. Indeed, Israelis can argue that when it counts, the PLO leadership reverts to the same old rhetoric—and maybe the same old terrorism.

It would have been wonderful if the shootings had been followed by efforts on the part of Arab leaders to calm the situation. It would have been wonderful if they had said that an Egyptian had done something similar. It would have been wonderful if any Arab leader, including Egypt's Hosni Mubarak, had repeated what Mubarak himself said following the 1985 massacre in Sinai: "a limited incident that can happen anywhere, carried out by an insane man."

Anywhere, by definition, includes even Israel.

## THE WONDERFUL WOMEN OF HADASSAH

### HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BURTON of Indiana. Mr. Speaker, I wish to pay a special tribute to Hadassah, the largest Jewish women's organization in the world. The tireless women of Hadassah are indeed great humanitarians and they deserve our support.

The Hadassah Medical Center in Jerusalem is one of the finest medical institutions in the world. In addition, it provides the very best care to Jews and Arabs alike. Many Arabs wounded as a result of the terrible unrest in the West Bank have been treated at Hadassah. No one seeking treatment has been turned away.

Hadassah has also trained many Arab doctors and nurses from the West Bank and Gaza. The Palestinians, in Israel and in the territories enjoy the highest health care standards of any Arab population in the mideast. I have also been particularly impressed with Hadassah's activities in Africa. They played a key role in the construction of a brandnew, top-notch hospital in Kinshasa, Zaire. They also set up a unique eye clinic in a remote area of Kenya to treat 600 blind patients.

It is my great pleasure to salute the wonderful women of Hadassah, and I would like to enter into the RECORD a press release announcing Hadassah's eye project in Kenya.

HADASSAH DOCTORS BRING GIFT OF SIGHT TO BLIND KENYANS

NEW YORK, March 26.—Six hundred blind men, women and children in a remote section of the African nation of Kenya will see—some for the first time—after a unique expedition, in April, by eye surgeons from Hadassah-Hebrew University Medical Center in Jerusalem. The doctors will perform free eye operations on blind sufferers of cataracts, retinal detachment and other eye diseases.

In Kenya, leaflets and posters written in Swahili are publicizing the medical expedition, April 12 to 16, proclaiming, "Free Medicine, Free Operations, Free Eye Camp by Hadassah-Hebrew University Hospital in Jerusalem."

Professor Hanan Zauberman, head of the Ophthalmology Department of Hadassah-Hebrew University Medical Center, in Jerusalem, will lead the team from Israel, which includes senior Hadassah ophthalmologist, Dr. Itzhak Hemo, as well as several Hadassah nurses.

Kenyan doctors and the Nairobi-based Royal Commonwealth Society for the Blind will assist the Israeli team. The Nairobi Hebrew Congregation and the Lions Club of Kenya are co-sponsoring the event with Hadassah and the Israel Foreign Ministry.

Altogether some 600 Kenyans are expected to travel to Kabarak, where the surgical team will operate at a compound called President's Farm. Most of the patients will come from the Nekuru area in Kenya. Kabarak is 180 kilometers north of Nairobi.

Hadassah Hospital will loan advanced equipment for the unusual surgical camp, enabling doctors to remove cataracts through three millimeter incisions instead of routine 10-millimeter incisions.

Advanced vitreoretinal surgery will be performed for blind patients suffering from long-standing retinal detachment, according to Professor Zauberman in Jerusalem.

In an exchange component of the program, African doctors and nurses travel to Jerusalem for training in the Eye Department at Hadassah Hospital. Other countries that have received assistance from Hadassah in the field of eye care include, Liberia, Tanzania, Ruwanda, Ethiopia and Lesotho. Thirteen doctors from Africa and Latin America are currently studying in the three-year post-graduate course at Hadassah in Jerusalem.

During the past 10 years, the Hadassah Hospital's Eye Department and the Foreign Ministry have established eye centers in three African countries—Kenya, Malawi and Swaziland.

Hadassah's eye-care work in Africa began 30 years ago under the direction of the late Professor Isaac Michelson. Liberia was the initial African nation to establish a relationship with the Eye Department at Hadassah Hospital. Today, there are major Hadassah eye clinics in Kenya, Swaziland and Malawi.

Hadassah, the Women's Zionist Organization of America, with 385,000 members in 1,500 chapters and groups in the United States is the largest Zionist organization in the world. It supports medical, educational and youth resettlement programs in Israel. In the United States, it sponsors youth groups and offers educational programs for its membership.

## IN HONOR OF ANTHONY J. IURATO

### HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. TORRICELLI. Mr. Speaker, it is with great respect and admiration that I address my colleagues in the House today, for I rise to extend my heartiest congratulations and warmest best wishes to Anthony J. Iurato on the occasion of his retirement as the chief of police of the city of Hackensack.

Tony is a lifelong resident of Hackensack. He has been married for many years to the former Betsy Lee Coffey. They have 3 daughters, Sandra Lynn Sharkey, Angel Stoegner, and Margie Ann Torrance, 13 grandchildren and 1 great-granddaughter.

Tony is a veteran of World War II when he served from 1943 to 1946 as an aerial gunner in the U.S. Army Air Force. He then attended the New Jersey State Police Academy and was appointed patrolman in the Hackensack Police Department on January 3, 1950. He rose quickly among the ranks, being promoted to sergeant in 1953, lieutenant in 1956, deputy chief in 1965, and chief of police in 1966. Tony's hard work and determination to serve the community of Hackensack is clear in that he has dedicated his life to the protection of his hometown.

Tony has attended numerous technical schools in police practice, procedure and administration, including FBI. National Academy, Executive Command Course, and Management Seminar. He is a life member of the International Association of Chiefs of Police, a life member of the New Jersey State Chiefs of Police, and a member of the Bergen County Police Chiefs Association. He was elected honorary president of Bergen County Police Chiefs Association, he is a member of the Patrolmen's Benevolent Association, and the International Narcotics Association. He is the cofounder of Bergen County Narcotics Task Force, and member of the American Legion—Honor Legion Police Departments of the State of New Jersey.

Tony has received numerous awards including three Exceptional Duty Medals and Chief's Achievement Award from the Bergen County Police Chief's Association.

He was appointed by the Governor to the State Law Enforcement Planning Agency in 1988. He is currently serving as the deputy

city manager of Hackensack. This is a man who never hesitates to share his time and talent, energy and enthusiasm with the community he so loves.

Mr. Speaker I am proud to join in paying tribute to this exceptional man. He is one of those outstanding few who truly make a difference in society. I extend my best wishes to him on this special occasion.

## COSPONSORS OF HOUSE RESOLUTION 393

### HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. YATRON. Mr. Speaker, House Resolution 393 which I sponsored concerning the Tiananmen Square massacre of June 4, 1989, in the People's Republic of China passed the House by voice vote on Monday, May 21, 1990.

In the process of considering this legislation, 10 of our colleagues were inadvertently left off the cosponsor list. All of these Members have been leaders in promoting human rights in China. At this point, I would like the RECORD to reflect that the following Members were intended to be cosponsors of House Resolution 393:

Representative CHRISTOPHER SMITH.
Representative ENI F.H. FALEOMAVAEGA.
Representative JAIME B. FUSTER.
Representative SAM GEJDENSON.
Representative FRANK MCCLOSKEY.
Representative ROBERT J. LAGOMARSINO.
Representative LAWRENCE J. SMITH.
Representative DOUGLAS BEREUTER.
Representative ELIOT L. ENGEL.

## VERMONTVILLE MAPLE SYRUP FESTIVAL

### HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. WOLPE. Mr. Speaker, I rise today in honor of the Vermontville, MI, Maple Syrup Festival on the occasion of its 50th annual celebration.

Although the festival is celebrating its 50th anniversary, maple syrup production in the Vermontville area actually goes back hundreds of years to members of the indigenous Potawatomi tribe, who later taught some white settlers from Vermont how to produce the sweet syrup. Since that time, syrup has been produced and sold in Vermontville.

During a conversation at a Vermontville barber shop in 1940, Milton Lamb, an area businessman, suggested that the village have a gathering to promote both community spirit and the community's product, maple syrup. Later that year, the Vermontville Maple Syrup Festival Corp. was formed and the maple syrup festival was launched. The first festival was held in the high school gymnasium with approximately 250 people attending the pancake and syrup dinner. More than 2,500 people came to see Miss Phyllis Hager crowned the first Maple Syrup Festival Queen.

In the ensuing 50 years the festival has grown from its small beginnings to become one of Michigan's preeminent yearly events—and a major source of community income. The festival now includes carnival rides, parades, arts and crafts, and other events. The pancakes and maple syrup, however, continue to be the main attraction for the many thousands of people throughout Michigan who are drawn to Vermontville for this special occasion.

Mr. Speaker, with the support of the good people of Vermontville, the maple syrup festival has become one of those unique events that help define the community spirit of the small towns of our Nation. It is my sincere wish that this festival continue to enjoy another 50 years of success.

## IN RECOGNITION OF AUSTIN, TX, MAYOR TOM MILLER

### HON. J.J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. PICKLE. Mr. Speaker, today I am introducing legislation which would redesignate the Austin Dam located near Austin, TX, as the "Tom Miller Dam."

This dam has been known locally as the Tom Miller Dam since its construction in the late 1930's. The current structure stands on the same site where two previous dams had been built and destroyed. The first was destroyed in an April 7, 1900, storm that brought 5 inches of rain to the central Texas hill country in 15 hours. A second dam was later erected on the same site, but it was destroyed by two floods in 1915. For more than 20 years, the city did not try again to rebuilt the Austin Dam. However, in 1936 Mayor Tom Miller initiated the drive to obtain funds for the construction of a third dam at this same location.

Mayor Miller approached the Lower Colorado River Authority for funds in 1936. The LCRA, only 3 years old at the time, was completing Buchanan and Inks dams and had begun construction of Mansfield Dam. Mayor Miller and a contingent of LCRA and local officials joined forces to obtain Federal funds for the new dam. Lyndon B. Johnson, just elected to Congress, and Alvin Wirtz, then general counsel for LCRA, worked with the Public Works Administration, the Bureau of Reclamation, Reconstruction Finance Corporation, and other agencies to obtain loans and grants amounting to $14 million for the reconstruction of this important dam.

The dam was dedicated April 6, 1940 and today remains a vital part of LCRA's flood control system for cental Texas. I can remember what life in Austin was like before this dam was built. I was a student at the University of Texas when the flood of 1935 nearly swept the whole city away. And I was attending classes when a second flood devastated the city in 1938. With the completion of the Tom Miller Dam, the people of Austin could utter a collective sigh of relief. This dam has become a symbol of strength and security for the community.

At the time of its dedication, the dam was named by the Austin Chamber of Commerce after Mayor Tom Miller for his part in the rebuilding project; however, the Federal Government does not normally approve of federally-funded projects being named for living persons and denied the chamber's request. Thus, in Washington, the structure is recorded as "Austin Dam." Yet if you ask anyone in Austin, TX, the name of the dam, the answer would be "Tom Miller Dam."

The purpose of this legislation is to officially bestow upon this dam the name it has unofficially had since 1940, the "Tom Miller Dam." It is appropriate that one of the most important structure in Austin should bear the name of one of the city's most colorful leaders. Tom Miller was one of the city's greatest public servants, and Austin owes much of its current prosperity to his judgment and foresight.

Tom was a strong supporter of Franklin Roosevelt and the New Deal, and he put himself in a position to support the programs that literally built the modern city of Austin. The dams and lakes above and below Austin stand as evidence of his achievement, and the Lower Colorado River Authority and rural electrification are evidence of the progress he helped to initiate. The lives of all the residents of central Texas have been touched by Tom Miller.

When the history of Austin is written, one of the brightest chapters will be dedicated to Tom Miller. Time cannot obscure the fact that he was truly one of Texas' great leaders, and I hope the Congress will recognize his contributions by acknowledging officially the designation of the Austin Dam as the "Tom Miller Dam."

## TRIBUTE TO CAPT. DAVID L. COFFY

### HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. TRAFICANT. Mr. Speaker, I rise today to pay tribute to Capt. David L. Coffy, of my 17th Congressional District of Ohio, who is receiving the Congressional Fire Service Institute Heroism Award.

On the morning of April 8, 1990, Captain Coffy rescued twin 3-year-old boys and their mother from their burning home. He arrived at the burning home and began assessing the situation. He learned that the two boys and their mother were trapped on the second floor of the house. Captain Coffy entered the house at the second floor window and immediately located Luke Timko and passed him to a policeman who was waiting on a ladder. He then located the second twin, Daniel Timko, who was also passed out to a waiting police officer.

Captain Coffy entered the house a third time to locate Patricia Timko, the mother of the two boys. He located her in her bedroom and proceeded to remove her from the burning house when a fellow firefighter arrived and assisted Captain Coffy.

Captain Coffy's efforts were valiant and above and beyond the call of duty. He risked

his own life to save the lives of three other people. He displayed outstanding courage and fortitude and he is more than deserving of the Congressional Fire Service Institute Heroism Award. We owe him a great deal for the service and dedication he has given to the Brookfield Township community.

## H.R. 4868, THE SOCIAL WORKERS ENDORSE SUBSTANCE ABUSE TREATMENT CORPS ACT

### HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. STARK. Mr. Speaker, last week, Representatives GREEN, GLICKMAN, GRANT, and I, introduced H.R. 4868, the Substance Abuse Treatment Corps Act. The bill is designed to help students obtain training in alcohol and drug abuse treatment in exchange for service in areas of the country where there are shortages of substance abuse treatment personnel.

I am pleased to report that the National Association of Social Workers has endorsed this proposal and I hope other Members of the House will join us in achieving the enactment of this legislation.

The NASW letter follows:

NATIONAL ASSOCIATION OF SOCIAL WORKERS INC.,
*Silver Spring, MD, May 15, 1990.*

Hon. FORTNEY H. STARK,
*U.S. House of Representatives, Longworth House Office Building, Washington, DC.*

DEAR REPRESENTATIVE STARK: On behalf of the 127,000 members of the National Association of Social Workers (NASW), I wish to extend our association's support for the Substance Abuse Treatment Corps Act. Your leadership in introducing legislation which responds to the critical shortage of alcohol and substance abuse treatment professionals is to be commended.

NASW believes that the National Health Service Corps model offers a proven means of recruiting, training and placing the needed professionals in underserved rural and urban areas. In addition, the approach provides the necessary educational assistance by which dedicated individuals who reside in communities with a high incidence of alcohol and substance abuse may become qualified treatment providers, thus encouraging retention of the needed providers once the service obligation is met.

NASW applauds your continuing efforts in developing legislation which responds to the treatment needs of individuals and their families who suffer from alcohol and substance abuse. We look forward to working with you throughout the development of this important legislation.

Sincerely yours,

MARK G. BATTLE, ACSW,
*Executive Director.*

## TRIBUTE TO WESTSIDE UNITED METHODIST CHURCH OF PATERSON, NJ, ON ITS 100TH ANNIVERSARY

### HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. ROE. Mr. Speaker, it is with the deepest reverence and the greatest sense of pride that I rise today to salute an outstanding house of worship in my Eighth Congressional District of New Jersey which, for a full century, has been a spiritual focal point and a beacon of faith for countless numbers of worshipers in the greater northern New Jersey area.

I am speaking of the Paterson Westside United Methodist Church of Paterson, NJ, which is celebrating its 100th anniversary in 1990. This historic occasion was observed with a special celebration at the church on Sunday, May 20, and was tremendous source of pride to all in attendance, and specially the pastor, Rev. Warren R. Brandt, Resident Bishop Neil L. Irons, and district superintendent, Rev. Hae Jong Kim.

Mr. Speaker, the history of Paterson Westside United Methodist Church is indeed a rich one. For the benefit of you and our colleagues, I would like to insert for the RECORD the history of this truly fine house of worship:

CHURCH HISTORY

Its early roots go back to 1868, three years after the end of the American Civil War, when a Sunday School was first organized. The Stony Road Mission, or the mission on the mountain, was established by the Cross Street Church to serve the western part of Paterson. In 1873 this mission was established by James Steele and Cornelius Velsor. The mission and its forerunner, the Sunday School, met in private kitchens, a wood shed and the depot of the Lackawanna Railroad to serve the religious needs of this determined group of Christians. Finally a small chapel was built in 1876 on the site of the present church.

On April 8, 1890, the Rev. J.H. Robertson was the first ordained minister assigned to the group. True to Wesley's tradition, he rode the Paterson Methodist Circuit serving the Calvary Sunday School, West Paterson (Westside) Sunday School and Cedar Cliff. Preaching in the morning at Calvary, and afternoons at Cedar Cliff, Rev. Robertson finished the circuit by preaching evenings at West Paterson. A month later, May, 1890, the Stony Road mission was organized as the West Paterson Methodist Episcopal Church and on June 1, 1890, 24 members were received from Cross Street Church along with three members accepted on probation.

Calvary and West Paterson shared pastors from 1891 until the spring of 1893 when West Paterson was made a separate appointment and Rev. H. A. G. Westerfield was appointed pastor. The last services were held in the old chapel on July 31, 1904. The new church, which was to cost $6,000.00 had the cornerstone laid on September 24, 1904.

Rev. H. C. Lytle, who had been appointed pastor in 1903, saw his new church finished by December 1904 and dedicated on January 15, 1905. Within two years the church building debt had been paid off through pledges and chowder sales held by the Ladies Aid Society.

The enthusiastic congregation had no sooner completed its church when it saw the need for a recreation clubhouse and in 1906 a big frame building complete with a bowling alley and basketball court was constructed. The structure served until fire destroyed it in 1923. It was rebuilt in 1924 being replaced by the present masonry structure and renovated in 1962.

Fire has proved a nemesis not only for the church hall but the sanctuary itself. Fires on January 16, 1924, and February 26, 1939, damaged the structure and repairs were made but the fire on January 25, 1941, completely gutted the building with the cornerstone and some furniture being salvaged. The congregation met in the chruch hall until the new structure was opened and dedicated debt free on December 14, 1941. The cornerstone from the original church had been salvaged from the fire and capped with a new stone reading "Rebuilt in 1941."

We have gone from wooden shed, to kitchens, to railroad depot, to chapel, to frame church, to brick church . . . We have had our name changed from Stony Road Mission, to West Paterson Methodist Episcopal, to Westside, to Westside United Methodist . . . We have seen generations come and go . . . We have seen good times and bad . . . But the determination of this congregation to worship the Lord and do His good works has and will continue to remain unchanged.

Mr. Speaker, I appreciate the opportunity to present a portion of the history of this distinguished church that has remained dedicated to helping others and guiding them spiritually. As Westside United Methodist Church of Paterson, NJ, celebrates its 100th anniversary, I know that you and all of our colleagues here in Congress will want to join me in extending our warmest greetings and felicitations for both the service and guidance it has provided for its community, State, and Nation.

## TRIBUTE TO THE VOCATIONAL INDUSTRIAL CLUBS OF AMERICA ON THEIR 25TH ANNIVERSARY

### HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. RITTER. Mr. Speaker, it is my great honor and privilege to salute the Vocational Industrial Clubs of America on the occasion of its 25th anniversary.

Since its founding on May 8, 1965, in Nashville, TN, VICA has been—and continues to be—a vitally important leader in delivering and improving vocational-technical education in our public secondary and postsecondary institutions.

VICA has provided what our Nation now so eagerly seeks: a labor force imbued with pride in work, and a personal commitment to leadership, citizenship, academic excellence, and quality skill training. Nearly 4 million students have improved their futures through VICA programs. They have enhanced their job and leadership skills to become productive and valued employees and business owners. Many have pursued further education in the course of developing their careers.

VICA's exemplary programs continue to serve their principal partners: employers, teachers, and nearly 250,000 students in 12,500 programs every year. In serving them, VICA serves the Nation as well. I have seen this in my own district where VICA is a major force in our own Quality Valley, USA Program, the Lehigh Valley's community of excellence. In fact, the Lehigh Valley of Pennsylvania is well represented on VICA's board by my good friend and constituent, Elmer Gates, chief executive officer of Fuller Co. in Bethlehem. In addition to serving as a VICA Industry Councils Chairman, Elmer is the chairman of Quality Valley, USA.

VICA's active partnership with over 250 national corporations, trade associations, and labor organizations have contributed to the furtherance of vocational-technical education. VICA's leadership has also built similar partnerships at the state and local levels.

VICA's members have built and improved their communities through their club activities, using both their vocational and leadership skills.

As the President stated in his proclamation for Vocational-Technical Education Week earlier this year:

If the United States is to remain a leader in the increasingly competitive global market place, it must not only be committed to excellence in the production of goods and services, but also be capable of achieving it. By preparing young men and women for work in highly specialized technical fields, vocational-technical education programs make an important contribution to our Nation's strength and productivity.

VICA's 25th anniversary year theme is "Quality at Work," acknowledging the many opportunities that vocational education provides for fulfilling work that serves the growing needs of our population for professional, and skill services. VICA has been putting the President's words into practice for the last quarter century.

Mr. Speaker, I hope my colleagues—and communities across America—will join me in voicing appreciation for VICA. Furthermore, I encourage all educators, students, and citizens at large to support and partake of the vocational education program offered by VICA and to duly note and acknowledge the value this organization contributes to our economic well-being and the well-being of our citizens.

## A TRIBUTE TO ERIC FRANKLIN

### HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GEKAS. Mr. Speaker, I ask my colleagues to join me in recognizing an exceptional young man from my congressional district in Pennsylvania.

Eric Franklin Bush of Muncy will be awarded the rank of Eagle Scout on May 31, 1990. As a member of Boy Scout Troop 21 in Montoursville, Eric has distinguished himself as a leader and a productive member of his community. His 25 merit badges are evidence of his versatility and industry, and his Eagle Scout project, to restore several bus sheds, benefited local schools and improved the appearance of this township.

Eric's accomplishments extend beyond Scouting. A class officer, he maintains honor roll status at Muncy High School. He works part time, and is involved in several other activities.

Mr. Speaker, Scouting is an honorable enterprise, one which Eric has pursued for 10 years with enthusiasm, dedication, and dignity. We congratulate him on his impressive achievements.

## FRANK PRINCIPE—THE "PRINCE" OF MASPETH

### HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MANTON. Mr. Speaker, on May 28, 1990, the community of Maspeth, NY will hold its annual Memorial Day Parade. This year, Frank Principe will serve as the Grand Marshal of the Maspeth Memorial Day Parade. Maspeth is located in the Ninth Congressional District, which I have the privilege to represent.

Mr. Speaker, Frank Principe is a remarkable engineer and an outstanding public servant. West Maspeth's thriving industrial district is largely the work of Frank Principe. At the beginning of World War II, Frank undertook a major development project, constructing 44 buildings in Queens.

Today, at age 81, Frank remains active in his community. As chairman of the West Maspeth Local Development Corp., a nonprofit organization he founded in 1982, Frank works to create new jobs for the unemployed, expand business opportunities, and improve the transportation system in the area. Frank also is a leader in the effort to alleviate the problem of homelessness.

Mr. Speaker, I can think of no one more deserving to serve as chairman of the Maspeth Memorial Day Parade than Frank Principe. I urge my colleagues to read the following article on Frank Principe, which appeared in the Queens Ledger.

[From the Queens Ledger, Apr. 19, 1990]

THE "PRINCE" OF MASPETH, FRANK PRINCIPE TO BE GRAND MARSHAL

(By Brian Winzeworth)

The cluttered desk nestled inside the Spartan trailer in West Maspeth, like the man who has laid claim to it for the past eight years, greets visitors with a sense of dynamics, of many tasks underway at once. A stack of well-used brown envelopes labeled "City Charter" and "The Homeless" occupy its worn surface.

Nearby lie a pile of telephone messages from area residents seeking assistance in bringing lawsuits against the city for failure to repair a sagging street which has caused water mains to leak and rupture.

Above the desk, which remains perpetually pigeon-toed in-between a copy machine and a long narrow table, a diploma from Cornell University proclaims "Francis Joseph Principe, Chief Engineer" for all to see.

For the 81-year-old resident of Maspeth, this "no frills" office is appropriate. His desk is the desk of a chief engineer, one whose busy career began before the first warehouse in West Maspeth's industrial district even began being built.

Today, the chief engineer no longer undertakes massive construction projects like the 44 buildings he erected in Queens at the onset of World War II.

Instead, Principe, who has been chosen as the grand marshal of this year's Memorial Day parade in Maspeth, busies himself with developing new jobs for the unemployed and improving the local "quality of life."

"The idea is to give local jobs to local people," he said one recent afternoon inside the trailer headquarters for the West Maspeth Local Development Corporation, a not-for-profit organization he created in 1982.

Appropriately, the shiny trailer sits in the front yard of David and Warshol Plumbing on 49th Street, overlooking much of the area Principe helped to mold more than a half-century ago. There, Principe spoke about his beloved Maspeth and, in doing so, revealed some of the personal qualities which have earned him the status as the grand marshal of this year's parade.

Parades have always played an important role for the Principes ever since the family immigrated from Italy to the East New York section of Brooklyn at the turn of the century. His father, Louis, was a brick layer by profession but a grand marshal at heart.

Louis belonged to an Italian Society, a membership which was a source of great joy to both father and, later, son who at the impressionable age of nine enjoyed the opportunity of seeing his dad elected as grand marshal.

"It was a big parade and he was the grand marshal," Principe recalled with a hint of elation in his voice. "I remember my father marching. Now it's happening to me. It's very exciting!"

Indeed, the ensuing years would prove to be very tantalizing for the young Frank Principe. Brooklyn was a place of rapid change during the 1920s and 1930s as the Depression came and went, leaving in its aftermath a housing boom.

The elder Principe, through his association with the Masons, became involved with various business ventures in the borough, particularly major industrial developments like the Bush Terminal near the Brooklyn Navy Yards. Meanwhile, the junior Principe was learning the basic skills for his success in later life at Manuel Training High School, a hands-on vocational institution.

Upon his graduation from Cornell University in 1931, Principe found himself in a unique situation: He possessed an extraordinary vocational background, yet had no actual work background!

His father soon offered him a piece of advice that he never forgot. "You need work? Go to work!"

By that time, Louis Principe had become a builder of citywide reputation, and was involved with a new housing development on 65th Place known as the Ridgewood Gables. It was also at that time many banks failed, casting a shadow on the city's economy which postponed the building of many new homes and slowed the completion of those already in progress.

The Democrats in New York were advocating the so-called "California" homes—sturdy houses for a "cheap" $4,990—for the middle working class in the Maspeth area during the decade before World War II, Principe recalled. In the interim, he had finished the Gables which his father had

begun and having moved into the six-story apartment complex, became the president of the Ridgewood Plateau Civic Association and built nearby Maurice Park.

After a flurry of negotiations, culminating with a stamp of approval on the hood of a Cadillac (driven all the way from Washington, D.C. for the occasion), Principe managed to obtain the first HFA (Home Financial Assistance) loan in the United States.

The war began and with it a need for fighting men and machine—and builders like Principe.

The area of land known today as West Maspeth didn't exist prior to 1944: in its place was a huge swamp of about 100 square acres. The Maspeth Creek, named after indigenous Indians, ran eastward along where Principe's trailer stands.

As the chief engineer for the project, his task was a simple but arduous one: fill in the creek and adjacent land and build an array of warehouses in a hurry to help the nation's war effort.

"Frank, don't knock yourself out! The war won't last forever!" a superior told Principe when the chief engineer said he wanted to erect structures that would remain standing for many decades. Contrary to his instructions, Principe build them the only way he knew how—the right way.

After the war, the factories which weren't suppose to last fell silent but remained standing, eventually being sold to private industry for other purposes.

In those days, the American Legion began to observe an annual ceremony to the nation's fallen war heroes, with post 783 hosting a memorial day parade through Maspeth.

In September, 1984, Queens Borough President Claire Schulman declared a Frank Principe Day. He was honored along with wife Virgina, their children, son Lee James and daughter Virgina, and four grandchildren, at the Mariott Hotel.

"The past 60 years in local history have been very exciting," said Principe who, in addition to running the development corporation, has become a member of Community Board 5.

Frank Principe, community activist and expert builder, will be at the head of Maspeth's parade come May 28th. It's his parade—and in many ways, his town.

## REDUCED SPENDING RATHER THAN INCREASED TAXES

### HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GINGRICH. Mr. Speaker, the lead editorial in the May 16, 1990, Atlanta Constitution makes the case for reduced spending rather than increased taxes in addressing the problem of the deficit.

Let me just highlight one paragraph:

Truth is, there are literally thousands of ways to cut the federal budget without imposing real harm. It's no mystery. Various political think tanks, such as the Heritage Foundation, have offered examples of unwarranted federal spending for the past decade.

Mr. Speaker, I believe the majority of American people share this same sentiment.

This message is one which I will carry with me to the budget summit talks.

The article follows:

[From the Atlanta Constitution, May 16, 1990]

PRESIDENT SHOULD HAVE SAID: "READ MY LIPS: NO BUDGET CUTS"

In hindsight, we very much regret that President George Bush didn't travel the country vowing: "Read my lips, no budget cuts."

Had he done so, the natural alliance of journalists and politicians inside the Washington Beltway might well have mobilized the country to demand a reduction in federal spending.

Instead, the president promised no new taxes, thereby launching the Washington establishment on its favorite pastime: Demonstrating to the rest of the country that they know more about these matters than the president.

Reams of copy have flowed from inside the Beltway offering eloquent accounts of the impossibility of avoiding higher taxes. The president may not understand politics and the budget, but the Washington media and politicians—whose policies have failed to win the nation's endorsement in five of the last six national elections—certainly did.

The administration and congressional leaders now are gathered in a budget summit with "no preconditions," which Beltway insiders see as the ultimate acceptance of their compelling arguments in support of higher taxes.

We don't have a good feeling about this summit.

Democrats have demonstrated already that they are hopeless captives of a tax-and-spend ideology, proposing as they do to use a non-existent "peace dividend" of money-to-be-borrowed to create new social spending programs.

Mr. Bush, too, has shown a disturbing tendency to propose and compromise, to divide the difference on spending. The result, of course, is that nothing fundamentally changes, except the tax rates.

Truth is, there are literally thousands of ways to cut the federal budget without imposing real harm. It's no mystery. Various political think tanks, such as the Heritage Foundation, have offered examples of unwarranted federal spending for the past decade.

All of them, of course, are protected by some special interest, whether farmers, veterans, the elderly, mayors and governors, or the medical profession. The problem has been that Congress and the administration lacked the resolve to face down special interests.

Having been driven to a budget summit, we hope now that actual cuts in indefensible programs are as much a part of the discussion as higher taxes.

Higher taxes, regardless of Mr. Bush's weakening resolve, are not the solution. The solution was and remains spending reductions and the elimination of programs that have outlived their purpose.

We trust that's the message Sen. Wyche Fowler and Rep. Newt Gingrich are taking to the negotiating table.

## NATIONAL MARITIME DAY—MAY 22, 1990

### HON. WALTER B. JONES

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. JONES of North Carolina. Mr. Speaker, today, Tuesday, May 22, 1990, is National Maritime Day. This is the day set aside every year to honor the thousands of men and women who have devoted their lives to the American-flag merchant marine. It is also an occasion to remember the thousands of American merchant mariners who lost their lives confronting the natural forces of the wind, weather, and the sea. We also remember and salute those mariners who perished at the hands of the enemies of the United States.

The United States is one of a handful of representative governments which thrive on peace. There is a longing in the American spirit for peace. Individual Americans realize that this is an imperfect world. Armed force is sometimes necessary to ensure the continuation of the Republic, but Americans would rather devote their time and effort to their families, their careers, and the betterment of their communities.

It is a paradox of American history that peace is usually associated with hard times for our shipbuilders and ship operators, as well as for the men and women who crew our merchant vessels. When a national emergency is declared, we look to our ships to deliver the cargoes necessary to support the military. In other periods, this Nation is content to allow unseen and unguided market conditions to undercut the American merchant marine. We must remember that our ultimate security is dependent upon our ability to build, operate, and crew merchant vessels. That is why National Maritime Day is so important.

As chairman of the Committee on Merchant Marine and Fisheries, I ask all who enjoy the fruits of peace and victory to remember the cost at which they were purchased. We are all grateful to those who perished on the *Murmansk Run,* to those who were incinerated delivering petroleum to our allies, to the hundreds of merchant mariners taken prisoner of war. We remember too the men and women who worked in our shipyards day and night to build the tankers and cargo ships which carried the United States to victory. All that sacrifice and all that work must not be forgotten.

And so I ask all Americans to celebrate the true meaning of National Maritime Day, 1990, and remember those who cannot be with us today. This peaceful celebration is possible because the men and women of the American merchant marine answered the call to act in the national interest.

## A TRIBUTE TO JOHN A. NEDJEDLY

### HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MILLER of California. Mr. Speaker, for the past 40 years Californians have known the dedication of John A. Nedjedly, a former State senator from Contra Costa County. I would like to take a few moments to highlight the illustrious public career and community service work of Senator Nedjedly.

Prior to his legislative career, John served Contra Costa County in many capacities. These positions ranged from deputy district attorney, city attorney for Walnut Creek, Contra Costa County Counsel, and finally three terms as Contra Costa County district attorney. His ability to assess the needs of the community led him to write the "Little Master Plan", which made it possible for the city of Walnut Creek to develop its central business district.

In 1969, by a special election, John was elected to represent the Seventh State Senatorial District. During his time in office, John wrote bills dealing with law enforcement and administration of justice, local governments, public health and consumer protection. His strongest interest, however, was in environmental protection. John was the author of numerous major pieces of legislation providing for the most effective management of California's natural resources, including the State's most comprehensive solid waste management program. For his leadership and efforts in this area, Senator Nedjedly received the American Motors Award of 1966 as one of the "Ten Outstanding Americans in the Field of Conservation".

Today, John still has an interest in community issues, and is very active in county affairs. He is founder and president of the Contra Costa Youth Association, chairman of the County Board of Supervisors Committee on Pre-Trial Release and Criminal Justice, Contra Costa County Council, director of the Council of Community Services, Park and Recreation Council, County Health Association and Children's Vision Center of the East Bay, just to name a few. Senator Nedjedly, as a Scoutmaster, is actively involved with the Boy Scouts of America, particularly with the Boy Scouts of Contra Costa County. John is an Eagle Scout as well.

On Thursday, May 24, 1990, the Easter Seal Society of Contra Costa, Solano, and Napa Counties will honor John Nedjedly. The Easter Seal Society has established Camp Nejedly-Hawley Lake, an Easter Seal camp for disabled children, a project close to John's heart.

Mr. Speaker, I would like to take this opportunity to commend Senator Nedjedly for his sincere interest and continued involvement in community affairs. These efforts have certainly earned him the respect and appreciation of the members of the community. I also thank Senator Nedjedly for 40 years of dedicated service to California and to Contra Costa County.

## THE CASE OF POET JACK MAPANJE

### HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LEWIS of Georgia. Mr. Speaker, I wish to call to the attention of my colleagues the situation of one of Africa's greatest poets, Jack Mapanje. Mr. Mapanje is a Malawian writer and theoretical linguist who has been in prison since September 1987. His crime was to write poetry which too vividly depicted the reality of his country. Malawi suffers under the 25-year long dictatorship of Life President Kamuzu Banda.

The Congressional Committee to Support Writers and Journalists was created to support and defend people, like Jack Mapanje, who are in jail solely because of their written words. I serve as a member of the steering committee of the Congressional Committee to Support Writers and Journalists, along with my colleagues, Congressman BILL GREEN, Senator BOB GRAHAM, and Senator MARK HATFIELD. The bipartisan group includes 74 Members of the House of Representatives and 15 Senators. We have written letters on 175 cases in over 40 countries. Among the cases we have taken up is Jack Mapanje. We have repeatedly urged his unconditional release.

A description of Jack Mapanje, provided by the human rights organization Africa Watch, as well as one of his poems follows:

On September 25, 1987, Malawian police arrested Jack Mapanje, the country's best-known poet. Since then, the internationally regarded writer and theoretical linguist has remained imprisoned in Mikuyu Prison, in southern Malawi, without charge or trial. Despite widespread international protest, the Malawian government has given no reason for Mapanje's detention.

Unfortunately, in a country as fiercely repressive as Malawi, the real reason for Mapanje's detention seems painfully clear: until his arrest, Mapanje had skillfully avoided Malawi's Censorship Board and used his poetry to criticize the 25 year rule of Life-President H. Kamuzu Banda. Even after prohibiting the sale of Mapanje's volume of poetry, "Of Chameleons and Gods," it appears that Banda's government could not tolerate the popularity of Mapanje's metaphorical, personal and political verse.

Malawi's Censorship Board has become universally notorious for its liberal use of the red pencil—literature banned in the country ranges from Marx and Engels, to Ernest Hemingway, James Baldwin, Graham Greene and George Orwell. In such difficult circumstances, it was quite an accomplishment that Jack Mapanje avoided censorship and imprisonment for as long as he did.

Mapanje, of course, was acutely aware of the political pressures facing a poet in Malawi. His first volume of poetry, "Of Chemeleons and Gods," was not cleared for sale in Malawi, but was also not banned, leaving the collection in a curious vacuum—individuals could not be prosecuted for possessing the volume, but bookstores could not sell it. This move was made, Mapanje felt, because banning the book outright "would make me a hero, and they didn't want one of those." Indeed, Mapanje was amused at the thought that attempting to avoid the attention of the Censorship Board may actually have improved his poetry, by forcing him to employ metaphors which broadened the scope of his writing.

On a different level, Mapanje was fearful of a society in which censors decide the content of national culture. In a speech in 1986 at the Second African Writers' Conference, Mapanje said: "In certain parts of independent Africa . . . censorship is deliberately established to discourage the development of authentic culture." He believed, however, that "African writers, artists and scholars must be the custodians of African culture; not the censors and politicans they represent."

Jack Mapanje's self-declared war against censorship reached a critical state in 1987. Earlier, in 1986, he had delivered a speech at a conference in Stockholm entitled "Censoring the African Poem: Personal Reflections", in which he described his ongoing conflicts with the Malawi Censorship Board. By 1987, Mapanje had planned to release a second volume of poetry, provisionally entitled "Out of Bounds." It appears, though, that the Malawian authorities were fearful of the criticism that this volume might contain, and also worried about an invitation extended to Mapanje to become a writer-in-residence at the University of Zimbabwe. It was presumbly felt that from the safety of Harare, Mapanje would feel less constrained about openly criticizing the Malawian government.

At the time of Jack Mapanje's arrest, in September 1987, Malawian authorities took him in handcuffs to the University of Malawi, where he headed the Department of English, searched his office and seized various manuscripts. Mapanje's volume of poetry "Of Chameleons and Gods," was also banned.

Jack Mapanje is presently being held at Mikuyu Prison. For the first 20 months of his incarceration, he was not allowed visits from his family or friends, and was not allowed to see a priest—Mapanje is a practicing Roman Catholic. It is believed that international protest over his incarceration may have helped improve these conditions, but Malawian authorities have maintained a steadfast silence on his detention.

The destructive effects of censorship on Malawi, however, continue unabated, damaging not only artists and citizens but also the political leadership of the country itself. For, as Mapanje stated: "censorship ultimately protects African leadership against truth."

Reprinted below is one of Mapanje's poems from his volume "Of Chameleons and Gods." The poem, which several of Mapanje's acquaintances had told him was "too dangerous", describes the situation facing a government minister who has lost his job and has to return to his home village. The ex-minister, in his arrogance, assumed that he would never have to leave the capital and had not tried to improve his village.

MAKING OUR CLOWNS MARTYRS (OR RETURNING HOME WITHOUT CHAUFFEURS)

We all know why you have come back home with no
National colours flanking your black mercedes benz.
The radio said the toilets in the banquet halls of
Your dream have grown green creepers and cockroaches
Which won't flush, and the orders you once shouted

To the concubines so mute have now locked you in.
Hard luck my friend. But we all know what currents
Have stroked your temper. You come from a breed of
Toxic frogs croaking beside the smoking marshes of
River Shire, and the first words you breathed were
Snapped by the lethal mosquitoes of this morass.
We knew you would wade your way through the arena
Though we wondered how you had got chosen for the benz.
You should have been born up the hills, brother where
Lake waters swirl and tempers deepen with each season
Of the rains. There you'd see how the leopards of
Dedza hills comb the land or hedge before their assault.
But welcome back to the broken reed-fences, brother;
Welcome home to the poached reed-huts you left behind;
Welcome to these stunted pit-latrines where only
The pungent whiff of buzzing flies gives way.
You will find your idle ducks still shuffle and fart
In large amounts. The black dog you left still sniffs
Distant recognition, lying, licking its leg-wounds. And
Should the relatives greet you with nervous curiosity
In the manner of masks carved in somebody's image,
There is always across the dusty road, your mad auntie.
She alone still thinks this new world is going shit.
She alone still cracks about why where whys are crimes.

## INTRODUCTION OF RESOLUTION URGING UNITED STATES RATIFICATION OF SOUTH PACIFIC ENVIRONMENTAL CONVENTION

**HON. ROBERT J. LAGOMARSINO**
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LAGOMARSINO. Mr. Speaker, I am introducing a resolution today entitled, "Urging United States Ratification of the Convention for the Protection of the Natural Resources and Environment of the South Pacific Region." The convention has two protocols dealing with the ocean dumping of wastes and pollution emergencies. The protocols should help to prevent or avert the damaging consequences of the ecological tragedies of oilspills and hazardous waste pollution in the South Pacific.

The United States has an opportunity to demonstrate international leadership in preserving and protecting one of the Earth's greatest resources, the oceans; and specifically the South Pacific Ocean region, by bringing the convention and related protocols into force through U.S. ratification. Not only should the United States be one of the countries which brings the convention into force, but the practical mechanisms provided for by the convention are needed to protect the marine ecosystem.

The United States signed the convention and related protocols in 1986 with 13 other countries. The administration has yet to submit the convention and protocols to the Senate for advice and consent to ratification—10 ratification or accessions are required to bring the convention into force; 8 signatory states have deposited notices of ratification or accession: Republic of the Marshall Islands, May 1987; Cook Island, September 1987; Federated States of Micronesia, June 1988; Australia, July 1989; Solomon Islands, August 1989; Papau-New Guinea, September 1989; Fiji, September 1989; and New Zealand, May 3, 1990.

The resolution calls for the President to submit the convention and—as necessary—the related protocols to the Senate for its advice and consent to ratification. The administration has expressed full support for the convention and protocols and is expected to submit them in the near future.

The resolution also urges the Senate to consider the convention and protocols without delay once submitted, in order to permit full participation and cooperation of the United States in the South Pacific Regional Environment Program, including the SPREP Work Program. The resolution states that the United States should commit a fair share of the resources necessary to support the work program and those activities necessary to implement the provisions of the convention and its protocols. The administration has provided an equitable U.S. contributions of $90,000 to SPREP in 1990.

The SPREP was adopted in 1982 by governments of the South Pacific region at the Rarotonga Conference on the Human Environment in the South Pacific. SPREP was formed under the auspices of a number of different South Pacific regional organizations and components of the United Nations: the South Pacific Commission, the South Pacific Bureau for Economic Cooperation, the United Nations Environment Program, and the U.N. Economic and Social Commission for Asia and the South Pacific.

The combined efforts of these regional and international organizations was considered necessary to help the many small and distant island countries to effectively address potential ecological threats of an increasingly industrialized world. The two principal aspects of SPREP are the convention and the Work Program.

The SPREP Work Program concentrates on the major environmental problems confronting the Pacific island countries: marine pollution, pesticide control, natural resources management, environmental education, climate change and sea level rise. While some continental countries share in these same concerns, the fragile, distant, and often small low elevation island countries are particulary vulnerable.

I want to acknowledge the support of my colleagues who have joined me in sponsoring this resolution, including the chairman of the Foreign Affairs Subcommittee on Asian and Pacific Affairs, my good friend from New York, STEVE SOLARZ. Chairman SOLARZ recently issued a report of the congressional delegation to the South Pacific which he led, "Problems in Paradise: United States Interests in the South Pacific." One of the report's recommendations for U.S. policy in the region is to "ratify SPREP Convention and associated protocols." The recommendation was one of several which will enhance U.S. relations in the Pacific.

I also want to thank PAT SAIKI, BEN BLAZ, and ENI FALEOMAVAEGA for joining this effort to urge the administration and the Senate to take prompt action to bring into force the convention and protocols to protect the fragile and invaluable marine resources and ecosystems of the Pacific.

The following is the resolution in full:

RESOLUTION

Whereas the Earth's fragile ecological system requires the attentive stewardship of Man;

Whereas water covers three-fourths of the Earth's surface, with the Pacific Ocean containing over half of the total volume;

Whereas the Earth's marine ecosystems are increasingly threatened due to expanding populations and industry and their accompanying residues and wastes;

Whereas Pacific governments adopted a South Pacific Regional Environment Program (hereinafter in the preamble of this resolution referred to as "SPREP") in 1982 at the Rorotonga Conference on the Human Environment, which was formed under the auspices of the United Nations Environment Program, the United Nations Economic and Social Commission for Asia and the South Pacific, the South Pacific Bureau for Economic Cooperation, and the South Pacific Commission;

Whereas SPREP has two aspects, the Work Program and the Convention, to address Pacific Ocean environmental concerns;

Whereas the United States is supporting the SPREP Work Program budget directed toward marine pollution, pesticide control, natural resources management, environmental education, climate change, and sea level rise;

Whereas the SPREP Convention for the Protection of the Natural Resources and Environment of the South Pacific Region was opened for signature in Noumea, New Caledonia on November 24, 1986, 14 countries having signed the Convention;

Whereas the Convention has two protocols on ocean dumping and spills;

Whereas the first protocol, the Protocol for the Prevention of Pollution of the South Pacific Region by Dumping, regulates the deliberate disposal of wastes at sea in the Convention Area, taking into account that under Article X of the convention the parties agree not to dump radioactive wastes or other radioactive matter;

Whereas the second protocol, the Protocol Concerning Cooperation in Combating Pollution Emergencies in the South Pacific Region, provides a regime for preventing and combating pollution incidents through the mutual sharing of information, preparation of contingency plans, and strengthening of response capabilities; and

Whereas the Convention will enter into force with the ratification, acceptance, approval, or accession of 10 of the signatory countries, and 8 signatures have already ratified or acceded to the Convention: Now, therefore, be it

*Resolved*, That it is the sense of the House of Representatives that—

(1) the President should submit the Convention for the Protection of the Natural Resources and Environment of South Pacific Region, and (as necessary) the related protocols, to the Senate for its advice and consent to ratification;

(2) upon the submission of such Convention and protocols to the Senate, the Senate should without delay consider and give its advice and consent to ratification in order to permit full participation and cooperation of the United States in the South Pacific Regional Environment Program effort to protect and manage the marine and coastal environment, to combat pollution emergencies, and to prevent dumping; and

(3) the United States should commit a fair share of the resources necessary to support—

(A) the Work Program of the South Pacific Regional Environment Program, and

(B) those activities necessary to implement the provisions of the Convention and its protocols.

## THE 75TH ANNIVERSARY OF THE ARMENIAN MASSACRES

### HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BURTON of Indiana. Mr. Speaker, on April 20, President Bush issued a statement which recognized "the terrible massacres suffered in 1915–1923 at the hands of the rulers of the Ottoman Empire." The President added, "On this seventy-fifth anniversary of the massacres, I wish to join with Armenians and all peoples in observing April 24, 1990 as a day of remembrance for the more than a million Armenian people who were victims."

While this statement correctly avoided the term genocide, it regrettably makes the same mistake as Senate Joint Resolution 212 (S.J. Res. 212), a resolution sponsored by Senator Robert Dole and debated on the Senate floor earlier this year. Like Senate Joint Resolution 212, a resolution which designates April 24 as a national day of remembrance for the "Armenian genocide of 1915–1923," President Bush's recent statement presents only one side of the Armenian equation.

Therefore, I would like to share with President Bush and my colleagues the historical facts which took place in the Ottoman Empire during that time. There is no doubt that thousands of Armenian civilians died as a result of the terrible conditions and actions of the time. Famine, epidemics and intercommunal fighting, combined with a poorly executed forced relocation policy for the Armenian population, all contributed to a tragic loss of life for Christians and Moslems.

However, it is morally wrong to recognize the suffering of Armenians without acknowledging that it was the result of a civil war initiated by Armenian revolutionaries in collaboration with invading Czarist Russian armies. The goal of these revolutionaries was to impose an exclusively Armenian state in an area of the Ottoman Empire where Armenians were a minority. The civil war took its toll on both sides. Yet, few recognize the 2 million Turks that perished during this conflict, many at Armenian hands. These losses are no less significant than those of the Armenians.

It's time to leave to historians the task of assembling the historical facts and determining what really occurred during this turbulent period of time. President Bush's statement endorses a specific historical version of tragic events about which there remains considerable controversy among historians and scholars. Most importantly, it demonstrates a lack of sensitivity for one of our most loyal allies.

I regret the suffering and tragedy experienced by Armenians. However, it's a great mistake to stoke the fires of ancient grievances. Public statements and congressional legislation will not solve the Armenian issue. After 70 years, it is time to look to the future and not dwell on the past.

## EDGAR FLEETHAM

### HON. HOWARD WOLPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. WOLPE. Mr. Speaker, I rise today to pay tribute to the longest serving public servant in my congressional district in southwestern Michigan, Mr. Edgar Fleetham, on the occasion of his retirement from elected office.

Ed has been an elected official since 1936, when he won the Sunfield Township treasurer's seat at age 21. Subsequently, in recognition of his remarkable responsiveness and dedication to serving his constituents, he was elected to a variety of other positions—township board member, township supervisor, Sunfield High School Board of Education member, and Eaton County commissioner. It is from his district county commission seat that he is now retiring.

However, this amazing list of public offices only touches the surface of Edgar Fleetham's involvement in public matters. During the last half-century he has also served on the boards of a number of organizations, including the Tri-County Mental Health Board, the Michigan Association of Public Health Boards, the Michigan Association of Counties, and the Michigan Association of Local Public Health.

In addition to his public service commitments, Mr. Fleetham has served as the lay leader of the Sunfield United Methodist Church for 46 years. He is also a loving husband, father, grandfather, and great-grandfather.

Mr. Speaker, it is obvious that Michigan and Eaton County will lose a great public servant when Edgar Fleetham retires this year. His commitment to public service and his responsiveness to his constituents have been his trademarks these many years—and these characteristics have been repaid with the affection and respect his constituents hold for him. We are all in his debt, and I know that my colleagues will want to join with me in wishing Edgar Fleetham all of the best of the occasion of his retirement from public office.

## IN RECOGNITION OF BAY HAVEN ELEMENTARY SCHOOL

### HON. PORTER J. GOSS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GOSS. Mr. Speaker, in today's competitive world, the United States faces a tremendous challenge in preparing our children to lead this Nation into the next century.

In meeting that challenge, we depend upon our communities and the creative dedication of teachers and school administrators, whose work often goes unrecognized and unrewarded. In an era of troubling statistics about our national education system, individual success stories deserve our attention and should become the focus of our efforts to effect positive change.

Mr. Speaker, today I rise to recognize one success story—the Bay Haven School for Basics Plus, located in Sarasota, FL. This elementary school has just recently been honored by the Federal Department of Education under the 1989–90 Blue Ribbon Schools Program for "unusually effective" achievement and excellence.

One of 497 schools in the country nominated for this recognition, Bay Haven is 1 of only 221 schools to receive the award, whose purpose is to "identify and call attention to unusually successful public and private elementary schools and, through publicity and other means, to encourage their emulation by other educators."

Those of us in southeast Florida are very familiar with the tremendous contribution the Bay Haven School for Basics Plus makes in getting our youngest students off to a strong start. This type of national recognition is not only well-deserved, but will also help to spread the word about the good work the teachers, administrators, families, and students at Bay Haven are doing every day.

Under the leadership of its dynamic principal, Marilyn Highland, Bay Haven boasts several innovative programs, including a new concept where fourth-grade students visit a nearby University of South Florida campus for a brief introduction to college life. School officials hope such early exposure to higher education will help encourage children to stay in school.

Perhaps one of the school's most unique characteristics is its emphasis on family involvement. In fact, parents are asked to sign a contract with the school underscoring their commitment to play an active role in their children's education.

As a guest at a recent Bay Haven Spirit Day rally, I was impressed with both the enthusiasm and the discipline of the students and the dedication of the staff. Certainly winning the National Blue Ribbon Schools Program Award is a well-deserved honor for Bay Haven, but the real reward for the school's efforts lies in the unmistakeable fact that its programs are working.

## DEFEAT OF THE PATRIOT ENERGY COAL PLANT

### HON. CHESTER G. ATKINS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. ATKINS. Mr. Speaker, I rise to pay tribute to local officials and concerned citizens in the town of Ayer, MA who banded together to defeat the proposed siting of a 240-megawatt coal burning plant in their town. Unfortunately, I can't be with them to celebrate at tonight's board of selectmen meeting. However, I share their celebratory mood and I will be with them in spirit.

Last week, the Massachusetts Energy Facilities Siting Council [EFSC] hammered the final nail in the coffin of the Patriot Energy proposal by denying Patriot an extension for proceeding with its siting application. While lawyers representing Patriot have indicated that it would be possible for the company to reapply for a siting license, I can assure the town that the proposal is dead. Thanks to the town's success in pointing out the clear and present dangers the facility would have posed to the local environment, the project has absolutely no chance of being approved by either the EFSC or the Massachusetts Department of Environmental Protection. As a result, any subsequent application by Patriot Energy would simply be an exercise in futility.

I believe that the manner in which the town approached this situation will serve as a model for officials in other towns to follow. Rather than simply saying not in my backyard, town officials devoted a great deal of time and effort to establishing strong ties to the citizens groups who opposed the project. Together, they carefully researched the proposed coal-burning technology, collected and disseminated information on the steps needed to protect their aquifer, and calmly and rationally exposed the inadequacies contained in the draft environmental impact report.

I was honored to work with them in this fight against environmental disaster. While I deal with policy issues relating to clean air and clean water on a daily basis as a result of my seat on the subcommittee that funds the Environmental Protection Agency, I still relish the opportunity to step in at the grassroots level and join my fellow citizens in a fight against something that clearly threatens our environment. I hope that we can build upon this experience not only to stop future threats to our community, but also to work together to provide the environmental quality and economic growth that we all seek for the town of Ayer.

## AMELIA—A BIT OF PARADISE IN MY DISTRICT

### HON. CHARLES E. BENNETT

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BENNETT. Mr. Speaker, I have in the district I represent a "bit of Paradise." I am proud to say that Amelia Island Plantation, Amelia Island, FL, in my congressional district, has emerged as the Family Resort of the Year (1989) from a Family Circle magazine tally of nearly 6,000 respondents. As well, Amelia Island Plantation, Amelia Island, FL has been designated by the television program, "Lifestyles of the Rich & Famous," as being one of the "World's 10 Most Beautiful Beaches."

"Amelia Island Plantation is a four-star golf and beach resort on Florida's northernmost barrier island spread out over 1,250 woodsy acres," states Family Circle, and further quoting comments of the voters: "Still has the lush, green, woody feel. Unspoiled.—A.B.W., McComb, Miss." "Excellent program for children: Ours didn't want to come home. Made kids feel special with varied activities and caring staff.—I.O., Kennesaw, GA." "We visit every year. The children enjoy the youth program; we enjoy the relaxation.—S.K., Rochester, N.Y." (Family Circle, April 3, 1990.

Mr. Speaker, I take this opportunity to vouch for the beauty of Amelia Island and to submit for the RECORD a copy of an article from the local newspaper, the Fernandina Beach News-Leader. It is my pleasure to represent in Congress such a world renown location.

PLANTATION WINS AWARD

(By Ruby Christian)

Readers of Family Circle magazine agree with Amelia Island Plantation's focus on making provisions for family-style vacations, the publication reported in its April issue.

The resort caters to families yet enables parents to get off by themselves or gather with an adults-only group.

The Plantation won the magazine's beach resorts category after 6,000 readers responded to Family Circle's invitation to vote.

The Plantation and four other resorts emerged as overall national favorites.

Plantation General Manager Jack Healan said he believes the winning combination includes the Amelia Island site's natural beauty, professional staff and outstanding recreation department which caters to family needs. Children are not only given care when parents choose to be away from them, activities are provided to keep the youngsters happy, he pointed out.

The Plantation won the first-ever Premier Property Award in 1989 which was given by the Resort and Commercial Recreation Association.

"Through company support and a dedicated staff, our recreation department has grown in size and capabilities," said Karyl Stewart, director of the recreation department on when the Premier Property Award was announced.

## GILLIAN MITCHELL AND JACQUALINE BAIRD: STORY OF SUCCESS

### HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LEHMAN of Florida. Mr. Speaker, Miami has long been the destination of choice for immigrants from dozens of countries, and these newcomers have contributed greatly to our community. Two who have made a difference are Gillian Mitchell and Jacqualine Baird, British twins who came to Miami and founded a successful swimwear company called Twins 27 years ago.

I have played tennis for years at Miami Shores with these two women. I never could tell them apart on the court, only in their cars, because they had different license plates: "1st Twin" and "2nd Twin."

I knew they were good tennis players, but not until I read a recent article in New Miami magazine did I learn about their business success. I would like to share this article with my colleagues.

GILLIAN MITCHELL AND JACQUALINE BAIRD—IN THE SWIM WITH TWINS

(By Hope Katz)

Roll after roll of the colors of summertime line the walls of the Twins warehouse in Hialeah, stock for the next generation of bikinis. Fire engine red, marigold yellow, cinnamon, tangerine, snow white, hot pink. These are the shades of 1990.

"This year is going to be our biggest ever, because color is what's selling suits," says Gillian Mitchell. "If a girl is walking down the beach wearing cotton candy pink and another is wearing red hot pink, who would you look at?"

Mitchell should know. Twins, the company that she and twin sister Jacqualine Baird founded 27 years ago, will manufacture a quarter million of the slight swimsuits this year. Sales are expected to exceed $4 million. And all from the "extremely brief two-piece," as Webster's puts it, which the twins started making as a lark.

The sisters came to Miami Beach in the early '60s, British show girls who arrived in the last the Gleason-era hey-day—by way of Berlin and Cairo.

"We were performing our song-and-dance act as the Hamilton Twins," says Baird, who designs most of the Twins suits. "We were trotting around the globe, performing in theaters and having a wonderful time."

"It was when we were playing a club in Puerto Rico that we got the idea about making bikinis," says Mitchell, the marketing side of the team. "On the beach, all of the girls were asking us where we'd gotten our bikinis. In Puerto Rico, you could wear a bikini on the beach, but not around the pool. Meanwhile, everyone in Europe was wearing bikinis. The girls on the beach knew this, and they asked us if we'd make them some just like the ones we had. That started us thinking."

A few days later the twins had sewn several suits and put them in the Caribe Hotel dress shop, on consignment. The first order sold out, "and that was our entrance into the world of high fashion," says Baird.

That was in 1963, and the sisters decided to set themselves up in the bikini business in South Florida. With an investment of $10,000 from each of the twins, and an additional $25,000 from partner Barney Boardman, they opened in the rear of a small boutique in Hollywood, supporting themselves mostly from their evening work at nightclubs in the Fontainebleau and Diplomat hotels.

"For the first year we didn't take a salary. We also didn't have time to sew all the suits ourselves. So, we hired several local ladies to do the sewing for us. We would take them the patterns and materials, then pick up the finished product and drop off the new orders. We spent a lot of time in the car," says Baird.

In the mid-1960s, they decided to move the production under one roof. They moved to their current warehouse in Hialeah, hired a staff of seamstresses and started doing business full-time. "The hardest thing was getting fabric. No one wanted to help us because we had no collateral. A few did help, and we have been eternally grateful. Of course, many didn't, and when they came back trying to sell material to us, we didn't forget that," says Mitchell.

Now the sisters develop a line of about 100 suits each year, which is pared down to a "top 20" list. The suits retail for $20 to $55, and are distributed to 1,500 shops in the U.S., Costa Rica, El Salvador, Nicaragua, Venezuela, and most recently, Holland. A large portion of their business also comes from distribution on Royal Caribbean Cruise Line, where their biggest seller is the whole-piece suit embroidered with gold lamé.

Like many twins, Mitchell and Baird often finish each other's sentences and thoughts. With seven children between them, the pair banter and giggle like kids themselves. At 58, they don't show their age. "We love what we do," says Mitchell. "Our employees [95 in all] are like family."

"They were the first to come up with interchangeable tops and bottoms, so that a girl whose bust is not in proportion to her hips could still get a good fitting bikini," says Michael Chitoff, president of the Swimwear Association of South Florida. "They are very contemporary. They keep up with all the looks and are very creative."

The twins say the look for the '90s, especially for juniors, is hotter, attention-getting colors. For the more sophisticated bather, however, the twins say bright neons will be replaced by lavender, coral and violet.

What captures the eye in the 1990s is a far cry from the initial impact their line had in the '60s. "When we first arrived in the U.S., bikinis were new fashion in the States," says Mitchell. "I remember the first time we went to the beach in our suits. We were in Atlantic City, and a policeman came over to us and told us we couldn't be walking around like that. He promptly put us in a cab and told the driver to take us home."

## PRAISE FOR LAWRENCE COUNTY HEAD START

### HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. KOLTER. Mr. Speaker, I rise today before the full U.S. House of Representatives to commend and praise Lawrence County Head Start Inc. of 301 East Long Avenue, New Castle, PA, in my Fourth Congressional District.

Lawrence County Head Start is celebrating its 25th anniversary of servicing deserving children since its inception.

The organization, which has serviced more than 3,000 children and families in the past 25 years, is honoring the occasion with a special anniversary banquet.

Mr. Speaker, I am very proud of the positive and worthwhile impact that Lawrence County Head Start has had on the entire community and that is why I rise before the House and honor Lawrence County Head Start today.

## TRIBUTE TO MR. BOB ROGERS

### HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. DREIER of California. Mr. Speaker, the Congress has recognized that we must place a stronger emphasis on quality education in our schools. In order to do so, it is necessary that we draw attention to those individuals who, through hard work and tireless service, give so much to the educational community.

Mr. Bob Rogers, an administrator at Claremont McKenna College for 33 years, is retiring today after a rewarding career. The Claremont McKenna College Alumni Association has expressed its appreciation to Bob in the form of the following resolution:

RESOLUTION

Whereas Robert G. Rogers is a 1952 graduate of Claremont McKenna College; and

Whereas he returned to Claremont McKenna College on August 1, 1957 as an Admission Officer under the direction of Emery R. Walker, Jr., then Dean of Admission and Financial Aid, serving both the College and the recently founded Harvey Mudd College; and

Whereas he assisted in the admission of the first three classes of Pitzer College, upon that institution's inauguration in 1963; and

Whereas during the first twenty-five years of his tenure at Claremont McKenna College he served successively as Assistant Dean, Associate Dean, and then Senior Associate Dean of Admission and Financial Aid for both Claremont McKenna College and Harvey Mudd; and

Whereas he also served as Chairman of the School and College Relations Committee of the Western Region of the College Board and as a member of the Executive Committee of the same organization during the late 1960's and early 1970's; and

Whereas he founded an Alumni Admission program in 1974 at the College called the Claremont Alumni Schools Program, or "CLASP", which has become an essential part of the activities of this Association; and

Whereas the Claremont McKenna College Alumni Association, recognizing his many contributions to the College, presented him with its Distinguished Service Award on June 6, 1976; and

Whereas he is now retiring, after 33 years of devoted service to Claremont McKenna College; and

Whereas by reason of his remarkable achievements and inspiration, and as a consequence of the affection which this Association holds for him, our fellow alumnus, and in order to convey to him such gratitude and findings: Now therefore, be it

*Resolved,* That on behalf of all alumni of Claremont McKenna College, the Claremont McKenna College Alumni Association hereby expresses its sincere appreciation and best wishes to Robert G. Rogers, Class of 1952, as he begins his well deserved retirement.

This 22d day of May, 1990.

By William Woods, 1989-90 President.

## EQUINE PROGRAM AT THE NORTH WIND UNDERSEA INSTITUTE

### HON. ELIOT L. ENGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. ENGEL. Mr. Speaker, this week in my district, a group of wild American mustangs are being brought for the first time ever to New York City to become part of a unique program created by the North Wind Undersea Institute. For the past 2 years, the Equine Program at North Wind has been teaching youngsters about the role of the horse in the development of civilization. The program is one way in which North Wind successfully spreads its message of environmental conservation and awareness.

The interaction that will take place between the students and the wild mustangs is an example of the hands-on educational approach of North Wind. Through the Equine Program, inner city children learn about compassion and respect for all animals. They also learn about our responsibility to help preserve and protect our planet and all living things.

I have been working with North Wind since it came into existence over 10 years ago, and I was pleased to help secure a grant from the Department of the Interior for this program. I know that in addition to making learning fun for our young people, North Wind takes its environmental work very seriously. For example, studies of the wild American mustangs as part of North Wind's Equine Heritage Conservancy Program will explore current environmental issues and multiple-use land mangement.

The fine work done by North Wind is a credit to the dedication of its executive director, Michael Sandlofer, and his staff. It is always a pleasure to work with people who care so much about the world in which we live.

## WHY DON'T THE SOVIETS CARE ABOUT STEALTH?

### HON. MARTIN OLAV SABO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. SABO. Mr. Speaker, as part of its overall plan for defense spending in the 1990's, the Bush administration argues that the United States should build the B-2 Stealth bomber because—among other reasons—the arms control agreement we are currently negotiating encourages its deployment. Under the counting rules in the Strategic Arms Reduction Treaty [START], bombers carrying gravity bombs would count for one warhead, while the warheads carried on air-launched cruise missiles [ALCM's] would be discounted by 50 percent. If, for example, a B-2 bomber were carrying 20 gravity bombs, they would count as one warhead, while 20 ALCM warheads carried by a B-2 would count as 10.

Thus, the Soviet Union has agreed to a treaty that will encourage the United States to deploy the Stealth bomber. Why?

The first possible reason is that the Soviets possess or intend to deploy a large bomber force which will be loaded with large numbers of gravity bombs. However, it appears unlikely the Soviets will expand greatly their bomber fleet. Their newest aircraft, the Blackjack, is equivalent to our B-1B but suffers from substantial problems in crew comfort, weapons system use, and refueling. As a result, production rates have been cut and the Pentagon does not expect the Soviet's future strategic bomber fleet to match ours in size or effectiveness.

Another reason may be the Soviet's existing comparative advantage in Air defense systems. In a large-scale nuclear strike with current arsenals, where air attacks certainly would be preceded by ballistic and tactical missile strikes on the Soviet air defense network, this advantage would be negligible: air defenses would largely cease to exist by the time bombers could arrive to penetrate it.

But in a world dominated by bomber forces, conventional air defenses could play a much larger role in degrading an attack launched through the air. The Soviets maintain such defenses. The United States does not. Which country would benefit most from a treaty that encouraged moving nuclear weapons from missiles, against which there is no defense, to bombers, against which only the Soviets have defenses?

Advocates of the B-2 argue that it will make the Soviet investment in air defense obsolete and, although Soviet defenses could be thickened with additional radars, interceptor aircraft, and electronics to deal with the B-1B, the B-2's special characteristics make it invulnerable to possible system upgrades.

But are the Soviets concerned about Stealth technology? Many analysts claim it can be countered by readily available technology. Just as important, like all bombers a sizable portion of the B-2 force could be destroyed on the ground. Finally, even the Pentagon admits that a major part of the B-2's mission—destroying mobile targets such as missiles—is beyond the reach of current technology.

So there is a third possible reason, that in a fundamental sense the B-2 simply does not matter. Instead, it will play the role of a "rubble bouncer," arriving on the scene only after thousands of nuclear warheads have done the lion's share of the damage. Even under the terms of the proposed START treaty, the United States could retain some 5,000 land- and sea-based missile warheads, more than enough to destroy the political, military, and economic infrastructure of the Soviet Union. The ballistic missile warheads would be backed up by thousands of sea- and air-launched cruise missiles. Seen in this light, the more than 2,000 bombs that could be carried by the B-2 would simply be unnecessary.

In short, the Soviets may have concluded that since the B-2 is irrelevant to the balance between United States and Soviet nuclear forces they have no reason to stop us from wasting tens of billions of dollars on its production and operations.

If so, it would certainly answer this paradox: If, as the Air Force claims, it will be nearly impossible for the Soviets to detect and defeat the B-2 bomber, why don't they seem to care?

Plagued by high costs, criticized as lacking any real mission, and increasingly irrelevant to a changing world, the B-2 may find itself fulfilling only the singular mission of drawing vitally needed dollars from other national security areas and from growing domestic problems. As we review the administration's proposed defense budget for next year, the B-2 should be the first item to go.

## A TRIBUTE TO DAVE McLOUGHLIN

### HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. SHUMWAY. Mr. Speaker, today, I ask that my colleagues join with me in commending and paying tribute to an outstanding public servant as he prepares to retire following a dedicated and distinguished career. Dave McLoughlin will step down from the position of Director, Office of Training at the Federal Emergency Management Agency [FEMA] at the end of this month. His departure will leave very large shoes to fill, and will constitute a loss not only for FEMA, but also for the Nation.

In addition to his doctorate in education, Dave possesses a wealth of knowledge and experience in the field of emergency management, from natural disasters to terrorist attacks. Thus he has made invaluable contributions to FEMA and its mission. He began his Federal service in 1957 as an instructor in the Federal Civil Defense Administration's Chemical, Biological, and Radiological Defense School. By 1971, he had been named Deputy Director of the Defense Civil Preparedness Agency, region IV, in Battle Creek, MI. His next appointment was to the position of planning staff supervisor on terrorism for the Federal Preparedness Agency in Washington. Through his participation in the Presidential reorganization project, Dave contributed his expertise to FEMA's very creation, ensuring that the Agency evolved into an efficient, comprehensive, and expert response team to all national emergencies. There could not have been a more qualified individual to fulfill his many roles there, from his initial appointment in 1979 to the position of Assistant Director of Training and Education to the present day.

Many of my colleagues, especially from California, have special reason to be grateful to Dave, particularly during his service as Deputy Associate Director of FEMA's State and local programs. Time and again, as flood alternated with drought, California has been threatened, and Dave's expertise provided relief. He always identified the extent of our disaster situations promptly, and expedited needed relief. In addition to professionalism, he always demonstrated caring and concern.

Dave's exceptional contributions have been honored at the highest level. He has received both the President's Meritorious Rank Award in 1986, as well as the President's Distinguished Service Award, in 1989. I am confident that his life will continue to be marked with successful contributions, no matter what endeavor he undertakes.

In conclusion, Dave McLoughlin embodies all the qualities demanded of a dedicated public servant. I only wish there were many more like him. He will be badly missed but, more importantly, he will be well remembered. I know that my colleagues will be pleased to join with me in extending hearty congratulations to Dave on a job well done, as well as every best wish to him and to his wife, Carol, for fruitful and rewarding years ahead.

## GETTYSBURG HOSPITAL AUXILIARY

### HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GOODLING. Mr. Speaker, I would like to take a moment today to recognize the Gettysburg Hospital Auxiliary. This year will mark the 70th anniversary of this fine organization and the many contributions the auxiliary has made to the growth of Gettysburg Hospital.

The Gettysburg Hospital Auxiliary boasts more than 1,000 members who have given freely of their time and efforts to raise funds for the Gettysburg Hospital. The successful fund-raising efforts have enabled the hospital to purchase new equipment and establish much desired patient services.

I would like to take this time to thank the members of this fine organization on behalf of myself and the citizens of Adams County and the Commonwealth of Pennsylvania.

## TRIBUTE TO THE PERKINS SCHOOL FOR THE BLIND

### HON. JOSEPH P. KENNEDY II

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. KENNEDY. Mr. Speaker, I am proud to represent an organization from my home district that provides one of the best examples of why we should pass the Americans With Disabilities Act today. The Perkins School for the Blind in Watertown, MA, with some seed money from the Federal Government, has entered into a partnership with major corporations in New England such as Raytheon and New England Telephone to place individuals with handicaps in permanent jobs. The Projects With Industry Program has placed over 220 individuals from all across New England who are visually impaired or blind in jobs such as computer programmers or customer service representatives. These individuals with disabilities would probably be at home on Social Security insurance without this assistance. Perkins School for the Blind, because of its vision and commitment, has opened the door to mainstream society for persons with disabilities. We should learn from this success story and open the doors for thousands more individuals by passing the AWDA today.

## CULTURAL EXCHANGE BETWEEN THE TWO SUPERPOWERS

### HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MRAZEK. Mr. Speaker, one of the more pleasing benefits of the thaw in United States-Soviet relations is the opportunity for various forms of cultural exchange between the two superpowers. This reality can only serve to enrich the lives of citizens in both countries, while simultaneously fostering further bilateral understanding of each country for the other.

One cultural category which has benefited directly from the new openness, Mr. Speaker, is the circus. An exchange program involving the National Circus Project USA of Westbury, Long Island, recently resulted in American circus artists performing with Soviet circus troupes for the first time since 1967. This breakthrough came on the heels of a National Circus Project Exchange program which saw a Soviet circus entertainer brought to America to perform for and teach circus skills to American schoolchildren.

The two American circus artists who traveled to the Soviet Union, Greg Milstein and John Foss, carried with them greetings and American flags which I and my Senate colleagues, PAT MOYNIHAN and AL D'AMATO, were privileged to provide. At the beginning of their journey, they became the first American circus performers to participate in the Soviet Circus Festival, a competition for circus artists. In the spirit of international friendship. The American artists did not participate in the competition at the festival, but instead gave a demonstration performance of their talents for the Soviet audience.

Later, the pair was invited to perform with the Latvian State Circus, breaking the 23-year drought of American circus performance in Soviet circuses. At the same time, a precedent for future circus exchanges was created, opening up an estimated one-fifth of the world's circus-viewing audience to American performers.

Mr. Speaker, I'm sure that I speak for my colleagues when I congratulate Jean Paul Jenack, executive director of the National Circus Project USA, Mr. Milstein, and Mr. Foss for their respective roles in helping to promote the cause of international understanding through this important cultural exchange. I wish these gentlemen and their colleagues in the American circus industry the best as they continue their efforts to foster international good will through their future projects.

## PERSONAL EXPLANATION

### HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. UDALL. Mr. Speaker, today, a letter was distributed to all House Members with my signature indicating my support for the Bruce-Oxley CFC amendment to the Clean Air Act. Unfortunately, my signature was added in error. I would like the record to state that I am not in favor of the Bruce-Oxley amendment and will be supporting the Bates-Boehlert amendment when the House considers this important issue.

## A CONGRESSIONAL SALUTE TO THE LINDE DIVISION-UNION CARBIDE INDUSTRIAL GASES, INC., COMMEMORATING THE LINDE "ROOTING FOR AMERICA PROGRAM"

### HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. ANDERSON. Mr. Speaker, it is a pleasure to rise and pay tribute to the Linde Division-Union Carbide Industrial Gases, Inc., for the successful inauguration of the Linde National Rooting for America Program. On May 22, 1990, the national meeting of this program's local coordinators will take place. This occasion gives me the opportunity to honor the Linde Division of Wilmington, CA, for its environmental and economic commitment to the community and the Nation.

At a time when we are all becoming much more cognizant of the environmental degradation of our world, Linde has emerged as a corporate leader in enhancing environmental protection efforts. "Rooting for America" is a 10-year, nationwide initiative to foster environmental awareness, promote the planting and survival of trees, and build community spirit in the towns and municipalities across the country that host Linde facilities. In Wilmington, Linde established a community tree planting council to oversee the program. Under the leadership of the planting council's tree council, with trees and funds provided by Linde, 2,000 trees and seedlings were planted by local school children, scouts, and residents. From the outset of this program, Linde has been a symbol of commitment to environmental excellence in the 1990's. I should note, however, Linde's contributions to the south bay area are not just environmental.

The Linde Division-Union Carbide Industrial Gases, Inc. has been an integral member of the Wilmington and Los Angeles city industrial community since 1967. Linde's air separation plant in Wilmington is southern California's largest producer of oxygen, nitrogen, and argon, and a primary supplier of important resources for the fields of medical and health care, steel production, metal fabrication, electronic and semiconductor manufacturing, oil refining, food processing, and numerous other industries.

In addition to the environmental and industrial contributions to Los Angeles and the south bay area, Linde has contributed over $69 million in wages; $230 million for electrical energy, $70 million for other utilities, suppliers, service, and taxes; and $58 million for truck fleet operations.

These economic contributions have assisted in making southern California the preeminent economic leader in the country.

Mr. Speaker, it is indeed an honor and a pleasure to pay my respect to this company. Linde's concern for the environment, the safety and health of its employees and the surrounding community has shaped the values of this corporation to the degree that neither profits nor production will come before the safe operation of its plants. When it comes to health, safety, and environmental performance, Linde is second to none. On this occasion, my wife, Lee, joins me in extending my heartfelt thanks to this innovative and valued Wilmington company. We wish Linde many successes in the years to come.

## COMMENDING SUMNER HIGH SCHOOL IN KENTWOOD, LA, FOR WINNING FIRST PLACE IN AN ANNUAL NATIONWIDE CONTEST FOR THE BEST ANTI-DRUG PROGRAM DESIGNED AND RUN BY STUDENTS

### HON. RICHARD H. BAKER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BAKER. Mr. Speaker, I would like to take this opportunity to commend students at Sumner High School in Kentwood, LA, for winning first place in the senior high school competition of an annual nationwide contest for the best antidrug program designed and run by students.

During my many antidrug seminars at local high schools, students universally expressed the need for strong measures to help them to say no to peer pressure that encourages illegal drug and alcohol use. Clearly, the students at Sumner High School have been able to rally other students around an efficient program to combat negative peer pressure.

When you consider that the average age of first use is an alarming 12.5 years old, it becomes paramount to initiate creative antidrug programs in our schools which reach and motivate students to help others to say no to drugs. I am very proud of the students at Sumner High School, and believe that they have set an excellent example on how to work together to stop the serious problem of illegal drug and alcohol use.

Clearly, Sumner High School students have shown excellent leadership. I would also like to extend my congratulations to the principal, faculty and staff, parents, and other community groups who have helped the students put forth this program.

## THE CASE OF RAOUL WALLENBERG—THE TRUE TEST OF SOVIET GLASNOST

### HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LANTOS. Mr. Speaker, in just a few days Soviet President Mikhail Gorbachev will be in the United States for a critical summit meeting with President Bush. While all Americans welcome the changes that President Gorbachev has brought to the Soviet Union

and to the countries of Eastern and Central Europe, there are still serious questions that remain regarding the commitment to democratic reform, freedom of expression, and pluralism in the Soviet Union.

The major test of that commitment to openness, to glasnost is the willingness of the Soviet leadership to resolve the matter of Raoul Wallenberg, the Swedish hero who saved the lives of as many as 100,000 Hungarians during the Holocaust.

Mr. Speaker, there is a moral commitment for us in the United States to continue to press the Soviets for the release of Wallenberg and a full public accounting of his imprisonment in the Soviet Union since 1945. It was at the request of the U.S. War Refugee Board that Wallenberg undertook his dangerous mission to Budapest in 1944, and in 1981 Wallenberg became an honorary citizen of the United States, the second person after Sir Winston Churchill to be so recognized.

Mr. Speaker, an excellent article on Wallenberg and the forthcoming United States-Soviet summit by Spencer Warren appeared this morning in the Christian Science Monitor. Mr. Warren is a former member of the Policy Planning Staff at the State Department and was formerly counsel to one of our colleagues in the Senate.

I ask that Mr. Warren's outstanding article be placed in the CONGRESSIONAL RECORD, and I urge my colleagues to give it careful and thoughtful attention.

[From the Christian Science Monitor, May 22, 1990]

WALLENBERG: A MAJOR TEST OF GLASNOST

(By Spencer Warren)

Glasnost has brought commendable openness to Soviet history. The Kremlin has owned up to the 1939 pact with Hitler partitioning Poland, and has admitted the 1940 Katyn Forest massacre of 15,000 Polish officers and other prisoners.

But there is another crime it has to face. It didn't involve whole nations, but only one man, probably the noblest figure of the 20th century: Raoul Wallenberg.

The exploits of this selfless man are now well known. A 31-year-old architect and businessman, scion of a wealthy Swedish diplomatic and banking family, he traveled to Hungary in July 1944 as a special attaché to the Swedish legation in Budapest. Hungary at the time was an ally of Nazi Germany and was home to the last surviving large Jewish community in Europe. Wallenberg, who had studied in the United States, had been encouraged to undertake his mission by a representative of the U.S. War Refugee Board, which had been created by President Roosevelt, belatedly, in January 1944. The board financed much of Wallenberg's efforts.

When Wallenberg arrived in Hungary, the government of Admiral Horthy had just halted, under international pressure, the Nazi mass deportations (directed by Eichmann), which in two months had carted about 400,000 Jews off to the ovens at Auschwitz. Most of Budapest's 230,000 Jews remained in the capital. With a staff of about 300, mostly Jews, he set up safe houses under Swedish diplomatic protection and gave out Swedish passports by the thousand, saving at least 20,000 people.

In October, the Germans overthrew Horthy after he made armistice overtures to the Allies, installing the fascist Arrow Cross party in his place. Arrow Cross gangs were turned loose against the Jews, massacring 10,000 to 15,000. On Christmas Day 1944, 78 children in one of Wallenberg's shelters were machine-gunned and beaten to death. He forestalled other attacks, confronting armed thugs and intervening with authorities, threatening retribution after the war.

In November, with the collapse of the rail system, the Nazis forced about 40,000 Jews on a death march west toward Austria. Wallenberg drove along the columns, giving out food, medical, and other assistance, and succeeded in pulling out hundreds and returning them to refuge in Budapest. "He • • • showed us that one human being cared," said one survivor. As the Russian armies approached, the S.S. and Arrow Cross were planning to kill the 70,000 Jews remaining in the ghetto, but Wallenberg's threat of postwar retribution may have been crucial in averting this horror. Thus, this wealthy man who forsook the comfort of neutrality, saved, directly and indirectly, up to 100,000 people.

Eichmann and the Arrow Cross made Wallenberg a hunted man, but he eluded them. Then, in January 1945, he disappeared into Russian hands, never to be heard from again. The Soviet line, issued in 1957, and contradicting an earlier statement denying any knowledge, is that Wallenberg died of a heart attack in the KGB's Lubyanka prison in Moscow in 1947, age 35. Last October, after 44 years, they handed over to a Swedish delegation, which included surviving relatives, his passport, personal effects, and a card registering him as a prisoner in the Lubyanka dated Feb. 6, 1945. Maintaining the 1957 position, they also turned over the handwritten note by a long-deceased doctor attesting to Wallenberg's alleged death.

In the past two years Soviet authorities and journals have discussed the case and lauded Wallenberg's heroism, conceding his arrest was "a tragic mistake that has never been corrected." They attribute lack of further evidence to destruction of records by Stalinist authorities, and argue that millions of Russians also disappeared.

But the family and the many Wallenberg committees around the world reject this and believe he is alive, noting numerous reports of sightings through the years. The Soviets may fear the embarrassment of releasing Wallenberg, or revealing details of his fate (was he tortured?) and the reasons for his arrest (he may have been suspected as a US spy), and could be trying to appease Western opinion by placing the onus on their predecessors.

The Reagan and now the Bush administrations have recognized the US responsibility to pursue this case; Wallenberg's mission was sponsored by the US, and in 1981 he became the second foreigner (Churchill was the first) to be made an honorary citizen. Secretary of State Baker raised the matter with Soviet Foreign Minister Shevardnadze last September. Treading a delicate diplomatic path, President Bush must raise it again with Mr. Gorbachev at the summit.

Raoul Wallenberg is our conscience. In mankind's blackest hour, when unsurpassed human depravity seemed to rule, and those who could have helped, including the US, did far too little, he was a beacon of goodness and light. When we see the vicious hatreds of those times rising again in Eastern Europe and Russia, as if the 6 million Jews had never perished, Wallenberg's example forever reminds us that humanity can be redeemed.

## IN FAVOR OF BILL AIDING HANDICAPPED AMERICANS

### HON. JIM BUNNING

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BUNNING. Mr. Speaker, I rise in support of the Americans With Disabilities Act. Handicapped Americans and Americans with disabilities are a tremendous national resource and we cannot afford to lock them out of the Nation's work force or marketplace. This bill will go a long way at fully integrating the handicapped into our society.

When the ADA was first introduced, and in fact when it first came to the House floor, I had some very serious reservations about it. I felt that the definitions in the bill were too vague and that it would invite a flood of law suits against small businesses.

However, over the past few days, amendments have been added to the bill which I think address these concerns. By delaying the enforcement of the public accommodations provisions for small businesses and by specifying that an employer can use a written job description as evidence in determining the essential functions of a job, we have taken away a good deal of the uncertainty that plagued the original bill.

Although I would have liked to have seen the Sensenbrenner amendment and the Olin amendment accepted as well, I do believe the bill has been improved sufficiently to merit passage. I urge my colleagues to vote for this important step toward opening the door of society for the handicapped.

## GREAT FRENCH FRY WAR

### HON. PAUL B. HENRY

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. HENRY. Mr. Speaker, our U.S. Trade Representative, Carla Hills, met in Ottawa last Friday with the Canadian Prime Minister.

I hope that our Trade Representative was not served french fries at lunch because she would have been in danger of choking if she was aware of the blatant manner in which the Canadians have very cleverly kept American processed french fries out of their market while selling aggressively in ours.

By smokescreen regulation on incoming frozen potato products, the Canadians keep the entire Canadian domestic, wholesale french fry market to themselves—while at the same time they are poised to possibly build two new frozen potato processing plants very close to our border in Maine with their sights on our market. We have no similar lockout provision.

Mr. Speaker, it is necessary for the United States to take action so that the Canadians cannot have their french fries and eat them too.

## PERSONAL EXPLANATION

### HON. CASS BALLENGER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. BALLENGER. Mr. Speaker, on Tuesday, May 15, I was en route to the House Chamber for a vote on House Resolution 381, but unfortunately, did not make it to the House floor before time had expired. I would like the record to show that had I been present, I would have voted "aye" on rollcall No. 108.

## TRIBUTE TO DR. JOSEPH POWER KELLY

### HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. SKELTON. Mr. Speaker, with much pleasure I rise today to recognize a special individual, Dr. Joseph Power Kelly, provost of Webster University in St. Louis, MO. He has contributed 25 years of service to American higher education at Webster University, and many of his finer students have been residents of my Fourth Congressional District in Missouri. Webster University's graduate programs in Kansas City have provided excellent opportunity for the pursuit of master's degrees in teaching and business. Of course, those programs have been managed by Provost Kelly.

As a young man in his home State of Montana, Joe Kelly began an exemplary youth in high school, distinguishing himself as a scholar and an athlete at Butte Boys' Central. He continued to pursue athleticism and academics throughout college at Montana State University, where he became "Jumpin' Joe" for perfecting the new art of the high arcing jump shot. At the same time, he excelled in the study of history and politics.

"Jumpin' Joe" Kelly continued to integrate his interest in history and political science into his life. After finishing his university career, he shared his historical knowledge as a high school professor, until he became the executive director of the Montana Democratic Party.

The lure of being an active leader in politics drew him away from teaching, yet he eventually continued his pursuit of being an educator. He earned his doctorate in political science from Washington University in St. Louis, and in 1965, Dr. Kelly became an administrator at Webster University, where he has become widely known and greatly appreciated throughout a quarter of a century.

Joe Kelly has set an excellent example for students and scholars of my Fourth Congressional District, as well as for the State of Missouri and the Nation. I hope my fellow Members of Congress will join me in congratulating him for his leadership and dedication to education.

## THE 28TH ANNIVERSARY OF THE BELLMORE-MERRICK UNITED SECONDARY TEACHERS ASSOCIATION

### HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LENT. Mr. Speaker, this year marks the 28th anniversary of the Bellmore-Merrick United Secondary Teachers Association. At a dinner-dance, June 14, this year's retirees from the Bellmore-Merrick school district will be honored for their many years of loyal and dedicated contributions to the field of education. In addition, professionals from the schools and local communities will be recognized as well for their accomplishments.

Secondary education serves as a critical step in the academic preparation of our young people as they venture out into the world. Whether they go on to college or join the working world, what students learn in high school will help them become active, concerned members of society. Secondary teachers, therefore, have a tremendous influence in shaping our young people into the future leaders of America.

Since the association was established in 1961, it has grown to become a powerful advocate for teachers and helped to foster positive changes to promote learning in the classroom. Therefore, I'd like to extend my sincere appreciation to President Lou DeFilippo and all the members of the Bellmore-Merrick United Secondary Teachers Association for their exemplary work to promote excellence in education. Their significant efforts are deeply appreciated. Thank you, and best wishes on this important occasion.

## A TRIBUTE TO JEANNINE SUSAN BLANCHET

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, it is my distinct pleasure to congratulate Jeannine Susan Blanchet, of Central Falls, RI, this year's recipient of the Congressman RONALD K. MACHTLEY Academic and Leadership Excellence Award for William M. Davies Jr., Technical High School, in Lincoln, RI.

This award is presented to the student, chosen by William M. Davies Jr., Technical High School, who demonstrates a mature blend of academic achievement, community involvement, and leadership qualities.

Jeannine certainly met these criteria during her high school years. She is the salutatorian for her class and has been a member of the National Honor Society for 4 years. She has also won a Merit Award and took first place in a data processing competition.

I commend Jeannine for her outstanding achievements and wish her all the best in her future endeavors.

## A TRIBUTE TO MRS. ATHELINA H. LATHAM

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to congratulate Mrs. Athelina H. Latham on receiving an honorary degree from the Rhode Island School of Design in Providence, RI.

Athelina is receiving this degree in recognition of her many outstanding accomplishments and achievements in the world of art and art education. Today at the age of 82, Athelina is still a vibrant teacher and generously shares her talents with others. Her career in art has spanned almost 60 years and has taken place across the country. She has taught in New York City and Chicago and in her home State of Rhode Island in several institutions. She has taught art to people of all ages, from children to senior citizens. Her achievements are not only in the field of art education but also in hat and glove design. In 1940, she opened the successful Latham French Glove Studio in Chicago, IL, where she received national recognition for her unique designs.

It is a great pleasure for me to congratulate Athelina H. Latham on her receiving an honorary bachelor of fine arts degree from the Rhode Island School of Design. I wish her all the best and continued success in the future.

## A TRIBUTE TO RHODE ISLAND GOVERNMENT AGENCIES

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize an exemplary government program that aims at alleviating hunger among our Nation's most needy citizens.

The U.S. Department of Agriculture recently supplied Rhode Island with surplus food to be distributed through State government agencies. I commend the Rhode Island Department of Human Services, the Department of Elderly Affairs, Community Action agencies, and the Office of Food Purchases for a job well done, getting the food distributed quickly and efficiently.

If one child, one senior citizen, goes to bed hungry or undernourished we are condemned with the guilt of failing to provide the bare necessities for our citizens. This is certainly one program that we cannot afford to overlook.

The many dedicated and hard-working people who compose these agencies deserve a good measure of appreciation for their service to our needy citizens. I pledge my support for this program and its efforts on behalf of our Nation's needy citizens.

## A TRIBUTE TO JOHN W. TAYLOR

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize John W. Taylor of Middletown, RI, who is being honored as "Elk of the Year" by the members of Newport Lodge No. 104 of the Benevolent and Protective Order of Elks.

John has been selected by his fellow members for his outstanding and dedicated contributions to many worthy causes throughout the years. John has been instrumental in raising thousands of dollars for many worthwhile charities and has truly distinguished himself in his community. He has given countless hours and days for the sake of others, all for the benefit of his fellow citizens. Among John's accomplishments are raising over $6,000 for the Muscular Dystrophy Association through a bowl-a-thon that was coordinated with other charitable groups in the area. He also ran a fundraiser for Nicholas Tasso, an 18-month-old child who has a congenital heart condition. Over 600 people from the community attended this fundraiser to help with Nicholas' medical costs.

It is with great pleasure that I salute John W. Taylor for all his exemplary charitable work. His spirit of compassion for his fellow citizens serves as a model for us all.

## A TRIBUTE TO KAREN GRECO

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to recognize Karen Greco of Cranston, RI, who has been selected to receive one of two national Very Special Arts Young Playwrights Awards.

Her play, "Ritty and Jesus Came to Dinner and Enjoyed a Plate of Borscht," has been chosen as a national winner in the very performance of the play at the Kennedy Center in Washington, DC, on June 4. Very Special Arts was founded in 1974 by Jean Kennedy Smith as an educational affiliate to the John F. Kennedy Center for the Performing Arts. Very Special Arts provides opportunities in the arts to individuals with disabilities. Very Special Arts Rhode Island has been working toward this goal since 1986.

Each year young playwrights submit scripts nationwide to the Young Playwrights Program. These scripts must deal with some aspect of disability. For Karen, the play has a special meaning that transcends winning the competition. Karen's play is based on her own experience as the daughter of a mentally ill mother. "Ritty" is a two-character play in which a daughter and her schizophrenic mother speak to the audience. Karen's play is truly a powerful piece, not only for its content but also for its personal nature with Karen.

It is with great pleasure that I congratulate Karen for her outstanding achievement. I wish her the best and success in her future endeavors.

## A TRIBUTE TO REV. WILLIAM J. O'NEILL

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, I rise today to congratulate Rev. William J. O'Neill of Jamestown, RI, who is celebrating his 25th anniversary of his ordination into the priesthood.

Reverend O'Neill, who is now the pastor of St. Mark Parish in Jamestown, has faithfully carried out his solemn oath for a quarter of a century now. I extend my most sincere congratulations to Reverend O'Neill and wish him all the best in the future.

## A TRIBUTE TO DR. ROBERT C. ARRUDA

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, it is with great pleasure that I rise today to recognize an individual who has so unselfishly given of himself to our Nation's youth.

Dr. Robert C. Arruda of Bristol, RI, is receiving a Fulbright Fellowship for the summer of 1990, in Buenos Aires, Argentina. He is among 20 of America's finest citizens chosen to establish this important cultural and educational bond with Argentina. Dr. Arruda is a college professor of French, Spanish, and Portuguese and has made a lifelong commitment to teaching these languages and cultures to everyone. He firmly believes that global communication is a means toward world peace and has dedicated his career toward promoting this goal. He is a well-respected member of his community and has given countless numbers of hours to many charitable causes.

I would like to thank Dr. Robert C. Arruda for his devotion to his job and his community. He has demonstrated a love for his work that transcends the classroom and pushes others toward better communication. I hope that others may follow his example. I wish him all the best and future success in all his endeavors.

## A TRIBUTE TO MRS. ELIZABETH G. BRITO

### HON. RONALD K. MACHTLEY

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. MACHTLEY. Mr. Speaker, it is with great pleasure that I rise today to congratulate a member of my community for all of her outstanding efforts on behalf of our Nation's most valuable resource—our students.

Mrs. Elizabeth G. Brito of Bristol, RI, has been awarded a Christa McAuliffe Fellowship to continue research and expand a system-wide Thinking/Learning/Study Skills Program currently in place in the Bristol Public Schools. Mrs. Brito is the chairperson of the English department at Bristol High School. Her dedication to her profession and her students has continually grown and strengthened as evidenced by her drive to create a learning atmosphere conducive to excellence and achievement. She is also a respected civic leader and has given many hours to a multitude of charitable causes.

I would like to thank Elizabeth for her dedication to her profession and her students. Her love for the work and her community serves as a model for us all. I wish her all the best and continued success in the future.

## INTRODUCTION OF H.R. 4878, THE OCEAN DUMPING BAN EXTENSION ACT

### HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. LENT. Mr. Speaker, during the last Congress, we made the determination to stop the dumping of sewage sludge in our oceans. This is an environmentally sound decision, and I was proud to coauthor the Ocean Dumping Ban Act of 1988, which ended this filthy practice.

But Mr. Speaker, the most well-intentioned plans can and often do go awry. Such a situation is occurring in Nassau County, NY, which I have the pleasure of representing in the Congress. In order for Nassau County to stop the ocean dumping of sewage sludge by December 31, 1991, it has been ordered to build a dewatering facility in Bay Park, a small, residential community.

Bay Park is uniquely unfit for the siting of a sludge dewatering facility. The existing sludge treatment facility is ringed by single family homes. The only access to and from the plant is a single-lane roadway, that winds its way through quiet, residential streets, past a junior/senior high school and three elementary schools. Eighteen-wheel rigs will come roaring through this quiet neighborhood, one every 15 minutes, each and every day.

Nassau County officials are opposed to the siting of the plant in Bay Park. They petitioned the Federal court for an extension of time in which they could enter into contracts with private vendors, so that the sludge could be processed in nonresidential areas without endangering the health and well-being of suburban Nassau County. Unfortunately, the extension request was denied.

Mr. Speaker, my bill is simple: it will grant a 1-year extension to Nassau County so that they may pursue the private vendor option, which is the most environmentally sound manner in which to dispose of sewage sludge. This action is not unprecedented; I understand that the city of New York has been allowed an additional 1 year in which to formulate its alternative to ocean dumping. By granting this additional time, we will afford the residents of Bay Park the opportunity to live without the fear of massive trucks and potentially hazardous sludge endangering the lives of their families.

We pursue environmental policies to better the lives of the people we serve. My constituents are clearly being endangered by the current way in which the Ocean Dumping Ban Act is being implemented. I urge my colleagues to support this truly environmental action, and allow Nassau County's 1.2 million residents the opportunity to devise an environmentally sound method to dispose of sewage sludge.

## CONGRATULATIONS TO MOUNT VERNON DARE GRADUATES

### HON. GLENN POSHARD

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. POSHARD. Mr. Speaker, I am pleased to let you know about a group of future leaders in this country who are attending school in Mount Vernon, IL.

These students have worked with some dedicated adults to complete the DARE Program. They have made a commitment to staying off drugs and learning more about the pitfalls of growing up in this complicated world.

Young people need to know they have the love and support of their families and communities if they are going to take a stand and do the right thing. This is an important first step which I am proud to support.

On behalf of all of southern Illinois, I congratulate the Mount Vernon community for its dedication on this important issue. I wish them continued success in their efforts.

I would like to enter their names into the CONGRESSIONAL RECORD so they may receive the recognition they deserve.

MOUNT VERNON SIXTH GRADE SCHOOLS

Dr. Lawrence Loveall, Superintendent; Dr. Nick Osborne, Assistant Superintendent; Ron Massey, Mount Vernon City Police Chief; Trooper Dave Turner, Illinois State Police.

HORACE MANN SCHOOL

Principal—Mr. Jerry Clemens; Teacher—Mr. Sidney Milliner. Students—Shanda Boling, Risa Cole, Tina Cooper, Ayanna Dinwiddie, Lisa Drew, Leslie Ellis, Jennifer Eskew, Jacquelyn Goddard, Michael Lynn Heck, Eva Helm, Chris Hudgens, Starla Jackson, Christopher Johnston, Ami Jo Jolliff, Emily Mahan, Jason Ridley, Gentry Rudd, Chevette Sanders, Amy Scarber, Brandi Thompson, Donnell Young, William B. Rustin, Markesha Doggan, Anthony Rainey, Billie Wallis, Stacy Rainey, Melodie Johnson, Teny Karch.

BENJAMIN FRANKLIN SCHOOL

Principal—Dr. James Upchurch; Teacher—Mike Vaughan. Students—Crystal Austin, Brandi Bowdler, Aaron Bradford, Dameon Brown, Andrew Buckley, Christy Daniels, Anthony Dickey, Jamie Ellis, Kimberly Fares, Susan Hicks, Jamie Hughey, April Johnson, Amanda Leibold, Billy Lockeby, Brian Lowry, Mark McKinney, Robert Mooney, Justin Morgan, Kristy Peacock, Shana Ramirez, Lori Ramsey, Holly Reynolds, Kellie Schuster, Paula Scott, Amanda Smith, Hazel Smith, Christina Williams.

ABRAHAM LINCOLN SCHOOL

Principal—Carl Baker; Teacher—Rebecca Krueger. Students—Melanie Aissa, Kenneth Allen, April Bain, Ben Bartolomucci, Alex Black, John Brown, Charlotte Cotton, Steve Davis, Andrea Dickneite, Jenny Eller, Beth Ellis, Jacque Epperson, Cheryl Glenn, Julie Griffin, James Hargrove, Kesha Harper, Olivia Hart, Alex Hathaway, Tammy Henson, Michael Hicks, Rosalind Hodge, Amy Hopper, John Horner, Lincoln James, Jeff Johnson, Landon Jones, Michael Kroeschen, Shareen Ladd, Aaron Lewis, Charles Longwell, Billy Miller, Nina Navarro, Amanda Nixon, Danny Pribble, Raymond Richards, Dennis Riley, Matt Rogers, Nitai Spiro, Matt Sweeten, Wendy Tankersley, Rachel Taylor, Cameron Wagner, Doug Wetzel, Anthony White, Jon Wilimzig, Edon Williams, Jeff Wimberly, Sabrina Winter, Kelly Wood.

J.L. BUFORD SCHOOL

Principal—Anson Smith; Teacher—Kurt Strothman. Students—Marc Apostol, Dedrick Bell, Chrissy Bolerjack, Lana Catlin, Eric Cho, Danny Day, Dalyn Eggemeyer, Beth Farris, Richard Flanagan, Jessica Hall, Katrina Haslow, Christie Hulbert, Cortell Jennings, Jared Knapp, Colin McLane, Jennifer Mickelsen, Jeffrey Moore, Chris Palmer, Christy Ray, Jessica Scherer, Adam Stowers, Chris Throgmorton, Gavin Turner, Scott Williams, Mary Jo Willmore, Kip Woodgett, Lloyd Neal, Katheryn Ferrall, Shawn Flatt.

Teacher—Sue Nance. Students—Brandon Anderson, Brian Atchison, Christina Barrett, Jason Bowden, Valerie Carr, Sara Coatney, Nathan Davis, Kenneth Elzy, Melody Etzkorn, Brandon Folsom, Jennifer Galiher, Roger Graham, Sandy Hall, Crystal Hernadez, Josh Johnson, Cynthia Kee, Jennifer McDonald, Michael Martin, Andrew Meyer, David Morgan, Angie Phoenix, Troy Pietsch, Andy Ratcliff, Traci Schell, Amber Strickland, Willie Suggs, Ryan Toliver, Neal Wells, Susanna Widicus, Steven Willis.

DR. ANDY HALL SCHOOL

Principal—Dr. Judith York; Teacher—John Cherry. Students—Michael Barner, Randy Boyd, Kelly Bumpus, Stephanie Caldwell, Broderick Disroe, Tyrone Harris, Stacy Hawkins, Rebecca Hefner, April Hodges, Mat Hodges, Ann Jones, Chris Jones, Michelle Jones, Amy Meeks, Kathy Meredith, Kishia Neal, Misty Odle, Denise Perkins, Kristopher Prior, Scott Scrivner, Earnetta Secrest, Jayson Silliman, Kim Stokes, Larry Wright, Michael Yon, Brad Hale, Keisha Lewis, DeDe Wilson, Wendy Wert.

## "OPERATION JUST CAUSE" VETERANS REMEMBERED

### HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. GAYDOS. Mr. Speaker, the month of May has special significance for America's military veterans and their families.

This Monday, May 28, is Memorial Day; a day when the Nation as a whole bows its head in honor of its deceased veterans, particularly those killed in battle.

Earlier this month, on May 8, some of us remembered it was VE Day; the 45th anniversary of the end of World War II in Europe.

And, this past weekend, Saturday, May 19, was "Armed Forces Day" when Americans paused to pay tribute to the men and women who now wear the uniform of their country.

In connection with the latter event, I was privileged to take part in a ceremony hosted by VFW Post 5008 in East Pittsburgh, PA, that may have been the only one of its kind in the Nation. The program did more than just recognize today's military personnel. It singled out for special acknowledgment those veterans who participated in "Operation Just Cause" in Panama last December.

Four members of the armed services who took part in that action dedicated a plaque in memory of the 23 Americans killed in the line of duty.

It has been said the Nation which forgets its veterans will itself be forgotten. Let me assure everyone here the people of East Pittsburgh and southwest Pennsylvania have not—and will not—forget them.

On behalf of my colleagues in the Congress I commend those who participated in the remembrance of "Operation Just Cause" and, in the process, remembering all veterans:

Robert Matthews, commander, VFW Post 5008; Frank Marko, adjutant, American Legion Post 2, Guy Bordogna, past commander/service officer, VFW Post 5008; John Biedrzycki, past county commander/past district commander, VFW; Tom Berlich, mayor of East Pittsburgh; the Reverends Robert J. Boyle, Russell Maurer, John Fedornock, and E. Jerome Alexis, a former POW.

Helen Marchitello, president of VFW Ladies Auxiliary; Kathleen Adams, president of American Legion Ladies Auxiliary; Rear Adm. John Rohleder, USN retired; State Senator Michael Dawida; State Representative Tom Michlovic; Allegheny County Commissioner Larry Dunn; county recorder of deeds Michael Della Vecchia; members of the firing squad from Turtle Creek VFW Post 207; Curt Verner and David Kaufman, who played "Taps"; Helen Harchelroad, decorations; and members of Woodland Hills Junior Chorus.

Dedicating the memorial plaque to their fallen comrades were 1st Lt. Earl Gentile, U.S. Army, of North Braddock, PA., a neighboring community; and Chiefs Lawrence Barrett, Richard Hansen, and David Knauff, representing the U.S. Navy.

Mr. Speaker, what I witnessed last Saturday made me very proud to be an American, very proud to be a veteran and very proud of the people I represent in the Congress of the United States.

## CONGRESS SHOULD STOP DELAYING AID TO CENTRAL AMERICAN EMERGING DEMOCRACIES

### HON. JOHN J. RHODES III

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. RHODES. Mr. Speaker, President Bush has implored Congress to act expeditiously on his request for assistance to Panama and Nicaragua, and has insisted that Congress not leave for the Memorial Day recess until a bill which he can sign is on his desk.

The President is absolutely right, and in fact I wish he had gone farther and threatened to

use his constitutional power to hold Congress in session until such a bill is passed.

It is nothing short of scandalous that Congress has not acted on the President's request for assistance to Panama, which came in January, or for Nicaragua, which came in March. These two countries are in desperate need. President Chamorro of Nicaragua has been forced to the humiliation of sending a cable to the President, begging him for emergency interim assistance. The President has been forced to the humiliation of telling her that he does not have the authority even to provide her country with emergency assistance.

This is outrageous.

These two countries are in the condition they are in because of explicit policies of the United States. This country imposed economic sanctions on both Panama and Nicaragua, supported military efforts in Nicaragua, and mounted our own military effort in Panama to pursue our goal of promoting democracy in Central America. The people of both countries responded in freely held elections by throwing out their dictators and installing democratic regimes and reforms. They have done what we asked of them, and now we refuse to provide them with the assistance they need to restore their economies and to ensure the success of their aspirations for peace, freedom, and democracy. At the same time, the Congress is threatening to cut off aid to El Salvador, a democracy threatened with destruction by a Marxist insurgency.

Have we gone crazy?

It is time to lay the responsibility for this unconscionable inactivity right where it belongs: at the doorstep of the Democrats in Congress, starting with Speaker FOLEY and Majority Leader MITCHELL, and including every single Democrat Member of the House and Senate. The President of the United States has been reduced to pleading and even threatening the Congress to get it to do its duty and to uphold the word and the obligation of this country and to take the initial steps necessary to restore dignity to the people of Central America.

How can we be proud of forcing the duly elected president of a sovereign nation, whose success we applauded, to come begging to Washington for assistance she was long ago promised? How can we be proud of destroying the economies of two countries to further our interests, and then walking away from them when our goals are achieved? How can we be proud of abandoning a fledgling democracy whose very existence is threatened?

Can we conclude from all of this that the Democrats don't want democracy to succeed in Central America, that they want Noriega back in power in Panama, the Sandinistas to return to Nicaragua, the Marxists to rule El Salvador? What other conclusion can we draw?

President Bush, keep the Congress in town until it does its duty. The people of Nicaragua and Panama deserve no less.

## CLEAN AIR ACT AMENDMENTS OF 1990

### HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

The House in Committee of the Whole House on the State of the Union had under consideration the bill (H.R. 3030) to amend the Clean Air Act to provide for the attainment and maintenance of the national ambient air quality standards, the control of toxic air pollutants, the prevention of acid deposition, and other improvements in the quality of the Nation's air.

Mr. ROGERS. Mr. Chairman, the measure reported out of the Energy and Commerce Committee is a comprehensive, complex, and tough bill. The House compromise is tougher than the administration's proposal, and in some key aspects, tougher than the legislation which passed the Senate.

I am acutely aware of the 10-year stalemate that has plagued previous attempts to reauthorize the Clean Air Act. Much credit of course must be given to the President for breaking that log jam, and much credit must be given to the able leader of the Energy and Commerce Committee, Mr. DINGELL, and the ranking Republican member from New York, Mr. LENT. Concessions have been worked out on a number of issues, including air toxics provisions, a tail pipe standard agreement, and new requirements for ozone nonattainment problems in the most heavily polluted cities. While the auto companies are not wildly enthusiastic, they have a can do attitude about these requirements, at least for the first phase of these requirements.

But, we live in a very complex industrialized society. For every requirement we enact there is an economic impact, there is a job impact, a small business impact, and those tabs must be paid. The Business Round Table recently published a comprehensive analysis of the costs of various clean air proposals. Their best cost estimates using models developed by several organizations range from $31 billion to $104 billion. Moreover, a Harvard University report on environmental regulation and U.S. economic growth finds that pollution abatement controls were a significant contributor to the growth slowdown of the 1970's. There is an economic price to be paid, and we must readily acknowledge that the price is high.

The Commerce Department reports that we currently spend $32 billion a year on environmental regulations. Consequently, we have seen significant improvements in the air quality across the country. For example, today's cars are 25 times cleaner than 20-year-old cars. The Environmental Protection agency reports that since 1978 emission of ambient airborn lead declined 88 percent. From 1973 to 1988, despite an 85-percent increase in coal use nationwide, sulfur dioxide emissions have decreased 35 percent. Nitrogen oxides have declined 12 percent since peaking in 1978. In my home State of Kentucky, electric utilities have cut sulfur dioxide emissions in half from 1975 to 1985, while increasing the amount of coal burned by 17 percent. All these decreases are the result of the current clean air law.

But as we look for ways to continue these improvements, we may well jeopardize the only course that can guarantee a cleaner environment. The solution to our nation's pollution problems is innovation, better technology, and unleashing the power of the human mind in a free society. The results we seek cannot be achieved if we go after them with the heavy artillery of big government. History tells us that closed societies, where Government controls technology and innovation, have dismal success records at achieving clean air goals. I am concerned that we are forgetting the lessons of history. It is not surprising to me that the West Germans have had to waive the air pollutant standards on East German cars. That is a typical problem of command-control economies. We must not move in that direction. The first principle of any clean air bill should be maximizing flexibility for innovation.

Last, Mr. Chairman, but certainly not least, I want to focus on the acid rain title of the bill. Although this title has also been worked out in committee, I remain deeply concerned that title V is not a fuel-neutral bill. Because of the effects of the so-called cap in phase II, the acid rain provisions will severely restrain the use of coal for utilities in high growth States. Although the committee report acknowledges this problem, the agreement does not, in my opinion, address this issue.

Moreover, the economic impacts of the acid rain title on coal communities in Kentucky will be concentrated on Kentucky's small coal towns which are almost exclusively dependent on mining for their economic viability.

In my district, which is sometimes referred to as a low-sulfur coal area, only 20 percent of the coal can meet the stricter 1.2 pounds-per-milion BTU standard required in phase II. EPA has greatly underestimated the potential mining-related job loss in its cost estimates. According to estimates from the Clean Air Working Group [CAWG], the potential jobs at risk of being lost from clean air in my district could be as high as 1,400. One coal company in particular is now threatened with extinction because of the uniquely crafted features of the sulfur dioxide emission allowance system. Eight hundred jobs in Whitley and Knox counties are at risk. Ironically, this firm produces 2.5 million tons of some of the lowest sulfur coal in the State of Kentucky, and it generates $100 million of revenues into the Kentucky economy. That hits us very hard when parts of my district are already suffering with unemployment rates as high as 18 percent. Although I have discussed this problem with committee members at great length, the committee was unable to resolve the problem.

We also know that the acid rain title will mean higher utility rates for Kentucky's ratepayers. The latest estimates from the Kentucky Energy Cabinet reveal that Kentucky's consumers will pay anywhere from 12 to 18 percent more for their electricity, depending on how utilities comply.

Finally, Mr. Chairman, what about the science behind the acid rain issue? Let me close by discussing the National Acid Rain Precipita-

tion Assessment Program [NAPAP] that was established in 1980. This report was planned as a comprehensive 10-year study. Over the decade, the cost of that program has risen to over one-half billion dollars. The NAPAP Program is the most broadly based analysis on the effects and causes of acid rain ever undertaken. The Commission has reviewed over 5,000 documents and studies, more than 300 authors explained their findings, and more than 100 peer reviewers examined the reports.

Although the final report will be out in September, a draft was presented to an international conference of scientists in February. According to the program administrator, there is little probability that any of the conclusions would be changed. Therefore, the report offers very conclusive and significant findings.

The findings under section 18 that deal with forests are, and I quote:

There is no evidence of a general or unusual decline of forest in the United States or Canada due to acidic deposition or any other stress factor. Moreover, there is no case of forest decline in which acidic deposition is known to be a predominate cause.

In turning to the issue of crop yields, the NAPAP report states and I quote:

Ambient sulfur dioxide concentrations by themselves are not responsible for regional scale crop yield reduction in the United States.

Mr. Chairman, these excerpts offer a revealing look at what the scientists are saying about acid rain. This is a $1 million problem with a $1 billion price tag. Unfortunately, the debate in Congress is not about science. The proposal to control emissions that form acid rain—now being debated on the House floor—could cost $5 to $10 billion a year; the benefits, in terms of reduced damage, are uncertain and, at best, quite small.

I have a summary of each section of the NAPAP report; and, I insert that summary in the RECORD:

SUMMARY

The following summary comments are keyed to the individual section numbers in the Detailed Comments section which follows:

1. $SO_2$ Emission Trends.—National $SO_2$ emissions decreased by approximately 25% from 1973-1983 and have remained relatively constant since that time. Without new controls, emissions may increase or decrease by as much as 20% between 1990 and 2010. Emissions are expected to decline from 2010 to about 2030 as pre-NSPS plants retire. New plant growth after 2010 could result in an increase in total emissions after 2030, when all pre-NSPS plants have been retired.

2. $SO_2$ Effects Categories.—Regional scale $SO_2$ effects are usually evaluated for surface waters, forests, crops, materials, human health and visibility (see items 3 through 8 below).

3. Surface Waters.—A percentage (0 to 6 percent of mid-Atlantic, northeastern and midwestern lakes and streams are acidic and a further percentage (0 to 18 percent additional) are highly sensitive to acidification ($<50$ $\mu$eg L acid neutralizing capacity [ANCI]). Florida is a special case. Biological impacts occur in some acidic and sensitive waters. In the Northeast, the time for biological recovery may be long, so that little near term benefit would be expected to result from rapid emission reduction. In the Mid-Appalachian Region, the time scale of acidification and/or recovery (chemical and biological) is an important unknown. It will be reported in the NAPAP 1990 Assessment. Preliminary findings suggest that in some mid-Atlantic subregions, significant acidification may occur within a few decades.

4. Forests.—Impacts from acidic cloudwater in combination with other stresses affect some high elevation spruce forests in the East. However, there is no evidence of widespread forest damage from acidic deposition. Long-term changes in the chemistry of some sensitive soils are expected, although it is uncertain whether this will affect forest health.

5. Crops.—$SO_2$ emissions do not reduce crop yields, except possibly on a local basis near very large sources. Crop plants are not sensitive to the wet deposition of acidic substances.

6. Visibility.—NAPAP has not conducted independent research on visibility effects or values. However, visibility benefits should be included in any assessment of $SO_2$ emissions reduction, and are being included in NAPAP's Integrated Assessment. Atmospheric sulfate particles derived from $SO_2$ emissions are a significant contributor to reduced visibility and emission reductions will lead to improved visibility.

7. Human Health.—NAPAP program has not conducted independent research on the "direct" effects associated with inhalation of $SO_2$ or its transformation products, which include acid sulfate aerosols. The health risks associated with acid aerosols are being evaluated by EPA for possible inclusion as a National Ambient Air Quality Standard. Reductions of $SO_2$ emissions would reduce risks associated with current loadings. NAPAP continues to evaluate the results of research conducted on the "indirect" health effects of acid deposition (e.g., related to mobilization of lead, mercury or other metals in acidic waters).

8. Materials.—Both wet and dry sulfur deposition accelerates the deterioration of carbonate stone, galvanized steel, paint, etc. Materials benefits would be greatest if deposition in urban areas is reduced, thus local sources need to be considered.

9. Nitrogen Oxide Emissions.—$NO_2$ emission control will be beneficial in several regions. This favors the use of technologies that remove $NO_2$ including low $NO_2$ burners and clean coal technology (CCT) compared to the current generation of scrubbers in cases where controls may be required at existing plants.

10. Impact in Canada of U.S. $SO_2$ Emissions.—U.S. emissions reductions intended to benefit effects categories, e.g., surface waters, health and visibility, in the Adirondack area and New England will also benefit geographical areas in northeastern Canada. There is no supportable evidence, however, for widespread impacts on Canadian forests.

11. Economic Valuation of Benefits.—No comprehensive benefit evaluation is available, nor likely in the next year. Control strategy evaluations must necessarily involve both economic and physical measures.

12. Control Strategy Implications.—Enhanced energy conservation is the lowest cost means of emission reductions. Coal substitution and coal washing (where not already practiced) are low cost options for near term (e.g., by 1995) emission reductions. Clean Coal Technology (CCT) has many benefits (including reduced global climate impacts) compared to current scrubber technology, but will need a post-2000 deadline (e.g., 2003-2005) for full implementation.

For its integrated Assessment, NAPAP is evaluating the timing, magnitude, location, and costs of various control options. The issues revolve around the use of currently available techniques such as, fuel switching, coal cleaning, LIMB, duct injection, and scrubbing versus the next generation of clean coal technologies. The Clean Coal Technology Program will be resolving technical and economic questions of emerging techniques so that their performance and penetration rate can be determined.

13. NAPAP Assessment Reports.—NAPAP's fully reviewed reports (to appear in late-1989 and 1990) and the NAPAP International Conference in February 1990 are intended to assure credibility for the technical information generated by the program for use by policymakers in the development of acid rain control legislation.

1. $SO_2$ Emission Trends—Past and Projected:

1.1 National $SO_2$ emission rates have declined by 25 percent (from 32 to 24 million tons per year) between 1973 and 1988. Much of this reduction occurred in Ohio River Valley and midwestern states. Most of the reduction had been achieved by 1983, and national $SO_2$ emission levels have been approximately constant during the past five years.

1.2 The fraction of $SO_2$ emissions from tall stack sources increased during the 1973-1988 period. As a result, the reduction in long-range transport has been less than the 25 percent reduction in emissions.

1.3 If no new control legislation is adopted, various projections of national $SO_2$ emissions during the next 20 years range between $\pm 20$ percent or more, compared to current levels, depending upon assumptions about energy demand, fuel mix and new control technology penetration rate at existing power plants. Beyond 2010, there is general agreement that $SO_2$ emissions will decline, as a result of the retirement of older, higher emitting plants.

1.4 For this memorandum, a maximum emission reduction of 12 million tons per year (50 percent decrease) was considered, in order to comment on the expected benefits in the case of the largest reductions proposed in the current acid rain debates. Smaller total decreases (e.g., 6, 8 or 10 million tons per year) would result in smaller benefits; however, the relationship between emission reductions and benefits may not be linear. Two schedules for the 50 percent reduction case were considered:

2000 Target: 50 percent decline (from 24 to 12 million tons per year) by 2000, with constant emissions after 2000.

2005 Target: A 25 percent decline (24 to 18 million tons) by 2000, a further 25 percent decline (18 to 12 million tons) by 2005, with constant emissions after 2005.

2. Effects Categories for $SO_2$ Impacts:

2.1 The following effects categories are usually considered when evaluating the potential regional benefits of $SO_2$ emission reductions:

Surface Waters: Effects on lakes, streams, and coastal estuaries—both chemical and biological.

Forests: Effects on unmanaged and commercial forests.

Crops: Effects on agricultural crops.

Materials: Effects on exposed construction materials and cultural resources.

Health: Direct (inhalation) and indirect (other pathways) effects on human health.

Visibility: Effects on visual range through the atmosphere.

2.2 Important Note: Ozone (and other oxidants) and nitrogen oxides also can cause effects in the above categories, as noted in the following sections. Such ozone and nitrogen oxide effects will not be improved by $SO_2$ emission reductions alone.

The extent of changes in effects which may arise from ozone and nitrogen oxide would depend on the selection of control methods which included reductions in more than sulfur emissions alone.

3. Sulfur Deposition Effects on Surface Waters:

3.1 Current Status of Surface Waters: A percentage (0 to 6 percent) of eastern and midwestern lakes and streams are acidic, and a further percentage (0 to 18 percent additional) of these lakes and streams are highly sensitive to acidification. Regional distributions of lake and stream acidity are summarized in the following table. While this survey information cannot be used to establish the cause of a water body's status, it provides a description of the number of acidic and very sensitive surface waters for the population sampled. Biological impacts are expected in acidic waters and may occur in sensitive surface waters. Snowmelt and intense summer storms can increase surface water acidity and lead to many more acidic waters than reported, particularly during biologically sensitive times of the year.

| Region [1] | Status (number of lakes or streams in percent) | |
|---|---|---|
| | Acid (ANC $<0\mu eg\ L^{-1}$ | Most sensitive (ANC $<50\mu eg\ L^{-1}$ |
| Lakes: [2] | | |
| Northeast | 5 | 19 |
| Upper Midwest | 2 | 15 |
| Southern Blue Ridge | 0 | 1 |
| Florida [3] | 22 | 35 |
| Mountainous West | 0 | 17 |
| Streams: | | |
| Interior Mid-Atlantic | 3 | 11 |
| Mid-Atlantic Coastal Plain | 6 | 24 |
| Interior Southeast | 0 | 5 |
| Florida [3] | 12 | 61 |

[1] Regions reported are as defined in NAPAP and EPA documents. Values reported are regional averages. Proportions of acidic and most sensitive surface waters within defined subregions are considerably lower or higher than this average.

[2] Small lakes (less than ten acres) were not sampled by EPA but in some areas (e.g., New York's Adirondack Mountains) are more likely to be acidic than larger lakes.

[3] Compared to other regions, it is better established that surface water acidity in Florida is the result of other processes in addition to acidic deposition.

3.2 Future Projections:

Indications are that the steady-state hypothesis holds in the Northeast, i.e., taken as a region, surface waters are in equilibrium with sulfur inputs. In the Southern Blue Ridge Province systems are not in equilibrium and are still absorbing sulfur. Assuming these conditions to be true, the following results may be expected.

The relationship between acidity changes and sulfur additions is complex. In general, percentage changes in sulfur will be accompanied by small changes in acidity.

3.2.1 Constant $SO_2$ Deposition: In the Northeast, little change will occur: few acidic systems will recover and few additional systems will become acidic. In the Southern Blue Ridge Province, significant changes could occur after the protective capacity of watersheds is exhausted (especially sulfate absorption capacity). Biological impacts will generally follow changes in acidity.

The Mid-Appalachian Region (part of the Interior Mid-Atlantic Region) is presently a key unknown. Significant research for this region is being completed and will be included in the NAPAP 1990 Assessment. This research was undertaken when EPA's National Stream Survey showed that sensitive surface waters occurred in some of the mid-Atlantic regions and the additional analyses suggest that significant acidification may occur within a few decades.

3.2.2 2000 Target Emission Reductions: In the Northeast, a percentage of systems will eventually improve chemically. This response will not be immediate since the watersheds will "bleed" sulfur into surface waters and a limited number of systems may continue to acidify. Due to the $SO_2$ reduction, more systems improve (chemically) than become acidic. Changes in acid neutralizing capacity will not be as large as change in sulfate. Biological recovery (e.g., self-reproducing fish populations) may require additional time. In the Southern Blue Ridge Province, the rate at which acidification occurs is slowed. Although there are few acidic systems at present, it is possible that some systems may become acidic in the future.

3.2.3 2005 Target Emission Reductions: Surface waters in the Northeast will respond similarly to the 2000 target case, except that the responses will be displaced in time, by less than five years. Recovery (chemical and biological) will occur but the response will not be immediate. Systems in the Southern Blue Ridge Province will continue to receive net increases in sulfur for an additional period. More systems may become acidic over this decade, but the additional number of acidified systems would be small.

4. Sulfur Deposition Effects on Forests:

4.1 Current Status: Preliminary indications suggest there is no widespread forest damage from acidic deposition. High elevation spruce forests in the eastern United States are effected by acidic cloud impacts, in combination with other stresses. At high elevations (>3400 ft) in the Adirondack and Green Mountains, the growth of red spruce has declined and mortality has increased (>50 percent dead.) Mortality in the Southern Appalachian Mountains is within the natural range but growth has declined. These forests represent less than 0.01 percent of the total eastern forested area. Cumulative effects of acidic deposition on some soils in the East may affect soil fertility in about 50 years. Sulfur deposition has changed soil nutrient status in the Midwest but this does not appear to have affected forest health.

The finding of "no widespread sulfur damage to forests" is widely acknowledged among most forest scientists, but varies from the views commonly reported in the media. NAPAP's state-of-science critical reports, with extensive reviews by all interest groups, are intended to assure credible findings on forest status. It is generally agreed that ozone reduces forest health in southern California and possibly also in some areas of the eastern U.S.

4.2 Future forecasts

4.2.1 Constant Sulfur Deposition: Continued decline of red spruce may occur at high elevation, although the remaining trees may be genetically more resistant to ozone and acid stress. Effects would occur only in association with another stress, e.g., drought, extreme low temperatures.

Some forest soils in sensitive regions in the East will exhibit reduced fertility from acidic deposition in about 50 years. This may affect forest growth.

4.2.2 2000 Target Emission Reduction: Current information suggests that only high elevation spruce growth would be improved if sulfur deposition were reduced. Although this represents less than 0.01 percent of the forests in the U.S., it is an important natural resoruce in our National Parklands. High elevation forests are also important in erosion protection. Possible changes in soil chemistry in sensitive regions in the East would be reduced and delayed if deposition were significantly reduced.

4.2.3 2000 and 2005 Target Emission Reductions: The reduction of stress on high elevation spruce growth would be delayed by a time of less than five years. Long-term (50-year) soil acidification improvement would be delayed slightly. Cumulative changes in the chemistry of sensitive soils would be reduced, but not as rapidly.

5. Sulfur Deposition Effects on Agricultural Crops:

5.1 Current Status: The yield per acre of most crops in North America has increased steadily over time for the past 60 years because of genetic improvements through crop breeding and improved management practices such as fertilization, irrigation and pesticide application. Year-to-year and site-to-site variations in crop yield are principally the results of natural environmental factors and management differences. Research indicates that crop yield is not impacted by acid rain. However, in many regions of the country, ambient levels of ozone reduce the yields of some crops by 1 to 15%.

5.2 Future Forecasts:

5.2.1 Constant Sulfur Deposition: No changes in crop yield are expected if current levels of $SO_2$ emissions continue.

5.2.2 2000 or 2005 Target Emission Reduction: No agricultural benefits are expected with any reductions in $SO_2$, except possibly on a local scale (within a few miles) near large smelters, refineries, or multiple point sources.

The benefits associated with the input of sulfur (a plant nutrient) to agricultural regions would be reduced if $SO_2$ emissions were reduced. This would result in higher sulfur fertilizer requirements to maintain optimal crop growth. Any control strategies that reduce ozone levels (e.g., $NO_2$ reduction) would likely benefit agricultural production.

6. $SO_2$ Emission Effects on Visibility

6.1 Current Status:

Summertime visibility over much of the eastern U.S. has decreased to a current visual range of generally less than 20km for areas east of the Mississippi River, except for northern New England, where it is 40 to 60km. Estimates of natural visibility in the East suggest background levels of visual range between 60 to 80km; substantially more than current levels in the East but still less than half of current western levels. Degradations in western visibility have not been as severe as in the East. Western visibility generally ranges from 100–200km.

In the rural East, reduced visibility results primarily from light scattering by fine particles, predominantly sulfate particles. In urban areas and in the rural West, light absorption and scattering by carbon particles is also important. The higher humidity in the East significantly increases the light scattering by sulfate particles compared to the West. Scenic vistas are affected by pollution at all 35 National Parks within the contiguous 48 states, and sulfate particles

are the single most important factor in visibility impairment.

6.2 Future Forecasts:

6.2.1 Constant $SO_2$ Emission: Visual range would remain constant under current $SO_2$ emissions levels.

6.2.2 2000 or 2005 Target Emission Reduction: Visual range should improve immediately if $SO_2$ emissions are reduced, although quantification of the relationship is not yet possible. (Quantitative estimates are being prepared for the NAPAP assessment reports.)

7. $SO_2$ Emission Effects on Human Health

7.1 Current Status:

Both $SO_2$ and sulfate aerosols can result in bronchoconstriction in asthmatics and changes in mucociliary clearance. The $SO_2$ National Ambient Air Quality Standards (NAAQS) are met in most regions of the nation, and the remaining $SO_2$ nonattainment cases are subject to further regulatory control under existing Clean Air Act authorities. In 1985, the $SO_2$ NAAQS were exceeded in parts of 60 counties in 16 states.

Only a few direct measurements of ambient acidic sulfate aerosol concentrations have been made, and the highest measured levels are slightly lower than the concentrations which cause the effects mentioned above. However, some epidemiological studies suggest the possibility of long-term chronic effects resulting from exposure to high ambient levels of acid aerosol. EPA is currently considering the need for an acid aerosol ambient standard, and NAPAP is developing its analysis in close collaboration with the EPA regulatory decisionmaking.

Violations of the ozone NAAQS occur in many regions in the U.S. and it is likely that decrements in lung function occur in sensitive individuals in these areas.

Several indirect health impact mechanisms are being evaluated, including the possible mobilization of lead in low pH drinking water systems, and of mercury in lakes, with subsequent accumulation in fish used for food consumption. These studies are continuing; reported risk estimates will likely be low, but may not be negligible in all cases. (NAPAP's state-of-science reports to be released for public review in November 1989 will report on these risks.)

7.2 Future Forecasts:

7.2.1 Constant $SO_2$ Emissions: Chronic effects (if any) from acid aerosols would continue among sensitive individuals.

Indirect health risks (if any) would continue at approximately current levels.

7.2.2 2000 or 2005 Target Emission Reduction: Large-scale (50%) emission reductions would benefit individuals in those localities not currently attaining the $SO_2$ NAAQS. However, broad $SO_2$ emission reductions may not be a very inefficient means of achieving these benefits (i.e., if such emission reductions were not otherwise required).

Indirect health risks (if any) would be reduced. If significant indirect risks were confirmed, evaluation of specific emission reduction requirements in the affected regions would be necessary.

8. Sulfur Deposition Effects on Materials:

8.1 Current Status:

Acidic deposition increases the rate of deterioration of some building materials (e.g., galvanized steel and carbonate stone), some surface coatings (e.g., carbonate paint) and cultural resources (e.g., statues). The relationships between acidic deposition rates and deterioration rates for various materials are not well quantified, and are currently being investigated. Because of the large overall external maintenance costs for structures in the nation, enhanced deterioration from acidic deposition could potentially be significant. This is problematic since no generally accepted estimates of maintenance costs resulting from all air pollution impacts (nor from acidic deposition specifically) are currently available. Also, no credible analysis of consumer maintenance practices has yet been done. Additional information on this issue is anticipated for the 1990 Assessment.

Since most of the nation's materials and cultural resources are in urban areas, the focus of control decisions is similar to health effects, i.e. local sources need to be considered. Emissions from a limited number of remote sources (e.g., power plants) may result in a less than proportional impact on urban structures.

8.2 Future Forecasts:

8.2.1 Constant Sulfur Deposition: Current levels of surface deterioration will continue. Local situations of corrosion and other air pollution impact have been described but larger regional patterns of damage (i.e., those which would benefit from large regional $SO_2$ emissions reduction) are not well-characterized and constitute a significant gap in our knowledge.

8.2.2 2000 or 2005 Target Emission Reduction: Emission reductions will, at a minimum, provide an additional margin of safety relative to possible regional scale materials impacts from acidic deposition. No estimates of specific benefits are currently available. (NAPAP will report on the materials benefits which may result from sulfur emission controls in its Integrated Assessment in 1990. Because of significant data and inventory limitations, specific projections are unlikely. However, bounding estimates will be reported.)

9. Importance of Nitrogen Oxide ($NO_2$) Emission Reductions:

$NO_2$ emissions, which result from all combustion sources (i.e., both motor vehicles and stationary sources) can cause three types of effects on the regional scale:

Acidic deposition—typically 10 to 30 percent of that caused by sulfur oxides in the East. However, $NO_2$ may be a major component of acidic deposition to the extent that it occurs in the West.

Ozone ($O_3$) is produced photochemically by $NO_x$ and volatile organic compounds (VOC). The $O_3$ production or degradation rate depends on the local ratios and absolute amounts of $NO_x$ and VOC. This is very important because of the widespread nonattainment of the $O_3$ standard.

Contribution to eutrophication of coastal waters—may be a significant contribution (10 to 20 percent) in some cases.

Nitrates, derived from $NO_x$ may be important in some acute acidification episodes in surface waters.

In view of the possible effects, the question of $NO_x$ controls should be addressed as part of any evaluation of $SO_2$ control strategy.

Current $SO_2$ scrubber technologies remove very little $NO_x$ emissions. However, currently available low $NO_x$ burners may achieve 30-50 percent reductions. Some of the Clean Coal Technologies now being demonstrated (fluidized bed combustors, advanced scrubbers) also remove 30 to 50 percent of $NO_x$ emissions.

10. Impact of U.S. Emissions on Canada:

The principal impact of acidic deposition in southeastern Canada is the same as in the northeastern United States—acidification of a percentage of watersheds and lakes in geologically sensitive regions. Because of the large number of Canadian lakes in sensitive regions, this is a particular concern. Acidic deposition in both Canada and the United States results from sources on both sides of the border. It is generally agreed that the net transboundary flux of sulfur oxides is from the United States to Canada.

Canadian government representatives frequently assert significant forest damage as a result of acidic deposition. (Indeed, some of the best documentation of severe forest damage from extremely high levels of sulfuric dioxide impact come from the Canadian experience near the nickel smelter in Sudbury, Ontario—the world's largest individual $SO_2$ source.) Most Canadian and U.S. scientists now agree that there is no scientific basis to relate widespread forest effects to current levels of deposition. Long-term cumulative impacts on the fertility of certain soils is being evaluated with respect to possible forest affects.

Canadian representatives have expressed specific concerns about acidic deposition impacts on its sugar maple industry. Current information indicates that insert infestation and management practices significantly contribute to the observed impacts. Note: Canadian production of maple syrup was at a record high level in 1988.

U.S. emissions reductions intended to benefit effects categories (e.g., surface waters, health and visibility) in the Adirondack area and New England will also benefit the principal areas of concern in Southeastern Canada.

II. Economic Valuation of Benefits:

NAPAP has avoided basing its assessments on explicit comparisons of the economic benefits and costs of controls, partly because only limited information is available on the economic values associated with some of the effects. NAPAP is currently conducting economic benefit evaluations in a limited number of situations, and will report on methodologies employed and specific results in its assessment reports.

Because of the impracticality of developing credible benefit estimates for all impacts by 1990, NAPAP is evaluating alternate emission reduction strategies on a comparative basis, in order to report on strategies which achieve largest benefits (as determined by either physical or economic measures, as appropriate) for similar control costs.

Because economic evaluation methodologies are not well agreed upon for all of the effects/benefits categories relevant to acidic deposition, NAPAP's comparative evaluation of control strategies recognizes three categories of benefits. Benefits in individual categories can be cross-compared for the various control strategies evaluated, but cannot be combined into a comprehensive dollar estimate of benefits. The categories are:

(1) Health related benefits—having special public policy importance;

(2) Economically evaluated benefits—including market estimates (e.g., productivity in commercial forests) and behavior base estimates (e.g., recreational use of lakes); and

(3) "Conservation benefits"—including preservation of remote lakes and mountaintop forests, for which economic evaluation methods are not well agreed upon.

12. Control Strategy Implications Resulting From the NAPAP's Effects and Technology Analyses:

The time scale for biological recovery of lakes and streams in the Northeast may be long in the Northeast so that little near

term benefit would be expected to result from rapid emission reduction. The time scale and importance of other effects (lakes and streams in other eastern regions, possible health effects, materials impact, forest response, visibility impacts) is still being evaluated. If the time scale of all significant effects is long, rapid imposition of controls will not result in significant near term benefits. This suggests that slower but less costly control strategies should be evaluated carefully. Specifically:

There is general agreement that moderate emission reductions (e.g., 3 to 5 million tons of $SO_2$) can be achieved within approximately five years by currently available technology. This includes coal substitution, coal cleaning. LIMB duct injection, and enhancements to existing scrubber technology.

LIMB technology has been demonstrated for wall-fired boilers and is attractive from a cost-effectiveness standpoint for control of $SO_2$ and $NO_2$ emissions.

Scrubber technology is continuing to advance with a focus on increased removal efficiency and reliability and/or reduced costs. The current technology is ready for implementation with known cost, performance and environmental impacts.

Clean Coal Technologies, including repowering and advanced energy conversion techniques, are being demonstrated. These technologies are potentially lower emitting and more cost effective than current technologies. The demonstration program will help develop these technologies as well as clarify their ultimate performance, cost, and penetration rates.

The Clean Coal Technologies (CCT) currently being demonstrated have several significant advantages compared to the current generation of flue gas desulfurization (scrubber) technologies:

Improved energy efficiency through greater kilowatt output per ton of fuel consumed (less $CO_2$ emissions and global climate impact).

Significant $NO_2$ emission reduction (30-50 percent in some cases) not achieved by current scrubbers.

More manageable wastes, compared to scrubber sludge.

Potential future export markets (coal and combustion technology) for the United States.

Wide deployment of CCT instead of scrubbers would require an extension of the deadline to achieve the full planned emission reduction beyond 2000 (i.e., to 2003-2005) unless a "crash program" of technology demonstrations is pursued.

13. Future NAPAP Assessment Reports on Benefits and Strategy Evaluation:

NAPAP will complete a large series of State-of-Science and State-of-Technology reviews, and an Integrated Assessment reporting on comparative evaluations of control strategy options, during the next 16 months. All NAPAP documents will have extensive review by U.S. and foreign scientists, and interest groups concerned with acid rain issues. These NAPAP reports will provide the following:

Credibility.—This is the most important scientific product of NAPAP's work. Reasonable national agreement on the major cause-effect relationships, and the effectiveness of the planned control strategy, is most important. NAPAP's extensive scientific and public review procedures address the need for credibility. The NAPAP International Conference on Acid Rain, scheduled for February 1990, will be the most visible part of the extensive review process.

Completion of scientific, technological and economic studies.—NAPAP will continue to provide decision-makers currently available information upon requst, for analysis of legislative options, while its several key cause-effect analyses and other studies are being completed.

Comparative evaluation of strategies.—These analyses will aid decision-makers in the evaluation of legislative options until a law is adopted, and will guide regulatory management in the years ahead.

## H.R. 2273

### HON. BOB CLEMENT

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. CLEMENT. Mr. Speaker, I am so happy to see this momentous legislation finally come to the floor for a vote. It has been a long time coming—too long in my opinion—but it looks like the handicapped community is about to receive the same civil rights guarantees that the rest of us already take for granted.

Mr. Speaker, I have long been a cosponsor of H.R. 2273, the Americans With Disabilities Act, and feel that the rights and protections that it provides for the thousands of handicapped individuals amongst us is long overdue. Most of us do not know and, therefore, cannot empathize with the plight of the handicapped in our society. We do not know, for example, how it must feel to be unable to travel back and forth to work or school, how it must feel to be unable to get a drink of water because the fountain is too high, or to be unable to use a restroom because it is not properly equipped to accommodate a handicapped person.

Passage of the legislation before us will make life a little easier for those who already have it hard. It will make it easier for these people to function independently in a society that is always in a hurry and does not have time to lend a helping hand.

We have heard a lot of economic concerns in relation to this bill; about how much its going to cost a local government or a private company to abide by the regulations that the ADA will impose. Economic considerations are very real; I share them and I personally know the Public Works Committee, of which I am member—as well as the other committees of jurisdiction I am sure—has tried to be reasonable in terms of effective dates and phase-in requirements so as to ease the financial strain of meeting the ADA.

However, what we are talking about here is no less than civil rights guarantees for the handicapped. What we are talking about is the right to work, the right to travel, the right to be independent in America—the country that the world looks to for freedom and opportunity. After all, denying the handicapped the rights of the ADA because of financial considerations is akin to denying blacks the vote because it would cost a lot of money to register them and to establish more polling places to accommodate the additional voters.

The ADA is right, Mr. Speaker, and it is badly needed throughout America. I stand ready to fully support the intent of the bill and sincerely hope that it will help to ease some of the stress and burden in the lives of our handicapped.

## LET US COMMEMORATE THOSE BRAVE CHINESE WHO HAVE SACRIFICED FOR HUMAN RIGHTS IN CHINA

### HON. EDWARD F. FEIGHAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, May 22, 1990*

Mr. FEIGHAN. Mr. Speaker, 1 year ago thousands of brave, youthful, Chinese peacefully demonstrated in Tiananmen Square in Beijing. Far from attempting to be disruptful, they wanted nothing more than to engage in dialogue with those who claimed to rule in the name of the people. The demonstrators wanted to offer their input into solving the corruption that permeates the Chinese leadership; they wanted to offer their support for reformist elements in that leadership. They merely expressed their desire that the leadership of their country be more responsive to the expressed needs of the people.

As we are so painfully aware, their peaceful and reasonable demands were met with a brutal and unconscionable reaction by the Chinese leadership. Hundreds were slaughtered; many thousands more were hunted down and arrested. Confessions and self-incriminations were extracted and the guilty were executed or thrown into prison, where many languish to this day.

I would like to draw attention to the case of Su Ding. Su is dean of the East-West Art Institute of the Sichuan Academy of Social Sciences and was arrested last August while trying to leave China to serve as a visiting scholar this year at Arizona State University. He was charged with having engaged in anti-party activities during the time of the Tiananmen Square demonstrations and with favorably recommending a book that was labeled "Anti-party." Su is beieved held incommunicado. I became aware of this case through the efforts of my distinguished colleagues, Mr. TED WEISS and Mr. JOHN MILLER who have initiated an "adopt-a-prisoner" crusade to draw attention to individual cases of repression in China. I urge my colleagues to join us in doing so.

Last week, the Human Rights, Asia and Pacific and International Economic Policy and Trade Subcommittees of the Foreign Affairs Committee heard testimony from many reputable sources concerning the current human rights situation in China. All agreed that in the year since the crackdown in Tiananmen Square, the situation has gotten worse. To now, the Chinese leadership has been unresponsive to United States efforts to encourage them to improve their human rights record. Now, Congress must increase the pressure on the leadership of China to do so.

Today we have before us House Resolution 393 and I commend my colleague Mr. GUS YATRON, for having introduced it. This resolution expresses the sympathy that all Americans feel for those Chinese who were murdered for daring to stand up for their beliefs. It expresses our support for those Chinese still

fearing reprisal for having expressed their yearning for democracy, and commends those who have incurred risk in continuing that struggle. This resolution calls on the Government of China to release those still imprisoned for their beliefs and to respect internationally accepted human rights now and in the future. I am an original cosponsor of this legislation, and I respectfully urge all my colleagues to join me in support of it.

# SENATE—*Wednesday, May 23, 1990*

*(Legislative day of Wednesday, April 18, 1990)*

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. BYRD].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

*Owe no man any thing, but to love one another: for he that loveth another hath fulfilled the law.* * * Love worketh no ill to his neighbour: therefore love is the fulfilling of the law.*—Romans 13:8,10.

Eternal God, in the pragmatic world in which we live, in the culture in which we are immersed, these words of the Apostle Paul sound totally irrelevant. Yet we know in our hearts that this is the wisdom of the ages—the opposite of violence, hate, indifference, and all the destructive forces in life. Somehow, Father in Heaven, quicken us to this ultimate reality—the way of reconciliation, healing, and fulfillment. Help us to see the world is starved for love, wives for love of husbands, husbands for love of wives, children for love of parents, parents for love of children. Help us to understand, Father in Heaven, like oil eliminates friction, love brings peace. Help us to love one another as Thou dost love us.

In Jesus' name whose love is unconditional, universal and eternal. Amen.

## RESERVATION OF LEADER TIME

The PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

## OMNIBUS CRIME BILL

The PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1970, which the clerk will report.

The legislative clerk read as follows:

A bill (S. 1970) to establish constitutional procedures for the imposition of the sentence of death, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Hatch amendment No. 1681, to strike provisions that would prohibit the manufacture, sale, and possession of certain semiautomatic (assault) weapons.

AMENDMENT NO. 1681

The PRESIDENT pro tempore. There will now be 45 minutes debate on the Hatch amendment, amendment No. 1681, with 30 minutes under the control of the Senator from Arizona [Mr. DECONCINI] and 15 minutes under the control of the Senator from Utah, [Mr. HATCH].

Who seeks recognition? The Senator from Utah, [Mr. HATCH].

Mr. HATCH. Mr. President, I ask unanimous consent we put in a quorum call with the time charged against neither Senator.

The PRESIDENT pro tempore. The Chair did not understand the request.

Mr. HATCH. Mr. President, I ask unanimous consent we put in a quorum call with the time charged against neither Senator DECONCINI nor myself. He is coming and he will, I think, speak first.

The PRESIDENT pro tempore. Without objection, it is so ordered. The absence of the quorum has been suggested. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATCH. Mr. President, before we vote on my amendment to strike the assault weapons language from this bill, I would like to list one last time the reasons I oppose the assault weapons provisions.

This bill would, for the first time, ban semiautomatic firearms. There is no functional difference between the weapons listed in this bill and any other semiautomatic weapon. They all employ a firing action that has been commonly used in firearms for over 100 years. The only difference between these weapons and other semiautomatic firearms is their appearance.

Despite some of the arguments we heard during earlier debate on this amendment, these weapons are not the weapons of choice of criminals. Statistics tell us that handguns and shotguns are still the most likely weapons to be used in the commission of a crime. For example, of all of the guns seized by police in Los Angeles and San Francisco in 1988, less than 3 percent were the assault style weapons listed in this and other bills. In New York City, police recovered more than 16,300 guns in 1988—only 25 were semiautomatic military-style rifles now banned from importation by the administration. And here in Washington, DC, police report that none of the assault weapons banned from importation were recovered in 1988. The fact that the Bureau of Alcohol, Tobacco and Firearms is tracing more assault weapons does not lend support to this language. BATF only traces firearms which it is asked to trace. They do not trace every crime weapon. And the Bureau has stated that they do not necessarily agree with those who cite their trace findings as indicative of the percentage of these weapons used in the commission of crimes.

The vast majority of the hundreds of thousands of the listed weapons already possessed around the country, are used for legitimate lawful activities such as self-defense in the home, target shooting, and collecting. Some for hunting, but mainly for legitimate lawful activities of self-defense in the home, target shooting, and collecting. There may be some who use these for hunting, but not very many.

While they may not be used by many people for hunting purposes, I would simply note that the second amendment says nothing about limiting the use or ownership of firearms to hunting.

This language focuses not on crime or criminals, it focuses on the second amendment rights of law-abiding citizens. It will not prevent hardened criminals or deranged psychopaths from obtaining a weapon if that is what they want to do. These people will find their weapons of choice no matter how many guns we ban. Since the majority of crime weapons are obtained through illegal channels, this assault weapons ban will simply make no difference at all.

This assault weapons language imposes self-registration requirements on current owners of restricted firearms. These requirements impose a complicated, cumbersome, unworkable, and unfair imposition on honest, law-abiding gun owners. The criminals will not comply with these requirements. And we do not know if the administration even believes that this registration system will work. We do know, however, that the administration is opposed to this portion of the bill.

Current owners of these firearms may find themselves in violation of the registration requirements, through no fault of their own, if they cannot obtain copies of the 4473 forms that result from future sales of the weapons unknown to the current owner.

Anyone who violates the record-keeping registration requirements im-

posed by this bill will be in violation of Federal law, and could be charged with a felony. Even technical mistakes that result in a violation of these confusing requirements can result in a felony charge which, under firearms statutes already a part of the Criminal Code, would prohibit that person from ever owning another firearm.

This would mean all firearms, not just assault weapons. As I already mentioned, some will find that they have violated the law long after they may have sold the weapon involved simply because the new owner chose to transfer the firearm without providing any type of notification to the original owner.

If these assault weapons, which the bill would ban, are so bad, then why are these provisions effective for only 3 years? Indeed, these particular provisions in S. 1970 are even stranger yet.

The Senate just yesterday tabled by an overwhelming 82-to-17 vote the Metzenbaum amendment which would have banned all so-called assault weapons. In my opinion, such a ban would not have prevented criminals from obtaining any of these firearms or any other firearms. The criminal always finds a way to get the weapon he wants.

The provisions of S. 1970 ban fewer so-called assault weapons than the Metzenbaum amendment banned. Even if the provisions of S. 1970 achieved the impossible and kept all the listed guns out of the hands of criminals, all the guns that remain lawful for purchase under this bill would be readily available. These provisions cannot possibly, even on their face, keep so-called assault weapons out of the hands of hardened criminals.

Mr. President, these provisions strike at the heart of our constitutionally protected right to keep and bear arms. Other than their appearance, these weapons are not different from millions of other weapons that are always considered legitimate. There are legitimate, lawful purposes for owning these weapons, and I do not believe that we should be opening the door to banning new classes of weapons simply because the media chooses to single them out. The facts do not support the need to ban these weapons.

Mr. President, I just have to say in closing that the only people who are going to be hurt by the DeConcini language in this bill are going to be the honest, law-abiding citizens who want to collect, own, target shoot, and, yes, sometimes hunt with these guns. There are legitimate rights of these people to collect these weapons. They are not going to misuse them. The fact of the matter is we are always going to have criminals get what they want and they are not going to register pursuant to the onerous burdens in this bill within the underlying bill.

Mr. President, I am tired of the honest, law-abiding gun owners of this country being assaulted all the time by those who really have as their own purpose the desire of getting rid of all guns. I am not speaking in this regard of the Senator from Arizona. I know he feels differently on that. But most of the impetus for this type of legislation comes from those who really want to ban all weapons.

Mr. President, there is no real, logical, justifiable reason for doing it in this case and taking away the rights of decent, law-abiding owners of guns. The fact of the matter is, I hope our colleagues will support this amendment and strike these provisions from the bill so we can then get about doing the rest of the criminal bill itself.

I reserve the remainder of my time.

I suggest the absence of a quorum, and I ask unanimous consent that the time not be charged against either side.

The PRESIDENT pro tempore. Without objection, the Senator's request will be granted. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDENT pro tempore. Without objection, further proceedings under the quorum call will be rescinded.

The Senator from Arizona [Mr. DECONCINI] is recognized.

Mr. DECONCINI. I thank the Chair.

Mr. President, we have heard the arguments that these weapons that criminals use are stolen and that they are illegally obtained. Last night, I introduced the information from the Oakland report that showed only 12 percent of close to the 400 guns that were confiscated over a 3-year period in Oakland were illegal guns. They were not purchased over the counter.

So these weapons are available today over the counter in any gun store that you go to. The people who use these guns for criminal activity go in and buy them. Why should they steal them when all they have to do is send in a straw man, if they are a felon? In Arizona, we have evidence that for $100 they get a straw man to go in and buy these guns. Why should they involve themselves with any kind of criminal activity when it is very easy to buy them?

Mr. MCCLURE. Will the Senator yield on that point?

Mr. DECONCINI. On the Senator's time, I will be glad to yield.

Mr. HATCH. I yield to the Senator from Idaho.

Mr. MCCLURE. I want the record to reflect immediately after the comments of the Senator from Arizona that if, indeed, a straw man was sent in, that is an illegal purchase and, therefore, if you are depending on statistics that show an illegal purchase but based on a straw man purchase that is, by law, illegal today.

Mr. DECONCINI. Let me just respond to the Senator, I said in Arizona.

Mr. HATCH. Is this on the Senator's time?

Mr. DECONCINI. This is my time if the Chair would so rule that I am back on my time.

The PRESIDENT pro tempore. The Senator from Arizona is recognized.

Mr. DECONCINI. I said in Arizona there was evidence of a straw man. The report I cited last night, the Oakland report, indicated that 12 percent—Oakland, CA, did a survey—of the 383 assault weapons confiscated between 1986 and 1988 were illegally obtained. The remaining 88 percent were purchased legally, over the counter. I think it is important to note, this gun costs less than $300 so why would you want to steal it? Good Lord, drug dealers can certainly afford $300 for a gun.

Mr. HATCH. I say to the Senator on that point——

Mr. DECONCINI. On the Senator's time.

Mr. HATCH. The testimony before the committee was 80 percent.

Mr. DECONCINI. Pardon?

Mr. HATCH. That 80 percent of all these guns were illegally obtained. I agree there are aberrations in the country, that may be true, although I do not think they can show whether straw men purchased the guns or not. Eighty percent is the testimony before the committee.

Mr. DECONCINI. Mr. President, all I can cite is the most current survey taken in Oakland, CA, by the law enforcement people there of the confiscated weapons that they confiscated during arrest of criminal activity. Only 12 percent of the 383 assault weapons confiscated between that time were illegally obtained.

Mr. President, I would like to go through some of these guns drug dealers use that the opponents want us to believe are the guns law-abiding citizens want to use to hunt and to shoot targets.

We first have the MAC-11. This gun happens to already be banned. BATF banned the production of the MAC-10 in 1982 because it was too easily converted to fully automatic. The company continues to make this gun, however, and it is, based on the design, only changed enough to not fall into the category of the MAC-10. It is equipped with a 32-round magazine, a favorite of surveillance and soldiers of fortune. This gun is for military purposes. It is cheap. It is from $200 to $300. It is ad-

vertised by its manufacturer as "the gun that made the eighties roar."

Next we have the AK-47, which is so familiar to so many people. It is manufactured by Poly Technologies. It is a civilian model of the fully automatic AK-47 designed by the Soviets and currently produced by the Chinese for United States import. It is equipped with a 30-round magazine but it can handle a 5-, 20- or 40-round magazine as well as a 75-round magazine. As fast as you can pull the trigger, that gun will discharge, so you can shoot easily 75 rounds in 1 minute. This is the gun used by Purdy in Stockton, CA. The price is about $370. But recently the gun price has gone up, since the shooting in Stockton, to about $1,500. We have a number of examples of this gun being used in Arizona against law enforcement.

Then we have the Colt AR-15. It is a civilian model of the military M-16 that was widely used in Vietnam, not for hunting of deer but hunting of the Vietcong. It is equipped with a 5-round magazine but it can hold a 20- or 30-round magazine. Its list price is $750. In 1988 and 1989 it was ranked third among all assault guns used in crime according to the BATF trace statistics. Of 591 weapons traced in 1988 and in just the first quarter of 1989, the only records I have here, they had 128 of those confiscated.

The next one is the TEC-9. It is a 9-millimeter Lugar pistol, automatic pistol. It is domestically produced in Florida, as I have said before. It is favored as an intimidation factor, advertised as an intimidation factor. A Miami manufacturer manufactures about 3,000 of these a month. It is equipped with a 36-round magazine. It can take more. But that is this part here. Those rounds can be fired in about 45 seconds. It is favored by drug dealers because the TEC-9 is inexpensive and it is easily concealable within a coat. The list price is $380, sometimes less than that.

Ten assault gun models account for 90 percent of the crimes involving assault guns. One out of every five assault weapons traded is a TEC-9.

The next one I want to show you is called the Steyr-Aug. This is manufactured in Austria. It is a civilian version of the Austrian assault weapon originally designed to be converted to different models. It accepts a variety of military hardware, 30 rounds standard, detachable magazine. It can take up to 42 rounds.

Mr. President, this is a gun that you do not see hunters using as they tromp through the woods shooting wild turkey or deer, or even on the shooting range.

The next one is the Uzi Galil. This is a civilian version of the newest combat weapon produced by Israel military industries. It has been banned by the President, as have all of these foreign imports. We do not know how long that will last. This will make it permanent for 3 years. It is equipped with a telescopic lens. It has a muzzle velocity of 860 millimeters per second. It has not shown up in the tracing statistics yet.

There is also the Uzi carbine. It is a rifle and pistol combined, a civilian model of the fully automated Uzi introduced by the Israel military industry for import. This is the gun the Israeli military use when they go to war. It is equipped with 10- or 25-round magazine.

We have the Beretta AR-70 manufactured in Beretta, Italy. This is how this gun is advertised:

> When the name of the game is firepower. Ultimate rifle for shooters who demand optimum firepower. Offers heavy firepower, yet weighs about 8 pounds.

This is a weapon that is being used against our police today.

Then we have the FN-FAL manufactured in Belgium. It is the NATO caliber semiautomatic rifle. This is a combat weapon used by NATO in Europe today if, God forbid, there was military action. This has a detachable magazine. Twenty rounds is standard. It can take 10 rounds. It is ranked 13 among assault weapons traced in the first quarter of 1989.

Then we have what is known as the Streetsweeper, the Striker 12. This is domestically produced after the import ban by the President. It is a 12-round, drum fed with 12-gauge ammunition. It fires 12 rounds of 12 gauge in less than 3 seconds. Yesterday I said it would take 15 seconds. In less than 3 seconds this chamber can be emptied. It is not going to be emptied on deer because it would absolutely blow the deer away. It is going to be emptied on people and is used for spraying human beings. That was the reason it was developed by the South Africans as an apartheid control weapon. It is for the military, and this is the law enforcement version. It is advertised as the perfect police entry weapon, born in Rhodesia, improved in South Africa, and then patented and perfected and totally manufactured in the United States. It ranks 17 among all assault weapons traced in the first quarter of 1989.

Mr. President, it is clear to me that the time has come that these guns should not be available on the street, at least for a trial period of time. We are not infringing on anybody's second amendment rights. We bar people from having bazookas today or Stinger missiles and machineguns because it has been upheld that Congress can put on those restrictions without barring and infringing on the second amendment rights of anybody.

So, Mr. President, I am hopeful that my colleagues in this Chamber will make the tough decision. I know the political ramifications of even talking about this. Believe me, I have had this bill up around here for more than a year. I had a recall petition attempted against me because I dared to offer something to fight drugs in what I thought was a constructive way that would not infringe on the second amendment rights.

Mr. President, I am going to ask unanimous consent that the vote on the Hatch amendment occur at 10:30, and that any excess time under the Hatch amendment be divided between both Senator HATCH and myself.

The PRESIDENT pro tempore. Is there objection to the request?

Mr. DECONCINI. Excuse me, Mr. President. That the vote be set for 10:35. I ask unanimous consent that the request be changed to 10:35.

The PRESIDENT pro tempore. Is there objection to the request? The Chair hears no objection. It is so ordered.

Mr. DECONCINI. I thank the Chair.

I understand there are a couple of Senators who do want to speak in favor of this amendment and are on their way. I only say, Mr. President, it is really whether or not we want to support law enforcement finally with a modest approach to this particular problem that they are facing on a day-to-day basis.

Mr. President, I ask unanimous consent that a letter from the Arizona Association of Chiefs of Police, the Grand Lodge of the Fraternal Order of Police, National Headquarters, and several other letters of support from law enforcement agencies be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

ARIZONA ASSOCIATION
OF CHIEFS OF POLICE,
*Phoenix, AZ, August 8, 1989.*

Hon. DENNIS DECONCINI,
*U.S. Senate, Washington, DC.*

Dear SENATOR DECONCINI: On behalf of the Arizona Association of Chiefs of Police, I would like to commend your support of legislation banning certain specified assault rifles. As you are aware, in January of this year a deputy sheriff was shot to death near Flagstaff by criminals using assault rifles.

This illustrates the nationwide problem law enforcement officers are facing today from the unrestricted availability of assault weapons to criminals and persons who are mentally unstable.

It is clear that the National Rifle Association leadership has chosen to take an unrealistic and inflexible stance evidenced by their continued opposition to any legislation attempting to regulate assault weapons. These weapons have absolutely no hunting or legitimate sporting purpose. It is time that all Americans display your type of courage and conviction to take a stand against the NRA and their unreasonable and uncompromising policies.

I have personally talked to many members of the NRA who do not support the stance their leadership is taking. These people feel the NRA leadership is entirely out of touch with the membership. While we all agree

banning certain rifles will not be the overall cure for the problem, it is a step in the right direction. Legislation such as you are sponsoring gives law enforcement officers a tool which enables us to deal with people who illegally possess these dangerous weapons.

Once again, you have displayed your courage, initiative and integrity to support law enforcement officers and protect innocent citizens from slaughter. It does not go unnoticed you do this in the face of strong opposition from the powerful NRA lobby. Rest assured the Chiefs Association will stand behind you and asssist in any way possible to overcome this strong opposition.

Thank you again for your courageous efforts to combat violence and drug trafficking in this country.

Sincerely,

GARY D. LATHAM,
*Chief of Police.*

---

FRATERNAL ORDER OF POLICE,
*Louisville, KY, July 16, 1989.*

Hon. DENNIS DECONCINI,
*U.S. Senate, E. Broadway Blvd., Tucson, AZ.*

DEAR SENATOR DECONCINI: Congratulations from the more than 4,000 law enforcement officers in Arizona who support your efforts in SB747. At a recent state conference in Prescott, the assault weapons bills were discussed. We support your effort to limit these types of weapons. Many of us are sportsmen and members of the NRA, and we are concerned with the impact of your bill. But more importantly, we are mindful of the ever increasing daily assaults on ourselves and the innocent victims in America.

We are fed up with the mindless argument that sportsmen and every day citizens have a right to own any type of weapon available. If your bill was unconstitutional, the NRA would not be putting millions into the lobbying effort. They would simply win the battle in court. Common sense tells us that gun legislation is not new and must keep pace with growing technology.

We urge you not to withdraw your bill in favor of the Thurmond Crime Package. We are not in favor of a watered down version that will not solve anything.

Very truly yours,

PATRICK DEJONGHE.

---

FRATERNAL ORDER OF POLICE,
*Louisville, KY.*

DEAR MR. MCCOY: I would also like to extend the opportunity to the Senator to write an article in our newsletter. We mail to over 6,000 members in Arizona four times a year. You can send any communication directly to me and I will take care to have it included.

Sincerely yours,

PAT.

---

METROPOLITAN POLICE DEPARTMENT,
*St. Louis, MO, February 7, 1989.*

Senator PAUL SIMON,
*Subcommittee on the Constitution, of the Senate Judiciary Committee, Washington, DC.*

DEAR SENATOR SIMON: I regret that I will not be able to attend the Senate Hearings concerning Semi-Automatic Assault Weapons being conducted on Friday, February 10, 1989, but my schedule will not allow me to leave my duties to the Department at this time.

As a law enforcement official I am troubled by the increasing misuse of these types of weapons. I have always supported and will continue to support any legislation that will protect the public from the sale of weapons which have no sporting value. The public and law enforcement community are facing an ever increasing danger from those persons who have used the current laws to purchase these type weapons which more and more are being modified and used to commit crimes of horrible proportion. The Brady Amendment and the ban on Teflon coated bullets are steps in the right direction, but even tighter controls are needed in the areas of semi-automatic and automatic weapons being made accessible to just anyone who wishes to purchase one.

I will continue to fight any legislation which will allow semi-automatic assault weapons to flourish unchecked and out of control, and give my whole-hearted endorsement to legislation prohibiting unqualified access to any weapons which have no sporting value or legitimate need for anyone to possess.

If I can be of any future help to you concerning this or similar matters, please do not fail to call upon me.

Sincerely,

ROBERT E. SCHEETZ,
*Colonel, Chief of Police.*

---

POLICE OFFICERS ASSOCIATION,
JOLIET POLICE DEPARTMENT,
*Joliet, IL, April 7, 1989.*

Hon. PAUL SIMON,
*Dirksen Senate Building, U.S. Senate, Washington, DC.*

DEAR SENATOR SIMON: I have been a Joliet police officer for over twenty-one years. During that time, I have seen first hand the tragedies caused by the proliferation of firearms in our nation.

When I first became a police officer, a "man with a gun" or "shots fired" call in Joliet was unusual. Now these types of calls have become common. This city has been faced with an escalating gang problem. The criminal used to be poorly armed. Now we are taking well-made 9mm semi-automatic pistols off the street. It is just a matter of time before we are opposed by automatic weapons with superior fire-power.

It is for this reason that I am urging you to vote in favor of "The Assault Weapon Control Act of 1989," S. 386. I believe the survival of police officers in the future may literally depend on the elimination of AK-47's, UZI's and similar weapons.

Please vote in favor of this bill in order to take these military weapons off the market. I would appreciate hearing your position on this matter. Thank you.

Sincerely,

LT. NICHOLAS W. WEISS,
*Chairman.*

---

CITY OF SAN JOSE, CA,
*May 2, 1989.*

Senator HOWARD METZENBAUM,
*Russell Senate Office Building, Washington, DC.*

DEAR SENATOR METZENBAUM: The San Jose Police Department strongly supports your effort to outlaw military type assault rifles. The mayor and city council of San Jose have also passed a resolution urging the State Legislature to outlaw assault rifles. We view these weapons as having no place in a civilized society. Last year, within the boundaries of San Jose alone we seized 154 such weapons; tragically, each and every weapon is capable of causing a Stockton type massacre.

The following organizations also want assault rifles outlawed: the National Association of Chiefs of Police, the Major City Police Chief's Association, the California Police Chief's Association, the California Peace Officers Association, the San Jose Peace Officers Association (the collective bargaining agency for all San Jose police officers), the Federation of Police, the State Troopers Association, the Police Executive Research Forum and just about every legitimate law enforcement agency in the United States.

Hopefully your committee will not be distracted by the National Rifle Association's frantic efforts to confuse the public about the overwhelming desire of law enforcement to have these weapons of war outlawed. The NRA has searched throughout the country to find a few individual police officers opposed to the overwhelming majority opinion of law enforcement. These individuals have every right to their own opinion but your committee should realize that they are a very small minority. I urge you in the interest of the safety of police officers and citizens alike to pass this legislation.

Sincerely,

JOSEPH D. MCNAMARA,
*Chief of Police.*

---

NATIONAL SHERIFFS' ASSOCIATION,
*Alexandria, VA.*

RESOLUTION—NATIONAL SHERIFFS' ASSOCIATION SUPPORT OF THE S. 386

Whereas, America's Sheriffs have major responsibilities for local law enforcement in the United States; and

Whereas, Sheriffs, their officers and deputies are being confronted with criminals, including narcotics violators and other violent criminals; and

Whereas, narcotics violators and other violent criminals frequently arm themselves with assault type semi-automatic weapons and misuse these weapons in the pursuit of their criminal activity against law enforcement; and

Whereas, the continued use of these assault weapons has contributed to the rising number of murders of law enforcement officers and innocent civilian victims

Therefore, be it resolved that the National Sheriffs' Association goes on record as strongly supporting the Congress of the United States passage of Senate Bill-386 or similar legislation at the Federal level.

---

ILLINOIS ASSOCIATION OF CHIEFS OF POLICE,
*Winnetka, IL, March 22, 1989.*

The PRESIDENT,
*The White House, Washington, DC.*

DEAR MR. PRESIDENT: You are to be applauded for your decision to stop the import of military-style semi-automatic assault weapons.

It is my understanding that First Lady Barbara Bush and the country's newly installed Drug Czar William Bennett provided measurable support for your heightened concern about the mentality that says these assault weapons have some kind of useful purpose for the civilian population.

Now you must work to focus the attention of Congress on the passage of laws to ban the sale, possession, and manufacture of para-military assault rifles like the Chinese-made AK-47. Both houses of the legislature in California have recently passed such laws and even their conservative Governor George Deukmejian has said he will sign such a law.

Additionally, Colt Industry's decision to suspend sales of such assault weapons is admirable. We would like to see other gun

manufacturers in the United States take a similar lead.

For the safety and welfare of all of our citizens, there really is no choice but to try to eliminate these assault weapons while clearly separating this issue from all the other gun control debates rending this country.

You have the ability to influence legislation which could make access to these assault weapons more difficult. It seems a small price to pay and we sincerely believe that the true hunter/fisherman/rifleman will not suffer as a result of such a sane, limited, freedom-respecting method of limiting gun violence.

Sincerely,

CHIEF CARL DOBBS,
*President.*

---

[Vanguard, San Jose Police Officer's Association, March 1989]

PENDING LEGISLATION ON "ASSAULT TYPE" WEAPONS

(By Carro J. Grande, President)

Members of the San Jose Police Officers Association have voted overwhelmingly to support California State Attorney General John Van de Kamp in his endorsement of Senate Bill 292 and Assembly Bill 357. Both pieces of legislation address a level of responsibility avoided by elected bodies over the years because of well organized lobbies threatening an erosion of our constitutional rights.

San Jose's police officers have very recently experienced a serious loss of life associated with the possession of a deadly weapon by a careless and deranged person. Similar tragedies have also recently occurred in Stockton and Los Angeles, California, inflicted by persons possessing the assault type weapons addressed in the proposed legislation. We believe it is time the majority of our society be protected and shielded from the trauma inflicted by the reckless ownership and discharging of such weapons. The proposed legislation protects the law-abiding rational citizens in their desire to possess assault type weapons, but blanketly removes the guns access by the unstable individual who feels a need to vent their personal image of low self-esteem on unsuspecting victims. We applaud the authors of AB 292 and AB 357 as this legislation is socially necessary and long overdue.

---

*Office of the Mayor,*
*Boston, MA, February 10, 1989.*

Hon. PAUL SIMON,
*Chair, Senate Judiciary Committee's Subcommittee on the Constitution, Dirksen Senate Office Building, Washington, DC.*

DEAR SENATOR SIMON: As you well know, the escalating use of high powered weapons is one of the most important issues facing our cities today. The "drug war" we have been referring to for years has become a real war on the streets of our cities with real weapons now the rule, not the exception. The firepower of the drug lords armed with assault weapons has overpowered that of our nation's police departments and put the lives of police officers and innocent people in danger every day. I commend you for moving quickly to hold hearings on proposals to ban the sale of these assault weapons. Your leadership on this critical issue in the 101st Congress will be invaluable.

Attached is a statement which I delivered at the U.S. Conference of Mayor's Second Annual Conference on Crime and Drugs on Monday, February 6, 1989. The message was well received and led to passage of a resolution by the Mayors and Police Chief's in attendance calling for a ban on the manufacture and importation of semi-automatic assault weapons. Conference participants also called on Congress to reverse its position on the Brady Amendment "in view of the mass murders of children and other innocent people that have taken place in this country since its defeat."

While I applaud local initiatives to ban the sale of assault weapons and/or to impose a waiting period on the purchase of firearms, this is not a problem which can be solved city by city or even state by state. It is a national problem which cries out for a national solution, which is why your leadership is so important.

Unlike many of the other pressing problems you and I confront each day, the solution to the gun issue has virtually no price tag. The only price tag to be paid is if Congress fails to act. It is the increased social costs of fear and death in our neighborhoods. It is the price paid when a policeman is gunned down or when a child kills a child over a vial of crack.

I respectfully request that my attached statement along with editorials which appeared in the Boston Herald and Boston Globe be submitted for the record at today's hearing. I urge immediate consideration of legislation such as S. 386 introduced by Senator Metzenbaum, and quick passage of a final bill.

Again, thank you for your leadership on this very critical issue.

Sincerely,

RAYMOND L. FLYNN,
*Mayor of Boston.*

Mr. DECONCINI. Mr. President, I want to refer to one letter from the Fraternal Order of Police in Louisville, KY. It is to myself, and it says:

DEAR SENATOR DECONCINI: Congratulations from the more than 4,000 law enforcement officers in Arizona who support your efforts in SB747. At a recent state conference in Prescott, the assault weapons bills were discussed. We support your effort to limit these types of weapons. Many of us are sportsmen and members of the NRA, and we are concerned with the impact of your bill. But more importantly, we are mindful of the ever increasing daily assaults on ourselves and the innocent victims in America.

We are fed up with the mindless argument that sportsmen and every day citizens have a right to own any type of weapons available. If your bill was unconstitutional, the NRA would not be putting millions into the lobbying effort. They would simply win the battle in court. Common sense tells us that gun legislation is not new and must keep pace with growing technology.

Mr. President, I think it says to all, the law enforcement people are scared. That is the word we do not like to use, but that is the word they will tell you. They are frightened. They want some support. They want some help.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. I ask unanimous consent that the order for the quorum call be dispensed with.

The PRESIDING OFFICER (Mr. ROBB). Without objection, it is so ordered.

Mr. HATCH. I yield 5 minutes to the distinguished Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho is recognized for 5 minutes.

Mr. MCCLURE. I thank the Senator for yielding.

Mr. President, in the limited time that we have available to us this morning, I certainly do not want to prolong the debate because I suspect most Members have made up their minds, but it is a little puzzling to note which portions of the evidence that is before the body should be brought forward now.

I want to call attention to just one misleading aspect of the comments made by the Senator from Arizona. I do not accuse him of attempting to mislead, but I think the statistics themselves are misleading because the Senator from Arizona was referring to what percentage of guns traced or what percentage of these kinds of guns seized in crimes were of a particular kind of gun that is banned by his provision in this bill.

The point is that a very, very small proportion of guns used in crimes are the so-called assault rifles; a very, very small number. And if you only have 10 and one of them is one of the banned list, that means 10 percent of all those that are seized.

I would like to call attention to the report of the Florida Assault Weapons Commission. The interim report—because they did not complete their study in the time assigned to them—was filed on March 1, 1990. Anyone who is really interested in how many times these so-called assault rifles are used in crime should look at the Florida Assault Weapons Commission interim report. You will suddenly find that very, very few of the crimes committed in the State of Florida were committed with the so-called assault rifles.

I would like to read a statement made by Detective Jimmy L. Trahin of the Los Angeles Police Department, Firearms-Ballistics Unit, who testified on May 5, 1989, before a subcommittee of this body.

I will not read the entire statement, but I will start after the first paragraph and see how far I can go.

With 18 years as a law enforcement officer with the Los Angeles Police Department, 12 of those years have been spent as a Detective Training Officer assigned to the Firearms-Ballistics Unit. My vocation and experience in firearms identification has put me in a unique position to witness first hand the realistic, and I repeat, the realistic magnitude of the problems relating to firearms in criminal activity. Although my testimony here is not as an official spokesman for the Los Angeles Police Department, it will be factual, not conjecture, and based on my personal experience and training in the field of nearly two decades.

Since I will endeavor to be realistic, let's address the facts and not myths.

Do we have a large quantity of violent crime involving firearms? The answer is yes.

Do we have a larger quantity of violent crime without firearms involved? The answer is yes.

Have we had an increase in so-called assault weapons being involved in violent crimes? The answer is yes.

I use the term "so-called" assault weapons because somewhere in this recent hysteria these military-style semi-automatic firearms have been mislabeled with the term "assault". The actual definition relates to a selective fire gun capable of semi and full automatic fire utilizing an intermediate cartridge.

We have definitely seen an increase in the criminal use of these firearms during the past 8 years. We have also seen an increase in quality semi-automatic pistols, shotguns, and other weapons during the same time period.

Are these assault weapons the criminals "weapons of choice"? The answer is no.

We take into custody more handguns, or shotguns, or 22 caliber rifles than any quantity of assault weapons that are seized. From an informal survey that we took on over 4,000 guns that were taken into custody during a 1 year period, slightly more than 120 would be classified under this definition of assault weapon. That's approximately 3%; not the 20-50% embellished figures I've been hearing rumored.

Are the majority of these firearms being illegally converted to full automatic machine gun status? The answer is no. Our Unit receives about a dozen guns a year that have been modified or attempted to be modified. Approximately half are failures or completely unreliable. Why? The vast majority of such firearms are difficult to convert and require extensive modification. In the past, the three most common firearms that have been utilized for conversions consisted of: The MAC-10/11 variants manufactured by RPB and SWD; the Uzi carbine and the Colt AR-15.

Why were these the most popular conversions? Not necessarily that the conversion was easy, but the simple availability of substitution machine gun parts. This loophole has now been closed with the passage of the McClure-Volkmer Act of 1986 regarding accessibility of parts.

On the other hand, if any criminal has the intense desire to create a machine gun, any semi-automatic firearm can be used. The National Firearms Act of 1934 (55 years old) prohibits fabrication and possession of unregistered machine guns, silencers, and sawed-off shotguns. The threat of prison does not seem to have deterred the criminal. In fact, we seize more sawed-off sporting shotguns than we do assault weapons. Even common 22 caliber rifles have been converted. An interesting note is that we have never had an AK-47 converted, a TEC-9 converted, and HG&K 91 or 93 converted.

Mr. President, I ask unanimous consent that that testimony be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL TESTIMONY ON ASSAULT WEAPONS, MAY 5, 1989

(By Detective Jimmy L. Trahin, Los Angeles Police Department Firearms-Ballistics Unit)

Ladies and Gentlemen: I'm honored with the privilege of being asked to testify before this Subcommittee hearing regarding the pending legislation dealing with the so-called assault weapons issue.

With 18 years as a law enforcement officer with the Los Angeles Police Department, 12 of those years have been spent as a Detective Training Officer assigned to the Firearms-Ballistics Unit. My vocation and experience in firearms identification has put me in a unique position to witness first hand the realistic, and I repeat, the realistic magnitude of the problems relating to firearms in criminal activity. Although my testimony here is not as an official spokesman for the Los Angeles Police Department, it will be factual, not conjecture, and based on my personal experience and training in the field for nearly two decades.

Since I will endeavor to be realistic, let's address the facts and not myths.

Do we have a large quantity of violent crime involving firearms? The answer is yes.

Do we have a larger quantity of violent crime without firearms involved? The answer is yes.

Have we had an increase in so-called assault weapons being involved in violent crimes? The answer is yes.

I use the term "so-called" assault weapons because somewhere in this recent hysteria these military-style semi-automatic firearms have been mislabeled with the term "assault". The actual definition relates to a selective fire gun capable of semi- and full automatic fire utilizing an intermediate cartridge.

We have definitely seen an increase in the criminal use of these firearms during the past 8 years. We have also seen an increase in quality semi-automatic pistols, shotguns, and other weapons during the same time period.

Are these assault weapons the criminals "weapon of choice"? The answer is no.

We take into custody more handguns, or shotguns, or 22 caliber rifles than any quantity of assault weapons that are seized. From an informal survey that we took on over 4000 guns that were taken into custody during a 1 year period, slightly more than 120 would be classified under this definition of assault weapon. That's approximately 3%; not the 20-50% embellished figures I've been hearing rumored.

Are the majority of these firearms being illegally converted to full automatic machine gun status? The answer is no. Our Unit received about a dozen guns a year that have been modified or attempted to be modified. Approximately half are failures or completely unreliable. Why? The vast majority of such firearms are difficult to convert and require extensive modification. In the past, the three most common firearms that have been utilized for conversions consisted of: The MAC-10/11 variants manufactured by RPB and SWD; the Uzi carbine and the Colt AR-15.

Why were these the most popular conversions? Not necessarily that the conversion was easy, but the simple availability of substitution machine gun parts. This loophole has now been closed with the passage of the McClure-Volkmer Act of 1986 regarding accessibility of parts.

On the other hand, if any criminal has the intense desire to create a machine gun, any semi-automatic firearm can be used. The National Firearms Act of 1934 (55 years old) prohibits fabrication and possession of unregistered machine guns, silencers, and sawed-off shotguns. The threat of prison does not seem to have deterred the criminal. In fact, we seize more sawed-off sporting shotguns than we do assault weapons. Even common 22 caliber rifles have been converted. An interesting note is that we have never had an AK-47S converted, a TEC-9 converted, and H&K 91 or 93 converted, a Valmet M76 converted and so on. An attempted conversion was attempted on one Ruger Mini-14 in the past 12 years I have been in the unit and it didn't work. Why? 99% of these so-called assault weapons are not easily converted.

Who owns the majority of these military-style firearms? The law abiding citizen. I can also categorically state that if you took a survey of police officers in this country, you would find that the vast majority would own at least one of these guns for off-duty personal use.

When a law is passed for societies protection, it must do two things.

(1) It must solve the problem or show realistically that it will accomplish something to curb the problem; and

(2) The people must have respect for the law knowing it is in their best interest.

Considering number 1, does anyone firmly believe that banning assault weapons will curtail the crime problem? Has restrictive gun laws worked here in Washington or New York City? Is there any correlation with strict gun control and a decrease in crime? The answer is no. I've talked to hundreds of fellow police officers and the overwhelming majority agree that banning so-called assault weapons is not going to realistically decrease violent crime, gang activity, or narcotics trafficking.

There's no question that the citizens of this country are frustrated and outraged with the ever increasing crime problem. The reaction by some is to do anything, whether or not it works, and without careful consideration of the consequences. It's wishful thinking and hope that if we control some of these guns, crime will decrease.

Restrictive laws on these so-called assault firearms will be giving the concerned citizen a false sense of security in the belief that crime will supposedly diminish. That's not going to happen. Although it's too early to reach any definitive conclusion, I have observed absolutely no positive effect whatsoever on the crime problem in Los Angeles since the local assault weapon ban was enacted 3 months ago.

Let's consider the second requirement of a law: "The people must respect it".

If a law is passed with the illusion of hope that it will do something, the people must be behind it. Restrictive gun control directed at assault weapons will not strike fear in the hearts of the criminal. I firmly believe, however, that it will have a detrimental impact on the respect for the law by the hundreds of thousands of average citizens who possess these military-style firearms. Law enforcement requires the peoples support. We do not need to create a new class of criminals.

It's unfortunate that we cannot enforce the thousands of gun laws presently existing. We do not have enough police, prosecutors, courts, judges, jails, prisons, or money. The entire criminal justice system is totally inundated. A criminal is lucky to do one third of his sentence in jail. Present gun laws are not being enforced. While testifying in excess of 400 times in firearms related cases during the past 12 years, I have failed to see any significant use of the enhancement laws pertaining to guns involved in crimes. The majority of the time they are not even filed. If filed on, they are reduced

or plea bargained away. Fact: there is no deterrent to using a gun in a crime.

In conclusion, I accept the fact that jumping on the assault weapon ban is the "trendy" thing to do, whether or not it accomplishes something productive. It should be of utmost importance that the consequences of slowly deteriorating the 2nd Amendment to our Constitution be examined.

The problem is not bad guns versus good guns . . . it's the bad guys using any gun in a criminal act with the knowledge that punishment for his actions will not be pursued. It is ludicrous to believe that the pending legislation regarding assault weapons will decrease crime. Based on my experience, I personally feel it will create more problems for law enforcement than it will solve, especially for the law abiding citizen. I urge you to consider my testimony here today.

Thank you.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. DECONCINI. Mr. President, I want to leave the record very clear about the Los Angeles Police Department that has been cited here a couple of times. I want to read into the RECORD a letter from the Los Angeles Police Protective League, composed by police officers of the city of Los Angeles.

This letter happens to be to Senator HOWARD METZENBAUM. I will ask unanimous consent that it appear in the RECORD at a later time.

It says:

DEAR SENATOR METZENBAUM: In response to your inquiry, the Los Angeles Police Protective League supports legislation that would control sales and possession of assault type semi-automatic weapons not only in California but on the federal level as well.

As active members of the National Association of Police Organizations (NAPO), we have supported S. 386 through our NAPO representative and Vice President William Pattison who has testified before the Senate Judiciary Committee on the Constitution. Our Chief of Police, Daryl F. Gates, has also testified as to the need for federal control of semi-automatic assault weapons before the same committee.

We appreciate your efforts to de-escalate the level of violence in our country and to provide law enforcement officers the support they need in providing a safer America for all of our people.

So if he supports that one, he certainly supports this.

Also, Chief of Police Gates testified before the Judiciary Committee. He said:

These weapons, in my judgment, have to go. And I do not have any problem in defining those that are assault weapons. I can tell you because I have had two police officers killed with assault weapons, one very similar to the one that was held up here, an AR-15.

Officer Dan Pratt was killed by an individual in a drive-by shooting who shot at him 15 times, hit him once. That officer would be alive today had he not been confronted with an assault rifle.

Another officer, another drive-by shooting. A MAC-10, an automatic pistol; he was shot at 17 times and hit seven times as he was picking up his little boy from the church school.

What they do is that they just spray and then they have got the firepower to do that spraying, and when they spray, they hit anyone who happens to be there, and they don't really care. We had 240 gang killings last year, 240 in the city of Los Angeles; 60 percent of those that were killed were not gang members.

Mr. President, I do not know anybody that has a stronger support for the second amendment and a stronger political philosophy, quite frankly, in law enforcement than Chief of Police Daryl Gates. He is a strong supporter of this legislation.

Mr. President, I yield 5 minutes to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts [Mr. KENNEDY] is recognized for 5 minutes.

Mr. KENNEDY. Mr. President, I join those that have spoken last evening and earlier today in commending the Senator from Arizona for the amendment which he has seen incorporated into this Democratic crime legislation and for the courage which he has demonstrated in standing by it. Despite the statements that have been made by opponents of this particular provision, I think it is an important provision, and I am very hopeful that it will remain in the bill.

Mr. President, the arguments that have been made against the DeConcini amendment, both last evening and today, go to a number of different arguments. First of all, there are those that say that this kind of amendment violates their notion of a constitutional right to bear arms. We heard that argument yesterday, and we heard it again this morning.

Mr. President, if we are to follow that particular argument to its logical conclusion, then we would permit the sale of machineguns, bazookas and grenade launchers. No one is possibly suggesting that the legislation which is on the books at the present time prohibiting American from owning bazookas and grenade launchers or restricting the sale of machineguns is unconstitutional. We do not hear that. We just hear, if you go after these kinds of assault weapons, it is interfering with gun collectors and with their so-called constitutional rights.

That is hogwash, Mr. President. We have seen, over the last 25 years, where steps have been taken, very modest steps, indeed, in terms of the regulation of certain pistols and rifles. Those statutes have not been struck down by the courts of this country as violating the consitutional right to bear arms. If you go back as far as the 1968 legislation, they have not been struck down. So there is a legitimate mandate for the Congress of the United States to enact legislation to try to protect law enforcement officials and the public.

This amendment has been crafted skillfully, I believe, by the Senator from Arizona, to target the most dangerous types of assault weapons. We hear those who say we want to strike those modest restrictions down because it interferes with the rights of hunters.

What are these characteristics that these so-called hunters want to be able to use? One principal characteristic is that the assault weapon tends to be held at the hip. That makes for a great sporting weapon. I have had the opportunity to hunt in a very limited way, and I have been out there with some hunters. I have not seen those hunters hold their weapons at their hip and spray dozens of rounds of ammunition in a matter of seconds. That says something about a hunter; they are going to brandish an assault weapon and hold it at the hip and spray out the ammunition in seconds. Shorter barrels sacrifice accuracy. Users of assault weapons are not interested in the accuracy. One of these weapons is called the "Streetsweeper." They want to spray their ammunition.

Who is kidding who, that these are sporting weapons, held at the hip, spraying their ammunition out there? They are trying to defend this as a sporting weapon. This is a sporting weapon? In many instances they are readily concealable assault pistols. That is one of the characteristics. How many of those hunting rifles that sportsmen use are readily concealable?

This amendment does not apply to popular hunting rifles, but it applies to some of the most dangerous of the pistols. Some of these assault weapons employ barrel shrouds to cool the weapon during rapid fire. That is really a hunting weapon. I suppose the typical hunter wants to be able to cool that barrel after spraying ammunition across the countryside while hunting. You want to have that barrel shroud out there to cool the weapon during rapid fire. Then you have threaded barrels, which are fitted for silencers. Who in the world is thinking that that is a sporting weapon, Mr. President? That is basically what we are dealing with.

The arguments can be made here that we have to get the criminal off the streets, and all of us are for that. This is why we support the entire Democratic crime package. But we heard that argument a number of years ago, and since that time, we have seen hundreds of thousands and millions of additional weapons out there. Well, they say these gun restrictions do not stop crime. Mr. President, in my own State of Massachusetts that had additional kinds of restrictions on small concealable weapons, some 85 percent of all the weapons

that were used in crimes of violence were obtained outside the State. We are defenseless because individuals are able to go across the borders.

Mr. President, as I said, the kinds of weapons that I just mentioned here are the kind that are included in the DeConcini amendment. Shame on those individuals who say that these are sporting weapons. They are not sporting weapons; they are used in crimes of violence, and they are used in the drug trade. They pose a very substantial threat to the life and the well-being of the police officers of this country. I hope the Senate will not vote to strike this particular amendment. I commend the Senator from Arizona for seeing that it is included in the legislation.

I support the assault weapons provisions in the Democratic crime package. Frankly, I am convinced that we must do more. This proposal in no way restricts the rights of law-abiding citizens to possess or obtain other, legitimate semiautomatic firearms.

But this legislation will reduce the number of deaths and injuries from semiautomatic assault weapons by drug traffickers and other violent criminals.

This proposal would ban a specific list of semiautomatic assault weapons identified by law enforcement as a danger to the community.

The weapons are listed by name, model, and manufacturer. This legislation does not apply to conventional semiautomatic rifles, shotguns, handguns, or popular semiautomatic hunting rifles.

Drug Director William Bennett long ago understood the connection between narcotics and firearms. He was instrumental in the administration's ban on a specific list of foreign-made assault weapons, complied after thorough examination of the issue by BATF experts.

The import ban is a significant step, but it only encompasses 25 percent of the assault weapons in the United States. The remaining 75 percent are made right here and they are just as deadly.

This legislation takes the next step. I would take one additional step and authorize a careful review by BATF of the remaining 75 percent, applying the same exacting standards to those guns that it applied in determining which imports to ban.

Assault weapons put awesome killing power in the hands of drug runners, hate groups, and other criminals. The ease with which these weapons can be obtained is fueling the arms race on the streets of every community in America. Study after study by Cox Newspapers, BATF and others document the growing preference for assault weapons among organized crime and drug traffickers.

The time is long past for Congress to enact legislation to ban the sale and transfer of assault weapons, while protecting the interests of law-abiding citizens.

This legislation has the overwhelming support of our Nation's police, including the 90,000-member National Association of Police Organizations, the International Association of Chiefs of Police, the 200,000-member Fraternal Order of Police, and the other leading law enforcement organizations across this country share those views.

This is literally a matter of life and death for law enforcement.

In Escondido, CA, in December 1987, a diagnosed schizophrenic lied on his Federal gun purchase form about his arrest record, mental condition, and drug use, and purchased an AK-47-type assault rifle. The next day, under the influence of methamphetamines, he used the AK-47 to kill a San Diego County deputy sheriff, wound two other deputies and hold police off during a 12-hour shootout.

In December 1988, a Dallas police officer was killed while making an undercover narcotics purchase. The weapon used was a TEC-9 assault pistol.

Last year, a MAC-11 assault pistol was used by a man in Louviers, CO, to kill himself, but not before he used it to kill a woman and her mother and wound a police officer.

Last August, a New Jersey State trooper was shot four times in the chest and abdomen by drug traffickers wielding a MAC-11 assault pistol.

Mr. President, we should not shortchange the law enforcement community on this issue. They are on the front lines of the war on crime. They know best.

They know what is needed, they asked for this and tougher measures over 1 year ago when a lone gunman opened fire on unsuspecting schoolchildren in Stockton, CA.

Mr. DECONCINI. I thank the Senator from Massachusetts. He has been out on this floor for the 14 years that I have been here, working on this type of legislation. I have not always been supportive of his efforts, because I thought they went too far. But I thank the Senator for speaking today as eloquently as he always does, in getting to the point right away. I thank him for the kind remarks. I also thank the junior Senator from Nebraska for his remarks last night and the senior Senator from Illinois, who spoke on behalf of this legislation.

I ask the Chair how much time I have remaining.

The PRESIDING OFFICER. The Senator has 11 minutes, 17 seconds remaining.

Mr. DECONCINI. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, I have to say that I enjoyed the remarks of the distinguished Senator from Massachusetts, as I always do. He is a very energetic spokesperson for his particular side.

We are not talking about automatic weapons here that you spray the forest with. They are banned already by the law. We have agreed to that long ago. We are not talking about hunting weapons necessarily. There may be some of those that are used for hunting. Most of these weapons are used for collection, for plinking, for target practice, and for just plain good sportsman activities.

Frankly, the honest people who buy these do not use them in criminal activity. If we banned all of those, and all that Senator METZENBAUM called for yesterday, and another 40 that probably would look just as bad as these, you still would not stop the dishonest criminals from using weapons because they can get them overseas even though they are now banned by the President of the United States, five of these nine. You can still get them overseas.

They can still get them in a variety of ways. They can still steal them. I guess you can say if they are not sold, you cannot steal them. The fact is, why do we pass legislation that affects only the decent, honest people, because the crooks, criminals, and vicious people are going to be able to get these, regardless.

I have to take a little issue with Chief Gates. Chief Gates is not one of the great police people who stand up for second amendment rights, to keep and bear arms. Chief Gates is one of the law enforcement leaders in this country who has always, as far as I know, called for gun control. He has always been on the side of gun control.

I am not criticizing his sincerity on that but do not lump him with the vast majority of police officers in this country who do not want gun control, sports people who themselves appreciate having the right to keep and bear whatever arms they want to within the law.

The fact remains that Officer Trahin's testimony shows that the firearms that the distinguished Senator from Arizona is criticizing here today in his bill are not the weapons of choice by criminals. The fact is that the statistics show this. So do not use Chief Gates for us. Chief Gates is always going to be for gun control. We are talking about decent, honest, law-abiding citizens who want to collect these.

I have to say, on the rifles, if you take the metal parts off and replace them with wood parts, you have a

sporting rifle. It is exactly the same gun.

With regard to the machine pistols, they are not used for hunting; they are used for target practice and for collecting.

The honest people are not misusing their weapons. It is the criminals who are. We should go after criminals and not honest people. This bill will make it absolutely burdensome to honest people, to be persecuted as they were before the Firearms Owners Protection Act passed.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. Mr. President, how much remains?

The PRESIDING OFFICER. Two minutes and 47 seconds.

Mr. HATCH. Let me yield 2 minutes to the distinguished Senator from Idaho.

The PRESIDING OFFICER. The Senator from Idaho is recognized for 2 minutes.

Mr. McCLURE. I thank the Senator for yielding.

Mr. President, it is difficult to summarize in a short period of time what the basic arguments are.

Mr. President, the persistent growth of violent crime in this country has given rise to increasingly emotional attacks on the ownership of certain firearms. The response to the scourge of drug crime reminds me of a remark made around the turn of the century when the Nation was embroiled in a railroad strike. Henry Cabot Lodge said to Teddy Roosevelt, "Isn't there something we can appear to be doing?"

Time does not change politicians much, and there are a number of my colleagues who are bent on appearing to do something. By placing restrictions on some firearms, so-called assault weapons, they propose to halt the violence that invariably accompanies illegal drug trade. Now, if we are dealing with appearances, it is easy to frighten the public with lurid visions of superguns, guns that turn Sunday School teachers into maniacal drug lords.

Mr. President, we are dealing here with a perception so superficial that it amazes me that any thoughtful person can accept it. We have a myopic pursuit of the public perception of legislative responsiveness—even if the response is misguided or misinformed. Any firearm has the potential for misuse. Any firearm can be safely and lawfully used. Are we to assume that if, say, the Senator from Arizona or the Senator from Ohio, or the Senator from Massachusetts came to possess a MAC-10, none of us in this body would be safe? Would actually touching and holding this sinister looking firearm turn these gentlemen into dangerous criminals? Of course not. The very notion is absurd. On the other hand, there are many violent criminals who are a danger whether armed or unarmed. Semiautomatic technology has nothing whatever to do with the human psyche, which is where crime and violence truly have their source. As I understand, Cain did not shoot Abel with an assault rifle.

It is appearance, Mr. President, that make a MAC-10 different from many hunting rifles. And based on that appearance alone, some of my colleagues are prepared to impose senseless restrictions on the millions of American firearms owners who use semiautomatics for hunting, target shooting, collecting and home protection. I have heard it said that none of us need this type of firearm. How peculiar that honest people should be required to justify the practice of a constitutional right! What kind of a country would this be if we were obliged to prove the necessity to practice our religion, or state our views?

No, I believe, like Thomas Jefferson, that:

> Our legislators are not sufficiently apprised of the rightful limits of their power; that their true office is to declare and enforce only our natural rights and duties, and to take none of them from us.

And:

> No freeman shall be debarred the use of arms within his own lands.

The very first shot of the Revolution was fired because the Government was sending its troops to disarm the colonial citizenry and render them helpless against the excesses of Parliament.

The criminals, especially the street criminals and dope dealers that the police fear, obtain their weapons illegally in the first place. Many fully automatic assault-type weapons used in crime are smuggled in from Central America with the dope. We have been unable to prevent millions of illegal aliens and tons of illegal narcotics from entering our country each year. How would a new law which punishes honest people for the crimes of others do anything but set up a more vigorous black market in guns, and further enrich the underworld kingpins in our country.

It is particularly ironic that convicted felons would not be affected by the registration scheme set forth in this bill. The Supreme Court has ruled that convicted felons are exempt from registering their guns, even machineguns. *Haynes* v. *U.S.*, 309 U.S. 85.

Mr. President, the requirements for obtaining a 4473 for all semiautomatic firearms listed in this bill are a bureaucrat's dream. The practical impossibility to complying with these standards ought to be immediately evident. This bill also would require anyone who sold such a firearm to maintain records concerning every subsequent sale. This is absurd. This has nothing to do with public safety. It is nothing more or less than unwarranted harassment of honest firearms owners.

And after all this flurry of paperwork, we are not one step closer to solving real, violent crime. We have simply created a new, nonviolent crime. Legislation produced under emotional pressure is rarely effective and frequently does more harm than good. The answer lies not in appearing to do something about semiautomatic firearms," but in doing something about criminality and criminal behavior.

Mr. President, what we are really dealing with is the appearances rather than the facts. I do not know whether the assault rifle which I own is illegal or not, or immoral or not. It happens to be my favorite hunting rifle. It is a 1903 A-3 .30-06, which I bought a number of years ago in a military conformation. It is suggested if it holds a bayonet it is unacceptable. This military rifle I have still has a bayonet lug on it. I assume it makes me half guilty.

I own more than one semiautomatic. The first rifle I bought as a young man was a .22 semiautomatic. I hope that does not make me a criminal.

I own a semiautomatic pistol that my father carried when he was prosecuting attorney back in the prohibition days. When out raiding stills, it was thought necessary to have a firearm to protect yourself. He carried that semiautomatic pistol which I still have. I take some pride in it. I hope that does not make me immoral or a criminal.

The whole thrust of this legislation that we seek to strike from the bill today is against law-abiding citizens like myself. It does not affect criminal activity. it has almost no relevance to the incidence of crime and will have almost no impact on drug-related crime at all, as the statistics show, and as has been said over and over again on the floor of the Senate and in the committee hearings before this body and the other body. We are talking about a myth, not a fact.

I hope the Hatch amendment is adopted and that we again refocus our attention as we had to do earlier against violent crime, not against the means which some people believe might be used in violent crime.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HATCH. I reserve the remainder of my time.

I ask the distinguished Senator from Arizona if he could yield 5 minutes to me.

The PRESIDING OFFICER. The Senator from Arizona has 11 minutes and 10 seconds remaining.

Mr. DECONCINI. I am glad to yield.

Mr. HATCH. Frankly, unless the distinguished Senator has anything to add, I am happy to let that time run.

Mr. DECONCINI. Mr. President, for purposes of someone getting here at 10:30 a.m. or being able to get here to the vote, I will only say I have to take exception with the distinguished Senator and friend from Idaho that there is no evidence that these guns are owned just by law-abiding citizens. These guns are found in criminals' hands. They are used by drug dealers, and there is no question about it.

The Senator raises a good point. He says, number one, it is a myth that this legislation is going to do anything about stopping criminal activity. When asked the question, is this legislation going to stop the drug dealers from killing our police and innocent people, I do not know. I do not know.

What it does do is put a ban on these selective guns now that are continuously coming forward when the police make arrests on drug cases and it says during that period of time that that ban is there, for the first 18 months the Justice Department will do a comprehensive study of all crime throughout the country dealing with where guns are involved and see whether or not there are less of these guns confiscated.

If it does not work, what have we lost? We have lost 3 years and the loss of this gun. And if it does not work, it automatically goes back on the shelf.

If that study is overwhelming, then this body will have to face this issue again. It is not going to go away. It is not permanent law. It has a sunset provision. How much more protection can you give to the law-abiding citizens, to the hunter, to the target shooter? I do not know what else we can do if we really want to attack this problem of these guns in the dangerous hands of drug dealers. I think this bill does it without infringing on those second amendment rights.

I yield the floor.

The PRESIDING OFFICER. The Senator from Utah controls no additional time.

Mr. DECONCINI. I yield 5 minutes to the Senator.

The PRESIDING OFFICER. The Senator from Utah is recognized for 5 minutes chargeable to the Senator from Arizona.

Mr. HATCH. Mr. President, I appreciate my esteemed colleague from Arizona yielding to me. I know he is sincere in making his arguments. I have to admit these weapons have appearances that look as if they could cause great difficulty. If you can change the stocks on those weapons and hand grips, you basically have sporting rifles. It is the same action, same approach that the semiautomatic weapons use. We are not dealing with automatic weapons.

Second, I think a point we really have not emphasized enough is this bill is another bureaucratic nightmare for the wrong people. The only people that this bill is going to affect will be decent, law-abiding, honest collectors, plinkers, target shooters, sports people. Frankly, they are not out there spraying the countryside with bullets, except in target practice. They love these guns and they love to own them and they love to show them. They love to exchange them among legitimate sporting people.

I happen to not own any of these. The fact of the matter is, I would not mind owning some of them because they are nice weapons. But, I do own guns that would fit in the category of assault weapons that are legitimate hunting guns.

This is a bureaucratic nightmare that comes down on the wrong people. It is not going to do a doggone thing about criminal activity in this society, not going to do a doggone thing about stopping guns going to criminals. They are going to get them anyway, and they are not going to comply with the registration requirements of this particular bill. They are not going to comply with them.

The fact of the matter is decent, law-abiding citizens are going to be hauled into court, charged with Federal crimes, have to hire attorneys, have to defend themselves, and if they get convicted can never own a gun again. And they are going to be fined at a $1,000 rate, plus 6 months in jail.

Why? Because they failed to file a form or, in some cases, failed to get the form from somebody who will not give it to them.

It is not simply going down to a gun shop and asking them for a form to fill out. It is under certain circumstances but not under others.

So, Mr. President, if it did something to the criminals, maybe there would be an argument here. It only does bad things to the honest sports people. When we came up with the Firearms Owner's Protection Act, the whole impetus driving that act was we were tired of sports people being abused by the Federal Government, under the most technical, ridiculous circumstances.

That is what this does. And it is offensive to sporting people around this country. Frankly, if you really ask the law enforcement officers, the rank and file around this country, the vast majority of them would disagree with Officer Gates, who was always for gun control.

He has a right to be for that. I am not going to criticize him for that. Certainly the distinguished Senator from Massachusetts has a right to feel the way he does, more than almost anybody. The fact of the matter is, it still does not justify picking on the decent, law-abiding citizens of this country who want to collect, target shoot, plink, and, yes, use these guns for hunting if they want to. It is legitimate to hunt.

I just get tired of the Federal Government, with these types of rules and regulations coming in, making it difficult for everybody. That is what this bill does. That is the problem.

More than that, if this happens to stay in this bill and it does happen to become law, I guarantee that is just step No. 1, and everybody knows it. That is why these are fought so hard. Because every time they get one little inch, they will try to take another yard the next time you turn around.

So that is why we have to stand up as sports people and say: Hey, no more of this. Let us not pick on those who are honest, decent people. Let us go after the criminals, and let us do it with tough, criminal laws, which, by the way, S. 1970 is not. That is why we are going to debate that plus habeas corpus reform right after this vote takes place, and we will show it is not a tough law.

Let us go after the real criminals, the people who are wrecking our society, and let us not pick on the honest sports people.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. DECONCINI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator controls 2 minutes and 8 seconds.

Mr. DECONCINI. I want to thank Karen Robb, Dennis Burke, and others in my office for the effort and work they have given here, and also I want to thank a number of Senators who have worked with their colleagues here to make the arguments the last couple of days in support of this bill.

Mr. President, I think we are very close to winning this victory today. I hope Members who have not decided, as they walk in here, will take a look

at these weapons, take a look at these organizations.

The statement has been made the line police officer does not support this. I take exception that these organizations do not represent the vast majority of their members. These are law enforcement organizations, for the most part. These are the police and the cops on the street. These are the ones who say we have to have some support from you legislators in Washington, DC. Many of them are members of the NRA, and other second amendment rights organizations.

Mr. President, it is a tough vote for some. I understand that. I have been down that road, believe me, on this issue as well. But it is a safe vote because it is the right vote.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCAIN. Mr. President, I rise today in opposition to Senate bill 1970 and in support of the Hatch amendment. We have all heard arguments on both sides of this issue and the preponderance of evidence demands that we reject this kind of firearms law. We've had testimony from the Justice and Treasury Departments, as well as an expert at the Smithsonian Institution, to the effect that military-style semiautomatic rifles are different only in appearance from millions of other semiautomatic rifles, shotguns, and handguns. We have seen the record of gun control and it is a record of crime fighting failure. Assuming that criminals will abide by gun restrictions is dangerously naive. The District of Columbia is the best example of the effect of gun ban laws. The District has some of the strictest gun control laws in the Nation, yet today our Nation's Capital is known as the "Murder Capital."

We have also heard from our constituents and their message, at least to me, is clear: they oppose unworkable, ineffective gun bans and instead are demanding reform of a woefully inadequate criminal justice system.

I am going to vote against this gun ban proposal, and I encourage my colleagues to do so as well. Before you cast your votes, I ask you to remember the Constitution and the bill of rights. That truly remarkable document has stood as our guide for more than 200 years and must continue to do so. While debating anticrime bills, the Senate has discussed at length the fourth amendment right against unreasonable search and seizure, the sixth amendment right to counsel, and the eighth amendment right against cruel and unusual punishment. It is time that we discuss the second amendment as we debate another gun control proposal.

It is clear from the speeches and letters of the day and the Constitution itself that the Founding Fathers included the right to freely choose to own and use arms in the bill of rights—a document guaranteeing individual liberties and freedoms. Men like James Madison, Thomas Jefferson, and Patrick Henry recognized the political importance of the citizenry's ability to bear arms, a premise which has carried on into the 20th century. In the early years of World War II thousands of private citizens, the militia if you will, brought their own arms when they volunteered for service. Thousands more rifles, shotguns, and handguns were sent to England to arm the citizenry in preparation for a Nazi invasion. Yes, the Founding Fathers were remarkably farsighted when it came to the political right of private citizens to own arms. One need only look to the Soviet's desire to disarm the freedom seeking Baltic populace to understand this.

It is also clear that those who helped build this country recognized sport, recreation, hunting, collection, and self-protection as legitimate reasons for possessing arms. What we must acknowledge is that today's semiautomatic firearms are just as protected as their forebears—muskets and pistols—were in 1789. Constitutional rights do not change because of technological advancements—radio and television are protected by the first amendment though neither existed 200 years ago. Similarly, semiautomatic firearms are protected by the second amendment, and 20 million Americans have exercised their rights and possess such a firearm.

A vote for S. 1970 or other restrictive proposals will not affect criminals or reduce the violent crime rate. A vote for S. 1970, however, will deny millions of Americans choice and in doing so will violate the bill of rights that so many Americans have fought to preserve.

Finally, another point should be made. No citizen has the right to abuse their second amendment right to bear arms. Anyone who breaks the law, anyone who uses a firearm in a crime, can be and should be fully punished under the law. Law abiding gun owners should not be asked, however, to give up their rights because of criminals—criminals who would ignore gun control laws anyway. I hope that the advocates of these restrictive gun control amendments would advocate victim's rights and stronger criminal law-enforcement against the perpetrators of crime, rather than bills that restrict the constitutional rights of law-abiding citizens. For unless we crack down on criminals and get them off the streets, we cannot solve the problem that legitimately concerns American society.

Mr. BYRD. Mr. President, a crime epidemic is sweeping across our country today. This epidemic has become so common and so pervasive that many Americans cannot remember the days when families could sit on their front porches without fear of harassment by drug dealers, when one could walk down public streets at night without fear of being robbed or mugged, and even killed. In those days, young mothers allowed children to play freely in public parks, and one could drive down a street at night without the fear of getting lost and wondering how safe it was to stop and ask directions. I remember when seeing a policeman patrol a local school was strange; now it is a common, daily occurrence.

Crime and adjusting to the fear of crime have become a way of life for many. I am saddened to listen to the nightly news and hear of criminals snuffing out innocent lives. I read of young men being viciously murdered for a pair of Nike sneakers, a leather jacket, or $20.

The statistics that support the growing crime rate are appalling. For example, in 1951, New York tallied 244 homicides. In 1989, that number reached nearly 1,900. Here in the District of Columbia, murders average close to one a day. Nationally, in 1951, there were 3.2 policemen for every felony committed in the United States; this year nearly 3.2 felonies will be committed per every police officer.

I know, Mr. President, that something has to change. We have to stop the crimes that are distorting and disrupting the way of life for so many innocent, law-respecting Americans.

The bill that we are debating today attempts to do just that. The anticrime measure before us attempts to provide a comprehensive approach to fighting the crime epidemic so prevalent in America today. By expanding death penalty offenses, limiting the number of Federal appeals, and permitting the use of illegally seized evidence under certain circumstances, we are upping the price of criminal acts.

What is especially important in this measure, however, is the provision that would make it more difficult for criminals to obtain the weapons that are wreaking the havoc across our country today. The antiassault weapon language contained in S. 1970, would prohibit the transfer, shipping, receiving, transport, or possession of nine specific assault weapons. On July 7, 1989, by Executive Order, the President permanently prohibited the importation of 43 types of semiautomatic weapons. Even though these weapons are banned from being imported, man-

ufacturers here in the United States have turned to producing and selling virtual copies of the banned weapons. The language in this bill would ban that practice by prohibiting the shipping, receiving, possession, or transfer of nine of the most common types of assault weapons.

This weapon ban is desperately needed. Such a ban will make it less convenient for criminals to disturb, harass, and assault innocent families and individuals. The Judiciary Subcommittee on the Constitution heard oral testimony on the merits of banning assault weapons in May 1989. The committee was told that assault weapons are involved in virtually every drug seizure taking place today along the Southwest border of the United States. A study conducted by the Atlanta Journal concluded that an assault weapon is 20 times more likely to be used in a crime than is a conventional firearm. The same study indicates that even though assault weapons account for less than 1 percent of the total number of firearms privately owned, these weapons surfaced in approximately 30 percent of all firearms traced to organized crime, including drug cartel activity, gun trafficking, and crimes committed by terrorists in the United States during 1988 and the first quarter of 1989.

Mr. President, I want everybody to grasp a distinction here. The nine assault weapons listed that would be banned by this legislation are not rifles for sportsmen, nor are they hunting rifles or weapons commonly used by law-abiding citizens to protect their lives or property. These guns are semiautomatic assault weapons. They have names like "streetsweeper," "bushmaster," and "commando." In a civilized society, nobody needs to own such an assault weapon. The only individuals who need these weapons are criminals, especially drug dealers. These are the weapons that allow the criminals to be better armed than our police officers. The average citizen does not keep a streetsweeper or a MAC-11 by his bedside to protect his life or property.

Now, I have always opposed any measure that would lead to the confiscation of guns used for sports or hunting purposes, or the confiscation of guns used by law-abiding citizens for the protection of life and property, and I will continue to oppose such measures. However, there is no need for private citizens to own assault weapons.

Contrary to the assertions of some, the vote on this measure is not a vote on gun control—it is a vote on crime control. The law enforcement community including the National Association of Police Organizations, Inc., representing well over 100,000 rank-and-file State and local police officers vigorously support this language. It is time for us to stop supporting our criminals and start supporting the law enforcement community. To win the war on crime, they need our help. I hope that my colleagues will join me in supporting the fight against crime and remain firm on keeping the assault weapon language in S. 1970.

Mr. SYMMS. Mr. President, I rise in strong support of the Hatch motion to strike the DeConcini gun ban included in the pending legislation. With only technical changes, title IV of S. 1970 is the same language offered by the senior Senator from Arizona and approved last year by the Judiciary Committee on a 7-6 vote with one member absent. It bans 14 specific semiautomatic firearms and would make criminals of American citizens who seek to purchase or transfer any of the more than 600,000 of those guns currently owned in the United States. It is not crime control; it is gun control, pure and simple, and it would not be included in any true crime control package.

All of us, Mr. President, are shocked and outraged when horrible crimes like the Stockton and Louisville tragedies occur. Our hearts go out to the victims and our anger toward the violent perpetrators who commit such acts runs deep. We all feel a need to do something in hopes of preventing such acts in the future. S. 1970 is not the answer, and even if the Senate strikes the gun ban lanaguage, as I expect we will do shortly, the remaining bill will require serious revision before it will truly be useful in getting criminals off the streets.

I have had an opportunity to review yesterday's debate on the gun ban, and one question sticks in my mind—who will be affected by this bill? That is the crux of this debate. The Justice Department tells us that criminals, the very persons we want to control, do not acquire guns through legitimate channels. Instead, they acquire firearms and other contraband through the black markets which exist across the country. Moreover, law enforcement statistics show that military-style semiautomatic firearms are rarely featured in crime. In fact, evidence from cities like New York, Los Angeles, Washington, DC, and San Francisco indicates that semiautomatic military-style firearms play a miniscule role in overall violent crime.

Some have said the semiautomatic mechanism is the problem and it should be banned. I can assure my colleagues such a proposal would not be accepted lightly by the 20 million Americans who own a semiauto rifle, shotgun, or handgun. Why do so many Americans own these guns? Sport, recreation, collection, and self-defense. And approximately 3 million semiauto military-style rifles are owned by law-abiding citizens for exactly the same reasons.

This legislation by its very nature can only affect honest citizens. The DeConcini language in this bill requires private citizens to keep records of the firearms they own—and any subsequent transfer of a listed gun—for the Government for the first time in U.S. history. The enforcement nightmare created by this provision is truly mind-boggling. Does anyone envision local law enforcement officers checking gun owners at target ranges or gun clubs for their 4473 forms? Are BATF or Treasury agents going to attend rifle competitions like the national matches at Camp Perry to inspect the records of the competitors? I hope not; the law enforcement community has far greater concerns to deal with.

On the other hand, does anyone expect criminals who may possess a prohibited firearm to keep the records required using 4473 forms? If the purpose of the bill is to punish criminals, why then is the penalty a misdemeanor? Is that to make S. 1970 less objectionable to our constitutents as we try to explain our position and vote? One fact I can attest to is that whatever the penalty for not keeping records, criminals will not comply or be deterred from acquiring guns illegally. Only swift, sure, severe punishment for using a firearm will help reduce gun use in crime; and those laws are already on the books. What we have to do is enforce them.

I strongly encourage my colleagues to vote for the Hatch motion to strike, and let us get on with the demanding work necessary to shape S. 1970 into a true crime control package.

Mr. MITCHELL. Mr. President, I will vote against the effort to strike the firearms provision from the crime bill.

I do so, not because it is the entire answer to violent crime in our Nation, but because it is a reasonable, moderate and feasible recognition that our Nation can accept some limits on firearms ownership when the firearms in question have no valid hunting or sporting purpose.

We already limit the ownership of machineguns, because they have no valid hunting or sporting purposes. We should also do so with the firearms specified in this legislation, because they too have no valid hunting or sporting purpose.

President Bush endorsed this view last year when he barred the importation of 43 types of assault weapons which were determined to have no valid hunting or sporting purpose.

The effect of the language in the bill before us is to conform U.S. domestic law to the action President Bush took with respect to imported weapons.

The bill goes directly to and is limited to only the firearms specifically named in the law.

These are listed by name: Norinco, Mitchell, and Poly Technologies Avtomat Kalashnikovs, all models; Action Arms Israeli Military Industries UZI and Galil; Beretta AR-70 [SC-70]; Colt AR-15, and CAR-15; Fabrique Nationale FN/FAL, FN/LAR, and FNC, MAC-10 and MAC-11; Steyr AUG; Intratec TEC-9; and Streetsweeper/Striker 12.

The claim that this law would limit ownership or use of regular hunting rifles is entirely false. By its specific language, it does not affect any weapons other than those listed by name.

The claim that this specific list somehow reaches to all long-arms is an example of the use of misleading rhetoric and overstatement. It is false. The law would reach precisely what is listed and nothing more.

The legislation further requires that an 18-month study be undertaken to determine if the reduction in supply of these weapons has an effect on the firepower that our police face on the streets every day.

What the opponents of this legislation do not like to acknowledge is that they are helping make our streets unsafe for our police.

Despite their law-and-order rhetoric, the opponents of this legislation are making sure that our police continue to be outgunned as they try to protect all of us from criminals.

The facts are simple: These weapons—not hunting rifles or target rifles—but these military-style semiautomatic weapons make up less than one-half of 1 percent of the firearms currently owned in our Nation.

Fewer than 1 gunowner in 200 even owns one of these weapons; 199 gunowners out of every 200 do not own them, have seen no need to buy them, and do not use them. That is the fact.

But the aspect of that fact which disturbs our police is that although the actual number of these guns in circulation now is minimal, they account for almost a third of all the weapons traced to organized crime, terrorism, and gun trafficking.

The testimony of American police officers from virtually every State of the Union supports this point.

Police officers use and respect firearms. Many of them are hunters and sportsmen in their free time. Yet the vast majority of police officers support efforts to limit the availability of these weapons.

There is a simple reason for that. The difference to a policeman facing a suspect with a handgun or a suspect armed with the equivalent of a military weapon is the difference between police work and guerrilla warfare.

We should not be tolerating a situation in which our police fear for their lives because the weapons wielded by drug gangs are more powerful than the weapons the police themselves are allowed to use. Those who are so loud in their protestations of support for our police need to think about that.

We are sending dedicated police, men and women, into the streets of our cities to face the equivalent of warfare because a very vocal special interest wants to exert an extreme position on the ownership of firearms.

I am aware of the concerns that some have raised about the precedent of interfering with the legitimate rights of law-abiding Americans to own and use firearms legally. I am also aware that some have sought to exploit those concerns by claiming, incorrectly, that this legislation threatens the ownership of semiautomatic hunting weapons.

Efforts to misinform hunters and sportsmen are nothing new in this field, unfortunately. We saw the same misinformation efforts launched against the penetrating ammunition that made police body armor useless.

We saw the same misinformation when we began the effort to prevent the widespread development of firearms that could defeat detection by metal detectors at airports and other public places vulnerable to armed terrorists.

So in order to counteract the misinformation, let me clearly state now: This bill will have no effect on any legitimate sportsman in the State of Maine or elsewhere. It will not prevent the purchase, ownership or legal use of any semiautomatic hunting weapon.

Those whose fears have been raised by the misinformation campaign about this legislation should ask themselves if their rights have been infringed by the ban on cop-killer bullets or plastic guns. Have Americans become less free since those laws took effect? The answer, obviously, is no. We have simply recognized that current-day threats demand laws that reflect current realities.

Our Nation has accepted restrictions on the private ownership of machineguns with no apparent loss of individual liberty. Most of our States require permits for concealed weapons.

Most of our States have firearms laws of various kinds on the books. And most Americans who own and use firearms legally find those changes in our society acceptable.

In Maine, for example, possession or use for sporting purposes of semiautomatic firearms with magazine capacities of more than five cartridges is barred by State law. I have never met a Maine sportsman who believes that a hunter needs more firepower than that. Maine's law enforcement officers have never had to prosecute a person for using such equipment in hunting.

The Maine law and Maine experience reflect the overwhelming truth about semiautomatic assault-style weapons. They are not weapons used by sportsmen or hunters. They are not firearms for hunting. And in Maine, their use for such a purpose is illegal.

So the question remains: What value do we serve by retaining the ready availability of such firearms?

I am also aware that this legislation, by itself, will not solve the problem of violent crime or halt the criminal misuse of firearms in our society.

But no action, by itself, will solve that problem. And if we subject every proposal to the test of perfection, we would do nothing at all in the face of crime and the misuse of firearms.

The legislation is moderate, limited, and specific in its reach and its intent. It does not do more or promise more than a modest reduction in the firepower that our police must face on the streets each day.

It will not take from any legal owner of these weapons the right to own them. It does not prohibit the legal transfer of these weapons between law-abiding collectors. Its paperwork requirements are not onerous.

And unlike the slogans of its opponents—which provide no answer to any of the real-world problems—this legislation contains a self-correcting feature.

If it cannot be shown to have reduced the criminal circulation of these guns in 3 years, it will automatically cease to have effect.

If it does show a reduction in the criminal circulation of these weapons, Congress and the public will have the opportunity to debate again the value of allowing them to be readily available.

Maine is the home of more hunters per capita than virtually any other State in the Union. Maine's hunters and sportsmen know my voting record in strong support of the constitutional right to bear arms. Maine's hunters and sportsmen can distinguish between reasonable laws and unreasonable restrictions on their rights.

If I thought this measure would infringe unreasonably on any Maine hunter, I would not support it. But careful examination of the law—not the false claims made about the law, not the hysterical rhetoric about what might happen—careful examination of the law itself persuades me it will not harm the interests of any law-abiding hunter in Maine or any other State.

Accordingly, I will support its retention in the bill.

Mr. LEVIN. Mr. President, earlier in this debate, I voted against the Metzenbaum amendment on assault weapons. That amendment would have expanded on the provisions of the DeConcini assault weapons bill by adding 12 more types of guns to the list of banned weapons, among other provisions. I voted against that amendment because I was concerned that some of the guns on that expanded list could have legitimate uses in sports

and recreation. I do not believe in banning guns that are used legally and responsibly by hunters and other sportsmen.

I do favor the DeConcini bill, however. It achieves a reasonable balance between the legitimate interests of hunters and sportsmen and the compelling need to protect the public and law enforcement officers from dangerous assault weapons with no legitimate purpose except mayhem. I will, therefore vote against the Hatch amendment to strike the DeConcini language from the bill.

The PRESIDING OFFICER. All time has expired. Under the previous order, the question now is on agreeing to the amendment of the Senator from Utah. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

The result was announced—yeas 48, nays 52, as follows:

[Rollcall Vote No. 103 Leg.]

YEAS—48

| | | |
|---|---|---|
| Armstrong | Garn | McClure |
| Baucus | Gorton | McConnell |
| Bingaman | Gramm | Murkowski |
| Bond | Grassley | Nickles |
| Boschwitz | Hatch | Pressler |
| Breaux | Heflin | Reid |
| Bryan | Heinz | Roth |
| Burns | Helms | Rudman |
| Coats | Hollings | Sanford |
| Cochran | Humphrey | Shelby |
| Cohen | Johnston | Simpson |
| Danforth | Kasten | Specter |
| Domenici | Lott | Stevens |
| Durenberger | Lugar | Symms |
| Exon | Mack | Thurmond |
| Ford | McCain | Wallop |

NAYS—52

| | | |
|---|---|---|
| Adams | Fowler | Mikulski |
| Akaka | Glenn | Mitchell |
| Bentsen | Gore | Moynihan |
| Biden | Graham | Nunn |
| Boren | Harkin | Packwood |
| Bradley | Hatfield | Pell |
| Bumpers | Inouye | Pryor |
| Burdick | Jeffords | Riegle |
| Byrd | Kassebaum | Robb |
| Chafee | Kennedy | Rockefeller |
| Conrad | Kerrey | Sarbanes |
| Cranston | Kerry | Sasser |
| D'Amato | Kohl | Simon |
| Daschle | Lautenberg | Warner |
| DeConcini | Leahy | Wilson |
| Dixon | Levin | Wirth |
| Dodd | Lieberman | |
| Dole | Metzenbaum | |

So, the amendment (No. 1681) was rejected.

Mr. DOLE addressed the Chair.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Republican leader.

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum has been suggested. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DIXON). Without objection, it is so ordered.

Mr. DOLE. Mr. President, I move to reconsider the vote on the Hatch amendment, No. 1681. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The majority leader.

UNANIMOUS-CONSENT AGREEMENT

Mr. MITCHELL. Mr. President, I ask unanimous consent that the vote on the motion to reconsider the Hatch amendment occur at 1:30 p.m. today; that under the previous order the Senate now proceed to consideration of the Graham amendment and that the agreement governing debate and disposition of that amendment be modified to permit the interruption thereof at 1:30 for the vote on the motion to reconsider made by the Senator from Kansas.

The PRESIDING OFFICER. Is there objection?

The majority leader.

Mr. MITCHELL. Mr. President, I modify my request. Under the previous order, the Graham amendment will be accepted by voice vote and then the Senate will be on the Thurmond amendment. So I modify it to state that the Senate will be considering the Thurmond amendment, and the previous order be modified to permit interruption of the debate on that amendment at 1:30 for the vote on the motion to reconsider.

The PRESIDING OFFICER. Is there objection to the unanimous request of the majority leader?

Mr. METZENBAUM. Reserving the right to object, and I have no intention of objecting, is it my understanding that no quorum call could be put in prior, in order to preclude the vote occurring at 1:30, and that no quorum call could be put in at 1:30?

Mr. MITCHELL. Mr. President, we have an understanding that the vote will occur at 1:30.

Mr. METZENBAUM. I thank the majority and minority leader.

Mr. DOLE. I ask one additional request; if in fact the motion to reconsider prevails, that there be an immediate vote on the amendment?

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I renew my request.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the majority leader?

Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I thank my colleagues and the distinguished Republican leader, the managers, and other Senators.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LIEBERMAN). Without objection, it is so ordered.

Mr. BIDEN. I yield the floor.

The PRESIDING OFFICER. The Chair recognizes the Senator from Florida.

Under the previous order the Senator from Florida [Mr. GRAHAM] is now recognized to offer an amendment.

AMENDMENT NO. 1686

(Purpose: To reform habeas corpus procedures)

Mr. GRAHAM. Mr. President, I send an amendment to the desk, which will be in the form of a modification to title II of the bill now pending.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Florida [Mr. GRAHAM], for himself, Mr. DECONCINI, and Mr. BRYAN, proposes an amendment numbered 1686.

Mr. GRAHAM. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike title II of the bill and insert the following:

TITLE II—HABEAS CORPUS REFORM

SEC. 201. SHORT TITLE.

This title may be cited as the "Habeas Corpus Reform Act of 1990".

SEC. 202. SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES.

(a) IN GENERAL.—Part IV of title 28, United States Code, is amended by inserting immediately following chapter 153 the following new title:

"CHAPTER 154—SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES

"Sec.

"2256. Prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment

"2257. Mandatory stays of execution; duration; limits on stays of execution; successive petitions

"2258. Filing of habeas corpus petition; time requirement; tolling rules

"2259. Certificate of probable cause inapplicable

"2260. Counsel in capital cases; trial and post-conviction; standards

**"§ 2256. Prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment**

"(a) This chapter shall apply to cases arising under section 2254 of this title brought by prisoners in State custody who are subject to a capital sentence. It shall apply only if subsection (b) is satisfied.

"(b) This chapter is applicable if a State establishes by rule of its court of last resort or by statute a mechanism for the appointment, compensation, and payment of reasonable fees and litigation expenses of competent counsel consistent with section 2260 of this title.

"(c) No counsel appointed pursuant to subsection (b) to represent a State prisoner under capital sentence shall have previously represented the prisoner at trial or on direct appeal in the case for which the appointment is made unless the prisoner and counsel expressly request continued representation.

"(d) The ineffectiveness or incompetence of counsel appointed under this chapter during State of Federal collateral post-conviction proceedings shall not be a ground for relief in a proceeding arising under this chapter or section 2254 of this title. This limitation shall not preclude the appointment of different counsel at any phase of State or Federal post-conviction proceedings.

**"§ 2257. Mandatory stays of execution; duration; limits on stays of execution; successive petitions**

"(a) Upon the entry in a court of record of an order pursuant to section 2260 of this title, a warrant or order setting an execution date for a State prisoner shall be stayed upon application to any court that would have jurisdiction over any proceedings filed pursuant to section 2254 of this title. The application shall recite that the State has invoked the post-conviction review procedures of this chapter and that the scheduled execution is subject to stay.

"(b) A stay of execution granted pursuant to subsection (a) shall expire if—

"(1) a State prisoner fails to file a habeas corpus petition under section 2254 of this title within the time required in section 2258 of this title; or

"(2) upon completion of district court and court of appeals review under section 2254 of this title the petition for relief is denied and—

"(A) the time for filing a petition for certiorari has expired and no petition has been filed;

"(B) a timely petition for certiorari was filed and the Supreme Court denied the petition; or

"(C) a timely petition for certiorari was filed and upon consideration of the case, the Supreme Court disposed of it in a manner that left the capital sentence undisturbed; or

"(3) a State prisoner under capital sentence waives the right to pursue habeas corpus review under section 2254 of this title—

"(A) before a court of competent jurisdiction;

"(B) in the presence of counsel; and

"(C) after having been advised of the consequences of his decision.

"(c) If one of the conditions provided in subsection (b) is satisfied, no Federal court thereafter shall have the authority to enter a stay of execution or grant relief in a capital case unless—

"(1) the basis for the stay and request for relief is a claim not previously presented by the prisoner in State or Federal courts, and the failure to raise the claim is—

"(A) the result of State action in violation of the Constitution or laws of the United States;

"(B) the result of the Supreme Court recognition of a new Federal right that is retroactively applicable; or

"(C) based on a factual predicate that could not have been discovered through the exercise of reasonable diligence; and

"(2) the facts underlying the claim would be sufficient, if proven, to undermine the court's confidence in the jury's determination of guilt on the offense or offenses for which the death penalty was imposed, or in the validity of the sentence of death.

**"§ 2258. Filing of habeas corpus petition; time requirement; tolling rules**

"(a) Any petition for habeas corpus relief under section 2254 of this title must be filed in the appropriate district court not later than 365 days after the date of filing in the State court of last resort of an order issued in compliance with section 2260(a)(2) of this title.

"(b) The time requirements established by this section shall be tolled—

"(1) from the date that a petition for certiorari is filed in the Supreme Court until the date of final disposition of the petition if a State prisoner seeks review of a capital sentence that has been affirmed on direct appeal by the court of last resort of the State or has otherwise become final for State law purposes;

"(2) during any periods in which a State prisoner under capital sentence has properly filed request for post-conviction review pending before a State court of competent jurisdiction which period shall, if all State filing rules are met in a timely manner, run continuously from the date that the State prisoner initially files for post-conviction review until final disposition of the case by the State court of last resort, and further until final disposition of the matter by the Supreme Court of the United States, if a timely petition for review is filed; and

"(3) during an additional period not to exceed 90 days, if counsel for the State prisoner—

"(A) moves for an extension of time in the United States district court that would have proper jurisdiction over the case upon the filing of a habeas corpus petition under section 2254 of this title; and

"(B) makes a showing of good cause for counsel's inabilty to file the habeas corpus petition within the 365-day period established by this section.

**"§ 2259. Certificate of probable cause inapplicable**

"The requirement of a cerificate of probable cause in order to appeal from the district court to the court of appeals does not apply to habeas corpus cases subject to this chapter except when a second or successive petition is filed.

**"§ 2260. Counsel in capital cases; trial and post-conviction; standards**

"(a) A mechanism for the provision of counsel services to indigents sufficient to invoke the provisions of this chapter shall—

"(1) provide for counsel to—

"(A) indigents charged with offenses for which capital punishment is sought;

"(B) indigents who have been sentenced to death and who seek appellate or collateral review in State court; and

"(C) indigents who have been sentenced to death and who seek certiorari review in the United States Supreme Court; and

"(2) provide for the entry of an order of a court of record appointing one or more counsel to represent the prisoner except upon a judicial determination (after a hearing, if necessary) that—

"(A) the prisoner is not indigent; or

"(B) the prisoner knowingly and intelligently waives the appointment of counsel.

"(b)(1)(A) Except as provided in paragraph (2), at least one attorney appointed pursuant to this chapter before trial, if applicable, and at least one attorney appointed pursuant to this chapter after trial, if applicable, shall have been certified by a statewide certification authority. The States may elect to create one or more certification authorities (but not more than three such cerification authorities) to perform the responsibilities set forth in sub-paragraph (B).

"(B) The certification authority for counsel at any stage of a capital case shall be—

"(i) a special committee, constituted by the State court of last resort or by State statute, relying on staff attorneys of a defender organization, members of the private bar, or both;

"(ii) a capital litigation resource center, relying on staff attorneys, members of the private bar, or both; or

"(iii) a statewide defender organization, relying on staff attorneys, members of the private bar, or both.

"(C) The certification authority shall—

"(i) certify attorneys qualified to represent persons charged with capital offenses or sentenced to death;

"(ii) draft and annually publish procedures and standards by which attorneys are certified and rosters of certified attorneys; and

"(iii) periodically review the roster of certified attorneys, monitor the performance of all attorneys certified, and withdraw certification from any attorney who fails to meet high performance standards in a case to which the attorney is appointed, or fails otherwise to demonstrate continuing competence to represent prisoners in capital litigation.

"(2) In a State that has a publicly-funded public defender system that is not organized on a statewide basis, the requirements of paragraph (1) shall have been deemed to have been satisfied if at least one attorney appointed pursuant to this chapter before trial shall be employed by a State funded public defender organization, and if the highest court of the State finds on an annual basis that the standards and procedures established and maintained by such organization (which have been filed by such organization and reviewed by such court on an annual basis) insure that the attorneys working for such organization demonstrate continuing competence to represent indigents in capital litigation.

"(c) If a State has not elected to comply with the provisions of subsection (b), in the case of an appointment made before trial, at least one attorney appointed under this chapter must have been admitted to practice in the court in which the prosecution is to be tried for not less than 5 years, and must have not less than 3 years' experience in the trial of felony prosecutions in that court.

"(d) If a State has not elected to comply with the provisions of subsection (b), in the case of an appointment made after trial, at least one attorney appointed under this chapter must have been admitted to prac-

tice in the court of last resort of the State for not less than 5 years, and must have had not less than 3 years' experience in the handling of appeals in that State courts in felony cases.

"(e) Notwithstanding any other provision of this section, a court, for good cause, may appoint another attorney whose background, knowledge or experience would otherwise enable the attorney to properly represent the defendant, with due consideration of the seriousness of the possible penalty and the unique and complex nature of the litigation.

"(f) Upon a finding in ex parte proceedings that investigative, expert or other services are reasonably necessary for the representation of the defendant, whether in connection with issues relating to guilt or issues relating to sentence, the court shall authorize the defendant's attorney to obtain such services on behalf of the defendant and shall order the payment of fees and expenses therefor, under subsection (g). Upon finding that timely procurement of such services could not practically await prior authorization, the court may authorize the provision of any payment of services nunc pro tunc.

"(g) Notwithstanding the rates and maximum limits generally applicable to criminal cases and any other provision of law to the contrary, the court shall fix the compensation to be paid to an attorney appointed under this subsection (other than State employees) and the fees and expenses to be paid for investigative, expert, and other reasonably necessary services authorized under subsection (c), at such rates or amounts as the court determines to be reasonably necessary to carry out the requirements of this subsection.".

(b) AMENDMENTS TO TABLE OF CHAPTERS.—The table of chapters for part IV of title 28, United States Code, is amended by inserting after the item for chapter 153 the following:

"154. Special habeas corpus procedures in capital cases..... 2256"

SEC. 303. LAW CONTROLLING IN FEDERAL HABEAS PROCEEDINGS.

(a) IN GENERAL.—Chapter 153 of title 28, United States Code, is amended by inserting after section 2255 the following:

**"§ 2255A. Law controlling Federal habeas corpus proceedings**

"All claims in habeas corpus petitions brought by State prisoners in State custody who are subject to a capital sentence shall be governed by the law as it was when the petitioner's sentence became final, supplemented by any interim change in the law promulgated by the Supreme Court, if the Supreme Court determines, in light of the purpose to be served by the change, the extent of the reliance on previous law by law enforcement authorities, and the effect on the administration of justice, that it would be just to give prisoners the benefit of the interim change in law.".

(b) AMENDMENT TO TABLE OF SECTIONS.—The table of sections for chapter 153 of title 28, United States Code, is amended by inserting after the item for section 2255 the following:

"2255A. Law controlling Federal habeas corpus proceedings.".

(c) APPLICABILITY OF SECTION.—The amendments made by this section shall apply only to prisoners whose sentences have become final after the date of enactment of this Act.

The PRESIDING OFFICER. Under the previous order, the Graham amendment is agreed to and shall be considered as original text for the purpose of further amendment.

The amendment (No. 1686) was agreed to.

Mr. BIDEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CONRAD). Without objection, it is so ordered.

Mr. KOHL. Mr. President, I ask unanimous consent to speak as if in morning business for 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Wisconsin is recognized.

Mr. KOHL. I thank the Chair.

(The remarks of Mr. KOHL pertaining to the introduction of S. 2675 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

VOTE

The PRESIDING OFFICER. The hour of 1:30 having arrived, under the previous order the question is on agreeing to the motion to reconsider the vote by which amendment No. 1681 was rejected.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. BINGAMAN. Mr. President, on this vote I have a pair with the Senator from Rhode Island [Mr. CHAFEE]. If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea."

I therefore withhold my vote.

(During the course of this vote, Mr. BINGAMAN withdrew his live pair with the Senator from Rhode Island [Mr. CHAFEE] and voted in the affirmative. The following tally, No. 104, reflects such vote.)

Mr. SIMPSON. I announce that the Senator from Rhode Island [Mr. CHAFEE] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced, yeas 49, nays 50, as follows:

[Rollcall Vote No. 104 Leg.]

YEAS—49

NOT VOTING—1

Chafee

So the motion was rejected.

Mr. ROCKEFELLER. Mr. President, today, I voted to retain the antidrug assault weapons limitation provisions in the pending legislation, the omnibus crime package. My vote came after weighing heavily the views and arguments of my constituents, law enforcement officials, experts, and my colleagues. It is extremely important that my reasons are clear, especially to the people of West Virginia whom I am deeply privileged to represent in the Senate.

To put it most simply, this was a vote to protect the citizens of West Virginia and throughout this land from senseless crimes and violence. I am still a strong, fervent supporter of the second amendment and the constitutional right to bear arms. My vote does not represent any uncertainty about this position.

I came to the conclusion that the proposed ban on nine types of semiautomatic assault weapons is a necessary, warranted step in our country's war on drugs and crime. Violent and drug-related crimes have soared by 30 percent in the last decade. Every 20 seconds, a violent crime is committed in America. Police and law enforcement officials—along our borders, in our cities, and in every corner of America—are being gunned down by drug traffickers, gang leaders, and other violent criminals.

Underneath these trends of tragedy and horror is the emergence of assault weapons. As we have heard from the Director of the Federal Bureau of Alcohol, Tobacco and firearms, "it is the general consensus of law enforcement officials that the ever-increasing presence of assault-type rifles in the illicit drug trade and in other types of crime places the safety and the very lives of the American public in immediate peril."

It is abundantly clear from official surveys, news accounts, and the documented experiences of law enforcement officials throughout the country that semiautomatic assault weapons have become the favored weapon—the weapon of choice—among a growing number of criminals, especially the

drug gangs plaguing America's cities. For example, an intensive study performed by Cox Newspapers found that an assault gun is 20 times more likely to be used in a crime than a conventional firearm. After looking at 43,000 gun traces sent by police throughout the country, to a central Federal storehouse, researchers found that assault weapons showed up in 10 percent of these traces. Assault weapons made up almost one-third of all firearms traced to organized crime, gun trafficking, and crimes committed by terrorists in the United States in a period of 1 year, 1989, and the first quarter of 1989.

These are the reasons that the country's law enforcement organizations have come to the President, this administration, and the Congress for help, and more importantly, for protection. They have told us that they cannot keep our streets safe, protect our children from drugs and violence, and maintain order when they, themselves, are in constant danger of being maimed or killed by the destructive weapons of criminals. Our law enforcement officers are being outgunned and overpowered by the spread of assault weapons throughout the criminal and drug underworld.

As I have always said, there is no single solution or method for winning the war on drugs. I still firmly believe that we must mobilize the resources and exercise the legal tools to combine effective drug education, drug treatment, interdiction, eradication, and law enforcement in the intensive, all-out assault on drug use and drug distribution. The Antidrug Assault Weapons Limitation Act is a carefully designed, highly targeted step to help carry out this assault successfully. It responds to the desperate cries for help from police officers, sheriffs, and drug enforcement agents in West Virginia and throughout America. It seeks solely to isolate the destructive weapons of criminals, not to limit or impinge on the weapons and guns that citizens such as hunters, sportsmen, or collectors wish and have the right to own.

The bill proposes to bar the new manufacture or import of nine very specific types of assault weapons, five which are foreign-made and four which are domestically produced. In fact, it's crucial to point out that President Bush initiated the idea of curbing semiautomatic assault weapons, by taking the bold step last year, or July 7, 1989, of imposing an Executive order to ban the importation of 43 types of semiautomatic weapons. As our President said in an Oval Office address, drugs are a "grave threat sapping our strength as a nation" that requires us to wage an attack on every front.

The bill pending before us today does not ban legal ownership of the nine listed weapons. And it imposes harsh penalties on future criminals who are caught using an assault weapon to combat a violent or drug-related crime. A new mandatory penalty of an extra 10 years of prison, would be slapped on the criminal on top of any punishment imposed for the commission of the actual crime.

It is important to point out that the bill is designed to sunset the assault weapon ban in 3 years after its effective date. An intensive 18-month study of the impact of the ban is to be undertaken as soon as the ban goes into effect, in order to provide thorough information and answers. The proponents of the ban openly acknowledge that we do not and cannot know the precise effects that a curb on these deadly weapons will have on protecting our citizens and controlling crime in the way that law enforcement officials at every level believe it will. But in my view, we have a moral and social obligation to wage a relentless battle against crime and drugs, and to take decisive action to protect innocent and law-abiding citizens. Through the study, and when the bill must be considered for renewal, we will have the opportunity to thoroughly assess whether a ban on these specific weapons of choice for criminals was effective or whether it should expire.

In conclusion, I wish to underscore my hope that this section of the anticrime bill will be recognized and respected for what it is—it is an anticrime, antidrug, antiterrorist, and antiviolence initiative. The ceaseless wave of drugs that has poured into America will not be stemmed unless we mobilize as a country and take extraordinary measures to eliminate this extraordinary threat. Our citizens' right to bear arms is not in peril, but I certainly hope that the ability of criminals and drug criminals to prey on the people and law enforcement officials in my State and throughout America is in grave and immediate danger.

The PRESIDING OFFICER. Under the previous order, the Senator from South Carolina [Mr. THURMOND] is recognized to offer a perfecting amendment regarding title II of the bill. There will be 6 hours of debate on the Thurmond amendment equally divided and controlled by the Senator from South Carolina [Mr. THURMOND], and the Senator from Delaware [Mr. BIDEN] or their designees.

The Senator from Delaware.

Mr. BIDEN. Mr. President, as the Chair indicated, there is a 6-hour time limitation on this amendment. What is at stake here is the bill before us now contains a provision relating to habeas corpus, the so-called Biden bill that is sitting at the desk. It has been amended by Senator GRAHAM so that there is now a habeas corpus provision in the legislation sitting before us that will be better known from this point as the Graham-Biden habeas corpus provision.

By unanimous consent, we agreed with our Republican colleagues and the distinguished Senator from South Carolina that he would offer a substitute to that portion of the bill before us, let me explain this to my colleagues, the habeas corpus provision. This will be the only vote on habeas corpus we will have in the entirety of our debate on this crime bill. That means from now until the time we end this debate on crime, this will be the debate.

There will be no amendments to the substitute about to be offered by my friend from South Carolina. So at some point, hopefully well before 6 hours are up—but that is the time that has been allotted—we will have one vote on whether or not the Graham habeas corpus provision that is in the bill now or the Thurmond-Specter provision which is about to be sent to the desk will prevail. I just wanted to set that out. I now will be delighted to yield the floor to my distinguished friend from South Carolina.

Mr. THURMOND. Mr. President, while Senators are here, and before they will be moving out, I just want to say if they want to end these long appeals, if they really want habeas corpus, they better adopt this amendment.

AMENDMENT NO. 1687

(Purpose: To amend title 28 of the United States Code to provide special habeas corpus procedures in capital cases)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND], for himself, Mr. SPECTER, Mr. HATCH, and Mr. SIMPSON, proposes an amendment numbered 1687.

Mr. THURMOND. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike Title Two and insert in lieu thereof the following: "TITLE TWO—HABEAS CORPUS REFORM"

SEC. . SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES.

(a) IN GENERAL.—Part IV of title 28, United States Code, is amended by inserting immediately following chapter 153 the following new chapter:

"CHAPTER 154—SPECIAL HABEAS CORPUS PROCEDURES IN CAPITAL CASES

"Sec.

"2261. Defendants subject to capital punishment and prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment.
"2262. Mandatory stay of execution; duration; limits on stays of execution; successive petitions.
"2263. Filing of habeas corpus petition; time requirements; tolling rules.
"2264. Evidentiary hearings; scope of Federal review; district court adjudication.
"2265. Certificate of probable cause inapplicable.
"2266. Counsel in capital cases; trial and post-conviction standards.
"2267. Law controlling in Federal habeas corpus proceeding; retroactivity.
"2268. Habeas corpus time requirements.

**§ 2261. Defendants subject to capital punishment and prisoners in State custody subject to capital sentence; appointment of counsel; requirement of rule of court or statute; procedures for appointment**

"(a) This chapter shall apply—

"(1) to—

"(A) cases in which the defendant is tried for a capital offense; or

"(B) cases arising under section 2254 of this title brought by prisoners in State custody who are subject to a capital sentence; and

"(2) only if subsections (b) and (c) are satisfied.

"(b) This chapter is applicable if a State establishes by rule of its court of last resort or by statute a mechanism for the appointment, compensation, and payment of reasonable fees and litigation expenses of competent counsel consistent with section 2266 of this title.

"(c) Any mechanism for the appointment, compensation, and reimbursement of counsel as provided in subsection (b) must offer counsel to all State defendants tried for a capital offense and all State prisoners under capital sentence and must provide for the entry of an order by a court of record—

"(1) appointing one or more counsel to represent the defendant or prisoner upon a finding that the defendant or prisoner—

"(A) is indigent and has accepted the offer; or

"(B) is unable competently to decide whether to accept or reject the offer;

"(2) finding, after a hearing, if necessary, that the defendant or prisoner has rejected the offer of counsel and made the decision with an understanding of its legal consequences; or

"(3) denying the appointment of counsel upon a finding that the defendant or prisoner is not indigent.

"(d) No counsel appointed pursuant to subsections (b) and (c) to represent—

"(1) a State defendant being tried for a capital offense; or

"(2) prisoner under capital sentence during direct appeals in the State courts,

shall have previously represented the defendant or prisoner at trial or on direct appeal in the case for which the appointment is made unless the defendant or prisoner and counsel expressly request continued representation.

"(e) The ineffectiveness or incompetence of counsel during State or Federal collateral post-conviction proceedings in a capital case shall not be a ground for relief in a proceeding arising under this chapter of this title. This subsection shall not preclude the appointment of different counsel at any phase of Federal post-conviction proceedings.

**§ 2262. Mandatory stay of execution; duration; limits on stays of execution; successive petitions**

"(a) Upon the entry in the appropriate State court of record of an order pursuant to section 2261(c) of this title for a prisoner under capital sentence, a warrant or order setting an execution date for a State prisoner shall be stayed upon application to any court that would have jurisdiction over any proceedings filed pursuant to this chapter. The application must recite that the State has invoked the procedures of this chapter and that the scheduled execution is subject to stay.

"(b) A stay of execution granted pursuant to subsection (a) shall expire if—

"(1) a State prisoner fails to file a habeas corpus petition under this chapter within the time required in section 2263 of this title; or

"(2) upon completion of district court and court of appeals review under this chapter, the petition for relief is denied and—

"(A) the time for filing a petition for certiorari has expired and no petition has been filed;

"(B) a timely petition for certiorari was filed and the Supreme Court denied the petition; or

"(C) a timely petition for certiorari was filed and upon consideration of the case, the Supreme Court disposed of it in a manner that left the capital sentence undisturbed; or

"(3) before a court of competent jurisdiction, a State prisoner under capital sentence waives the right to pursue habeas corpus review under section 2254 of this title, in the presence of counsel and after having been advised of the consequences of making the waiver.

"(c) If one of the conditions in subsection (b) has occurred, no Federal court thereafter shall have the authority to enter a stay of execution or grant relief in a capital case unless—

"(1) the basis for the stay and request for relief is a claim not previously presented in the State or Federal courts;

"(2) the failure to raise the claim—

"(A) was the result of State action in violation of the Constitution or laws of the United States;

"(B) was the result of a recognition by the Supreme Court of a new fundamental right that is retroactively applicable; or

"(C) is due to the fact the claim is based on facts that could not have been discovered through the exercise of reasonable diligence in time to present the claim for State or Federal post-conviction review; and

"(3) the filing of any successive petition for a writ of habeas corpus is authorized by the appropriate court of appeals in accordance with section 2264(c) and the facts underlying the claim would be sufficient, if proven, to undermine the court's confidence in the jury's determination of guilt on the offense or offenses for which the death penalty was imposed, or newly discovered facts, which are not based upon or include opinion evidence, expert or otherwise, which would be sufficient to undermine the court's confidence in the validity of the death sentence.

**"§ 2263. Filing of habeas corpus petition; time requirements; tolling rules**

"(a) Any petition filed under this chapter for habeas corpus relief must be filed in the appropriate district court not later than 60 days after the filing in the appropriate State court of record of an order issued in compliance with section 2261(c) of this title. The time requirements established by this section shall be tolled—

"(1) from the date that a petition for certiorari is filed in the Supreme Court until the date of final disposition of the petition if a State prisoner seeks review of a capital sentence that has been affirmed on direct appeal by the court of last resort of the State or has otherwise become final for State law purposes; and

"(2) during an additional period not to exceed 60 days, if counsel for the State prisoner—

"(A) moves for an extension of time in Federal district court that would have jurisdiction over the case upon the filing of a habeas corpus petition under section 2254 of this title; and

"(B) makes a showing of good cause for counsel's inability to file the habeas corpus petition within the 60 day period established by this section. A court that finds that good cause has been shown shall explain in writing the basis for such a finding.

(b) A notice of appeal from a judgment of the district court in a claim under this chapter shall be filed within 20 days of the entry of judgment.

(c) A petition for a writ of certiorari to the Supreme Court of the United States in a claim under this chapter shall be filed within 20 days of the issuance of the mandate by the court of appeals.

**"§ 2264. Evidentiary hearings; scope of Federal review; district court adjudication**

"(a) Whenever a State prisoner under a capital sentence files a petition for habeas corpus relief to which this chapter applies, the district court—

"(1) shall determine the sufficiency of the evidentiary record for habeas corpus review; and

"(2) May conduct an evidentiary hearing when the court, in its discretion, determines that such hearing is necessary to complete the record for habeas corpus review.

"(b) Upon the development of a complete evidentiary record, the district court shall rule on the merits of the claims properly before it within the time limits established in section 2268 of this title.

"(c)(1) except as provided in paragraph (2), a district court may not consider a successive claim under this chapter.

"(c)(2) A district court may only consider a successive claim under this chapter if the petitioner seeks leave to file a successive petition in the appropriate court of appeals."

"(c)(3) In a case in which the appropriate court of appeals grants leave to file a successive petition, the time limits established by this chapter shall be applicable to all further proceedings under the successive petition.

**§ 2265. Certificate of probable cause inapplicable**

"The requirement of a certificate of probable cause in order to appeal from the district court to the court of appeals does not apply to habeas corpus cases subject to this chapter.

**"§ 2266. Counsel in capital cases; trial and post-conviction standards**

"(a) A mechanism for the provision of counsel services to indigents sufficient to invoke the provisions of this chapter shall:

"(1) provide for counsel to indigents charges with offenses for which capital punishment is sought, to indigents who have been sentenced to death and who seek ap-

pellate or collateral review in state court, and to indigents who have been sentenced to death and who seek certiorari review in the United States Supreme Court; collateral review in State court, and to indigents who have been sentenced to death and who seek certiorari review in the United States Supreme Court.

"(2) provide for the entry of an order of a court of record appointing one or more counsel to represent the prisoner except upon a judicial determination (after a hearing, if necessary) that (A) the prisoner is not indigent; or (B) the prisoner knowingly and intelligently waives the appointment of counsel.

"(b)(1) Except as provided below, at least one attorney appointed pursuant to this chapter before trial, if applicable, and at least one attorney appointed pursuant to this chapter after trial, if applicable, shall have been certified by a statewide certification authority. The States may elect to create one or more certification authorities (but not more than three such certification authorities) to perform the responsibilities set forth below. The certification authority for counsel at any stage of a capital case shall be:

"(i) a special committee, constituted by the State court of last resort or by State law, relying on staff attorneys of a defender organization, members of the private bar, or both; or

(ii) a capital litigation resource center, relying on staff attorneys, members of the private bar, or both; or

(iii) a statewide defender organization, relying on staff attorneys, members of the private bar, or both.

The certification authority shall:

(iv) certify attorneys qualified to represent persons charged with capital offenses or sentenced to death; and

(v) draft and annually publish procedures and standards by which attorneys are certified and rosters of certified attorneys; and

(vi) periodically review the roster of certified attorneys, monitor the performance of all attorneys certified, and withdraw certification from any attorney who fails to meet high performance standards in a case to which the attorney is appointed; or fails otherwise to demonstrate continuing competence to represent prisoners in capital litigation.

"(2) In a State that has a publicly funded public defender system that is not organized on a statewide basis, the requirements of section 2261(b) shall have been deemed to have been satisfied if at least one attorney appointed pursuant to this chapter before trial shall be employed by a state funded public defender organization, if the highest court of the State finds on an annual basis that the standards and procedures established and maintained by such organization (which have been filed by such organization and reviewed by such court on an annual basis) ensure that the attorneys working for such organization demonstrate continuing competence to represent indigents in capital litigation.

"(c) If a State has not elected to establish one or more statewide certification authorities to certify counsel eligible to be appointed before trial to represent indigents, in the case of an appointment made before trial, at least one attorney appointed under this chapter must have been admitted to practice in the court in which the prosecution is to be tried for not less than 5 years, and must have not less than 3 years' experience in the trial of felony prosecutions in that court.

(d) If a State has not elected to establish one or more statewide certification authorities to certify counsel eligible to be appointed after trial to represent indigents, in the case of an appointment made after trial, at least one attorney appointed under this chapter must have been admitted to practice in the court of last resort of the State for not less than 5 years, and must have had not less than 3 years' experience in the handling of appeals in that State courts in felony cases.

"(e) Notwithstanding this subsection, a court, for good cause, may appoint another attorney whose background, knowledge or experience would otherwise enable the attorney to properly represent the defendant, with due consideration of the seriousness of the possible penalty and the unique and complex nature of the litigation.

"(f) Upon a finding in ex parte proceedings that investigative, expert or other services are reasonably necessary for the representation of the defendant, whether in connection with issues relating to guilt or issues relating to sentence, the court shall authorize the defendant's attorney to obtain such services on behalf of the defendant and shall order the payment of fees and expenses therefor, under subsection (g). Upon finding that timely procurement of such services could not practically await prior authorization, the court may authorize the provision of any payment of services nunc pro tunc.

"(g) The court shall fix the compensation to be paid to an attorney appointed under this subsection (other than State employees) and the fees and expenses to be paid for investigative, expert, and other reasonably necessary services authorized under subsection (c), at such rates or amounts as the court determines to be reasonably necessary to carry out the requirements of this subsection.

**"§ 2267. Law controlling in Federal habeas corpus proceedings; retroactivity**

"In cases subject to this chapter, all claims shall be governed by the law as it was when the petitioner's sentence became final. A court considering a claim under this chapter shall consider intervening decisions by the Supreme Court of the United States which establish fundamental constitutional rights.

**"§ 2268. Habeas corpus time requirements**

"(a) A Federal district court shall determine any petition for a writ of habeas corpus brought under this chapter within 110 days of filing.

"(b) The court of appeals shall hear and determine any appeal of the granting, denial, or partial denial of a petition for a writ of habeas corpus brought under this chapter within 90 days after the notice of appeal is filed.

"(c) The Supreme Court shall act on any petition for a writ of certiorari in a case brought under this chapter within 90 days after the petition is filed.

"(d) The Administrative Office of United States Courts shall report annually to Congress on the compliance by the courts with the time limits established in this section.".

(b) AMENDMENT TO TABLE OF CHAPTERS.—The table chapters for part IV of title 28, United States Code, is amended by inserting after the item for chapter 153 the following:

"154. Special habeas corpus procedures in capital cases..... 2261".

(c) AMENDMENT TO SECTION 2254 OF TITLE 28.—Section 2254(c) of title 28, United States Code, is amended by—

(1) striking "An applicant" and inserting "(1) Except as provided in paragraph (2), an applicant"; and

(2) adding at the end thereof the following:

"(2) An applicant in a capital case shall be deemed to have exhausted the remedies available in the courts of the State when he has exhausted any right to direct appeal in the State.".

Mr. THURMOND. Mr. President, I rise today to offer, along with Senator SPECTER, a tough habeas corpus reform proposal which strikes at the heart of our Nation's habeas corpus problem—delay. Delay, delay, that is what is taking place. This amendment, which is cosponsored by Senator HATCH and Senator SIMPSON, would strike the habeas reform proposal contained in the Biden bill, which expands death row inmates rights, and replace it with a new proposal which appropriately addresses the need to establish a definite timeframe for Federal consideration of death penalty cases. This proposal was arrived at after consultation with several members of the Judiciary Committee and embodies a consolidation of the Powell habeas corpus proposal contained in my substitute and an amendment drafted by Senator SPECTER.

Although I have introduced another habeas proposal which the Attorney General and I believe to be preferable, S. 88, I have decided to offer this amendment which will effectively end abuse of the habeas procedure. The issue of habeas corpus reform has lingered in Congress for several years and we must act. After conferring with a number of Senators and experts in this area, I am convinced that this proposal warrants adoption by this body and is vastly superior to the proposal pending in S. 1970.

This Nation is facing a crisis in its criminal justice system. Federal habeas corpus and collateral attack procedures are in dire need of reform. This is evidenced by the glut of habeas petitions in the Federal system. In addition, Federal courts have proven to be slow in their action on and, in some cases, willingness to act upon habeas petitions. The large increases in the number of habeas corpus filings, many of which are frivolous and used as a delaying tactic, and the inordinate length of time death row immates spend litigating in the Federal system, require that legislation be enacted to reform habeas corpus.

Habeas petitions have grown by vast numbers in recent years. In 1941, State prisoners filed 127 habeas corpus petitions in the Federal district courts. By 1961, that figure had risen to 1,020. Over the years, that number has continued to rise with Federal district courts receiving an incredible 9,880 habeas petitions in 1988. The problem of these numerous filings is compounded by the extraordinary delay in

habeas corpus filings and court action. With respect to delay on the part of our Federal courts, a witness who testified at a recent Judiciary Committee cited a habeas corpus case he was involved with where the Federal court took 3 years to decide on one habeas petition. The result of these related problems is years of delay between sentencing and a final judicial resolution and imposition of the death sentence.

The Thurmond-Specter amendment is based, in substantial part, upon the recommendations of the Ad Hoc Committee on Federal Habeas Corpus in Capital Cases chaired by former Associate Supreme Court Justice Lewis Powell. This committee, commonly referred to as the Powell Committee, was formed by Chief Justice William Rehnquist in June 1988. The Powell committee was charged with inquiring into the necessity and desirability of legislation directed toward avoiding delay and the lack of finality in capital cases in which the prisoner had been offered counsel. Pursuant to the Chief Justice's request, the Powell committee made its recommendations and proposed a legislative remedy to the problem of habeas corpus review in capital cases.

Mr. President, this amendment incorporates the Powell committee recommendations and proposes new statutory procedures for Federal habeas corpus review of capital sentences. It is aimed at achieving the following goal: death penalty cases should be subject to one complete and fair course of collateral review in the State and Federal system, free from the time pressure of impending execution, and with the assistance of competent counsel for the defendant. Once this appropriate, fair review is completed, the criminal process should be brought to a conclusion.

This proposal allows a State to bring death penalty litigation by its prisoners within the new statute by providing competent counsel for inmates at trial and on State and Federal habeas corpus review. Participation in the new procedures is optional with the States. This legislation also provides for a 60-day period within which a Federal habeas petition must be filed. This 60-day period begins to run on the appointment of counsel. In addition, this legislation provides for an automatic stay of execution, which is to remain in place until Federal habeas proceedings are completed. This provision ensures that habeas claims not be considered by a court under the time pressure of an impending execution. Every claim raised by a death row inmate will be subject to one full and complete review.

Mr. President, where this amendment mostly differs from the underlying bill, S. 1970, and provides effective, true reform is that it establishes a timetable for completion of Federal habeas corpus appeals. The delay in carrying out our Nation's death sentences has brought our judicial system into disrepute. Families of victims are forced to suffer, year after year, while murderers sit on death row. Cases involving capital punishment have dragged through the courts for as long as 18 years. The vast majority of this delay is spent in Federal court. This amendment would, for the first time, establish a definite timetable for completion of Federal habeas corpus cases within 1 year from the time the death sentence becomes final in State court. It would bypass State habeas corpus proceedings which currently involve so much delay. Yet, prisoners would still be permitted to pursue State habeas while proceeding through the Federal system. The essential aspects of the timetable are that:

First, Federal habeas petitions must be filed within 60 days of the final action in the State court proceeding resulting in the death penalty.

Second, a final decision must be made on the claim by the U.S. district court within 110 days from the filing of the habeas corpus petition.

Third, a final decision must be made by the U.S. Court of Appeals within 90 days after, the final judgment of the U.S. district court.

Fourth, final action on a grant or denial of certiorari by the Supreme Court of the United States must be made within 90 days from the final judgment of the court of appeals.

Fifth, continuances would be prohibited except on the showing of good cause.

Sixth, no subsequent Federal habeas corpus petition may be entertained unless specific permission for the filing of such a claim is granted by the court of appeals for that circuit.

This expedited timeframe is both just and practical because it bypasses the long delays inherent in State habeas corpus proceedings, without eliminating a State prisoner's right to pursue State review while his Federal case is proceeding. In addition, it establishes State habeas corpus proceedings as the highest priority in the Federal judicial system.

Mr. President, in other areas this amendment is similar to the underlying bill, S. 1970, since it addresses the concerns regarding the issue of standards for qualified counsel and the issue of retroactivity. The Thurmond-Specter amendment adopts the competency of counsel standards contained in the Biden-Graham bill. The counsel provision provides that a State supreme court can establish its own standards for counsel or the State can choose to adopt the competency requirements already required under Federal habeas law. In addition, this amendment permits Federal courts to consider a successive claim which is based upon intervening decisions by the Supreme Court which establishes fundamental rights which are retroactively applicable. Under the original Powell proposal, these claims could not be heard. The effect of this change would be to permit a Federal court to hear a claim, whether or not the death row inmate has been through the Federal system, if the Supreme Court were to hand down a decision which is retroactive and establishes a fundamental right.

Mr. President, where our amendment differs from the underlying Biden-Graham proposal is the effect the change on retroactivity, which both proposals contain, will have on the ability to carry out death sentences. Without the timetable contained in my amendment, death row inmates will be able to continue to litigate new claims over and over again in Federal court. This Biden-Graham approach, would permit claims to be raised several years after the sentence was imposed. This difference is a critical difference in the two competing proposals. Our bill protects the right of a death row inmate to habeas corpus. However, unlike Biden-Graham habeas, it puts specific timetables in place so that death penalty cases do not drag on endlessly for years.

In addition, the underlying Biden-Graham bill has broad rights to successive petitions which would further expand death row inmates rights. I find this approach unacceptable and unreasonable. The Biden-Graham proposal would permit any Federal court to grant a second, third, or fourth habeas petition if the court did not believe the sentence was appropriate. By contrast, the Thurmond-Specter amendment would only permit U.S. Courts of Appeals to grant the right to have a second petition heard. Clearly, I believe the underlying bill would vastly expand the rights of death row inmates. It makes no sense for Congress to pass a death penalty bill in one title of a crime package, while in another title, enact a habeas corpus proposal which make the death penalty virtually impossible to impose.

Mr. President, finally, it is important to remember that both of these proposals are voluntary to the States. States can choose to opt into the alternative procedures or choose to remain subject to current habeas law. The Thurmond-Specter amendment offers the States, in exchange for the appointment of qualified counsel, a definite timetable for review in Federal court. The Biden-Graham proposal requires that the State appoint qualified counsel in exchange for nothing but continued Federal intervention and more litigation. No State—not one—will choose to opt into the Biden-Graham proposal. Biden-Graham is

not a viable proposal which States will find acceptable.

It is clear that the Biden-Graham proposal is still very similar to the original Biden bill. It contains a habeas corpus provision which would have the effect of increasing both the number of cases in Federal court and the cost of litigation to the Government. According to Justice Lewis Powell, the Biden-Graham proposal would increase—I repeat that according to Justices Lewis Powell, a member of the United States Supreme Court, who is chairman of the committee, who brought up the Powell proposal, and who was appointed by Chief Justice Rehnquist, and this is what Justice Powell says—it would increase, not decrease the number of habeas corpus cases. In fact, the Department of Justice referred to the the original proposal contained in the underlying bill, S. 1970, as a "step in the wrong direction." The Biden-Graham proposal weakens and qualifies the time limitations and finality provisions of the Powell Committee proposal as to ensure that no State would opt into its coverage. Simply put, the Biden proposal would expand the rights of criminal defendants.

By contrast, our amendment truly balances the need for finality in death penalty cases with the requirements that a defendant have a fair and timely examination of all his claims. Thereafter, if the conviction and sentence are found to be appropriate, judicial proceedings will be at an end, absent any exceptional developments in the defendant's case.

Mr. President, finality—I repeat, finality—of litigation and the elimination of the habeas abuse which currently surrounds State death penalty convictions is critical. Law abiding citizens are justifiably fed up with death row inmates using procedural loopholes and unwarranted judicial delay to their benefit. It is time we acted. Legislation which reforms the current habeas process must be meaningful reform which effectively addresses this problem. I believe this legislation is the most effective and tough proposal before the Senate.

In summary, the glut of habeas petitions in the Federal system and the unacceptable delay in execution of capital sentences are all evidence of the dire need for real reform—not reform legislation which will lead to more litigation and abuse. The function of the criminal justice system is to seek the truth. Once established, procedures such as habeas corpus must not go on endlessly to prevent the imposition of appropriate and just punishment. Additionally, prisoners must not be allowed to file frivolous claims which do not warrant the time and energy of those charged with the responsibility of handling them. As Justice Powell stated during his testimony before the committee, the current situation brings our judicial system into disrepute. Justice Powell, who is, incidentally, opposed to the death penalty, nevertheless respects the right of the majority to see to it that constitutionally imposed sentences of death are carried out. It is the duty of this Congress to do the same. Criminal cases must be brought to a close. Endless consideration of issues in criminal cases that have no merit and are filed only for purposes of delay must be eliminated from our judicial system. Federal courts must act upon habeas corpus petitions so that the States can carry out an appropriate and just sentence. The principles of justice, upon which our criminal justice system is based, demand that we take action. It is imperative that we pass this much needed reform measure.

In closing, the Members of this body have a clear choice—a vote for the Biden-Graham proposal is a vote to allow death penalty cases to drag on year after year, while a vote for the Thurmond-Specter proposal is a vote to bring endless death penalty appeals to a close.

For these reasons, I strongly urge my colleagues to support this amendment.

Mr. SPECTER addressed the Chair.

The PRESIDING OFFICER (Mr. BURDICK). Senator SPECTER is recognized.

Mr. SPECTER. Mr. President, I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I yield the distinguished Senator such time as he requires.

Mr. SPECTER. I thank my distinguished colleague, Senator THURMOND.

I will start by congratulating Senator THURMOND for an excellent presentation and congratulate him further on the outstanding work he has done, not only on the current legislation, but in the 10 years that I have been here on the Judiciary Committee, in his capacity as chairman and as ranking member. I, similarly, congratulate the distinguished chairman, Senator BIDEN, for the work which he has done on this legislation and his work as chairman of the committee. And it is my thought, even my hope, that as this debate proceeds, it might be possible to work out some of the underlying disagreements and even to find a consensus as we discuss this important issue.

Mr. President, the amendment which has been offered, captioned the Thurmond-Specter amendment, cosponsored principally by the distinguished Senator from Utah [Mr. HATCH] and the distinguished Senator from Wyoming [Mr. SIMPSON] has been the product of very extensive work and, in accordance with the general legislative approach, very substantial modifications and revisions, even in the course of the past 24 hours. So that my submission to my colleagues is that the gaps have been narrowed on the way important issues, on the consideration on second or subsequent petitions as to the penalty aspect, as well as innocence or quilt, under an appropriate standard; and also there has been an appropriate consideration for what we call intervening Supreme Court decisions, not to use the term retroactive but, substantively, it involves the same matter.

This amendment also provides for appropriate appointment of counsel, investigators and experts, where necessary, in the trial process and in the Federal habeas corpus appeals. As this issue is presented, it is a carefully crafted approach which would satisfy the two critical interests: First, society's interest in having the death penalty carried out in a fair, timely, and judicious manner; second, appropriate protection for the defendant so that the defendant has adequate counsel at all stages of the proceedings and that the defendant has an adequate opportunity to litigate the relevant issues when he challenges the appropriateness of the imposition of the death penalty.

Mr. President, there is general agreement that the American judicial system has broken down with the long delays on appeals in death penalty cases. That has become apparent, as noted by the distinguished Senator from South Carolina, when some cases take as long as 17 or 18 years and when the average is 8 years before the Federal courts have concluded the appellate process on death penalty cases.

What happens, Mr. President, is that the public has lost confidence in the system. The 2,500 inmates on death row are subjected to Russian roulette with stays and delays, a system which takes a heavy toll on everyone, including the defendants. It is not very fair to defendants, although doubtless those on death row would prefer the long delays to the alternatives of execution. But it is a system that makes no sense either for the public. The lengthy delay directly undercuts, vitiates, and eliminates the basic purpose of punishment, which is deterrence.

Deterrence is necessarily based on two factors: swiftness and certainty. Obviously, there can be no swiftness if the appellate process takes 8 years or 18 years, and there is no certainty because of the vagaries of being caught, the vagaries of being convicted; if convicted, the vagaries of having the death penalty; and where the death penalty is imposed, the uncertainty of having that penalty carried out in a system where 125 people have been executed since 1976 of the some 2,600

plus who have been placed under the death penalty.

Mr. President, defendants are entitled to a thorough, fair review in the Federal courts of the State criminal trial process which results in conviction and the imposition of the death penalty. But the kind of procedure which we have should not be used to defeat capital punishment. Capital punishment is obviously a very difficult issue, and there are strong differences of opinon. However, 37 States have established the death penalty. The Federal Government virtually has no death penalty and has had none since Furman versus Georgia in 1972, because the Federal laws have not been recodified to take into account the requirements of the Supreme Court on aggravating and mitigating circumstances.

So at the present time under the Federal system we have only the Uniform Code of Military Justice and we have the 1988 legislation on drug kingpins.

My own view is that capital punishment is a deterrent. I base that on experience as an assistant district attorney and district attorney of Philadelphia, where I have seen many, many cases where professional robbers, and burglars would not carry a weapon in the course of a robbery or burglary because they were afraid of the death penalty.

The cases are numerous where it has been established that defendants are apprehensive about the death penalty. So in my judgment there is a very solid evidentiary base to establish a judgment, and it is a judgment call that the death penalty is a deterrent. Perhaps in the course of this discussion, if this issue becomes relevant or debated, I will move to some of the citations of the evidentiary base to conclude that capital punishment is a deterrent.

Mr. President, beyond my own view that capital punishment is appropriate, I have consistently maintained the position that it has to be very, very carefully administered and it has to be appropriately limited both in the interest of fair imposition on defendants and also in the interest of retaining the death penalty in the arsenal of weapons, because if we overuse the death penalty, I believe that we will lose it, that it will not be retained in our system of criminal justice.

When I was district attorney of Philadelphia, I personally reviewed all the cases, which had been the standard for the DA's in that city for many years and still is the standard, and I believe the standard which prevails generally, so that the ranking authority, duly elected prosecuting attorneys, make that decision at the highest level.

When I was district attorney, my office established very rigid standards for calling for the death penalty. Long before the law precluded the use of a peremptory challenge to exclude Afro-Americans in my district attorney's office, we did not exercise peremptory challenges to exclude Afro-Americans from juries.

Under Pennsylvania law, as it was under the laws of the States generally, a peremptory challenge may be exercised without any cause shown. The number varies from State to State. In Pennsylvania you have 20 challenges, and there had been a practice in the past to strike Afro-Americans from the jury.

When I became district attorney, I stopped that practice because I thought it was unfair. Later the courts in this country have precluded the prosecutor from striking Afro-Americans peremptorily because of its inherent unfairness.

Mr. President, since coming to the Judiciary Committee, early on I voted against Federal legislation which would impose the death penalty on 16-year-olds and 17-years-olds because of my view that we ought to apply the death penalty carefully and not to use it on those under 18. Certainly there are many 16- and 17-year-olds who are hardened criminals, who have bad records, and have committed vicious crimes, but I believe that societal restraint is warranted in not imposing the death penalty in these cases.

Similarly, I disagreed with the decision of the Supreme Court of the United States in upholding the application of the death penalty for those who were retarded. I think that is a bad judgment. I think you have to have societal restraint as a matter of fairness to the individual and societal restraint if we are to maintain the applicability of the death penalty.

Mr. President, in this context then, what we have before the Senate today is the determination of what standards are appropriate in Federal court review. Bear in mind that before a case gets to the Federal court a defendant has been indicted, tried with a jury, convicted of murder in the first degree, had the death penalty imposed, and taken the case to the supreme court in the State where the incident occurred. If the death penalty is upheld, then the matter may go to the Supreme Court of the United States on a petition for a writ of certiorari which, as a practical matter, are rarely heard by the Supreme Court.

Then comes the issue of what is called collateral attack or habeas corpus proceedings. Habeas corpus is a Latin phrase which means have the body, and it means that the body must be produced to determine the legality of the detention or legality of carrying out the penality, which, of course, in this case, is the death penalty.

Mr. President, the new features which are present in the legislation we are presenting here today, added to the amendment filed by the distinguished Senator from South Carolina, are the provisions to eliminate State habeas corpus proceedings as a preliminary or prerequisite to filing a petition for writ of habeas corpus in the Federal court.

The States will still retain the authority to have habeas corpus proceedings as they may choose, but under the Thurmond-Specter amendment that is not a prerequisite. The reason that it is not a prerequisite and the reason that there is a change in this law is because of the relative meaninglessness of State habeas corpus proceedings which can take years.

What happens on a State habeas corpus action is that after the supreme court of the State, say the State of Pennsylvania, has decided that the conviction was proper, the death penalty was proper, and the U.S. Supreme Court has declined to review the case, then it goes back to the trial court and a petition for a writ of habeas corpus is filed alleging errors that have already been decided by the State's highest court with the possible addition of incompetency of counsel.

But when a State lower court, in a State like Pennsylvania, hears the habeas corpus challenge which has already been ruled on by the supreme court of the State, then invariably the lower court dismisses it; it goes to the State supreme court; they have already heard it, and there is a dismissal there pretty much in a perfunctory way.

The net effect is that State habeas corpus proceedings do not amount to much, but they are perfunctory, and all of the functions which are performed by State habeas corpus are duplicated then when the case goes for Federal habeas corpus. But in the Federal system there is a fresh court, a different court, not the court where the defendant was tried, but the U.S. district court. There is a different appellate court. So you have a different court system and you have a tradition for an independent review.

This is not to say that you cannot have State habeas corpus proceedings, but if you want to go to the Federal court this amendment eliminates the prior requirement that you first exhaust State remedies before going to the Federal court. It also establishes a timetable which requires the defendant to move promptly.

One of the really critical aspects of the pending legislation, and this is legislation advocated by both Senator BIDEN and by Senator THURMOND and myself, relate to the provisions for the appointment of counsel. This has always been a very difficult matter in many of the States. It is not possible to have a criminal justice system func-

tion fairly unless adquate counsel is provided. If a person does not have a lawyer—a good lawyer and an experienced lawyer—to go through the complexities of a criminal trial, justice cannot be obtained. From the vantage point of 1990, it is frankly surprising that it took so long in our system of criminal justice to have the requirements that someone who is on trial even for a capital case have consel appointed.

That was decided by the Supreme Court of the United States in the mid-forties in Betts versus Brady and extended in Gideon versus Wainwright in 1963 to all criminal cases where the sentences are longer than 6 months.

This legislation requires that if a State wishes to have the advantage of these new speedy habeas corpus proceedings, the State must provide adequate counsel, adequate investigative service and adequate witnesses, as defined in some detail under this bill.

Bear in mind, Mr. President, that this legislation does not impose upon the State a requirement that it undertake this course.

But, it offers the State the availability of these speedy processes in the Federal court, if the State complies with these requirements. The Congress does not seek to impose its direction on the States, out of respect for federalism. But, as is customary in many similar lines, we say to the States that if you want an advantage—as, for example, in the case of Federal highway funds—if you want Federal highway funds, you have to limit the drinking age to 21. We are not saying the States have to have the legal drink age of 21, but if they want Federal funding on highways, they have to have it.

That is what is required here. If the States want the advantage of this speedy habeas corpus proceeding which will enable them to carry on their criminal justice system with reasonable promptness, instead of in 8, or 18 years, then they have to undertake the requirements set forth in this legislation.

The requirements are detailed as to the procedures for the establishment of panels of qualified lawyers or, in the absence of that, to have a lawyer with either 5 year's practice, plus 3 year's litigating felony cases, which is the requirement which the Congress set forth in the 1988 drug laws. Then the court has the authority to appoint investigators, expert witnesses, and the court shall fix the compensation to be paid.

Of course, in the administration and carrying out of all these laws, there is necessarily the requirement of a good-faith effort to see to it that the fees are fair and reasonable. We cannot micromanage the court systems and establish an hourly rate for every State in the United States or every county. That depends upon local circumstances.

But it is the obligation of the trial judges, in the State courts where these capital cases are tried, to see that that is done. It is the obligation of the Federal judges, the U.S. district court judges, when they have a lawyer appointed for the habeas corpus proceedings, to see to it that adequate counsel is provided so that fairness is maintained. That kind of judicial supervision is necessary.

Mr. President, once there is the assurance that adequate counsel is present, and that there are funds to pay for investigators, and there are funds to pay for expert witnesses, then there is no reason why we should not establish a timetable which would conclude these cases in a reasonable period of time. This amendment requires the Federal courts to give them expedited treatment. The first and highest priority in the Federal courts will be the habeas corpus appeals from the death sentence.

Congress legislated many years ago on the subject of speedy trials in Federal courts, so it is a logical adjunct for the Congress now to address the timeframe on the handling of habeas corpus proceedings in the Federal courts.

Mr. President, the Thurmond-Specter amendment requires that the petition for a writ of habeas corpus be filed in the Federal court within 60 days from the final action by the Supreme Court of the United States in denying certiorari. But the reality is that the 60-day requirement comes on top of approximately 4 to 6 months, which the system has, to see to it that counsel is appointed after the State supreme court has upheld the death penalty. That is the activating date.

When the State supreme court has upheld the imposition of the death penalty, everyone is on notice that the process should begin at that time to appoint counsel, and that counsel should at that point begin to prepare for the Federal habeas corpus proceeding because it is apparent from our experience that such a small number of cases are ever taken by the Supreme Court of the United States on certiorari that it is a certainty, a virtual certainty, that the case is going into Federal habeas corpus and that is the moment for action.

The whole range of the death penalty cases are of sufficient importance in the administration of criminal justice, Mr. President, that these cases cannot be business as usual. You simply cannot let the files lie around for 6 months or a year until the petition is filed. Under the existing practices, the petitions for a writ of habeas corpus are not filed until an execution date has been set, and they languish for months or years before they reach that point with the legal processes taking their toll, after the final decision on the judicial appellate process.

Mr. President, after the petition for a writ of habeas corpus is filed, the State would have the customary 20 days to file a responsive pleading. At that juncture the U.S. district court which has jurisdiction would have the responsibility to give this case expedited treatment. And, under the statute, it would have 110 days in total: 20 days filing time, plus 90 days for disposition of the case.

If the case is complicated and requires more time, discretion would be vested in the district court to extend the time for the filing of the petition so that the 60 days has that latitude and flexibility. The court could extend the time for the decision within 110 days total, but only on a showing of good cause, to be specified by the court.

Mr. President, I have handled habeas corpus cases in the State court and that is the basis for my representation and argument that they are duplicative and meaningless. Similarly, I have handled cases in the Federal court. This timeframe is realistic, especially given priority attention for these cases to be so resolved.

Mr. President, there would not be any undue burden on the Federal courts. If we take Philadelphia, for example, there are approximately 10 to 12 death cases coming out of the Philadelphia court system each year.

Interestingly, of the 110 people on death row in Pennsylvania, 70 come from Philadelphia, 40 from the remainder of the State. Considering 10 to 12 death cases a year, that would be less than 1 case per judge on the Federal court. In Philadelphia, there are 18 permanent judgeships and 10 senior judges, so a judge would have a case once every 2½ or 3 years.

Similarly, in the case of Florida I am advised by the State attorney general's office there that there are approximately 25 death sentences imposed each year. Florida has 27 district judges. So it would be less than one a year in the State of Florida.

Texas has, again according to the State attorney general's office, approximately 25 to 30 death sentences each year. In Texas, there are 36 district judges and 10 senior judges. So on the average it would be one every 18 to 20 months in the State of Texas. So the burden is not excessive for the district court to give priority attention to these cases.

If more judges are necessary, Mr. President, the Congress has to provide them, as we are currently with the bill introduced last week to provide 86 additional Federal judges. We must provide the necessary judicial manpower to carry out the administration of criminal justice and have adequate

judges to give the appropriate attention which these cases require.

Mr. President, beyond the district court, the case would then go to the court of appeals under a timetable, again, of 110 days. This is about the same timetable now utilized in most circuit courts of appeal: 20 days for the pleadings, and a briefing and argument schedule to encompass 110 days. Again, if more time is necessary, the statute provides for the flexibility on the showing of good cause with the specific reasons being cited.

Once the case is concluded by the court of appeals, then there is again a requirement that the Supreme Court of the United States conclude the case within 110 days. If cert is denied, that would be not too far from the current standards.

(Mr. LAUTENBERG assumed the chair.)

Mr. SPECTER. Mr. President, at every stage of the proceeding, the Congress would be asking or directing the courts to give these cases priority attention. We ask for the priority attention because in the absence of this priority attention, the death penalty, as a weapon in the arsenal of society's means to protect itself, is rendered virtually meaningless. So that this timetable in the Federal court would provide for review in approximately 1 year from the initial decision of the Supreme Court of the United States in denying certiorari on the appeal from the decision by the State's highest court.

Realistically, as noted before, it is 4 to 6 months in addition to that because after the State's highest court has upheld the imposition of the death penalty and we know it is going to the Federal courts, it takes that much time to go to the Supreme Court of the United States on a petition for certiorari.

Mr. President, on the two items which have been in contention—and there are only two issues which have been hotly contested—it is my submission that this amendment establishes a realistic and workable procedure as the amendment has finally been drafted.

One of the arguments has been whether there should be consideration on subsequent petitions of only innocence of guilt or also on the penalty itself. One of the very difficult factors in the administration of justice where the death penalty is imposed is that after you establish a system where a man or woman is tried before a jury and can produce all sorts of mitigating circumstances, and that case is then heard by the State supreme court which upholds it, then there is a habeas corpus petition filed in the Federal court. There is no limit on what the Federal court can hear at that time in an evidentiary proceeding to give full and fair review to what has happened in the State court. But after the district court has decided it and it has been reviewed by the court of appeals and certainly applied for at the Supreme Court, then there is invariably the situation which would arise when the death penalty application is imminent for another petition for a writ of habeas corpus to be applied for. It is this repetition which has resulted in the long delays of up to 18 years, and it is this repetition that has to be dealt with but dealt with in a fair manner.

The Thurmond-Specter amendment provides that a subsequent petition may be filed only if leave is granted by the court of appeals. So that it is not a matter of going back to the district judge who may be tough or may be lenient. It goes on the second petition, or subsequent petition, to the court of appeals—three judges—and if the defendant is to have the opportunity to have another hearing, he has to persuade, or she has to persuade, two of three of those court of appeals judges that there is some merit in having another appeal. That is a fair test which has a balance on a gatekeeper with discretion, a standing—the court of appeals—and always a gatekeeper which will exercise, as best we can in any system of justice, the appropriate discretion.

This is a novel approach, candidly, suggested to me by a very distinguished judge in the court of appeals.

The controversy has arisen as to what should be the standard applied when someone goes in for Federal habeas corpus after they have had the full State review and the full first Federal review.

The Powell Commission took the position that the scope of review ought to be limited only to the question of innocence. The judicial conference, a group of circuit judges and other Federal judges, took the position that there ought to be review not only as to innocence or guilt, but also a review as to the propriety of the penalty.

The earlier approach, in this amendment, was to limit it to what the Powell Commission said, but that has since been changed. So now there is an inclusion of consideration on a subsequent appeal to the penalty aspect if there is a showing of fact on newly discovered materials.

So that now the provision reads as follows, Mr. President. I read it because this is a very important provision:

> The filing of any successive petition for a writ of habeas corpus is authorized by the appropriate Court of Appeals in accordance with section 2264(c).

I might explain that that is the gatekeeper leave granted by the court of appeals. The text goes on:

> And the facts underlying the claim would be sufficient, if proved, to undermine the court's confidence in the jury's determination of guilt on the offense or offenses for which the death penalty was imposed, or newly discovered facts which are not based upon or include opinion evidence, expert or otherwise, which would be sufficient to undermine the court's confidence in the validity of the death sentence.

So that in this standard, we have the essence of what has been urged by the judicial conference. We have a subsequent petition allowed if there is a contention of innocence or if there are newly discovered facts which bear upon the validity of the death sentence.

It appropriately, Mr. President, does not allow a second round of Federal habeas corpus, a second bite of the apple, so to speak, if you get a new opinion from a new psychiatrist which could have been obtained at any time. So there is the allowance, if there is a newly discovered fact which bears upon the question of death penalty, as well as on the question of innocence.

Mr. President, I believe that that is an appropriate determination because I do not believe that it is wise or conscionable to exclude an individual on his or her way to the death penalty if there is a fact of this nature which bears either on the question of innocence, guilt, or on the question of the propriety of the sentence.

This comes in significant measure, Mr. President, from the testimony of Justice Powell himself when he appeared before the Judiciary Committee in a very lengthy session and made this comment which appears at page 359 of the RECORD from November 8 of last year, where Justice Powell testifies:

> I repeat what I said earlier, that for the most part, innocence is not an issue in this case. The question is whether or not a death sentence was appropriate, and whether or not the trial was fair.

Focus in on that, Mr. President. When Justice Powell comes to grips with the application of an appropriate standard, Justice Powell moves beyond what the Powell Commission said on seeking to limit subsequent petitions only to the question of innocence or guilt when he says, and again I quote:

> The question is whether or not a death sentence was appropriate.

So that is what is comprehended within the modification of the amendment which is now pending before the Senate.

Mr. President, the other principal bone of contention between the two positions has been the question on whether later decisions by the Supreme Court of the United States would be available to someone whose appellate process had already run its course, the so-called retroactively issue.

After a good deal of effort, the Thurmond-Specter amendment I think strikes the right balance on this difficult issue. Again, it is in accord-

ance with societal constraint and in accordance with the basic approach that the defendant ought to be accorded appropriate breadth before the death penalty is imposed. The substance of the Thurmond-Specter amendment provides as follows:

A court considering a claim under this chapter shall consider intervening decisions by the Supreme Court of the United States which establish fundamental rights.

What Chief Justice Rehnquist had been arguing for was to allow a death row defendant the benefit of decisions on fundamental rights and decisions which were intervening after he had run the appellate process intitially.

But, Mr. President, the most important aspect of the thrust of the Thurmond-Specter amendment is that we establish a timetable where there will be relatively few intervening appellate court-Supreme Court rights granted. That happens when it takes 18 years for a case to be decided. If you took a span of even 8 years, which is the average, in the 1960's, you would have an Escobedo, Miranda, and lineups, and search and seizure. You would have a whole panoply of new rights which would arise. So that when a defendant was tried, before a case would run through the Federal habeas corpus system, he would go through the State system and in that intervening time there would be a new right on confession. That case would go up and come back down, and by that time there would be a new right up on lineups. That case would go up, and before it was finished there would be a new right on search and seizure. That case would go up, and before it was finished there would be a new right on the selection of juries. It is a fact that in the evolving system of criminal justice in this country we have added substantial new rights to defendants.

Mr. President, if you want to read a shocking decision, even though you may be a nonlawyer, pick up the decision of the Supreme Court of the United States in Brown versus Mississippi, a case which was handed down in 1936. Although it was not so long ago, there was a time when the Supreme Court of the United States did not have anything to say about any case tried in the State courts because under our concept of federalism, when a State court had decided the criminal case, that was that; the Supreme Court would not touch the criminal case, notwithstanding the fact that the 14th amendment was passed immediately after the Civil War. But it took until 1936 for the Supreme Court of the United States to say that the provisions of due process of law placed a Federal limitation on what a State could do.

The defendant in Brown versus Mississippi was an African-American man who was brutalized virtually beyond description. He was taken to a neighboring State, beaten, a noose around his neck, and hanged to obtain a coerced confession. Finally in 1936 the Supreme Court of the United States said, enough; States cannot undertake those kinds of practices in the United States of America without having the Federal court step in and stop that kind of a practice.

I think no one would begin to disagree with that kind of a decision today just as we do not disagree at all with the decision in Brown versus Board of Education or many of the decisions of the Supreme Court which have brought a sense of decency and justice to this country.

But then the rights have continued. And I am not going to engage in an extensive discussion as to how those rights have evolved, but many of them have been very tough on law enforcement.

I recall when Miranda versus Arizona came down imposing a new standard for policy interrogation which applied from the date of the decision on June 13 of 1966, so that in cases which had been investigated a week before, a month before, when confessions had been appropriately obtained under existing standards—we had a case in Philadelphia, Commonwealth versus Hickey, where a man robbed a cab driver and murdered him and the police went to his apartment and found the gun and materials that proved to be from the body of the cab driver. They questioned the defendant in accordance with the existing rights under Escobedo versus Illinois, but they did not give the Miranda warnings: you have a right to remain silent, and everything you say can and will be used against you; that you have a right to a lawyer, and if you do not have a lawyer the State will provide one, and if you start to talk and change your mind, you can stop at any time. Who, in May 1966, would have predicted that a month later the Supreme Court would come down with that ruling? But the Supreme Court did, and many cases were wiped out, and I think inappropriately wiped out after there had been an evolving standard under Mapp versus Ohio in search and seizure and lineups, and so forth. So as these cases have moved through the State habeas corpus proceedings and Federal habeas corpus, before they are finally decided, new rights have been created.

This amendment takes a realistic look at the criminal justice system, and we say for the first time that the emperor has no clothes, when you require a State habeas corpus proceeding which takes several years to be a jurisdictional requirement before going into Federal habeas corpus, because in a Federal habeas corpus you get all of the rights.

For the first time the Congress will have spoken in this bill to establish meaningful requirements for appointment and payment of counsel, investigators, and expert witnesses if the State wants the advantage of this expedited habeas corpus proceedings. It will do justice to the defendants, and it will do justice to society by allowing the procedure which will meaningfully allow the imposition of the death penalty in appropriate cases.

I thank the Chair and yield the floor.

Mr. President, may I inquire as to how much time remains?

The PRESIDING OFFICER. There is approximately 2 hours remaining for the Senator from South Carolina and a full 3 hours remain for the Senator from Delaware.

Mr. SPECTER. I thank the Chair.

Mr. GRAHAM. Mr. President, I thank the Chair.

Earlier today, I proposed, and the Senate accepted, a modification of the underlying bill which substituted a new title II as it relates to habeas corpus. While that process was underway on the amendment that was cosponsored by Senator DECONCINI and Senator BRYAN, a similar effort was underway with Senator THURMOND and Senator SPECTER. It is reminiscent of some experiences in science. It was at the end of the 19th century that a scientist in India and another scientist in Cuba, halfway around the world, were both attempting to understand the cause of yellow fever.

And independently they both reached the determination that the cause was a particular form of mosquito which had in a period of its maturity served as the carrier for what at that time was one of the world's most dreaded diseases. These two scientists, thousands of miles apart, ended up with the same diagnosis and the same prescription for the resolution of this dreaded disease.

In some ways, that process has been occurring with this legislation. We started off independently, Senator THURMOND, Senator SPECTER, Senator DECONCINI, Senator BRYAN, and myself, and attempted to understand and arrive at a reasonable resolution of this issue.

I believe that the result is an underlying amendment, which is now part of the bill, and an amendment which has been offered by the Senators from South Carolina and Pennsylvania, which is very similar.

The good news with that is I believe there is every reason to believe that this Senate will pass by a strong vote a very considerable reform in the current habeas corpus law, and that the result of that will be a greater sense of real justice, real justice in the sense that decisions will be made on evidence which is relevant, which is relatively fresh; decisions will be made on a timely basis; the public's confidence

that the judicial process has some capability of reaching finality will be restored.

I am very pleased with that, and I wish to commend all of my colleagues who have participated in the effort that has brought us so close. I also wish to commend former Supreme Court Justice Lewis Powell and the members of this committee, whose efforts contributed so substantially to the result that we have reached today.

Their distinguished committee, which was made up of five Federal or former Federal judges, pooled their practical experience and sought outside counsel on options for habeas corpus reform.

The consensus that reform is needed was quickly formed. That recognition of the need for reform is now held broadly within this Chamber. The reasons for that recognition and need for reform are obvious.

Mr. President, from 1961 to 1986, State prisoners filing habeas corpus petitions in Federal district courts increased by 786 percent, a 786-percent increase between 1961 and 1986. The number of State prisoners' habeas corpus petitions filed in Federal courts has jumped from 497 cases in 1987, and 438 cases in 1988. This brings us to an all-time high number of 9,880 habeas corpus petitions in the last 4-quarter year.

Mr. President, Senator SPECTER has had the opportunity to deal with these cases from the perspective of a Federal prosecutor. I had the responsibility of dealing with it from the perspective of a Governor of a State with a large number, over 300 persons, on death row.

I would like to review what actually happens in these cases under the current law. The case I am going to cite is hypothetical in that it is an amalgamation of a number of cases with very similar factual circumstances.

An individual commits a heinous crime, a multiple murder, in our State. It has to be under circumstances that shock the consciousness of the citizenry. That murder results in a trial, a conviction by a jury, a recommendation by that jury, and then finally a judicially imposed sentence of death.

Let us assume that that occurred in 1978. There is then a period of direct appeals, first to the Florida Supreme Court, and then a request, and if granted, an appeal before the U.S. Supreme Court, a direct appeal. That process takes until 1981.

Then there is a period of habeas corpus review in the State courts because under the current law there is the principle of exhaustion of State remedies before access to the Federal court is available.

In our State we have now adopted a provision very similar to what this bill would provide, and that is a statute of limitations. You have to bring your case before the State court within a period of time, or you suffer the potential sanction of losing access to the court. It is my understanding that there are approximately five other States that have adopted a similar statute of limitations.

Let us assume that process requires 2 years to run. We are now up to 1983.

Then the person waits. What they wait for is the signing of a death warrant. In Florida, that occurs after there has been a clemency hearing in which the individual has an opportunity to present the widest possible range of evidence on the specific facts of the case, personal circumstances, issues that would go beyond what we would consider the law and go to the issue of mercy.

If that case is rejected—if clemency is not granted—then it becomes the responsibility of the Governor to sign a death warrant. Typically, that warrant is signed for a date 30 days subsequent. Twenty days of that period pass. At the end of that 20 days, a petition is filed in the Federal court for a Federal collateral appeal review.

The Federal court, now faced with a complicated case, only 10 days or less left until an execution is going to occur, is requested to enter a stay of execution which is almost automatically granted.

Then a long process of Federal collateral review commences. That process will typically end again at the U.S. Supreme Court. Assuming that that claim has been denied, then there is a review to determine whether another clemency process is appropriate, whether there has been any change of circumstances that would indicate clemency, not previously granted, might be considered.

Assuming that is not the case, another death warrant is signed for a date approximately 30 days in the future. Twenty days into that death warrant, another Federal collateral appeal petition is filed, raising a second issue, an issue different from that which had been raised in the first instance.

That process rolls forward until now we are in the late spring of 1990. That individual, 12 years after the incident, 12 years after the original conviction, still awaits a final determination as to punishment.

That is a typical consequence of the way in which the current law operates, in reality.

I believe that we need to move towards reform, which will have goals of finality, of certainty, of assuring that all issues are raised at one time, that they are raised sufficiently close to the events so that if the issue is, for instance, did this person have a competent lawyer at the time of trial, you would have some people with recollections sufficiently fresh, with memories of the incidents at trial to be able to advise appellate courts as to what actually happened so that we would not be dealing with a sense of fantasy, but with reality in our quest for real justice.

Both the bill as modified by the amendment that has now been adopted, and the amendment offered by Senators THURMOND and SPECTER, have similar objectives.

I would like to lay out at this time, Mr. President, what I think are the principal issues within this common objective, and then discuss some of the differences.

I will state that it was only approximately an hour ago, when the Senator from South Carolina offered his final amendment, that we had an opportunity to review it. And it may be at a later point in this debate that I will return for a more thorough analysis of some of the areas of difference.

But I will attempt to lay out what appear to be the principal issues and areas of disagreement at this time.

I suggest that there are six basic issues within the question of reform of the Federal collateral appeals process. First, there is the issue of a statute of limitations for filing Federal habeas corpus claims; second, the right to competent counsel for indigent inmates in these collateral appeals of capital cases; third, a review of the procedural default rules; under what circumstances can a defendant raise issues during the collateral appeals process that had not been raised during the direct appeal or during the trial itself. Next, what are the limits on the filing of successive petitions? Finally, the rules that relate to the retroactivity, the application of new law as enunciated by the U.S. Supreme Court to a case that occurred years in the past.

We can look at these issues one at a time. First, the imposition of a new statute of limitations on filing Federal habeas corpus claims. This is not a new idea. In 1983, the Senate passed a 1-year time limit for the filing of Federal habeas corpus petitions. Under the current law, as I indicated in my hypothetical example, there is relatively little or no incentive for State inmates to file petitions for Federal habeas corpus relief until an exception date is set.

In most instances, the defendant who is incarcerated, but feels that he has some legitimate claim to raise in a habeas corpus proceeding, has every incentive to want to expedite that. If they are able to receive relief, based on their petition, they might get a new trial, or they might be outright released. If they fail, they are in no worse condition than they were on the day they filed the petition.

What is unusual about capital cases is that the incentives are reversed. The defendant is reluctant to file that

last petition, knowing that if that is denied, then that is the ultimate result, and they are going to face the ultimate punishment.

So the fundamental purpose of all of these proposals is to create some sense of timeliness in bringing these appeals. Justice is not well served under the current scenario. There is a flurry of activity of almost chaotic nature which surrounds the signing of the death warrant in the days leading up to execution, as attorneys move from court to court trying to find a friendly forum that will grant them some delay or relief. This disparages the public's opinion, attitude, and perception of the justice system.

This amendment would allow inmates 1 year to file a Federal habeas petition from the time the sentence has been affirmed in the direct appeal of the State court of last resort. This 1-year period can be stayed during a review by the U.S. Supreme Court, based on a request petition for certiorari or during any period in which the petitioner is seeking relief under State habeas corpus procedures.

This 1-year time limit, as I indicated, is consistent with legislation that the Senate passed in 1983. It is also the same time limit which is contained in legislation offered earlier this year by both Senator BIDEN and Senator THURMOND and legislation which I have offered.

The second issue is the accessibility to competent counsel for indigent defendants facing capital sentences. Mr. President, I particularly applaud the Powell Committee for identifying this critical element of habeas corpus reform. In adequate representation at trial and on appeal is often the underlying cause for the plurality of claims which slow the finality of State court judgment. That is not to say that there is not a pool of very fine, highly qualified lawyers to handle capital cases. However, most witnesses who appeared before the Judiciary Committee on this topic lamented the accessibility of good lawyers for indigent inmates. In my State, the State of Florida, by statute, we have created a public defender office to provide competent counsel at the trial level and an office of capital collateral representatives to provide competent counsel for collateral appeals in capital cases.

The Powell Committee recommended that should inmates be limited in the time of filing an appeal—if the statute of limitation concept is adopted—representation should be available for such collateral appeals.

Senator BIDEN, in his original proposal, had provided a similar approach, and I am pleased to say that, in the amendment that has been offered by Senator THURMOND and Senator SPECTER, almost a verbatim adoption of the competency of counsel and the procedures for their selection and compensation has been secured. This is not an issue which is in controversy.

The third issue involved in debate on habeas corpus reform relates to the so-called procedural default rules. Procedural default rules determine under what circumstances an issue which was not raised in a defendant's original trial can be raised in a collateral proceeding.

In the 1977 case of Wainwright versus Sykes, the U.S. Supreme Court reaffirmed its opinion that claims not previously raised may be heard only under three conditions: First, when the failure to raise them was a result of illegal State action; second, when the Supreme Court recognizes a new law that it then retroactively applies; and third when the failure to raise the claim was because certain facts could not have been discovered through the exercise of reasonable diligence. This test, as the Senator referred to, is the "cause" and "prejudice" test. That is, you have to show that there is a just cause for raising this, a reason to bring to the court's attention a matter not previously raised, and that cause has to have caused real prejudice. This rule affords an adequate guarantee that the Federal habeas corpus courts will not be barred from hearing appropriate claims.

The Powell Committee did not recommend any changes in the rules on procedural default. Again, Mr. President, I am pleased to observe that this is an area in which there is no disagreement. Both the amendment offered by the Senator from South Carolina and the Senator from Pennsylvania and what is now the underlying amendment to the bill itself essentially adopts the Powell Committee's position in the previous law relating to procedural default.

The fourth issue has to do with the concept of successive petitions. This is a very important issue. The question is, after the 1-year filing limit is passed, under what conditions can an inmate raise an unheard claim in the Federal court? To use a hypothetical example: Having gone to Federal court once with a petition for habeas corpus and having been unsuccessful, can one go back a second, third, fourth time, raising additional claims? Successive petitions should, in my opinion, and in the opinion of the Powell Committee, be limited to only the most extenuating circumstances. The Powell Committee would allow successive petitions only in extenuating circumstances and only when the claim went to the guilt or innocence of the prisoner.

In this area, both the Senator from South Carolina, the Senator from Pennsylvania and our underlying amendment have digressed slightly from the Powell recommendation, in that we have also recognized the appropriateness under extenuating circumstances of bringing petitions where the validity of the sentence, as well as guilt or innocence, is at issue. That is to say——

Mr. SPECTER. Will the Senator yield for a question?

Mr. GRAHAM. The Senator would like to yield after he finishes about 10 minutes of explaining the issues and attempting to articulate what I sense to be areas of agreement and remaining areas of disagreement.

To return to the hypothetical, if the issue is whether the judge or the jury, depending on which institution has the responsibility for determining the imposition of death, had properly taken into account aggravating circumstances, if there were extenuating reasons why certain information was not brought to the attention of the court in the first habeas corpus petition, we would recognize the fact that that is a legitimate area as is the basic issue of guilt or innocence.

I might say that it has been suggested that up to 70 or 80 percent of the cases which get to the United States Supreme Court through the Federal habeas corpus procedure as applied to capital cases go to the issue of sentencing and the validity of that sentence rather than to the issue of guilt or innocence itself. But I underscore that the ability to bring a successive petition, whether for guilt or innocence, or for the validity of the sentence, should be only available under the narrowest of conditions.

The statute should not contain vague standards such as miscarriage of justice or other words that would tend to encourage future litigation. The amendment which we have proposed, which is now the underlying amendment in this bill, would allow review of successive petitions only when the facts underlying the claim undermine the confidence of the court in the jury's determination of guilt or the validity of the sentence, a standard which is very similar to the standard which has been proposed by the Senators from South Carolina and Pennsylvania.

Finally, the issue of retroactivity: No State will be able to have an effective death penalty statute unless that statute is considered to be fair. One of the most difficult issues of fairness is where an individual was found guilty under a certain State law and then, at sometime in the future, the law is changed. And the question is, Should they get the benefit of that new law which might avoid their being executed, giving them some reasonable basis to pursue a habeas corpus claim, or should they be executed under the law as it existed at the time that they were originally sentenced?

The 1989 Supreme Court case of Teague versus Lane established a basic rule that new law arising after a sen-

tence became final may not be applied in a habeas corpus proceeding.

We have suggested a modification which, again, I believe is very close to that which has been proposed by the Senators from South Carolina and Pennsylvania, and that is we would provide that law cannot be applied retroactively unless the U.S. Supreme Court has promulgated that new law. That is to say, it could not have been promulgated by a court in the Federal system below the Supreme Court and specifically made that law retroactive in its application.

Mr. President, this summary indicates that on the major issues there is wide area of agreement.

Let me just turn in closing to our preliminary analysis of the amendment as offered by the Senators from South Carolina and Pennsylvania as to where we think there are some areas of difference. One area of difference is in the application of State habeas corpus.

The tradition has been that the Federal courts would not intervene until the individual had had a full hearing of his collateral claims in the State court. And I might quote at this time some of the rationale for that. This is from a statement by Justice Lewis Powell, the chairman of the Powell Committee, which states:

> Federal law now requires that before claims may be asserted in a Federal habeas corpus petition they must first be presented to State courts. This represents appropriate respect for federalism. A State court system should have the opportunity to address any errors on its own before intrusion by the Federal system.

The provision that is contained in the amendment by the Senators from South Carolina and Pennsylvania would essentially say thats the exhaustion of State remedies requirement would be waived, and by setting a 60-day time limit in which to bring Federal cases it would virtually necessitate that the prisoner move in the Federal system first.

The argument, as I understand it, for that is the argument of expedition, that the State habeas corpus proceeding is essentially meaningless, that it should be preempted and the defendant directed to the forum that really counts, the Federal system.

First, I disagree with that statement of federalism. The fact is that each State has its own State criminal law. All of these people by definition are State prisoners. They have been prosecute: they have been tried; they have been found guilty under State law.

My State, in some areas, has provisions that are significantly different than the Federal law, one being, the taking of depositions during a criminal proceeding.

Therefore, it is appropriate that the collateral review process start in the State courts which have the jurisdiction of looking at both allegations of misapplication of State law and also have the responsibility to review for compliance with Federal law.

Once that process is completed, and if the State court has made the determination that all State procedures were properly abided by, and in their judgment Federal procedures, then the State collateral appeal process is exhausted. At that point, the prisoner has an opportunity to go into the Federal court, which will only be looking at the issue of compliance with Federal law.

So I believe there is, as Justice Powell indicates, a very basic rationale of federalism for the exhaustion of State remedies.

The argument is made that it will result in expedition, that you will save all this time that now is taken up in the State collateral review process. I disagree with that. What is going to happen is not a termination of the State procedure but rather a reordering.

In the hypothetical I cited, the State habeas corpus process was availed of and exhausted first before the Federal. If the amendment, as offered by the Senators from South Carolina and Pennsylvania, would be adopted, what would happen is that you would have the Federal procedures, then you would have the prisoner going into the State system second.

I do not agree with the argument that what will happen is that you will have parallel procedures, that is procedures in the Federal court and the State court proceeding on the same clock. It is not in the interest of the prisoner to have that occur. It is in the interest of the prisoner to determine what ordering will delay final judgment as long as possible.

So what is going to happen is you are going to have the State proceeding not avoided, but just shifted to the end of the process which will result if there was, in fact, some State defect. You will not find that out until the very end rather than as is the case today, and I think appropriately so, to make that determination at the beginning of the collateral appeal process.

Mr. President, a second area of difference between the approach that is now in the bill and that offered by Senators THURMOND and SPECTER has to do with the judicial time limits. They would set a 60-day period in which to bring that first Federal appeal. We would set a 1-year period. I believe that the 1-year period is more orderly and appropriate. These are complicated cases. Typically the collateral appeal is not handled by the same attorney who handled the appeal at trial and direct appeal.

The reason for that is very obvious. One of the standard issues raised in the collateral appeal is the competency of that counsel. So it is not very likely that you are going to have the same attorney who tried the case and appealed the case doing the collateral appeal, where, in that collateral appeal they are raising the issue of their own professional competence. So there needs to be a period of time in order for that transition to new counsel to occur.

The 1-year period is the period that this Senate, in 1983, felt to be appropriate. The 1-year period was the period that Senator THURMOND, when he introduced his original habeas corpus bill, felt was appropriate. It is the period that Senator BIDEN had included in his original bill. And it was the period that myself and several cosponsors had included in our bill.

Most States, those of which have set a statute of limitations for State proceedings, have set a limit of more than 1 year. In the State of Florida it is 2 years that is given as the statute of limitations to file in the State court. So I believe the period that is suggested, that is the period of 1 year, is an appropriate one.

A second issue that concerns me is the time limits that occur after the petition is filed. The amendment by the Senators from South Carolina and Pennsylvania would set various timeframes in which the Federal courts must act.

We have similar provisions in other areas of Federal criminal procedure. There is what is called the speedy trial rule, which essentially says that, if you are charged with a criminal offense, the prosecution has to bring your trial within a certain number of days. If they fail to do so, if they fail to meet that speedy trial rule, you can go to the court and ask for a dismissal of the charges. That is a basic part of our sense of fair play, that you cannot be accused of a crime and then just left in limbo indefinitely awaiting your trial.

So the sanction for nonperformance on a timely basis is essentially against the public. The public loses its right to try an individual for violation of law, if that trial does not take place on a timely basis.

The question I have is what are the sanctions, and against whom, if the Federal courts do not comply with the time periods contained in this amendment? If we say the Federal court within 120 days has to hear the petition and 125 days elapse and they have not done so and there is no acceptable excuse for that delay, what happens? Does the same thing happen that occurs at the trial level, and that is that the charges are dismissed, the prison door is opened, the defendant is released?

I think that is a very serious issue, of us, through the legislative process, attempting to set a whole new set of rights for a State prisoner in the col-

lateral appeal process, and that is the right to be heard within a certain number of days. What happens if that right of the State prisoner to be heard within that number of days is not in fact accomplished? That is a significant second difference, which on first analysis exists between the underlying amendment and the amendment offered by the Senators from South Carolina and from Pennsylvania.

Mr. President, in conclusion, I am very pleased to be here today, when I think that we are within a short period of time of adopting a very fundamental, balanced, and I hope soon to become law, reform in habeas corpus. There are few things we could do which would have a more salutary effect on the criminal justice system. There are few things we could do that would more help to restore the public's confidence in our basic sense of justice than to reform this process which has been trivialized, which has been the subject of delay, the subject of obfuscation, and increasingly the subject of ridicule by the public, directed at our justice system.

So, Mr. President, I applaud all of those who have brought us to this point today. The amendment we have offered demonstrates the seriousness of our effort to achieve reform in this area. We are serious about protecting the constitutional rights of defendants. We are serious about securing order and finality in capital cases.

The PRESIDING OFFICER. The Senator from Utah [Mr. HATCH] is recognized.

Mr. HATCH. Mr. President, habeas corpus reform is probably the most important issue in the debate so far, although all of the issues involved in this matter are very, very important issues. And, to that extent, I want to compliment the distinguished Senator from Florida. Although I do not think his is the better proposal, it is so much better than what the original Biden proposal was in the bill, and I know he has a profound imprint on it. It is basically a movement in the right direction. He deserves an awful lot of credit, because I understand the conflict and the difficulties on his side of the aisle. We have some of that over here, but nothing like what the distinguished Senator from Florida has to contend with on his side of the aisle. What he has done is singularly very, very important.

What the distinguished Senator from Delaware has done is also very important. At the beginning of this debate, I raised almost all of the issues that the distinguished Senator from Florida has tried to address in the technical amendments he has filed.

They are not so technical. They are very substantive amendments. And I think regardless of what the Senate does, we have a chance here of really having a least a step forward in habeas corpus reform, something that many of us felt could not occur except for what has been done by the distinguished Senator from Florida.

But, having said that, let me just point out some of the disadvantages of his approach vis-a-vis the Thurmond-Specter-Hatch approach—and it is no secret I helped work on the Thurmond-Specter-Hatch approach. I would list the following. No. 1, the distinguished Senator from Florida, in the changes he has brought about, waits until all State proceedings are exhausted before allowing Federal habeas to proceed. We need to know that that can be 3 to 5 years to 10 years and maybe even more. But somewhere between 3 and 10 years before that matter is resolved.

No. 2, he does not set any time limits on the courts to require them to dispose of these habeas corpus cases. So they can go on, on either side of that tree—for the State habeas approach through the Federal habeas approach—for very lengthy periods of time.

No. 3, and I think one of the most critical differences is, he allows successive petitions and stays of execution by a single Federal district trial judge. That is a very significant difference between the two approaches. There are almost 700 district judges, certainly more than 600 in this country. In every district court in this country, in every jurisdiction, there are always one or more judges who, the minute you file a habeas corpus petition, grant it. It does not make any difference whether it is frivolous or not, it is granted. We have at least one, and in many cases more than one, who would grant a Federal petition for habeas corpus for almost any reason no matter how frivolous. That is what is ruining this system.

There are other reasons why I think the Thurmond-Specter-Hatch approach is better. Even so, I pay tremendous tribute and homage to the distinguished Senator from Florida for the efforts he has made.

Frankly, I do not think the Congress should be in the business of telling the Supreme Court what is the effect of their decisions, and I think that, again, is what happens with the Graham-Biden amendment.

What are the advantages of the Thurmond-Specter-Hatch amendment? I would like to appeal to my good friend because I think he has given thoughtful reflection to this. He has been a Governor of a major State in this Union. He has seen the abuse of habeas corpus, time after time, especially in his jurisdiction, but all jurisdictions have seen abuses of habeas corpus petitions. He has seen the tremendous costs to taxpayers that really are just running out of control. And he knows that this is a serious problem.

I would like to appeal to him to look at some of the provisions of the Thurmond amendment. No. 1, the Thurmond-Specter-Hatch amendment requires a death row inmate to file his Federal habeas corpus petition within 60 days after the death sentence becomes final, that is, after appointment of postconviction counsel. So there is a timeframe. They have to move. They are not going to be waiting until the last second so they can keep the person alive for that much longer. They have to move and they have to do so in a good-faith, legitimate effort with legitimate arguments.

No. 2, it prohibits any Federal district court judge from thereafter granting any other habeas petition or stay of execution. This is what the Thurmond-Specter-Hatch amendment does. You get around these judges for whom it does not make any difference what the law is, they are going to grant that petition no matter what it means because of their own personal ideology or philosophy. It is easier for a trial judge to do that. It is almost impossible for an appellate panel of judges to do that.

No. 3, the Thurmond-Specter-Hatch amendment gets around that process and that problem by requiring the petition to be authorized by circuit court of appeals authorization before any successive petition may be brought. So you have to go straight to the circuit court of appeals. It is much more likely that you are going to have, not only a more sophisticated look at the petition, but also that they are not going to put up with the frivolity of petitions that go on today.

No. 4, the Thurmond-Specter-Hatch amendment forces the courts, both trial and appellate courts, to act expeditiously.

The district court has to decide the case within 110 days. That is in the interest of everybody, to be frank. The circuit court has to decide the case within 90 days, and then the Supreme Court within a 90-day period thereafter. So we have speedy, quick, efficient, honest, just approaches to this. But it is still a timely approach. That saves the taxpayers millions of dollars while still protecting the rights of the accused, the rights of the defendant.

No. 5, the Thurmond-Specter-Hatch approach does not postpone consideration of the State's claim at all. That is a State matter. State habeas corpus can proceed at exactly the same time, or subsequently, as the State determines best. It can go on at the same time the Federal habeas petition is filed. Nothing prevents the State. We do not interfere with the State approach toward habeas corpus at all. They can do whatever they want to do, and they can take whatever time they want. But we all know that States are much less likely to grant

habeas corpus petitions than the Federal courts. The reason that is so is because there are some Federal district judges you can absolutely count on to grant a Federal habeas corpus petition regardless of what the merits are, regardless of how frivolous or inconsequential it may be, because of ideology and because of a different belief.

I brought up on Monday, the Andrews case in Utah. I spoke at some length about that Utah case, State versus William Andrews. I complained about the 26 separate appeals or reviews of judgment that this 1 death row prisoner has obtained. Fifteen of those twenty-six appeals or reviews have been in Federal court. They have been in the Federal system. His other 11 appeals have been in the State system.

I just learned that one of these appeals which I had shown on my chart as pending was, in fact, decided against Mr. Andrews on May 12 of this year.

Guess what else has occurred in this case? While I was speaking on the floor of the Senate on Monday, Andrews filed another appeal, No. 27, 16 years after he committed his crime.

What was his crime? Everybody knows. There is no question of guilt. The evidence is so overwhelming and compelling that even Andrews does not deny it. He and another friend went into a hi-fi shop. They tortured the people there. They drove pencils into the ear of at least one, poured Drano down their throats, tortured them, beat them up, and then shot them in cold blood. Everybody knows that.

There is no question they did it. There is no question of guilt. There is no question it was a heinous crime. There is no question that William Andrews deserved the death penalty. And that is what he got. But 17 years later, he was, as of the time I was speaking on the floor decrying this type of a situation and this type of a procedural system, filing his 27th appeal.

All I can say is this has cost the State of Utah millions of dollars. There are legitimate reasons for the petition of habeas corpus—I am a great believer in the petition of habeas corpus—I believe it is a way of rectifying wrongs, but not like this.

That is why the Thurmond-Specter-Hatch approach really is a good approach. If we can get enough colleagues to vote for that, we will send one heck of a beautiful message. I will tell my colleagues something, I will be for this bill regardless of what happened on the gun issue. I am not happy about that, as a person from the West, as someone who made the principal arguments against it. I will be for this bill assuming we can correct some of the other things that are wrong with it and assuming that we can have decent resolution of the capital punishment sections of the bill. But it will go a long way toward causing me to want to support this bill.

That is a pretty big concession on my part, if you stop and think about it, because I feel very deeply about the assault weapons issue that we were talking about. I think many people in my State feel very deeply, and the people all across this country. That was a serious, significant issue.

But this is so important, this is such an important criminal issue, such an important constitutional set of issues, such an important criminal justice issue that I would feel very, very good about it if we agreed to the Thurmond-Specter-Hatch amendment.

I think the distinguished Senator from Florida would feel good about it. He knows this is a better approach because he has thoughtfully looked at this. That is not taking a thing away from him because his approach is a step in the right direction. I never thought it would happen on that side of the floor. I am not being critical. I know there are sincere people who love these appeals—who hate the death penalty so much that they are willing to do anything, no matter what the cost. That is not good law, not a good approach.

I do not blame them for fighting against the death penalty if they feel that way. That is their right. Some of these views are very legitimate from their viewpoint; not from mine, but from their viewpoint. I do not see how any of us can allow this system to go on: Multiple appeals, the right to come up with any frivolous reason to get an appeal and to cost the taxpayers and everybody else in the process.

William Andrews filed this 27th appeal on Monday, while I was talking about and criticizing the fact he had 26 up to then. He objected in this appeal to the Federal magistrate who had denied him relief. This judge had actually conducted a new evidentiary hearing, 16 years after the original crime, to determine if Andrews' right to an impartial jury had been satisfied. In a thorough, 62-page opinion, the judge concluded that no evidence of any constitutional violation or other irregularity in the Andrews trial existed. Instead, he concluded that the prisoner's conduct was "an abuse of the writ."

Andrews had filed another plea to have a thorough review of his latest frivolous complaint reexamined by a Federal court. I presume this will be taken right on up to the Supreme Court of the United States of America with all of those consequent delays, with all of the costs involved, all from a person who literally deserves the judgment that he has received.

Mr. President, I would like to speak with a little more specificity on the issue of habeas corpus reform because I think this is such an important issue. I have to say that I naturally am in support of the Thurmond-Specter-Hatch amendment on habeas corpus. I believe it is one of the most imaginative and effective answers to a difficult legislative issue that I have seen in the time I have been here.

In all honesty, we did not have this put together as of last night. We tried very, very hard. We worked hard all last night and most of the day today. Frankly, I did not expect that the Senate would today be considering a habeas corpus bill that would really reform the system. I did not think that we would see a bill that would truly limit the number of cases that could be brought and that would limit the amount of time that those cases would take. Under the Thurmond-Specter-Hatch amendment, this accomplishes both of those goals.

It is clear, the Graham amendment constitutes, represents a good faith effort to address the habeas corpus in death penalty cases. But it is equally clear that that amendment does not do enough. It is likely, I believe, that this approach to our habeas problems will result in the filing of not fewer but more cases. It will thus have the effect of delaying death sentences, not allowing them to be carried out.

The Graham amendment would introduce new avenues of delay and postponement to be exercised by prisoners on death row. Unlike the Thurmond-Specter-Hatch amendment, this amendment sets no limit on the number of habeas petitions that can be filed by a death row inmate. Even more important, the Graham amendment does not even try to set a time limit on the filing and trying of the habeas corpus petition.

That is the great innovation of the Thurmond-Specter-Hatch amendment, that it sets an absolute watertight timeframe, within which a death row inmate's Federal review remedies will be exhausted. After that time, all further proceedings, with one limited exception, shall be in the State courts or in clemency proceedings before the State's Governor or board of pardons. That is where the serious cases of heinous crimes belong, not in the Federal courts.

Let me explain. Under the Thurmond-Specter-Hatch amendment, Federal habeas corpus proceedings come first, not second, as they do under current practice. State habeas review can be provided by any State, of course, but if a prisoner wants a Federal court to review his death sentence for constitutional defects, he must seek such review within 60 days of his case becoming final. The State postconviction review, if any, will still be available after the Federal habeas process is complete, or it can go on at the same time.

The great advantage of the Thurmond-Specter-Hatch amendment is that this Federal habeas process will reach an end, and it will be quick. First, a State seeking the benefits of the new habeas procedures must provide appointed counsel in postconviction proceedings. The Thurmond-Specter-Hatch amendment requires that.

I personally would not have gone that far, but I am not against it. I just say that it does require appointed counsel.

Then within 60 days after the appointment, the habeas petition must be filed in the appropriate Federal district court.

Next, the trial court must determine the habeas petition within 110 days of filing. Any appeal of the district court determination must be filed in the Federal court of appeals within another 110 days. If further appeal to the Supreme Court is sought, it must be filed within 20 days of the issuance of the mandate by the court of appeals. Then the Supreme Court must in turn render its decision within 90 days of the filing of the petition.

Now, that is a remarkably tight schedule for any case to follow, but it is appropriate for these death penalty appeals. They deserve the priority attention of our courts and the Thurmond-Specter-Hatch amendment ensures they will receive it.

The Graham amendment. Why have I concluded that the Graham amendment, despite its expressed intent to reform habeas, has failed? First, because proposed section 2257(c), which purports to withdraw Federal district court jurisdiction over successive habeas petitions, contains an exception so broad that it entirely swallows the purported habeas limit and renders it useless.

That exception would allow successive petitions in Federal district court, where the prisoner was raising a new issue that had not previously been presented in State or Federal court and "the facts underlying the claim would be sufficient, if proven, to undermine the court's confidence in the jury's determination of guilt on the offense or offenses for which the death penalty was imposed, or the validity of the sentence of death."

The Graham amendment provides an avenue for the prisoners to relitigate and relitigate the appropriateness of the death sentence that was returned. The only practical limitation is that the prisoner has to think of a new issue not raised before.

Well, that should not be hard. There are plenty of attorneys out there ready to volunteer their services, and they are very creative in these matters. All they have to do is keep creating one new issue after another and they can take multiple successive habeas appeals.

The Thurmond-Specter-Hatch amendment, on the other hand, has something very different to say about a Federal district judge's ability to entertain a second habeas petition for a death row inmate. He or she has none. No Federal trial judge, not one of the more than 600 now serving will have jurisdiction to consider a successive habeas petition under the Thurmond-Specter-Hatch amendment. Now, that is habeas reform.

They have their role to play in the original appeal, but no successive appeal will be granted in the first instance by a Federal district judge, so there is not going to be this automatic granting of a successive petition.

Instead, the Thurmond-Specter-Hatch amendment would only allow Federal court review of the second petition where a Federal court of appeals has specifically authorized the filing of such a case.

In other words, the circuit court is going to have to make that determination and, let me tell you, they are going to be much more specific on what the law is than these district judges. Thus, the ability of a single Federal district judge to derail the entire appellate process, which is now so often seen in the death penalty area, will end if the Thurmond-Specter-Hatch amendment is adopted. That is a revolutionary change in our law. It is as welcome as it is overdue.

What that says is, purely and simply, that after the first petition for habeas starts in the district court and goes all the way up to the Supreme Court, if there is a successive petition filed, it goes straight to the appellate court, the circuit court of appeals, and they have to grant the right for it to go on from there.

I can tell you they are not going to do that very often unless there is legitimate reason for doing so. And if there is, then they should and they will. That is the way it should work. But it puts a finality to this that really ought to be there to stop the 27 different, frivolous, fruitless, awful appeals by William Andrews and others in similarly situated circumstances.

Once a successive petition is filed under the Graham amendment, the district court, the court of appeals, and the Supreme Court can each take their own time in deciding the case. There is no incentive for quick action whatsoever. And with all the pressures of the courts, they are not going to be quick any more than they are today.

Under the Thurmond-Specter-Hatch amendment, each of those courts is placed under careful deadlines to ensure their quick attention to these important cases. The entire Federal portion of their appeal should be over within a year. Contrast that to the 17 years that the death row inmates such as Utah prisoner William Andrews has been able to tie up the Federal courts and the State with their appeals under the current system. And the average of these habeas petitions is years. It amounts to years and years and years.

The Graham amendment also expands the right of appeal from adverse rulings on habeas petitions. Under present law, most unsuccessful habeas petitioners may only appeal the dismissal of their petitions where the district judge issues a certificate of probable cause asserting that the legal issues presented by the case are not entirely frivolous. The Graham amendment creates, for the first time, an absolute right to have habeas decisions reviewed on appeal, and that is in his proposed section 2259.

I want to tell my colleagues it is absolutely guaranteed that this will further aggravate the current overload being experienced by the Federal courts of appeals. Moreover, the new appeals allowed by the Graham amendment will by definition be frivolous cases which would not previously have been litigated beyond the trial level. Those who are experts in this field know that, and I know it.

I acknowledge that the Thurmond-Specter-Hatch amendment makes a similar change in the law, but there is little or no potential for delay resulting from this change in the overall framework of the strict limits that Thurmond-Specter-Hatch would establish. In other words, we set time limits. Yes, we protect their right to have a successive appeal, but we set time limits in the process, and in successive appeals we require them to go straight to the circuit courts which will decide these matters fairly, equitably, and quickly.

These are the principal reasons why any Senator who truly favors reform of the habeas corpus system should oppose the habeas corpus provisions of the Graham amendment. That bill, while a step in the right direction, while clearly intended and far superior to the proposal I criticized last Monday, is not, I am afraid, true habeas corpus reform. It would result in habeas even further out of control.

The habeas provisions of the Thurmond-Specter-Hatch amendment by contrast are designed to establish a new time limitation, generally 1 year, after the death sentence becomes final for instituting and trying habeas cases.

Now, I urge my colleagues, this should be a bipartisan issue; this should not be a Democrat versus Republican issue as the assult weapons issue became. Yes, there were a few Republicans who voted with the vast majority of Democrats on that particular issue. That was certainly a partisan vote. There is no question about it. We all know which way it went. There is no question that it came down to partisan politics, but this one should not.

Every one of us has to live with this system. Every one of our States are crying for help. Every one of our criminal law enforcement people who have any sense about this are crying for help. Everybody admits the system is breaking down. Everybody looks at the Andrews case and just sighs and wonders how this great country can allow this situation to continue.

So I urge my colleagues to support the Thurmond-Specter-Hatch amendment and oppose that of Senator GRAHAM. I recognize that there are some in this body, a small minority, who favor the abolition of the death penalty in all circumstances. I do not expect them to vote for the Thurmond-Specter-Hatch amendment—they should not; their personal beliefs are that way—because, I have to tell you, the Thurmond-Specter-Hatch amendment will certainly, beyond doubt, ensure that death sentences are carried out.

So as to those who are against it, I cannot blame them. I cannot blame them for voting against Thurmond-Specter-Hatch. But those who are for it, those who are really tired of the criminal elements in our society, who really want to do something about it, this is now the best chance we have ever had in the history of Congress to do something about this out-of-whack situation.

After 1 year has passed, the death sentences, by Thurmond-Specter-Hatch, will be imposed in the various States, and they will be carried out unless the States themselves or the U.S. Supreme Court stays the execution. All rights are protected, but there will be no frivolity, that is, no successive appeals that are frivolous. There will not be any more abuse of the system; there will not be any more of this tremendous cost to society.

Finally, we will have an effective death penalty in this country that is certain, that is reasonably swift, and one which at the same time protects every conceivable constitutional right of the defendant.

The Chief Justice of the U.S. Supreme Court, William Rehnquist, spoke on the subject of habeas corpus just last week. He made an important point when he noted that no other country in the world allows final criminal convictions to be reopened and reexamined in the courts. Only pardon and executive clemency are generally available. No other country in the world does what we do.

Compare that to the American situation, where we regularly allow not one but two complete postconviction reviews of criminal sentences. Foreign lawyers and judges cannot understand why we do that. Do we have so little faith in our criminal justice system?

We have one review in the State courts. Then we have one in the Federal courts. We come back, back, back, again and again; 27 in the case of William Andrews.

I have to say—maybe it is an appropriate place to put this in the RECORD—that I myself do not like capital punishment. I myself would only use it under the most heinous criminal circumstances. I would not allow it to be used indiscriminately, if I had my way. But I have no doubt there is an appropriate criminal sanction under certain circumstances, and it ought to be one that can be opted for by society.

I do not have any desire to put people to death. Nobody does that who thinks it through. I will tell you, we have to get tough in this country. Our kids are beset with drugs and criminal activity. They are beset with all kinds of other activity; beset with bad examples all over this country.

We have to get tough, and one of the best deterrents I know of is to let them know there is punishment if you are going to maliciously, in a heinous way, kill somebody, and willfully. You are going to face the possibility of the death sentence.

I have to say, from that standpoint, I am one of the most vociferous advocates of the death penalty. As Judge Henry Friendly, of the Second Circuit, once remarked:

> The proverbial man from Mars would surely think we must consider our system of criminal justice terribly bad if we are willing to tolerate such efforts at undoing judgments of conviction. * * * His astonishment would grow when we told him that the one thing almost never suggested on collateral attack is that the prisoner was innocent of the crime.

Judge Friendly summed it all up. Almost anybody has to wonder about a system where nobody really questions the guilt of the defendant, the criminal or the prisoner, if you want to use that term. It is almost never even considered, because everybody knows that the criminal committed the crime. What we have here is an attempt to try under any circumstances to vindicate that criminal's rights over the rights of the victims that he killed.

Mr. President, lawyers, judges, and laymen are astonished that the American criminal justice system allows postconviction review of sentence, and it allows it twice, not only in the State, but in the Federal courts, and many times thereafter.

I concede, regrettably, it may be too late in the day to abolish habeas corpus across the board, an action that this body debated in 1968. But it is even probably too late to abolish Federal habeas in a particular jurisdiction, as we did in 1970 when Congress abolished Federal habeas in the District of Columbia. That despite the fact that every critic I am aware of concedes that the experiment of abolishing habeas in the District of Columbia has worked remarkably well. No criminal defendant's rights have been abused because of it.

No, we cannot enact those sweeping changes today, even though the two previous Attorneys General of the United States called for the total abolition of habeas corpus. But we can ensure that the postconviction proceedings that we keep in place are not abused. The Thurmond-Specter-Hatch amendment gives us that assurance. The Graham amendment, despite all its good intentions, simply does not.

We know where we will be if the Thurmond-Specter-Hatch amendment becomes law. One year after a death sentence becomes final, Federal court review, in all but the most extraordinary cases, will be over. Petitions seeking a stay of execution from a single Federal district judge will simply be turned away as beyond the jurisdiction of the court to grant.

There will be no question about it. There will be nothing on which the court need rule.

We do not know where we will be if the Graham amendment becomes law. First, its Federal habeas provisions will not come into effect immediately after the death sentence becomes final. It would wait until all available State remedies are exhausted. The process usually takes several years, and again, in some instances, it takes as long as a decade, or even more.

The notorious Illinois case of John Wayne Gacy illustrates these points very well. That individual stands convicted of the murder of 33 young men. No one in American history has been convicted in connection with so many deaths.

Gacy has received 12 separate death sentences for his crimes. The murders were committed between 1975 and 1978, and Gacy was sentenced to death way back in 1980. But it took 9 years for Gacy's death sentences to be finally affirmed on direct appeal. You talk about protections of a defendant; 9 years, just on the issues of his death sentence. That is a not surprising amount of time, given the thoroughness of direct appeal and the nature of these crimes.

So the death sentences became final in May of 1989. What happens next? Under current law, which would not be changed by the Graham amendment, Gacy must exhaust every avenue of postconviction relief available to him in the Illinois courts. That could take another 3 to 5 years. We are up to 13 to 15 years, or even more.

Then and only then would he be able for the first time to turn to the Federal courts and begin the process of filing what will surely be a series of habeas corpus petitions. All that the Graham amendment requires basically is that each new habeas petition that Gacy files assert some new ground for relief. You have to be a pretty poor at-

torney not to come up with dozens of new grounds for relief on multiple occasions and on successive petitions for habeas.

How does the Thurmond-Specter-Hatch amendment handle this case? Today, habeas corpus would almost certainly be over and whatever further remedies that he might have, he would have to seek from the Illinois courts.

Had Thurmond-Specter-Hatch been law last May when Gacy's death sentence became final, the State of Illinois could have immediately appointed competent postconviction counsel.

That would have started the strict habeas deadlines under Thurmond-Specter-Hatch. Gacy would have had 60 days to file the Federal habeas petition or lose it forever. Once filed, the case would be finally decided, all the way through the Supreme Court of the United States, within a year.

If Thurmond-Specter-Hatch were the law last year, he would be unable today to seek a stay of his death sentence in any Federal district court in America. The final resolution of his 12 death sentences would be in the hands of the Supreme Court of Illinois, where it should be, and in he hands of the Governor of Illinois, where it should be, or, if a fundamental constitutional claim arises and he can show it, which I am sure he cannot, then his case could be in the hands of the Supreme Court of the United States of America. He would still have all those protections. If that were the case, we would not have to wonder, and neither would he, about the ultimate disposition of that case.

If the Graham amendment had become law last May, how would that have affected the Gacy case? Basically, not at all. The prisoner would be in exactly the same position he is in today, going through the slow, deliberate process of exhausting the State court remedies, even though he has been in court for 10 years on appeal already. At some point In the future, years from now, we can expect that Gacy would file his first habeas petition in Federal Court. How long would it take that court to rule on the case? We can be sure that without the deadlines of the Thurmond-Specter-Hatch amendment, it would be a very, very long time.

It is true that, under the Thurmond-Specter-Hatch amendment, a prisoner can bring a successive petition under extraordinary circumstances. That is one of its strengths. It is not inflexible. But notice how the successive petitions must be handled. First, and most important, no Federal district court can hear a successive petition until the relevant Federal court of appeals first grants authorization for the new habeas filing. That is a significant change in the law, which I guarantee will result in substantial cutbacks on the filing of frivolous cases.

In order for the appellate court to grant authority for the district court to hear a successive petition, the prisoner is going to have to make some very specific allegations showing his or her entitlement to relief. First, relief may be granted if there is newly discovered evidence relating to guilt or innocence. Everyone agrees on the importance of allowing unlimited review in such a case. I do not think any of us would deny that.

Second, the claims relating to the appropriateness of the sentence of death may be considered, but only if based on new factual evidence. To clarify this point, the amendment language specifies that the factual evidence necessary to establish a successive petition cannot be opinion evidence, but must be factual. That means we are not going to have the phony approach of every psychiatrist in the world coming up with some new reason to overturn the death sentence.

Habeas corpus sounds complicated, but it is not. It is about justice, and most people have a strong, accurate, innate sense of what is just and what is not. It is simply not just, by any standard, that a murderer such as Gacy in Illinois, or William Andrews in Utah should be allowed to delay his death sentence indefinitely.

Death sentences are unique. A prisoner sentenced to life in prison is at least serving his sentence while appealing. But in capital cases, every year that goes by without the execution of sentence is a year in which justice has been denied, denied to the victims of these horrible crimes and denied to society. Every year that goes by, justice is denied, especially when there is really no real reason to do what they are doing. That is what is happening all over America today.

Again, I point out that habeas corpus reform is all about justice. Ask the people of Illinois whether they would prefer a system of justice in which John Wayne Gacy's Federal appeals would now be over, or one in which they would still not have started, and would have the prospect of stretching as far into the future decades as any of us can see. What do you think their answer will be? If you can answer that question, I think you can decide between the Thurmond-Specter-Hatch amendment and the Graham amendment. Only the Thurmond-Specter-Hatch amendment really deals with the crisis in death penalty litigation.

I am hoping that our colleagues will put aside partisan feelings, winning or losing here, and do what is right for America. I guarantee that your law enforcement people will be very happy if you adopt the Thurmond-Specter-Hatch amendment here today. I hope we will, because it is the greatest opportunity that I have ever seen in the history of the Congress to do something worthwhile and substantial about this problem.

Senator GRAHAM has done a terrific job with the Graham amendment, and he has brought people further than I thought some could be brought, but it is not far enough if you want to make real inroads on this problem and do it in an intelligent way, a constitutional way, a protection-of-the-defendant way, but also in a consideration-of-the-victims way. This is the way to go. This is our chance. This is a chance to help every State in this Union to stop these frivolous appeals and the tremendous millions and billions of dollars that they cost. This is a chance to really do it right.

Keep in mind that at the same time, although we set time limits, we give them the right to competent counsel. That is something that really I do not think we have to do, because there have been competent counsel handling this anyway. But this is a guaranteed right that the Thurmond-Specter-Hatch amendment would do.

I hope our colleagues will look at this and vote for it. This is the last chance to do something substantive on this issue. If you do not want to do that, Graham is certainly an improvement over what the original Biden amendment was in this bill, S. 1970. But it does not go far enough and does not solve the problem. John Wayne Gacy, William Andrews, and all like them will continue to file successive petitions as long as their attorneys think up new ideas to keep them alive. Frankly, there has to be a finality about these things. There has to be a time when we say, "You know you did it. We know we did it." We know that there is a price to be paid for doing things like this, and we want people in this country to know it so that less of this criminal type of activity, heinous criminal activity, will occur.

That is why the dealth penalty is a deterrent. I know a number of prison guards who would be alive today had the death penalty been carried out on time. They were killed by people on death row. The fact of the matter is, we have to stop this. We have to stop this insanity of costing unnecessary billions of dollars just because some people do not want to see the death penalty enforced, when 85 percent of the American people are fed up with the criminal activities of certain elements of our society and want the death penalty to be an option, so we can deter some of this offensive criminal activity.

I hope our colleagues will support the Thurmond-Specter-Hatch amendment. It is the best opportunity we will ever have, and I do not think we will see this opportunity for a long time to come. As good as Graham

moved us forward, it is not far enough, because John Wayne Gacy and others like him will be alive for many, many years after Graham is enacted into law, assuming that it is.

If we pass the Thurmond-Specter-Hatch amendment, it will go a long way toward making me a supporter of this bill, a long way, regardless of the prior vote on the assault weapons. I have to say that this is one of the most important issues that this body has ever seen, and it is time to do something about it. With that, I suggest the absence of a quorum.

The PRESIDING OFFICER (Ms. MIKULSKI). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Madam President, I want to express my commendation for the remarks made by the able Senator from Utah [Mr. HATCH]. Senator HATCH is a valuable member of the Judiciary Committee. He is a profound lawyer, and he has expanded on this matter, I think, in a way that ought to convince anybody that the proposal we have offered is preferable and should be adopted by the Senate.

There is no use to pass any habeas corpus at all unless it means something, unless it is going to prevent this delay that has been going on for years and years.

In my State, only 3 weeks ago a man went to the electric chair. They took 11 years to send him there. He killed four people and he killed a fifth one, a women; he disfigured her for life. He went through all the courts. It went to the Supreme Court on four different occasions.

Madam President, it is just inexcusable that it would take that long. We have to shorten these things. We have a bill here that will shorten it to about 1 year and that will take care of it. If people really want a habeas corpus bill, now is the chance to get it.

The PRESIDING OFFICER. The Senator from Delaware, the chairman of the Judiciary Committee.

Mr. BIDEN. Madam President, I have refrained from speaking on my legislation to this point because I do think that the proposal offered by my friend from South Carolina, the ranking member of the committee, is solid improvement over that from where we started.

Let me say at the outset that both of these proposals are significant changes in the great writ; both of these proposals are significantly different than what the law is at this moment.

Reference was made earlier by my friend from South Carolina, who was, along with me, the subject of discussion by the Chief Justice, with regard to proposed changes in habeas corpus law. We have also been the subject of other discussions, and I believe the ranking member, Senator THURMOND, said that former Justice Powell had commented on the Graham proposal, Biden as amended by Graham, or however you want to phrase it.

But the fact is that former Justice Powell never commented on Graham, only on Biden and specific items about which Powell said Biden would add delay; that is, the miscarriage of justice rule that had been in my original legislation has been deleted. It has been deleted by Graham. So let us start off with the facts.

Let me say that there have been few legal actions that have been more venerated in our legal system than the great writ of habeas corpus. When we tamper with that, we touch the very roots of our system of justice.

For some time now complaints have been raised that habeas corpus is being abused to gain delay, not to gain justice. As a result, last year's drug bill set up a timetable for consideration of habeas corpus reform. Consistent with that timetable, I introduced legislation on habeas corpus reform in October of last year.

Despite some of the charges that have been leveled against it, I believe my bill is truly balanced reform. It reformed and streamlined the habeas corpus system without in any way forsaking anyone's constitutional rights.

My bill would have limited prisoners to one habeas corpus petition, and that would be the first time ever that the prisoners were so limited. Now they can file as many habeas corpus petitions, from 2 to 2,000, as they want.

My bill would have limited the time in which prisoners may file a habeas corpus petition, not just how many, to 1 year. Again, this would have been the first time ever that a limit was placed on the time in which a habeas petition could be filed. Now, a petition can be filed any time, from 2 to 20 years after the conviction.

Having said all that in support of the Biden bill, I must now add that I have come to the conclusion, somewhat reluctantly, to support the more conservative amendments offered by Senator GRAHAM and have agreed to their being attached to my amendment.

While I would prefer to leave my bill as it was, I am more interested in getting a bill that will, in fact, reform habeas corpus, than no bill at all.

Senator GRAHAM's amendment, in my view, makes this a more conservative and tougher bill, but overall provides the kind of balanced reform that I can support.

Senator GRAHAM's amendment limits prisoners to one habeas corpus petition in a 1-year time period, and it narrows the reach of my bill on four specific issues.

First, Senator GRAHAM's amendment offers more flexibility to the States to comply with the counsel provisions of the act.

One of the key elements of any habeas corpus reform, in my mind, is providing competent counsel to death row prisoners. In my original proposal, I provided specific standards to ensure that counsel would be competent: Five years litigating experience and 3 years of trying felony cases, some measure by which we know that in the most complicated and important cases of all in the criminal justice system an indigent person was, in fact, being provided with competent counsel.

Senator GRAHAM has persuaded me that the States are entitled to a greater role in the standard-setting process. His amendment added to the bill would permit the States either to adopt the standards in my original bill or set their own standards through an independent certification authority.

I believe that allowing the States to adopt their own standards is likely to achieve wider acceptance of these habeas corpus reform measures and, therefore, I supported the change in my original proposal.

The second difference between Senator GRAHAM's amendment and my original bill is in the area of second petitions. Senator GRAHAM's alternative is a much more stringent rule than the rule in my bill. Reluctantly, I have been persuaded this is a necessary compromise.

Under my original proposal, a death row prisoner could, in certain limited circumstances, file a second petition if he could show that it would result in a "miscarriage of justice" if he did not have an opportunity to file a second petition.

I continue to believe, based on the Supreme Court cases from which that term was taken—I just did not pick the term "miscarriage of justice" out of the air—that a "miscarriage of justice" exception is not the "loophole" that its opponents claim it to be.

Nevertheless, in the interest of clarity and to avoid any appearance that this reform does not mean what it says, that prisoners will be limited to one, and only one, habeas corpus petition, I have reluctantly decided that the best alternative is to drop the phrase in the exception of "miscarriage of justice," in the second petition. Thus, the Graham amendment limits the possibilities of any second habeas corpus petition.

At the same time, the amendment makes clear that innocence is not the only extraordinary case justifying an exception to the one petition rule, and obviously no one would want to suggest that a second habeas corpus petition would not be filed if in the inter-

im it was determined that there was evidence to prove that the person was innocent. I hope no one would think of suggesting that, although there has been a suggestion some may have.

But beyond that, not only in this extraordinary ability to file second petitions going to be available in the cases where there is evidence suggesting that there is innocence but the amendment makes it clear that innocence is not the only extraordinary case justifying an exception to the one-petition rule. An attack on the sentence, for example, where there has been perjury, is equally justified.

So, not only could you have someone who was, in fact, guilty, but the sentence not justified, if you could show that perjury as it related and impacted upon the imposition of the sentence. It seems to me that should be able to be shown.

The third difference between my original bill and the Powell Committee bill concerns so-called procedural default. Under that doctrine, a claim not raised by a defendant at the proper time in State court cannot be raised in the Federal habeas petition.

My bill would have made specific changes to the law in that area, changes I continue to believe have substantial merit. Prisoners should not be the victims of their appointed counsel's failure to bring claims in the State court, particularly where the cost may be their lives. It is a heck of a trade-off. Having an attorney who is not so bright not stating the claim that may have prevented you from being sentenced to death in the first place, to say, just because that not-so-bright attorney failed to understand the law and raise that claim—and we now know that they did not raise that claim—tough, we are going to hang you anyway. That does not seem to me to be particularly fair, as I said, particularly where the cost is one's life.

The Graham amendment is silent on this point, and I chose to accept that silence. In accepting that silence, I am making what I believe to be a major change in my bill, a change I hope will convince everyone that I am serious about tough habeas corpus reform. I have only come to accept the change because it is the price, I believe, that has to be given in order to achieve true habeas corpus reform and not some unusual proposal that does not warrant consideration and effectively obliterates the great writ.

Finally, the fourth difference between my original bill and the Graham amendment is on the topic of retroactivity. Until last year, prisoners generally got the benefit of changes in the law that were handed down after their sentence became final but before they had a chance to file a habeas corpus petition. Last year, however, the Supreme Court changed that rule, barring prisoners from the benefit of changes in the law that occurred after they were sentenced.

Now a prisoner sentenced 1 day after a major Supreme Court case cannot claim any benefit from that case, while a prisoner sentenced 1 day before can. That seems to me, where someone's life is at stake, not just nor sound. The mere fact that the Court did not recognize a right the day a person was sentenced, after they had filed their petition, seems to me to be overly technical. It seems to me to be overly technical to suggest they should not be able to have the benefit of that, as one who maybe did not file until the day after the decision.

My bill would have made a rather significant change in the law to correct that problem. The Graham amendment corrects it, but is considerably more conservative. It limits my original provision in two ways. First, changes in the law will not apply to prisoners currently on death row. Second, changes in the law will only apply when the Supreme Court has explicitly said they will apply.

Although this amendment does not express all of my wishes for reform in this area, it does satisfy my most serious concern. For the sake of compromise and for the sake of habeas corpus reform, I lent my support to the changes Senator GRAHAM has proposed.

Now we are coming very, very close. The differences, although real, are not nearly as broad nor as deep nor as wide as they were before this process began. And I hope there is a possibility of one of two things happening. One, us agreeing to compromise the true differences that are left, and do that as expeditiously as possible. Or, if we cannot do that, then for us to quickly yield back our time and vote on this matter rather than take all 6 hours. I do not want to cut off anybody's rights. I am not suggesting to do that at the moment. I am making a broad statement.

Let us either compromise the three or four differences that are left, and there are not many more than that, maybe five, and they do not go to the heart of habeas corpus reform, or get on with the business of voting on this amendment.

I see my colleague from South Carolina rising. I might note he has made significant compromise to this point. I might add, although he is a man with whom I have worked for years and with whom I have often compromised—hopefully we both believe for the benefit of the country and the interests of justice—I suggested a number of these compromises to him last night but I was not nearly as persuasive, nor nearly as incisive, nor nearly as effective as, apparently, the Senator from Pennsylvania [Mr. SPECTER] was.

There have been a number of compromises made. I am not suggesting that compromise has not been made. It has. And there is real compromise. But there are only a few outstanding issues that separate the two bills and I suggest we either resolve them by compromise or we, as soon as is reasonable to check on either of our sides who else would like to speak, prepare to yield back a lot of the time, to get on with the vote, to get on with some other issues in the bill.

I yield the floor.

The PRESIDING OFFICER. The Senator from South Carolina

Mr. THURMOND. Madam President, my original bill was a much tougher bill but I decided I would accept the provision that Justice Powell, a former member of the U.S. Supreme Court, recommended. There was a committee of judges set up and they studied this question and they made recommendations. That was going to be in my bill, to introduce here. But after talking to a number of Senators, including Senator HATCH, and including Senator SIMPSON, and the Senator from Pennsylvania, I decided we may even go further and make some modifications to that.

We cannot go any further. There is no use to pass this bill if you are going to compromise where it will not accomplish anything. These appeals in some cases have gone on for years. In my State, I just recited the case 4 years ago where a man killed four people, thought he killed another woman, and it was 11 years from the time he was sentenced to death until the time he was finally executed.

Senator HATCH said in his State a case went for 16 years. I understand in Oklahoma, one went for 18 years.

The public is disgusted with that. The public wants action. The public wants delay no longer. The bill that has been offered here by my distinguished friend will not get the results it should.

The bill we have offered here, we weakened it a lot, but it will get results. We cannot go any further. I appreciate my friend's suggestion. I worked with him all I could. I have gone, gone, gone as far as I can go.

The PRESIDING OFFICER. The Senator from Delaware.

Mr. BIDEN. Madam President, I am sure the Senator did not mean to imply the bill of the Senator from Delaware would allow anyone to file petitions for 18 years. Either bill will correct the aberrations he has suggested. There is no question about that.

I have a little bit of surprise, frankly, at one thing. After serving at the elbow of my friend from South Carolina for so many years now, I know of his great respect for the State courts. I know of his great respect for Justice Lewis F. Powell.

Justice Powell, a former Associate Justice of the Supreme Court, now retired, will, in testimony tomorrow before the Committee on the Judiciary, say the following with regard to a little thing that has always been of great interest to my friend from South Carolina, States rights.

I might add, the bill put forward by my friend from South Carolina cuts out the State courts at the front end. It says we are not going to worry about whether or not there is any movement through the State courts. We are going to go straight to the Federal courts, eliminate the State courts, and we are going to go to judges in the Federal court and set time limits. So far so good, but what about federalism and States rights? Justice Powell will say,

> Federal law now requires that before claims may be asserted in a Federal habeas corpus petition, they must first be presented to State courts. See *Rose* v. *Lundy*, 455 U.S. 509, (1982). This represents appropriate respect for federalism—a State court system should have an opportunity to address any errors on its own before intrusion by the Federal system.

That is the fundamental remaining difference between the bill offered by my friends from South Carolina and from Pennsylvania.

They do it in the name of expediting the process, and it does expedite the process arguably. It does because if you do not have habeas corpus going through the State courts, then you can cut off the difference between the Powell Committee report on this point and the position taken by the Thurmond-Specter bill. You could arguably save up to 2 years potentially, arguably. But I say only arguably becasue after you go through the federal system, they can still go back to the State courts for collateral review. It does not cut them out.

So the point that I am making is this: That in the name of being tougher, the distinguished Senator from South Carolina has cut out the right of the State of South Carolina to make its own judgments, at least at the front end, to correct its own errors if there are any at the front end. And he has not in fact saved any time because what will happen is that at the end of the Federal process, they will then be able to go back to State court and file a habeas corpus petition.

So the differences we have here are not fundamental in terms of time. The most significant difference is in terms of whether the State should be cut in or not. If the State does not want to have habeas corpus review, they can make that judgment. But I do not know how many times I have heard my friend from South Carolina say, let the States make those decisions. But do not say, as we are saying here, "State court, we're going to start without you; we do not want to know what you think about this; we're going to take care of it."

There are several other differences. Again, I do not mean to imply that my friend from South Carolina has not compromised. He has, and I appreciate that very much. I just think with a little more focus on the rights of the States and a little more focus on each of us giving a little bit more—because I have given a great deal as well from where I was —we could close this thing down very quickly and get on to other important issues. But I understand if we cannot do that, I am ready to vote on this.

I see one of my colleagues, Senator KENNEDY, who has not spoken on the issue and wants to speak on the issue. I assume he is seeking recognition. I am prepared to yield the floor.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. SPECTER. Mr. President, I seek recognition to make a brief comment or two as to what Sentor BIDEN had to say. I shall not be long. I think it orderly if I make a comment at this point.

When the distinguished Senator from Delaware says that appropriate recognition is not being given to States rights, I will forcefuly disagree with him on two counts: One is that the State has been given a full opportunity to correct its errors. The State is being given a full opportunity to do justice because it has that opportunity on the direct appeal.

When the Thurmond-Specter bill permits going into Federal court without going through State habeas corpus proceedings, we are not saying a thing about the States rights to have habeas corpus. We are dealing solely and exclusively with delineating when the Federal court will entertain jurisdiction. That is the prerogative of the Congress of the United States to say and define when you may go into the Federal courts on habeas corpus. It has always been the Federal law, as established by the Congress, that the jurisdiction of the Federal court was not extended in habeas corpus until there had been a collateral attack in State habeas corpus proceedings.

So our responsibility, simply stated, is to see to it that Federal habeas corpus does not take 8 years or 18 years.

When the distinguished Senator from Delaware says you can go back to the State courts under the Thurmond-Specter bill, he is exactly right. But it is also true that you can go back to the state courts, under the current system where you have direct appeal, State habeas corpus, Federal habeas corpus. You can always go back to the State court at that stage. There is nothing at all to prevent going back to the State courts as long as the State courts will entertain that claim.

But the very significant advance from the legislation which Senator THURMOND and I are offering is that you do not have to exhaust meaningless State habeas corpus in order to get into the Federal courts. That is for the Congress to determine when you can get into the Federal courts.

Those who have practiced in the State courts and who have handled these State habeas corpus proceedings know that they are pro forma; that after the State supreme court has upheld the conviction of the death penalty and you go back to a lower court and reassert the same claims, the lower court is not going to disagree with the State supreme court, nor is the State supreme court going to disagree with itself.

When you go to the Federal court for habeas corpus, then for the first time you have an independent review. The only issue which the State court can litigate differently in habeas corpus than on direct appeal is the question of competency of counsel, and that it can do. But there is adequate opportunity in dealing with the defendant's substantive rights to take that up in the Federal court habeas corpus.

If I might have the attention of the Senator from Delaware, what I just said he has heard before and I think he might agree with it if we were in the Cloakroom. I believe we can deal with the State habeas corpus issue and I believe we can agree with the time parameters. I am not in concrete on 160 days or some other timeframe. I think we can work out that timeframe, although I think we do it in a way that does not allow unncessarily large blocks of time.

The two critical issues which I think have to be resolved are the issues on innocence or penalty. I want to compliment in the most eloquent terms the willingness of the distinguished Senator from South Carolina to agree to the more expansive view, beyond what the Powell Committee said. The distinguished Senator from South Carolina had moved from his bill in the first instance to the Powell Committee and then made a meaningful move from the Powell Committee when we had extensive discussions.

The distinguished Senator from Utah, Senator HATCH, was very eloquent in articulating the importance of considering in a subsequent petition the issue of death penalty beyond innocence, the issue of penalty if there are new facts—not opinions, not psychiatric judgments which can be obtained in a different fashion, but a factual matter. When the distinguished Senator from South Carolina heard that contention and thought this might bridge the gap, he was willing to accommodate his own preference.

In discussions in the Cloakroom with some of the distinguished Senators on the other side of the aisle, I think that is something which—Senator THURMOND's view—as modified, I think, would be acceptable.

The last issue which, candidly, is the toughest issue is the issue on intervening rights. There, again, concessions were made in the final analysis not to have additions made to the sentence which reads, on the issue of intervening rights:

A court considering a claim under this chapter shall consider intervening decisions by the Supreme Court of the United States which established fundamental constitutional rights.

It is my view that this language is a good accommodation of some very tough positions on that matter. I believe that if we cannot come out with an agreement, it will have much more force on this issue when we take it to conference, much more force and weight with the American people than if we decide this issue within a 10-vote margin. I think the most we are going to have here is 55 to 45, and we may well prevail on this side of the aisle.

But however we prevail, the force of our position will have so much more acceptance by the public, not quite analogous but sort of like talking about the desegregation decision where the Court came to a unanimous opinion on a very important matter in order to have that kind of public confidence. I submit that we are really right down to that one sentence on intervening rights which is the crux of reaching an agreement.

I thank the Chair and yield the floor.

Mr. BIDEN. I am not sure that I disagree. The Senator may be correct, that it is the most important distinction and difference. I am happy to continue while others seek the floor to see if there is anything we can do to bridge that gap. But in the meantime, when we started this little bit of discussion, Senator KENNEDY, who was seeking recognition, must have thought that both of us were inclined to go beyond our inclination to go in this debate at this moment, and he has left the floor. So unless someone else is seeking recognition at the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BRYAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. (Mr. BIDEN). Without objection, it is so ordered.

Mr. BRYAN. Mr. President, I thank the Chair.

Mr. President, I am proud to be a cosponsor of S. 271, introduced by our distinguished colleague, the senior Senator from Florida, at the beginning of the 101st Congress. I know, having worked with him, that he has labored mightily over the last year or so on habeas corpus reform.

I know it is an interest that the President shares, and that you have worked with him on.

I applaud both his leadership and your own, Mr. President, in bringing us to the position where we now consider the essence of the Graham amendment.

Mr. President, this is not a debate about whether habeas corpus reform is necessary. I think all would agree that it is. Current habeas corpus procedures allow multiple postconviction challenges to State criminal convictions in Federal court. Although not mandated in the Constitution, they have in fact been in practice for more than a century, dating back to 1867, and have in my judgment been abused by many prisoners to continue to challenge their conviction in the Federal courts.

In 1945, the Federal courts were confronted with petitions for habeas corpus in 535 cases.

Forty-five years later that number had grown to, indeed exploded to, some 10,389. That is an increase of 1,800 percent, clogging the criminal justice system and providing for endless delay. Responding to this growing concern, the Chief Justice of the Supreme Court created the Ad Hoc Committee on Federal Habeas Corpus in Capital Cases, chaired by former Justice Lewis Powell. The Powell Committee, formed in June 1988, issued its report to the Judicial Conference in September 1989.

I had the privilege last evening, Mr. President, to have a chance to visit with Justice Powell about habeas corpus reform, and he remarked that, although there were different views aired by the committee, there was a universal agreement by all who made presentations that reform in habeas corpus procedures were necessary.

The committee found, after deliberation, that only a fraction of the worst murderers convicted and sentenced to a capital sentence actually had that sentence carried out. Today there are 2,200 convicted murderers on death row awaiting execution, 52 in my own State of Nevada. Justice Powell also stated that the average length of time between conviction and execution has been more than 8 years.

Mr. President, I submit to you that this delay between conviction and the carrying out of the death sentence is unacceptable. The criminal justice system, while designed to protect constitutional and procedural safeguards, should be swift and fair, protecting the public at large, and providing justice for the victim, as well as justice for the accused, and finality as part of the judicial process. It has often been said that justice delayed is justice denied. That adage has been most frequently applied to the litigants themselves. Mr. President, I suggest that the public is also entitled to justice, and when justice is not carried out swiftly, the public is deprived of justice as well.

The Powell committee reported that a major problem with the current system is the need for qualified counsel to represent indigent prisoners at all stages. Justice Powell also recommended that a time limit on the filing of habeas corpus petitions would reduce unnecessary delay in the criminal justice system.

Mr. President, the amendment offered by the distinguished Senator from Florida, accepted by you, provides for a statute of limitations for filing of Federal habeas claims, a right to competent counsel for indigent inmates, limits in the filing of successive petitions, and rules for retroactivity. Many of these reforms were recommended by the Powell committee.

The amendment, which has been accepted, provides for a longer time limit on the filing of Federal habeas claims than that recommended by Justice Powell. The limit of 1 year would, in my judgment, provide ample time for counsel to be changed and thoroughly briefed throughout the trail and the appeals process. It does not—I emphasize this—allow the clock to continue to tick endlessly for years at a time, clogging up the criminal justice system with excessive delays.

This amendment would limit successive or second petitions for review of original convictions and of sentencing where relief is based on a claim not previously presented in the State and Federal courts. In other words, only on very extraordinary conditions would successive petitions be allowed.

The Graham amendment embodies the essence of the guidance suggested by the Powell committee, Mr. President, and provides for sensible and essential reform of the Federal habeas process.

I commend Senator BIDEN for his leadership in processing the omnibus crime bill and that of our colleague, Senator GRAHAM, in initiating the amendment which is before us today.

I yield the floor.

Mr. SIMPSON. Mr. President, this is a very important part of this legislation. I think the American people have made it very clear that they are just plain sick and tired of the endless delays on appeals of murder convictions. Convictions that are for especially vicious and foul murders. That is what we are talking about. Also, remember that the death penalty is imposed by a jury.

I am convinced that the Thurmond-Specter legislation is an excellent re-

sponse to the demands of Americans to curtail these numbing efforts that just continually drag on in our judicial system. Unlike the Graham-Biden alternative, the Thurmond-Specter package applies to both Federal capital cases and to State capital cases. I cannot understand why the Graham-Biden proposal does not specifically recognize a Federal death penalty. I cannot understand that.

With respect to the appointment of counsel for indigent defendants, the Thurmond-Specter substitute is tougher. It requires that in cases where a defendant does not want court-appointed counsel, the court then makes a specific order in the record which reflects that the defendant made his choice "knowingly and willfully."

This section also recognizes that the petitioner might not be indigent. These people are not all just poor beggers running around, being duped by the system just so they can be salted away 6 feet deep. That is not what is happening here. There are petitioners who have learned to milk this system in spades. That is who we are talking about. There is a possibility that a petitioner may not be indigent and, therefore, is not entitled to appointed counsel at the Government's expense. This finding would be made part of the record as well.

The Graham-Biden proposal apparently does not think it should be necessary to make defendants pay their own way whenever they can. That is a puzzling part of this. By following the Thurmond-Specter proposal, all defendants are ensured that they have representation by competent counsel.

Arguments by convicted murderers that their original attorneys were incompetent have been so much overused, and abused, in habeas petitions to a degree that is almost beyond comprehension. Both of these proposals have strong provisions that ensure that attorneys representing these murder defendants are very competent. This will eliminate a great many frivolous arguments on that issue.

I think a major difference to share with my colleagues is in the area of successive petitions. The problem with the Graham-Biden proposal is that their language creates a giant loophole in the law, the kind of loophole that has already generated 8- to 15-year delays in these matters. The Graham-Biden proposal overturns retroactivity across the board, which allows many appeals to a jury decision to impose the death penalty. That has nothing to do with guilt, only whether the death sentence is appropriate the second time around. The Thurmond proposal imposes significant restrictions on how a convicted murderer can challenge the jury decision to impose death in a second habeas petition.

The Thurmond-Specter proposal says that a second habeas petition can only be raised if the defendant gets approval from the appropriate Federal circuit court of appeals. This procedure does away with the need to get a certificate of probable cause, which is current practice. This practice is also greatly abused. Some district courts issue these certificates very casually.

The Biden-Graham proposal creates a presumption that the defendant's position has merit. What an absurdity. This all but assures that the convicted murderer will be allowed to file successive petitions. It is this precise practice which we are trying to reform.

The Thurmond-Specter proposal corrects the problem; the Biden-Graham proposal perpetuates the problem, perhaps makes matters even worse. But both proposals allow the petitioner to challenge the guilt phase of the trial. The proponents take great pains to eliminate any risk of executing an innocent defendant. No one in this Chamber is interested in executing an innocent defendant.

We seem to start on the premise that some are here to save the innocent and others are not. We are all here to save the innocent. That is not what we are talking about. Get that out of the debate.

The next big difference is the time allowed to file a habeas petition in death penalty cases. The Thurmond-Specter bill gets serious. We allow 60 days after the judgment and sentence in the State court have become final. The Biden-Graham proposal gives the defendants a full year. Believe me, they will wait as long as possible in the hopes that evidence or witnesses will be lost and the memories fade. Also, and please hear this, the Biden-Graham proposal has written another 1-year and 3-month delay into the procedure, during which the convict and his attorney can dream up a magnificent good excuse for filing late.

Since there is supposedly, under this legislation, a competent attorney on hand beginning at the trial—that is what everyone would want to see—there is no reason at all that the paperwork cannot be ready in time to file within 2 months, as the Thurmond-Specter proposal states. So here it is, the Biden-Graham with still another 1-year and 3-month delay, or Thurmond-Specter with a 2-month delay. Take your pick.

The Thurmond-Specter proposal is a very tough reform bill. Again, as I read these proposals, we get down to two really big differences. In the Biden-Graham proposal there are some giant loopholes, big enough to drive a "Wyoming cattle truck" through. There are built-in delays, at least 2 years of delays, as opposed to a maximum of 1-year in the Thurmond-Specter bill.

Which version do our constituents want? We are going to find out soon. I read my mail, not just all the mail from Wyoming but some from around the country. The American people are sick and tired of watching these vicious, brutal animals, drag the same old nonsense through the courts over and over again for years and years.

Senator WILSON just referred to a man on death row for 11 years, who is appealing again, as I speak. He is one of the most active locker-room lawyers in America, and that is what we have here. These are people who get into the State library, get into the State law libraries or the Federal libraries and are just bright enough, and clever enough, to just crank it out. Somebody is always there to protect them. They are smug, arrogant, cynical and twisted. I do not know why our system should have to break down under their prowess.

So let us certainly be more than fair to the defendants. We really do that in America. Anyone who says we do not take care of criminal defendants in America is smoking something.

We have the Miranda decision which was, in its own way, good when it was decided, and then was terribly abused. We have had other good decisions like that, they get used, abused, and then the people go on to greater crimes.

But let us also start being fair to the people who pick up the tab for these endless delays and frivolous appeals. Let us also be fair to the voters of at least 37 of the States which have voiced their concerns by having capital punishment statutes. Let us exhaust the remedies before we exhaust all of the resources of the judicial system, pandering to a clever lot of manipulators and often their counsel, too. I think that time has come.

We are a remarkable, civilized society, and we do meet our obligations to the lesser of society and to those less fortunate, the disempowered, and all of that. But for heavens sakes, we all see this abuse. No wonder people are frustrated, pained, and some of them—especially family members of someone who has suffered at the hands of one of these people—completely lose their respect for the laws of the United States. That is not good. They become scofflaws of society because they know that nothing ever gets done. Under this provision something will finally get done.

Let me just note with regard to retroactivity, which is a burning issue as any other part of this, that the Biden-Graham proposal allows full retroactivity with new rules, and overrules a string of Supreme Court cases in the process. I think that opens the floodgates to a deluge of new petitions. Section 2267 of the Thurmond proposal allows retroactivity application of new rules on fundamental, constitutional

rights, only in habeas proceedings brought under this chapter. There are many that participated in the crafting of that section. I was one of these people and I can tell you that the Thurmond-Specter proposal is intended only to codify existing law and not to overrule that law.

So, those are some of the things that are of concern to me. We will soon vote on this. We are either doing a crime bill or we are pretending to do a crime bill. And we are either doing a bill that is up front—I would hope that we could do a bipartisan crime bill.

I have watched Senator BIDEN, the chairman of the Judiciary Committee, and Senator THURMOND, our well regarded and respected ranking member. These two men work closely together. It would have been good if we could have come up with a bipartisan bill. We are going to craft something, going to get into a couple of more "hot ones" like the Racial Justice Act—boy, tell us what that one is. The needless trickery and the games in here are what makes it tough to legislate.

If one would just get up on their hind legs and say, "I hate the death penalty and would not have anything to do with it," that is guts and that is courage. But when you only then play around with words and semantics—I have heard enough of that in the last 2 days. I went to law school and then practiced law for 18 years. I felt like I had been out to lunch during most of the discussion yesterday. You have some very bright people, speaking almost in tongues—I would love to know sometimes what they are speaking.

I think we should have a rule. I am just going to throw this in—I know it will receive very little acknowledgment or credence—that before you can come here to weave your wonders on the staff of a Senator you must first go practice law somewhere in real life for 5 years. See how it really is out there among the great unwashed. It would be a shocking thing. I have said it before right from this podium. These are bright, creative, privileged people who are often on the Law Review. They are skilled. They are remarkable. We should heed them. But we must be careful when they pile distinction upon distinction and nuance upon nuance and try to get away with it. Not one of them really knows where they want to go, they have lost the big view and some have lost their way.

So, let us get in here and put together a thoughtful bill, not to see who can diddle the President or who can get to Senator JOE BIDEN, or who can hang who on the most votes on the death penalty, or who will be called a racist because we did not do a right thing on a racial justice bill. That does not have a thing to do with it. The racial justice caper is nothing more than a ploy to avoid standing up to be counted if you do not like capital punishment.

So, to trot that thing out—a bill that says you must execute as many blacks as you will whites—how is that for a marvelous and stupid kind of a proposal? Call it a racial justice thing if you want, but in certain areas of this country you are going to have capital punishment on too many blacks. In other areas you are going to have capital punishment on too many whites. Who among you wants to impose a quota on imposition of the death penalty?

What does that have to do with anything in the real world? If you commit a crime, whether you are black or white, if you are responsible for it, you will pay the ultimate penalty called death, as directed by a jury of your peers. You then go through the appeal process after that jury trial, through the appellate processes, to the Supreme Court, and they say "you have been sentenced to death, a jury unanimously found that sentence weighed all of the mitigating circumstances, and you will die."

Once that message goes out in this country, we will have fewer problems in our society. There is no question in my mind that is true. It does not have a thing to do with whether you are black, or white or brown. It has to do with the fact you have committed a terrible crime, against your fellow man, in a most heinous and ugly and foul way.

As I say, in my ragged practice of the law, doing a couple of first-degree murder trials and some other "little capers" with human beings, I learned one thing above all: you must remember that there are animals in the world. They are called human animals but they are, indeed, animals. The sooner we arrive at a sensible way, an honest way, a confident way, a caring way—there is no need to chuckle that one aspect away either—to give them every benefit this marvelous society can give them, the better. And if they fail at every step of the proceedings, then shut it off. Get on with the action. And the action is the finality of the death sentence.

As soon as society—who have been ready to go on that—and the criminal element know that this is the way it is in America, I honestly believe things will begin to turn around in this country. And as soon as we deal with juveniles who commit adult crimes as if they were adults, we will begin to make progress there too.

I do hope Senator THURMOND's proposal will receive the careful attention of the body. I think it is a darned good proposal. In fact it is pretty close to what could be a bipartisan proposal except for nuances of meaning, which have really shrouded it and really we have almost reached an absurd and perhaps indistinguishable distinction which in my mind may not actually make any really significant difference.

The PRESIDING OFFICER (Mr. BRYAN). The Senator from South Carolina.

Mr. THURMOND. I wish to compliment the able Senator from Wyoming for bringing out the points he did, the differences between these two proposals. There is no question about it, if you want a tough proposal that will get action, that amendment we have offered will do it. We feel, and the Justice Department feels, that the amendment offered by Senator BIDEN and Senator GRAHAM will not do the job. Why take a chance? It would be better to pass nothing, unless we are going to get results.

As I stated, it has been delay, delay, delay. People have been killed. It has been years and years before the sentence is finally executed. It just does not make sense.

I remind the Senate, too, that these organizations I am going to read endorsed my original bill, which was a tougher bill. We came down to the Powell amendment and then we have even modified that.

These organizations even went for the other bill: The International Narcotic Enforcement Officers Association; Airborne Law Enforcement Association; Society of Former Special Agents of the FBI; the National Troopers Coalition; the Virginia Association of Chiefs of Police; the Victims Assistance Legal Organization; the Federal Criminal Investigators Association; and the FBI National Academy Associates. The attorney generals in a majority of the States, a majority of the attorney generals in the whole United States including the Attorney General of the United States, approved my original bill.

We have tried to go along here to get a consensus and we weakened our bill to try to do that. All these organizations here were for the original bill. A majority of the attorney generals were for the original bill. The Attorney General of the United States was for the original bill. President Bush was for the original bill.

Are they worth listening to? These people have dealt in crime all these years and what they want is something reasonable that will get results. What about the victims here, who have been killed? Their families suffer, years and years, before there is final completion of the act. It just does not make sense.

If my colleagues want a habeas corpus bill to get results, vote for this bill. If they do not want that, vote for the other bill.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I yield the distinguished Senator from

California such time as he may require.

The PRESIDING OFFICER. The Senator from California [Mr. WILSON] is recognized.

Mr. WILSON. Mr. President, I thank the distinguished manager. I rise in support of his amendment.

The passion he has just exhibited is entirely warranted. It brings to mind the passion, not spoken but felt, by crime victims in my State. Mr. President, there are now a number of crime victims organizations in California, with a growing number of members, unhappily, as the number of victims increases.

What we have before us is an amendment that seeks to limit an abuse of the use of the writ of habeas corpus. The writ of habeas corpus has long been recognized, in the United Kingdom, the United States, in my State of California, as the most powerful remedy available in the law for curing some miscarriage of justice. It overcomes almost all other considerations in allowing a court to consider whether or not extraordinary circumstances exist in a criminal case which demand extraordinary relief. It can be said that habeas corpus is at the very foundation of our system of criminal justice.

But, Mr. President, having said that, it also needs to be said, as has been said by the distinguished Senator from South Carolina, this important remedy has been very much subject to abuse; in his State, in mine, and all across the Nation. As death row populations swell, as inmates on death row grow older and older, there is clear evidence that the system is not working.

In my State, twice, the people have voted—not the legislature, but the people have voted—for a remedy which they felt necessary in order to provide them adequate protection from violent crime. They have voted a death penalty on two occasions.

But, Mr. President, in the years and years that have ensued since they did so, they have been denied the protection of that death penalty. They voted for it in the belief that the death penalty is a deterrent, at least in those cases where a crime of violence has taken place, not in a fit of passion but as the result of premedition.

They are entitled to that protection, it seems to me. But what is very clear, Mr. President, is that even as we are debating this here, as debate ensues in my State and others, there are people who continue to argue that the death penalty is not a deterrent. Mr. President, it is not a deterrent if it is not enforced.

Simply stated, what the Thurmond amendment seeks to do is to give some guarantee that when the accused has been afforded the remedy of a judicial system that allows for appeal and for the use of the habeas corpus petition, that there be some finality. Because we are all, I think, whether lawyers or not, familiar with the bromide, the maxim that comes to first-year law students in their study in the criminal law, that justice delayed is justice denied.

Well, so it is, but not nearly as much to the accused as, after trial, to those who are crime victims, who have to relive the ordeal that they first experienced when either they experienced the trauma of crime or when they, worse, lost a loved one.

The other effects it has spread far beyond the immediate victims of crime, Mr. President, to those who, as general members of society, begin to feel that the criminal justice system will not protect them.

I hope I will be pardoned for the pride with which I speak of law enforcement in my home State. Whether I go to the office of the U.S. attorney in New York or to FBI headquarters here in Washington, or the office of the DEA in North Miami, I have been told, "You have as fine a law enforcement in California as exists anywhere in the world. They are the most dedicated; they are the most conscientious; they are the most professional. They are highly skilled."

The fact of the matter is that ironically in our State, the streets are needlessly dangerous; in part, because of a drug traffic that is seeking a large and lucrative market; in part, because the State criminal law is far too lenient.

But most recently, Mr. President, the focus has been on the failure of the criminal justice system, both State and Federal, to afford some finality to make real the threat to criminals that if they take a life, they will have to pay with their own. The death penalty has not been a deterrent because it has not been enforced and it has not been enforced because of the abuse of the habeas corpus process.

Currently, the focus is upon Robert Alton Harris. Mr. Harris has been on death row in the California penal system for over 11 years. He has just recently filed a fresh petition. Those who have been reading the newspapers and reading, again and again, the recital of the facts of this grim case in which this cold-blooded murderer shot down two teenage boys in cold blood and then ate the hamburger of one, found, through comments at the time, that his callousness was almost beyond belief.

The facts in the case are not in dispute. He has even filed a petition on the grounds, Mr. President, that it is cruel and unusual punishment that he has spent 11 years on death row when, of course, the length, the duration of his stay there has been affected by the filing of one petition after another on his behalf. It is not unlike the celebrated case of the killer who threw himself on the mercy of the court declaring himself an orphan after he had murdered his parents.

This is a situation in which the ironies abound. But the intolerable irony is that with all of the effort, all of the risk taken by conscientious law enforcement officers, with all of the tax dollars expended on a criminal justice system that begins with detection by these law officers and then takes the criminal accused through the courts in a lengthy, lengthy system that, in my judgment, fully protects the rights of the accused but does not begin to protect the rights of the victims, with all that is spent on probation, all that is spent on that court system, all that is spent on parole, on corrections, the people of my State, and I suspect many others, feel that they are not adequately protected.

Recently, a rather shocking survey revealed that 1 in 5 in my State had experienced some criminal violation within the past 5 years and that a majority expected that they would within the next 5 years. Mr. President, that is intolerable. We can speak all we wish to of affording opportunity in a variety of ways.

We spend a great deal of time on this floor, and quite properly, talking about education, about the needs to make our young people competitive in a global marketplace so that they can compete and win. We all know that for too many, their horizons are limited and extend not much further than an ambition to be a member of a drug gang.

We also know that for a great many, their lot in life will perhaps include being crime victims, in part because this drug traffic is so rampant, but, in part, Mr. President, because the risks are seen as rather minimal, even in the extreme case of the taking of a life.

What happens when someone decides that in order to support a habit he will rob a liquor store or a gas station late at night when there is a single attendant and decides that the odds are with him if he pulls the trigger because he may eliminate the sole witness to his crime? And, in fact, if he is caught, in some States where there is no death penalty, I say the odds very definitely favor his pulling the trigger. But even in those States where there is a death penalty but where it is not enforced because of the abuse of the habeas corpus process, the effect is much the same. Rational criminals clearly figure that the odds are in their favor, not in favor of the citizen; that the profits greatly outweigh the risk to them even in the most extreme case where they are paid to eliminate a witness, paid to eliminate competition in the drug traffic.

Mr. President, I repeat, that is not a tolerable situation. It is not tolerable

to have public confidence undermined with respect to the most basic right that a civilized society should afford its citizens: The right not to become crime victims, the right to feel safe in their own homes and unafraid to leave them. That is not the case in my State. It is not the case in all too many where people are afraid in their homes and afraid to leave them.

Mr. President, what is being sought here is not a denial of the due process and the Bill of Rights protections that we celebrate, and quite properly, with pride in a Nation that has afforded fairness and justice unparalleled in the history of civilization. But to do so, Mr. President, does not require that we continue to abuse the process in a way that undermines quite reasonably the confidence of ordinary citizens, decent people, entitled to expect and receive the protection of the law. That is what is at stake here. That is what the Thurmond amendment is all about.

I cannot urge too strongly that we adopt it because if we fail to adopt it, Mr. President, once again the American people will have heard that the Senate of the United States has had the opportunity to make them safer, to attempt to at least change the odds in their favor. If we fail, they will rightly ask why. Why is it that we have this overweening concern for the rights of the accused at such great cost to the rights of the citizens? Why do we not worry as much about the victims of crime as those who are thought to be victimized by a criminal system which does not afford them limitless rights of appeal?

The answer, Mr. President, is that it is not justice to those ordinary citizens. It is certainly not justice to those crime victims if we perpetuate a system that permits its abuse in a way that makes it impossible for those citizens to feel confident because the reasonable expectation is that, in fact, the death penalty will continue to be on the books as a dead letter, unenforced because we permit limitless filings of petitions for habeas corpus.

That is the situation now. It is wrong. We must change it. The Thurmond amendment will change it.

I commend my friend from South Carolina who has many virtues. But perhaps the most important of those is tenacity in the cause of justice to citizens. And he recognizes that that system is not working and that the time has come to change it. Indeed, when the number of death row inmates across the Nation numbers in the thousands, it is past time to change it.

Mr. President, no amount of words will bring back Wyatt Loggins or Robert James DeVaul, who were among the victims of serial killer Randy Kraft. No amount of words on this floor will bring back Michael Baker and John Mayeski, the two teenage victims of Robert E. Harris, nor will they bring back Dayle Okakaki, a victim of the nightstalker, Richard Ramirez.

The list of death row inmates is exceeded greatly by the list of their victims. The comfort we can give to those who are the loved ones of those victims is rather limited, but at the very least they are entitled to believe in this country that we will do justice. We do not do justice with a system that permits those who have been convicted by facts that are no longer in dispute to continue to escape the penalty that the law provides by the abuse of this process.

Mr. President, the time has indeed come to adopt the Thurmond amendment.

I thank the Chair and yield the floor.

Mr. THURMOND. Mr. President, I commend the able Senator from California for his very pertinent remarks. They are right on point. He has again emphasized that the people of this country are sick and tired of the delay, delay, delay in the criminal justice system. Cases go on, as we have stated here, 7, 8, 10, 12, 16, and in one case we understand 18 years. How do the families feel? Put yourself in their shoes.

Mr. President, I now yield to the distinguished Senator from Iowa for 15 minutes.

Mr. GRASSLEY. Mr. President, I commend the Senator from South Carolina. I thank him for yielding to me. I support his compromise.

The question to ask when we inquire whether the Federal habeas corpus system needs reform is not what procedures will apply to a capital defendant who has only "one bite at the apple" but what procedures will apply where the defendant has already had numerous "bites at the apple," including having the same claims heard by several different State and Federal courts?

Congress can change these procedures—established by statute in 1867—without doing violence to any right already guaranteed to individuals under the Constitution.

The present Federal habeas corpus statute has fostered a system that no longer seems to be interested in the factual guilt or innocence of a defendant.

Instead, prisoners appear to be encouraged to attempt to persuade some Federal judge that some kind of technical error has occurred during the criminal prosecution against them.

The present system allows a State prisoner to relitigate virtually every aspect of his or her confinement—from pretrial through postconviction proceedings—an unlimited number of times throughout their term of confinement.

The elevation of procedure over substance deprives the criminal justice system of a crucial element of deterrence: Swiftness and certainty of punishment.

Particularly in capital cases, the present habeas corpus system undermines the effectiveness of the death penalty as both a deterrent and as a legitimate expression of society's moral outrage concerning the most abominable of intentional killings.

Consequently, the will of the people in the 36 States that have a death penalty is being thwarted by repetitious litigation.

Because of my strong belief in federalism and my preference that the States make their own decisions in most areas, I have supported habeas corpus reform since the beginning of my service in the Congress.

My goal is to eliminate pointless and duplicative relitigation of claims that have already been fairly considered and decided by State courts at both the trial and appellate levels.

Only then will we make it possible to obtain real justice by eliminating unreasonable and illogical results in criminal proceedings.

Mr. President, our goal should be to avoid inconsistencies in the treatment of similar cases.

Unfortunately, the result of the present habeas system encourages inconsistencies.

We need to establish a standard that affords protection for both a defendant's due process rights and the integrity of State and Federal criminal procedures.

As we all know, the current habeas corpus system allows for no end to the litigation of a State criminal conviction. This results in using the Federal courts to review ad nauseum convictions in State courts.

We need to establish some realistic and logical finality to these cases.

I believe that reasonable time limits—similar to those contained in the Thurmond-Specter proposal—afford every State prisoner an opportunity to apply for Federal habeas corpus relief following the conclusion of the State criminal process.

Reasonable time limits will create a means for control of the filing of petitions years or even decades after the natural conclusion of criminal proceedings, because, as a practical matter, the passage of time may make reliable determinations of asserted claims—either during a retrial of the petitioner or during another collateral proceeding—difficult or practically impossible.

Consequently, without in any way prejudicing the substantive rights of State criminal defendants, a system of reasonable time limits on habeas cases maintains orderly procedures already contained in other areas of Federal

criminal law and it assures finality of State criminal adjudications.

Mr. President, we cannot allow our search for a true, meaningful, and workable solution to the present Federal habeas corpus morass to be led astray.

We cannot afford to merely go through an exercise in reshaping reality to fit certain slanted notions of fairness or even right and wrong.

If our efforts result in only the illusion of reform, we face the prospect of complicating the ever-growing gridlock in capital litigation.

We must balance greater certainty and finality in capital sentences, in exchange for a full and fair adjudication of a defendant's claims.

As I have said before, the question is not what procedures will apply to a capital defendant who has only "one bite at the apple" but what procedures will apply where the defendant has already had numerous "bites at the apple," including having the same claims heard by several different State and Federal courts?

A reasonable and rational habeas appeals system will not allow claims to be raised in successive Federal habeas corpus petitions that have nothing to do with the question of defendant's factual innocence or guilt.

A reasonable and rational habeas appeals system will not allow claims to be raised in successive petitions despite the absence of any justification for the defendant's failure to raise the same claims in earlier proceedings.

By encouraging claims unrelated to the factual guilt or innocence of the defendant or by encouraging relitigation of claims from the sentencing phase of the capital proceedings, the goal of finality is defeated.

Furthermore, I believe very strongly that we cannot abandon well-settled law regarding the difference to be given State procedural rules.

We know that delay results in effective abridgment of the sentence of a capital defendant.

Therefore, convicted capital defendants have a greater incentive to withhold claims for use in later proceedings than any other convicted criminal incarcerated in prison.

Our actions in this area of law should not establish the dangerous presumption that only by depriving the States of procedural bars and defenses and expanding the scope of Federal habeas corpus review and the role of Federal courts, can there be any assurance of adequate constitutional review of capital cases.

Mr. President, we need to focus on what actually happened during a particular criminal proceeding, rather than on issues such as the background or compensation of a lawyer representing a capital defendant.

I believe that we should be more concerned with the impact of the habeas system on America's citizens and on the victims of crime, actual or potential, rather than being concerned with its impact on America's lawyers.

It seems to me that if we are really interested in serving the public interest by ensuring that capital cases will not be delayed because of, among other reasons, a lack of qualified counsel, we must carefully consider options on how the habeas appeals system should be reformed.

I have attempted to keep in mind four goals as we go about the task of reforming the Federal habeas corpus system:

First, a State capital defendant's case should be afforded a full and fair series of appeals—both directly and collaterally—based upon the prisoner's guilt or innocence and the procedures followed during the State's criminal trial proceedings.

Second, when the capital defendant has exhausted his State remedies, he should be afforded another series of equally full and fair appeals in the Federal courts.

Third, once a State capital defendant's conviction and sentence are found to be appropriate, judicial proceedings should be concluded.

Fourth, Federal habeas corpus relief should remain an extraordinary remedy which should upset a State conviction only where necessary to redress a fundamental injustice.

Mr. President, no reform proposal as sweeping as this is ever perfect.

While the Thurmond-Specter proposal may not achieve what I originally hoped we could achieve, it is a positive step.

I urge my colleagues to support it.

I yield the floor.

Mr. THURMOND. Mr. President, I wish to commend the able Senator from Iowa for his splendid arguments on this subject. He is a valuable member of the Judiciary Committee, and we thank him very much.

Mr. President, I yield 5 minutes to the able Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I thank the distinguished ranking member for yielding 5 minutes, and while I feel strongly on this issue, I might not use the 5 minutes.

But let me in my own way state why I think the Thurmond-Specter amendment should be agreed to.

We speak of habeas corpus reform as if it is something that average Americans are not concerned about, something that average Americans do not understand.

Let me tell you, Mr. President, there is no question, whether it be in the State of Nebraska, the State the distinguished occupant of the chair comes from, or the State of New Mexico, if you ask average citizens what they think about those who are waiting on death row for 8, 10, 11, 12, 15 years while the courts of this country are determining their fate, and while they are on their sixth or seventh or eighth appeal to the U.S. Supreme Court, if you ask average Americans of good common sense what they think about it, they will tell you, "We do not understand how this kind of justice can continue in our great country." So it is an average, everyday American concern.

First, we should note that this applies only to death penalty cases. That is what a lot of people are worried about. On average right now, because of the numerous appeals through the habeas corpus process, it takes an average of 8 years after a conviction, after using all of the processes of the States, on average, 8 years of waiting around for the process to determine with finality that justice has been served and the will of the people is to be complied with. A jury has been impaneled and has convicted and has sentenced, and still they wait.

So I think everyone should know this is a major issue in our country, and people want us to decide it with some justice and fairness, but with some degree of common sense and finality. The approach of the Thurmond-Specter amendment seems to the Senator from New Mexico to be eminently fair. I see it as very simple, but profound.

First, this amendment would apply once the case is all finished—the convicted murderer has had his day in State court, a jury has convicted him, and then found he should have the death penalty. He has exercised all his State remedies and he is there with that case completed.

What this amendment says is that the judges in the Federal system, from those who sit at the trial level to the circuit and to the Supreme Court, have to understand that it is important that they expedite this process. So it is given high priority. They must put it at the top of the roster and hear it. After all, there are not thousands of these cases.

So we say to them, "You do it." We say to the defendant, "You have 60 days after all that has been finished—you have had your trial, you have had your appeals, and you have gone to your State supreme court. Now you have 60 days to get your appeal ready." But contrary to prior law, we furnish him with a lawyer in the event he is indigent. He no longer has to write up his own habeas corpus process. He gets a lawyer. Within 60 days, he files.

Then we say to the Federal judge, "You put it at the top of the list and you hear it." Then we say to the circuit judge, "Judges, if it is appealed, you put it at the top of the list and

you hear it." Then we say to the U.S. Supreme Court the same.

So, we are saying within 1 year after that has been filed, there will be an adjudication by the best courts in the land, yes or no. It seems to me that is pretty fair. But second, we say since we want to be absolutely certain and do not want to deny another bite at that apple of appeal, we give you other opportunities to appeal. But, what we say is that they should not be frivolous. They should not be just filed to get you a stay for another 15 months or 2 or 4 years.

We say if you want to file a second or subsequent time, you have a lawyer and you send it up to three judges at the circuit court. And they have to decide whether there is some cause. If they say, "It looks like we missed something," then it starts again, and you get another time through, Federal judge, circuit judge, all the way to the Supreme Court. It sems to me nothing could be fairer. I think we ought to do this. It is high time.

I thank the manager for the time, and I yield the floor.

Mr. THURMOND. Mr. President, I want to commend that excellent statement by the able Senator from New Mexico. He is not a member of the Judiciary Committee, and he has not had an opportunity to know about the bills along this line that have been before the committee for years, but he understands that the American people are sick and tired of these delays.

I want to emphasize this: Under our bill, we will bring a conclusion in 1 year. Under the Biden bill, it could be indeterminate for years.

Mr. President, I yield to the able Senator from California.

Mr. WILSON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

The Senator from California.

Mr. WILSON. Mr. President, I thank the Chair. I thank my friend from South Carolina.

Mr. President, I want to raise a point of concern. I have already spoken at some length in support of the Thurmond amendment. I will not reiterate what I have said.

I have a concern that we have not, either in this amendment or in the Graham amendment, or elsewhere in the Biden proposal, addressed the necessary point with respect to application of what we adopt here as limitations upon the abuse of the habeas corpus procedure, and how it shall be applicable to existing death row inmates.

It seems to me that we would be terribly derelict, Mr. President, if we did not spell that out in the law. I am well aware that there is a unanimous-consent agreement that prevents the modification of the amendments that are pending and that have already been acted upon, but I address to my colleagues an urgent plea that we not leave this subject, and specifically that we not leave this legislation, without having amended it, so as to make clear the application of the limitations upon the habeas corpus process to existing inmates of death row.

We have had, as I pointed out, the recent instance in California of yet another filing by Robert Alton Harris, who has been on death row there for over 11 years since his conviction.

Mr. President, whatever we decide by way of a limit upon the abuse of the present process, what we need to do is to make clear specifically how it applies to the literally thousands of inmates of death rows and prisons across the Nation. Let there be no doubt that we are grandfathering them somehow, so that in the prospective application of this law we will have no application of its requirements to those who are presently on death row, convicted of a capital offense.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I am glad the Senator brought that out. This bill would apply to those on death row. He said some have been there for 11 years, and they may be there 5 or 10 more years if we do not pass this bill. We limit it to 1 year. That is what the public wants, what the law enforcement people want, what the President wants, what the Attorney General wants, what the majority of attorneys general in the United States want.

Mr. President, I think we are about ready for a vote. The Republican leader wanted to make some closing remarks. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, there are some points I want to clarify. On the issue of States rights, Senator BIDEN states that the Thurmond-Specter proposal would infringe upon States rights. This is not the case. This bill would not—I repeat, would not—eliminate State habeas corpus review. Under our proposal, death row inmates may file State habeas petitions whenever the State law permits. No State laws are touched.

In addition, the Biden-Graham bill, according to the Department of Justice, would overturn the case of Teague versus Lane, which held the changes in law are not to be applied retroactively in collateral proceedings. In other words, by overturning Teague, the Senate would be expanding the rights of death row inmates, murderers; it would expand the rights of convicted murderers on death row.

The PRESIDING OFFICER. The Chair advises the Senator from South Carolina that all of his time has expired.

Mr. THURMOND. I suggest the absence of a quorum.

The PRESIDING OFFICER. The time will be charged to the Senator from Delaware. The clerk will call the roll.

The assistant clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, the able Senator from Delaware has agreed to yield several minutes to the distinguished Senator from Utah.

The PRESIDING OFFICER. Does the Senator yield time to the Senator from Utah?

Mr. BIDEN. I yield 5 minutes to my distinguished friend from Utah.

The PRESIDING OFFICER. The Senator from Utah is recognized for 5 minutes.

Mr. HATCH. Mr. President, I thank my distinguished colleague from Delaware, the chairman of the Judiciary Committee, and also my distinguished friend and colleague from South Carolina, the Republican leader on the Judiciary Committee, for allowing me the extra time.

I will take a few minutes to just briefly summarize why I think we really have to pass the Thurmond-Specter amendment if we are to enact true habeas corpus reform.

This is our last chance. To me this is the most wonderful opportunity we have had to really correct the excesses of habeas that have been going on for years. The Gacy case since 1980, that is just through the process of appeal. Now they just filed their first habeas case, the first habeas petition. By the time they get through with that, that is another 10 years or more. Yet this man is convicted of murdering 33 boys, as I recall.

In the case of William Andrews, 17 years, having murdered a number of people after torturing them and pouring Drano down their throats. After 26 appeals, 15 in the Federal courts, 11 in the State courts, he just filed his 27th appeal while I was speaking here on the floor on Monday decrying this situation.

He knows, and everybody else knows, that he committed those murders. It is a just penalty. Everybody knows it. There is no more good argument. His appeals are frivolous. Everybody knows that. But they will keep filing them as long as we keep this current system.

And the difference between these two amendments is that the Thurmond-Specter-Hatch amendment ends these appeals beyond reasonable limits.

Mr. THURMOND. One year.

Mr. HATCH. I have to say that the Graham amendment is a serious, good-faith effort on the part of the distinguished Senator from Delaware [Mr. BIDEN] and the distinguished Senator from Florida [Mr. GRAHAM] to address this habeas situation. But it just plain does not do it. The debate now is between the Thurmond-Specter-Hatch amendment, which addresses habeas now, and the Graham amendment, which is content to allow the same system to continue.

If Graham is enacted here today and becomes the law, it is a step in the right direction, but it will not stop these frivolous appeals at a cost of what I think are billions of dollars to the American public, unnecessary dollars to the American public.

There has to be an end to this, and we have the chance right here with the Thurmond-Specter-Hatch amendment to put an end to it and do it in the way that protects all of the interests, all of the rights of the defendant in the most reasonable way. It does have finality, it does give the defendant his opportunity for court, or his day in court, in every way, but it puts a time constraint and a time limitation on what happens.

The Thurmond amendment requires the death row inmate to file a Federal habeas corpus petition 60 days after the death sentence becomes final. It prohibits any Federal district judge from thereafter granting any other habeas petition for stay of execution.

It requires a circuit court of appeal authorization before any successive petition may be brought. That is a major advancement in this issue. It is a fair advancement. You are giving them a complete jump to the circuit court of appeals where we know we have the appellate ability to handle thee matters in the very best constitutional way. If they do not like it, they then can go to the Supreme Court of the United States. And it forces the trial court and the appellate court to act expeditiously.

The district court has to decide the case in 110 days, the circuit court in 90 days, and the Supreme Court in 90 days after that. It does not postpone consideration of State claims at all. They can do it.

The difference under Thurmond is we resolve the problem; under Graham, we do not resolve it, even though I have to admit there have been some improvements over what the original bill had to say.

I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HARKIN). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, the distinguished chairman of the committee has agreed the Senator can talk.

Mr. DOLE. I will talk in my leader's time.

Mr. President, was leader time reserved earlier?

The PRESIDING OFFICER. Yes, 10 minutes of the leader time has been reserved.

Mr. DOLE. I understand the distinguished Senator from South Carolina has more time.

Mr. BIDEN. I will be happy to yield to the Republican leader.

Mr. DOLE. I will use my leader time.

Mr. President, everyone in the Senate has either read about or heard about the so-called habeas corpus merry-go-ground.

Thousands upon thousands of habeas petitions clog the Federal district court dockets each year; 40 percent of these petitions are filed more than 5 years after a person has been convicted. And nearly one-third of the petitions are filed more than a decade after conviction.

Yes, that is right. A full decade.

Former Chief Justice Warren Burger described the habeas quagmire this way:

> I have seen cases—and this occurs in many courts today—where 3, 4, or 5 trials are accorded to the accused with an appeal following each trial and reversal of the conviction on purely procedural grounds. * * * In one case more than 60 jurors and alternates were involved in 5 trials * * * more than 30 different lawyers participated * * * and more than 50 appelate judges reviewed the case of the appeals. * * * The tragic aspect was the waste and futility since every lawyer, every judge and every juror was fully convinced of the defendant's guilt from beginning to end.

I think it is fair to say that we all share the former Chief Justice's concerns. And we all agree that habeas reform is absolutely essential if we are really interested in restoring some rationality to our criminal justice system.

THE SOLUTION

When it comes to meaningful habeas reform, there is only one proposal on the table—and that's the proposal offered by my distinguished colleagues, Senators THURMOND and SPECTER.

Both Senators have studied the issue. They have worked hard on the issue. And their proposal, if enacted, would improve the habeas system in at least three significant ways.

First, the Thurmond-Specter amendment gets serious with deadlines. It requires defendants to file a habeas petition in Federal court within 60 days of any final judgment and sentence by a State supreme court.

Not 1 year, as proposed by my distinguished colleagues, Senators BIDEN and GRAHAM. Not 9 months. Not even 6 months, but 60 days.

The Thurmond-Specter amendment also requires any defendant whose Federal habeas application is denied to file a Supreme Court petition for certiorari within 20 days of the denial. And even more, it requires the Supreme Court to make a final decision within 90 days of the filing of the cert. petition.

Mr. President, criminal defendants may not like these deadlines. Criminal defense attorneys may feel put out. And the nine Justices on the Supreme Court may not like Congress giving them deadlines and telling them how to schedule their official business.

But, in my view, clear-cut and unbreakable deadlines are essential if we're really serious about reducing the delays in the habeas process. And in my view, meaningful deadlines are essential to any habeas reform proposal.

Second, the Thurmond-Specter amendment limits the availability of second or successive petitions—the petitions, in other words, that are a field day for creative attorneys who gin-up spurious claims to keep their clients in the litigation pipeline.

The Thurmond-Specter amendment would stop this abuse by providing that a successive petition can only be raised in two specific circumstances: First, if evidence becomes available that calls into question the guilt or innocence of the defendant; or second, if a previously undiscoverable fact comes to light that calls into question the appropriateness of the original sentence.

Perhaps more importantly, the Thurmond-Specter amendment requires a criminal defendant to actually get the approval of a Federal court of appeals before a district court can hear a successive petition.

Mr. President, this approach strikes a fair balance. With the Federal appellate courts as the gatekeepers, it will ensure that frivolous claims are not raised in successive habeas petitions. And, at the same time, it will greatly reduce the risk of executing an innocent person or a person who does not deserve a capital sentence.

When it comes to the successive petitions issue, the Thurmond-Specter approach beats the Graham-Biden approach hands down.

The Graham-Biden proposal would allow Federal courts to hear a successive petition so long as the facts alleged by the defendant—if proven—would place a defendant's guilt into question.

In other words, no proof is required. No real facts are required. Just make some allegations. Just allege some

facts, and a district court can hear the successive habeas petition.

Mr. President, this approach is not habeas reform. It will not reduce the habeas caseload.

It is simply a prescription for opening up the successive petition floodgates and for clogging the courts even further with frivolous claims.

Finally, the Thurmond-Specter amendment would allow the Federal courts to consider—the habeas cases—only those intervening decisions by the U.S. Supreme Court which establish fundamental constitutional rights.

This is a limited retroactivity exception that makes sense. And it is only fair, since fundamental constitutional rights would be at issue.

The Graham-Biden proposal, however, would go beyond fundamental constitutional rights. It would allow the courts in habeas cases to consider "any interim change in the law promulgated by the Supreme Court." I repeat: "any interim change in the law."

This is obviously a much broader retroactivity exception. And it will simply encourage the filing of more—unwelcome and unneeded—habeas petitions.

CONCLUSION

Mr. President, the Thurmond-Specter approach to habeas corpus reform is sound. It is comprehensive. And it will go a long way toward putting a stop to the endless litigation delays that clog the courts and consume precious judicial resources.

This is a limited retroactive exception that makes sense and it is only fair since fundamental constitutional issues would be at issue.

Mr. President, I know this is an important issue, an important decision. If we are concerned about reform, if we are concerned about what I referred to in the earlier quote from the former Chief Justice Warren Burger, it would seem to me that this approach should be adopted. I urge my colleagues to support the Thurmond-Specter amendment when we vote later this evening.

Mr. President, I reserve any time I may have.

Mr. KENNEDY. Mr. President, I intend to vote against the amendment of the Senator from South Carolina. I prefer the Graham-Biden alternative, although I continue to favor additional measures in several areas to protect constitutional rights.

Stronger counsel standards and compensation modeled on the work of the American Bar Association should be guaranteed to capital defendants and habeas petitioners; more protection should be provided to habeas petitioners whose claims fall victim to unfair procedural default rules which allow ignorance, neglect or incompetence of counsel to extinguish constitutional rights; and more should be done to undo recent Supreme Court retroactivity decisions that virtually eliminate the ability of habeas petitioners to obtain full and fair review of many potentially meritorious claims. These issues go to the heart of our system of justice and its ability to ensure access to equal justice for all. Nevertheless, the Graham-Biden alternative contains worthwhile provisions to secure counsel for capital defendants and habeas petitioners, and it deserves the support of the Senate.

The writ of habeas corpus is one of the great historical bulwarks of Anglo-American jurisprudence, and it continues to play a fundamental and unique role in our modern system of justice. Habeas corpus review of death sentences is the principal means of relief available to a wrongfully convicted individual facing execution. It has spared the lives of many innocent persons who were unconstitutionally convicted and sentenced to death. The rights at issue include the right to a fair and speedy trial, a fairly constituted jury, competent counsel, and access to evidence and witnesses, are essential attributes of fairness in our system of justice. Habeas petitions have saved many individuals from constitutional violations of their rights and ultimately spared their lives, often after repeated denials of relief in State court systems.

I oppose the death penalty, because capital punishment is wrong in principle and wrong in practice. The death penalty is fundamentally flawed, because of the likelihood that innocent people will be executed. No system of justice, however wise or resourceful its judges and juries may be, can eliminate this risk. That is a risk we accept when the punishment is imprisonment, because a jailed defendant can always be set free when innocence is proved. But that is a burden we cannot tolerate when the punishment is death.

The risk of executing innocent persons is no theoretical, hypothetical, proposition. A recent Stanford Law Review study lists 350 cases in which defendants convicted of capital or potential capital crimes in this century have later been found innocent.

A 1978 Indian conviction and death sentence were overturned when, on retrial, it was shown that his conviction had rested on perjured testimony.

In 1988, a defendant was released from prison in Florida after it was determined that he had been convicted on the basis of testimony the prosecutors knew to be false.

All of these violations were revealed on habeas. The list goes on and on. How can any of us shut the door to relief in cases such as these?

The need for counsel in capital cases is a protection that former Justice Lewis F. Powell, who chaired the Habeas Corpus Study Committee, and others have advocated for years. The Powell committee proposal, as modified recently by the Judicial Conference, would provide counsel for State habeas proceedings and this proposal is a starting point. But I believe that meaningful representation by counsel must include minimum attorney competence standards based on experience, as well as adequate compensation, monitoring and investigative resources where necessary.

The Graham-Biden democratic proposal goes further than the Thurmond-Spector proposal and it should be supported.

The Thurmond-Specter alternative errs in favor of swifter review of constitutional claims, at the expense of fair and adequate representation of those claims. To reduce a habeas petitioner's ability to obtain review of constitutional claims in federal court in exchange for representation by counsel, is a lopsided bargain without additional guarantees as to the adequacy of the counsel's representation and adequate procedural opportunity to be heard. Habeas corpus review necessarily entails consideration of complex constitutional and procedural issues, and often requires experienced investigation. The stakes facing a habeas petitioner in a capital case leave no room for error.

At every stage in a capital proceeding, whether at trial or on post-conviction review, counsel must be familiar with the arcane procedures that apply in death penalty cases. Meaningful representation by counsel at the trial level, in particular, in capital proceedings would go even further to assure fairness and render the post-conviction review process more manageable.

Inevitably, the death penalty is applied to minorities and to the poorest, the least popular, and the least powerful members of society. Consequently, too many defendants facing the death penalty at trial are represented by attorneys who are poorly prepared, underpaid, overworked. The result is often only minimal legal assistance.

The infliction of death at the hands of Government brutalizes our society instead of atoning for crime. To short change individuals charged with capital offenses, in terms of the quality of their representation or their ability to obtain meaningful review of their constitutional claims, unfairly prejudices them. I urge the Senate to support the Gramm-Biden alternative and oppose the Thurmond-Specter amendment, and to recognize that further reform is needed to ensure that if capital punishment is inflicted at all, at least it is inflicted fairly.

If it is to be applied at all, capital punishment ought to be applied only where notions of fairness are given priority. Despite procedural safeguards, mistakes are often made in criminal prosecutions; in the first 6

months of 1987, for example, eight men were released in four States because their innocence was finally determined after many years on death row.

Habeas corpus review of death sentences is virtually the only means of relief available to a wrongfully convicted individual facing execution whose constitutional rights have been violated.

In 1983, an inmate in a Florida prison was within 15 hours of his scheduled execution and had been fitted for his burial suit when the Federal court of appeals issued a last-minute stay. His conviction was later overturned, and the main prosecution witness subsequently recanted his testimony. The defendant was never retried.

In 1967, a habeas petitioner came within hours of execution before the granting of his petition led to the discovery that the prosecutor claimed that the petitioner's clothing was stained with the victim's blood and induced a witness to testify to that effect, despite the fact that the prosecutor knew that the stains were paint, rather than blood.

In 1982, the eleventh circuit remanded a capital case where defense lawyers repeatedly stressed to the jury that they were only representing the defendant because they had to, and that their client, who his counsel described to the jury as "a little old nigger boy," was not unlike "the kind of people that we have historically put to death here in Georgia."

In 1988, the Supreme Court remanded for a new trial a case in which the defendant was sentenced to death by a jury that was selected after the prosecutor secretly induced the jury commission to underrepresent blacks and women in jury pools.

In 1985, a conviction and death sentence of a mentally retarded defendant were reversed after it was established that the prosecutor had withheld evidence that a key eyewitness—who at trial had positively identified the defendant as the assailant—had told the police shortly after the arrest that he could not identify the perpetrator.

A 1976 conviction was overturned on retrial in Arizona after it was determined by five expert witnesses that the victim had not been murdered but had died instead of pneumonia.

Mr. BIDEN. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, I yield 3 minutes to the distinguished Senator from Florida [Mr. GRAHAM].

Mr. GRAHAM. Mr. President, this has been a very full and instructive debate this afternoon. We end where we started, and that is in substantial agreement. The differences between the provision that is in the bill at the present time and the provision offered by the Senators from South Carolina and Pennsylvania are 90 to 95 percent identical, or at least consistent in terms of the objectives that they have. I believe, therefore, that within that relatively small ambit of disagreement, that the provisions which are in the bill represent the sounder policy.

Let me just mention two of those areas of difference. One is the question of setting time limits once a petition has been filed in a Federal court. Under the provision as offered by the Senators from South Carolina and Pennsylvania, a petition, once having been filed, must be heard by the Federal courts within a stipulated number of days, 110 days, and then other dates subsequent in the Federal process.

That sounds very good and sounds as if it would advance the objective of finality and certainty. The difficulty is, what is the sanction if those timetables are not met? The concern I have is with the timetable, the sanction, for failing to meet a similar time requirement at a trial level where there is the obligation of a speedy trial, bringing a person to trial within a certain number of days from the time that they are indicted; if the Government fails to meet that test and if the court is delayed in carrying out its responsibility, the sanction is against the Government, against the people in the form of a dismissal of the charges. And the accused person walks free.

An unknown is what is going to happen under the proposal offered by the Senators from South Carolina and Pennsylvania in the event that the timetables which they set are not met. Are we going to have an anomalous situation in which a State prisoner held for a capital offense, who has filed in a Federal court and the Federal court has not met its time period, that that prisoner is going to have his jail cell opened? I think that we would not want to create that possibility.

Second, Mr. President, is the issue of exhaustion of remedies. I believe that the procedure which we have outlined, which maintains the tradition that a Federal prisoner would exhaust his State remedies before going into Federal court, is sound in terms of federalism and in terms of the judicial process and will not add to the total time required for collateral appeals.

So, Mr. President, those are two significant differences in a sea of similarity. I urge that the amendment that has been offered be defeated and that the underlying amendment be thus adopted.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BIDEN. Mr. President, I yield 2 minutes to the Senator from Arizona.

Mr. DECONCINI. Mr. President, I am pleased that the Senate is turning this week to consideration of an omnibus crime control package.

This package includes a number of items of which consideration is long overdue, as well as a number of new ideas worthy of our debate.

I want to take a minute this afternoon to focus on one particular item of significance—reform of habeas corpus procedures.

The distinguished senior Senator from South Carolina may recall how many years Congress has debated this issue. Certainly much longer than I have been here.

Finally, we are at the place where action is at hand.

Studies have been conducted, hearings held all over the country, and numerous recommendations have been forwarded for congressional review.

The most widely publicized recommendations are those of a special commission appointed by Supreme Court Chief Justice William Rehnquist and chaired by former Supreme Court Justice Lewis Powell.

This distinguished commission—made up of five Federal judges—pooled their practical experience and sought outside input on options for habeas corpus reform.

The Powell Commission reiterated what we know: The current habeas corpus statutes allow unnecessary delay in the delivery of justice.

These statutes are a deterrence to finality in a State courts' determination of guilt and imposition of capital sentences.

I have introduced legislation on this subject, as have a number of Members from both parties in both Chambers.

In fact, the Senate passed habeas corpus reform legislation in the early 1980's, but the bill was never debated in the full House.

The Powell Commission report and recommendations issued in 1989 have become the cornerstone for consensus on how to reform habeas corpus statutes.

The Powell Commission put forth a new idea which has brought the schools of differing thought on this issue to the table.

This idea is the linkage of ensuring inmates accessibility to competent counsel to the imposition of stricter habeas corpus statutes.

Practically every witness that has appeared before the Judiciary Com-

mittee in the past year on this issue has talked about the effect of inadequate counsel in slowing down the execution of State criminal law.

Mr. President, I am pleased to stand here today in support of Senator GRAHAM'S habeas corpus amendment. I have long been a cosponsor of legislation that would provide reform for habeas corpus. There is no question in my mind that there is a dire need for reform of the habeas corpus writ. For years now the Federal courts have been inundated with habeas corpus petitions, a large number of which are trivial at best. The backlog in the Federal court system is immense.

Senator GRAHAM'S proposal is a workable solution that should receive wide support in this body. It allows the States to choose what they each individually believe to be the best method of providing competent counsel for death penalty cases. It is important that defendants receive counsel, even those who commit the most heinous crimes. I also know that there are numerous good attorneys in my State of Arizona who are willing to provide free counsel to death row inmates. They are not necessarily career criminal attorneys, but they are good lawyers who are willing to put in the time to represent these death row inmates. Let each State decide what kind of experience requirement is necessary.

I need not get into any more of the details of the bill, but I think it is a good proposal, and I support it.

Mr. BIDEN. I yield 2 minutes to the Senator from South Carolina, and then I will yield back all my time.

Mr. THURMOND. Mr. President, I want to say there is a tremendous difference in these bills. Under our proposal you wind it up in 1 year. These things have gone on now where there was 11 years on a case. In Utah one went for 16 years.

In Oklahoma one went for 18 years. We have to bring finality. Ours is a much tougher bill. It winds it up in 1 year.

Now, under their bill, they can continue, and it may go a number of years. That is the difference.

Do you want 1 year or do you want to go for a number of years which can be done under the Biden bill? That is the main question. Finality, finality.

The people are sick and tired of these delays. So, if you want to get results, I think you will vote for our bill. If you want to carry on the present system that has improved some but not too much, vote for their bill.

Mr. BIDEN. Mr. President, I yield back the remainder of the time.

The PRESIDING OFFICER (Mr. ROCKEFELLER). All time is yielded back.

Mr. BIDEN. Have the yeas and nays been ordered?

The PRESIDING OFFICER. They have not.

Mr. BIDEN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina. On this question, the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Louisiana [Mr. JOHNSTON] and the Senator from Louisiana [Mr. BREAUX] are necessarily absent.

Mr. SIMPSON. I announce that the Senator from Rhode Island [Mr. CHAFEE] is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 47, nays 50, as follows:

[Rollcall Vote No. 105 Leg.]

YEAS—47

| | | |
|---|---|---|
| Armstrong | Gramm | Murkowski |
| Bond | Grassley | Nickles |
| Boschwitz | Hatch | Nunn |
| Burns | Heflin | Pressler |
| Byrd | Heinz | Rockefeller |
| Coats | Helms | Roth |
| Cochran | Hollings | Rudman |
| Cohen | Humphrey | Shelby |
| D'Amato | Kassebaum | Simpson |
| Danforth | Kasten | Stevens |
| Dixon | Lott | Symms |
| Dole | Lugar | Thurmond |
| Domenici | Mack | Wallop |
| Exon | McCain | Warner |
| Garn | McClure | Wilson |
| Gorton | McConnell | |

NAYS—50

| | | |
|---|---|---|
| Adams | Ford | Metzenbaum |
| Akaka | Fowler | Mikulski |
| Baucus | Glenn | Mitchell |
| Bentsen | Gore | Moynihan |
| Biden | Graham | Packwood |
| Bingaman | Harkin | Pell |
| Boren | Hatfield | Pryor |
| Bradley | Inouye | Reid |
| Bryan | Jeffords | Riegle |
| Bumpers | Kennedy | Robb |
| Burdick | Kerrey | Sanford |
| Conrad | Kerry | Sarbanes |
| Cranston | Kohl | Sasser |
| Daschle | Lautenberg | Simon |
| DeConcini | Leahy | Specter |
| Dodd | Levin | Wirth |
| Durenberger | Lieberman | |

NOT VOTING—3

| | | |
|---|---|---|
| Breaux | Chafee | Johnston |

So the amendment, (No. 1687), was rejected.

Mr. SPECTER. Mr. President, I move to reconsider the vote.

The PRESIDING OFFICER. The question is on agreeing to the motion to reconsider.

Mr. MITCHELL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, I ask for the yeas and nays on the motion to reconsider the vote by which the Thurmond amendment was defeated.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the vote on the motion to reconsider the vote by which the Thurmond amendment was defeated occur tomorrow morning at 10 a.m.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROTH. Mr. President, I, like all Americans, am anxious to take action against the scourge of violent crime that has plagued our country. It is incumbent upon us, here in the Congress, to point toward the most sensible means of addressing this problem. That is why I have reservations about certain provisions of S. 1970, currently before the Senate.

In the last several months, I have received letters from hundreds of Delaware constituents who oppose the gun control provisions of S. 1970. These letters express concern about the unfair burden that this bill would place upon law-abiding citizens. As the bill stands, anyone who owns a weapon covered by the bill, even if lawfully owned prior to the enactment of this legislation, would have to fill out a form to continue lawful ownership. Further, if the weapon was ever sold or transferred, both parties in the transaction would have to keep records of the transfer. While these recordkeeping requirements are supposedly aimed at drug traffickers and violent criminals, it is highly unlikely that such criminals would bother with these forms. If not, they would be subject to fines of $1,000 or 6 months in jail. These penalties hardly seem a deterrent for the hardened drug criminal. On the other hand, honest law abiding gun owners are burdened with the task of recordkeeping and filling out forms, and if they slip up, they could be sent to jail.

I am also concerned about a section of the bill which allows the Secretary of the Treasury to recommend new types of weapons to be banned. This provision opens the door for future gun regulation and could potentially affect guns that are used for legitimate sporting purposes. Hunters and sportsmen from around my home State of Delaware have expressed strong opposition to this portion of S. 1970. It is on their behalf that I will continue to look for ways to attack crime in this country that do not place an extra burden on the honest citizen.

I have been a longtime supporter of the right to bear arms as embodied in the second amendment of the U.S. Constitution. In the past, however, I have favored sensible measures restricting certain types of weapons. In the last Congress, I supported the Undetectable Firearms Act of 1988, which effectively outlaws plastic weapons that cannot be detected by airport x-ray machines. I also voted to outlaw the individual ownership of machine guns, and to stop the importation of the infamous "Saturday Night Special" handgun. In all of these cases my priority has been to address the criminal problem without undermining the rights of lawful gun owners.

Mr. President, I will continue to take an active role in combating the problem of violent crime in this country. While I feel it is appropriate to encourage people to join in this effort, I do not feel that it is fair to strap them with responsibility. We must all work together to solve the problems that lay before us.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT

Mr. BIDEN. Mr. President, I ask unanimous consent that Senator THURMOND now be recognized to offer an amendment relating to the bill's provision on mental retardation; that there be no debate tonight on that amendment; that the Senate resume consideration of the bill and the Thurmond amendment Thursday, May 24, at 8:30 a.m., and that at that time there be 90 minutes equally divided on the Thurmond amendment, and that the vote on the Thurmond amendment occur at 11 a.m.

I further ask unanimous consent that upon disposition of the Thurmond mental retardation amendment Senator GRAHAM of Florida be recognized to offer an amendment to strike section 107 of the bill, and that there be 2 hours for debate equally divided on the Graham amendment; that when all time has been used or yielded back, the Senate, without any intervening action or debate, vote on the Graham amendment; that upon disposition of the Graham amendment, Senator THURMOND be recognized to offer an amendment relating to the subject of mitigating factors, that there be 4 hours of debate equally divided on the Thurmond amendment; that when all time has been used or yielded back, the Senate, without any intervening action or debate, vote on the Thurmond amendment.

I further ask unanimous consent that no further amendments or motions to recommit be in order prior to the disposition of these three amendments and that no other amendments relating to age, mental capacity, or aggravated or mitigating circumstances in the Thurmond amendment be in order, and that the agreement be in the usual form with respect to the division of time.

The PRESIDING OFFICER. Is there objection?

Mr. THURMOND. Mr. President, we have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1690

(Purpose: To add a "right versus wrong" standard to the term mentally retarded)

Mr. THURMOND. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND] proposes an amendment numbered 1690.

Mr. THURMOND. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, line 7, strike the period after the word "retarded" and insert in lieu the following: "and is wholly lacking in the capacity to understand the difference between right from wrong.".

Mr. BIDEN. Mr. President, I thank my colleague and his staff particularly for working out this unanimous-consent agreement. For the record, so that it is clarified, age, mental capacity and aggravated and mitigating circumstances in the Thurmond amendments relate to the death penalty. That is what we are referring to.

I should point out that by earlier consent there is a vote and will be a vote tomorrow at 10 a.m. on the motion to reconsider the Thurmond amendment relative to habeas corpus. That will occur at 10 a.m. tomorrow.

Mr. President, I see my colleague from Montana is here. I yield the floor.

Mr. BURNS. I thank the Senator.

The PRESIDING OFFICER (Mr. SANFORD). The Senator from Montana is recognized.

(The remarks of Mr. BURNS pertaining to the introduction of S. 2679 are located in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BURNS. Mr. President, I note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MORNING BUSINESS

Mr. BIDEN. Mr. President, I ask unanimous consent that there be a period for morning business with Senators permitted to speak therein.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TRIBUTE TO JOE GIBBS

Mr. WARNER. Mr. President, I rise on behalf of myself and my colleague, Senator ROBB, to pay tribute to a fine Virginian and exemplary gentleman, Joe Gibbs, who is the recipient, this year, of the Northern Virginia Community Foundation's Founder's Award.

Founded in 1978 by a group of northern Virginia residents who sought to improve the quality of life in their area, the Northern Virginia Community Foundation endeavors to promote and acknowledge significant individual contribution to the community. The foundation is supported by individual, corporate, and foundation gifts. It provides funding assistance for northern Virginia programs in the arts, education, and youth activities as well as health and civic programs.

The Founders Award, the most prestigious award given by the foundation, is presented each year to that individual who has distinguished himself through outstanding community service and dedication to the betterment of northern Virginia. This year's recipient is Joe Gibbs, the head coach of the Washington Redskins, and a resident of Vienna, VA.

This year's Founder's Award recipient has spent most of his life developing the potential of young men. Several years ago, as a counselor to inner-city youths, Coach Gibbs witnessed, first hand, the negative influences that can pull teenagers into a cycle of despair and poverty. He was compelled to help these boys, and began, in 1983, to look for a way to do it.

In 1986, Joe, with the generous assistance of all segments of the community, opened the Youth for Tomorrow New Life Center, near Manassas, VA. Today, the New Life Center is, both a home and an educational center from which young men begin their lives anew.

The program at the New Life Center provides a substitute family which teaches the need for obedience and self-discipline. Boys at the center strive to achieve goals in all areas of their lives: social, academic, spiritual, physical, financial, vocational, and citizenship. Presently the center is oper-

ating at full capacity, with many success stories in its files.

March of 1989 saw the establishment of the Joe Gibbs Charities organization, set up to enhance the activities of the Youth for Tomorrow program. In addition to providing funding for the center, last year's gala at the Kennedy Center also raised funds for Hope for a Drug Free America, the Doug Williams Foundation, and ONE Ministries.

Already the winningest coach in Redskins history and one of only 19 NFL coaches to ever register 100 victories, Coach Joe Gibbs is beginning his 10th season in Washington. Few have accomplished so much so quickly, and the Gibbs era has been one of quality as well as quantity.

In addition to his 102 victories, Joe Gibbs has led the Washington Redskins to 3 NFC championships, 4 division titles, 5 playoff appearances, and 3 Super Bowl games, 2 of which brought home the Lombardi trophy.

In his customary manner, Joe is quick to credit this achievement to others. "It is a reflection on our entire organization, beginning with the great ownership provided by Mr. Cooke," said Gibbs, "that is not possible without sacrifices by players, assistant coaches, scouts, and the support of great fans."

But it is Joe Gibbs who deserves the credit. From the moment he left his post as offensive coordinator of the San Diego Chargers in 1981 to join the Redskins, he set the tone for success. In 1982 he became the first head coach in 20 years to be named Coach of the Year by Associated Press in consecutive seasons. And in that same year, his team posted the sixth best record in NFL history and went on to win Super Bowl XVII. A year later, his offense set an NFL record for points in a season on the way to Super Bowl XVIII. Coach Gibbs now ranks as the fourth winningest active coach in the NFL.

The hallmark of Joe Gibbs' career, on the sidelines and off, has been that of consistent success. Whether in youth counseling, Christian outreach work, community development, or coaching footabll, Joe Gibbs's success touches the lives of many. We are pleased to salute Joe Gibbs as a coach, citizen, and father, and an extraordinary Virginian.

## TRIBUTE TO DR. DAWSON ALLEN

Mr. NUNN. Mr. President, my purpose for seeking the floor is to pay tribute to Dr. Dawson Allen of Milledgeville, GA, who celebrates his 96th birthday today. Dr. Allen is truly a renaissance man. His life and its achievements deserve the attention of the Senate.

Most of Dr. Allen's life was devoted to the practice of psychiatry at Allen's Invalid Home in Milledgeville. During his professional career, he was in charge of care for women patients at this institution, while his late brother, Dr. Edwin Allen, attended to men. When his father established this institution in the final years of the last century, it was the first private-care institution for mentally disturbed patients south of Baltimore. Previously, only State-supported care was available to families in our region. In that era, care provided by the State amounted to little more than custodianship. An incalculable number of victims of despair and depression found new hope under the private care of Dr. Allen, his brother, and his father and their psychiatric insight.

He has also been a successful cattle farmer. Just as he and his brother had a division of labor in patient care, they also divided their farming interests. Dawson Allen raised dairy cows and produced milk and other dairy products, while his brother, Edwin, raised beef cattle.

Dr. Allen's most lasting legacy, however, is beautiful carpets of red and green over the countryside of Georgia. A strain of crimson clover that he and his brother developed now covers much of Georgia where there was once eroded red clay on wornout fields. This is a Dawson Allen legacy that will last forever. Dr. Allen's strain of crimson clover is used to restore nutrients to the soil and prevent erosion. It is today used all over Georgia in pastures and along roads. Georgia is a beautiful State that is made even more beautiful by Dr. Allen's crimson clover.

An Associated Press article about his botanical achievement recently appeared in the Atlanta Journal and Constitution, and I will ask unanimous consent that it appear at the conclusion of my remarks.

Dr. Allen remains alert and active at 96. Although his eyesight has failed him, his active, fertile mind has not. He remains abreast of current developments, thanks to the National Library Service for the Blind, administered by the Library of Congress. This service keeps him supplied with current books on tape, and he spends much of his day listening to them. His visitors sometime express concern that the service has a tendency to provide one with more information about the contents of those books than one with a short attention span can absorb. Few visitors can match the depth of his understanding of the world around him.

It is a special privilege for me to take note of Dr. Allen's 96th birthday and his life of achievements as well as this interesting Associated Press article about him. I wish him many happy returns.

I ask unanimous consent that the article to which I referred be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Atlanta Journal and Constitution, May 14, 1990]

BROTHERS' EXPERIMENTS WITH CLOVER TURNED OUT LUCKY FOR STATE'S HIGHWAYS

MILLEDGEVILLE, GA.—The familiar red blooms of clover that border Georgia's highways and byways each spring have their roots in Baldwin County.

"My brother Edwin and I started working with the reseeding clover in the '30s," said 95-year-old Dawson Allen, who still lives in Milledgeville.

They eventually cultivated the reseeding Allen strain that later was combined with two other Georgia strains to produce Dixie Reseeding Crimson Clover, commonly seen throughout Georgia today.

Despite his achievement in botany, Dr. Allen's background is in medicine. A native of Baldwin County, he attended Georgia Military College and the University of Georgia, where in 1916 he received one of the school's first bachelor's degrees in medicine.

He continued his studies at the College of Physicians and Surgeons of Columbia University, graduating in 1918. After a medical internship at New York Hospital and service in the U.S. Medical Reserve Corps, he returned to Milledgeville as county health commissioner and later as pathologist at what now is Central State Hospital.

"I became interested in experimenting with the clover when I noticed it voluntarily returning on the Grounds" of the hospital each spring, Dr. Allen said.

Unlike most clover, that variety survived the hot Georgia summers and would regerminate the next spring.

"I theorized that the clover reseeded due to its genetic property," Dr. Allen said. "About 80 percent of the seed was hard seed that would not immediately germinate but would come back the next year."

In hopes of developing larger pastures of clover, he and his brother experimented by hand-stripping 14 pounds of clover seed and sowing it on top of the ground on a half-acre plot.

Dr. Allen continued the experiment after he left the state hospital to become psychiatrist for the female patients of Allen Invalid Home, a private-care facility owned and operated by his father, Dr. Henry Dawson Allen Sr. It was there that the Allen brothers began in earnest their cultivation of what became the Allen strain of crimson clover.

The 2,200-acre site left ample room to maintain farming and cattle operations as a sideline. So, besides their medical duties, the brothers also took charge of the cattle operations.

Feeding the cows was one reason for developing the clover. Another was that the land, purchased for $4.50 an acre, was badly eroded from overproduction of cotton. That prompted the Allens to begin a soil conservation program using the clover.

With those goals, they harvested the seed from the original clover field and continued planting larger plots until they had reached a 300-acre pasture of crimson clover in 1952.

"We were hoping to produce a year-round pasture by using the crimson clover in conjunction with Dallis grass, Bermuda grass and carpet grass," Dr. Allen said. "However,

we were able to graze cattle only about nine months out of the year, so we still had to feed the cattle during the winter months."

There were other setbacks. Dr. Allen, who had one of the largest herds of Jersey dairy cows in the state, was forced to stop grazing his milk cows in the clover pasture when Pet Milk Co. complained about the taste of the milk. But the clover field didn't go to waste—the Allens moved the beef cattle to the clover pastures.

Word of the brothers' clover experiment spread. And in the 1940s the agriculture department of the University of Georgia became interested in the Allen strain of reseeding clover.

By combining the Allen strain with the Thornton strain from Flowery Branch and the Hardy strain from Senoia, it produced the Dixie Reseeding Crimson clover.

This clover is used extensively along the shoulders of highways throughout the state to retain soil, prevent erosin and provide decoration.

"The Georgia Department of Transportation plants about a ton of Dixie clover a year," said DOT agronomist Jerry Hall. "We plant about 20 pounds to the acre."

In 1953, the Progressive Farmers Club of Baldwin County recognized the success of the crimson clover cultivation by hanging a bronze plaque on the Baldwin County Courthouse grounds commemorating the Allens' efforts.

Dr. Allen, who turns 96 this month, remains involved in many activities.

"A friend of mine recently won a ribbon at a local flower show with one of my irises," Dr. Allen said. "That really makes me proud."

## TRIBUTE TO GILBERT H. GODNICK

Mr. LEAHY. Mr. President, I lost a very good friend Monday. Gilbert H. Godnick, we all called him Gillie, is dead at 63.

Gillie was a businessman. He operated a family furniture business in Rutland, where he was born. He loved Rutland. The city was his life, and he served as alderman and mayor before running for the Vermont Senate from Rutland County.

Gillie figured if you were his friend, he had license to give you advice. One of the smartest things I ever did was to listen.

He was a community leader, devoted to progress and a better life for residents of the Rutland area.

He was a strong mayor, and had a businessman's impatience with the pace of government. He liked to see things get done, and was not a man for blue ribbon commissions or extended studies by well-paid consultants.

He was a generous man who promoted and raised money for a number of charities, including the Jimmy Fund, which helps finance the treatment of children with cancer. He helped bring Vermont Day back to Fenway Park in Boston in the seventies and used that occasion to make a most generous donation to the Jimmy Fund from the merchants and people of the Rutland area.

He was a colorful mayor and State senator who pounded home his message in the halls of the State House: We live here too. Pay attention to our part of the State.

He was a man who always kept his word and his commitment to the people he served.

Marcelle and I send our deepest sympathy to Gillie's family and the hundreds of friends he leaves in Rutland, and throughout Vermont. We extend special words of sympathy to his widow Aline. She and Gil have always been special friends of ours and we know how much she will miss him.

Mr. President, I ask that the editorial that appeared in the May 22, 1990, edition of the Rutland Herald be printed in the CONGRESSIONAL RECORD in memory of this distinguished Vermonter.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Rutland Daily Herald, May 22, 1990]

GILBERT G. GODNICK

The death of former state Sen. and Mayor Gilbert G. Godnick yesterday at the age of 63 deprived Rutland of one of its leading citizens. He left a lasting impact on this community as a retail merchant, public official and colorful personality who maintained vigorous activity in pursuit of his many interests long after he was dogged by poor health.

A conservative Democrat of the old school, he probably deviated from the party line almost as often as he joined his colleagues in supporting their policies and objectives. His service in the state Senate began during the sessions of 1981-82 and continued through 1987-88. He served as a member of the Rutland Board of Aldermen during the period 1969-73 before devoting eight years to the office of mayor. He was a World War II veteran of the European theater.

Gil Godnick was a successful retail merchant who managed to find time for a variety of community activity which included an extensive interest in the work of the Salvation Army and the United Way in addition to a political career lasting 20 years. He gave the impression of having a choleric temperament that was encouraged by high facial color and a distinctive manner of speaking that was often imitated by one of his lawyer friends. His manner somehow created the illusion that the hair rose on the back of his neck when he was irate about some problem or political issue. He fought a losing battle with heart disease and excessive weight during most of his mature life.

Well before he became mayor Gil Godnick was a leader in inaugurating the annual Loyalty Day parade, which has continued to be a popular event with strong public support in a city that isn't exactly noted as a parade community.

In his first campaign for mayor in 1973 he carried every ward against two opponents and continued to be a popular figure throughout his service at City Hall. His second election in 1975 was a "landslide." In his last campaign in 1979 in a close contest he defeated John J. Daley, a former mayor and lieutenant governor of the state. As mayor Godnick appointed a Downtown Development Committee that was responsible for establishing the Downtown Development Corp. The DDC program resulted in numerous improvements in the downtown section of the city including the parking deck and the establishment of the office of city planner and community development director.

Only recently he had expressed his opposition to the city's support of the Finard-Zamias mall south of Rutland in the town.

As a state senator he worked assiduously for more help from Montpelier for Rutland area highway improvements and other projects. He was one of the first Democrats elected to the state Senate from Rutland County. Unlike many Democrats, he was a spokesman for business and development interests rather than environmental objectives.

The term rugged individualist might well have been devised to fit people like Gilbert Godnick. He will be remembered for his service to Rutland and the state as well as for his memorable characteristics of personality and speech.

## TERRY ANDERSON

Mr. MOYNIHAN. Mr. President, I rise to inform my colleagues that today marks the 1,894th day that Terry Anderson has been held in captivity in Beirut.

## THE RIGHT TO PRAYER IN SCHOOL

Mr. HATCH. Mr. President, the first amendment protects religious liberty. The framers of the Constitution intended our children to have the right to prayer in school. Yet that right was censored since the early 1960's when the Supreme Court banned school prayer.

Next Friday I will deliver the baccalaureate address at Southern Utah State College at Cedar City, UT, and I am pleased that the service will include prayer.

But in other graduation ceremonies across our Nation—both at the university and at the high school level—the prayer is banned.

A good friend of mine, a church leader, and a former president of Brigham Young University in Provo, UT, summed up the idea of freedom and religious censorship in a timely article published in today's Wall Street Journal.

Mr. President, I ask unanimous consent that the entire article be printed in the RECORD for my colleagues to read.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, May 23, 1990]

WHEN "FREEDOM" BECOMES RELIGIOUS CENSORSHIP

(By Dallin H. Oaks)

In this graduation season, many high-school administrators will be deciding whether to include prayer in their ceremo-

nies. The issue is more and more a subject of debate. The new discussion reflects a growing pattern of hostility to religion in the U.S.

In short, many understand the law today as being hostile rather than neutral toward religion—as forbidding all public prayers rather than simply prohibiting state-authored and state-required prayers in public schools.

When the Supreme Court decided the original school prayer case in 1962 (*Engel v. Vitale*), I interpreted the decision to forbid only state-authored and state-required prayers. As such, I thought the case was correctly decided. What I did not forsee, but what was sensed by people whose vision was far greater than my own, was that this decision would set in motion a chain of legal and public and educational actions that would bring us to the current circumstances in which we must reaffirm and even contend for religious liberty.

Such a situation exists in the U.S. today. In Utah, for example, controversies have arisen over prayers offered in high-school graduation exercises. A suit filed on behalf of two students in one school district last year objected that prayers being offered were "denominational," since they mentioned the name of Jesus Christ. The suit asked that such prayers be "non-denominational."

Interpreting this as a plea for a court order requiring that the name of Jesus Christ not be used in prayers offered at a public high-school graduation exercise, I thought of the first school prayer decision. In that case, the Supreme Court said government had no power to write prayers. Before Americans acquiesce to the use of judicial power to indicate that words cannot be included in a prayer, they should remember that if it is not part of the business of government to write a prayer, then it is not part of the business of a court to censor a prayer.

The Supreme Court voiced that principle just six years ago in rejecting an argument that the prayers in a state legislative assembly were illegal because they were always offered by a chaplin of one religious denomination. The court said: "The content of the prayer is not of concern to judges where, as here, there is no indication that the prayer opportunity has been exploited to proselytize."

Under this reasoning, the attempt in Utah to have a court dictate what could not be included in a prayer would not succeed. But even a winning case can be expensive to defend, and in the graduation-exercise case, this economic pressure persuaded the school board to do away with prayers as part of their graduation exercises.

Following the 1962 Supreme Court decision on prayer in schools, eminent legal scholars ridiculed the idea that the court's school prayer decisions would lead to a great gulf between religion and public life. What the legal scholars did not foresee is the extent to which the school-prayer and Bible-reading decisions would shift the burden of proof with respect to religious practices in public life. In the past, religion had been an accepted part of public life in America. It has become something that had to prove its right to remain in the public square. By the 1970s earlier principles had hardened into mechanical formulas that can be interpreted in ways hostile to religion.

Many citizens and some educators have come to consider it bad taste or even illegal for public-school teachers to mention religious influences or commitments. No wonder Americans suffer appalling ignorance of their political and cultural origins.

Studies show that textbook authors have avoided references to God or to religion. For example, one textbook in use today defines "pilgrims," originally a religious term, as "people who make long trips." In another text, no religious event is included in a list of hundreds of important events over a 200-year period in American history, and the religious origins of pre-Civil War abolitionism and the recent Civil Rights movement are commonly skimmed over or totally omitted.

Initially, the Supreme Court's school prayer decision outlawed only state-authored and state-required prayers. Later, the courts forbade any prayers in public-school classrooms—even prayers that were privately composed or optional. The courts were concerned with the possibility that impressionable young students would be coerced by such publicly sponsored religious exercises. Despite the absence of coercion from prayers in adult settings, and despite the fact that prayers are frequently offered in legislative and other public meetings in every state in the union, some have continued their efforts to force the abolition of prayers at government or other public meetings. Immense resources have been devoted to thrashing out the constitutional limits on prayer.

Appellate court opinions issued in the past several years have split on the legality of prayers at high-school graduation exercises. The U.S. Supreme Court has not yet ruled on any such controversy. I hope the court will reaffirm a 1952 opinion: "When the state encourages religious instruction or cooperates with religious authorities by adjusting the schedule of public events to sectarian needs, it follows the best of our traditions. For it then respects the religious nature of our people and accommodates the public service to their spiritual needs."

As the law stands today, school boards challenged on the legality of prayers offered on public ceremonial occasions must choose among continuing such prayers and risking expensive litigation, abandoning prayer and being seen as relinquishing treasured practices, or substituting a moment of silence in which all are invited to offer private devotions.

The last option is likely to be unacceptable to most. In my view, the one alternative that is entirely unacceptable is for a school district to attempt to prescribe or censor prayers to be offered at any function in the district.

Religion should have a place in the public life of our nation. To honor this principle with prayers in the graduation exercises of high-school students is to honor the religious plurality of our nation and the religious liberty it was founded to protect.

## C.R. SMITH, A GREAT PIONEER OF AVIATION

Mr. BENTSEN. Mr. President, in 1928 a tall, young Texas accountant was asked by his boss to do the books and oversee operations of some small airlines which his company had just acquired. "I'm not interested in aviation," he protested. Eventually, however, he agreed. "OK, I'll try it for a while," said C.R. Smith.

That young man went on to become the first president and guiding spirit of American Airlines. He had vision, drive, and success. By helping to shape and build one of our premier industries, civil aviation, he truly made a difference in the way we live.

Cyrus Rowlett Smith, usually called simply "C.R.", was born in Minerva, TX, in 1899. Although he lacked sufficient high school credits for regular admission, he got special permission to enroll in the University of Texas. Bright and energetic, he was president of his junior class, was admitted to two honor societies, and operated his own advertising business during his college years.

When asked to oversee operations of what was to become American Airlines, C.R. Smith displayed his characteristic intelligence, hard-driving determination, and mastery of detail. He could be found inspecting hangars and clerical offices and cockpits, talking to employees and observing every facet of his company's operations.

He was especially sensitive to what passengers wanted. He emphasized safety in order to reassure the public about air travel and he insisted that planes be designed for comfort and economy.

In 1934, determined to get a better aircraft than was being built for his competitors, he made a lengthy long-distance call to Donald Douglas, Sr., in California. Smith told Douglas numerous changes he wanted in the new DC-2, including a wider body and increased passenger loads. That plane, built to Smith's specifications, became the workhorse of civil aviation for more than a decade—the DC-3. More than 10,000 were built, and the very first put into passenger service was called the Flagship Texas.

Mr. President, let me cite one story which illustrates his character very well. A friend saw Smith waiting in a long standby line at National Airport and asked him why he did not board. In his usual laconic way, Smith answered, "Flight's booked full." His friend pointed out that he was president of the airline. "They're paying customers," Smith responded.

When America entered the Second World War, C.R. Smith volunteered his aviation and managerial skills to the war effort. He helped establish and was later deputy commander of the Air Transport Command. His war work won him numerous awards, including the Distinguished Service Medal, the Legion of Merit, and the Air Medal. As I subsequently learned, when there was some confusion over his military records from the war, Smith never accepted his major general's paychecks.

He also served in Lyndon B. Johnson's cabinet as Secretary of Commerce during 1968.

C.R. Smith was more than a financial and marketing genius in aviation. He was a sophisticated, cultivated

man. He was an avid reader and a skilled dry fly fisherman. He was an early and enthusiastic collector of Western art, much of which he gave to the University of Texas.

He was admired and respected by those who worked with him, by those who worked for him, and by his competitors, who recognized his skills. At his death last April 4, he was properly hailed as a great pioneer in civil aviation.

Mr. President, I think we can all learn valuable lessons from the long and productive life of C.R. Smith. With old-fashioned virtues and modern techniques, he built a strong company, shaped a major industry, and served his country. In no small way, he helped make air travel the safe and convenient mode of transportation it is for us today.

## EL SALVADOR'S MILITARY LEADERS

Mr. LEAHY. Mr. President, I rise to bring to the attention of other Senators and the American people a report just released by the House Arms Control and Foreign Policy Caucus. This report, entitled "Barriers to Reform: A Profile of El Salvador's Military Leaders," is years overdue.

I want to commend Senator HATFIELD and Representatives HOWARD BERMAN and GEORGE MILLER for commissioning this report. They have done a great service for those of us who for years have watched in horror as an estimated 70,000 Salvadorans lost their lives. Throughout those years, despite strong evidence of collaboration between Salvadoran military officers and rightwing death squads, not one officer has been convicted of a human rights violation. For far too long, while the United States has bankrolled the Salvadoran buraucracy and military at a rate of over $1 million per day, the Congress has been kept in the dark about the true colors of the Salvadoran military leadership.

This report contains information which should make even the staunchest supporter of United States policy toward El Salvador stop and think again. It describes the career records of the 15 officers who now hold the primary commands in the Salvadoran military, and tracks documented human rights abuses by troops under their commnd during the past 10 years.

By matching information on officers' previous assignments with reports of abuses of human rights, the report concludes that 14 of the 15 of El Salvador's commanding officers have risen to their positions despite documented abuses, including murder and torture of noncombatants, by troops under their command.

This includes Chief of Staff Emilio Ponce, the Minister and two vice Ministers of Defense, the heads of the three security forces and five of the six major brigades.

In not one of the over 50 cases documented in the report have even the junior officers been brought to trial.

And, of the 14 commanders whose troops reportedly committed abuses, 11 received U.S. training, some for many years.

Mr. President, according to the Salvadoran press, President Cristiani has denounced this report as part of an FMLN propaganda campaign. As one Senator who has publicly condemned the abuses of the FMLN, including last year's offensive in San Salvador, I urge President Cristiani to give this report the serious attention it deserves. He himself has spoken of the need to reform the Salvadoran military. This report only confirms the extreme urgency of that need, beginning at the highest levels.

For fiscal year 1991, the administration is requesting another $90 million for the Salvadoran military. The Foreign Operations Subcommittee will be marking up that bill in the next 2 to 3 months. This report, in addition to progress in peace negotiations and in the prosecutions of those responsible for murdering the Jesuits and other unresolved human rights cases, will factor heavily in what I propose to the subcommittee for aid to El Salvador in that bill.

## MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Kalbaugh, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

## MESSAGES FROM THE HOUSE

At 2:43 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 231. Joint resolution to designate the week of June 10, 1990 through June 16, 1990, as "State-Supported Homes for Veterans Week."

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BIDEN, from the Committee on the Judiciary:

Report to accompany the bill (S. 640) to regulate interstate commerce by providing for uniform standards of liability for harm arising out of general aviation accidents (Rept. No. 101-303).

## EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. GLENN, from the Committee on Governmental Affairs:

Annice M. Wagner, of the District of Columbia, to be an Associate Judge of the District of Columbia Court of Appeals for the term of 15 years; and

Jerry D. Jennings, of Michigan, to be Deputy Director of the Federal Emergency Management Agency.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

## INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. KOHL (for himself, Mr. HEINZ, Mr. PRYOR, Mr. GRASSLEY, Mr. KASTEN, Mr. KERRY, Mr. MOYNIHAN, Mr. SIMON, and Mr. GLENN):

S. 2675. A bill to amend title 13, United States Code, to provide for the enumeration in the census of members of the Armed Forces assigned outside of the United States, and for other purposes; to the Committee on Governmental Affairs.

By Mr. McCONNELL:

S. 2676. A bill directing the Secretary of Transportation to establish an instrument landing system at Bowling Green-Warren County Airport, Bowling Green, KY; to the Committee on Commerce, Science, and Transportation.

By Mr. LAUTENBERG (for himself, Mr. KENNEDY, Mr. KASTEN, Mr. SIMON, Mr. GRASSLEY, and Mr. HARKIN):

S. 2677. A bill to extend for 2 years the operation of sections 599D and 599E of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990; to the Committee on the Judiciary.

By Mr. RIEGLE (for himself, Mr. HEINZ, and Mr. PRYOR):

S. 2678. A bill to clarify the deductability under the Internal Revenue Code of 1986 of liabilities incurred in connection with minimum premium plans; to the Committee on Finance.

By Mr. BURNS (for himself, Mr. DASCHLE, Mr. CONRAD, Mr. PRESSLER, and Mr. BAUCUS):

S. 2679. A bill to protect irrigation, power, and recreation on the Missouri River; to the Committee on Enviroment and Public Works.

By Mr. BUMPERS:

S. 2680. A bill to provide for the relief of certain persons in Stone County, AR deprived of property as a result of a 1973 dependent resurvey by the Bureau of Land

Management; to the Committee on Energy and Natural Resources.

By Mr. DIXON (for himself and Mr. D'AMATO):

S.J. Res. 325. A joint resolution to disapprove of renewal of most-favored-nation status for the People's Republic of China [PRC]; to the Committee on Finance.

By Mr. D'AMATO (for himself and Mr. LAUTENBERG):

S.J. Res. 326. A joint resolution to designate December 21, 1990, as a "Day of Observance for the Victims of Terrorism"; to the Committee on the Judiciary.

## SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HEINZ (for himself, Mr. PRYOR, Mr. COHEN, Mr. GLENN, Mr. PRESSLER, Mr. BRADLEY, Mr. GRASSLEY, Mr. BURDICK, Mr. WILSON, Mr. JOHNSTON, Mr. SIMPSON, Mr. BREAUX, Mrs. KASSEBAUM, Mr. SHELBY, Mr. REID, Mr. GRAHAM, and Mr. KOHL):

S. Con. Res. 134. A concurrent resolution expressing the sense of Congress concerning a 1991 White House Conference on Aging; to the Committee on Labor and Human Resources.

## STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. KOHL (for himself, Mr. HEINZ, Mr. PRYOR, Mr. GRASSLEY, Mr. KASTEN, Mr. KERRY, Mr. MOYNIHAN, Mr. SIMON, Mr. LAUTENBERG, and Mr. GLENN):

S. 2675. A bill to amend title 13, United States Code, to provide for the enumeration in the census of members of the Armed Forces assigned outside of the United States, and for other purposes; to the Committee on Governmental Affairs.

INCLUSION OF MEMBERS OF THE ARMED FORCES ASSIGNED OUTSIDE OF THE UNITED STATES IN THE CENSUS

Mr. KOHL. Mr. President, today I am introducing legislation which would require the Census Bureau, in cooperation with the Department of Defense, to count overseas military personnel based on the place where they enlisted or, their "home of record." I am pleased to add Senators HEINZ, PRYOR, GRASSLEY, BRADLEY, KASTEN, KERRY, MOYNIHAN, SIMON, LAUTENBERG, and GLENN as original cosponsors of this bill.

The enumeration of oversea military personnel is strictly for reapportionment purposes. The Commerce Department and Census Bureau, on Friday, May 18, 1990, announced its policy to count these personnel based on their last U.S. residence of 6 months or longer. This would place a disproportionate amount of these persons in States with large military staging facilities, causing an automatic inaccuracy in the census. My legislation will require the Census Bureau and Department of Defense to count overseas military personnel and their dependents based on their "home of record." This will effectively distribute them more equally and fairly throughout the Nation.

The last time overseas military personnel were counted in a census was in 1970. At that time, the Census Bureau used the "home of record" as the means for enumerating them. I believe this to be the most fair and accurate method to carry out the enumeration of these personnel.

According to Census Bureau projections, 1.6 to 2 million persons would be affected by the Commerce Department's decision. As many as 18 seats in the House of Representatives could be transferred due to the new census figures. For some States, a change of only 1,000 individuals could cause the loss of a seat in the House.

We are all aware of the problems the Census Bureau is having with counting all Americans. Less than two-thirds of Americans have returned their questionnaires. Now, I am concerned that the Census Bureau wants to put some of the people they do count in the wrong place. The decision to count active duty military personnel based on their "last duty station" rather than their "home of record," is outrageous. It is inconsistent with past Census Bureau policies. It is not fair. And, it would not make good public policy. When dedicated men and women choose to serve our Nation in the Armed Forces, their individual home States should not be disadvantaged because of it.

I ask your support of this legislation, which will contribute to an accurate and successful 1990 census, and I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2675

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 141 of title 13, United States Code, is amended—

(1) by redesignating subsection (g) as subsection (h); and

(2) by inserting after subsection (f) the following:

"(g) Effective beginning with the 1990 decennial census of population, in taking any tabulation of total population by States for purposes of the apportionment of Representatives in Congress among the several States, the Secretary shall take appropriate measures to ensure that—

"(1) no member of the armed forces shall be excluded based on such member's being assigned to a post outside the United States; and

"(2) each member of the armed forces so assigned shall be enumerated at such member's 'home of record', as defined by the Department of Defense for administrative purposes.".

---

By Mr. McCONNELL:

S. 2676. A bill directing the Secretary of Transportation to establish an instrument landing system at Bowling Green-Warren County Airport, Bowling Green, KY; to the Committee on Commerce, Science, and Transportation.

BOWLING GREEN INSTRUMENT LANDING SYSTEM

Mr. McCONNELL. Mr. President, today I rise to introduce legislation which would provide the Bowling Green-Warren County Airport with an instrument landing system [ILS]. Briefly, my bill would require the Secretary of Transportation, acting through the Federal Aviation Administration, to provide an ILS for Bowling Green, KY.

Bowling Green is one of the fastest growing communities in the Commonwealth of Kentucky and the Nation. With this growth, the need for an expanded and improved airport has increased substantially. Presently, the airport is making every effort to expand its current facility and is attempting to meet the growing needs of the area. However, without an ILS, the airport will be greatly limited in its ability to serve Bowling Green and Warren County.

At present, the airport is trying to attract a major airline to establish passenger and commuter air service. Certainly, this is a key element in meeting the needs of those who use the airport. As one can imagine, Mr. President, the lack of an ILS makes it difficult to attract such an airline and has a negative impact on airport safety as well.

Those who currently use the airport include the general public, local industry, Western Kentucky University's sports teams, other universities flying into Bowling Green to play Western, as well as Fort Campbell's use of the airport as an additional training facility. Unfortunately, the lack of an ILS allows these groups to fly into Bowling Green only under near perfect weather conditions. Anything less than perfect would require a flight to be diverted to another airport. I find this unacceptable and believe that a community the size of Bowling Green warrants an ILS.

Another major factor to consider is the further economic growth of the community. While I am convinced that this area will continue to grow and prosper, I believe that the airport can be a major catalyst for development into the 1990's. At this time, it is my understanding that Bowling Green is the only community of its size in Kentucky that does not have an ILS. In light of the Commonwealth of Kentucky's recent commitment to provide $240,000 for acquisition of an ILS, it is imperative that Federal support for a landing system be provided.

Mr. President, I urge my colleagues to support this bill and ask for its timely consideration.

---

By Mr. LAUTENBERG (for himself, Mr. KENNEDY, Mr. KASTEN, Mr. SIMON, Mr. GRASSLEY, and Mr. HARKIN):

S. 2677. A bill to extend for 2 years the operation of sections 599D and 599E of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990; to the Committee on the Judiciary.

EXTENSION OF THE REFUGEE ACT

● Mr. LAUTENBERG. Mr. President, I rise to introduce a 2-year extension of the Lautenberg-Morrison law which makes it easier for certain historically persecuted groups of refugee applicants to enter the United States as refugees. This legislation passed the Senate by a vote of 97 to 0 last year, and became law as part of the Fiscal Year 1990 Foreign Aid Appropriations Act. It sunsets on October 1, 1990.

I am extremely pleased to have as original cosponsors of this bill Senator KENNEDY, the distinguished chairman of the Senate Judiciary Committee's Immigration Subcommittee, Senator SIMON, also a member of that subcommittee, Senators GRASSLEY, KASTEN, and HARKIN. I would also note that Congressman MORRISON, the law's sponsor in the House last year, and the chairman of the House Judiciary Subcommittee on Immigration, is introducing the same bill on the House side.

The legislation has been endorsed by the American Jewish Committee, the Council of Jewish Federations, the Hebrew Immigrant Aid Society, World Relief, the Ukrainian National Association, Inc., the U.S. Catholic Conference, and the Lutheran Immigration and Refugee Service.

I'm also pleased that extension of this law also has the support of Secretary Baker, who acknowledged that to me in a hearing before the Senate Appropriations Subcommittee on Commerce, Justice, State, and Judiciary on April 25, 1990.

The law we passed last year formally recognized that the historical experience of certain persecuted minorities in the Soviet Union and Southeast Asia, and a pattern of arbitrary denials of refugee status to members of these minorities, entitled them to a temporarily relaxed standard of proof in determinations about whether they are refugees. This law, for fiscal year 1990, lessened the evidence required for Soviet Jews, Soviet Evangelical Christians, religiously active Soviet Ukrainian Catholics and Orthodox, and certain categories of Vietnamese, Laotians, or Cambodians to qualify for admission to the United States as a refugee. Once a refugee applicant proves he or she is a member of one of these groups, he or she only has to prove a "credible basis for concern" about the possibility of persecution. Refugee applicants normally must prove a "well-founded fear of persecution."

The law also provides for the adjustment of status from parolee to permanent resident for nationals of the Soviet Union, Vietnam, Laos, or Cambodia who entered the United States on or after September 1, 1988, and before September 1, 1990, as parolees. To qualify, they must prove they have been physically present in the United States for at least 1 year.

The 2-year extension we now propose would mean that parolees in the specified groups who entered the country after August 15, 1988, and before September 1, 1992, may qualify for this adjustment of status. It would also extend for 2 years the requirement that decisions made to deny applications for refugee status must be in writing and state the reasons why the application was denied.

Current law provides that members of the protected groups who were denied refugee status between August 15, 1988, and the date the law was enacted are eligible to reapply for refugee status under the terms of the law. The 2-year extension would make those who were denied refugee status between August 15, 1988, and October 1, 1992, eligible to reapply under the terms of the law.

Finally, the law provided for a GAO review of processing in the Soviet Union to see how the law was being implemented. This new legislation includes a requirement for another review.

The Lautenberg-Morrison law is working as intended. It has replaced an arbitrary and slow process of refugee adjudication in the Soviet Union and Southeast Asia with a stable, consistent and fair process. It has meant that people already terrorized by longstanding hatred and persecution in their native lands are not further traumatized by a system that does not recognize their suffering, or makes arbitrary distinctions between people who have suffered similar fates.

This law has had a real and positive impact on refugee applications. Denial rates for Soviet Jews decreased from about 36 percent last March before Lautenberg-Morrison to 8 percent for February of 1990, and 11 percent in March. For Soviet Pentecostals, a review done by World Relief shows that no Soviet Pentecostals applying for refugee status were unfairly denied refugee status.

We continue to need this liberalized standard because conditions for the persecuted groups in the Soviet Union and Southeast Asia have not significantly improved. The conditions that caused them to seek refuge last year still exist, and in some cases, have worsened.

While Soviet Jews have been permitted to emigrate in much greater numbers, those remaining face a greatly increased threat to their well-being. Pogroms are a very real possibility, and heightened harassment, violence, and public expressions of hatred by anti-Semitic groups like Pamyat are already occurring.

Pentecostals, who are concentrated in areas far from the cities, continue to be harassed for their religious beliefs. Ukrainian Catholic and Orthodox congregations have been permitted to exist, but they remain illegal. Harassment of believers continues and worship is still obstructed, especially in Eastern Ukraine, an area less open to the West.

Although the historic persecution of these groups continues, even the Immigration and Naturalization Services acknowledges that denial rates would go up if the relaxed standard embodied in this law were permitted to sunset in October 1990. If this law expires at the end of this fiscal year, denial rates for Soviet Jews would go up to about 40 percent. Given the present contingent of only 6 INS adjudicators in Moscow, INS officials believe it would be impossible to interview enough people to fill the 40,000 refugee visas available in 1990.

Moreover, the GAO report done pursuant to the requirements of this law, entitled "Soviet Refugees: Processing and Admittance to the United States," found that two of the six rooms in which Soviet refugee applicants are being interviewed are unsatisfactory because they do not provide sufficient privacy. Because the lack of privacy creates an atmosphere in which an applicant may legitimately fear speaking the truth about persecution, the protection offered by the Lautenberg-Morrison law is still needed. I ask unanimous consent that a copy of this report appear in the RECORD following my remarks.

With rising anti-Semitism and the closing off of direct flights to Israel, Soviet Jews face long waits to leave the Soviet Union and go to Israel. By allowing this law to sunset, we would be erecting yet another hurdle to the escape of Jews from the Soviet Union.

Further, the delays in implementing this law through regulations argue for an extension. Although the law was passed in December, the regulations for refugees were not in place and operating till the beginning of February for the Soviet Union, a 2-month delay. I am told that in Southeast Asia, the regulations did not actually take effect until late February or early March.

In addition, regulations for the section on the adjustment of status of parolees already in the United States still do not exist. This delay has prompted some organizations concerned with parolees now here to con-

template litigation against the INS for this delay.

For all of these reasons, it is imperative to extend this law for another 2 years.

I urge my colleagues to support this bill, and I ask unanimous consent that the text of the bill be printed at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 2677

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

SECTION 1. 2-YEAR EXTENSION OF SECTIONS 599D AND 599E OF THE FOREIGN OPERATIONS, EXPORT FINANCING, AND RELATED PROGRAMS APPROPRIATIONS ACT, 1990.

(a) EXTENSION OF CATEGORIES OF ALIENS FOR PURPOSES OF REFUGEE DETERMINATIONS.—Section 599D of the Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1990 (Public Law 101-167) is amended—

(1) in subsection (b)(3), by striking "fiscal year 1990" and inserting "for each of fiscal years 1990, 1991, and 1992", and

(2) in subsection (e), by striking "October 1, 1990" each place it appears and inserting "October 1, 1992".

(b) EXTENSION OF ADJUSTMENT OF STATUS FOR CERTAIN SOVIET AND INDOCHINESE PAROLEES.—Section 599E(b)(2) of such Act is amended by striking "September 30, 1990" and inserting "September 30, 1992".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on September 30, 1990.

---

[U.S. General Accounting Office, Report to Congressional Requesters, May 1990]

SOVIET REFUGEES: PROCESSING AND ADMITTANCE TO THE UNITED STATES

GENERAL ACCOUNTING OFFICE, NATIONAL SECURITY AND INTERNATIONAL AFFAIRS DIVISION,
*Washington, DC, May 9, 1990.*

Hon. JOSEPH R. BIDEN, Jr.,
*Chairman, Committee on the Judiciary, U.S. Senate.*

Hon. JACK BROOKS,
*Chairman, Committee on the Judiciary, House of Representatives.*

The Foreign Operations Appropriations Act for fiscal year 1990, Public Law 101-167, directs GAO to report on the implementation of section 599D, pertaining to the processing and admittance of Soviet refugee applicants to the United States during fiscal year 1990. Section 599D, referred to as the Lautenberg Amendment, requires the Executive branch to establish refugee processing categories for Jews, Evangelical Christians, Ukranian Catholics and Ukranian Orthodox Church members and gives members of these categories [1] an enhanced opportunity to qualify for refugee status when being interviewed.

We evaluated the Department of State and Immigration and Naturalization Service (INS) efforts to implement the requirements of the Lautenberg Amendment. More specifically, we determined (1) the adequacy and timeliness of the adjudication process, (2) the adequacy of staffing for processing refugee applicants, and (3) whether Soviet refugee processing in Rome was being effectively phased out. To the extent that information was available, we also compared the cost of conducting refugee processing in both Moscow and Rome.

INS and the Department of State are implementing the Lautenberg Amendment. We believe INS' implementing guidance responds to the amendment and potentially provides enhanced consideration of category cases for refugee status. However, because the amendment does not affect the interview scheduling priories,[2] all category members may not be scheduled for interview. Because INS did not implement its guidance until February 1, 1990, it is too early to assess the overall impact of the Lautenberg Amendment on fiscal year 1990 Soviet refugee adjudications.

Moscow processing was on track for meeting its fiscal year 1990 interviewing goals as of mid-March. Whether the operation in Moscow can sustain existing or meet the higher processing goals in future years depends upon adequate staffing resources, expanded office space, and the Soviet Union's enactment of liberalized emigration legislation.

INS officers were not always sufficiently documenting their reasons for denying refugee claims. Adequate documentation is important because when denied claims must be reviewed by other INS officials, the claims are sustained or reversed on the basis of the documentation. Without adequate documentation in the files, INS reviewers are unable to determine whether the officers' denial decisions were appropriate. INS officials said that INS would re-emphasize to its interviewing officers the importance of documenting their adjudication rationale. INS also said it is now requiring supervisory review of category cases to ensure the adjudication decision was justified. Similar statements were made in the past when we alerted INS to documentation problems, but the problem remained uncorrected overseas.

Phasing our Soviet refugee processing in Rome is proceeding more quickly than anticipated with most Soviet refugees expected to depart by June 1990. Refugee departures have been delayed pending INS' receipt of sponsorship assurances from voluntary agencies in the United States.

Processing Soviets for refugee status in Moscow, instead of Rome, enables U.S. officials to better manage the refugee flow into the United States and reduce refugee processing costs. At least initially, the flow has been better managed because Moscow processing enables U.S. officials to establish Soviet refugee admissions ceilings based on U.S. foreign policy objectives and budgetary consideration, rather than on the number of individuals the Soviet government allows to emigrate. It also allows the U.S. government to give priority to adjudicating Soviet applicants with close family and other ties to the United States, instead of adjudicating according to the refugee application date.

Although a precise comparison of refugee processing costs between Moscow and Rome is difficult to make, our estimate of the cost to process Soviet refugees shows that processing a refugee in Moscow could be less than one-half the cost of processing a refugee in Rome.

BACKGROUND

For more than a decade, most Soviets seeking U.S. refugee resettlement were processed by INS in Rome, Italy. They traveled to Rome either through Moscow or through Vienna. Soviets with permission to emigrate directly to the United States, mostly Armenians, registered with the U.S. Embassy in Moscow, and then traveled to Rome for INS processing. Soviets existing the Soviet Union with Israeli entry visas, mostly Jews, traveled initially to Vienna, Austria, and then to Rome for INS processing.

During most of this period, the number of Soviet refugee applicants was relatively small. However, as a result of political changes within the Soviet Union, the number of Soviets recently applying for refugee resettlement in the United States has rapidly increased. For example, in fiscal year 1987, fewer than 4,000 Soviets applied for refugee admission, but by fiscal years 1988 and 1989 the numbers had increased to over 20,000 and almost 100,000, respectively. State Department officials estimate that preliminary questionnaires representing about 800,000 Soviets will be received during fiscal year 1990.

In response to the outflow of Soviet citizens in 1988, the administration began to make major policy adjustments to its Soviet refugee program. One of the first adjustments occurred in August 1988, when INS began to adjudicate refugee claims at the U.S. Embassy in Moscow. This adjustment eliminated the need for Soviets with permission to emigrate directly to the United States to travel to Rome for refugee processing.

A second major adjustment also occurred in August 1988, when the U.S. Attorney General issued a policy requiring INS to adjudicate Soviet refugee applicants on a case-by-case basis, in accordance with the INS worldwide adjudication standard. Until that time, the United States granted nearly automatic refugee status to almost all Soviet citizens wishing to emigrate.

The new policy ended this practice by requiring Soviet refugee applicants—like all other refugee applicants—to establish individually that they suffered persecution or had a well-founded fear of persecution to qualify for refugee status. This change was necessary, according to U.S. officials, to bring the Soviet refugee program into compliance with the Refugee Act of 1980, as well as to ensure that the limited refugee admissions available for Soviets were used by bona fide refugees.

In anticipation that some Soviet citizens would be denied refugee status under the new adjudication practice, the Attorney General extended an offer of public interest parole to all Soviets found ineligible for refugee status. Parole status entitles a Soviet to enter the United States but does not provide U.S. government financial aid or the right to apply for permanent resident status, as does refugee status.

Under this standard, INS began to deny Soviets refugee status. During fiscal year 1989, INS denied refugees status to about 11,500 Soviets in Moscow and about 5,300 Soviets in Rome. Because some denied Soviets were from ethnic or religious groups that had historically experienced discrimination or persecution within the Soviet

[1] The term "category" has a special meaning within the context of the Refugee Act of 1980. It means that such groups are of special humanitarian interest to the United States because of a history of mistreatment or persecution in their home countries, and therefore warrant special consideration for refugee status.

[2] Refugee applicants are classified within six refugee processing priorities according to whether they have close family or other ties to the United States. This is done to ensure orderly management of refugee admissions and that the refugees of most concern to the United States have admission priority.

Union, concerns were raised by congressional members and others about how consistently the worldwide standards were being applied. Also, U.S. officials were concerned about the political implications of Soviets remaining indefinitely in Italy. Few Soviets denied refugee status in Rome were accepting parole status and most did not wish to emigrate to Israel.

A third major change occurred about a year later. In September 1989, the administration announced that Rome processing for Soviet refugee applicants would be phased out. Under the phase-out provisions, only Soviets with Soviet exit permission to Israel dated before October 1, 1989, and an Israeli entry visa dated before November 6, 1989, would be processed in Rome. All other Soviets interested in U.S. refugee resettlement would have to be scheduled for INS interviews in Moscow. At the same time, the Attorney General directed INS to begin adjudicating Soviet refugee applicants in Rome according to a new, more generous adjudication standard and to review all previously denied cases in light of the new standard.

State and INS officials cited several reasons for the decision to consolidate Soviet refugee processing in Moscow, including (1) a recognition that the United States could not resettle all Soviets wishing to emigrate from the Soviet Union, (2) the need to better manage the program by being able to establish Soviet refugee admissions ceilings and give priority to Soviets with ties to the United States, (3) the high cost of the Rome processing, (4) concern about the hardship facing Soviets denied refugee status in Rome, and (5) fairness and consistency concerns resulting from two processing locations.

A fourth major change was the enactment of the Lautenberg Amendment in November 1989, requiring the Executive branch to establish four refugee processing categories for Soviet applicants processed during fiscal year 1990.

### IMPLEMENTATION OF LAUTENBERG AMENDMENT

The administration began implementing the Lautenberg Amendment on February 1, 1990, in accordance with INS implementing guidance, dated January 24, 1990. The new guidance establishes four refugee processing categories for Jews, Evangelical Christians, Ukranian Catholics, and members of the Ukranian Orthodox Church; requires case-by-case adjudications; and lowers the approval threshold for category members to make it easier for them to qualify as refugees. As the legislation intended, INS is applying the guidance retroactively to all category applicants denied refugee status since August 1988. However, because INS did not implement its guidance until February 1, 1990, it is too early to assess the overall impact of the Lautenberg Amendment on fiscal year 1990 Soviet refugee adjudications.

Fiscal year 1990 is a transition year for Soviet refugee processing, with applicants being processed in both Moscow and Rome. About 45,000 of the 50,000 Soviet refugee admissions authorized in fiscal year 1990 are being processed in Rome (about 31,000 had departed for the United States by March 15, 1990) and the remaining refugee admissions are being processed in Moscow. During fiscal year 1990, before INS implemented the Lautenberg Amendment, almost 78 percent of the category applicants interviewed in Moscow were approved for refugee status. In Rome, during the same period, 99 percent of the applicants interviewed (mostly Jews) were approved for refugee status. INS reported that during February 1990, officers approved refugee status for 90 percent and 99 percent of the category members adjudicated in Moscow and Rome, respectively.

INS expects to complete interviewing fiscal year 1989 Moscow refugee applicants by December 1990. For fiscal year 1990 registrants, interview scheduling priority is being given to those with close family or other ties to the United States or who are of special interest to the United States. Soviets with a low refugee processing priority may never be scheduled for an INS interview. With preliminary questionnaires representing about 800,000 Soviets expected to be received in fiscal year 1990 and a Soviet refugee admissions ceiling of 50,000, it is generally anticipated that only Soviets with high priority processing codes will be interviewed. Soviets with a high interview priority wait about 3 to 6 months from the time they submit preliminary questionnaires until the INS interview date, and an additional 6 months before departing to the United States, if approved for refugee status.

### NEW INS PROCEDURES APPEAR TO IMPROVE THE PROCESS, BUT SOME PROBLEMS REMAIN

The new procedures for processing in Moscow appear to be working, although not without initial problems. The Washington Processing Center, established in October 1989, has assumed most of the administrative refugee processing functions previously performed by the U.S. Embassy in Moscow. Both the Washington Processing Center and the Embassy were meeting their fiscal year 1990 processing goals as of mid-March 1990. A State Department official estimates that 15,000 to 20,000 Soviets may be approved for refugee status in Moscow during this fiscal year. Because it currently takes about 6 months to process refugees for travel, those approved after March 1990 will not depart for the United States until fiscal year 1991. However, whether processing in Moscow will meet future refugee admission goals depends upon resolving the chronic staffing shortage in Moscow, expanding and renovating the Moscow Embassy office space, and the Soviet Union's passage of more liberalized emigration legislation.

We also noted that Soviet refugee departures were being delayed because voluntary agency sponsorship assurances were not available.[3] As of February 28, 1990, about 13,000 refugees were wating for sponsorship assurances in Rome and Moscow. Some of these had been waiting more than 4 months.

We also found that INS interviewing officers were not always sufficiently documenting the rationale for denial decisions in the applicant's case file, although this is required by INS in its "Worldwide Guidelines for Overseas Refugree Processing" and its January 24, 1990 guidance. Without such documentation, the case files are incomplete, and INS' reviewing officials cannot determine the appropriateness of the reasons for denying refugee claims. INS officials informed us this problem would be resolved.

### ADEQUACY OF STAFFING

Consolidated Soviet refugee plans call for a 22-person refugee processing unit at the U.S. Embassy in Moscow. This staffing level has not been met and, as a result, some processing requirements have been delayed.

[3] Refugees must have sponsorship assurances before departing to the United States. The sponsorship assurances identify the voluntary agency or individual that has agreed to assist the refugee's resettlement in the United States.

Moreover, Embassy and INS officials are concerned that INS officers may not be able to keep abreast of the interviews scheduled in the coming months. On March 23, 1990, just prior to when the Washington Processing Center would be scheduling applicants for July, the Embassy asked the Center to reduce the number of interviews scheduled daily in July from 72 to 50 families.

### PHASING OUT SOVIET REFUGEE PROCESSING IN ROME

The phaseout of Soviet refugee processing in Italy is nearing completion. By mid-March 1990, INS had essentially completed interviewing Soviet refugee applicants and was reducing its staff. Voluntary agencies reported only 120 refugee applications pending submission to INS, and that fewer than 40 Soviets had entered the Vienna/Rome processing route in February 1990. According to INS officials, all Soviets should depart from Rome by June 1990 if voluntary assurances are not delayed.

### COST COMPARISON OF PROCESSING IN MOSCOW AND ROME

Refugee processing in Moscow will significantly reduce program costs because Moscow processing does not involve federally funded care and maintenance expenses or voluntary agencies' administrative and processing assistance. Such expenses and services, which are incurred in Rome processing, are expected to comprise about 77 percent of the total program cost for processing Soviets in Rome this fiscal year.

### RECOMMENDATIONS

Because the Lautenberg Amendment requires INS to state, to the maximum extent feasible, the reason for denying refugee status to category cases, and INS documentation of denial decisions has been a continuing problem, we recommend that the INS Commissioner direct INS supervisors to review denied category cases and certify that the documentation is sufficient to support the decision.

### SCOPE AND METHODOLOGY

To meet our legislated requirement, we reviewed pertinent legislation, regulations, and files on Soviet refugees and interviewed State Department, the Washington Processing Center, and INS officials. We also interviewed representatives of three voluntary agencies involved with Soviet refugees. During January 1990, we visited Moscow and Rome to observe refugee processing interview INS adjudicating officers, observe refugee interviews, and review refugee case files.

We did not obtain agency comments on this report, but we discussed its contents with State and INS officials, and their comments have been incorporated where appropriate. Our work was performed between October 1989 and March 1990 in accordance with generally accepted government auditing standards.

More detailed information on the administration's implementation of the Lautenberg Amendment and refugee processing in Moscow and Rome is in appendix I.

We are sending copies of this report to the Secretary of State, the Immigration and Naturalization Service, and other interested parties upon request.

This report was prepared under the direction of Harold J. Johnson, Director, Foreign Economic Assistance Issues. He can be reached on (202) 275-5790 if you have any

questions. Other major contributors are listed in appendix V.

FRANK C. CONAHAN,
*Assistant Comptroller General.*

## APPENDIX I—IMPLEMENTING THE LAUTENBERG AMENDMENT

### ESTABLISHING REFUGEE PROCESSING CATEGORIES

The Lautenberg Amendment directs that the administration establish at least four categories of Soviet refugee applicants who share common characteristics that identify them as targets of persecution in the Soviet Union, including categories for: Jews, Evangelical Christians, and Soviets who are current members of, and demonstrate public, active, and continuous participation (or attempted participation) in the religious activities of the Ukrainian Catholic Church or the Ukrainian Orthodox Church.

We found that INS and the Department of State have taken steps to increase INS officers' background knowledge of category applicants. Country-condition reports concerning the treatment of category members have been compiled and disseminated to INS officers, and the State Department is routinely providing pertinent information to INS offices in Rome and Moscow. INS officers have attended INS training courses on adjudicating Soviet refugee claims and on implementing the Lautenberg Amendment guidance. During our February 1990 visits to Moscow and Rome, our interviews with INS officers indicated that, overall, they were knowledgeable about conditions in the Soviet Union.

### ADJUDICATING CATEGORY CASES

The Lautenberg Amendment states that category members may establish, for purposes of admission as a refugee, that they have a well-founded fear of persecution on account or race, religion, nationality, membership in a particular social group, or political opinion by asserting such a fear and asserting a credible basis for concern about the possibility of such persecution.

According to INS and State officials, the Amendment language does not establish criteria for adjudicating category cases that are substantially different from the worldwide adjudication standards. However, these officials explained that the legislative history of the Lautenberg Amendment indicated that its sponsors intended that a more generous standard be applied in adjudicating category cases. Therefore, INS adopted some of the sponsors' language pertaining to the types of assertions applicants could make to establish a credible basis for a concern about the possibility of persecution in its implementing guidance, issued January 24, 1990. According to INS officials, the burden of proof with respect to having a well-founded fear of persecution nevertheless remains with the refugee applicant.

The Lautenberg Amendment, coupled with the new adjudication guidance effectively makes it easier for category members to qualify for refugee status, although it still does not provide presumptive refugee status. Non-category cases in Moscow continue to be adjudicated in accordance with the INS worldwide adjudication standard. In Rome, the Attorney General's September 14, 1989 guidance governs the adjudication of the few non-category cases.

An INS official stated that lowering the approval threshold makes it more difficult to adjudicate category cases because the distinctions between approvable and deniable refugee applications are lessened. This was evident during the first 3 weeks of implementation, when all of the category cases were approved in Moscow. INS supervisors in Moscow were instructed to review all category cases before the decisions are finalized to ensure accurate application of the guidance. By the end of February 1990, February's approval rate in Moscow for category members was about 90 percent. An INS official said that after INS adjudicators have become accustomed to using the new guidance supervisors will continue to review all denied category cases but will review approved cases on a sample basis only.

### INS REVISING REFUGEE DENIAL LETTER

The Lautenberg Amendment requires that each INS decision to deny refugee status to a category applicant be in writing and state, to the maximum extent feasible, the reason for the denial. To satisfy this requirement, INS prepared a pro forma denial letter that requires INS officers to check one of the several listed reasons for denying refugee claims.

An INS official explained that the adjudicating officer's case notes must provide the support and rationale for the new denial notification letter. Our review of adjudicated case files in Moscow and Rome showed, however, that some INS officers' notes did not explain the rationale for denying the case and, thus, could not support a detailed written basis for the denial.

INS officials said that insufficient documentation continues to be a problem, although INS training emphasizes the documentation requirement, and supervisors are instructed to evaluate the adequacy of documentation when they review cases. They said that after we brought similar documentation problems to their attention in October 1989,[1] INS officers and supervisors in Moscow and Rome were reminded of the requirements to document all decisions. We were told that INS officers and supervisors would be reminded again about the problem.

### REVIEWING DENIED REFUGEE CLAIMS

The amendment requires that catagory applicants, who were denied refugee status after Agust 14, 1988, and before enactment of the legislation, be permitted to reapply for such status. An INS official said that the review was extended to all category applicants denied from August 1988 until February 1, 1990. INS established a panel in Rome to review all category cases denied in Moscow and Rome. The panel reviewed 960 category applicants (210 Rome applicants and 750 Moscow applicants), in accordance with the new adjudication guidance, and granted refugee status to 620, or about 64 percent, of them.

### ALLOCATING SOVIET REFUGEE ADMISSIONS

The amendment directs the President to allocate 1,000 of the fiscal year 1990 Soviet refugee admissions to those who are members of the Ukrainian Orthodox Christian category or the Ukrainian Catholic category. The 1,000 admissions have been allocated, but administration officials believe that only a very small percentage will be used.

Historically, few Ukrainians have applied for refugee status. Although 1,000 fiscal year 1990 Soviet refugee admissions have been allocated to Ukrainians, State officials believe that no more than 100 will enter the United States before the end of the fiscal year. Ninety-four fiscal year 1990 Ukrainian applicants were scheduled for interviews, as of March 15, 1990.

### REFUGEE PROCESSING IN MOSCOW

With the decision to phase out processing Soviet refugee applicants in Rome, on October 1, 1989, the administration began implementing new procedures for processing refugee applicants at the U.S. Embassy in Moscow. These procedures included establishing the Washington Processing Center (WPC) to assist with many of the administrative functions associated with refugee processing in Moscow. Soviets register for refugee consideration by submitting preliminary questionnaires,[2] obtained from the U.S. Embassy in Moscow or other sources, to the WPC via international mail or the Embassy. The WPC reviews the preliminary questionnaries for completeness, verfies affidavits of relationships, schedules INS interviews, notified individuals of their interview date, and prepares travel documents for refugees and parolees. INS began interviewing the first WPC-processed cases in January 1990. (See app. II.)

WPC is scheduling about 4,000 individuals monthly for INS interview. A complete assessment of its capabilities, however, cannot be done until applicants processed by WPC begin to arrive in the United States. A WPC official estimated that, as of mid-March 1990, preliminary questionnaires representing about 362,000 Soviets had been received. WPC had 45,300 individuals in process as of that date.[3] About 80 percent of the individuals in process are category members. Because of the volume of preliminary questionnaires, 3 to 6 months may elapse between when a questionnaire is mailed to the WPC and when the WPC enters it into the automated system.

On a monthly basis, WPC tries to schedule equal numbers of fiscal year 1989 and fiscal year 1990 cases for INS interview. Because the demand for refugee consideration within these two groups far exceeds the fiscal year 1990 Soviet refugee admissions ceiling, WPC schedules Soviets for interview in accordance with INS refugee processing priority codes[4] and the date Soviets submitted their preliminary questionnaires. Those with relatives or other ties to the United States, P-1 through P-5 processing codes, are allocated 80 percent of the monthly interviews. Soviets without such ties to the United States are designated a P-6 processing code and are scheduled for 20 percent of the interviews. Within this percentage, however, interview preference is given to certain types of P-6 Soviets including Evangelical Christians, Ukrainians, and Jews with distant relatives in the United States or Jews experiencing hardships. Other P-6 Soviets, who have submitted preliminary questionnaires for refugee consideration in fiscal

[1] In July 1989, we sampled denied Soviet refugee claims that were adjudicated in Moscow and Rome and determined that the INS officers had provided rationale for their denial decisions in less than 50 percent of the cases. We discussed our preliminary findings with INS officials in October 1989.

[2] Preliminary questionnaires submitted to the WPC since October 1, 1989, are considered to be registrations for interview rather than applications for refugee status. Those Soviets who filed for refugee status prior to October 1, 1989, are considered to be applicants, as are Soviet in the Vienna-Rome pipeline.

[3] The number of preliminary questionnaries does not equal the number of potential Soviets seeking refugee consideration, because only individuals 21 years of age and older are required to submit preliminary questionnaries.

[4] Refugees are classified within six priorities according to their ties to the United States. This is done to ensure orderly management of refugee admissions and that the refugees of most concern to the United States have admission priority.

year 1990, may never be interviewed. (See app. III for the detailed definitions of the INS processing priority codes.)

As of mid-March 1990, for fiscal year 1990 cases in progress at WPC about 70 percent of the individuals had the P-6 processing code. Figure 1.1 compares the processing priority codes for these individuals.

The INS at the U.S. Embassy in Moscow was meeting its fiacal year 1990 monthly interviewing goal as of mid-March 1990. In Moscow, we noted the following for fiscal year 1990:

Since the first preliminary questionnaires were distributed in Moscow in October 1989, demand for them continued, with about 451,000 questionnaires distributed by the Embassy and the WPC as of the end of February 1990.[5]

WPC notifies Soviets through the international mail and, if possible, through relatives in the United States, of their INS interview date. About 91 percent of the Soviet applicants scheduled for interview in February met their interview appointment.

The interview process has been efficient because applicants are submitting more complete and thorough paperwork than in 1989. Embassy officials attribute this improvement to better preparation instructions.

When we were in Moscow in January 1990, each INS officer was adjudicating about 12 cases (45 applicants) daily. We observed interviews, ranging from 15 minutes to over one hour, and noted consistency in the type of questions INS officers asked.

According to State officials, Soviet citizens approved for refugee status were told to expect a 6-month wait before they could travel to the United States due to post-interview processing requirements. Consequently, Soviets approved after March will be admitted to the United States under the fiscal year 1991 refugee admissions ceiling. The 6-month wait is attributable primarily to the time needed to obtain voluntary agency sponsorship assurances and complete post-interview processing at WPC.

Between October 1, 1989 and February 28, 1990, INS officers in Moscow had interviewed 16,069 applicants, most of whom had applied during fiscal year 1989. A WPC official estimated that all fiscal year 1989 cases in the priority 1 through 5 groups will be interviewed by the end of July 1990 and the remaining 1989 cases by December 1990. State officials said that INS will continue interviewing refugee applicants in Moscow even after the fiscal year 1990 refugee admissions ceiling has been met. The officials said a backlog of approved refugees pending departure will develop during fiscal year 1990.

State Department officials believe that processing in Moscow has permitted the United States to better manage the flow of Soviet refugees into the United States. They said that processing in Moscow enables the United States to establish Soviet admission ceilings based on U.S. foreign policy and budgetary considerations, rather than on the number of people the Soviet Union allows to emigrate. Furthermore, they said that the new scheduling procedures permit the United States to give interviewing priority to Soviet citizens with close family or other ties to the United States. In the past, Soviets were interviewed in chronological order based on their application date, rather than by refugee processing priority codes.

State and INS officials said that the new processing procedures provide the opportunity to significantly increase the number of Soviets that can be processed at the U.S. Embassy in Moscow. The extent to which the Embassy will be able to increase its processng goals, we believe, depends on whether the State Department and INS are able to resolve several problems were observed.

STAFFING PROBLEMS

State Department and INS officials agree that the Moscow Embassy refugee processing unit has been chronically understaffed. The staffing plan calls for 22 staff (9 INS officers, including a 3-person management team and 6 interviewing officers, and 13 support staff). The Embassy reported that nearly all non-INS refugee processing staff will depart by August 1990 and that there were no scheduled replacements for the INS staff that would be departing soon. As of mid-March 1990, only 4 INS interviewing officers were in Moscow and both INS and embassy officials were concerned about whether current refugee processing levels could be sustained. Shortages of support staff have caused delays in preparing refugee travel packets, responding to applicant's inquiries, and processing parolees for travel. On March 23, 1990, the Embassy requested that the WPC reduce the interview schedule in July from 72 cases to 50 cases daily, because of the staffing shortage.

State and INS officials attribute Moscow staffing problems to several factors: (1) most INS refugee processing positions are temporary duty assignments requiring unaccompanied tours and hotel living; (2) Soviet entry visas procedures are cumbersome and prevent timely staff rotation; and (3) staff fluent in Russian are hard to find.

The Departments of State and Justice are considering an increase in the Embassy's permanent staff ceiling level to accommodate refugee processing staff; INS is recruiting Russian language staff to train as adjudicating officers; and State has contracted with a private U.S. firm to provide 16 support staff. State officials said that the staffing problem should be resolved by September 1990.

MARGINAL FACILITIES

Facilities used for refugee processing, including interviewing, at the Embassy in Moscow are marginal. According to INS officials and our observations, two of the six interview rooms are unsatisfactory because they do not provide refugee applicants sufficient privacy during their INS interview. An Embassy official agreed that INS offices are unsatisfactory, but stated that so were most Embassy offices. They said that about a $4-million renovation of existing Embassy facilities was underway.

The renovated space will provide 10 INS interview rooms, 3 management offices, and space for administrative support staff and waiting rooms.

SOVIET EMIGRATION LAW STILL A PROBLEM

U.S. processing in Moscow is predicated on the assumption that Soviet citizens approved as refugees will be able to emigrate to the United States. According to Embassy and State Department officials, Soviet authorities have allowed their citizens to emigrate only at the invitation of close relatives abroad, or, in the case of Jews, to Israel. As of mid-January 1990, INS had approved about 2,100 Soviets (in the P-6 refugee processing priority) for refugee status who did not have close relatives or other ties to the United States. An Embassy official said that these refugees technically did not qualify for exit permission under existing Soviet emigration law. Although it is not known how many of these had applied for Soviet exit permission, an Embassy official said some denials had been reported. A State Department official said that a liberalized Soviet emigration law is expected to be enacted this year. However, the State official said that if the law is not enacted and obtaining exit permission proves to be a problem, refugee processing would be reassessed.

PHASING OUT ROME REFUGEE PROCESSING

INS expects to completely phase out the Vienna/Rome processing route by June 1990, when all the refugees in Rome depart for the United States. The number of Soviets entering Vienna for INS processing has declined from about 5,500 in December, 1989, to fewer than 40 in February, 1990. According to an INS official, INS is using both the U.S. Attorney General's guidance issued September 14, 1989, and the Lautenberg Amendment guidance to adjudicate refugee claims. Over 99 percent of the applicants interviewed in Rome during fiscal year 1990, as of February 28, 1990, had been approved for refugee status. INS processing statistics indicate that about 45,000 Soviet refugees will be processed in Rome during fiscal year 1990.

As of mid-March 1990, INS' fiscal year 1990 processing statistics for Soviet refugee applicants indicated that nearly 31,000 refugees and 40 parolees had departed for the United States, and that about 14,000 were approved for refugee status and were pending departure. At that time only 86 applicants were pending INS interviews, and an additional 120 Soviets were in Rome but had not yet submitted their refugee applications to INS.

Delays in receiving voluntary agency sponsorship assurances or medical reports have resulted in large numbers of approved Soviet refugees remaining several months in Rome. For example, in mid-March 1990, about 59 percent of the estimated 14,000 refugees pending departure were awaiting such documentation. A State official said that due to the tremendous surge in Soviet refugees since 1988, voluntary agencies' ability to supply timely sponsorship assurances has been strained. A State official said that since the number of Soviet refugees is decreasing due to the declining Rome refugee applicant population, the timeliness of sponsorship assurances there should improve. However, according to State and INS officials, this problem, in general, may continue in Moscow into the next few years if Soviet refugee admission ceilings remain at their current or higher levels.

COST COMPARISON OF REFUGEE PROCESSING IN MOSCOW AND ROME

Although a precise comparison of refugee processing costs between Moscow and Rome is difficult to make, our analysis of the refugee processing budgets for overseas expenditures for fiscal years 1989, 1990, and 1991, indicates that the program budget for Moscow processing in fiscal year 1991 could be less than one-half that of Rome for fiscal years 1989 and 1990. In fiscal year 1991, the first year of completely centralized Moscow processing, we estimate that the United States will spend about $1,000 per refugee admitted from Moscow for transportation to the point of resettlement in the United States, INS administrative expenses in Moscow and WPC costs. In contrast, our analysis shows that the United States may

[5] Preliminary questionnaires are also distributed by voluntary agencies n the United States, but the questionnaires distributed by the agencies are included in this number.

spend as much as $2,600 per refugee processed in Rome this fiscal year for care and maintenance, voluntary agency services, transportation to the point of resettlement in the United States, and INS administrative expenses in Rome. (See app. IV.)

Processing refugees in Rome is significantly more expensive, because, unlike in Moscow, the United States provides refugee applicants subsistence and administrative assistance while being processed. The United States has traditionally provided for the care and maintenance (housing and meals) of Soviet refugee applicants from their arrival in Vienna to their departure to the United States, or until INS denies their refugee claim. Additionally, the United States provides funding to voluntary agencies to assist Soviet refugee applicants through INS processing. Such assistance includes transportation from Vienna to Rome, medical examinations and help in preparing INS documentation. Care and maintenance expenses and voluntary agency services account for about 77 percent of the cost of processing refugees in Rome in fiscal year 1990.

## Appendix II—Centralized Soviet Refugee Processing Procedures

The following procedures apply only to Soviets registering for refugee consideration after October 1, 1989.

### REGISTERING FOR REFUGEE CONSIDERATION

Soviet seeking refugee status in fiscal year 1990 submit preliminary questionnaires to the WPC and are then considered refugee registrants. They obtain preliminary questionnnaires from the U.S. Embassy in Moscow, American Consulate in Leningrad, the WPC, relative or voluntary organizations in the United States or any other source (e.g., a duplicated copy of the form produced in the Soviet Union). Completed questionnaries are mailed to the WPC via international mail, through contacts in the United States, or through the U.S. Embassy or Consulate in the Soviet Union.

### PRELIMINARY PROCESSING

WPC processes preliminary questionnaires according to date received. WPC enters biographical data from each questionnaire into the Automated Refugee Tracking System (ARTS), assigns a case number, tentatively designates a refugee processing priority code, and determines whether an Affidavit of Relationship is required. Soviet citing relatives in the United States must have the relatives submit the affidavits, which are verified by INS before registrants' refugee processing tentative priority codes are finalized. For incomplete questionnaires, WPC notifies the Soviet citizen that additional information is needed before processing can continue.

Soviets with completed preliminary questionnaires and verified Affidavits of Relationships are eligible for INS interview consideration. ARTS generates eligible registrants for INS interview according to the following objectives:

(1) 50 percent of the interviews scheduled for a given month are for Soviets who applied for refugee status in fiscal year 1989, the remaining 50 percent are for fiscal year 1990 registrants.

(2) 80 percent of all interviews scheduled for a given month are for refugee applicants with ties to the United States, such as those with P-1 through P-5 processing priority codes.

(3) 20 percent of all interviews scheduled for a given month are for refugee applicants who are of national interest, such as those with P-6 processing priority code. These refugees have been defined to include Evangelicals, those claiming membership in the Ukrainian Catholic or Orthodox Church, and Jews with distant relatives in the United States.

Also, hardship cases are included in this group (including cases where the applicant missed the October 1, 1989, cutoff date for Rome processing and has suffered hardship, cases where the family unit was split, refugees of special concern whose admission is in the public interest, and all other refugees).

WPC notifies the applicants of their interview dates via international mail and, if possible, also through relatives in the United States. (The refugee registrants become refugee applicants once their interviews are scheduled.) The INS refugee application forms, which the applicants must submit to INS on their interview date, are included in the interview notification package. The applicants are also encouraged to bring an Affidavit of Support to the INS interview in order to initiate expedited parole processing, if necessary.

WPC provides the monthly interview schedule and brief bio-data on each case to the Embassy in Moscow.

### U.S. EMBASSY AND INS PROCESSING PROCEDURES

Refugee applicants arrive at the U.S. Embassy in Moscow with completed refugee documents. Embassy support staff review the documents for completeness and INS officers interview the applicants. At the end of the day, applicants are told whether they qualify for refugee or parole status and what additional information will be needed before they can depart for the United States.

Denied applicants' files are retained at the Embassy for two weeks to allow for Requests for Reconsideration. (Denied applicants are informed at the time of interview that the files will remain in Moscow for only 2 weeks. After this period, any motions to reconsider are sent to the WPC for review and adjudication, or if necessary, to schedule another interview in Moscow.)

INS officials at the Embassy send the results of the interview and interview packages to WPC to initiate post interview processing.

### WPC POST-INTERVIEW PROCESSING

WPC initiates security name checks on each applicant and sends biographical information to the Refugee Data Center in New York to initiate voluntary agency sponsorship assurances.

WPC prepares travel packets [1] for refugees and parolees and sends them to the Embassy in Moscow. Refugees purchase their own tickets to the United States and must show them when they pick up the travel packets. The Embassy in Moscow notifies WPC of refugee travel arrangements.

The travel packet and forms prepared at the United States' port of entry are returned to the WPC for holding until the refugees apply to adjust their refugee status or other INS service is warranted. At that time, INS sends the files to the local Refugee Data Center for permanent holding.

[1] The travel packet includes: INS admission forms, medical forms for Public Health, Customs Declaration, assurance documentation, and employment-related forms for the U.S. Department of Labor.

## Appendix III—Refugee Processing Priorities Effective October 1, 1986

### PRIORITY ONE (WORLDWIDE)

Compelling Concern/Interest: Exceptional cases of refugees (a) in immediate danger of loss of life and for whom there appears to be no alternative to resettlement in the United States or (b) of compelling concern to the United States, such as former or present prisoners and dissidents.

### PRIORITY TWO (WORLDWIDE)

Former U.S. Government Employees: Refugees employed by the U.S. government for at least one year prior to the claim for refugee status, as well as individuals who were not official U.S. government employees but who for at least one year were so integrated into the U.S. government offices as to have had the effect and appearance of U.S. government employees.

### PRIORITY THREE (WORLDWIDE)

Family Reunification: Refugees who are spouses, unmarried sons, unmarried daughters, or parents of persons in the United States. (The status of the anchor relative in the United States must be one of the following: U.S. Citizen, lawful permanent resident alien, refugee, [parolee] or asylee.)

### PRIORITY FOUR (AFRICA, EASTERN EUROPEAN/SOVIET UNION, AND LATIN AMERICAN REFUGEES)

Other Ties to the United States: Refugees employed by U.S. foundations, voluntary agencies, or business firms for at least one year prior to the claim for refugee status and refugees trained in the United States or abroad under U.S. auspices.

### PRIORITY FIVE (WORLDWIDE)

Additional Family Reunification: Refugees who are married sons or daughters, unmarried siblings, married siblings, grandparents, or grandchildren of persons in the United States; or more distantly related individuals who are part of the family group and dependent on the family for support.

### PRIORITY SIX (WORLDWIDE)

Otherwise of National Interest: Other refugees in specified regional groups whose admission is in the national interest.

## Appendix IV—Estimated Per Capita Costs for Soviet Refugee Processing

TABLE IV.1.—VIENNA/ROME: FISCAL YEAR 1990 ESTIMATED PER CAPITA

| | Refugees processed by: | |
|---|---|---|
| | HIAS [1] | Other agencies |
| State Department: | | |
| Care and maintenance [2] | $825 | $1,600 |
| Administrative and Processing | 615 | 327 |
| Transportation Loan [3] | 659 | 659 |
| Subtotal | 2,099 | 2,586 |
| INS: Rome administrative | 60 | 60 |
| Total | 2,159 | 2,646 |

[1] The Hebrew Immigrant Aid Society.

[2] Care and maintenance and administrative expenses differ because HIAS has agreed to provide some private support for these expenses, whereas the U.S. government fully reimburses such expenses of the other voluntary agencies.

[3] The total per capita for transportation loans includes $435 for travel to the United States and $224 for domestic travel and associated costs to point of resettlement.

Note: The U.S. Soviet refugee admissions ceiling for fiscal year 1990 is 50,000. State Department officials estimate that the United States will admit about 43,000 Soviet refugees from Rome and about 5,000 from Moscow. Some 35,000 from Rome will be fully-funded, as will be the 5,000 from Moscow. Approximately 8,000 from Rome will be "privately-funded" admissions for which the United States pays only care and maintenance. The remaining admissions, about 2,000, are unfunded as of March 15, 1990.

TABLE IV.2.—MOSCOW: FISCAL YEAR 1991 PROJECTED PER CAPITA

| | |
|---|---|
| State Department: | |
| Transportation Loan [1] | $913 |
| Washington Processing Center | 36 |
| Subtotal | 949 |
| INS: Moscow administrative | 113 |
| Washington Processing Center | 25 |
| Subtotal | 138 |
| Total | 1,087 |

[1] The total per capita for transportation loans includes $620 for travel to the United States and $293 for domestic travel and associated costs to point of resettlement. Prior to fiscal year 1991, the United States had not provided international transport loans to Soviet refugees leaving from Moscow; however, State Department plans to begin offering such loans in fiscal year 1991.

Note: Fiscal year 1991 estimates are based on 40,000 fully-funded Soviet admissions to the United States.

APPENDIX V—MAJOR CONTRIBUTORS TO THIS REPORT

NATIONAL SECURITY AND INTERNATIONAL AFFAIRS DIVISION WASHINGTON, DC

David R. Martin, Assistant Director Susan Gibbs-Joseph, Evaluator-in-Charge MaeWanda Michael-Jackson, Senior Evaluator Tana M. Davis, Evaluator.●

---

By Mr. RIEGLE (for himself, Mr. HEINZ, and Mr. PRYOR):

S. 2678. A bill to clarify the deductibility under the Internal Revenue Code of 1986 of liabilities incurred in connection with minimum premium plans; to the Committee on Finance.

TAX TREATMENT OF MINIMUM PREMIUM PLANS

● Mr. RIEGLE. Mr. President, I am introducing today, along with Senator HEINZ and Senator PRYOR, a bill that addresses a problem that places property and casualty companies in a catch-22 situation with the Internal Revenue Service over the treatment of termination reserves on minimum premium plans.

Property and casualty companies need legislative relief because the IRS has reached alternative, but inconsistent, conclusions on minimum premium plans. In two separate determinations—Technical Advice Memorandum 87-05-003 and GCM 39609—the IRS denied any unpaid loss deduction for the taxpayer's minimum premium plan reserves on the ground that the risk of loss does not arise until the policy terminates or until the employer ceases to make required payments. In the same rulings, however, the IRS denied an unearned premium deduction for the same amounts, arguing that the risk of loss already occurred. These two conclusions are inconsistent.

A minimum premium plan is a funding arrangement for accident and health insurance under which most of what would otherwise be paid as premiums is paid into a separate account which is then drawn upon by the insurance company to fund the payment of benefits under the plan. Economically, a minimum premium plan is indistinguishable from a conventional accident and health insurance plan.

The legislation I introduce today would clarify that amounts reflected as reserves or other liabilities on a property and casualty company's annual statement for future claim payments under minimum premium accident and health plans are properly deductible during the policy period.

Last fall, the Senate Committee on Finance included an essentially identical provision in its revenue reconciliation proposal. The provision was dropped, however, when all miscellaneous amendments were deleted on the Senate floor. During debate on budget reconciliation, it was stated by Chairman BENTSEN that if the IRS did not resolve this matter in a fair and equitable manner the committee would again consider the issue. Similar comments were made on the House floor by Chairman ROSTENKOWSKI.

The issue has not been satisfactorily resolved, and therefore it is necessary to proceed with legislation.

I urge other Members of the Senate to join with me in supporting this legislation.●

By Mr. BURNS (for himself, Mr. DASCHLE), Mr. CONRAD, Mr. PRESSLER, and Mr. BAUCUS:

S. 2679. A bill to protect irrigation, power, and recreation on the Missouri River; to the Committee on Environment and Public Works.

IRRIGATION AND RECREATION ON THE MISSOURI RIVER

Mr. BURNS. Mr. President, I rise to introduce a bill this evening. We have another situation growing in the upper Midwest, the high plains, and it is called drought. Eastern Montana, the Dakotas, are experiencing hardly any rainfall at all. Stream flow on the Missouri River has gone way down. Reservoirs along the upper Missouri and those drainages are continuing to go down. I have a bill that is cosponsored by Senator CONRAD of North Dakota, Senator PRESSLER of South DAKOTA, and Senator BAUCUS of Montana. I ask unanimous consent they be made cosponsors of this legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BURNS. What has happened along the Missouri River is that most of the people in the upper Missouri have been asked to give up some of their water just to maintain the barge traffic on the lower Missouri. This is the seventh, maybe the eighth year that we have experienced this kind of a drought with not much snow pack in the mountains and that water being down. We have very, very serious problems with power, with irrigation, with our recreation activity, and of course with the municipalities that depend on the flow of that stream.

Basically, what this bill does is it tells the Corps of Engineers that now is the time we hold some of that water to guarantee stream flow in the lower Missouri and hold some of that water to fulfill the needs on the upper Missouri.

Last year I saw fields as they were planted, and when the reservoir levels dropped water went below the levels of the intake pipes and of course irrigation stopped and we saw crops burn up. I do not think that the people of Montana and the Dakotas should be asked to sacrifice their only way to make a living for the sake of a little bit of barge traffic downstream.

It is my understanding that we have plenty of water in Louisiana, Texas, and Oklahoma. If we could turn that around and make it run uphill, we would sure do it. We cannot do that. We have to ensure that we maintain our supplies in the upper Missouri.

Mr. President, the Missouri River is the lifeblood of the State of Montana and other up river States. That lifeblood is being slowly drained away by the Corps of Engineers. The corps is draining the reservoirs of the upper Missouri in an attempt to keep the river downstream high to accommodate river traffic.

Mr. President, the newspapers have been filled with reports of excess water in our Southern States. The damage there is high. The costs are high and rising. But what isn't being reported is another damaging weather situation in another part of the country.

Mr. President, we are facing another year of drought in the northern Great Plains. Agriculture is our most important industry, tourism ranks second. Water is what drives our economy. With water we can make a good living. Without water we suffer.

We need the water for irrigation, for power generation, and for recreation. That is why, I, in good conscience cannot continue to stand by and allow our water to be drained from the lakes of Montana, North and South Dakota without doing something.
